Under its authority to transport buildings, complete, knocked down, or in sections, including all component parts, materials, supplies, and fixtures, protestant is only authorized to transport "component parts, materials, supplies, and fixtures" of those types of buildings which are capable of being so transported, although they may be transported either independently of, or in connection with, transportation of such buildings.—Owens Contract Carrier Application, 95 M.C.C. 586 (588, 590)*.

Protestant's authority to transport "prefabricated house and building sections," and "prefabricated house and building panels" has been consistently considered by the Commission to include paneled, sectional, or knocked-down buildings that retain their character as buildings; and therefore, its authority does not permit transportation of precast concrete slabs and beams, because, as distinct from prefabricated section or panels, they are not assembled or fabricated from recognized component building parts and they require extensive fabrication and finishing in place before a complete and functional section or panel of a building is created. Herein the shipper's products are of such size and construction that they are not complete; they are merely building materials that have been manufactured from basic raw materials.—White Bros. Trucking Co. Extension—Dayton, Ohio, 99 M.C.C. 389 (394-396).

Commodity descriptions in defendant's certificate for transportation of (a) Prefabricated and precut buildings or houses, etc., and (b) Buildings, complete, knocked-down, or in sections, etc., are closely related and are governed by "intended use test" which defines commodities carrier is authorized to transport in terms of their intended use. And, unquestionably, the Commission properly may identify commodities to be transported in terms of their use or intended use, in cases where need is shown for grant of authority whereby carrier may perform a complete service in a select field and, at the same time, be restricted to that field. In determining whether particular shipments are intended for use in required manner, carrier may presume they will be so used if the commodities are of a type predominantly used in that manner and it may transport them without further investigation if it has no knowledge of a contrary intent; on the other hand, if commodities involved have general utility in other fields, they may be transported only if carrier establishes that they are intended for the use required by its authority.—Miami Transp. Co. of Indiana v. Pre-Fab Transit, 107 M.C.C. 383 (387-8)*.

Defendant's specific authority to transport "prefabricated and precut buildings or houses, complete, knocked-down, or in sections, and all component parts necessary to the construction, erection, or completion of such buildings or houses, when shipped with same," does not embrace transportation of considered ornamental iron columns, in cartons, since the columns are generally not intended for use in prefabricated or precut structures and they do not qualify as "component parts" thereof because they were not moved with such a structure. Nor does the second portion of defendant's certificate, which authorizes transportation of "buildings, complete, knocked-down, or in sections, including all component parts, materials, supplies, and fixtures, and when shipped with such buildings, accessories, used in the erection, construction, and completion thereof, authorize it to transport considered shipment because, whether ornamental iron columns are handled in independent movement or not, they were not intended for use in the "buildings" which defendant may transport.—Id., pp. (388-390)*.

See also National Trailer Convoy, Inc., Extension—Initial Movements case, §204(b), n. 7 *Automobiles*.

Rejected shipments: [Vols. 19, 21].—See J & J Trucking Co., Inc., Contract Carrier Application, §209(a)(1), n. 25.

Stock-in-trade of drugstores, etc.: [Vols. 17, 18].—By applying the intended use test (96 MCC 522), the Commission determined that under its authority to transport "stock in trade of drug stores" respondent may handle shipments where the consignee is a drug store or the drug department of another store. In order to qualify as a drug store or drug department, the consignee must be actually engaged in dispensing drugs. If the shipment is merely consigned to an intermediary or to a storage facility, then it must be earmarked for eventual delivery to and sale in a drug store or the drug department of another store. On the other hand, a shipment not consigned to a drug store or drug department, and consisting of commodities not peculiar to, or predominantly a part of, the stock in trade of such consignee (such as alcoholic beverages or candy), could not be transported under the authority in question unless the ultimate consignee can be identified at the time the shipment is tendered to respondent for movement.—North Central Truck Lines, Inc., Invest. & Revoca., 117 M.C.C. 180 (194).

Respondent's refusal to operate within the limits of its authority to transport "stock in trade of drugstores," despite Supreme Court ruling that the commodity description is not ambiguous (355 US 554), resulted in cease and desist order, and an acknowledgement that continued violation may result in suspension or revocation of the authority.—Id. pp. 184, 195.

Store; equipment, supplies: [Vols. 17, 18, 21].—Neither bicycles nor plywood are commodities commonly or ordinarily dealt in either by retail and wholesale grocery houses across the country as a whole or by food business houses in the area of respondent's operations and are therefore not within the scope of respondent's authority to transport "such merchandise as is dealt in by wholesale, retail, and chain grocery and food business houses"; however, nails, staples, fencing and fencing wire are commonly offered for sale by retail and wholesale grocery houses in the area of respondent's operation, and may be transported under respondent's certificates.—Wiley & Sons, Inc.—Investigation and Revocation, 106 M.C.C. 686 (690-91).

The Commission decided in 94 MCC 663, 668, that the terms "office" and "store" are not synonymous. Therefore, applicant's authority to transport "uncrated store fixtures and store equipment" does not include authority to transport such commodities intended for use or future use in nonstore areas within these places.—North American Van Lines, Inc. Ext.—Overall, 107 M.C.C. 750 (761).

Petitioner's proposed interpretation of inherent restrictive terms of "store fixtures and store equipment" to all transportation of such commodities to any establishment without regard to ultimate intended use test was denied. In interpreting operating rights, actual terms of carrier's certificate must be construed, and descriptive language questioned herein is clear, intelligible, and suggests a single meaning.—Mural Transport, Inc., Interpretation, 111 M.C.C. 637 (640-1)*.

Supplies: [Vols. 12, 14, 16, 18, 19, 21].—Citing 61 MCC 329 (333) and 53 MCC 530 (533), the Commission reaffirmed its distinction between the terms "supplies" and "materials": The term "supplies" means those things consumed in, or necessary to, the maintenance and operation of a plant, factory, or business other than the raw materials or ingredients which go into the finished product or structure, whereas "materials" means those things used as ingredients or parts of the finished structure or product. The term "supplies" has a very broad meaning and should not be confused with "materials" or "ingredients". It embraces those things furnished for the purpose of operation, as distinguished from "materials", which are furnished for original construction.—Hilt Truck Line, Inc.—Investigation of Operations, 117 M.C.C. 9 (14).

If it had been the Commission's intent, when the considered rights first were issued, to grant to respondent's predecessor authority to transport the full range of commodities dealt in by grocery stores, appropriate language was readily available and in current usage at the time. Hilt argues that "grocery store supplies" must be regarded as such terminology, but the gap between the terms "supplies" and "commodities dealt in by retail grocery stores," the meaning of which when used in Commission certificates and permits being well established, is far too great. The only interpretation which validly may be accorded that commodity description ("grocery store supplies") limits the carrier to the transportation of those items which are used by grocery stores in the performance of such functions as the maintenance of their premises, recordkeeping, and accounting, and does not permit the movement of commodities to be offered for resale.—Id., pp. 16, 17.

Tractors: See Diamond Transp. System, Inc., Ext.—Tractors case, §204(b), n. 7 *Automobiles*.

Waste Products: Commission defined "waste" products as any product which has been or would ordinarily be discarded as worthless, defective, or of no use, including materials having undergone initial processing such as grinding, crushing, or compacting prior to involved transportation.—Transportation of "Waste" Products for Reuse, 114 M.C.C. 92 (107-9)*.

Woodchips: Commodity description "woodchips" in respondent's common carrier certificate found to authorize transportation of "woodshavings" as the dictionary descriptions of "chips" warrants inclusion of "shavings".—Puget Sound Truck Lines—Investigation & Revocation, 114 M.C.C. 25 (28-9).

Regulations of the Commission

35 FR 4754, Mar. 19, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, entire Part, §1056.1-§1056.18, revised, effective May 1, 1970.

35 FR 5551, Apr. 3, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, miscellaneous corrections of revised regulations (35 FR 4754).

35 FR 7123, May 6, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.6 Determination of weights, new subparagraph (e) *Exception*, added, effective June 1, 1970.

35 FR 8890, June 9, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.1(c) and §1056.12(a) modified, effective June 1, 1970.

35 FR 16935, Nov. 3, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.4 Accessorial or terminal services, etc., Order of Dec. 5, 1969 (335 ICC 698) reinstated and modified so as to become effective Dec. 1, 1970.

35 FR 19077, Dec. 17, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.11 Vehicle-load manifest; information required, amended by addition of new paragraph (b)(13), effective November 1970 [sic].

36 FR 158, Jan 6, 1971, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.4 Accessorial or terminal services, etc., order served Oct. 29, 1970 (35 FR 16935) modified so as to become effective on Feb. 1, 1971.

36 FR 21358, Nov. 6, 1971, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.6 Determinations of weights, paragraphs (b) and (3) modified, effective 30 days after date of publication in Federal Register.

36 FR 22579, Nov. 25, 1971, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.6(d) and §1056.7 amended, effective Jan. 1, 1972.

37 FR 7159, Apr. 11, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.3 amended by adding paragraph (d), §1056.7 summary added, and §1056.12(b) amended by adding a new last sentence, effective April 28, 1972.

37 FR 12324, June 22, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.10 Receipt or bill of lading; information thereon, revised, and §1056.20 Responsibilities and liabilities of principal carriers, added, effective July 31, 1972.

FR 14589, July 21, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce; reservation of vehicle space by shippers. Proceeding reopened for further consideration of rule prohibiting carriers from making estimates and/or charges based on vehicle space reservation, but solely with respect to shipments of the particular type of articles defined in §1056.1(a) (2) and (3); orders of Feb. 28, 1971 and Apr. 27, 1971 remain in full force and effect as to all other shipments. Effective on date of order.

37 FR 14308, July 19, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.19(a) corrected.

37 FR 17838, Sept. 1, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.9 (c) *Waiver of order for service*, added, effective Oct. 5, 1972.

38 FR 6992, March 9, 1973, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.6(d) *Reweighing of shipment*, corrected by amending first sentence.

Section 204. (c) [§ *304 (c) U.S.C.*] Investigation of complaints; orders.—[Unchanged. See vol. 11, p. 9391.]

Amendment, see footnote, p. 9392; historical notes, vol. 13, p. 11058, vol. 14, p. 11580.

25. Scope of issues.—[Vols. 9, 11, 12, 14, 17, 19, 21].—See Gateway Transp. Co., Inc., Investigation and Revocation case, §5(2), n. 50; Carl Subler Trucking, Inc., Modification of Certificate case, §212(a), n. 10.

26.—Moot questions.—[Vols. 12, 14-19, 21].—See Ben Blinder, Extension—Alternate Routes case, §207(a), n. 6 *Truckloads.*

27. —General-revenue cases.—[Vols. 12, 15-18].—Respondents' selection of 79 cost study carriers based on their percentage of the aggregate involved tariff revenues was in harmony with our usual order for proofs, but anticipated increases in expenses were computed voluntarily by 51 of the 79 carriers representing less than 57 percent of said revenues. Commission may reasonably infer that these 51 carriers restating expen-

ses were those in most need of increased rates and are thus not representative. Additionally, respondents' data as to affiliate transactions, traffic movement, revenue needs, and carrier efficiency were not sufficiently detailed or representative. Increased rates ordered canceled.—General Increase, Middle Atlantic and New England, 332 I.C.C. 820 (834-39).

Respondents have failed to show their proposed increases to be just and reasonable inasmuch as the "master frame" of 62 representative carriers was made on a contention that such carriers would carry 90 percent of total involved traffic but respondents conceded that they had no knowledge what such a total would be; moreover, both interstate and inapplicable intrastate traffic are commingled. Respondents' studies also lacked controls, audit provisions, and corrections to reflect interlining due to mergers. Such record fails to be representative of situation or to justify increases. Additionally, respondents' cost studies are defective for insufficient data on carriers involved and methods used, absence of supporting working papers, carrier affiliate data in an unacceptable summary form only, and failure of probative analysis of data regarding debt and equity capital.—Increased Rates and Charges, Pacific Inland Terr., 332 I.C.C. 845 (855-60).

Evidence herein proved respondents operate pursuant to efficient management but that such efficiencies have not produced adequate cost savings to preclude need for a rate increase. Proposed 5 percent increase on minimum charges and shipments under 1,000 pounds which will reduce already negative operating ratios but will not produce profitable ratios below 100 percent (the break-even point) were approved. But proposed rate increases of 3 percent on shipments of 1,000 to 5,000 pounds and over 5,000 pounds, applicable solely between certain territories, not approved as they are discriminatory because such increase is applied to traffic which is more profitable than rates between other territories and disrupts relatively equal interterritorial competitive situation without any appreciable improvement in operating ratios.—Increased Rates and Minimum Charges, South, 335 I.C.C. 77 (98-105)*.

Commission prescribed new rules applying to proposals by member carriers of 10 named rate bureaus for general increases or general adjustments of rates where the proposal would result in an increase of $1 million or more in annual operating revenues. Included are rules requiring that carriers' supporting evidence be filed and served concurrently with filing of the proposed schedule; such schedules must have an effective date 45 days after filing; and service of evidential support must be made on all parties participating in last formal general rate increase proceeding in affected territory. Rules were also prescribed for development of cost and traffic data, revenue need information, and affiliate data as specified in appendix II.—New Procedures in Motor Carrier Rev. Proc., 339 I.C.C. 324 (326-340).

Commission affirmed conclusions in prior report, 339 ICC 324, making the new procedures promulgated therein as to general revenue proceedings applicable to member carriers of 10 named rate bureaus. Many of these members are Instruction 27 carriers, and they account for approximately 90 percent of all revenues earned by all Instruction 27 carriers nationwide. The action of these carriers determines prevailing rate level, including amount of general rate increases on general freight. Commission modified its regulations for development of carriers' traffic study. The study group of carriers shall consist of those Instruction 27 and 9002 carriers which earn $1 million or more in annual operating revenues from issue traffic, or 1 percent or more of the total annual operating revenues of all carriers from issue traffic. Updating is not required for every individual increase or reduction but only those changes having substantial effect on revenues.—New Procedures in Motor Carrier Rev. Proc., 340 I.C.C. 1 (4-5, 9-10)*.

Cost study requirements modified to enable carriers to present cost data on a combined carrier basis inasmuch as prior regulation requiring disclosure on an individual carrier basis might adversely affect a carrier's competitive position. Also, procedures modified to permit updating of cost data on either an individual or composite carrier basis utilizing carriers whose revenues from issue traffic amount to 50 percent or more of their total revenues. Similarly, Commission modified its requirements as to data on carriers' revenue needs so that disclosure on an individual carrier basis is not required but authentication of data by underlying individual carrier data will be required as previously indicated. Also, a showing of carriers' present financial condition will be required. With regard to notification of public, both in respect to reaching of all interested parties, and in a timely manner, Commission concluded that compliance with Rule 22 of the General Rules of Practice requiring "simultaneous service" will be adequate and prior regulations in 339 ICC 324 modified to reflect this conclusion.—Id., pp. 12-17.

Commission herein instituted a proceeding with a view to modification of present regulations (49 CFR §§1102, 1104, 1105, 1303, and 1306) governing the filing and posting of notice and furnishing of data to the general public of proposed general increases in freight rates and passenger fares by rail and motor carriers.—Notice of Increases in Frt. Rates and Pass. Fares, 341 I.C.C. 589 (590-94).

See also General Increase, East-South Territory case, and General Increase-Rocky Mountain Territories case, §216(g), n. 65.

50. Evidence; admissibility, in general.—[Vols. 9, 11-19, 21].—In line with the rule enunciated in 353 US 657, which was explicitly held applicable to civil proceedings such as administrative hearings in 258 F. 2d 403, failure of the Bureau of Inquiry and Compliance to make available to respondents the requested reports and memoranda prepared by the Commission's district supervisor at the time of his investigation and which recorded events that were the subject of his testimony for possible use in impeaching the witness, is fatal to the witness' testimony and therefore renders it inadmissible. The application of the Jencks rule (353 US 657) is an absolute requirement, and leaves nothing to the discretion of the judge or the hearing officer to deny inspection when the witness does not use his memoranda in the hearing room. Only the defense is adequately equipped to determine the effective use of these reports and memoranda for the purpose of discrediting the government's witness and thereby furthering the defense. Therefore, it has the right to see the reports and memoranda in order to determine what use may be made of them.—Empire Truck U-Drive-It, Inc., Investigation, 96 M.C.C. 29 (33).

While 80 percent of the materials requested by respondents were lost or destroyed before completion of their cross-examination of the witness, and some of requested materials apparently were not prepared by the witness or do not constitute reports by him reflecting the events or activities which were the subject of his testimony, and, therefore, do not fall within scope of the Jencks rule, the loss of those materials and inability of the Bureau to make them available to respondents rendered witness' testimony inadmissible. Although upon further hearing it might be determined whether the 20 percent which were still in existence include in their entirety the pertinent memoranda and reports of the witness, the damage done cannot so easily be repaired since the greater part of the materials requested by respondents were prepared by witness in the course of his investigation. In the circumstances, even if the Bureau could assure that the witness's reports were entirely embraced by the 20 percent still extant, respondents could not be certain that this was the case. The loss of these materials and the inability of the Bureau to make them available rendered that testimony inadmissible.—Id., pp. 33-4.

Although it is frustrating to foreclose consideration of an extensive part of the evidence on the basis of a single point of law, the Jencks rule is an important safeguard of the respondents' rights and is essential to procedural fair play which is inherent in the very nature of administrative proceedings; like the courts, the primary interest of the regulatory agencies must be that justice is done. The fact that in an investigation proceeding it is often necessary to make a principal witness of the individual who conducted the Commission's preliminary investigation, creates unusual problems for the defense because there is sometimes a tendency to give undue importance to the testimony of the investigator. This situation underlines the importance of the Jencks rule as a safeguard of the respondents' right to an impartial hearing, and, although the Jencks rule may be considered a handicap to the government in its case, there are no corresponding special rules of evidence to enhance the testimony of the investigator by making testimony by him admissible where it otherwise could not be admitted.—Id., p. 34.

Where one of respondents' own witnessess testified it had discontinued providing service at involved Kansas points on l.t.l. traffic, all such traffic being interlined with other carriers and only volume shipments made in company-owned equipment, evidence is more than sufficient to justify examiner's findings as to respondents' cessation of service at involved points; therefore, it is unnecessary to discuss alleged inadmissibility (on grounds of hearsay) of testimony of Bureau of Inquiry and Compliance witness.—Pacific Intermountain Exp. Co.—Investigation, 96 M.C.C. 604 (606-7).

Jencks Rue's applicability in administrative proceedings was not overruled by 224 F. Supp. 457, nor was it repealed by Jencks Act, which applies only to criminal cases. Such rule requires the government to make available to defense reports and memoranda prepared by its witnesses recording events which are subject of their testimony, for possible use by defense in impeaching said witnesses. Thus, Jencks rule does not impugn the witnesses' veracity, but is primarily a check on reliability of their memory. Therefore, failure of the Bureau to make available to respondent those reports and memoranda made by witness to record events to which he testified renders his testimony inadmissible; and, although it might have been feasible to cure Bureau's refusal to provide reports and memoranda if foundation had been laid to show that they were destroyed in accordance with routine administrative practice (323 F. 2d. 818), no such foundation has been provided. Consequently questioned testimony is not considered.—Barnes Truck Line, Inc., Investigation & Revocation, 102 M.C.C. 281 (283-5).

The Commission disagreed with the administrative law judge's ruling that struck from the record reference to all service refusals or failures on respondent's part which occurred more than a year prior to the date of hearing. Violations should be subject to action on the part of the Commission regardless of their having occurred more than a year previous to the date of the hearing.—Braswell Motor Frt. Lines, Inc., Investigation, 118 M.C.C. 392 (397).

See also United Buckingham Freight Lines v. United States case, §216(b), n. 102.

51. Application of principles of res judicata and stare decisis.—[Vols. 13-19, 21].—Though the doctrine of *stare decisis* does not apply to decisions of administrative bodies, consistency of administrative rulings is essential, for to adopt different standards for similar situations is to act arbitrarily. However, there is no inconsistency between the Commission's conclusion that plaintiff's certificate authorizing it to serve all points in North Carolina as off-route points—but not specifically restricted against service outside that State—did not authorize any service at Chesapeake, Va., and its position in earlier cases wherein the certificates issued were specifically restricted against service across state lines. The presence or lack of such a specific restriction in the certificate does not extend or decrease the territory carrier may serve; thus, it is immaterial that plaintiff's certificate contained no such restriction, since it was limited territorially either with or without specific words of limitation.—R-C Motor Lines, Inc. v. United States, 350 F. Supp. 1169 (1172-3)*.

52. Complaints.—[Vols. 17, 18, 21].—Supporting shipper, manufacturer of chemicals and fertilizers, has supported 26 applicants for authority to transport chemicals and fertilizers. Shipper now supports applicant because it alleges that many of the authorized carriers do not have proper equipment available to transport its commodities. A shipper that supports a successful applicant should not be foreclosed from obtaining adequate transportation services elsewhere if it can show that the carrier granted authority has not produced the expected service and that a need still exists. However, the fact that a shipper successfully supports the granting of authority to 26 carriers and still does not obtain service to its satisfaction, raises a question as to the efficacy of our application procedures. While we are not persuaded that the shipper has a need for additional service, we will direct our field staff to investigate the unsubstantiated allegations of the shipper with a view to determining whether a formal investigation proceeding should be instituted, and whether there has been a trifling with our application procedures. — Umthun Trucking Co., Extension—Colorado, 108 M.C.C. 669 (674-5)*.

53. Consolidation of proceedings.[Vols. 15-19, 21]—In suit to set aside Commission order denying plaintiff's application for common carrier authority, plaintiff's argument that, due to fact that 32 applications for similar authority were consolidated and considered in a joint proceeding, the Commission failed to consider its case on its merits, misinterprets the nature of the one single consolidated proceeding to which plaintiff was a party. To require the Commission to conduct separate proceedings in such a situation would be to saddle it with an unworkable burden. Moreover, there is much to be gained in a consolidated proceeding; not only does the Commission benefit in having the various applications for similar authority in an area joined together, but the parties benefit as well in that they may interrogate witnesses who might not otherwise be present; also, it serves to accommodate the convenience of all the parties and to make a great deal of relevant testimony available to the Commission, thus leading to a more rational decision based on as much evidence as is feasibly obtainable.—Mississippi East, Inc. v. United States, 301 F. Supp. 1332 (1334-5)*; Yourga Trucking, Inc. v. United States, 308 F. Supp. 625 (628)*.

Appearance by a person in one proceeding, heard with another on a consolidated record, does not confer on that person the status of a party to all the embraced proceedings; this can only be accomplished by compliance with provisions of the Commission's Rules of Practice.—S & C Transport Co., Inc., Investigation and Revocation, 96 M.C.C. 642 (644).

Commission denied protestant's request that its application for authority essentially identical to authority sought herein by applicant be consolidated in this proceeding. Commission's right to consider applications separately or in combination is a well established matter of administrative discretion, and denial herein is based upon concept of fairness of opportunities to all parties, effective Commission procedures, and the public interest. Commission rejected protestant's claim that applications for identical motor operating rights must be consolidated in a single proceeding. Protestant's reliance on this doctrine is based on 326 US 327, but such reliance is ill-founded as applications for motor operating rights, unlike those of the same radio station rights (at issue in the Supreme Court case), are seldom mutually exclusive, as this Commission may authorize any number of motor carriers to perform a service upon a showing of public need.—Texas-Oklahoma Express, Inc. Ext.—Oklahoma Points, 110 M.C.C. 769 (773).

See also Lake Shore Motor Freight Co. v. United States case, APA, 5 USC, *Procedure.*

55. Full hearing.[Vols. 9, 11-14, 16-18, 21].—See United Buckingham Freight Lines v. United States case, §204(c), n. 215.

60. Parties and notice.—[Vols. 13-19, 21].—See Carl Subler Trucking, Inc., Modification of Certificate case, §212(a), n. 10; Oil Country Iron or Steel Pipe, Midwest to Okla. & Tex. case, §13(1), n. 37.

75. Official notice.—[Vols. 9, 11-19, 21].—The Commission, in interpreting a carrier's Keystone commodity description, may take official notice of common knowledge that there are numerous specific items which wholesale and retail concerns in a particular line of business handle. However, the Bureau of Enforcement's apparent reliance on common knowledge that certain articles are not ordinarily carried by such concerns is negated by respondent's affidavits that several of the items in question are, in fact, commonly offered for sale in the type of business involved in the area of respondent's operations, and as to them the bureau has failed to meet its burden of proof. However, where there is no common knowledge to enable to Commission to take official notice, and the respondent's specific evidence is not persuasive, it is clear that such commodities are not commonly or ordinarily dealt in by the particular wholesalers or retailers, and thus are not within respondent's authority.—Wiley & Sons, Inc.

—Investigation and Revocation, 106 M.C.C. 686 (689-90).

120. Motions.—[Vols. 12, 16, 18, 19, 21].—By letter treated as a motion to strike, applicant urges that protestant's reply to its exceptions is in essence a challenge to the examiner's findings and conclusions, hence constitutes late-filed exceptions. That contention is without merit, since review of the examiner's recommendations on exceptions is de novo; motion to strike denied. However, protestant's characterization of the motion as having "gone beyond the bounds of propriety" is unwarranted, and request for censure of applicant's counsel is denied as calling for extreme action by the Commission, which is clearly unnecessary.—D & M Taxi Co., Inc., Common Carrier Application, 96 M.C.C. 439 (440).

126. Burden of proof.—[Vols. 15-19, 21].—Protestant motor carrier association has met burden of proving respondents' rates on shipments of chemicals, drugs, and related articles from New Jersey and New York to Chicago unlawful as the assailed rates do not cover respondents' out-of-pocket costs for the service rendered. The burden of proof now shifts to any respondent who would make a contrary showing.—Chemicals, Drugs, and Related Articles, 335 I.C.C. 601 (606).

Complainants have failed to sustain their burden in attempting to show that defendant irregular-route carrier unlawfully provided regular-route service; their reliance on 47 MCC 23 is not well placed, since distinction therein between regular and irregular-route service applies to the operation of irregular-route carriers of general or diverse commodities. And while defendant's *Mercer* description embraces many commodities, it is tailored to meet requirements of the gas and oil field industry and, therefore, is not within purview of the *Brady* criteria, 47 MCC 23. Furthermore, fact defendant transported substantial less-than-truckload traffic does not alter situation because "even if an operation involves the handling of a large proportion of less-than-truckload shipments for a number of shippers it may properly be considered an irregular-route service where the particular needs of the shippers necessitate such a service". Complaint dismissed.—Western Truck Lines v. J. H. Rose Truck Line, Inc., 100 M.C.C. 350 (353-4).

The burden of proof is upon complainant to establish material allegations of the complaint; it is not relieved of this burden by defendants' failure to submit sworn testimony or defendants' refusal to admit or deny the allegations of the complaint. However, should complainant establish a prima facie case, defendants would receive an unfavorable decision which could entail an order requiring them to cease and desist their unauthorized operations. Here complainants have made their prima facie case by showing that defendant A-1 Coach has not restricted the performance of its broker operations to Brooklyn, but has established offices in Manhattan where it has been holding itself out to engage, and has engaged, in the arrangement and sale of transportation not authorized by its license; the evidence also establishes that Sheldon Goldman and Travelers' Bus Service, Inc., individually and collectively, have been holding themselves out to engage in broker operations, and that Travelers' Bus Service, Inc., has actually performed such operations without authority. Cease and desist order entered.—Allied Bus Corp. v. Goldman, 103 M.C.C. 559 (568-9).

The burden of proof is on complainant to show that the considered traffic is intrastate in character and this complainant has not done; it has failed to show that defendant is or has been transporting essentially intrastate traffic marked as interstate traffic. This conclusion, with respect to many doubtful shipments, is largely due to insufficient evidence. Fact that defendant holds no intrastate authority for certain considered movements should not of itself condemn what appears, as a result of the out-of-state routing, to be ostensibly interstate movements, and lead to characterization of the traffic as intrastate.—Missouri Pub. Ser. Comm. v. Missouri Arkansas Transp. Co., 103 M.C.C. 641 (647-9).

The burden is on the carrier and shipper interests seeking modification of a minimum rate order to show through material and convincing evidence that such modification is justified. Broad general statements pertaining to transportation and competitive conditions surrounding movement of considered traffic do not establish that application thereto of the minimum rate order is unjustified, nor do they show competitive disadvantage to the parties; on the contrary, it is clear that the requested modification would vitiate the benefits resulting from the order. However, since the record warrants some modification of considered minimum rate order and since the granting of such relief would not affect the beneficial results of the order, it is further modified by removing from requirements thereof the commodities specified.—Oilfield Equipment to and between the Southwest, 106 M.C.C. 298 (309-10)*.

The Bureau of Enforcement fails to meet its burden of proof when it apparently relies on common knowledge that certain items are not ordinarily carried by wholesale, retail, and chain grocery and food business houses, since respondent negates this reliance by establishing through affidavits that these items are, in fact, commonly offered for sale by such businesses in the area of respondent's operations, and are accordingly within the scope of respondent's certificate.—Wiley & Sons, Inc.—Investigation and Revocation, 106 M.C.C. 686 (689).

See also International Transport, Inc. v. United States case, APA, 5 USC, *Burden of proof.*

145. Presumptions.—[Vols. 14, 19].—See Winter Garden Freezer Co., Inc., Investigation, §203(c), n. 5.

205. Proposed reports.—[Vols. 14, 15, 17, 19, 21].—Exceptions to examiner's statement of facts directed to his employment of terms such as "assert" and "claim," etc., and to his failure to make positive findings of facts in treating the testimony of certain witnesses are unfounded. An examination of the examiner's report reveals that he so characterized certain testimony where he entertained some doubt concerning its reliability, and that in his further consideration of this testimony he resolved his doubts and indicated what he considered as the true facts, at least as they bear on the outcome of this proceeding. Thus, considered in the context of his entire report, the examiner did make positive findings of facts, and has supplied an objective and comprehensive statement which has provided an ample basis for consideration of the issues raised on exceptions.—Empire Truck U-Drive-It, Inc., Investigation, 96 M.C.C. 29 (34-5).

See also Carl Subler Trucking, Inc. v. United States case, APA, 5 USC, *Procedure.*

206. Exceptions.—[Vols. 15-19, 21].—Different attorneys for respondent filed separate exceptions to examiner's report; while this method of pleading is not specifically prohibited by the Rules of Practice, language of rule 1.96 clearly contemplates that only one set of exceptions be filed by each party. However, since the second exceptions filed raise no new issues and are directed solely to the examiner's ultimate conclusions, no useful purpose would be served by excluding them.—Iron and Steel Articles, Wilmington to Points in N.C., 323 I.C.C. 740 (741)*.

Those portions of applicant's exceptions which cite rates of protestants and of automobile rental agencies are not supported by any evidence in the record and therefore are stricken; however, the reference to transportation of repossessed automobiles by protestants contains no claim of the truth of any facts outside of the record, and is allowed to stand.—Autocar Shipping Co. Common Carrier Application, 96 M.C.C. 357 (360).

Protestant's exceptions filed by its counsel, who owns 50 percent of its stock, are intemperate in accusing the hearing examiner of bias and prejudice, when that grave allegation is completely unsupported by the record and no serious effort is made in the exceptions to support it. However, the legitimate arguments raised therein on protestant's behalf will be considered in order not to penalize it for the inexcusably overzealous pleading of its counsel, notwithstanding his stock interest.—D & M Taxi Co., Common Carrier Application, 96 M.C.C. 439 (440).

215. Modified procedure.—[Vols. 17-19, 21].—See also Ashworth Transfer, Inc. v. United States, at §206(b), n. 25; Carl Subler Trucking, Inc., Extension, at §206(b), n. 22 evidence; Howard Hall Co. v. United States, §206(b), n. 25; and T. J. Claveau Transp., at 28 USC §2325, n. 7.

The Commission's Rules of Practice as to modified procedure, admittedly, are not inflexible and can be administered liberally; and, in action to set aside orders in complaint proceeding (assailing certain motor rates) handled under modified procedure, it would be unjust to affirm the commission's orders on the basis of its modified procedure rules when liberal administration of those rules would have permitted reception of evidence on the basic issue to be decided. An administrative agency must be permitted to terminate its proceedings at some time, but it should not do so by decision and order on an issue as to which a party was denied opportunity to present evidence; rules of procedure, whether modified or not, should never be used to defeat or even to modify justice. Administrative agencies, as the sole representative of the public, must see that all pertinent facts are adduced when the parties fail to put them in evidence. Commission report and orders vacated and annulled; case returned to the Commission for a full hearing as to compensativeness of assailed truck rates.—United Buckingham Freight Lines v. United States, 288 F. Supp. 883 (886-7)*.

While validity of the Commission's modified procedure rules on appropriate applications is not questioned in action to set aside considered orders in Commission proceeding, handled under modified procedure, on defendant carrier's application for operating authority between Belle and Lamar, Mo., the Commission is authorized to issue rules and regulations only as provided by statute; and, not more than three States being involved, provisions of §205(a) required that the application be referred to a joint board composed of a representative of State of Missouri for appropriate proceedings. Therefore, the Commission's denial of petition by plaintiff (protestant) for referral of the application to a joint board and its disposal thereof under modified procedure, when highly controversial facts were in dispute, was arbitrary and without a rational basis. Commission orders under review are set aside and annulled; the Commission should proceed to consider defendant carrier's application in accordance with requirements of the Act.—Jones Truck Lines, Inc. v. United States, 321 F. Supp. 821 (824-6, 829)*.

In action for vacation of Commission order granting operating authority in an application proceeding which was assigned for disposition under modified procedure by the Commission's review board, although the board accepted as true the charges leveled against applicant for a certificate to operate in two States, inasmuch as there were bona fide issues as to applicant's fitness and the need for its service, the Commission had a statutory duty to refer the application to a joint board for determination; and, in absence of such referral, order granting the certificate must be annulled.—Land-Air Delivery, Inc. v. United States, 327 F. Supp. 808 (811)*.

250. Investigations by Commission.—[Vols. 14, 15, 17-19, 21].—See also Greyhound Lines, Inc., v. Allen, at §202(b), n. 20; Murphy Motor Freight Lines, Inc.—Investigation, at §204(e)(f), n. 12; and Uxbridge Motor Lines, Inc.—Investigation of Operations, at §212(a), n. 35.

Investigation proceeding appealed from was instituted by the Commission, on its own motion, under §§204(c) and 212(a) into intervening defendant's carrier operations, the order stated that investigation was instituted to determine if carrier was conducting operations not authorized by its certificates, and the carrier (who proceeded at every step on advice of counsel) conceded that it had notice of the investigation and that it was aware of prior proceeding interpreting considered certificate—then held by its predecessor—as not permitting cross-hauling; thus, it cannot be argued that defendant carrier did not have notice that proper scope of the investigation might extend to extraneous matters including inadvertent issuance of a prior certificate. Therefore, the Commission's actions (1) in interpreting considered certificate (which, through inadvertence, incorrectly described the predecessor's rights succeeded to by defendant carrier) as permitting cross-hauling and (2) then discontinuing the investigation, without further findings, are procedurally deficient.—Akers Motor Lines, Inc. v. United States, 286 F. Supp. 213 (222, 223-4)*.

Commission construction of, together with the inadvertent issuance of, the certificate in question had the effect, albeit indirectly, of conferring on the carrier operating rights it did not acquire from its predecessor and which, pursuant to the prior proceeding, it was foreclosed from exercising; however, neither the substantive nor procedural requirements of relevant statutes have been conformed to. Since the Commission made no finding as to need for the cross-haul service carrier is now free to perform, and stated it was not deciding whether the certificate could be modified on the basis of inadvertent issuance because such action would require opportunity for notice and hearing, it acted in disregard of its statutory mandate in discontinuing the investigation with the result that carrier is permitted to cross-haul. Order set aside and case remanded for further proceedings in accordance with the court's instructions.—Id., pp. 222-3, 225-6.

Although respondents' operations in foreign commerce to and from Mexico were unauthorized under its certificates of registration issued pursuant to §206(a)(7), the investigation proceedings are discontinued since it has not been shown conclusively that respondents continued such operations other than in good faith and under color of right, and since there is a finding in the extension proceedings that certificates of public convenience and necessity should be granted to respondents authorizing such operations.—Imperial Truck Lines, Inc.—Common Carrier Application, 106 M.C.C. 741 (751, 753-54).

In view of the corrective measures taken by L & M Express (Investigation into its operations and its application for extended authority were heard on a consolidated record), cease and desist order not entered, because, although found to have been operating in violation of §206(a) of the Act and in violation of the Commission's regulations governing bills of lading, drivers' logs, and extension of credit, at the time of the hearing it appeared to be operating in substantial compliance with the Act and related regulations. However, L & M is admonished to take immediately any steps which may be necessary in order to remove opportunities for recurrence of any improper practices. Investigation discontinued.—L & M Express Co., Extension, 106 M.C.C. 334 (338-9).

This investigation was instituted to determine whether respondent's transportation of edible gelatin violates its authority to transport meat, meat products and byproducts from meat packinghouses. Respondent made a motion to dismiss the investigation on ground that even though the shipper for which it transports gelatin is not a packinghouse it is an integral part of its parent company which is a meat packinghouse. Upon Commission's overruling of this motion, respondent ceased questioned service and applied for appropriate authority to transport edible gelatin. Such facts convince us that questioned service was performed in good faith and under color of right; investigation discontinued.—Rowley Interstate Transp. Co., Inc.—Investigation, 110. M.C.C. 285 (291).

Investigation of respondent shippers transportation operations showed that such operations were bona fide private carriage as defined by §203(a)(17) and exempt from this Commission's regulation. Investigations discontinued as the Commission found no justification for establishing general standards for defining private carriage as such standards would be very difficult to formulate and possibly misleading.—Personnel Service, Inc.—Investigation, 110 M.C.C. 695 (711).

Investigation of respondent's transportation of "woodshavings" found not to be unauthorized transportation as commodity description "woodchips" in respondent's common carrier certificate was found to embrace "woodshavings". Investigation discontinued.—Puget Sound Truck Lines —Investigation & Revocation, 114 M.C.C. 25 (29).

Upon investigation, Commission instituted a rulemaking proceeding to determine the effect of a population decrease of a municipality on the implied motor carrier authorities to serve the base municipality. Order in instant case withheld pending outcome of this rulemaking proceeding.—Mercer Motor Freight, Inc.—Investigation, 114 M.C.C. 447 (449-50).

In an investigation initiated by the Commission, it was held that the operations of Skyline Transport, Inc. were in violation of

§206(a) of the Act, and the terms, conditions, and limitations of the certificate of public convenience and necessity theretofore issued. Cease and desist order issued.—Skyline Transport, Inc.—Investigation & Revocation, 115 M.C.C. 807 (827).

While the Commission recognizes that it is prudent for a businessman engaged in bona fide lumber brokerage operations to use all legitimate means to enhance his profits and to minimize his losses, the virtual elimination of all risks through the rendition of a transportation service and the receipt of an assured return persuaded the Commission that the transportation service provided must be considered that of a for-hire carrier. Cease and desist order issued.—Boucher—Investigation of Operations, 117 M.C.C. 480 (486).

In an investigation instituted on the Commission's motion into former illegally performed operations, respondents were issued a cease and desist order even though there was no indication of bad faith or willful misconduct, or of any intention to resume participation in illegal operations. Cease and desist orders are corrective in nature, and are a necessary prerequisite for further enforcement action should the involved violations either continue or be resumed.—Collins, Ford, Longacre, Patterson—Investigation, 117 M.C.C. 628 (631-2).

251. Entry of order.—[Vols. 19, 21].—See also E. A. Gallagher & Sons v. Cleveland General Transport, at §212(a), n. 10.

A cease and desist order will be entered against respondent's principal stockholder as well as against respondent corporation and respondent personnel registry. Stockholder's claim that considered leases were entered into by respondent corporation and that he has participated in the activities under investigation solely as an employee of that respondent is unfounded; he has had long experience in transportation and in the leasing business prior to the institution of operations under consideration, and has been respondent's sole manager since its inception. It is evident that he has the ability to conduct similar unlawful operations himself, through respondent, or through new corporate entities in the future.—Empire Truck U-Drive-It, Inc., Investigation, 96 M.C.C. 29 (45).

Since respondent association is found not to be a lawfully constituted agricultural cooperative within requirements of the Agricultural Marketing Act and therefore not entitled to operate under exemption of §203(b5), and the other respondents have benefited from its unlawful transportation operations as either employees, members, or nonmember shippers, cease-and-desist order is entered against all respondents. And though such order may be directed only against persons who were made parties respondent to the investigation, the association's non-respondent members and shippers are admonished to refrain from participation in any future unlawful operations by it.—Agricultural Transp. Assn. of Tex. Investigation, 96 M.C.C. 293 (304)*.

The examiner found that respondent has been conducting unauthorized transportation of new store fixtures under its household goods authority in violation of §206(a) of the Act, and recommended the entry of a cease and desist order contingent and effective upon any subsequent denial of the application for and the termination of temporary authority operations corresponding to those found to be unauthorized under the presently held authority of respondent. After notice and hearing in an investigation proceeding, upon finding that a motor carrier has not complied with the provisions of part II of the Act, we have duty, under §204(c) of the Act, to issue an appropriate order to compel the carrier to comply therewith. Inasmuch as the entry of a cease and desist order herein against the unauthorized transportation of new store fixtures under household goods authority will not preclude respondent from lawful operations under any temporary authority and its certificates, the effect of the order will not, as recommended by the examiner, be contingent or conditioned upon the ultimate disposition of any other proceedings. Cease and desist order entered.—American Red Ball Transit Co., Inc.—Investigation, 108 M.C.C. 774 (775, 777).

Entry of order in instant proceeding withheld pending final determination of rulemaking proceedings herein instituted to deter-

mine the proper interpretation of defendant's authority to serve points within 10 miles of Nashville, Tenn., in light of changed political circumstances resulting in formation of new municipality embracing said city.—Hayes Lines, Inc. v. Gateway Transportation Co., Inc., 111 M.C.C. 778 (780-1)*.

Transportation of college students having been found to be unauthorized for-hire transportation, a cease and desist order was entered against such operations and investigation discontinued.—Dorsey Bus Co., Inc.—Investigation of Operations, 113 M.C.C. 574 (578).

Transportation of rolls of newspaper inserts in continuous rolls printed on one side only found to be unauthorized interstate transportation as such commodity does not fall under the §203(b7) exemption for "carriage of newspapers". A cease and desist order was accordingly entered as to such operations.—Southern Express, Inc., Investigation of Operations, 113 M.C.C. 628 (632).

Section 204. (d) [§*304(d) U.S.C.*] Application of sections 14 and 16(13) of this title.—[Unchanged. See Vol. 11, p. 9393.

Amendment, see footnote, p. 9393.

Notes of Decisions

Volume 9-p. 7939; Volume 11—p. 9393; Volume 12—p. 10369; Volume 13—p. 11060; Volume 14—p. 11583; Volume 15—p. 12187; Volume 16—p. 12835; Volume 17—p. 13527; Volume 18—p. 14323; Volume 19—p. 15565; Volume 21—p. 17177.

1. Reports of the Commission.—[Vols. 9, 12-15, 17, 18, 19, 21].—See also Carl Subler Trucking, Inc. v. United States, at APA, 5 USC, Reports; HC & D Moving & Storage Co., Inc. v. United States, at 28 USC §2325, n. 40; Mississippi East, Inc. v. United States, at §206(b), n. 25; and National Trailer Convoy, Inc. v. United States, at §207(a), n. 24.

In suit to set aside Commission decision denying multiple extension applications (heard on a consolidated record and the subject of a single report) the Commission is under no duty to make specific findings with regard to each individual applicant. The Commission is required to file a written report disclosing the conclusions along with its findings and order; also, the law requires that it make findings on those issues of fact and law which are material to the case, but not necessarily on every subordinate contention submitted to it. Decision under review has been compiled with more than adequate definitiveness to inform the parties to instant suit of the basis for the Commission's findings and conclusions with respect to all relevant matters in the suit, and it is in conformity with the evidence before the Commission; entire order of the Commission is sustained.—Lake Shore Motor Freight Co. v. United States, 310 F. Supp. 957 (960, 961)*.

Plaintiffs' contention that the Commission's "DANDO" procedure, used in application proceeding under review, denied them (protestants in Commission proceeding) due process of law, found to be without merit. Use of the "Short Form Decisional Process"—referred to as "DANDO"—is discretionary with the Commission and has been held by many courts to be permissible. Also, as seems to be settled law, where the Commission finds no material error in the statement of facts and conclusions by the hearing examiner, it is not required to prepare a detailed report but may affirm and adopt that of the examiner as its own. However, when "DANDO" procedure is used, it means that the Commission's action stands or falls on the examiner's report.—Carolina Freight Carriers Corp. v. United States, 323 F. Supp. 1290 (1296)*.

Section 204. (e), (f). [§*304(e), (f) U.S.C.*] Use of motor vehicles not owned by motor carriers.—[Unchanged. See volume 17, p. 13527.]

Cross Reference

See §202(a), n., 10, vols. 15-17, established Note Numbers before §204(e), (f) was enacted.

Historical Note

The Commission recommends that §204(e) be amended to grant standby authority to the Commission to regulate fuel compensation provisions of owner-operator contracts in transportation emergencies.—Annual Report, 1975, p. 77.

Notes of Decisions

Volume 18—p. 14324; Volume 19—p. 15566; Volume 21—p. 17178.

2. Construction and interpretation.—[Vol. 21]—The Commission has always recognized the legitimate needs of motor carriers to lease equipment from others so as to enable them to operate to the full extent of their authority. What is illegal and has always been condemned is the subterfuge of a lease of equipment when, in fact, the so-called lessor is actually the carrier performing the transportation service. When the lessor is merely using the operating rights of the lessee and paying the lessee for such use, it is an unauthorized lease of operating authority.—Tanksley Transfer Co., Ext.—Points in Four States, 110 M.C.C. 674 (676).

Rules governing the leasing of equipment by motor carriers of property were established in 68 MCC 553, 559, and these rules are codified at 49 CFR 1057. Subject to certain exceptions, the regulations require that a lease specify the period for which it applies and that there must be a period of at least 30 days during which the equipment is to be operated for the lessee by the lessor. The purpose here is to assure that the operations are actually those of the lessee.—Id., p. 677.

The instant proceeding is a typical example of a nominal attempt at compliance with lease and interchange rules resulting in an operation which violates the basic underlying principles of the regulations. The lessor is the party in control of the equipment, and applicant admits the described arrangement is nothing more than a lease of operating authority. Applicant's past unlawful operations, however, were not performed in such disregard of the regulations as to merit a finding that it is not fit to perform the service required by public convenience and necessity. Respondents admonished; extension granted.—Id., pp. 677-9.

10. Leasing and interchange of vehicles.—[Vols. 18, 19, 21].—See also Keller Industries, Inc.—Declaratory Order, at §203(c), n. 3; Owens Contract Carrier Application, at §203(a)(15), n. 1; Point Transfer, Inc., Extension, at §207(a), n. 25 existing carriers; United States v. Webb, at §222(c), n. 5; and Uxbridge Motor Lines, Inc.—Investigation, at §212(a), n. 35.

Respondent Murphy's lease agreement, under which shipments are transferred at break-bulk points to "cartage operators" for ultimate delivery over Murphy's authorized routes to consignees at small nearby communities, is not unlawful; since Murphy has direct, primary, and continuing responsibility to the public from origin to destination, the agreement is not in violation of Murphy's duty to the public. Under this lease the lessor (cartage operator) agrees to (1) lease specific vehicles to lessee (Murphy), (2) maintain, service, and keep vehicles in good repair, according to Federal and State laws and regulations, and provide all gasoline, tires, and other necessary equipment, and pay drivers' salaries, (3) furnish competent and qualified drivers, and (4) indemnify lessee against any loss resulting from injury or death of driver, or damage resulting from his negligence, incompetence, or dishonesty; furthermore, there is no indication on the record of unsatisfactory transportation service; investigation dismissed.—Murphy Motor Freight Lines, Inc.—Investigation, 99 M.C.C. 707 (709, 711-13).

Although respondent carrier's transportation of steel is performed through its steel division in owner-operator and leased equipment, the record is clear that respondent is in control and is conducting said transportation service; the steel division is not, therefore, unlawfully leasing respondent's operating rights.—Gateway Transp. Co., Inc., Investigation and Revocation, 106 M.C.C. 61 (63-68).

Although applicant for extended authority utilized on a trip-lease basis manned vehicles which it knew were not exempt from the 30-day operation requirement, mitigating circumstacces were held to compensate for this and other violative conduct, and authority was granted on basis of need.—S.T.L. Transport, Inc., Extension—New York Points, 115 M.C.C. 14 (23)*.

While carriers may legitimately lease motor vehicle equipment from others in order to operate to the full extent of their authorities, it is illegal for them to enter into ostensible equipment leases under which the so-called equipment lessor, and not the lessee under whose operating authority the traffic purportedly moves, is actually the carrier performing the transportation service. In such instances, the lessor merely uses the operating rights of the purported lessee and pays the lessee for such use. Stated somewhat differently, a carrier leasing equipment from another must be the one that actually conducts the operation, provides the service, and assumes full responsibility therefor. See 68 MCC 553 (559).—Diamond Transp. System, Ext.—Wis. and Okla. Origins, 117 MCC 706 (710-11).

Applicant, in its insurance policy, provided to hold certain lessees free of liability. Thus, the parties have agreed, in effect, that the applicant-lessor is to be responsible for the equipment. As a consequence, exclusive possession and control of the motor vehicles have not been transferred to the lessees, but remain vested in the lessor (applicant). Further, and though the Commission's lease and interchange regulations contain no specific prohibition against a flat rate or percentage of revenue method of compensation, this method of compensation also is a factor to be considered in determining the validity of the purported interchange arrangements.—Id. (712-13).

While the regulations merely require that the compensation to be paid by the lessee for the use of the interchange equipment shall be specific (49 CFR 1057.5(a)), it is equally true that such a division of the revenues as is present here has been condemned as inimical to sound regulation for the reason that it plays a large part in the practice of carriers with extensive operating rights, but which are unable or unwilling to provide service thereunder, unlawfully leasing such rights to others under the guise of equipment leases, 64 M.C.C. 361.—Id. (713).

Section 204a. [§*304a U.S.C.*] Actions for recovery of charges; limitation of actions; definition; effective date.—[Unchanged. See vol. 21, p. 17183.]

Notes of Decisions

Volume 15—p. 12188; Volume 16—p. 12835; Volume 17—p. 13528; Volume 18—p. 14328; Volume 19—p. 15569; Volume 21—p. 17184.

2. Construction and interpretation.—By amendment of §204a in Public Law 89-170 the Commission is specifically denied jurisdiction to award reparations in contested proceedings. In view of this denial of jurisdiction in contested proceedings the Commission cannot assume jurisdiction in uncontested proceedings for reparations and cannot establish informal procedure for handling of such cases. The willingness of a carrier to pay reparations is no substitute for the legislative delegation of authority.

—Informal Procedure for Determining Reparation, 335 I.C.C. 403 (412-13).

10. Claims of and against Federal Government.—[Vols. 19, 21].—In suit by carrier against the United States for freight charges allegedly due on l.t.l. shipments that moved under government bills of lading, when carrier billed the Government for amount less than that subsequently claimed to have been the proper charge and the bill was paid more than 3 years prior to institution of suit, plaintiff cannot recover any claimed amount over that billed and paid. However, carrier is entitled to full charges based on a minimum of 7,500 pounds and, since the action was filed within 3 years after the Government's post-audit deductions (based on claimed 1,000-pound minimum, plaintiff can recover amounts improperly deducted because that cause of action did not accrue until the deductions were made and, therefore, is not barred by the statute.—T.I.M.E. Freight, Inc. v. United States, 302 F. Supp. 573 (575).

In Court of Claims action to recover amounts allegedly due for transportation of household goods of military personnel, moved on Government bills of lading between points overseas and United States points, claim on shipment in motor-van-sea-van service was not barred when it was filed less than 6 years, but more than 3 years, after cause of action accrued. Plaintiff holds interstate authority with respect to services within the United States but, when it performed considered service, it was operating as an exempt freight forwarder of used household goods by virtue of §402(b) and not as a certificated motor carrier [citing 103 MCC 318]; accordingly, its claim was subject to the 6-year limitations period in 28 USC §2501, rather than the 3-year limitations period prescribed in §204a for actions by motor carriers. Therefore, since plaintiff's claim was asserted within the 6-year limitations period, it was not time-barred.—Global Van Lines, Inc. v. United States, 456 F. 2d 717 (747-9)*.

20. Complaint seeking reparation.—[Vols. 18, 19, 21].—Although the 1965 amendment to §204a does not expressly set forth the procedure to be used in awarding reparations in motor carrier cases, legislative history thereof makes it clear that Congress intended to restore the procedure used by the Commission prior to the Supreme Court decision in 359 US 464, which held that Part II of the Act gave no right to past unreasonableness of rates. Under that former procedure, the Commission had authority to make an after-the-fact determination as to whether past motor rates alleged to be unlawful actually were unjust and unreasonable, and also to determine the extent of the unlawfulness. Thus, while the Commission has no statutory authority (similar to that applicable to railroads) to order refunds with respect to motor carrier rates, the Act does provide to aggrieved shippers a reparations procedure applicable to motor carriers.—Admiral—Merchants Motor Freight, Inc. v. United States, 321 F. Supp. 353 (358-9)*.

The Commission has authority upon complaint of a shipper to make an administrative determination of the past reasonableness and lawfulness of the rates sought to be charged on the shipments which are the subject of the pending court action. Therefore since no court action was pending in the embraced proceeding, the Commission lacked jurisdiction to determine complainants' allegations that the charges on past shipments were unreasonable, unjustly discriminatory or unduly prejudicial.—Glama Dress Co. v. Mid-South Transports, 335 I.C.C. 586 (589, 590).

Under §204a, as amended by Public Law 89-170, shippers are accorded a remedy at law to recover reparations. See 335 ICC 403. Therefore, to extent the complainant seeks to recover damages for unlawful charges on past shipments by motor carriers, Commission is without jurisdiction to award reparations. Neither can Commission negate terms of the Act by tolling the statute of limitations with respect to claims on past shipments. Complainant must file a timely court suit.—Mammoth Plastics v. National Classification Board, 341 I.C.C. 15 (17-18).

Section 205. [§*305 U.S.C.*] Administration. (a) Joint board; composition; references of matter to boards.—[Unchanged. See vol. 11, p. 9395.]

Amendments, see footnotes, vol. 9, p. 7941, 7942, vol. 11, p. 9395; Historical Note, vol. 17, p. 13530.

Notes of Decisions

Volume 9—p. 7942; Volume 11—p. 9396; Volume 12—p. 10371; Volume 13—p. 11062; Volume 16—p. 12836; Volume 17—p. 13530; Volume 18—p. 14332; Volume 19—p. 15571; Volume 21—p. 17187.

2. Construction and interpretation.—[Vols. 19, 21].—Though plaintiffs (defendants in Commission proceeding) claim denial of due process because the Commission hearing was conducted before a hearing examiner rather than a joint board, as allegedly required under §205(a), the alleged procedural irregularity in assigning the matter for hearing was not timely. Neither plaintiff objected to order referring the case to an examiner, both participated in the hearing and filed exceptions to examiner's report and recommended order, and they filed petitions for reconsideration and rehearing without suggesting that a hearing before a joint board was required. Procedure followed was not challenged until 15 months after the hearing and 5 months after the Commission's action; clearly, plaintiffs waived any right to a hearing by a joint board.—Travel & Tour Service, Inc. v. United States, 302 F. Supp. 188 (191)*.

Plaintiffs appear to argue that the statutory requirement that certain matters be referred to a joint board is jurisdictional and cannot be waived by their failure to make timely objection, but they cite no case which so holds; in addition, as held in 185 F. Supp. 336, the §205(a) requirement is merely procedural. Furthermore, although the objection to a hearing by an examiner was first raised before the Commission, and not in the court, it was made after the hearing and the Commission's ruling and, since plaintiffs had knowledge of all facts on which the objection was based when the matter was referred to the examiner, their objection was not timely so as to distinguish instant case from 344 US 33. Complaint dismissed.—Id., pp. 191, 193.

Primary question of first impression in action seeking review of Commission orders, which granted intervening carrier operating authority between Belle and Lamar, Mo., concerns interpretation and construction of the §205(a) mandatory requirement that an application be referred to a joint board where not more than three states are involved and no other application or question included. No court decision or Commission order involving that primary issue have been cited and the court knows of none; the commission concluded, however, that §205(a) did not require it to refer intervenor's application to the state board and assigned the proceeding for handling under its modified procedure rules. While the Commission's construction of the statute is entitled to great weight on review, provided it is not obviously contrary to the plain language thereof and without rational basis for its action, the Supreme Court made it clear, in 380 US 1, that construction of statutory language given in an administrative proceeding must give way to the clear mandate of a statute.—Jones Truck Lines, Inc. v. United States, 321 F. Supp. 821 (825-6)*.

Since there is no case or Commission precedent on construction of §205(a) as to the issue of reference, legislative history is considered in determining if the Commission's handling of intervenor's application under its modified procedure has any rational basis that is warranted by law. Under the initial Motor Carrier Act, it was mandatory that the Commission refer all applications for authority to operate in not more than three States to a joint board of the state or states involved for appropriate proceedings; and after reviewing legislative history of the

1938 amendment, which added the language in §205 leaving to the discretion of a joint board whether a recommended report and order shall or shall not be issued, there can be no doubt as to what was intended by including the new clarifying language and, also, that Congress intended to maintain the mandatory requirement for referring an application to a state board wherein only three or less States were involved.—Id., pp. 827-9.

Accordingly, the court concluded that under the record presented, the Commission had a statutory duty to refer intervening carrier's application to a joint board for determination within its discretion whether there should be a recommended order and report to the Commission as required by the statute; and, further, that the Commission's action in assigning the case to its review board for handling under modified procedure was arbitrary and without rational basis. Therefore, the challenged orders are suspended, set aside and annulled; the Commission should proceed to consider the application involved in accordance with requirements of the Act.—Id., p. 829.

Relying on recent decision in 331 F. Supp. 821, plaintiff in suit to set aside Commission order granting intervening carrier authority to transport general commodities between Jacksonville, Fla. and Thomasville, Ga., contends that the application should have been initially heard by a joint board composed of a representative from each of the two States, instead of being assigned to Commission Review Board for handling under modified procedure; However, in instant case, protestant (plaintiff) did not complain of the modified procedure until an adverse Commission decision had been rendered. The assignment of motor carrier applications to a joint board is a procedural matter rather than one of jurisdiction. [Citing 185 F. Supp. 336 and 344 US 33.) And plaintiff waived any right it had to insist upon a joint board hearing by participating in the modified procedure without complaining. The Commission's order sustained.—Howard Hall Co. v. United States, 332 F. Supp. 1076 (1081, 1082)*.

Similarly, in action seeking to vacate Commission order granting defendant carrier certificate to operate between points in two States, §205(a) required that the Commission refer the application to a joint board of the states involved for appropriate proceedings, instead of to Commission review board for handling under modified procedure. Although the review board accepted as true many charges leveled by plaintiff (protestant in Commission proceeding) against the applicant, there were bona facie factual issues as to applicant's fitness and the need for its service; thus, the Commission had a statutory duty to refer the application to a joint board for determination. Therefore, all of the Commission's orders which contravene §205(a), including order granting the certificate, must be suspended, set aside and annulled.—Land-Air Delivery, Inc. v. United States, 327 F. Supp. 808 (810-11)*; Garrett Freightlines, Inc. v. United States, 333 F. Supp. 1267 (1270-1)*.

See also T. J. Claveau Transp., Inc. v. I.C.C., 28 USC §2325, n. 7

15. Jurisdiction of joint board.—[Vols. 9, 11-13, 16-19, 21].—It is clear that, under the statute, assignment of a motor-carrier application for authority to a joint board composed of three members or less is proper, if the application does not in itself indicate that the certificate will permit tacking with other authority held by applicant but indicates that three or less states are involved in the basic application. Therefore, since assignment of defendant carrier's application for authority to operate between Greely and Denver, Colo., to a joint board composed of one member from Colorado was consistent with the application itself, the proceeding was not erroneously assigned to that board, as plaintiffs allege, particularly since they raised no objection at the hearing to the assignment of the application and there appears to have been no prejudice to them or any other party.—Midwest Emery Freight System, Inc. v. United States, 295 F. Supp. 112 (116-7)*.

The 11 applications involved, whether assigned to an examiner or to a joint board, were consolidated, all of them were orally heard by three joint boards and an examiner, and the single joint recommended report and order was fully reviewed by the Commission. Even though it became evident during the hearing that considered application involved more than a certificate between two

Colorado points (since question of tacking was involved), plaintiffs did not object to any of the applications being heard as originally assigned; thus, absent any evidence of prejudice to plaintiffs or any other party, the most that can be urged is that assignment of the application to a one-member joint board was technically incorrect on basis of the evidence adduced, although technically correct on the basis of substance of the application itself. Under such circumstances, judicial interference is not warranted in absence of a showing that the procedural or technical error, if any, was prejudicial to persons complaining thereof. Orders of the Commission sustained.—Id., pp. 116, 117.

The court, citing 321 F. Supp. 821, sustained Commission's right to refer an application to a review board in lieu of joint board when there are no material issues of fact in dispute as in the instant case. Protestant has only alleged, not shown, such material issues to be involved. The use of modified procedure and the denial of oral hearing in an appropriate case has been approved by the Supreme Court in 401 US 928.—Theatres Service Co. Ext.—Duluth, Ga., 113 M.C.C. 744 (746-7)*.

Section 205. (b) [§*305(b) U.S.C.*] Creation of joint board; rules and procedure; nominations for membership; procedure on failure of board to act.—[Unchanged. See vol. 11, p. 9397, vol. 15, p. 12188.]

Amendments, see footnotes, vol. 11, pp. 9397-9398.

Notes of Decision

Volume 15—p. 12189; Volume 19—p. 15573.

5. Nomination and appointment of members.—[Vols. 15, 19].—Although the sole joint board member participating in the hearing was a member of a State regulatory body at the time of the hearing but not at the time of the signing of the report and recommended order, the jurisdiction of said board is not invalidated as §205(b) provides that joint boards continue in existence until terminated by the Commission and its actions on matters referred to it prior to appointment of a new board are valid and binding on parties thereto.—Wehe, 110 M.C.C. 798 (805-6).

Section 205. (c) [§*305(c) U.S.C.*] Place of holding hearings.—[Unchanged. See vol. 11, p. 9398.]

Amendments, see footnote, vol. 11, p. 9398.

Volume 9—p. 7946; Volume 12—p. 10372; Volume 17—p. 13530; Volume 18—p. 14335.

Section 205. (e) [§*305(e) U.S.C.*] Notice of proceedings and opportunity for hearing.—[Unchanged. See vol. 11, p. 9399.]

Amendments, see footnotes, vol. 9, p. 7947, vol. 11, p. 9399.

Notes of Decisions

Volume 9—p. 7947; Volume 11—p. 9399; Volume 12—p. 10373; Volume 14—p. 11583; Volume 15—p. 12189; Volume 16—p. 12837; Volume 18—p. 14336; Volume 19—p. 15574.

10. Notice.—[Vols. 9, 11, 12, 15, 16, 18, 19].—Under holding of 103 MCC 307, lack of proper notice may constitute such a failure to afford due process of law that a certificate is voidable; and fact broadened authority issued applicant did not result from any affirmative action on its part is of no significance. The essential point is that authority greater and different in scope than that applied for was granted without notice to interested parties as required by §205 of the Act.—May and Pearson—Modification of Certificate, 106 M.C.C. 118 (123-4)*.

Authority applicant originally sought, as published in the Federal Register, was "restricted to those shipments permitted by the permits or certificates issued by the State of Oregon and not permitting interline or interchange except as authorized by other authority held by applicant;" however, authority granted was "limited to operations through Payette, Idaho, and restricted against, pickup, delivery or interchange, at Payette." Therefore, authority granted did not prohibit interlining to or from points in Oregon; and, while this authority, different from that published in the Federal Register, was not the result of misrepresentation, fraud, inadvertence or a situation involving §212 of the Act, it was granted without notice to interested parties. Therefore, although certificate in issue is more than six years old, it is canceled and concurrently therewith an amended certificate issued, conforming with authority originally applied for as published in the Federal Register. However, carrier will be afforded opportunity to show need for the service—beyond that authorized—which it has been rendering.—Id., pp. 119, 124-5.

Where in good faith reliance upon the inadvertent failure of applicant's counsel to apprise them of the fact that an unrestricted grant of the applied-for authority would enable applicant through the tacking of such authority with its existing rights to become a substantial competitor for overhead meat and meat products traffic between mid-central and far western points, existing carriers withdrew their protest to the application and acted with due diligence to protect their interests when they first learned of the situation, applicant was ordered to show cause as to why the subsequently issued certificate should not be modified by imposition of an appropriate non-joinder restriction.—Curtis, Inc., Extension, 113 M.C.C. 170 (183).

Plaintiffs held not to have been afforded sufficient notice and further hearing ordered where mixed loads restriction was substituted for multiple pickup and delivery restrictions without republication.—Greenstein Trucking Co., Extension, 113 M.C.C. 489 (493)*.

Section 205. (f) [§*305(f) U.S.C.*] Joint hearings with State authorities; offices for boards and State Commissions.—Unchanged. See vol. 11, p. 9401, vol. 21, p. 17189.

Historical note, see vol. 21, p. 17190.

Section 205. (g) [§*305(g) U.S.C.*] Court review of Commission's orders; compelling Commission to take jurisdiction.—Any final order made under this part shall be subject to the same right of relief in court by any party in interest as is now provided in respect to orders of the Commission made under part I: *Provided*, That where the Commission, in respect of any matter arising under this part, shall have issued a negative order solely because of a supposed lack of power, any such party in interest may commence appropriate judicial proceedings in a court of the United States under those provisions of law applicable in the case of proceedings to enjoin or suspend rules, regulations, or orders of the Commission, and such court, if it determines that the Commission has such power, may enforce by writ of mandatory injunction the Commission's taking of jurisdiction. (Public Law 93-584, 88 Stat. 1918, Jan. 2, 1975, amended §205(g) by adding "commence appropriate judicial proceedings in a court of the United States under those provisions of law applicable in the case of proceedings to enjoin or suspend rules, regulations, or orders of the Commission" and deleting from "file" through "United States Code.") (See vol. 11 p. 9401, vol. 15 p. 12189).

Notes of Decisions

Volume 9—p. 7950; Volume 11—p. 9402; Volume 12—p. 10373; Volume 19—p. 15574; Volume 21—p. 17190.

5. Review of final orders.—[Vols. 9, 11, 12, 19, 21].—See also Admiral—Merchants Motor Freight, Inc. v. United States, at 28 USC §2325, n. 7; and Aluminum Co. of America v. Burlington Truck Lines, Inc., at §16(2), n. 8.

In suit to set aside Commission decision on further consideration, following remand in 251 F. Supp. 526, the court remains convinced of validity of the conclusion therein that, while wide latitude should be given to Commission interpretation of certificate commodity descriptions which require its great familiarity with trade usage and industry parlance, no special expertise is involved in the case of simple grammatical construction of territorial descriptions; as a result, no great deference to the Commission's rather unusual reading of plaintiff's certificate is necessary. In its original report and order, the Commission stated that disputed language in the certificate describing plaintiff's authorized base territory was non-technical in nature and, in considered decision, it found the certificate clear and unambiguous on its face; thus, technical terms of art, construction of which require the Commission's special expertise, are not involved. The Commission's order set aside and enjoined.—T. I. McCormack Trucking Co., Inc. v. United States, 289 F. Supp. 39 (41-2)*.

Competing lines, such as plaintiff motor carriers who oppose the grant of a certificate to intervenor-defendant, are parties in interest within the statute; therefore, plaintiffs have standing to bring suit under §205(g) to enjoin enforcement of, and also to set aside, the Commission's decision and order granting additional authority to defendant carrier.—St. Johnsbury Trucking Co. v. United States, 326 F. Supp. 938 (940)*.

Inasmuch as §205(g) subjects a final order under part II to the same right of relief in court by an interested party as that provided with respect to orders made under part I, and §16(2) permits a person for whose benefit an order for payment of money is made to bring suit for enforcement thereof, plaintiff shipper is entitled to sue motor carriers for recovery of refunds pursuant to a Commission order in increased-rate investigation proceeding. Order involved, granting carriers' request for postponment of the hearing on proposed rates and, as a *quid pro quo,* requiring carriers to make refund of increases not ultimately found just and reasonable, is a final order under part II; and though not a participant in the rate proceeding, plaintiff is a party in interest to order entered therein since, in effect, it is a third-party beneficiary of the refund provision. Thus, the court must look to part I of the Act to determine scope of plaintiff's right to sue for enforcement of the Commission refund order.—Aluminum Co. of America v. Admiral Merchants Motor Frt., Inc., 337 F. Supp. 674 (679-81).

While there is no doubt that §16(2) was designed originally to cover Commission orders in reparations situations, no reason appears why contested valid order for the payment of money, which clearly is covered under language thereof, should not also be deemed within the purview of that section. And contrary to defendants' argument, decision of the Supreme Court in 359 US 464, does not prevent granting the relief sought by plaintiff in instant case; that decision in no sense considered the question of whether, when the Commission issues a valid refund order under part II, shippers for whose benefit such order was issued can proceed under §16(2) for enforcement thereof. Accordingly, based on §16(2) and §205(g), plaintiff is entitled to judgment for stipulated amount of the refunds due under the Commission's order.—Id., pp. 681-2, 685-6.

On motions for a new trial or to alter or amend judgment for shipper in its suit to recover refunds pursuant to the Commission order, defendants further claim that §205(g) only provides for judicial review of orders made under part II and for relief from such orders and, thus, entitles plaintiff to review of the refund order to determine validity thereof but not to obtain its enforcement, and only if it desires relief from but not under such order; however, such a narrow reading of §205(g) is neither logical nor persuasive. Had Congress intended that only injured parties seeking relief from a part II order were entitled to the scope of review provided in part I of the Act, it would have chosen language limiting such relief to any "party injured" or "aggrieved party" rather than to "any party in interest," the language it utilized. And "any party in interest" includes all people affected by a Commission order, both those who are injured by it and those who, being benefitted, would not desire relief from such order but whose only interest would be to have the order entered and its specific benefit enforced.—Id., pp. 684-5; Proctor and Gamble Co. v. Byers Transp. Co., Inc., 355 F. Supp. 547 (559-62).

Congress amended §204a specifically to countenance a shipper's right for reparations as a complement to §205(g) so that orders made under part II (affecting motor carriers) shall be subject to the same right of relief in court by "any party in interest" as if made under part I of the Act. In view thereof, the court cannot agree with defendant motor carrier's position that there is no private remedy for enforcement of a Commission order entered against motor carriers, there being no rational reason to distinguish between rail and motor carriers and Congress having expressed itself by the 1965 amendment.—Land O'Lakes, Inc. v. United-Buckingham Frgt. Lines, Inc., 351 F. Supp. 103 (108).

Section 205. (h), (i), (j) [§*305(h), (i), (j) U.S.C.*] Application of section 17; Pecuniary interest in carrier forbidden; Employees, examiners, attorneys, etc.—[Unchanged. See vol. 11, pp. 9403, 9404.]

Section 206. [§*306(a) U.S.C.*] Certification of convenience and necessity. —(a)(1) Necessity for; carriers in bona fide operation on June 1, 1935; "grandfather" provisions.—[Unchanged. See vol. 11, p. 9404, vol. 15, p. 12190, vol. 21, p. 17190.

Amendments, see footnotes, vol. 10, p. 7935, vol. 11, p. 9404, vol. 15, p. 12190.

Notes of Decision

Volume 10—p. 7954; Volume 11—p. 9405; Volume 12—p. 10374; Volume 13—p. 11063; Volume 14—p. 11584; Volume 15—p. 12191; Volume 16—p. 12838; Volume 17—p. 13531; Volume 18—p. 14337; Volume 19—p. 15575; Volume 21—p. 17190.

2. Construction and interpretation.—[Vols. 10-14, 17-19, 21].—Certificate issued to motor carrier constitutes formal determination of public need for motor transportation, regardless of availability of other modes and authorizes holder to engage in for-hire transportation by motor vehicle, not by rail or other modes, on public highway. Motor carriers must perform their authorized services by motor vehicle unless shipment by other modes is permitted by some specific statutory exception.—Atchison, T. & S. F. Ry. Co. v. United States, 244 F. Supp. 955 (955)*.

Where the holder of a certificate of registration or its affiliate holds a contract with the Post Office Department to transport mail allegedly in more than one state, this does not act to void the certificate because (1) only operations as a carrier outside the basic state will act to void such certificate and (2) the transportation of mail is not an operation as a carrier. See cases cited herein.—Howard's Exp., Inc.—Purchase—Exchange Trucking Corp., 97 M.C.C. 341 (346-47).

Transportation services of local truckers who provide transfer, collection, or delivery service for forwarders of used household goods (on shipments which move on through forwarder bills of lading) are clearly performed solely for, in concert with, and as an incident to, the overall through forwarder transportation service; therefore, unless they qualify for a specific exemption, such local movers or truckers are subject to the specific provisions of the Act including §206 which requires motor carriers to possess appropriate authority for the transportation performed. Although the forwarder may be exempt from regulation under part IV of the Act, that fact in no manner determines the status of the local motor operator serving it because such status must be determined by reference to the Motor Carrier Act. Accordingly, since the only exemptions provided in part II to cover considered operations are those relating to terminal areas and commercial zones, operations conducted beyond such areas require authority in all instances.—Kingpak, Inc., Investigation of Operations, 103 M.C.C. 318 (336-40)*.

In accordance with 103 MCC 318 (sustained, 288 F. Supp. 641, latter aff'd, 393 US 265), applicants—local motor carriers and warehousemen—require authority for the local pickup and delivery transportation which, in addition to packing and unpacking services, they have been providing for forwarders of used household goods who operate under the §402(b)(2) exemption. Interstate authority is necessary since, whether carrier operations are conducted within or outside a commercial zone, neither the §202(c)(2) terminal area, nor §203(b8) commercial zone, exemption is available to carriers serving a forwarder (who holds no part IV authority) in movement of through shipments in interstate or foreign commerce; however, any authority granted local carriers to serve such exempt forwarders should be so circumscribed as to allow continuance of past services and, also, preclude rendition of a broader service. Authority granted both applicants to transport used household goods between the District of Columbia and points in specified Maryland and Virginia counties adjacent thereto is restricted accordingly.—District Moving and Storage, Inc., 107 M.C.C. 896 (899-902).

Applicant's proposed operation between Indianapolis and Lafayette, Ind. over indicated highways and including Crawfordsville, Ind. as an "intermediate point" of service, may not be performed under the "superhighway rule of construction" stated in 49 CFR 1042.3, as such service is not conducted between a point of departure and a point of return on the applicant's authorized route as required by the "superhighway" regulations.—Commercial Motor Frt., Inc., Ext.—Crawfordsville, Ind., 114 M.C.C. 500 (519-21).*

Respondent to investigation was found to have violated §206(a) of the Act, by transporting materials not authorized by its certificate.—Skyline Transport, Inc.—Investigation & Revocation, 115 M.C.C. 807 (823-824).

25. Injunctions; operation without certificate.—[Vols. 10, 19].—Respondent found to have been engaging in certain operations as a common carrier without appropriate certificate authorizing such operations, and therefore to have been in violation of §206(a); cease and desist order entered.—Hilt Trust Line, Inc.—Investigation of Operations, 117 M.C.C. 9 (26).

Since defendants' operations involved utilization of nonsuperhighway "connecting" highways which constitute a significant portion (52%) of the total over-the-road distance traversed between the point of departure from and the point of return to the underlying authorized regular service route, the operations are not within the scope of the Superhighway Rules. Defendants were therefore in violation of sections 203(c) and 206(a)(1) of the Act; cease and desist order entered.—Great Lakes Exp. Co. v. National Transit, 117 M.C.C. 735 (744-5).

Respondent found to be servicing points that were neither within 1 mile of its authorized regular service routes not within the commercial zones as defined by the Commission of those municipalities that respondent is authorized to serve; such transportation was found to be beyond the scope of respondent's certificate, and therefore in violation of §206(a) of the Act. Cease and desist order issued.—Adams Trucking, Inc.—Revocation of Certificates, 118 M.C.C. 567 (575-76).

26. Intrastate Certificate.—[Vols. 10-19, 21].—See also Bab Transfer, Inc., at §212(a). n. 25; and Statewide Transport, Inc., Extension, at §206(a)(6), (7), n. 2.

Interstate operations of respondent (holder of Pennsylvania "class D" certificate which is restricted against interlining intrastate traffic with other for-hire carriers) conducted pursuant to his Form BMC-75 statement, found to have been unlawful to extent that they involved interline service performed in conjunction with other for-hire carriers. Respondent contends that restriction in his intrastate certificate is inapplicable to interstate traffic, latter being subject solely to Federal regulation; however, it is well established that carriers operating in interstate commerce under former §206(a)(1) second proviso may engage in interstate operations only to same extent, in the same manner, and subject to the same limitations, as they can lawfully engage in intrastate operations; and that the scope of their authorities is governed by the interpretation or construction placed upon such certificates by the issuing State agency.—Bowser—Investigation of Operations, 98 M.C.C. 170 (173-5).

Nevertheless, other types of interstate traffic could lawfully have been handled by respondent under his registered intrastate authority (only the operations involving interline were conducted without authority) and cancellation of his Form BMC-75 registration would not be appropriate or necessary. However, since authority granted in related application proceeding to serve Philadelphia, Pa., carries with it implicit authority to serve points in commercial zone thereof, which includes a part of New Jersey it renders (respondent) applicant a multiple-State carrier; and since it is not advisable to impede his interchange operations by limiting the authority to the part of that commercial zone within Pennsylvania, authority granted is conditioned on cancellation of applicant's Form BMC-75 statement.—Id., pp. 176, 179.

Respondents' operations to and from Mexico under their certificates of registration issued pursuant to §206(a)(7) of the Act are unauthorized since such certificates are valid only as long as the holder is a carrier in operation solely within a single state; the phrase "in operation solely with a single state" must be generally construed to preclude operations in interstate or foreign commerce at any point outside of a single state or the United States by motor carriers operating under this section.—Imperial Truck Lines, Inc.—Common Carrier Application, 106 M.C.C. 741 (746-48).

50. "Grandfather" clause; bona fide operation.—[Vols. 10-15, 18, 19, 21].—See also Barton Truck Lines, Inc., Eligibility—Utah, at §207(a), n. 25 past operations; Beaufort Transfer Co. v. United States, at §212(a), n. 1; and Tarantola Trucking Co., Inc., Modification of Certificate, at §212(a), n. 30.

Petition for reopening of "grandfather" proceeding and modification of "truckload lots" restriction therein is denied when it was not filed until after investigation was instituted and reasons advanced therefor are not convincing. Commission policy is that "grandfather" clause rights which were determined many years ago should not be modified except where there is definite and positive evidence that a miscarriage of justice has occurred. Petitioner's predecessor did not object to the restriction but had sought its inclusion in the resulting certificate and its existence was a factor in the Commission's approval of the purchase thereof by petitioner. Moreover, documentary evidence relating to nature of the operations conducted by the predecessor having been destroyed, petitioner seeks to establish its position through the recollection of witnesses formerly connected with or familiar with operations of the "grandfather" applicant; such evidence has been found insufficient to establish the bona fides of a claimed operation.—Southwest Freight Lines Ext.—Removal of Restriction, 95 M.C.C. 269 (277-8)*.

Evidence as to carriers' claims to grandfather authority deemed convincing, despite failure to show by documentary evidence that their predecessors were providing charter service on or before June 1, 1935, the critical date. Both seek to explain this by reference to mishaps which reasonably account for their inability to locate such documentary evidence. As a result both applicants produced witnesses, whose testimony established the requisite charter operations. In addition, Greyhound's discontinuation of service after challenge by the Commission was clearly an "interruption of service over which [it]***had no control". Granted in part.—Greyhound Corp. Extension, 98 M.C.C. 712 (727-28)*.

If evidence shows that there are matters not previously brought to Commission's attention which establish that petitioner and its predecessors have transported, on and continuously since the "grandfather" date, palletized or bundled commodities which in their palletized or bundled form require the use of special equipment but which considered individually do not require such equipment, there would be substantial equity in favor of modifying the involved certificate. However, evidence presented by Dillner fails to establish specific dates of shipments, description of commodities transported, and whether or in what form commodities were packaged, bundled or palletized; carrier has furnished, therefore, no cogent basis for a determination that it is entitled to additional "grandfather" rights under the Motor Carrier Act of 1935.—W. J. Dillner Transfer Co., 99 M.C.C. 485 (488-489).

In a consolidated proceeding, relief was granted to one applicant for modification of his authority derived from a grandfather certificate, on the basis of documentary evidence of operations and expressions of shipper support; similar applicants' petitions were denied in the absence of shipper support. In the latter circumstance, modification must be shown to be warranted on two bases: that the specifice authority under consideration was intended at the time of issuance to authorize a broader service than that encompassed in the terminology used under present day interpretation, and that the authority has been continuously used to perform the broader service. The Commission acknowledged some former confusion as to evidentiary standards, however, and denied the petitions without prejudice to each of the petitioners filing an appropriate pleading for further hearing within a specified time period.—North Penn Transfer, Inc.—Petition for Modification, 115 M.C.C. 208 (216-218).

Respondent's refusal to operate within the limits of its authority to transport "stock in trade of drugstores", despite Supreme Court ruling that the commodity description is not ambiguous [355 US 554], resulted in cease and desist order, and an acknowledgment that continued violation may result in suspension or revocation of the authority.—North Central Truck Lines, Inc., Invest. & Revoca., 117 M.C.C. 180 (184, 195).

53. Intrastate operation; State requirements.—[Vols. 10-12].—Complainants allege that defendant, an irregular route carrier, is conducting operations in interstate or foreign commerce in violation of §206(a). Defendant is authorized to operate solely within the State of Missouri, pursuant to a grandfather certificate of registration for which it holds corresponding interstate authority. The state authority prohibits irregular-route operations between points on the regular route of an authorized motor carrier. The record shows that the defendant interlined interstate shipments originating in another state for delivery to points in Missouri. Both the interline point and the named destination points are served by regular route carriers. Such operations clearly contravene defendant's registered authority. Cease and desist order entered.—Orscheln Bros. Truck Lines, Inc. v Knaus Truck Lines, Inc., 108 M.C.C. 301 (303, 305).

55. In foreign commerce.—[Vols. 10-12].—Defendant holds authority to serve Buffalo and New York City. It also holds appropriate Canadian authority to operate from the international boundary line to various points in Canada. In connection with the Canadian line-haul service, defendant has transported traffic originating at Buffalo or interlined with other carriers in Buffalo to Canadian points. It is well established that a point in the United States located on the international boundary line embraces the port of entry at such point and, thus, a carrier specifically authorized to serve such points may serve the international boundary in foreign commerce. Therefore, the service authorized must in some way be incident to a line-haul movement between points the carrier holds authority to serve. Since defendant does not have specific authority to serve both Buffalo and the port of entry at Buffalo, its traffic originated at or interlined at Buffalo for continued movement in foreign commerce to Canadian points cannot properly be performed as there is no effective line-haul authorized between two separate service points on defendant's regular route. No such line-haul movement is part of defendant's local operations and, accordingly, this local service cannot be properly performed without separate, specific authority.—Red Star Express Lines of Auburn, Inc. v. Maislin, 110 M.C.C. 23 (25, 26, 27).

57. Off-route points.—[Vols. 10-12, 14].—Inasmuch as defendant was serving certain off-route points which operations were found not to be permitted under the Superhighway Rules [49 CFR 1042.3, 117 MCC 119], defendant was in violation of §§203(c) and 206(a)(1) of the Act, and was required to cease and desist from the performance of such unlawful transportation. The defendant was specifically reminded of its obligation, as directed in the order entered, to comply with the provisions of rule 99 of the General Rules of Practice [49 CFR 1100.99] describing the manner of its compliance with such order requiring it to cease and desist from the performance of the operations found in this report to be unlawful.—Burggrabe Truck Lines, Inc. v. Beaufort Transfer, 117 M.C.C. 567 (579).

Regulation of the Commission

35 FR 17264, Nov. 10, 1970, Part 1060: new Part 1060 Special Relief for Motor Carriers Affected by a Temporary Highway Closing, §1060.1 Special relief for motor carriers affected by temporary closing of West Virginia Highway 2, added, effective upon publication in the Federal Register.

Section 206(a). (2), (3) Traffic moving to and from Territories and Possessions; "grandfather" provisions.—[Unchanged. See vol. 15, pp. 12190-12191.]

Historical Note, see vol. 17, p. 13532.

Notes of Decisions

Volume 18—p. 14342.

Section 206 (a). (4), (5) Traffic moving from, to and within Alaska; "grandfather" provisions.—[Unchanged. See vol. 19, pp. 15580-15581.]

Notes of Decisions

Volume 21—p. 17199.

§206(a)(6)(7). Intrastate Certificate: Registration; "Grandfather" Provisions.—[Unchanged. See vol. 21, pp. 17207-17210.]

Notes of Decisions

Volume 21—p. 17210.

2. Construction and interpretation.—[Vol. 21].—See also Braddock Motor Freight, Inc., Petition, at §216(c), n. 10; and Home Transp. Co., Inc.—Purchase—Fuchshuber, at §5(2), n. 110 certificate under §207.

By the 1962 amendments to §206(a) repealing second proviso of paragraph (1) and adding paragraphs (6) and (7), Congress terminated all rights to engage in interstate and foreign commerce under the second proviso and, in addition, provided for "grandfather" certificates of registration for single-State carriers that were engaged in second-proviso operations on October 15, 1962, or would have been so engaged but for the pendency of litigation concerning validity of the carrier's operations. The "pendency of litigation" clause should be construed in keeping with the purpose of the "grandfather" provision which, by specific language, can have application only to those operations which the carrier had actually been conducting on October 15, 1962; thus, an application for new intrastate authority does not come within the meaning of the "pendency of litigation" clause.—A-OK Motor Lines, Inc. v. United States 287 F. Supp. 828 (830)*.

Plaintiffs, in action to enjoin and set aside Commission order denying their petition for amendment of their certificates of registration to include additional newly acquired State authority under the "grandfather" provisions, were not conducting the expanded operations under the second proviso when the statute was amended; and their application proceedings pending before the State commission do not come within the "pendency of litigation" clause of §206(a)(7). Accordingly, the Commission did not err in denying plaintiffs the requested "grandfather" certificates of registration which would permit them to begin additional interstate operations. Plaintiffs are not entitled to relief sought; action dismissed.—Id., p. 831.

Requirements of §206(a)(6) are fully satisfied when (1) interested persons have been accorded reasonable opportunity to be heard with respect to both the intrastate and interstate aspects of an application filed thereunder and (2) the State commission has considered both questions and found, on an adequate record, that public convenience and necessity require continuation, or initiation, of the intrastate operations and the initiation of proposed interstate service. The statute does not specify the kind of proof or type of hearing that a state commission must follow; and, since neither the legislative history nor the law require an initial application for intrastate authority before applicant can qualify for a certificate of registration under §206(a)(6) it is irrelevant whether the corresponding intrastate authority is original or was granted previously.—Ray Price, Inc. v. United States, 297 F. Supp. 55 (59-60)*.

The statute requires the State commission to make dual findings of public convenience and necessity as to both the intra- and interstate operations involved. However, the commission's argument that considered state proceedings related solely to transfer of existing rights and, under Nebraska law, intrastate need was not an issue in "transfer" proceedings, is not persuasive. The carriers applied for State commission approval of transfer of intrastate certificates from third parties and, simultaneously, sought concurrent authority for operations in interstate or foreign commerce under §206(a)(6), the State commission approved the transfers and found a corresponding need for operations in interstate and foreign commerce, and subsequently issued *nunc pro tunc* orders finding need for the intrastate operations. Thus, more than mere "transfer" of existing intrastate rights was being litigated: applicants' rights under §206(a)(6). Therefore, simply to categorize the state proceedings as relating solely to "transfer" rights is misleading; the applications and statutory notice make it clear that more was involved.—Id., pp. 60-61.

The Commission's denial of certificates of registration, on the ground that a *nunc pro tunc* refinding of need for an intrastate operation is not sufficient, misconstrues the use of such procedure, since the Nebraska commission has inherent power to correct its orders by a *nunc pro tunc* proceeding. State commission's order reflects orderly and proper consideration of prior records and sets forth a finding made then but inadvertently omitted; and, since it orders for now a finding made then, it properly recites a finding of public convenience and necessity for intrastate as well as interstate operations. The mere fact that this is accomplished by a *nunc pro tunc* order being immaterial, it is not a fatal defect. Accordingly, the Commission's orders in issue are vacated; proceedings remanded to the Commission for further consideration consistent with the court's opinion.—Id., pp. 61-3.

Whether or not applicant's State "permit," authorizing operations for which authority is sought, is a certificate of public convenience and necessity within meaning of §206(a)(7) and thus acceptable for registration, is as yet an unresolved question; and, while its right to register the State permit has been challenged, its §207 proceeding is not the proper forum to determine its eligibility for registration. However, since the registration provisions of former second proviso of §206(a)(1) and of §206(a)(7) are only applicable to carriers operating solely within a State, and applicant's purpose in instant application is to obtain authority between points in Idaho over highways passing through adjacent States, performance of such operations would render applicant ineligible to continue registration of its intrastate authority under former second proviso or to receive a certificate of registration under the "grandfather" provisions of §206(a)(7).—Statewide Transport, Inc., Extension, 96 M.C.C. 57 (59, 64-5).

Authority to serve Philadelphia, Pa., because it carries with it implicit authority to serve points in the commercial zone thereof, which includes a part of New Jersey, would render applicant (a single-State operator) a multiple-State carrier, thus making him ineligible to receive the certificate of registration he seeks under §206(a)(7) in another proceeding. However, his intrastate authority is restricted against interchange and the certificate of registration would be similarly restricted; and since, in the light of the evidence, it is not advisable to impede applicant's interchange operations by limiting authority granted to serving only that part of the Philadelphia commercial zone within Pennsylvania, grant is conditioned on dismissal of his application for a "grandfather" certificate of registration.—Bowser—Investigation of Operations, 98 M.C.C. 170 (172, 179).

Although it has been held that the doctrine in 53 MCC 672, was by its terms limited to operations under the former second proviso of §206(a), that case nevertheless reflects the Commission's long-established policy of not issuing authority for operations which may be performed by a carrier under existing laws and regulations without additional authority; furthermore, the Commission has held repeatedly that the scope of registered operations, both as to commodities and territory, is governed by the interpretation and construction placed upon the intrastate authority by the issuing agency. In this light applicant must establish that under its existing authority it is not authorized to perform the proposed service. Sidney has failed in this burden; application denied. —Sidney Truck & Storage, Inc., Extension, 99 M.C.C. 134 (138).

The conclusion that there has been an exercise of unlawful control and management by Livek, applicant's father and her husband's former employer is demanded by the following uncontested facts: that she has performed substantial office work for Livek, a motor common carrier with irregular-route interstate authority; that she maintains no terminal facilities but stations her one vehicle at Livek's terminal and uses his vehicles and drivers as needed; and that she has no advertisement nor phone listing in her business name nor does she solicit any of the involved traffic, for which shippers call on Livek and show him as the originating carrier, although the actual intrastate transportation is performed under applicant's authority.—Norquist "Grandfather" Registration Application, 99 M.C.C. 501 (503-504).

Commission review herein must be based solely on the record made before the State commission whose findings are to be given great weight and may not be modified unless they are inconsistent with those public convenience and necessity standards normally applied under the Act; this precludes the substitution of the Commission's judgement for that of a duly authorized State body based on substantial evidence and conforming to the requirements of the act. Therefore, since the underlying findings of the Kansas commission, except as to two points named, are supported by substantial evidence of record, they are affirmed; however, since there is no public support for service at excepted points, certificate of registration issued will not include these points.—Dugan Extension—Certificate of Registration, 99 M.C.C. 557 (566-68).

Service which may be authorized under §206(a)(7)(A) is necessarily dependent upon the construction and interpretation of the phrase "in operation solely within a single state". This phrase is in substantial conformity with the original terms of the former second proviso of §6(a) which read "in operation solely within any state", and therefore it is reasonable to assume that Congress, absent any legislative history to the contrary, did not intend to alter the interpretation of that phrase as enunciated in previous decisions of the Commission. In these circumstances, former decisions concerning the permissible range of service under the second proviso are likewise pertinent in determining the meaning of the present §206(a)(7)(A). Accordingly, the phrase "in operation solely within a single state" must be generally construed to preclude operations in interstate or foreign commerce by motor carriers operating under §206(a)(7) at any point outside of a single state or the United States.—Imperial Truck Lines, Inc.,—Common Carrier Application, 106 M.C.C. 741 (747-48).

When §§206(a)(7)(A) and 206(a)(7)(B) are considered conjunctively, it is clear that Congress did not intend to say that mere possession by applicant of an effective intrastate certificate on October 15, 1962, would constitute conclusive proof that applicant was lawfully engaged in interstate and foreign operations. Section 206(a)(7)(B) also provides that such certificates must have been filed with the Commission as evidence of authority to operate in interstate or foreign commerce under the former second proviso of §206(a)(1); since applicant's prior second proviso filing was declared to be of no force and effect on July 13, 1962, for failure to comply with the Commission's insurance requirements, he did not have such a certificate "filed with the Commission" on October 15, 1962, within the meaning of the statute and thus is not entitled to a certificate of registration under §206(a)(7) of the Act.—Dalton, Application for Certificate of Registration, 106 M.C.C. 774 (776, 778).

The "pendency of litigation" exception to §206(a)(7) is intended to excuse an applicant's failure to engage in operations in interstate or foreign commerce if his intrastate certificate was being subjected to some type of judicial or quasi-judicial review which would make it impossible for him to operate. A typical example would be where a court enjoined operation under such a certificate pending a suit to determine its validity, rather than the present applicant's voluntary cessation of operations because of the expense involved in the litigation of his state certificate. Additionally, the cessation of service involved herein does not fall within the category of "interruptions of service over which applicant had no control" since applicant voluntarily chose to terminate his operations and there is no evidence to establish the presence of circumstances such as to render applicant powerless to operate.—Id., pp. 779-80.

Held that "conclusive proof" provision of §206(a)(7) does not require the automatic issuance of "grandfather" certificates of registration to carriers operating pursuant to the former second proviso. Congress only intended to preclude Commission inquiry into the *bona fides* of the operations with respect to commodities and territory, and did not intend to require the Commission to grant a certificate of registration to a carrier which either prior or subsequent to the "grandfather" date had willfully violated the Act. See 281 F. Supp. 436.—All-American Transport, Inc.—Control and Merger, 109 M.C.C. 243 (246-8)*.

A certificate of registration loses its validity during the period that common control with a multiple-State carrier exists, but if the situation is remedied, it is again in full force and effect—unless earlier revoked by a formal Commission order under §212(a). The contrary dictum in the prior report, 104 MCC 396, was specifically voided.—All-American Transport, Inc.—Control and Merger, 109 M.C.C. 243 (249-50)*.

Certificates of registration are to be treated no differently than any other certificate insofar as suspension or termination is concerned. Such termination can be effected only by the procedures set forth in §212(a) which accords the holder the opportunity to demonstrate or achieve compliance prior to such termination.—Id., p. 248-9*.

When a holder of a certificate of registration comes under the control of a multiple-state carrier in violation of §5(4), the certificate is thereby invalidated so long as the control continues. Divestiture of the unlawful control would terminate the violation and reactivate the validity of the certificate of registration.—Reliance Truck Co.—Control and Merger, 109 M.C.C. 495 (499)*.

Complainant alleges that defendant is conducting operations pursuant to certificates of registration in violation of §206(a) of act by unauthorized tacking between various New York counties and New York City. Defendant contends that proper forum for this complaint is the issuing state authority, i.e., the New York State Public Service Commission. In 108 MCC 301 (1969), this Commission set out guidelines for the interpretation of registration authorities; the scope of authorities for carriers operating in interstate commerce under registration procedures is governed by the interpretation or construction placed upon such certificates by the issuing state agency. However, this Commission will interpret or construe registered authority for the purpose of determining the scope of interstate operations which may be performed thereunder, where state commission has issued an opinion or where the meaning of the scope of operations is clear. Defendant's contention that this Commission is not the proper forum for consideration of its registered authority is unfounded.—Flying Freight v. Van's Auto Express, Inc., 110 M.C.C. 358 (360, 361).

The purpose and scope of amended provisions of §206(a) of Act relate to operation by a motor carrier within a single state based upon its having obtained appropriate authority to conduct intrastate operations within that state, and such provisions are also exceptions to general requirement of certification. Section 205(a)(6) requires that state commission make concurrent separate findings of both interstate and intrastate commerce public convenience and necessity, i.e., state commission must determine whether the public need requires an intrastate motor service, and as an incident to such determination whether a corresponding interstate need exists. Therefore, in order to satisfy procedural requirements of §206(a)(6), there must exist: (1) the early identification of the issues to be resolved in the dual proceeding before state commission, (2) an opportunity for interested persons to be heard as to both intrastate and interstate aspects of the operations in issue, (3) the concurrent consideration and finding by state commission that the public convenience and necessity require both the intrastate and interstate operations in question.—Ray Price, Inc.—Certificate of Registration, 110 M.C.C. 381 (383, 384, 385)*.

50. "Grandfather" clause.—[Vol. 21].—See also Barton Truck Lines, Inc., Eligibility—Utah, at §207(a), n. 25 past operations; Helphrey Motor Freight, Inc.—Purchase—Manning Freight, at §5(2), n. 110; and Lake Shore Delivery, Inc.—Purchase—Delivery, Inc., at §5(2), n. 48 intrastate.

Carrier's application for a certificate must be denied, because she is controlled by, controlling, or under a common control with a carrier engaged in interstate operations. The existence of legal control in one person does not prevent the concurrent existence of actual control by another through acquiescence of, or a management contract with, the former, in addition, although family control does not show control or power to control, it is a factor to be given consideration. Herein uncontested facts of business and family connections demand conclusion that there has been an actual exercise of unlawful control and management by Livek, a multi-state carrier, over applicant's transportation operations. In effect Livek has been utilizing the intrastate certificate of his daughter to originate shipments from points in Illinois that cannot be served under his certificates, through the guise of tripleasing and interline operations.—Norquist "Grandfather" Registration Application, 99 M.C.C. 501 (503-504).

Respondents' shipments to Mexico from California under their certificates of registration issued pursuant to the "grandfather" provisions of §206(a)(7) are unauthorized since such certificates are valid only as long as the holder is a carrier in operation solely within a single state; the phrase "in operation solely within a single state" is interpreted to proscribe transportation outside the United States as well as at any point outside of a single state by motor carriers operating under §206(a)(7). Since this section shows substantial conformity with the original terms of the former second proviso of §206(a) it is reasonable to assume that Congress, absent any legislative history to the contrary, did not intend to alter the interpretation of the phrase as enunciated in previous decisions of the Commission; therefore, such decisions are pertinent in determining the meaning of the phrase "in operation solely within a single state".—Imperial Truck Lines, Inc.—Common Carrier Application, 106 M.C.C. 741 (746-48).

On October 15, 1962, applicant was engaged in operations in interstate and foreign commerce solely within Illinois under the certificate exemption provisions of the former second proviso of §206(a)(1) despite the fact that it held and now holds state certificates in both Indiana and Illinois; its activities in Indiana were confined to the leasing of vehicles with drivers and it has never performed transportation in interstate or foreign commerce in Indiana. Further, its Indiana certificate has never been registered with this Commission, and it has expressed willingness to tender its Indiana certificate for cancellation if such action is a condition precedent to the approval of the present application. Since the evidence shows that applicant's operations in Indiana have not been those of a for-hire carrier in interstate or foreign commerce within the meaning of section 202(a) of the Act, those operations, standing alone, do not impair applicant's eligibility to obtain the requested certificate of registration under §206(a)(7) of the Act.—Excel Trans. Service Co.,—"Grandfather" Registration, 106 M.C.C. 898 (901, 903-04).

Applicant's sole stockholder Mandel has shown satisfactoily that prior to, and on and after October 15, 1962, applicant neither was, not is, under common control with two other trucking companies of which her father is sole stockholder and her brother is secretary; while there is evidence of occasional business transactions between applicant and these companies, and the signing of some checks was performed by Mandel's brother for applicant, these matters standing alone fail to show that there is any common ownership or management of the considered companies, or that there is any material financial stake on the part of Mandel's father or brother in applicant's business. Notwithstanding the close blood relationships that exist between persons in applicant and the considered companies, none appear to have the power, either legally or actually, to control the business of the other.—Id., pp. 901, 904.

Applicant filed its application under the "grandfather" provisions of §206(a)(7) of the Act for a "grandfather" certificate of registration as evidence of its right to operate as a common carrier, by motor vehicle, within a single state (Massachusetts). The review board found that Edmund C. Merritt, president and holder of one-half of applicant's corporate stock, is in a position to control or direct applicant's operations in a common interest with the operations of Viola M. Merritt, doing business as E. C. Merritt Express Co., a multiple-state carrier engaged in interstate commerce, and also with a third motor carrier conducting intrastate operations within a state other than Massachusetts, namely Rhode Island, in his own name. Applicant admits its affiliation with a multi-state carrier, and therefore, it is not entitled to benefits of the registration provisions of §206(a)(7) because of its common control with a multi-state carrier on the statutory date of the enactment of the section on Oct. 15, 1962. Application denied.—Merritt Corporation Common Carrier Application, 108 M.C.C. 865 (866, 869. 871)*.

75. State commission findings, used as basis for certificate of registration review of.—Under statute the Commission's review of the State commission's findings, regarding need for proposed interstate transportation, must be based entirely on the record made before the State commission and the Commission cannot substitute its judgement for that of the State body when the latter's decision is based upon substantial evidence and conforms in all respects to the requirements of the Act; this amendment makes single-state operators in interstate and foreign commerce subject to combined Federal-State licensing process, and there is but a single standard by which to determine whether such an application should be granted or denied, i.e., whether public convenience and necessity require the considered single-state carrier to engage in interstate commerce.—Dugan Extension—Certificate of Registration, 99 M.C.C. 557 (566-67).

Based on the record made before the State commission and the lack of evidence of need for service in interstate commerce at two points, the State commission's findings as to need for proposed interstate service is modified to eliminate any service to those two points.—Id., p. 568.

While order granting State certificate to applicant Worldwide did not include required findings and recitation as to public convenience and necessity, it did recite that proposed interstate operations "are authorized in interstate commerce pursuant to §203(b)(8) of the Interstate Commerce Act." State commission when inserting this recitation viewed the considered interstate operations of Worldwide as within the city limits of Albuquerque, N. Mex., and, therefore, exempt. And from the record it is apparent that Worldwide's operations comprise only local collection and delivery services, not under common control, management, or arrangement for continuous transportation in interstate or foreign commerce to or from a point beyond Albuquerque, for local business concerns or line-haul motor carriers within their terminal areas. Therefore, since considered operations are exempt, no authority is required. Denied.—Miller Van Lines, Inc., Certificate of Registration, 102 M.C.C. 116 (118-9).

However, after noting that the cardinal purpose of this section is to make single state operators in interstate and foreign commerce subject to combined Federal-State licensing and that tests first applied in 1 MCC 190 to determine need are applicable here, Commission agreed with the State commission that on the record public convenience and necessity require operation by Miller, Inc. But since J. Clell Miller, controlling stockholder in Miller, Inc., already holds authority duplicating in part that sought, since it is against the Commission's policy to authorize commonly controlled

entities to engage in duplicate operations and since §§206(a)(6), (7) were enacted to prevent a multiplicity of authorized interstate carriers with duplicate authorities, any duplicating authority will not be included in the certificate of registration. Moreover, because of common control aspects, issuance of certificate deferred, pending filing under §5 or submission of evidence to establish that transaction is not subject to §5(2).—Id., pp. 121-2.

Complainant alleges that defendant, a certificate of registration holder, is operating in excess of its authority by unauthorized tacking of its separate underlying state certificates. Defendant is authorized to operate as a common carrier by motor vehicle between Albany and Kingston in Ulster County, N.Y., and from points in Ulster County to points in Rockland County, N.Y. It holds separate authority to operate from Westchester County, N.Y. to New York City. Defendant holds itself out to provide direct service from Albany (Ulster County) to New York City by claiming that New York State law permits tacking where any municipal commercial zone overlaps common boundaries of counties. Under §206(a)(6), (7) of Act, scope of authorities for carriers operating in interstate commerce under registration procedures is governed by interpretation or construction placed upon such certificates by the issuing state agency. Therefore, New York State Public Service Commission rules on tacking are applicable to the instant proceeding; and accordingly tacking would be proper in interstate and foreign commerce, if it were proper in intrastate commerce.—Flying Freight v. Van's Auto Express, Inc., 110 M.C.C. 358 (359-60-61).

Commission denied 3 Nebraska applications for certificates of registration based on underlying intrastate authority obtained through state transfer proceedings on grounds that Nebraska State Commission failed to make concurrent separate findings of both intrastate and interstate commerce public convenience and necessity; that the finding of need for intrastate service is meaningful only when state commission has under consideration an application for initial or additional intrastate service; and that a simple refinding of intrastate public convenience and necessity is insufficient to satisfy requirements of §206(a)(6). Commission's denial was set aside by Nebraska District Court on grounds that nothing in legislative history or Act itself requires an initial application to state commission before applicant can qualify under §206(a)(6) for an interstate certificate; court agreed with Commission's construction that statute requires state commission to make dual findings of public convenience and necessity as to both intrastate and interstate operations but that under Nebraska law, intrastate public convenience and necessity is an issue in a certificate transfer proceeding.—Ray Price, Inc.—Certificate of Registration, 110 M.C.C. 381 (383-84)*.

Regulations of the Commission

35 FR 17264, Nov. 10, 1970, Part 1060: new Part 1060 Special Relief for Motor Carriers Affected by a Temporary Highway Closing, §1060.1 Special relief for motor carriers affected by temporary closing of West Virginia Highway 2, added, effective upon publication in the Federal Register.

Section 206. (b) [§*306 (b) U.S.C.*.] Application for certificate; form and contents.—[Unchanged See Vol. 10, p. 7978]

Notes of Decisions

Volume 10—p. 7978; Volume 11—p. 9425; Volume 12—p. 10386; Volume 13—p. 11067; Volume 14—p. 11586; Volume 15—p. 12192; Volume 16—p. 12839; Volume 17—p. 13532; Volume 18—p. 14343; Volume 19—p. 15582; Volume 21—p. 17213.

15. Filing and verifying applications; parties; notice.—[Vols. 10-19, 21].—See also Blue Bird Coach Lines, Inc. v. United States, at §208(c), n. 1; and Iowa Beef Packers, Inc. v. United States, at APA, 5 USC, Judicial Review.

When plaintiff's apparently restrictive amendment (which actually broadened scope of its application) was accepted after notice of the application was published and was incorporated into the certificate issued without republication of notice, intervening defendant carriers who had no notice of the amendment could not have anticipated that plaintiff's certificate would enable it to operate in competition with them; the lack of proper notice deprived interveners of the opportunity to appear in opposition to the application; and, in such circumstances, the Commission had inherent power to correct an obvious injustice. Accordingly, a broadening amendment having been incorporated therein without adequate notice to competing carriers, the Commission had the power to cancel plaintiff's certificate and issue a modified (correct) one; and it correctly exercised such power; sustained.—Carl Subler Trucking, Inc. v. United States, 313 F. Supp. 971 (976-7)*.

When verified application of plaintiff (applicant) for irregular-route authority denied that extension authority sought could or would be joined with any authority then held for performance of a through service, and published notice of the application was consistent with assurances therein, other carriers were not given proper notice of actual authority sought and nature of proposed operations. Failure adequately to warn competing carriers of the authority actually sought and intended to be used, albeit by tacking, has an injurious impact on the integrity of administrative process. Also, as expressed in 206 F. Supp. 835, the Commission must be able to rely on representations of the parties; and when carrier made its application, it became bound to the representations contained therein. Complaint dismissed.—Eagle Motor Lines, Inc. v. United States, 331 F. Supp. 80 (81-2)*.

Right to notice is specifically provided for in §205(e) of the Act. In addition, Commission Rules of Practice provide that amendments which broaden scope of an application, if tendered after notice of the filing of said application has been published, will not be allowed. However, discretion rests with the Commission in these matters, and in order to facilitate the administrative process this provision has been liberally construed. Yet, there are persons, who in reliance upon published notice of matters involved, have not become parties in a particular proceeding. Thus, every effort should be made to see that published notice merits this reliance and that any tendered amendment be scrutinized lest it result in an unnoticed broadening of applicant's original proposal. In instant proceeding an apparently restrictive amendment, which in fact broadened the application, was permitted without additional notice. This lack of notice resulted in failure of due process, depriving those relying on the Federal Register publication of their statutory right to notice and of the opportunity to participate in the proceeding.—Carl Subler Trucking, Inc., Modification of Certificate, 103 M.C.C. 307 (312-3)*.

Each of the truckers who provide considered local cartage service for forwarders of used household goods (on shipments moving in containerized service on through forwarder bills of lading) will have to apply for authority covering operations they conduct beyond terminal areas or commercial zones, since their service is part of a through interstate movement and they do not qualify for exemptions provided in §202(c)(2) or §203(b8); and, though precise number thereof is not known, it is estimated that 400 to 600 local truckers must file applications. There is no legal requirement for an oral hearing in motor carrier application proceedings, nor is there a practical necessity therefor in every such case; therefore, in view of the burden on carriers of filing and prosecuting their applications, and the burden on the Commission of processing them in addition to its heavy and mounting caseload, each of the applications will be handled, insofar as possible, under modified procedure without oral adversary hearings.—Kingpak, Inc., Investigation of Operations, 103 M.C.C. 318 (342-5)*.

In an effort to develop clear and unmistakable guidelines, which are to be used as an aid in drafting proper and workable applications for motor carrier operating authority and, in turn, to remove some of the confusion apparently existing in the area of restrictions, undue fragmentation of authority, and formulation of appropriate and practical commodity descriptions, the basic problems of proper and practicable commodity, territorial, and service descriptions and restrictions are discussed extensively and specific suggestions are set forth. Considered extension application proceeding, being representative of numerous others, affords an appropriate tool for such general explanation and consideration.—Fox—Smythe Transp. Co. Extension—Oklahoma, 106 M.C.C. 1 (5-6, 9-29).

The application should provide adequate notice of proposed operations, both with respect to commodities transported and territory served; if tacking or interchange operations are proposed, these should be clearly identified; if regular-route authority is sought, the route description should be accurate, and complete, and intermediate points sought to be served should be named; and with respect to irregular-route operations, the requested route authority should be described only by one of the following methods: (1) "from *** to ***," (2) "Between* **and***" (nonradial), or (3) "between***, on the one hand, and, on the other, ***"(radial).—Id., p. 26.

The purpose of shipper certification is to assure a supported application filed with a bona fide intention of prosecuting it to its final conclusion and to permit the allocation of sufficient hearing time to accommodate the expected number of shipper witnesses; moreover, such certifications provide information to protestants and potential protestants helping them to decide their position and prepare their presentations, resulting in a more expeditious disposition of the proceeding. In furtherance of these ends it is necessary that similar certifications be required of public witnesses discovered subsequent to applicant's filing. Thus, henceforth, in addition to filing certifications with an application, an applicant is required to file with the Commission an additional certification of each witness (if less than 10) not known to applicant at the time of filing but who becomes known prior to the submission of evidence. Such certification shall be filed with the Commission as soon as practicable following discovery of the witness, shall contain a statement by witness as to date on which he first made his support known to applicant, and copies of such certification shall be served by applicant upon all parties of record.—Schaeffer and Schaeffer Ext.—New York City, 106 M.C.C. 100 (102-3).

In addition, when more than 10 shippers support the application, it behooves the applicant, at the time of filing, (1) to submit with application sufficient certifications of support in excess of 10 to be reasonably representative of the total number of witnesses and the scope of authority applied for, (2) to indicate the total number whose testimony will be presented, and (3) to identify by name and location those shippers on whose behalf certifications are to be filed. If the number of supporting shippers should be increased subsequent to the filing of the application, information regarding identity and location of each of the subsequently acquired supporting shippers should be transmitted promptly to the Commission and all parties to the proceeding.—Id., pp. 102-3.

Noncompliance with these requirements, absent showing of good cause, will result in the disallowance of testimony and evidence proffered by public witnesses upon whose behalf certifications or identifications have not been filed.—Id., pp. 102-3.

Where a certificate of public convenience and necessity is sought under §207 based on a certificate of registration which is the subject of a written contract of sale between applicant and vendor and there is no related §5 application since the purchase is exempt under the provisions of §5(10) of the Act, the basic guidelines underlying any transaction involving issues comparable to those here considered must consist of: (1) an application filed with this Commission seeking a certificate of public convenience and necessity, (2) an agreement by the parties involved filed as part of the application which includes a covenant for cancellation of the certificate of registration by the holder thereof, conditioned upon applicant's obtaining an appropriate certificate of public convenience and necessity, (3) the transfer of the underlying intrastate rights as an inseparable part of the proposed transaction, and (4) a positive showing that the transaction is one not requiring prior approval under §5.—Las Vegas Tank Lines, Inc., Extension, California Points—107 M.C.C. 589 (596).

Applicant's failure to comply with the requirement that Certifications of Support must be executed and filed by all shippers known to and supporting applicant at the time the application is filed cannot be excused for "good cause" and witness' proffered testimony was properly rejected. Applicant did not disclose what matters, if any, came to its attention to lead it to believe that protestants had intimidated other shipper witnesses who had filed certifications nor did applicant seek to subpena any shipper witness whose support had been withdrawn in order to elicit testimony concerning "intimidation". Statements made by one supporting shipper who withdrew its support for the reason that applicant is no longer in a position to render the services the shipper requires are not refuted by applicant and submission by applicant in its exceptions of these statements constitutes a tacit admission that applicant's service would not be responsive to that shipper's needs. Moreover, applicant at no time prior to the hearing sought formal relief from the prescribed procedure.—J&M Transportation Co., Inc.—Extension, 107 M.C.C. 744.

Commission found that the emergency transportation situation described herein required issuance of a special grant of operating authority to affected carriers and to avoid delay contrary to the public interest special procedures as to notice and filing were herein promulgated since authority granted under the special grant authorizes no new competitive service and is not shown harmful to anyone—Special Relief for Motor Carriers, 112 M.C.C. 323 (325).

While the filing of successive applications is not prohibited, where there are clearly no changed circumstances such tactics by an applicant should be strongly discouraged. This method of costly harassment of a smaller competitor will not be condoned by the Commission. Applicant and its counsel were admonished that the Commission will not look favorably upon similar actions in the future.—United Parcel Service Ext.—Tenn., Ark. and Miss. Points, 117 M.C.C. 621 (626).

Applicant was found to have advertised in a trade publication of the transportation industry, setting forth the nature and scope of its proposed operation, the date on which supporting verified statements were due to be filed, and requesting interested shippers to contact applicant for verified statement forms and for further information, in an apparent attempt to obtain support for its application. The director of the Office of Proceedings responded to an inquiry from an interested party, with a copy to the applicant, that this approach to solicitation was neither approved nor acceptable. This judgment was affirmed by the Commission in this proceeding, because of the unnecessary administrative litigation that such solicitation generates.—Transportes Azteca Extension—Eastern States, 117 M.C.C. 645 (651).

Notice: [Vols. 19, 21].—See also National Trailer Convoy, Inc., Extension, at §207(a), n. 25 commodity.

In suit to set aside grant of certificate to defendant carrier, the Commission committed error when, without notice to protestants, the public, or any further published notice, it granted authority in excess of that sought contrary to stipulation and amendment of application concerning restriction of proposed service. Notice to interested persons and their right to be heard are basic concepts of justice under law; stipulated restrictions were accepted and honored by the examiner; and protestants' subsequent withdrawal or inaction implies recognition by all that, without restriction, the proceeding could materially and adversely affect them. It would be clearly unfair and unjust to plaintiffs (protestants) and others interested for the court to permit them to be lulled into a false sense of security, protection and inaction by allowing the Commission to remove the restrictions without giving published notice to interested parties and the public so they could be heard. Order and certificate as granted should be republished in the Federal Register with plaintiffs and others interested given opportunity to offer evidence and be heard.—Georgia—Florida—Alabama Transp. Co. v. United States, 290 F. Supp. 764 (766-7, 769)*.

Inasmuch as need is shown for a grant of authority to transport all the commodities described in shipper testimony (including construction materials) and as it is possible that other persons who relied on notice of the application for authority to transport construction supplies as published may have an interest in, and would be prejudiced by a lack of proper notice of, the broadened scope thereof, notice of authority granted will be republished in the Federal Register, and issuance of certificate withheld for 30 days from date or republication, during which time interested parties may file an appropriate protest.—Statewide Transport, Inc., Extension, 96 M.C.C. 57 (64).

Applicant actually wanted authorization for an alternate route but, by mistake, its application, as filed and as published in the Federal Register, merely set out the route sought and did not contain the words "as an alternate route, for operating convenience only", so that the application appeared to request authority for a service route. Usually it is important for protestant to be adequately informed of the nature of applicant's proposal because when applicant proceeds on an alternate route theory, protestant must meet a case quite different from the more usual application supported by public witnesses by showing it is an effective competitor of applicant rather than satisfactorily serving members of the shipping public and evidence of traffic volume, time in transit, and the like becomes more important than evidence of its service potential. However, here, protestants were ready to meet an alternate-route case and the lack of notice was not fatal.—West Bros., Inc., Extension, 96 M.C.C. 490 (495).

An irregular-route motor carrier must indicate if it intends to combine proposed operations with those already authorized; and, in light of the few certificates to which proposed authority can be tacked and its ability to furnish any carrier with additional information upon request, applicant's simple statement of intent to tack is adequate to apprise other carriers of the scope of the application. Moreover, the number of protestants to this proceeding evidences the sufficiency of notice.—Gregory Heavy Haulers, Inc., Extension, 100 M.C.C. 603 (608-9).

An application for irregular-route authority must indicate whether or not applicant holds authority which can be tacked to the authority it is seeking, and whether it intends to tack or join the proposed authority with any it presently holds for purpose of providing a through service. Protestant contends that notice of applicant's proposed service as published in Federal Register is insufficient; and that if grant is authorized, there must be a republication describing the many possibilities which exist permitting applicant to tack proposed authority to those authorities presently held by it. Applicant, in instant application indicated that it did hold authority which could be tacked, but stated that it had no intention to do so. By negating such intention, consideration of application is limited to proposed operation between points and areas specifically named in application. Mere fact that tacking possibilities exist and that applicant may avail itself of them does not warrant imposition of a restriction against tacking on basis of failure to give adequate notice. To conclude otherwise would be tanamount to finding that in every extension proceeding in which a tacking possibility exists, such a restriction would automatically have to be imposed. Ruan Transport Corp. Extension—Ames, Iowa, 110 M.C.C. 389 (390, 392)*.

Notice to interested parties by publication in the Federal Register of the proposed service, to the same extent applicant expects to submit evidence in support thereof, between points and areas specifically named in the notice, is adequate and sufficient notice. Applicants herein indicated that proposed service would not involve tacking possibilities of presently held authorities. Publication of manner in which proposed authority could be used is not required. —Klipsch Hauling Co., Extension—St. Joseph, Mo., 111 M.C.C. 295 (304-6)*.

Omissions: [Vols. 12, 21].—Although application as filed did not seek authority to perform special operations to all points in New York City and Philadelphia, but sought only to serve airports in or adjacent thereto, applicant's oversight in that respect is attributable to its unfamiliarity with distinctions between the various types of passenger service envisioned by the Act. Moreover, the number of passengers per vehicle it will be authorized to transport is substantially less than the number contemplated by application. Hence, grant of authority to serve

New York City, Philadelphia, and Philadelphia International Airport does not unduly broaden application.—D & M Taxi Co., Inc., 96 M.C.C. 439 (447).

Supporting shipper did not mention or indentify other applications which it supported, nor did it make cross-reference to any of the 5 embraced proceedings. Shipper's apparent lack of candor, in part, misled the Commission into separate consideration of related matters without regard to other similar applications supported by it, and without knowledge of the complete, overall transportation picture, including the scope of shipper's transportation needs and the transportation situation in the considered areas. Not only is this approach inconsistent with the effective performance of the Commission's administrative functions, but it also leaves such contradictions of record that rational conclusions may not be reached regarding any possible real need for additional service to some particular areas. Applications denied.—Jenkins Truck Line, Inc. Extension—Gentry, 117 M.C.C. 725 (730).

Parties: [Vols. 11-13, 15, 18, 19, 21].—Where need is shown for service of only one applicant, the overwhelming equities are in favor of granting authority to applicant, who is an experienced carrier with established terminals and adequate equipment and who has been handling a substantial portion of the involved traffic satisfactorily for the majority of the 46 supporting shippers and receivers, as opposed to applicant with neither experience nor equipment and whose application was filed subsequent to that of the established carrier.—Dean Truck Line, Inc., Extension, 96 M.C.C. 184 (190).

When a definite need is shown for a service which existing carriers cannot fill and more than the necessary number of carriers seek to fulfill that need, it becomes the function of the Commission to determine which of the applicants should be granted the authority. To accomplish this requires examination of existing authorities, the operations of the considered applicants, the location of their terminals, and their operating equipment. No single factor is determinative and all must be considered in relation to the public need, the particular applicant, and the authority sought. The relative date the carriers filed applications for authority and, because public need is a fact and not the property of any particular applicant, which carrier provided the proof of need, are unimportant, except when all other things are equal.—Willis Shaw Frozen Exp., Inc., Extension, 96 M.C.C. 225 (230).

Where a need is shown for a new service and more than the necessary number of carriers proffer their services to meet such need, it is the function of the Commission to determine, in furtherance of the aims of the national transportation policy, which applicants should receive grants of additional authority. The exercise of this function requires an evaluation of the existing authorities and operations of the considered applicants, the location of their terminal facilities, and the equipment operated by them. No single factor is controlling, but all must be considered in relation to the public need, the particular applicant, and the authority sought. Also considered are the relative date of filing the applications and the carrier which produced the evidence supporting the finding of public need, although priority of filing, unless all else is equal, is of minor importance.—Kroblin Refrigerated Xpress, Inc., Extension, 96 M.C.C. 233 (237-8)*.

The parceling out of authority to a number of applicants who had each shared in the involved traffic on an interline basis by participating in its transportation from the shippers' plants to different areas of the country, when all of the applicants were relatively equal as to experience in moving the type traffic involved and the location of terminals was not a factor, was done on the basis of operational experience, that is, based on the theory that those carriers already experienced in performing the movement from its origin to the different destination areas that each had been serving in the past were best qualified by such operational experience to perform that particular portion of the movement; each carrier was allocated operating authority to perform that part of the movement which corresponded to that which it had been performing in the past by interchange.—Id., pp. 239-240.

Appearance by a person in one proceeding, heard with another on a consolidated record, does not confer on that person the status of a party in all the embraced proceedings; this can only be accomplished by compliance with provisions of the Commission's Rules of Practice. Bureau of Inquiry and Compliance, although a party to investigation proceeding, did not enter an appearance in respondent's application proceeding and therefore is not a party thereto. Motion to strike the Bureau's exceptions insofar as they relate to the application proceeding and respondent's fitness to perform the proposed operations, granted.—S & C Transport Co., Inc., Investigation and Revocation, 96 M.C.C. 642 (644).

Protestant's contention that it can not be found in default for failing to file verified statements within allowed time because it "conditionally withdrew" was denied. A "conditional" withdrawal is no withdrawal at all until specified condition takes place and parties must actively continue participation or be subject to default or other applicable sanctions. Protestant may file exceptions limited to Commission's refusal to allow an amendment or restriction.—Sammons Trucking Extension—Fort Dodge, Iowa, 111 M.C.C. 92 (97-8).

Since protestants did not testify at the hearing, did not reply to applicant's exceptions to the Administrative Law Judge's recommended report and did not file any subsequent pleadings, their interests in the proceeding were not considered; and the failure of an additional protestant to reply to applicant's petition for reconsideration showed a lack of continuing interest in the involved traffic and detracted from the weight that its opposition would normally be accorded.—Trans West Exp., Inc., Ext. —Seattle—Portland, 118 M.C.C. 1 (2, 3).

Inasmuch as a freight forwarder is responsible for the commodities shipped, must rely on other carriers for the performance of underlying transportation services, and cannot be a party to joint rates, it is wholly dependent on other carriers to whom it tenders consolidated shipments for line-haul transportation between its terminals. Consequently, the freight forwarder has traditionally and appropriately supported the applications of motor common carriers for new or improved operating rights. See 107 MCC 706, 714—Sullivan Lines, Inc., Extension—Far West, 118 M.C.C. 801 (812).

Priority of filing: [Vols. 11-13, 15, 19, 21].—As a result of a basic change in the transportation of cement, a large part is now handled as a rail-motor coordinated movement and many motor carriers filed applications for authority to enable them to participate in its movement. Some of these applications already had been processed and granted at the time of instant proceeding and the holders of those new authorities appeared as protestants. However, those so-called existing authorities are looked on as having been applied for contemporaneously with considered applications and will be considered as such. The Commission's right to consider applications separately or in combination is a well established matter of administrative discretion, and where applications conflict in some degree, the decision will be based on the concept of fairness of opportunity to all parties, the effective procedures of the Commission, and the public interest.—Transport, Inc., Extension, 96 M.C.C. 671 (678).

The fact that Wehe's application for authority was filed first is not controlling, as priority of filing is given little consideration unless all other things are equal. In the instant case, the successful applicant Reliance was found better qualified to perform the proposed service and Wehe's application was denied as the Commission found that only one grant of authority was warranted. —Wehe Common Carrier Application, 110 M.C.C. 798 (814).

16. Amendment of application.—[Vols. 10-14, 17-19, 21].—Plaintiff (protesting carrier) was put on notice that restrictive amendments to an application must be acceptable to the Commission and that protestants who withdraw from a proceeding relying on such a proposed amendment do so at their own peril by the Commission's opinion in 106 MCC 1; by its Rules of Practice, particularly Rule 247 (d)(5); and by the warning in the Federal Register, in which notice of intervenor's application appeared, that restrictions not acceptable to the Commission would be eliminated. Thus, though the Commission did not rule on restrictive amendment in question prior to the hearing, plaintiff was not entitled to presume that it would be accepted; and since plaintiff withdrew from the proceeding in reliance on that amendment at its own peril, it cannot complain that it was denied an opportunity to oppose the application actively. The commission's denial of plaintiff's request for reopening to allow it to present its evidence in opposition was not procedurally defective; suit to enjoin and annul Commission orders, dismissed.—Frozen Food Exp., Inc. v. United States, 328 F. Supp. 666 (667, 669-70)*.

Amendment adding tea to "grandfather" application should have been accepted; record is clear that applicant's failure to include tea in the application as originally filed was clearly an oversight because, as indicated, an abstract of shipments of tea was attached to the original application. The amendment respecting tea was properly received.—Midwest Emery Freight System, Inc., 95 M.C.C. 642 (647).

Proposed amendments intended solely to eliminate opposition to an application must be closely scrutinized as they can result in subordinating the public need for a particular service to the applicant's own interest, leaving a muddled picture of the authority sought. While Rule 1.247(d)(5) of the Rules of Practice states that any restrictive amendment must be "acceptable to the Commission," the Commission will not accept amendments that are contrary to the public interest, such as the confusing amendments offered by applicant in 83 MCC 113. Furthermore, the Commission is not, and cannot be, bound by restrictive amendments agreed to by the parties where they achieve results inconsistent with the public interest and inimical to practicable and effective regulation; nor is the Commission required to accept a restriction in the exact form agreed upon by the parties.—Fox—Smythe Transp. Co. Extension—Oklahoma, 106 M.C.C. 1 (8, 21-2).

Broadening scope of application: [Vols. 12, 18, 19, 21].—Applicant's motion at the further hearing on its "grandfather" application (granted to enable it to present additional evidence as to two specified groups of shipments) that the application be considered as amended to conform with proof of operations contained in its exhibit listing shipments in addition to the two groups, denied. All of applicant's and protestants' arguments were before the Commission when it considered the matter and limited the additional evidence which applicant would be permitted to introduce; moreover, 4 years have passed since the first hearing and it would be inappropriate for applicant now to seek to amend the application to include additional shipments.—Consolidated Freightways Corp. of Del., 95 M.C.C. 220 (222-3)*.

An applicant is obligated to inform the Commission if there is anything remiss regarding the published notice of its application and, if it fails to do so, it is bound by the publication; and this is true even though the incorrect publication is the fault of the Commission. Therefore, it follows in instant proceeding that applicant carrier, upon becoming aware of the tacking possibilities created by amendment of the application (made after the notice of filing thereof had been published), had a duty to make known the broadening nature of its amendment and that a grant of the amended application would enable it to conduct operations in possible competition with carriers not parties of record. In addition, carrier should not have gone to any great expense in realizing such tacking possibilities before assuring itself that the lack of notice had been cured.—Carl Subler Trucking, Inc., Modification of Certificate, 103 M.C.C. 307 (314)*.

Commodities: [Vols. 10, 19, 21].—Applicant's amendment restricting authority to enumerated commodities is unacceptable as evidence of supporting shipper shows that a grant of general-commodity authority is required. Commission is not, and cannot be, bound by applicant's restrictive amendments which are inconsistent with public interest and inimical to effective regulation. Protestants who withdrew in reliance upon such unacceptable amendments do so at their own peril, and cannot later complain they were denied the opportunity to oppose such applications actively.—Comet Messenger & Deliv. Serv., Inc., Com. Car. Applic., 111 M.C.C. 13 (16-17)*.

Narrowing scope of application: [Vols. 12, 21].—Protestant's failure to appear at the hearing in reliance upon an understanding with applicant that the application would be amended at the hearing makes it technically no longer a party to the proceeding under Rule 247 (d) (6) of the Commission's General Rules of Practice; but in view of its timely protest and applicant's failure to offer the restrictive amendment that protestant understood was to be made, and for good cause shown, its pleading termed exceptions and petition for further hearing will be made a part of the record and considered in the disposition of the proceeding.—Truck Transport, Inc.,—Extension, 106 M.C.C. 885.

Applicant's amendment restricting application against bulk commodities was refused and unrestricted authority granted. When commodity description proposed is reasonable and embraces the service contemplated for which need is shown, protestant must show that a material, adverse effect would result from unrestricted authority which protestants herein have failed to show.—Sammons Trucking Extension—Fort Dodge, Iowa, 111 M.C.C. 92 (99-100).

18. Burden of proof.—[Vols. 10-19, 21].—See also Ashworth Transfer, Inc., Ext., at §207(a), n. 7 existing carriers; Behnken Truck Service, Inc., Ext.—Exbarge Traffic, at §203(a)(10), n. 5; Curtis, Inc., Extension, at §207(a), n. 25 existing service; Delaware Exp. Co. Extension, at §207(a), n. 25 commodity description; Heavy & Specialized Haulers, Inc., Investigation, at §212(a), n. 30; Schilli Motor Lines, Inc., Conversion Application, at §207(a), n. 25 conversion; and V. Van Dyke Trucking, Inc. v. United States, at §207(a), n. 25.

Where applicant carrier and its supporting shipper are under common control, the burden falls on carrier to show that, despite existence of such relationship, there is no substantial opportunity for engaging in discriminatory practices. The Commission examines closely situations where the carrier and principal supporting shipper are under common control because such situations create opportunity for discrimination and unfair competitive practices which is incompatible with common carrier status; and, except where no substantial opportunity is shown, it is reluctant to grant a certificate where such circumstances exist. Record supports the Commission's conclusion that, in view of existing common control of plaintiff (applicant) and its supporting shipper, plaintiff had failed to show its fitness to operate as a common carrier; therefore, order denying plaintiff's application is sustained.—Alter Trucking and Terminal Corp. v. United States, 299 F. Supp. 819 (822-4)*.

In suit by motor carriers (protestants in Commission proceeding) attacking order granting extension authority not restricted against interlining to defendant carrier because it was without substantial supporting evidence and contrary to law, the dispositive question is whether the applicant had the burden of showing that imposition of an interline restriction was not warranted. Ordinarily, once need is shown for a proposed new service, an initial burden is on protestants to show that any new authority should be restricted against interlining; however, an application for elimination of an existing interline restriction is, itself, a proposal of new service for which applicant must show public need. Uncontroverted evidence showed need for proposed new service in transporting general commodities, and the right to interline overhead traffic followed as a reasonable adjunct to providing such service; thus, there was no necessity that applicant show public need for unrestricted authority unless it first appeared that a restriction was warranted.—Ashworth Transfer, Inc. v. United States, 315 F. Supp. 199 (201-2)*.

Furthermore, though applicant had previous authority in the area that was subject to an interline restriction, which is subsumed by its proposed new operations, the substantiality of the new authority granted justified conclusion of the Commission that the old restriction did not shift to applicant a burden to show that the public interest required unrestricted new authority. Therefore, in absence of a showing by protestants that imposition of an interline restriction was warranted, the Commission's grant of unrestricted general commodity authority was amply supported by evidence of need for the proposed new service.—Id., pp. 202-3.

An applicant for a motor carrier certificate has the burden of proving that the proposed service is required by the public convenience and necessity; and that burden cannot be met simply by a showing that applicant will be able to obtain traffic if the authority is granted. Thus, it was incumbent on plaintiff (applicant) to establish, by a preponderance of the evidence, that the unrestricted household goods service which it seeks authority to render was in fact needed by the shipping public. And a basic factor in that proof is a demonstration of the extent to which needs of the shipping public cannot adequately be met by existing service already available.—Towne Services Household Goods Transp. Co. v. United States, 329 F. Supp. 815 (820-1)*.

Plaintiff (applicant) failed to prove need for proposed unrestricted household goods service between Texas points when testimony of supporting freight forwarders was limited to need for service that could be provided under the "Kingpak" certificate granted; shipper witnesses were merely "trying to help out" plaintiff with no genuine need for service which could not readily be met by existing carriers; and support of five household goods carriers who are authorized to render complete service between all points in Texas is based on a desire to avoid handling traffic they consider "undesirable." While the household goods carriers indicate desire for proposed service in the accumulation and distribution of small shipments, in effect, they would use applicant to avoid their statutory common carrier duty to render continuous and adequate service to the shipping public under their certificates; that falls far short of establishing a public need for the additional service which plaintiff seeks authority to provide. Considered Commission orders, sustained.—Id., pp. 817-8, 822.

In suit to set aside Commission order granting defendant carrier extension authority between Jacksonville, Fla., and Thomasville, Ga., without a restriction against tacking that route with applicant's existing Montgomery, Ala.—Thomasville route, record does not show that the Commission unjustly imposed too great a burden of proof on plaintiff (protestant) regarding material adverse effect on its Montgomery—Jacksonville operations that grant of the authority without such a restriction would have. An applicant must bear the burden of proof with respect to primary route it seeks; in instant case, applicant carried that burden. However, with respect to the imposition of tacking restrictions, protesting party must prove his own damage as opposed to having applicant prove that a protestant will not be harmed; and a mere showing by protestant that tacking possibilities exist, and applicant might use them, is not sufficient to warrant a restriction against tacking. Thus, when plaintiff failed to meet its protesting-party burden of proof, there was no ground for the Commission to grant no-tacking restriction it desired; final order of the Commission is sustained.—Howard Hall Co. v. United States, 332 F. Supp. 1076 (1079, 1081-2)*.

In application filed under "interim" provisions of §7(c) of Transportation Act of 1958 applicant has failed to meet his burden of proving public convenience and necessity inasmuch as he failed to produce shipper support for transportation of the frozen commodities and tea, although the record shows that nine shipments of frozen commodities were transported during the interim period.—Midwest Emery Freight System, Inc., 95 M.C.C. 642 (647).

It is well established, see 64 MCC 299, that the burden of establishing fitness in a proceeding involving an application for a certificate of public convenience and necessity rests on the applicant. Since applicant was found unfit in another proceeding, its operations must be carefully scrutinized before a finding of fitness can be made here. Consideration must be made, in the light of the finding of the prior report, which found that applicant had conducted "willful unlawful operations* * *almost up to the time of the hearing in the complaint proceeding notwithstanding several warnings by the Bureau and applicant's assurance that such operations were being discontinued." Manifestly, a finding of fitness is not warranted unless applicant has demonstrated a change of disposition which may be seen from its manner of operation since the prior hearing.—Schenck Tours, Inc., Extension, 96 M.C.C. 66 (75)*.

The contention that applicant should be allowed to continue service irrespective of the mode of transportation used without consideration of the adequacy of other existing services was rejected herein as in 94 MCC 677. Authorization of a proposed line-haul operation by an express applicant must be justified on standards no less than those applicable to other carriers and the burden of proof is the same whether the proposal is supported by representative user complainants regardless of the mode of transportation or by the carrier's own testimony of need therefor in its role as a shipper.—Railway Exp. Agency, Inc., Extension, 96 M.C.C. 127 (134).

To justify a grant of authority which would allow relocation of an interline point, applicant must establish (1) that while there would be resulting operating economies and efficiencies to the carrier applicant, the shipping public would be primarily benefited, and (2) that a competitively different interline service would not be performed through the new interline point. While the applicant's proof relates to projected operating economies, the Commission must find public convenience and necessity require the proposed service.—Brada Miller Freight System, Inc., Extension, 96 M.C.C. 473 (475).

Since carrier failed to give details concerning specific commodities, volumes, origins and destinations to establish shippers' bulk motor carrier transportation requirements, it has failed in its burden of proving that a need exists for the proposed service. Shippers' support of this application is premised on an existing and increasing market for bulk chemicals, an asserted trend to dry bulk motor shipments, and their requirements for flexible bulk motor service to a wide destination area in order to meet rapidly fluctuating market requirements. However, there is no specific indication when or where future shipments would move; the only future movements, which have been shown to be likely, can be handled by certain protestants. In these circumstances it is not possible to judge whether the existing services are inadequate or adequate to meet shippers' reasonable transportation requirements. Denied.—Chemical Leaman Tank Lines, Inc., Ext., 98 M.C.C. 452 (457, 459, 462-463).

Because of the difficulty in obtaining evidence as to prospective shippers as well as to past shippers inconvienced by lack of adequate service, applicant's burden of proof in cases involving automobile drawn trailer traffic is similar to burden in cases involving shipments of household goods and less exacting than in cases involving the transportation of general freight. Accordingly, service failures experienced by five of the persons supporting the application are significant and demonstrate an inability on the part of protestants to handle the traffic. Granted in part.—Chandler Trailer Convoy, Inc., Extension, 98 M.C.C. 567 (570-571)*.

Applicant has failed to sustain its burden of establishing the interpretation and construction placed upon its intrastate authority by the State of Ohio and of establishing that it is not authorized thereunder to perform the operations for which it here seeks authority; in addition supporting shippers concede that existing service of applicant and other motor carriers meets their reasonable transportation needs. Therefore, as it is against Commission policy to issue authority for operations which may be performed under existing authorities, application denied.—Sidney Truck & Storage, Inc., Extension, 99 M.C.C. 134 (138-139).

Applicant failed in its burden of proof, since it failed to produce any shipper testimony demonstrating a need for its proposed common carrier services and since this need cannot be inferred from the resume of applicant's past operations and industry practices. An application for a certificate under §207(a) may be granted only on showing that the present or future public convenience and necessity require the operations proposed; a showing under §212(c) that the carrier holds a permit and that its operations are those of a common carrier is irrelevant.—Eastern States Transp., Inc., 99 M.C.C. 524 (529-31).

Since the evidence shows applicant corporation as nothing more than a paper agency, formed for the purpose of obtaining a certificate by a number of individuals, it has failed to establish that it is fit, willing and able to perform the proposed service; the absence of a firm corporate structure or plan indicates that applicant is in no position to effectively influence or control stockholders' individual enterprises or to accept responsibilities involved in conducting proposed operations. Thus, it is clear that individual stockholders, and not applicant, would actually conduct proposed operations and that applicant's proposal is basically the separate proposals of its several stockholders. Denied.—International Automobile Delivery, Inc., 100 M.C.C. 119 (124-5).

If applicant fails to show that it is "fit, willing, and able to perform the service proposed and to conform to the provisions of * * * [part II] and the requirements, rules, and regulations * * * thereunder * * *'', it has failed to sustain its burden of proof and its application should be denied. And having operated in violation of its temporary authority up to and during time of hearing and having failed to comply with certain regulations concerning lease and interchange of equipment and with the requirements pertaining to publication of appropriate tariffs, applicant cannot be expected to conduct its future operations in a lawful manner since it has knowingly and willfully engaged in prior unlawful conduct. Denied.—Fanshaw Extension, 100 M.C.C. 173 (178-9).

Inasmuch as applicant's notice of intent to tack proposed operations effectively extended scope of application to include all origin points in applicant's existing certificates as well as those specifically mentioned in the application, applicant need not be limited to the specific burden of proving a need for service from, to, or between the latter points. However, in absence of proof of need for service from the points specifically applied for, service should not be authorized from such points solely for purpose of allowing a combination with existing authority.—Gregory Heavy Haulers, Inc., Extension, 100 M.C.C. 603 (609).

Where applicant and one of supporting shippers are under common control, burden is upon applicant to establish that a grant of common carrier operating authority cannot result (1) in favoritism, preference, and discrimination as between the commonly-controlled shipper and competing shippers, and (2) in unfair competition as between applicant and other carriers. Where shippers other than one affiliated with applicant are aware of affiliation, but nevertheless support applicant, applicant found to have met its burden as to first condition. However, a finding favorable to applicant with respect to second condition can be made only where there is no service available from existing carriers or where applicant and another carrier are fiercely competitive and traffic available from affiliated shipper is so minimal as to preclude possibility of changing the competitive relationship. On applicant's failure to show that grant would not result in unfair competition as between it and protestant, application denied.—Cousins, Inc., 102 M.C.C. 481 (484-5).

Supporting shippers' expression of complete confidence in applicant's existing service, standing alone, is not a sufficient basis for extension of territorial authority sought; applicant participates in movement of interline traffic to and from considered western States under exclusive joint-line arrangement with carrier serving the area and record does not show any threatened loss of such traffic through possible termination of the joint-line arrangement. Moreover, there is no showing that existing service is inadequate or that the authority sought is necessary to enable applicant to maintain its competitive position; on the contrary, record indicates that a grant would enable it to enhance its competitive position by an unwarranted encroachment upon protestants' established authorized services; denied.—Neptune World—Wide Moving, Inc., Extension, 103 M.C.C. 533 (538-9)*.

Since the evidence consists primarily of supporting shippers' general statements and since the only instances of existing carriers failure to furnish adequate service are during periods of unusual peak shipper activity, applicant has failed to show that existing service is inadequate; neither infrequent nor isolated instances of delays demonstrate a general pattern of service failure. Moreover, as there is ample evidence that existing carriers provide adequate service and as existing carriers should be afforded an opportunity to transport all traffic they can handle in an adequate and efficient manner without added competition, application denied.—Point Transfer, Inc., Extension, 105 M.C.C. 634 (659-61)*.

Applicant has burden of proving affirmatively that need exists for proposed service which existing carriers are either unable or unwilling to provide. And supporting shipper's testimony without any specificity concerning actual inadequacies in existing service usually fails to meet this burden; however, in the circumstances present, a showing of inadequacy of existing carriers' service is not controlling in proving need. Inasmuch as considered service has existed, albeit unauthorized, under color of right and without challenge for a number of years, its continuance would not create a new or aggravated competitive situation; therefore, all things considered a public need has been established for proposed service.—Dixie Ohio Exp., Inc., Investigation and Revocation, 105 M.C.C. 835 (841-2)*.

Following 61 MCC 421, applicant has proved that it has operated through the gateways in question. Applicant's manifests contained the routings which its drivers were to follow; applicant asserted that 85 to 90 percent of the time its drivers observed the gateway instructions and that it is not uncommon for drivers' logs not to show gateways traversed, because drivers are only required to show rest and meal stops so as to show off-duty and driving time in order to be in compliance with the safety regulations. As a practical matter by showing such stops, drivers' logs do show routings and thus, indirectly, the gateways traversed. —Cartwright, Inc., Ext.—Elimination of Circuity, 106 M.C.C. 106 (111-12).

Under the provisions of 206 of the Interstate Commerce Act, an applicant has the burden of demonstrating the existence of a public need for the proposed operation before a grant of common carrier authority may be authorized. An important requirement in this regard is whether the existing carriers are unable or unwilling to provide reasonably adequate service; because applicant formerly held temporary authority raises no presumption that corresponding permanent authority will be granted. Proof of past operations conducted under temporary authority may be established by showing the volume and pattern of traffic handled within the scope of its past operations. In such circumstance, evidence of such operations, under temporary authority is clearly desirable to show movements within the scope of the application and the competitive effect of such operation on existing carriers.—Chicago & Eastern Illinois R. Co., Com. Car. Applic. 108 M.C.C. 53 (60, 61).

Though cases involving the relocation of an interchange point are somewhat similar to alternate route or elimination of gateway application cases, an analogy thereto is improper. Applications for relocations of an interchange point are clearly distinguishable; and an applicant for such authority need only establish, in addition to operating economy or efficiency, that the interline service capable of being performed through the new point will not result in a new service competitively different from that which can be performed through the present interchange point; it is not required to show that it is transporting substantial volume of traffic between points involved, nor that it is competing with existing carriers as to substantially all its authorized commodities and points of service. Since applicant has met its burden of proof, authority allowing it to conduct interchange operations at Montrose instead of Rico, Colo., granted.—R. A. Gould, Inc., Extension, 108 M.C.C. 69 (71-2, 73)*.

Because of the large number of parties and the broad commodity and territorial scope involved, the application was handled under a special procedure; however, it is equally incumbent upon an applicant to establish a prima facie case in proceeding assigned under special procedure as it is in a case assigned for modified procedure. Minimum showing expected of any applicant for motor carrier authority is that the shippers and consignees clearly identify the commodities they ship or receive, the points to or from which their traffic moves, volume of traffic they would tender applicant, the transportation services now used by them, and any deficiencies in existing services. Supporting shippers' verified statements fail to prove a prima facie case for applicant's proposed operations; shippers failed to demonstrate specific deficiencies in services of existing carriers and, since the evidence is extremely speculative in terms of the points to which their commodities move, there is no way of ascertaining the points in the broad destination area to which their traffic will move. Thus, applicant failed to meet minimum legal requirements to prove a prima facie case; denied.—Jerry Lipps, Inc., Extension, 110 M.C.C. 113 (118-9).

As held in 95 MCC 312, applicant in a conversion proceeding shoud present, in addition to evidence of its past lawful operations pursuant to its permit, shipper testimony which demonstrates a need for its service as a common, rather than contract, carrier. However, as long as its transportation needs are satisfied, a shipper would ordinarily have no reason to care what kind of authority the carrier operates under; thus, to hold applicant in a conversion proceeding to a very strict standard of proof as to need for common rather than contract service would require of shippers a legal knowledge which they cannot be presumed and should not be required to have. In view of its past history of competent service, coupled with established transportation need of supporting shipper, applicant has satisfied applicable criteria for issuance of a certificate in lieu of its outstanding permit.—Ferree Moving and Storage Co., Inc., 110 M.C.C. 375 (378-9)*.

Part 4 of the new application forms (op-or-9) for motor carrier certificates, effective May 20, 1966, requires an applicant for irregular-route authority to indicate whether or not it holds authority which can be tacked to the authority it is seeking, and whether it intends to tack or join the proposed authority with any it presently holds for the purpose of providing a through service. Applicant must bear the burden of proving a need for the service it proposes. With the submission of affirmative evidence concerning such need for the service as specified in the application and published in the Federal Register, plus the required showing of fitness and ability to perform the service, applicant may rest. At this point the burden of going forward with the evidence shifts to the protestant which, if it is concerned with the possibility of applicant combining the authority sought with its existing authority, must establish that failure to impose a restriction against tacking of the authority will have a materially adverse effect on its operations.—Ruan Transport Corp. Extension —Ames, Iowa, 110 M.C.C. 389 (391, 392)*.

Burden of proving fitness to conduct proposed service continues upon applicant even though its fitness has been challenged as applicant remains the proponent of an order which requires a finding of fitness to be made.—Spector Freight System, Inc., Extension—Whitley, 111 M.C.C. 889 (892).

Protestant International, holder of heavy-hauler authority, bears burden of proving aggregated commodities, herein specified, are aggregated by reason of their "inherent nature" and their minimum weight per bundle requires use of special equipment thus placing them within the scope of its heavy-hauler authority according to criteria established in 79 MCC 335 and related cases cited herein.—Vant Transfer, Inc., Common Carrier Application, 112 M.C.C. 36 (41-3).

Where applicant is the agent of a household goods carrier holding authority which it seeks to duplicate, its proposed service must be shown to be required in addition to the services of existing authorized carriers including that of its principal. Burden of proof met.—Kriegsman Transfer Co. Extension, 113 M.C.C. 554 (559)*.

The filing of a petition for modification of existing authority is a proper and long-established practice and is a better vehicle for modification than an application and, as previously stated in 73 MCC 345, petitioner still bears the burden of proving that the proposed services are required by the public convenience and necessity.—North American Van Lines, Inc.—Modification, 113 M.C.C. 867 (871).

To warrant authority to transport used household goods, applicant must present evidence of its past good faith operations and indicate support from shippers it has served. Otherwise, applicant must show that proposed operations are required by the public convenience and necessity.—Panda Transport, Inc., Extension—Baltimore, Md., 114 M.C.C. 75 (79)*.

Applicant held not to have met requisite burden of proof, based on failure to supply essential details. Specifically, applicant supplied no identification of the origin points of the involved traffic with any degree of certainty, and offered no showing that protestant was unable to handle adequately the traffic involved, or that protestant's service within the territorial scope of its authority was in any way inadequate. Application denied in part.—Graham Extension—Port Huron, Mich. 117 M.C.C. 412 (416-417)*.

While existing carriers had not met each and every requirement of the traveling public, minor failures are not sufficient to establish a pattern of serious deficiencies in presently available service. A showing of inadequacy in existing service, however, is not a prerequisite to the granting of a certificate of public convenience and necessity.—Western Mass. Bus Lines, Inc., Com. Car. Applic., 118 M.C.C. 74 (83)*.

Since protestants in 103 MCC 699, 715-16, were authorized collectively to perform all of the proposed service, applicant had the responsibility of showing that its entry into the system would not result in needlessly duplicative services or excessive capacity. Applicant in the instant proceeding, however, does not seek to enter an existing area-wide transportation system of general commodity carriers, but rather requests authority to transport specific commodities to points throughout the United States. Also to be distinguished herein are those cases in which the application was denied because the shipper had supported numerous other carriers and was seeking to add yet another. Granted, in part.—National Trailer Convoy, Inc., Ext.—Oregon, Ohio, 118 M.C.C. 437 (441-2)*.

In concluding that there were shown no violations of regulations relating to the extension of credit to shippers by applicant, the Administrative Law Judge erroneously placed on the Bureau of Enforcement the burden of establishing the dates payments were mailed by shippers to whom credit was extended, notwithstanding the Bureau's submission of evidence indicating that payments were recorded by applicant between 28 and 92 days after the freight bills in question were presented to the involved shippers. The burden of going forward with evidence to rebut the unfavorable inference which rises upon such a showing falls upon applicant.—Peoples Express Co. Ext.—Empty Containers, 118 M.C.C. 675 (679).

Alternate route; change; elimination of gateway: After proceeding under various theories of proof including elimination of gateway, alternate route, or extension of a new service route, under which it failed to meet its required burden of proof, applicant, a regular-route motor common carrier operating through interchange points at Detroit and Bay City, Mich., and Toledo, Ohio, on the one hand, and on the other, points in Michigan and other States, was granted authority to establish additional interchange points at Grand Rapids and Lansing, Mich., based upon a showing that its present interchange point at Detroit was heavily congested with traffic, that the proposed operation will result in greater operating economy and efficiency, and that the additional interchange operations will not result in a service competitively different from that which applicant renders at its present interchange points.—Short Freight Lines, Inc., Extension, 113 M.C.C. 316 (321, 322)*.

"Grandfather" clause: [Vol. 13].—Applicant has the burden of establishing the character and scope of the operations upon which it relies in claiming rights under the "grandfather" provisions. Thus, since applicant's witness did not prepare the exhibit offered in support of claimed "grandfather" authority to transport frozen fruits, frozen berries, and frozen vegetables, and conceded that he could not be sure with respect to entries therein of commodities labeled frozen foods what specific commodities were or whether they were in fact fruits, vegetables, or berries, motion to strike from the exhibit those shipments for which the underlying bills showed the commodity as being frozen foods is granted. With respect to frozen food shipments, applicant has not met his burden of proof.—Consolidated Freightways Corp. of Del., 95 M.C.C. 220 (223)*.

Public convenience and necessity: [Vol. 13].—Supporting shipper has the burden of demonstrating that the common carrier services it desires to replace prior contract carrier operations are required by the present or future public convenience and necessity.—Saldutti & Son, Inc., Ext.—Inedible Fish Oils, 118 M.C.C. 58 (66)*.

Substituted freight service: [Vol. 13]. —Applicant failed to sustain its burden of proof, when it relied solely upon its own testimony to establish that it should be authorized to participate in all types of TOFC service; since no public witnesses support the application requisite public convenience and necessity, cannot be found. However, applicant can render service in connection with the C & O's plan II piggyback operations under its existing authority, and this is the type of motor service it would normally be called upon to perform.—Masselink Bros. Trucking Ser. Inc., Ext.—Restrictions, 103 M.C.C. 507 (511).

In proceeding wherein authority for substituted motor-for-rail service is sought and public need for such service is dependent upon showing that proposed service will entail economies, efficiencies, and improvements in existing rail service, alternative standards of proof described in 84 MCC 205 are of primary importance. Protestant's interest and probable capability is so limited that need for proposed service, except as it interferes with protestant's interest is shown by shippers' evidence.—Erie Lackawanna Ry. Co. Ext.—Substituted Service, 110 M.C.C. 823 (826).

22. Evidence.—[Vols. 10-19, 21].—See also Barton Truck Lines, Inc., Eligibility—Utah, at §207(a), n. 25 past operations; Beaney Ext.—Ports of Entry Between U.S. and Canada, at §207(a), n. 25 past operations; Cartwright, Inc., Ext.—Elimination of Circuitry, at §206(b), n. 18; Frozen Food Exp. Extension, at §207(a), n. 25 fitness; Heavy & Specialized Haulers, Inc., Investigation, at §212(a), n. 30; M. R. & R. Trucking Co., Extension, at §207(a), n. 30 commodities; Mid-American Lines—Purchase—Five J Motor Service, at §5(2), n. 115; Midwest Coast Transport, Inc., Ext.—Duluth, Minn., at §207(a), n. 25 fitness; and Southwest Freight Lines Ext.—Removal of Restriction, at §206(a)(1), n. 50.

Evidence is not limited to oral testimony but may also include such matters as pleadings, written stipulations, records and other documents and exhibits; therefore, although no oral testimony was adduced at continued hearing, amendment to the application and telegram withdrawing a protestant's opposition accepted by the hearing examiner constitute "evidence" within the Commission's Rules of Practice and the provisions of APA.—Skinner Motor Exp., Inc., Extension, 96 M.C.C. 135 (140-1).

The record contains no evidence to justify finding that proposed intrastate motor service in common arrangement with a multi-State water carrier is required by public convenience and necessity; no public witnesses, who would make use of the proposed joint service, support the application; and there has apparently been so little demand for such joint service that applicant has never made any attempt to arrange a connection on a two-ticket basis with the water carrier's scheduled arrivals and departures. Therefore, to extent regular-route authority on Long Island, New York, requested, application denied.—Archambault, 99 M.C.C. 535 (538-9).

Motion to strike testimony of three of the four supporting shippers denied, despite failure to submit certifications of support by these shippers with the application. Had applicant intended to rely upon considered testimony at the time of filing the application motion to strike would be well taken. However, as there is no clear indication on this record that applicant did intend to rely upon these additional witnesses at the time application was filed, there is not sufficient basis to strike their testimony, although applicant should have informed the Commission and all parties of record, when apprised that testimony by these witnesses was to be presented at the hearing. In the future such notification shall be required.—Schaeffer and Schaeffer Ext.—New York City, 106 M.C.C. 100 (103-4).

Where the witness does not testify from certain bills purporting to reflect charter trips to and from the area in question although the sight of them in counsel's hand apparently refreshed his recollection and testimony relating to the involved area was thereupon elicited from him, the witness is not required to present these bills for cross-examination inasmuch as they were not considered underlying data for any exhibit presented by protestant and their contents were not used to refresh his memory. Harry Lee Eyre, Jr.—Extension, 106 M.C.C. 851 (855).

Complaints received by the Bureau of Enforcement about applicant's operations need not be furnished to applicant since they did not constitute the basis of the Bureau's investigation, were not prepared by the Bureau's witness and were not the subject of his testimony. Thus, these complaints do not fall within the scope of the rule enunciated in 353 U.S. 657, but rather are confidential material not required to be furnished to applicant. On the other hand, denial of applicant's request for other underlying data cannot be sustained on the basis that this is confidential, but since the only underlying data utilized by the Bureau were the pertinent logs and the "Mississippi State permits" (the latter not considered by the examiner), all of which were available to applicant, no prejudicial error resulted.—Eagle Motor Lines, Inc., Extension, 107 M.C.C. 499 (502).

The Commission cannot presume, in the absence of proof, that a carrier is performing adequate and satisfactory service to points it is authorized to serve when shippers' evidence is to the contrary. While certain protestants assert that they hold adequate authority to provide the service proposed by applicant, they do not affirmatively state a willingness to pick up supporting shippers' l.t.l. shipments; also, if they desire a local carrier to bring such l.t.l. traffic to their terminals, it is necessary that they show the existence and willingness of local carriers to originate the movement to their terminals.—Belford Trucking Co., Inc., Extension, 108 M.C.C. 5 (15)*.

Commission herein construed the so-called Schaeffer criteria (106 MCC 100) with respect to application proceedings handled under the modified procedure. Applicants are hereby required to disclose the identity of all shippers, by certification of support or identification, known to applicant at time of filing or who subsequently become known prior to entry of order assigning application for handling under the modified procedure. Where such applications are handled under modified procedure and are reassigned for an oral hearing, the requirements for disclosure of witnesses will be those heretofore promulgated in the Schaeffer proceeding.—Carl Subler Trucking, Inc., Extension—Canned Goods, 111 M.C.C. 624 (627-28)*.

Commission found that adoption of the so-called Schaeffer criteria requiring applicants to certify and disclose identities of all known supporting witnesses in proceedings in the passenger service field would impose an onerous burden without corresponding benefit as passengers are an ephemeral and ever changing class, not readily capable of specific identification. This conclusion applies only to such witnesses whose identity is discovered subsequent to filing the application.—Carolina Transit Lines, Com. Car. Applic., 111 M.C.C. 630 (634-5)*.

The position of the Department of Defense, appearing in support of an application for operating authority, is the same as any other shipper so appearing and it is not excused from meeting the minimum evidentiary requirements set forth in 103 MCC 555 for application proceedings. Also, because of the large number of applications for authority similar to that at issue herein now pending, the Commission set forth general evidentiary guidelines as to the type of evidence expected to make, as a minimum, a prima facie showing of need for the proposed service in future proceedings of similar magnitude.—Ashworth Transfer, Inc., Ext.—Explosives, 111 M.C.C. 860 (865-68).

Sworn statements of supporting witnesses failing to appear at the hearing were stricken from record but those of witnesses who did appear were accepted. The stricken statements were found unacceptable as they were notarized by an officer of applicant solely on the affirmation of applicant's employee that the signatures of witnesses were genuine, without the presence of the subscriber in violation of Rule 50 of Commission's General Rules of Practice.—Arrow Line, Inc., Ext.—Saratoga Race Track, 112 M.C.C. 116 (118-9).

Gennerally, Commission has been less exacting with respect to the evidence deemed necessary to establish that public convenience and necessity requires operations of a household goods carrier, than in similar cases involving transportation of general freight because the nature of household goods moving business is such that it is exceptionally difficult to obtain testimony of prospective shippers or persons previously inconvenienced by a lack of such service. Although supporting witnesses herein are not themselves persons who need or would use applicant's proposed service, they are, because of their position or station in the affected community (real estate operator, president of local Chamber of Commerce) in a position to reflect the desires and transportation needs of the affected area and the problems and hardships experienced by householders through inadequacies of protestants' services.—Empire Fuel & Transfer Co., Common Carrier Applic., 113 M.C.C. 38 (43-44)*.

Protestants' failure to reply to applicant's petition for reconsideration is an indication of lack of interest in the involved traffic and detracts from the weight that their opposition would normally be accorded. Therefore since protestants have little or no interest in the traffic and will not be affected by the grants of authority requested, application is granted.—Morgan Drive—Away, Inc., Extension, 113 M.C.C. 137 (138, 140)*.

The Novak criteria [103 MCC 555] require that any applicant seeking either motor common or contract carrier authority present testimony that clearly identifies the commodities to be shipped or received, the points to or from which its traffic moves or will move, the volume of freight it would tender to applicant, the transportation service now bieng used, and the deficiencies, if any, in existing service. Since the instant application provides virtually no specific evidence relevant to the shipper's transportation requirements, it must be denied.—Sterling Trucking, Inc., Ext.—Additional States, 118 M.C.C. 374 (377-8)*.

Admissibility: [Vols. 12, 19, 21].—Motion to strike extra-record evidence, i.e., facts stated in applicant's exceptions and reply but not contained in record, granted, even though such facts are insignificant.—W. T. Byrns Motor Exp., Inc., Extension, 96 M.C.C. 765 (767).

Testimony as to the operating authority, willingness and ability of a nonprotestant carrier who had been called as a witness for a bona fide party protestant is admissible. Thus, Johnson, a qualified party to the proceedings, properly can present evidence as to the witness's relevant operating authority; applicants were aware of witness's authority and, in fact, brought forth evidence regarding the supporting shipper's dissatisfaction with such service. Under these circumstances the applicants' rights to proper notice and a fair hearing have not been prejudiced by the admission into evidence of material relevant to the authority, willingness, and ability of the nonparty carrier.—White Bros. Trucking Co. Extension—Dayton, Ohio, 99 M.C.C. 389 (396).

Since Canadian applicant's past unauthorized operations between Canadian points over U.S. highways were basically the result of some misapprehension of applicable law, evidence thereof is admissible. Considered traffic moved under the fixed and persisting intent of shipper from United States origins to Canadian destinations, or vice versa, and, although applicant transported this traffic under no joint or through arrangements with any United States carrier, the traffic is in foreign commerce and subject to Commission regulation. However, since Scott conducted these operations pursuant to advice from counsel and with what it interpreted to be the acquiescence of Commission field staff, rather than in difiance of Commission regulation, evidence of these operations is admissible.—D.S. Scott Transport Ltd. Extension, 100 M.C.C. 1 (6-7).

In order to testify at hearing regarding protestant carrier's operations and its willingness and ability to provide proposed service, it is not necessary that protestant's witness be carrier's full-time employee, but it is necessary that his testimony reflect his personal knowledge acquired in regular course of his business. Consequently, considered testimony correctly stricken from record, since witness failed to demonstrate that his duties as "national accounts representative" made him sufficiently intimate with protestant's operations to enable him to testify as to its willingness and ability to provide proposed service.—Jenkins Truck Line, Inc., Extension, 100 M.C.C. 625 (628-9).

Since applicant's past operations as transporter of used automobiles in driveaway service, utilizing casual or non-professional drivers, were conducted in the belief that such operations were within the exemption of §203(b)(9), they were conducted under color of right and are entitled to consideration as evidence of public need; and since applicant and three other corporations, whose activities are no different, are solely owned by Irving Zola, who intends to merge all these corporations under applicant's name, combined corporate operations are entitled to consideration. Also public support of 27 individual and corporate witnesses for applicant's continued service is impressive in view of difficulty of obtaining witnesses in this type of proceeding. Granted.—AAA Con Drivers Exchange, 102 M.C.C. 393 (396-401).

Certain exhibits listing tonnages shipped to destination states involved herein from 1961 to 1965 presented by supporting shipper's superintendant of transportation were improperly admitted into evidence since they were prepared specially for introduction in these proceedings and are not records kept in the ordinary course of business. No underlying documents were made available in support of the exhibits and timely objection was made to their admission.—Consolidated Forwarding Co., Inc., Extension, 107 M.C.C. 11 (18-19).

Testimony of shipper witness' traffic manager pertaining to that shipper's 1965 volume of traffic and obtained from shipper's western sales manager was improperly admitted; the witness' testimony is based on information not within his personal knowledge nor was it obtained by him in the regular course of business.—Id., p. 19.

As shipper support had been withdrawn and was not reinstated, no representative of the shipping public appeared and presented support for this application. The hearing examiner, over the objections of the protestants, took official notice of and admitted into evidence a copy of the transcript of record of a prior proceeding, and granted the application based solely upon the shipper's testimony in that transcript. The prior proceeding embraced eight applications which were supported by the same shipper which had withdrawn its support of this applicant and two others. Official notice may be taken of other Commission's proceedings and the findings therein, but no consideration may be given to the evidence contained in the records in those proceedings. Therefor, it was error on the part of the examiner to give official notice to the evidence contained in the transcript of the prior record.—Coastal Tank Lines, Inc., Extension—Neal, West Virginia 108 M.C.C. 190 (193, 194).

The examiner's reception of the transcript of the prior proceedings without according protestants the opportunity to cross-examine the shipper with respect to applicant's proposed service, in contravention of rule 75 of the General Rules of Practice, clearly violates the substantial rights of the protestants. The transcript of the record in the prior proceedings should not have been received as evidence in this case. The Commission has uniformly required that applications for new motor carrier operating authority be supported by competent shipper testimony. Only the most compelling considerations of equity would justify departure from this standard. Since there is no overriding considerations of fairness present in this case, application is denied.—Id., p. 194, 195.

The examiner's ruling to strike evidence of a nonprotestant carrier was sustained by the review board. On reconsideration the evidence of the nonprotestant carrier was admitted into evidence. The examiner's decision and order was based upon the decision in 105 MCC 111. On reconsideration in 107 MCC 419, the entire Commission concluded that as of the date of that decision protestants may properly introduce evidence as to the operating authority, willingness and ability of nonparty carriers to perform the service for which an applicant seeks authority. Therefore, in proceedings where the applications were published in the Federal Register prior to that report evidence concerning the operating authority, willingness and ability of nonparty carriers would be admitted. However, those applications published subsequent to that report would be bound by §1.247(d)(8) of the Special Rules of Practice promulgated concurrently with 107 MCC 419, which prohibit a protestant from introducing evidence of a nonprotestant carrier into evidence.—Bilyeu Refrigerated Transp. Corp. Ext.—Baltimore, 108 M.C.C. 238 (239, 240)*.

Applicant sought leave to present the support of an additional public witness by a late filed petition which embraced a verified statement of that supporting shipper and a certificate of support executed by an officer of that company; no reply was filed to the petition. In the petition applicant indicates that the additional shipper recently indicated a desire to support the application for the first time and, therefore, it appears to have filed the certificate of support as soon as practicable after discovery of the witness; on the other hand, applicant failed to meet the requirement that a late filed certification shall contain a statement by the witness as to the date on which he first made his support known to the applicant. Inasmuch as there is no opposition to the petition and no party would be prejudiced by consideration of the shipper evidence, the verified statement of the additional shipper is received in evidence; however, in future requests to submit additional evidence, applicants will have the burden of showing good cause to justify receipt thereof.—Jerry Lipps, Inc. Extension, 110 M.C.C. 113 (115, 120).

Examiner permitted applicant's vice president, who is not an attorney, to present applicant's case. On exceptions, applicant contends that it was incumbent upon examiner to relax procedural rules in applicant's favor; that application of ordinary standards of admissibility of evidence constitutes lack of due process; and that examiner was bound to resolve procedural doubts in applicant's favor. There is no merit to applicant's contention that examiner was obligated to give it preferential treatment. At the beginning of the hearing, the examiner announced that the Commission's rules would not be strictly applied since applicant was without counsel. Moreover, the examiner offered to continue the hearing to a later date to allow applicant to obtain counsel but applicant declined. Consequently, no basis has been shown for a finding that applicant has been denied due process of law.—Sanders World Travel, Inc., Broker Application, 110 M.C.C. 246 (247-8).

Commission finds no error in joint board's failure to consider the testimony of applicant's witness. The rules laid down in 106 MCC 100, requiring that additional certification for witnesses discovered by applicant subsequent to the filing of its application, were published in the Federal Register on December 20, 1967, and neither at the continued hearing nor in its petition has applicant presented any good cause for its failure to comply with this requirement.—Turner Expediting Service Extension—Montgomery County, Ky., 110 M.C.C. 342 (345)*.

Commission found that evidence adduced in two application proceedings for authority similar to that sought herein to be admissible as administrative agencies are not confined to the specific record in administrative proceedings. Fact that a determining body has looked beyond record proper does not invalidate its action unless substantial prejudice is shown to result. As three applications considered herein were heard on a consolidated record, no showing of prejudice has been made.—Braswell Motor Freight Lines, Inc., Extension, 112 M.C.C. 558 (567-8)*.

In denying motions by both parties to strike certain statements of specified witnesses, Commission noted that as a Federal administrative agency it is not bound by technical rules for the exclusion of evidence which are applicable in jury trials at law. Generally, Commission favors a more lenient policy respecting admissibility of evidence, including hearsay testimony, than pertains in jury trials.—Commerical Motor Frt., Inc., Ext.—Crawfordsville, Ind., 114 M.C.C. 500 (516-19)*.

Most of the witnesses who supported application for authority to transport used automobiles between Hawaii and the mainland did not themselves propose to use applicant's service. In a situation such as this in which the need for service by individual customers is sporadic and nonrecurring, this type of evidence is appropriate.—American International Driveaway Ext.—Hawaii, 117 M.C.C. 63 (67).

Almost half of supporting shipper's statements were submitted by Mexicans, in the Spanish language, and applicant offered no translation or even any summary or digest of the contents of many of the statements. Due process of law does not permit the Commission unilaterally to interpret such statements in the first instance without the benefit of party-sponsored interpretations, nor is it incumbent upon the Commission to provide interpreting services for the parties. In the circumstances, the entire testimony made solely in the Spanish language was given no weight in the determinations. —Transportes Azteca Extension—Eastern States, 117 M.C.C. 645 (649).

Protestants at the joint-board hearing objected to the questioning of applicant's public witnesses as to delays in existing service that such delays were not mentioned in the written statements and the objection was overruled by the joint board. In his decision the Administrative Law Judge considered all the evidence of record as admitted by the board but stated that he would have sustained the objection since the Special Rules of Procedure restricts the oral testimony of supporting shippers to the correction of errors, to the supplying of inadvertent omissions, to matters not specifically listed, and to cross-examination. However, the Administrative Law Judge was in error that this evidence as to delays in service should have been stricken. The joint board could have recessed the hearing and allowed the shipper witnesses to correct any deficiencies in their statements that were alleged by protestants.

Trans West. Exp., Inc., Ext.—Seattle—Portland, 118 M.C.C. 1 (5, 6).

Conversion of authority: [Vols. 11-13, 15, 18, 19, 21].—In suit to vacate Commission report and order converting outstanding permit of defendant carrier (applicant) into a certificate, plaintiff erroneously contends that, since supporting contract shipper's testimony did not show a need for common- rather than contract-carrier service, applicant failed to meet the evidence requirements for a conversion set forth in 95 MCC 312. Shipper testimony of need for requested conversion was before the Commission in considered case; further, plaintiff's position that shipper's statement that it did not care whether it had common or contract service, as long as its needs were satisfied, disposed of the issue of public need for common carriage is unsupportable in the law; the Commission recognized that a shipper's private feelings are fallible and stated that no shipper can be counted on or required to make such a distinction; in such circumstances, it properly considered the total effect of shipper testimony in granting the application.—Perkins Furniture Transport, Inc. v. United States, 333 F. Supp. 879 (884-5)*.

Because of the backlog of irregular- to regular-route conversion cases built up during pendency of Ex Parte MC-55 proceeding, special procedural rules, 49 CFR 2a, were promulgated to simplify and expedite the processing of conversion applications. They apply only to applications filed prior to March 1, 1965, and are not to be utilized to obtain regular-route authority in addition to, rather than in lieu of, corresponding irregular-route authority and do not contemplate the unwarranted broadening of a carrier's existing authority, either as to commodities or as to territory. These special rules do not alter the basic criteria of the Brady case, but, in fact, refer to it, particularily in the Declaration of Policy, which holds the applicant carriers only to such burden of proof as is consistent with a realistic approch to the objectives (set out in the Brady case) sought to be achieved.—Midwest Motor Exp., Inc., Ext.—Intermediate Points, 96 M.C.C. 402 (404, 406-7).

Cross-examination: [Vols. 11-13, 15, 19, 21].—See also Coastal Tank Lines, Inc., Ext.—W. Va. case, §206(b), n. 22 *Admissibility*.

Evidence adduced at the first hearing, to which protestant was not a party, cannot be used against protestant until it has had an opportunity to cross examine, and no decision on the merits should be made until protestant has exercised its right. Protestant did not file opposition to the application as originally published in the Federal Register because the restriction contained therein satisfied its interest. However, after a grant of authority, which differed substantially from that initially sought, was republished in the Federal Register, protestant requested oral hearing at which applicant produced no witnesses and adduced no evidence, relying solely on the evidence presented at the first hearing. The application is set for further hearing wherein the applicant should be prepared to present for cross-examination the person or persons upon whose testimony it relies.—Southern Tank Lines, Inc.—Extension—Chattanooga, 107 M.C.C. 64 (66).

Disclosure and discovery: Asserting that the charges against it were not sufficiently definite or specific to enable it to prepare a proper defense, and that if proven in a proper forum the violations could lead to imposition of criminal penalties, respondent requested that it be allowed to utilize various discovery procedures of the Federal Rules of Civil Procedure in any hearing it is required to attend. The petition was denied, because rules 56-57 and 102 of the Commission's General Rules of Practice (49 CFR 1100.56-57, 102) provide a comprehensive source of obtaining discovery. There is no reason for establishing whole sets of new and different rules for different proceedings, unless it is established that the existing rules are ineffective or otherwise insufficient to enable respondents to prepare adequate defenses. Should the present rules prove inadequate, a petition under rule 102 for extraordinary relief would be available.—Eagle Motor Lines, Inc., Invest. & Revoca. of Certif., 117 M.C.C. 72 (76-7).

Exhibits, abstracts: [Vols. 11-13, 19, 21].—Though protestants urge that applicant's traffic exhibits should be disregarded because of its refusal to permit inspection of the underlying documents, the record discloses no reason for questioning applicant's assertion that those documents were available for protestants' inspection, and the questioned exhibits are therefore evaluated on their merits.—D & M Taxi Co., Inc., Common Carrier Application, 96 M.C.C. 439 (441, 442).

Filing after hearing: [Vols. 19, 21].—Advertising material and related correspondence attached to protestant's exceptions constitute evidentiary matter which goes beyond argument and does nothing to refute the fact that protestant's counsel and stockholder, when called as applicant's witness, was evasive in answering all questions which might shed light on whether protestant placed the words "Fort Dix" in its advertising matter only after applicant filed for authority to serve Fort Dix in special and charter operations. As protestant has given no sufficient reasons for initial submission of evidence at such advanced stage of the proceeding, the attachments to its exceptions are stricken.—D & M Taxi Co., Inc., Common Carrier Application, 96 M.C.C. 439 (440).

New and extension operation: [Vols. 12, 19, 21].—Supporting shipper's failure to supply specific probative data in support of application resulted in denial of unopposed portion.—Mid-western Express, Inc., Extension—Bossier City, La., 117 M.C.C. 886 (891-892)*.

That applicant was faulted for failure to adduce evidence with respect to the services of a carrier not a party to the proceeding was a departure from the general rule that an applicant ordinarily is not required to introduce evidence detailing the ability or inability of nonprotesting carriers to handle the involved traffic [81 MCC 778]. In the circumstances, applicant had no duty to prove that the service of a carrier which indicated no interest in providing the proposed service could not meet the shipper's needs. Moreover, a number of factors have combined to increase substantially shipper's production, and where there is evidence that a large volume of traffic will be moving, the services of more that one carrier may be authorized to insure adequate service.—National Trailer Convoy, Inc., Ext.—Oregon, Ohio, 118 M.C.C. 437 (441-2)*.

The testimony adduced in support of applicant's request is couched, as was the shipper evidence described in 111 MCC 652, largely in terms of speculative generalities. As a rule, such testimony is insufficient to warrant a grant of motor carrier operating rights, and our reading of 111 MCC 652 convinces us that the same principle must be applied in disposing of requests by heavy haulers for so-called complete service authority. Moreover, applicant's size and weight traffic covers almost every article whose dimensions necessitate special handling, and thus could encompass products shipped by virtually any member of the industrial community; and an application of the "field of service" doctrine (warranting the expansion of existing commodity authorities for the purpose of enabling applicants serving specific industries to transport all of the items produced by their customary shippers), to the facts in this proceeding would approach the certification on the basis of comparatively relaxed evidentiary standards of a wholly new irregular route general commodity operation. Denied.—Eagle Motor Line, Inc., Ext.—Machinery, Tools, 118 M.C.C. 604 (614-16).

Record in other proceedings: [Vols. 19. 21].—See Ayers Extension case, §206(b), n. 23.

Self-serving, indefinite, unsupported statements: [Vols. 11, 12, 19, 21].—Applicant's failure to substantiate its claim of increased economy and needed improvements to be derived from proposed modification of authority resulted in denial of application. See also §207(a), n. 25 *economy and efficiency*.—Salem Transp. Co., Inc. Ext.—Additional Passengers, 117 M.C.C. 405 (409)*.

Weight of evidence: [Vols. 12, 13, 19, 21].—See also Fischbach Trucking Co.—Control and Merger—Peck case, §5(2), n. 115.

With regard to the question of weight to be accorded certain evidence and the qualifications of several supporting witnesses, in proceeding on application for authority to transport passengers and their baggage between Wareham, Mass., and New York, N.Y., (1) authentic resolutions by civic or fraternal groups, while properly admitted in evidence, generally are afforded little probative value; (2) testimony of institutional wit-

nesses, shown qualified to speak in behalf of potential travelers at schools they represent, should be given appropriate weight as support for the need of proposed service; and (3) testimony of Chief of Staff at Newport, R.I., Naval Base is clearly appropriate for purpose of helping to determine probable volume of traffic between points involved. Also, while individual witnesses who volunteered their support might not qualify as experts on bus transportation, they are reasonably well acquainted with available services and schedules of opposing carriers; therefore, in evaluating the evidence, their testimony is given appropriate probative weight.—Almeida Bus Lines, Inc., Extension—New York City, 106 M.C.C. 311 (323-4)*.

Applicant's exhibits have been given probative weight only to the extent that the review has indicated transportation of a shipment to an obvious noncontractor, since it was incumbent upon applicant to show that certain consignees who cannot be classified as noncontractors on the basis of identification available on the record were not, in fact, engaged in the functions of a contractor. However, applicant's method of proof (naming consignees other than contractors or shipments where the intended use of the commodity transported was not known) is sufficiently informative to support its contention that it participated in transportation of commodities for noncontractors under color of right, since it is consistent with the language of the Commission in the report which directed the reopening of this proceeding.—Mayfield Sons Trucking Co.—Removal of Restriction, 106 M.C.C. 892 (895, 896)*.

On reconsideration, applicant's traffic study in support of its alternate route application was improperly accorded little probative weight based on the fact that the underlying dispatch records from which the data was taken were not produced for inspection at the hearing. The probative value of evidence depends upon the facts and circumstances of each case, including, but not limited to, such factors as the nature of the proceedings and the purpose for which the evidence is introduced, the qualifications, knowledge, candor and demeanor of the witness introducing the evidence, and the nature of the objections raised by the opposing parties. In the instant proceeding traffic evidence of a general nature is all that is needed to show applicant to be an effective competitor engaged in transporting substantial volume of traffic over an underlying service route or routes between the points involved.—Michigan Express, Inc., Extension, 108 M.C.C. 245 (251).

The Commission has consistently held that evidence of past operations is to be considered as conclusive proof of public need for the proposed service—but only to the extent actually demonstrated by such operations (see 106 MCC 741, 106 MCC 234 cited herein).—Federal Transfer Co., Inc., Extension—Seattle, Wash., 111 M.C.C. 559 (563-4)*.

Verified statements filed in opposition to the application for household goods authority sought herein were generally fill-in-the-blank type prepared forms usually filed by protestants in opposition to *King-pak*-type applications and so detract from the weight to be afforded them.—Empire Fuel & Transfer Co., Common Carrier Applic., 113 M.C.C. 38 (44)*.

In evaluating common carrier proposal, operations conducted by applicant under erroneous, but bona fide, interpretation of either its existing authority or applicable statutory law are entitled to appropriate weight. See 106 MCC 892. Such past activities are not alone conclusive proof of public need for a proposed service but may be considered, conjunctively with other evidence to determine whether, or to what degree, the application should be granted. Applicant herein sought advice as to the legality of its operation and was reassured of their legality by unofficial views expressed by representatives of this Commission, which views were cited by Division 1 in support of its decision in a complaint case against applicant (subsequently reversed). Thus, applicant's past operations were conducted in good faith under a color of right.—Byers Transp. Co., Inc., Ext.—Restriction Removal, 113 M.C.C. 50 (55-56).

The Commission cannot base a grant of authority on evidence which is vague and couched in general terms leaving the Commission to hypothesize as to the volume of traffic to be tendered applicant or what, if

any, deficiency there is in existing service. —Jenkins Truck Line, Inc., Extension—Gentry, 117 M.C.C. 725 (728).

The evidence in support of the instant application was found to be vague and lacking in specificity and probative force. It failed to indicate that existing service is inadequate or that the proposed service is required. Instead, it would appear that shipper already has available the services of an ample number of motor carriers to handle the involved traffic and should fully utilize the services of these carriers before supporting a new carrier for additional authority.—Onley Refrigerated Transp., Inc., Ext.—Conn., 118 M.C.C. 127 (133)*.

Motor common carriers have obligations to the general public which from time to time create conflicting demands upon their equipment, and they cannot reasonably be expected to respond immediately to each and every shipper request for service. Consequently, instances of "turndowns" on the part of existing carriers mean little in the absence of a complete explanation of the facts surrounding such an event which would tend to establish a pattern of disinterest or wrongful refusal to provide service. Since such evidence was found lacking in this proceeding and since the alleged "turndowns" generally were the result of morning calls requesting service within a few hours, afternoon calls requesting service early the following morning, or calls generally requesting service in less than 24 hours, it was held that no justification for additional service was apparent.—West Nebraska Express, Inc., Ext.—Five States, 118 M.C.C. 423 (429)*.

Protestant's failure to reply to applicant's petition for reconsideration is an indication of a lack of continuing interest on its part in the involved traffic and detracts from the weight to which its opposition would normally be accorded. Application granted in part.—Coast Freightways, Inc., Ext.—Swift Meats, 118 M.C.C. 739 (744)*.

23. Official notice; res judicata; stare decisis.—[Vols. 19, 21].—In exceptions to examiners report, protestants pointed out that they had pending various applications of their own, which if granted would duplicate authority requested by applicant in present proceeding. Division 1, in the report herein, noted that the protestants' applications had, since the filing of exceptions, been granted, and, as these newly granted authorities duplicated substantially the authority requested by applicant in this proceeding, denied the application.—Willis Shaw Frozen Exp., Inc., Extension—Springdale, Ark., 96 M.C.C. 560 (564).

Applicant, seeking authority to transport coal, as well as pig iron and fertilizer, at the time of hearing was owned and controlled by two companies that were both producers and shippers of coal. Between 35 and 40 percent of applicant's total revenue was derived from transporting coal for these two companies. In protestant's reply to applicant's exceptions to examiner's report, applicant's relationship with its principal supporting shippers was pointed out. However, by footnote in the report of Division 1, official notice was taken of applicant's annual report which disclosed that the ownership and control of the two shipping companies had been terminated and the issue was declared moot, not to be discussed further. —Tajon Trucking Co. Extension—Specified Commodities, 96 M.C.C. 591 (note, 593).

The Commission may take official notice of its own decisions, and it would surely be remiss in its duty if it were to ignore the concurrent finding in investigation proceeding, heard on consolidated record with extension application, that applicant has been in willful violation of the Act and the Commission's regulations.—S & C Transport Co., Inc., Investigation and Revocation, 96 M.C.C. 642 (646).

In light of rules 1.2, 1.75, and 1.82 of the Rules of Practice, the examiner properly took notice of part of transcript of hearings in the pending *Ward* proceedings, MC-113624 (Sub-No. 17), and of the authority sought therein, because those pending applications were for authority similar to that sought here, but by other carriers. However, the examiner's independent incorporation of portions of the transcript of that hearing into his report is erroneous.—Ayers Extension—Cheyenne, Wyo., 99 M.C.C. 795 (797).

In carrying out the national transportation policy, Commission may take official notice of its actions in other proceedings bearing materially upon the issues under immediate consideration. Accordingly, Commission noted that authority to serve a portion of the area involved herein was recently granted to another carrier, not a party to this proceeding, and authority granted herein is restricted against serving that area covered in such other certificates.—West Brothers, Inc., Extension—Baton Rouge, La., 108 M.C.C. 485 (489)*.

25. Hearing, generally.—[Vols. 12-19, 21].—See also Kingpak, Inc., Investigation of Operations case, §206(b), n. 15; Red Line Transfer & Storage, Inc., Extension case, §17(6), n. 15; White Bros. Trucking Co. Extension—Dayton, Ohio, case §206(b), n. 22 *Admissibility.*

In suit to set aside order granting operating authority, the Commission did not deny fundamental fairness to plaintiffs (protestants) by handling the application under modified procedure, which provides for submitting evidence and arguments in writing, and denying plaintiff's request for oral hearing. The right to a hearing includes the right to present evidence and a reasonable opportunity to know opposing party's claims and to meet them; implicit therein is the right of "confrontation and cross-examination" in furtherance of fundamental fairness; however, although in adjudicative proceedings cross-examination and confrontation are conducive of trustworthiness in the face of factual dispute, there is no right thereto unless material facts are in dispute. Examinatin of record in instant case reveals no material difference on critical facts; thus, effect of plaintiffs' request for cross-examination is to attack the weight of undisputed facts not credibility of the affiants. Due process does not require that weight of the evidence be argued orally. —National Trailer Convoy, Inc. v. United States, 293 F. Supp. 634 (636)*.

Plaintiffs (protestants in Commission proceeding) were denied procedural due process when, after application for authority to transport certain meats, foods, and diary products, restricted to multiple pickup service in origin area and multiple delivery in destination States, as filed (including proposed restrictions) was published in the Federal Register and hearing was held thereon by an examiner, Review Board No. 3 deleted proposed restrictions because of administrative undesirability and substituted a "mixed load" restriction in lieu thereof without any further notice or hearing. At some point in the proceeding, initially or on petition to reopen, plaintiffs were entitled to a hearing and an opportunity to show, if they could, the claimed gravity of the substitution. The order and certificate as actually granted should be republished in the Federal Register, with plaintiffs given an opportunity to offer evidence and to be heard on the substitution question; case remanded for further Commission consideration.—Refrigerated Transport Co., Inc. v. United States, 297 F. Supp. 5 (6-7, 9)*.

In suit to set aside Commission order in consolidated proceeding, which denied plaintiff's application for certificate, there is no merit in plaintiff's allegation that the Commission failed to relate its findings and conclusions to the evidence since, where grounds for agency's action can be clearly perceived, such a point-by-point annotation is not legally required. The Commission summarized authority sought in each of the 32 applications, noted tonnage handled by those applicants holding temporary authority, summarized shipper support for the various applicants, described services being provided by existing carriers, and then found that evidence of record did not justify granting authority for proposed additional services; its report contains all the essential findings required, and the Commission is not compelled to note the evidence supporting each finding. Therefore, since interests of all parties were adequately represented at a full and fair hearing, and substantial evidence supports the Commission's action, order denying plaintiff's application is sustained.—Mississippi East, Inc. v. United States, 301 F. Supp. 1332 (1335-8)*; Yourga Trucking, Inc. v. United States, 308 F. Supp. 625 (628)*.

Commission denial, in application proceeding handled under its modified procedure, of protestants' (plaintiffs) motions for oral hearing and right to cross examine applicant's witnesses, especially on economic feasibility of latter's operating under an interline restriction, affords no basis to set aside order granting unrestricted general

commodity authority. Applicant's evidentiary affidavits showed need for its proposed service; but protestants made no showing adverse to the evidence on issue of economic feasibility, nor did they use discovery procedures available under modified procedure which might have obviated their alleged need for oral hearing and cross examination. Viable and useful modified procedure depends on the general principle that a party cannot simply fail to dispute the veracity of sworn statements and then succeed in a demand of the right to cross examine. In view of protestants' inability to show from their own records an adverse diversion of material traffic, and their failure to attempt the use of discovery procedures, the Commission's conclusion does not violate any concept of fundamental fairness or due process.—Ashworth Transfer, Inc. v. United States, 315 F. Supp. 199 (202-3)*.

The Commission's decision not to reopen considered proceeding, wherein intervening carrier's application was granted without a proposed restrictive amendment, did not constitute denial of due process to plaintiff (protestant) who had withdrawn from the proceeding in reliance on that restrictive amendment. The opinion in 106 MCC 1 and warning in the Federal Register—that restrictions not acceptable to the Commission would be eliminated—were sufficient to put plaintiff on notice that amendments must be acceptable to the Commission and that anyone who withdraws relying on a proposed amendment does so at his own peril. Moreover, an application proceeding is not like a lawsuit where the court normally accepts stipulations and restrictions agreed to by the parties and does not superimpose third-party interests on the litigants. The Commission is required to represent the public, a third party, when it grants or denies certificates and, in that capacity, it cannot defer to the parties and permit them to define the metes and bounds of the controversy.—Frozen Food Exp., Inc. v. United States, 328 F. Supp. 666 (669-70)*.

In action to set aside Commission order granting the authority sought in defendant carrier's application which, under Rule 247(e)(3) of the Rules of Practice, was handled by modified procedure without oral hearing, plaintiff (protestant) was not denied its right to cross examine adverse witnesses under such procedure. Due process of law does not require that an oral hearing be held in all administrative agency cases [citing 303 F. Supp. 742]. Administrative decisions based solely on written presentations are within the limits of procedural due process where proper safeguards exist; and there are proper safeguards for procedural due process under Commission modified procedure, which affords all parties an ample opportunity to present their evidence, including rebuttal, in affidavit form and provides a specific method (Rule 53) for obtaining cross-examination or oral hearing where material facts are in dispute.—Howard Hall Co. v. United States. 332 F. Supp. 1076 (1079-80)*.

Therefore, since no material facts were in dispute in the application proceeding and a specific request for cross-examination or oral hearing was never made therein, plaintiff had no absolute right to an oral hearing, especially when it made no attempt to utilize the Commission's discovery procedures. Under the circumstances, plaintiff should not be allowed to defeat an adverse ruling by requesting an oral hearing for the first time after a decision approving the application had been entered; order sustained. —Id., pp. 1080, 1082.

One applicant's petition requesting that its application be considered separately from other proceedings embraced in consolidated proceeding and that examiner's recommended order, granting it authority to transport canned carbonated beverages from N.Y. point to designated points in 6 destination states, to which no exceptions were taken but which was stayed by the Commission, be affirmed, is denied. The two other applicants seek to provide essentially the same service and thus it is appropriate to consider all applications together.—Stevens Truck Lines, Inc., Extension—New England, 95 M.C.C. 63 (64).

Petition of rail protestants for further hearing in extension proceeding, to introduce certain evidence adduced in applicant's interim "grandfather" proceeding, denied. Since the two proceedings deal with related issues, they are disposed of in a single report; such consolidation of the proceedings has the same effect as the further hearing sought by the rail carriers.—Midwest Emery

Freight System, Inc., Interim Application, 95 M.C.C. 642 (642, 644-5).

Upon a thorough review of the record, including the transcript of the hearing, applicant's accusation that the examiner's attitude throughout the proceeding was "one of suspicion" is unfounded. While the examiner was forced on a number of occasions, particularly during the lengthy testimony of applicant's principal witness, to clarify certain points by examining the witness, such examination was well within his province as an examiner and certainly warranted in the circumstances; furthermore, applicant's claim that the examiner disregarded the testimony of its principal witness is completely without merit.—Schenck Tours, Inc., Extension—Nassau, 96 M.C.C. 66 (75)*.

Although evidence relevant to operations of two rail carriers was presented by other rail protestants, those carriers had not entered an appearance in accordance with the Rules of Practice, and applicant's motion to strike their exceptions was granted. On the other hand, its motion to strike was denied as to two motor carriers who had made timely appearances under the rules then in effect, even though a subsequent change therein would have required them to have done more. Subsequent modification of the Commission's Rules of Practice does not affect the status of parties to a proceeding which commenced prior thereto.—Transport, Inc., Extension—Ex-Rail Cement, 96 M.C.C. 671 (674).

When normal oral-hearing procedure would be costly and time-consuming to all the parties, in view of the broad commodity and territorial scope of the application and the large number of parties, special procedure was promulgated with a view of further processing the application in the most convenient, economical, and expeditious manner possible consistent with due process. Consequently, applicant was directed to file (1) complete written prepared testimony of all persons intending to present supporting evidence and (2) any restrictive amendments, consistent with supporting evidence, which could be submitted for purpose of reducing the issues. Special procedure in such cases can be a useful tool in cutting costs and in reducing the regulatory backlog since, after viewing applicant's verified statements, the Commission can determine the most effective way of processing the case and, if a hearing is necessary, a more accurate estimate can be made of the time required therefor.—Jerry Lipps, Inc., Extension—Pipe, 110 M.C.C. 113 (114, 120).

However, it is incumbent on applicant to prove a prima facie case in its verified statements before the Commission would be justified in setting a case like the instant one or oral hearing. Therefore, the requested oral hearing would serve no useful purpose and would entail considerable expense to all the parties and the Commission; moreover, since applicant failed to establish a prima facie case through verified statements which were required to set forth all its direct evidence, the application would still have to be denied; petition for oral hearing denied.—Id., pp. 119-120.

The joint board's action in refusing protestant's counsel the opportunity to cross-examine applicant's witness as to certain vehicle defects set forth in protestant's offer of proof was not prejudicial. The defects were not alleged to have resulted in any injury or accident or to have been left uncorrected. The offer of proof is clearly insufficient to proclude a finding of fitness.—Tri-State Coach Lines, Com. Car. Applic., 110 M.C.C. 601 (604).

36. Laches.—[Vols. 13, 17, 21].—In suit seeking judicial review of Commission order (entered two years earlier) granting certificate to intervenor, the right of plaintiffs (protestants) to relief is not barred by laches. There is no applicable statute of limitations; and mere running of time does not invoke the doctrine of laches, since it is an equitable doctrine addressed to discretion of the trial court in which each case must be determined according to its own particular facts. The crucial consideration is whether assertion of plaintiffs' cause, through lapse of time, would do defendants an injustice. Under the facts of instant case, no such injustice would ensue; rather, it would be inequitable to bar plaintiffs' suit for a two-year delay under the particular circumstances. Moreover, plaintiffs have been denied procedural due process, and the court does not look with favor on a loss of constitutional rights by laches.—Refrigerated Transport Co., Inc. v. United States, 297 F. Supp. 5 (7, note, 8)*.

Regulations of the Commission

34 FR 18122, Nov. 11, 1969, Part 1003: List of Forms, §1003.1(a) Application forms, certain prescribed motor carrier and broker forms amended, and Forms OP-TA-19 and OP-TA-19(a) added, effective upon publication in the Federal Register.

36 FR 4984, March 16, 1971, Part 1003: List of Forms, §1003.1(a) Application forms, amended by adding Form OP-OR-10, Application for Postal Motor Carrier Certificate, effective on date of order.

36 FR 5911, March 31, 1971, Part 1003: List of Forms, §1003.1(a), Form OP-OR-10 (36 FR 4984) prescribed for use by persons who were contractors under a star route, mail messenger, or contract motor vehicle service contract on effective date of the Postal Reorganization Act (P.L. 91-375), effective on date of order.

36 FR 21596, Nov. 11, 1971, Part 1062: Special Regulations for For-Hire Motor Carriers Engaged in the Transportation for Recycling or Reuse of "Waste" Products in Furtherance of Recognized Pollution Control Programs, new Part 1062 setting forth special procedures, added, effective Dec. 15, 1971.

37 FR 14307, July 19, 1972, Part 1003: List of Forms, §1003.1 Motor Carrier and Broker Forms, OP-OR-9 revised, effective Aug. 21, 1972.

37 FR 24355, Nov. 16, 1972, Part 1003: Lists of Forms, §1003.1 Motor Carrier and Broker Forms, amended by deleting Form B.M.C. 79 and substituting therefor Form BOp-79, effective on date of order.

Section 207. [§*307(a) U.S.C.*] Issuance of certificate.—(a) Issuance authorized to qualified applicants for regular routes and between fixed termini.—[Unchanged. See vol. 10, p. 7988.]

Historical Note, see vol. 16, p. 12842, vol. 18, p. 14365, vol. 19, p. 15609, vol. 21, p. 17250.

Notes of Decisions

Volume 10—p. 7988; Volume 11—p. 9432; Volume 12—p. 10390; Volume 13—p. 11071; Volume 14—p. 11589; Volume 15—p. 12195; Volume 16—p. 12842; Volume 17—p. 13537; Volume 18—p. 14365; Volume 19—p. 15609; Volume 21—p. 17251.

5. Construction and interpretation.—[Vols. 10-19, 21].—In action to set aside Commission order granting a certificate to defendant carrier, plaintiffs' claims as to priorities and rights of the competing carriers, and their concepts of "justice" *among the carriers*, are strictly secondary to the legal standards set out by Congress—*public* convenience and necessity. The Commission very correctly addressed itself to the needs of the public and its conclusion, that the public needs the extra hauling capacity in the areas embraced in the certificate, is not only supported by the record but most obvious thereon; sustained.—Carolina Freight Carriers Corp. v. United States, 297 F. Supp. 848 (852)*.

While "public convenience and necessity" has not been defined by the statute, that phrase should be interpreted in the light of prior judicial and administrative interpretation to secure for the nation the broad aims of the Act.—Feature Film Service, Inc. v. United States, 349 F. Supp. 191 (201)*.

There is no express statutory prohibition against certification of an air carrier as a motor common carrier, and no special rule should apply to an air freight forwarder, since the Commission recognizes that the Federal Aviation Act classifies air forwarders as air carriers. As a need for the service has been established by shipper and consignee testimony, and since the record fails to support protestant's argument that a grant of authority would enable the applicant to discriminate and gain a competitive advantage over competing certificated air carriers in applicant's motor carrier operations, public convenience and necessity require issuance of a certificate, restricted to traffic having an immediately prior or subsequent movement by air.—Direct Air Freight Corp.—Common Carrier Application, 106 M.C.C. 785 (789-91).

6. Restriction of operation.—[Vols. 10-19, 21].—See also AADA Systems, Inc. case, §207(a), n. 25 *Truckaway;* Ashworth Transfer, Inc., Ext.—15,000 lb. Articles case, §207(a), n. 7 *Existing motor carriers;* Ashworth Transfer, Inc. v. United States case, §207(a), n. 25; Atlas Van Lines, Inc., Extension case, §207(a), n. 28 *Elimination;* Burham Van Service, Inc., Extension

United States, §207(a), n. 25; Home Transp. Co., Inc.—Purchase—Fuchshuber case, §5(2), n. 110 *Restrictions;* Mutrie Motor Transportation, Inc., Ext.—Ex.-Rail case, §3(4), n. 39; R.A. Gould, Inc., Extension case, §207(a), n. 25 *Interchange;* Ray Carter, Inc., Extension case, §212(a), n. 30; Sammons Trucking Extension—Fort Dodge, Iowa case, §206(b), n. 16 *Narrowing;* Wilson Trucking Corp.—Purchase—Compton Lines, Inc. case, §5(2), n. 110 *Restrictions.*

In action to set aside Commission order granting defendant carrier (applicant) authority to operate between Mobile, Ala., and Pensacola, Fla., restricted against transporting traffic "moving solely between" Mobile, on one hand, and Pensacola, Panama City, and Jacksonville, Fla., and Atlanta, Ga., on the other, the Commission committed error when, without giving any further notice, it removed stipulated restrictions against "transportation of any traffic, direct or interline," between those points and granted the broader authority. Since applicant already held authority to serve Pensacola, and the authority granted was not restricted against tacking, it not only received a new grant to a new terminal, serving a new area, but in effect it received a second grant of authority due to permitted tacking at Pensacola which extends its authority eastward several hundred miles.—Georgia-Florida-Alabama Transp. Co. v. United States, 290 F. Supp. 764 (765-6)*.

As the Commission itself has noted, where tacking occurs on a new grant, two grants actually take place: (1) a grant of authority between the two terminals and (2) a grant from a new terminal to all other areas brought into being by tacking to a terminal which applicant already serves under a prior grant. However, a much graver situation arises where tacking occurs and no restrictions are made against interlining; and, in instant case, the additional grant by reason of tacking and removal of the restrictions contained in the application constitutes a grant of authority not contemplated by the application which could adversely and materially affect operations of other authorized carriers. Order and certificate as granted should be republished in the Federal Register with opportunity given plaintiffs and others interested to offer evidence and be heard; then the Commission will re-examine the evidence and arguments and determine whether the certificate and order should stand or be set aside.—Id., pp. 766-7, 769.

In action to set aside the Commission's grant of authority to defendant carrier, there is no merit in plaintiffs' contention that the record does not support the Commission's conclusion that grant of single line authority from Chicago to eastern States, unrestricted as to interlining from the west, would not materially alter existing competitive situation. The applicant had handled considered traffic in joint-line service for several years; interlining is a right and duty of common carriers; and it is a well-established Commission policy to impose restrictions against interlining only where it is shown to be necessary in the public interest, since restrictions on operating rights create undesirable complications. Moreover, the Commission's conclusions that any restriction of the authority granted would preclude applicant from continuing service it had provided, and would adversely affect shipper and interlining carrier using that service, finds substantial basis in the record evidence; order granting the certificate sustained.—Midwest Emery Freight System, Inc. v. United States, 293 F. Supp. 403 (406-7, 408)*.

In suit seeking judicial review of Commission order granting certificate to intervenor, the court recognizes, and does not question, that in granting operating authority the Commission may add to, delete from, or change applicant's proposed restrictions as the public interest may require. Also, it is obvious that some of the additions or deletions may require publication of additional notices and further hearings; others may not. Whether the Commission acted reasonably or arbitrarily when it deleted restrictions originally sought by the applicant and substituted a different restriction of its own, without any further notice or hearing, cannot be determined on the record; moreover, that question is one which calls initially for the Commission's expertise. However, plaintiffs (protestants) are entitled to show at a hearing, if they can, the claimed gravity of the substitution; and that opportunity has been arbitrarily denied. Matter remanded for further Commission consideration in conformity with the court's opinion.—Refrigerated Transport Co., Inc. v. United States, 297 F. Supp. 5 (6-7, 9)*.

On review of the record in carrier's suit to enjoin Commission order on rehearing which substituted a "single plantsite," in lieu of the "mixed load," restriction in the certificate issued to it 5 years earlier, imposition of the new restriction after years of operations under the "mixed load" certificate was not inequitable, as plaintiff claims, in that such added restriction of its authority will cause it an extreme financial hardship. Undoubtedly the new restriction will adversely affect plaintiff's operations which, under certificate issued, were expanded probably to require additional investments in equipment and personnel; however, interstate operating authority is not granted pursuant to the doctrine of estoppel but, rather, on a determination of the public need. Moreover, plaintiff's expanded operations to some extent appear to result from its own questionable compliance with the "mixed load" restriction. Record shows that the authority granted on rehearing is consistent with evidence presented in support of original application; injunctive relief, denied.—Greenstein Trucking Co. v. United States, 343 F. Supp. 194 (200)*.

Restrictions limiting traffic to that which originated at specific cement plants or restricting traffic against movement between rail points rejected as limiting service to the public and competition among various cement producers without serving any useful purpose or providing any real protection for protestant rail carriers.—Transport, Inc., Extension—Ex-Rail Cement, 96 M.C.C. 671 (682).

Restriction to shipments moving from, to, or between warehouses, wholesale, retail, and chain outlets, or other facilities of grocery and food business houses was imposed on authority to transport commodities dealt in or sold by grocery stores, because only such limited authority was shown as needed.—Interstate Grocery Distribution System Ext.—Paper, 98 M.C.C. 546 (549-550).

As a condition to grant of authority and to insure authority granted applicant is not utilized by other corporations and in interest of corporate simplicity, applicant must merge with three other involved corporations or else these corporations must be dissolved. In view of the commodity description "used passenger automobiles" and the secondary movement limitation in authority sought, it is not necessary nor desirable further to burden authority granted with proposed restriction against the transportation of vehicles for or on behalf of manufactures.—AAA Con Drivers Exchange Common Carrier Application, 102 M.C.C. 393 (398, 401).

Restrictions on motor operations frequently create undesirable complications and should not be imposed except where it is shown conclusively that they are necessary, in the public interest, and consistent with practicable and effective transportation regulation. While the phrase "administratively undesirable" broadly depicts the ultimate reason for the limitation or modification of any proposed restriction, there are at least three more specific reasons for most of the changes made by the Commission: (1) that the proposed restriction serves no useful purpose, (2) that it is unclear or confusing or (3) that it is unduly restrictive. An additional factor to be considered is whether or not proposed restriction serves only or primarily the purpose of limiting the efficiency of the operations. 96 MCC 627, which has been misconstrued throughout the transportation industry, indicates that acceptance or rejection of a proposed restriction depends not upon the particular language utilized—i.e., whether it is positively or negatively phrased—but rather on the purpose intended to be served by the particular limitation.—Fox-Smythe Transp. Co. Extension—Oklahoma, 106 M.C.C. 1 (9-10, 15).

Moreover, the many complex problems involved in drafting proper commodity, territorial, and service descriptions and restrictions can be broadly categorized as (1) the imposition of restrictions generally, (2) the undue fragmentation of authority, and (3) the formulation of appropriate and practical commodity descriptions. Accordingly, this proceeding, being representative of numerous others, is an appropriate tool for dealing with the basic problems of proper and practicable commodity, territorial, and service descriptions and restrictions. Those problems are discussed extensively and, in an effort to develop clear and unmistakable guidelines for future use, specific suggestions are set forth.—Id., pp. 1, 5, 9.

As concluded in 103 MCC 318 (sustained, 288 F. Supp. 641, aff'd 393 US 265), any authority granted to local motor carriers to serve exempt forwarders of used household goods should be so circumscribed as to allow continuance of the past carrier services and at the same time preclude rendition of any broader service. Record in instant proceedings shows that operations of both applicants consisted of services as agents of such exempt forwarders in performance of pickup and delivery services primarily between residences of householders and their warehouses and, in addition, rendition of a specialized packing, crating, and containerization service on used household goods shipments. Accordingly, both certificates granted are restricted to "transportation of traffic having a prior or subsequent movement, in containers, beyond the points authorized and further restricted to the performance of pickup and delivery service in connection with packing, crating, and containerization or unpacking, uncrating, and decontainerization of such traffic".—District Moving and Storage, Inc., Common Carrier Application, 107 M.C.C. 896 (900-1, 903-4).

Commission denied applicant's restriction of authority to shipments picked up and delivered on the same day as such restriction would serve only to render the operation difficult.—Swan Messenger Service, Inc., Ext.—General Commods., 112 M.C.C. 26 (34-5)*.

The proposed restriction on applicant's authority which would allow applicant to handle only that traffic which could be unloaded by applicant's mechanical unloading devices is not imposed because it would be unduly limiting and would impede the free flow of commerce.—Pittsburgh & New England Trucking Co., Extension, 113 M.C.C. 46 (48)*.

Authority granted to applicant to transport animal and poultry health aids, animal and poultry feed, and animal and poultry feed ingredients, restricted to shipments of mixed loads for protection of protestant, who has no authority to transport health aids. Citing 92 MCC 254, 255, Commission declined to fix arbitrary limits on the percentages of the mixed load restriction, requiring only that each load constitute a "reasonable volume of contrasting freight".—C.B. Transportation, Inc., Ext.—Worthington, Minn., 118 M.C.C. 247 (250-51)*.

In general: [Vols. 18, 19, 21].—The Commission has refused to impose restrictions that lack precision and consequently are difficult to enforce, as well as ones that are administratively undesirable and burdensome to police. Considered "truckload lot" restriction, imposed in certificates during early days of motor carrier regulation, is both imprecise in meaning and difficult, if not incapable, of enforcement; such restrictions are uniformly rejected when proposed today; and it is neither unreasonable nor arbitrary to remove them from existing certificates. Question of the inconsistency of truckload lot restrictions with the basic tenets of common carriage has been dealt with in several cases and, on one occasion (98 MCC 607, 612), it was stated that such a restriction is not legally sustainable. Furthermore, public policy favors issuance of operating authorities to perform a complete service, and "truckload lot" restrictions militate against that policy; therefore, in instant circumstances, removal of the truckload restriction, which unduly precludes needed complete services, would be in the public interest and consistent with the national transportation policy.—Removal of Truckload Lot Restrictions, 106 M.C.C. 455 (483-4, 488, 490, 493)*.

On a petition for extension of operating authority by a regular route carrier of general commodities where a need clearly exists for a service similar to that proposed by the applicant, but where doubts exists as to whether applicants' proposed service, if authorized, would be fully responsive to the actual needs of the shipping community, the issuance of the certificate is conditioned upon applicant's acceptance of the following conditions: that the grant of authority will be limited to a term of three years from the date of the certificate; that applicant file an annual performance report with the Commission's Bureau of Economics; and that the Commission's jurisdiction be reserved to impose such further terms and conditions to insure that applicant's operations comport with the type of service the supporting shippers are shown to require on this record.—Campbell Sixty-Six Express, Inc., Extension—Atlanta, 108 M.C.C. 80 (82).

Restrictions to service at facilities of named shippers are imposed in grants of authority only where affirmatively justified by the evidence. Record herein shows clearly that applicant intended throughout this proceeding to seek appropriate authority to serve all shippers of the considered commodities in Philadelphia, Pa. Unrestricted authority granted.—Weiss Transportation Co. Extension—Delaware, 114 M.C.C. 70 (72-3)*.

Any consideration of an application by a rail motor common carrier affiliate to eliminate restrictions binding it to operations auxiliary and supplementary to rail service must begin and end with consideration of what constitutes the "special circumstances" necessary to warrant a grant of functionally unrestricted operating authority [63 MCC 91, 355 US 149].—Southern Pac. Transp. Ext.—Elimination of Restrictions, 117 M.C.C. 224 (325).

See also, §207(a), n. 35.

Commercial zone: [Vols. 11, 17, 18].—See Hayes Lines, Inc. v. Gateway Transportation Co., Inc. case, §204(c), n. 6.

Commodities: [Vols. 18, 19, 21].—In action to set aside Commission's order granting plaintiff authority to transport frozen fruits, frozen berries, frozen vegetables, and potato products, instead of the frozen foods and potato products authority applied for, the reviewing court finds that the grant of such limited authority is not based on adequate subsidiary findings, not supported by substantial evidence. In restricting the authority the Commission referred to a "scheme" to which each application should conform, but made no findings to support its grant of such limited authority. Furthermore, in its "scheme" to limit commodity description, the Commission did not consider the copious evidence of need for transportation of "frozen foods" and disregarded the requirements of "typical" shippers. Remanded for further proceedings in conformity with the court's opinion.—Dunkley Refrigerated Transport v. United States, 253 F. Supp. 891 (895-6)*.

When the commodity restriction "(except acids and chemicals)" is added to a grant of authority to transport dry animal and poultry feeds, it implies that some dry animal and poultry feeds are acids and chemicals and that some are not. Dry animal and poultry feeds are not listed as acids and chemicals in the National Motor Freight Classification and are not commonly considered to be such for transportation purposes. Therefore, dry animal and poultry feeds are excluded from the acids and chemicals classification by common usage and the phrase "(except acids and chemicals)" should be eliminated from the grant of the feeds authority.—Stearns Common Carrier Application, 96 M.C.C. 627 (628).

Transportation of refrigerated commodities is routinely permitted to carriers of general commodities, with usual exceptions as noted, and we are reluctant to exclude any specific commodities or class of commodities from such authority merely because of dormancy of prior rights in such limited respect, barring a convincing showing of adverse effect upon others.—Howard's Exp., Inc.—Purchase—Exchange Trucking Corp., 97 M.C.C. 341 (350).

Applicants' authority should be limited to transportation of "used household goods" since the majority of support for the present applications is provided by freight forwarders who, by virtue of the §402(b)(2) exemption, are limited to handling of "used household goods" and applicants' evidence relative to past services concerns essentially the same commodities.—Central Forwarding, Inc., Extension, 107 M.C.C. 706 (717).

Applications granted in the consolidated proceeding are subject to a restriction against the transportation of commodities which because of size or weight require the use of special equipment. In accordance with the Commission's policy of not unduly encumbering grants of authority this restriction will be inserted in a grant of specific-commodity authority only in those instances where heavy-hauler protestants can affirmately establish (or where it is admitted) that they will be materially or adversely affected by the failure to impose such a restriction. Protestants herein have demonstrated that they would be affected by the failure to impose such a restriction. Restriction imposed.—Herr's Motor Exp., Inc., Extension—Wheeling Steel, 108 M.C.C. 626 (634)*.

Although applicant requests that the authority be restricted against the transportation of commodities in bulk, in dump or tank vehicles, no need has been shown for the transportation of any commodity in bulk. Accordingly, the proposed vehicle limitation is inappropriate; and the authority granted will simply be restricted against the movement of "commodities in bulk".—Frost Trucking Co., Extension—Philadelphia, Pa., 110 M.C.C. 203 (210)*.

Although applicant sought general commodity authority and excepted therefrom two of the five usual exceptions ("household goods" and "articles of unusual value"), the Commission also excepted "commodities in bulk," "classes A and B explosives," and "size or weight" commodities from authority as no need has been shown for such transportation.—Watkins Motor Lines, Inc., Ext.—General Commodities, 113 M.C.C. 658 (670-72).

Applicant's assertion that inclusion of express and newspapers in certificates authorizing transportation of passengers has become general practice, and should be granted in absence of showing by protestant of material and adverse effect of such grant, is rejected. No such general policy exists and public support is required for any grant of new authority.—Greyhound Lines, Inc., Ext.—Norwich, Conn., 115 M.C.C. 617 (619-20)*.

See also Garrett Freightlines, Inc.—Modification case, §212(a), n. 1.

Direction: [Vol. 18].—See Tarantola Trucking Co., Inc., Modification of Certificate case, §212(a), n. 30.

Distance: [Vol. 18].—Authority to transport used household goods for freight forwarders exempt from regulation by §402(b)(2) is restricted to territorial scope of applicants' past good faith operations and is described in terms of named counties rather than in miles.—Central Forwarding, Inc., Extension, 107 M.C.C. 706 (715-16).

Equipment: [Vols. 18, 19, 21].—Since applicant's existing authority to haul coke to Ohio and Kentucky is restricted to movements "in bulk," it cannot meet shipper's requirements for shipments of coke in bulk pack equipment, i.e., in steel containers which hold 12 tons of coke and which are loaded and unloaded, five to a trailer, by overhead crane, to consignees in those states which require that type of delivery. Authority is granted to move coke with no restrictions subject to the provision that such unrestricted authority granted shall not be construed as conferring more than one operating right.—Skinner Motor Exp., Inc., Extension—Bulk Commodities, 96 M.C.C. 135 (141-2).

Qualifying phrases in operating authorities should normally be confined to those which describe the service authorized or the transportation characteristics of the commodity transported and should serve some positive purpose. Such limitations should be positive in nature because negative restrictions, designed solely to keep a carrier from using a particular kind of equipment to the asserted benefit of existing operations, prevent the rendition of needed service with optimum efficiency. A restriction banning the use of tank or hopper-type vehicles for transportation of bulk commodities is therefore unacceptable.—Stearns Common Carrier Application, 96 M.C.C. 627 (628).

In a grant of operating authority, a restriction limiting commodities to those "requiring temperature control" should not be imposed. Rather, the commodities will be restricted to those "moving in vehicles equipped with mechanical refrigeration". This latter description follows the policy in 71 MCC 321, in which it was said that such form of grant is not only definite but has the advantage of being largely self-policing, since equipment of the type specified is necessarily insulated, heavy, and expensive, and not attractive for any extensive use in the movement of commodities which do not require refrigeration.—Zero Refrigerated Lines Extension—Six States, 96 M.C.C. 482 (488).

The restriction "in vehicles equipped with mechanical loading devices" is designed solely to restrict the type of equipment a common carrier may use, and not only does it obstruct the free flow of traffic, but it also impairs the efficiency of the carrier; therefore, being contrary to the Commission's view relating to the duties of a common carrier, it is unacceptable.—M. Pascale Trucking, Inc., Extension—Gray, Maine, 99 M.C.C. 542 (544).

In order to protect existing carriers from unwarranted competition, grants of authority to transport foods, food preparations, etc., are limited to transportation in vehicles equipped with mechanical refrigeration. Such equipment normally is not provided by the regular-route protestants, and the additional expense inherent in operation of mechanically refrigerated vehicles should effectively prohibit the entry of irregular-route applicants into the dry freight business. —Frozen Food Express Extension—Four States, 103 M.C.C. 913 (917)*.

Public convenience and necessity found to require operation by applicant as a common carrier of iron and steel fencing (except commodities the transportation of which, because of their size or weight, require the use of special equipment) from La Grange, Tex., to points in the United States. —Pre-Fab Transit Co., Ext.—Fencing, 118 M.C.C. 68 (72)*.

Explosive, 5 year limitation: [Vols. 18, 19, 21].—Since authority to transport aerospace craft involves transportation of jet thrust units (classes A and B explosives), authority granted limited to 5-year term, to extent that movement of such explosives is involved.—U.S.A.C. Transport, Inc., Extension—Missiles, 103 M.C.C. 23 (36).

Job-site: [Vol. 18].—Petitioner's contention is that the term "jobsite" has never been defined by the Commission and finds little or no acceptance in dictionaries, and that therefore such term is ambiguous. While the Commission has been loath to place jobsite restrictions in operating authorities, this is not because the term "jobsite" is ambiguous or undefineable but rather because jobsite locations do not have permanency either with respect to the location of a particular job or to the duration of time expended on a particular job; the term itself i.e., what a jobsite is, as embasced in petitioner's certificate is clear and unambiguous and susceptible of only one reasonable interpretation.—Widing Transportation, Inc., Investigation and Revocation of Certificates, 110 M.C.C. 106 (110).

Keypoint restriction: Modification of key-point restriction at Poplar Bluff, Ark., was approved to enable applicant to perform substituted motor service from St. Louis to destinations in Missouri. Applicant has shown that such operations would accomplish economies and needed improvements in rail service. Complete removal of such restriction is denied as all-motor movements are not the basis for economies and improvements in service and would divert significant traffic from protestant.—Missouri Pac. Truck Lines, Ext.—Key Points, 111 M.C.C. 383 (387-8).

Application to modify key-point of Abilene, Tex., so as to provide motor carrier service solely for REA express shipments between Dallas-Forth Worth and intermediate points along route of movement to key-point of El Paso, Tex., approved. Modification results from discontinuance of two trains handling such traffic; inability of protestants to meet needs of REA; and applicant's satisfactory service under temporary authority. Restriction of applicant's authority to only those express shipments having prior or subsequent movement by rail found not justified as it would foreclose applicant from traffic it formerly or persently handles and would preclude applicant from tendering a complete and rounded service on all tendered express traffic.—Texas & Pacific Motor Transport Co.—Modification, 111 M.C.C. 389 (393-4).

Limited-term operating authorities: [Vols. 18, 19, 21].—See also *Explosives*, above.

Commission limited the grant of authority herein to three years in view of fact that virtually all other previously authorized carriers have demonstrably failed to individually provide reliable, expeditious service for considered operations. Commission also retained jurisdiction in order to impose such further terms as may be found necessary in the future.—Texas-Oklahoma Express, Inc., Ext.—Oklahoma Points, 110 M.C.C. 769 (783-5).

Inasmuch as applicant seeks authority to transport classes A and B explosives, such authority will be made subject to a 5-year limitation in accordance with Commission policy as stated in 64 MCC 299.—Rio Grande Motor Way, Inc., Ext.—Grand Jct. to Price, 111 M.C.C. 715 (716).

Although applicant has remedied its past service deficiencies which violated §216(b) and its own certificates, the serious nature of the violations causes the Commission to limit the grant of authority herein to a 3-year term during which the Commission will examine whether applicant continues its compliance efforts regarding all authorized operations—Spector Freight System, Inc., Extension—Whitley, 111 M.C.C. 889 (893-94).

While applicant had made a sincere effort to correct past mistakes and indicated a willingness to effect compliance with a mixed-loads restriction in one of his certificates, the grant of authority was limited to a 3-year term in view of his unauthorized operations.—Radke Extension—Various Commodities, 113 M.C.C. 89 (96).

Authority granted is limited to 3 years as the Commission retains some doubts that the proposed service, a rather unique type of cross-country operation involving substantial new equipment and terminals, is feasible. Applicant, therefore, is also required to file annual performance report, as detailed herein, to enable Commission to determine if shipping public has obtained required service.—Watkins Motor Lines, Inc., Ext.—General Commodities, 113 M.C.C. 658 (669-70).

Because record discloses applicant has occasionally failed to provide authorized service in the area considered herein, and because certain doubts exist whether applicant's service would actually reflect the type of expedited operation proposed and shown to be required, grant of authority is restricted to a term of three years and the filing of an annual "Performance Report," as detailed, is required.—East Tex. Motor Frt. Lines, Inc., Ext.—Miss. & La., 115 M.C.C. 122 (142-3).

Since shippers and receivers of general commodities, with exceptions, between Portland, Oreg., and Seattle, Wash., have shown that the existing joint-line service is not meeting their reasonable transportation requirements, such as consistent overnight service, scheduled pickup, available specific types of equipment, and a carrier willing to handle the traffic. The Commission should be provided with sufficient and pertinent data to permit a determination as to the extent to which applicant's actual performance measures up the operation proposed and shown to be needed by the shipping public. Applicant granted a 3-year term certificate with a condition that it file an annual Performance Report at the end of each of the first 2 years after date of issuance of the certificate. If applicant desires it may file a petition for permanent extension of the certificate.—Trans West. Exp., Inc., Ext.—Seattle-Portland, 118 M.C.C. 1 (12).

In view of applicant's past violations of the Act through illegal tacking operations and certain leases and interchange arrangements which have now been terminated, the authority granted herein will be limited to 3 years to afford the Commission an opportunity to examine whether applicant continues its compliance efforts.—Distributors Service Co., Extension—Foods, 118 M.C.C. 322 (330)*.

In light of past violations, authority granted was limitied to a term of two years.—People Express Co., Ext.—Empty Containers, 118 M.C.C. 675 (680).

Oilfield, oilwell; pipeline stringing: [Vols. 18, 21].—See Willett Extension—Pipeline Machinery case, §207(a), n. 25 *Commodity description.*

Passenger operations: [Vols. 18, 19, 21].—In action to set aside Commission order granting authority to intervening defendant bus line to transport passengers over roughly the same routes as limousine service being provided by plaintiff (protestant), the certificate authorizing operations "by motor vehicle" may be read to permit both bus service and limousine service exactly duplicating that of plaintiff, as it contends. Therefore, in view of defendant carrier's representations that it provides only a motor bus service, the reviewing court holds that, for instant case and any other proceedings involving the parties or their successors, the authority granted to intervening defendant carrier is limited to a motor bus service.—Connecticut Limousine Service, Inc. v. United States, 295 F. Supp. 1335 (1338)*.

Authority granted taxicab operator for special and charter operations between Fort Dix and McGuire Air Force Base, N.J., and New York City, Philadelphia, and Philadelphia International Airport is limited to transportation of not over six persons in any one vehicle, exclusive of the driver and children under 10 years of age not occupying seats.—D & M Taxi Co., Inc., Common Carrier Application, 96 M.C.C. 439 (446, 448).

Restriction limiting the proposed service to traffic originating at or terminating at Bradley Field, Conn., is indefinite, ambiguous, and administratively undesirable. The imposition of such a restriction would prevent persons "seeing off" or meeting air passengers. In view thereof authority is restricted to the transportation of passengers moving from and to Bradley Field.—Key Trans-port Service, Inc., Common Carrier Application, 98 M.C.C. 628 (631).

Authority to transport passengers between Wareham, Mass., and New York, N.Y., is restricted to protect one protestant's direct service between Newport, R.I., and Boston, Mass., since public support for the Newport area is directed between Newport and New York City or between Newport and Cape Cod. Also, though the Commission generally does not favor closed-door operations, it is clear that most of the supporting testimony concerns service between the Rhode Island—Cape Cod area and New York City; thus, since New London is the only Connecticut point that has adequate support for inclusion as a service point, record does not justify authorizing service at other intermediate points in that State. Authority granted is restricted accordingly.—Almeida Bus Lines, Inc., Extension—New York City, 106 M.C.C. 311 (326)*.

Authorities granted herein are restricted against indicated points inasmuch as public witnesses' testimony expresses mere preference for such service. Record shows such witnesses' travel plans are highly conjectural and no evidence indicates such witnesses had tried to determine whether existing carriers can provide service similar to that proposed. Showing of mere preference fails to sustain applicant's burden of proving public need exists for proposed service.—Brush Hill Transp. Co., Com. Car. Applic., 112 M.C.C. 348 (359-67)*.

Plant site: [Vols. 18, 19, 21].—Inasmuch as the evidence discloses as the only origin point supporting shipper's Fremont, Nebraska, plant site considered authority is so restricted. Although plant site restrictions are, in many cases, unduly limiting, they are not necessarily inconsistent with the duty of a common carrier to serve the shipping public, for a restricted carrier is able to serve not only the plant site operator (producer) but the numerous consignees (consumers) who may purchase its products f.o.b. plant site basis. However, because a plant site restriction does limit the carrier's holding out of service rather strigently, it is frowned upon and is not imposed unless shown to be necessary. In addition to the immediate issues raised, the significance of this proceeding extends to the many complex problems related to the imposition and description of restrictions in motor carrier operating rights.—Fox-Smythe Transp. Co. Extension—Oklahoma, 106 M.C.C. 1 (17, 31).

Protestants' proposed plant site restriction at the plant of one of the supporting shippers is not appropriate because a number of the consignees on return movements will be customers of that supporting shipper, and such a limitation would prevent the other supporting shippers from the possibility of developing a two-way movement. The Commission will not hinder such initiative unless so required to protect other carriers form unwarranted competition. To the extent that some diversion might occur, the benefits to be derived by the public in the form of economical transportation far outweight the slight potential disadvantages of the existing carriers.—Rogers Cartage Co., A Corporation—Extension, 110 M.C.C. 139 (150,151)*.

Record in conversion proceeding is convincing that grant of a certificate in lieu of applicant's existing contract carrier authority from Munster, Ind., will not adversely affect any party; however, to protect protestants' interest in future traffic that might originate at Munster, the origin point will be limited to supporting shipper's plant site.—Ferree Moving and Storage, Inc., 110 M.C.C. 375 (379)*.

Authority granted to tranport commodities which applicant will unload with its own mechanical unloading devices is restricted at one of the commodity origin points because one protestant has the type of specialized equipment shown to be needed by shippers and no dissatisfaction with this protestant's service had been indicated; its interest will be protected.—Pittsburgh & New England Trucking Co., Extension, 113 M.C.C. 46 (48)*.

Outstanding certificate modified by substitution of plant site restriction for mixed loads restriction.—Greenstein Trucking Co. Extension—St. Paul, Minn., 113 M.C.C. 489 (495)*.

Applicant granted authority sought to transport various commodities (excluding those in bulk), from plant sites and storage facilities of supporting shipper to points in three states, based on public convenience and necessity.—Pulley Freight Lines, Inc., Extension—Compounds, 115 M.C.C. 106 (109-10).

Points, origin, intermediate, off-route, destination: [Vols. 18, 19, 21].—See also Delaware Exp. Co. Extension case, §207(a), n. 25 *Existing carriers;* Public Service Coordinated Transport v. Trans-Bridge case, §212(a), n. 1; R-C Motor Lines, Inc. v. United States case, §204(c), n. 51.

As it does not appear there is any real need for joint-line service between applicant in midwest and its N.Y. affiliate or other connecting lines, and applicant does not seek to participate in such a service, authority granted is restricted against transportation of shipments received from, or to be delivered to, any other motor carrier for movement to or from any point beyond those specifically named in the certificate. —United Parcel Service, Inc., Extension—Midwest Territory, 96 M.C.C. 10 (13).

Authority, granted to operate through Port Huron as an alternate port of entry on traffic moving between Detroit, Mich., and Ontario over specified route, will be restricted against transportation of shipments originating or destined to Sarnia, Ontario, in order to maintain competitive balance with respect to local traffic; without such restriction, proposed operation would permit a substantially improved service on local traffic between Detroit and Sarnia and would enable applicant to attract this traffic for which is has not been previously competitive.—The Overland Express, Limited, Extension—Alternate Route, 96 M.C.C. 24 (27).

Although the Examiners recommended that applicant be granted authority from points in Tennessee, there is no evidence that considered traffic originates or will originate at any points in that State other than the six named points. Since to permit applicant to originate traffic at all points in Tennessee would allow it to serve other industrial cities therein without a showing of public convenience and necessity, authority granted is limited to the six origin points named.—Skinner Motor Exp., Inc., Extension—Bulk Commodities, 96 M.C.C. 135 (139, 141).

An alternate route was limited to use "in connection with carrier's regular-route operations between Birmingham, on the one hand, and, on the other, Mobile, Ala., Gulfport, Miss., and New Orleans, La." The limiting words do not restrict the traffic to shipments moving solely between Birmingham and the three other named points, but rather the words are descriptive in nature and intent, merely identifying the authorized route to which the alternate route is appurtenant, and not restricting the service which may be performed over it. An actual service restriction would have been phrased in more specific, unambiguous terms.—West Bros., Inc., Extension—U.S. Highway 11, 96 M.C.C. 490 (493).

Although the Commission does not favor grants of authority described in terms of a mileage radius, there appears to be no practical alternative when need is established for applicant's service solely between Big Run, Pa., and points within 25 miles thereof, on one hand, and Pittsburgh and Philadelphia, on the other; authority granted is limited accordingly.—Bowser—Investigation of Operations, 98 M.C.C. 170 (179).

Since Virginia intrastate passenger authority of one applicant is restricted against service on U.S. Highway 1 or up to within 1000 feet thereof, if it were authorized in interstate authority sought to serve all intermediate points between Washington, D. C., and Richmond, Va., it would be placed in the intolerable position of having to inquire into the destination of prospective passengers to exclude intrastate patrons destined to points it cannot serve. While the Commission is not bound by limitations contained in an intrastate certificate, it is required to determine whether all service proposed is calculated to meet a public need.

Since the other applicant already serves most the considered intermediate points at which service is shown to be needed and new provides adequate service in this immediate area over other routes, it is the logical carrier to continue proposed service. Authority granted first applicant, therefore, is restricted against service at intermediate points, except the 2 specified.—Virginia Stage Lines, Inc., Extension—Interstate Highway 95, 102 M.C.C. 568 (579-1).

Proposed restriction prohibiting applicant from performing North-South operations from and to new Mississippi and Louisiana points rejected as it would detract from the utility of applicant's service, result in less efficient and economical distribution of shippers' commodities, and materially impair applicant's ability to conduct proposed operations in an economically feasible manner. —East Tex. Motor Frt Lines, Inc., Ext.—Miss. & La., 115 M.C.C. 122 (139).

To resolve an apparent ambiguity between the authority of the granting paragraph and the positively stated restriction imposed ("restricted to the transportation of [commodities] between points in that part of the Kansas City commercial zone, as defined by the Commission, situation in Kansas, on the one hand, and, on the other, points in Louisiana and a specified portion of Texas"), it was held that the restriction merely limits the destination territory to which shipments of the involved commodities originating in the Kansas portion of the commercial zone may be transported. Thus traffic originating at points in Kansas other than those in the Kansas City zone is unaffected by the restriction.—Little Audrey's Transp. Co., Inc., Ext.—Emporia Meats, 117 M.C.C. 173 (178)*.

The number of origin points listed for 3 states in which authority was sought was not sufficiently representative to justify a grant of authority from all points in the states, and service was therefore authorized only from those origin points specifically identified.—West Motor Freight, Inc., Extension—Fleetwood Foods, 118 M.C.C. 50 (56)*.

Since protestants established an almost unbroken pattern of late pickups and deliveries frequently resulting in door-to-door transit times of from 3 days to a week between Jackson, Miss., and New Orleans (200 miles), and have demonstrated a lack of interest in shippers' largely less-than-truckload traffic, public convenience and necessity was found to require removal of applicant's restriction precluding transportation of traffic between Jackson and New Orleans.—Barnes Truck Line Extension Restriction Removal, 118 M.C.C. 339 (343)*.

Sought authority included a duplication of existing service provided by protestant, and, since applicant failed to prove that such portion would serve a useful purpose responsive to a public demand or need or that the purpose could not be served as well by existing carriers, a restriction was imposed on the sought authority. The necessity of protecting the interest of protestant was held to outweigh the relatively minor burdens placed on applicant by the restriction, which requires it to determine whether shippers in Texarkana are located in Arkansas or Texas; granted authority restricted against shipments moving from Texarkana, Tex., to or from Dallas.—Mistletoe Express Service Extension—Arkansas, 118 M.C.C. 414 (418-9)*.

Authority granted herein was restricted to the particular origins inasmuch as supporting shippers are located at a rather limited number of origin points. However, all but one foodstuffs shipper made a sufficient showing of need of service the entire destination area. Without such restrictions set forth herein, unwarranted additional competitive operations could evolve thus causing a diversion of traffic from protestants that would not be in the public interest.—Onley Refrigerated Transp., Inc.—Foodstuffs and Drugs, 118 M.C.C. 715 (723)*.

Prior or subsequent movement beyond authorized points: Applicants' authority to transport used household goods for freight forwarders exempt from regulation under §402(b)(2) is restricted to traffic having a prior or subsequent movement, in containers, beyond the points authorized, and confined to performance of pickup and delivery service in connection with packing, crating, and containerization of such shipments.— Central Forwarding, Inc., Extension, 107 M.C.C. 706 (717-18).

Prior or subsequent movement by air: [Vols. 18, 19, 21].—See also Commodity

Haulage Corp. Common Carrier Application case, §207(a), n. 25; Kato Express, Incorporated, Extension case, §207(a), n. 25 *Express.*

Granting of a motor common carrier certificate to an air forwarder, restricted to traffic having an immediately prior or subsequent movement by air is a step toward achieving intermodal coordination, and possibly, a step toward alleviating the small shipments problem.—Direct Air Freight Corp.—Common Carrier Application, 106 M.C.C. 785 (791).

To prevent illegal dual operation, since applicant already has contract carrier authority, issuance of certificate herein is conditioned on applicant's prior submission of its written request for cancellation of its permit except that portion authorizing transportation of processed and unprocessed film. Authority granted is restricted against transportation of traffic having prior or subsequent movement by air and is subject to the usual size and weight restrictions; the certificate herein shall be subject to the right of the Commission, which is hereby expressly reserved, to impose such terms, conditions, or limitations in the future as it may find necessary in order to insure that applicant's operations conform to the provisions of §210.—Hourly Messenger, Inc., Extension—Parcels and Packages, 108 M.C.C. 402 (404-5)*.

Authority is granted to both applicants to transport ex-air shipments of freight restricted to traffic having an immediately prior or immediately subsequent movement by air.—Turner Expediting Service Extension—Montgomery County, Ky., 110 M.C.C. 342 (351, 352)*.

Prior or subsequent movement by rail: [Vols. 18, 19, 21].—In order to protect protestant from excessive and unwarranted competition, restriction prohibiting applicant from transporting any traffic moving between Omaha, Nebr., on the one hand, and St. Joseph and Kansas City, Mo., on the other, except that having a prior or subsequent movement by rail, is substituted for the Omaha key-point restriction previously in applicant's certificate. Since protestant's opposition is predicted mainly upon traffic it handles between these cities, if is clear that now little, if any, harmful effect would be made upon the existing service.—Missouri Pac. Truck Lines Extension, 100 M.C.C. 677 (682-4).

In order to limit respondent's service to that which is auxiliary to and supplemental of parent rail service, as originally intended, present key point restriction must be replaced with restriction authorizing only shipments having a prior or subsequent movement by rail. This is necessary since present motor operations are not a true substituted motor-for-rail service, but an independent motor operation traversing route much shorter than and situated a distance from parent's railway lines.—Santa Fe Trail Transp. Co., Extension—Phoenix, Arizona, 103 M.C.C. 164 (171-2)*.

Prior or subsequent movement by rail-haul restriction in lieu of key point restriction imposed in prior report, 103 MCC 164, upon substituted motor-for-rail service found to be inadequate to prevent all-motor service by applicant between Los Angeles, Calif., and Phoenix, Ariz. Therefore, in order to insure that the subsidiary motor carrier's service will be auxiliary to, or supplemental of rail service, the Commission modified the certificate by adding to the original key point restriction a clause requiring shipments transported by applicant to be limited by an immediately prior or subsequent rail movement by the parent railroad to, from, or through Ash Fork or Flagstaff, Arizona.—Santa Fe Trail Transportation Company—Extension—Phoenix, Arizona, 108 M.C.C. 16 (21)*.

Prior or subsequent movement by water: [Vols. 18, 21].—See IML Freight, Inc., Ext.—Containerized Freight case, §207(a), n. 25 *Existing carriers:* Petroleum Transit Co., Inc., Extension case, §207(a), n. 25 *Foreign.*

Private and for-hire transportation: [Vols. 18, 19, 21].—Along with its nonexempt towing business for which a certificate is granted, applicant also engages in truck repairing and the sales and service of truck parts. Therefore, the authority granted for interstate towing will be made subject to the condition that such towing activities shall be conducted separately from applicant's other business activities and that separate accounts and records shall be maintained. These two conditions are designed to keep the carrier's for-hire operation apart from its other business activities.—Skyline Diesel Sales & Service, Inc., Com. Car. Applic., 96 M.C.C. 430 (431).

State requirements: [Vol. 18].—The Commission's grant of a contract carrier permit authorizing the transportation of malt beverages to Louisiana is in conflict with that state's law prohibiting transportation of such products by other than common carriers and hence must yield to the exercise of a state's power under the twenty-first amendment to the Constitution of the United States to regulate the transportation or importation of intoxicating liquors within the state; however, present and future public convenience and necessity is found to require operation by applicant as a common carrier of malt beverages conditioned upon applicant's request for voluntary cancellation of his contract carrier permit.—Fred S. Berry—Common Carrier Application, 106 M.C.C. 848 (849-50).

Commission held that rates charged by carriers operating under certificate of registration for interstate transportation are subject to exclusive regulation by this Commission pursuant to §216 and that rate restrictions in protestant's State certificates are inapplicable to interstate operations. Commission granted extension application as protestant's tariff restricts shipments to sizes inadequate to meet shipper's demonstrated needs.—Rio Grande Motor Way, Inc., Ext.—Grand Jct. to Price, 111 M.C.C. 715 (716).

Tacking: [Vols. 18, 19, 21].—See also Baggett Transportation Co.—Investigation of Operation case, §212(a), n. 1; Red Line Transfer & Storage, Inc. case, §207(a), n. 30.

In suit to enjoin and set aside Commission report and orders insofar as the certificate granted plaintiff was restricted against tacking, record shows that, in its verified application for irregular-route authority, plaintiff (applicant) denied that the authority sought could or would be joined with any authority then held in order to perform a through service and that recitals in the published notice of the application were consistent with assurances contained therein; in such circumstances, the Commission acted well within its discretion in declining to require that protestants show the actual adverse effect of tacking through abstracts or specific reference to diversions of traffic. Furthermore, the Commission's action in imposing the no-tacking restriction complained of was not capricious or arbitrary, did not constitute an abuse of discretion, and was not in violation of the law; complaint dismissed.—Eagle Motor Lines, Inc. v. United States, 331 F. Supp. 80 (81-2)*.

As stated in 98 MCC 761, tacking of two separate unrestricted irregular-route authorities is permissible as a basic right incidental to holding such authorities, which right does not exist by virtue of any showing of need for through service, but rather as a by-product of the way motor carrier operations are physically conducted on an interchange basis between separate carriers; and, while the Commission may restrict authority against tacking with another in order to perform through operations, such restrictions will not be imposed unless existing carriers establish that they will be materially adversely affected by such tacking operation. A mere showing by protestant that tacking possibilities exist and that applicant may avail himself of them is not sufficient to warrant a restriction against tacking. Thus, when plaintiff (protestant) failed to show how its operations would be materially adversely affected by lack of a tacking restriction, there was no ground for the Commission to impose such a restriction on authority granted intervening carrier. Considered Commission order sustained.—Howard Hall Co., v. United States, 332 F. Supp. 1076 (1082)*.

Where applicant made a positive showing of a need for service, the mere fact that tacking possibilities exist and that applicant plans to avail itself of them although it failed to give advance notice thereof does not warrant the imposition of a restriction in the absence of a showing by protestants that they would be materially and adversely affected. With respect to part (1) of the application, applicant's withdrawal of its objection to protestant's proposed amendment amounts to a stipulation with that protestant that the facts represented warrant imposition of the restriction and such restriction will be attached to the grant of authority in that part. However, as to part (2), protestants either withdrew their opposition or made no showing that their operations will be materially and adversely affected. Further, withdrawal of opposition in reliance upon the examiner's conclusion to impose a no-tacking restriction upon the authority granted is at protestant's peril, and it now cannot be heard to complain that it was denied the opportunity to oppose the application actively.—Truck Transport, Inc.—Extension, 106 M.C.C. 855 (889).

While one applicant did not except to examiner's recommendation that a no-tacking restriction be imposed on heavy-hauling authority granted in consolidated application cases, and need therefor to protect existing carriers does not appear urgent, the applicant is commonly controlled with another carrier whose authority covers substantial east-west heavy-hauling operations in some of the same States; therefore, to minimize duplication in operating rights, authority granted that applicant will be restricted against tacking. However, so to restrict the grants of three other applicants does not appear necessary and would also preclude the performance of needed service.—Dealers Transit, Inc., Extension—Eight Western States, 110 M.C.C. 317 (321, 337-8)*.

Although the existing competitive situation will not be altered by issuance of a certificate to applicant in lieu of its outstanding permit, the authority granted will be restricted against tacking in order to prevent an extension of operations that could not be performed under the contract carrier authority.—Ferree Moving and Storage, Inc. Conversion Application, 110 M.C.C. 375 (379)*.

Review board granted applicant's application for extension of its irregular-route authority subject to a no-tacking restriction. It is a well established policy of the Commission not to encumber grants of authority with restrictions against tacking unless protestants show (or applicant concedes) that they would be materially or adversely affected by failure to impose such a restriction. Therefore, tacking restrictions will not necessarily be imposed in all cases where protestants indicate that a tacking possibility would permit operations in conflict with authority protestants hold. In the instant proceeding, applicant established a need for service from and to points specifically named in its application and in the Federal Register publication. Protestants failed to establish that a grant of the proposed service would have a materially adverse effect on its operations or that they would be prejudiced by an unrestricted grant; therefore, since protestants have failed to show that the nonimposition of a tacking restriction would materially, adversely affect their operations, the no-tacking restriction is not shown to be warranted.—Ruan Transport Corp.—Ames, Iowa, 110 M.C.C. 389 (392, 393)*.

Upon review of record in instant case, Commission found that the modified restriction against tacking at certain points was imposed expressly to bar handling of local traffic within the described areas but without disturbing shipments to and from points outside these areas. Therefore, Commission deleted the modification from the restriction and stated that the routes at issue "may be considered as single routes for purposes of providing through transportation otherwise consistent with the restriction".—Consolidated Freighway Corp. of Del.—Interpretation, 110 M.C.C. 667 (670-1)*.

Authority granted herein is restricted against tacking or handling traffic interlined with other motor carriers. Although protestants have not shown evidence that they would be adversely affected by unrestricted authority, grant of authority was based on unique circumstances detailed herein, and protestants are entitled to protection with respect to long-haul traffic moving to and from points outside scope of applications.—Wehe Common Carrier Application, 110 M.C.C. 798 (812-3).

Two sets of irregular-route operating authorities granted to a carrier in a single proceeding may not be tacked if they comprise but a single grant of authority. Applicant's present certificate forms such a single grant particularly in view of language stating no duplicate authority is granted. Applicant's proposed operation not authorized as it constitutes a cross-haul between two radial points through a base point.—Engel Bros., Inc., Ext.—Arkansas Gateway, 111 M.C.C. 291 (293-4)*.

Commission has long held (as stated in

106 MCC 1, herein cited) that grants of authority ought not to be encumbered by restrictions against tacking or interchange unless protestants show (or applicant concedes) that they would be adversely and materially affected. Protestant motor carrier has shown only that tacking possibilities exist that would conflict with protestant's authority. Such showing does not warrant imposition of tacking or similar restrictions.—Klipsch Hauling Co., Extension—St. Joseph, Mo., 111 M.C.C. 295 (305-7)*.

Authority granted both applicants and restrictions against tacking or interlining placed on both certificates in order to protect protestant's long-range operations from competitive services for which no need is shown or can be inferred.—Wehe Common Carrier Application, 112 M.C.C. 315 (321)*.

Restriction against tacking at St. Joseph, Mo., for purpose of performing through service to Iowa points was found ambiguous because it was not clear whether the restriction applied solely to the municipality of St. Joseph or to all points within the St. Joseph commercial zone. Evidence of public need warranted removal of the restriction by a grant of specific authority as sought herein to conduct the proposed through service. —Byers Transp. Co., Inc., Ext.—Restriction Removal, 113 M.C.C. 50 (52-3, 58).

The Commission's traditional reluctance to restrict grants of common carrier authority against tacking as well as the necessity of assuring the stability of outstanding motor carrier franchises must yield in certain special and limited situations to the need to secure a just result in administative proceedings generally; and where in good faith reliance upon the inadvertent failure of applicant's counsel to apprise them of the fact that an unrestricted grant of the applied-for authority would enable applicant through the tacking of such authority with its existing rights to become a substantial competitor for overhead meat and meat products traffic between mid-central and far western points, existing carriers withdrew their protest to the application and acted with due diligence to protect their interests when they first learned of the situation, applicant was ordered to show cause as to why the subsequently issued certificate should not be modified by imposition of an appropriate non-joinder restriction.—Curtis, Inc., Extension—Meats Over Irregular-Routes, 113 M.C.C. 170 (183).

Although Commission is ordinarily reluctant to impose restrictions against tacking and interlining, the highly experimental nature of the proposed transcontinental operation warrants such restrictions, with certain exceptions, as there is the potential that the applicant may obtain authority by offering better service than it can deliver, thus diluting other carriers' traffic to the detriment of shipping public.—Watkins Motor Lines, Inc., Ext.—General Commodities, 114 M.C.C. 562 (565-6)*.

Defendant tacked authority to transport household goods (a) between Juneau, Alaska, on the one hand, and, on the other, Anchorage and Fairbanks, Alaska, and (b) between points in a specified portion of southeastern Alaska, including Juneau, on the one hand, and, on the other, Seattle, Washington, to perform a through service from Anchorage to Seattle. The necessity for substituting water for motor transportation in order to continue this service when the Alaska Ferry System could no longer be utilized was held to be justified by the Commission.—Wold Storage & Transfer, Inc. v. Alaska Transfer, Inc., 115 M.C.C. 288 (289).

Since applicant had requested an amendment to the application restricting requested routes against the transportation of traffic moving between described area of its regular-route authority in New England, New York, and Pennsylvania on one hand, and, on the other points in the Carolinas and Georgia and beyond, and since there is minimal support therefor, restriction against service, direct or indirect, between the considered areas is warranted. Although "partial" restrictions against tacking and interchange are generally considered undesirable, the complexity and geographical scope of the general commodity authority granted requires the imposition of such a restriction.—Transamerican Freight Lines, Inc., Extension—Columbia, Ga., 115 M.C.C. 416 (430).

Since respondent tacked authority restricted against tacking "with carrier's present authority" with authority obtained subsequent to grant of restricted authority, tacking restriction was inapplicable. The terminology utilized in the authorization of operations which are restricted to the transportation of traffic destined to those destination points specifically named in a certificate has the practical effect of negating application of the general rule that allows joinder of authorities and interline operation. Such a limitation, by corresponding in scope with the grant of authority to which it relates, authorizes only performance of the service specified in the actual grant. Tacking and interlining for movement of shipments to points not so specified are prohibited. Only traffic whose final destination is one of the service points described in a particular grant of authority may be transported pursuant to that authority when a restriction of the type here at issue is imposed.—Hilt Truck Line, Inc.—Investigation of Operations, 117 M.C.C. 9 (24, 26).

The restriction that Doylestown, Pa., "shall be served only in connection with traffic moving from or to Pittsburgh or points in the Pittsburgh area" does not preclude (1) the transportation of shipments which are destined to or originating at points beyond and are moving in interline service, or (2) the combining of a carrier's authorities at common service points to provide a single-line service from or to points beyond. That limitation merely requires that the Pittsburgh area gateway be observed in connection with the intermediate and off-route point service authorized.—Renner Motor Lines, Inc., Extension—Richmond, Ind., 117 M.C.C. 218 (221)*.

Applicant herein seeks to tack authorities granted in two paragraphs of its certificate which are restricted to traffic having an immediately prior or subsequent movement by air. The Commission reaffirms the examiner's conclusion that these restrictions require immediately prior or subsequent movements by air to or from specific airports named in the respective grants and do not permit tacking of separate authorities to serve between points named in one and the airport named in the other. Applicant's certificate constitutes a single grant of operating authority and joinder of separate portions of a single grant will not be permitted.—Conahan Extension—Pennsylvania, 117 M.C.C. 488 (495, 504).

Truckloads: [Vols. 18, 19, 21].—A "truckload lots" restriction is seldom imposed in certificates now, and then only with reluctance because the term is in general inconsistent with some basic concepts of common carriage, and there are certain potential enforcement problems involved. However, when such a restriction exists, it must be given effect by prudent interpretation, with due regard for ordinary meaning of words used and for past interpretations of such restriction; the Commission has declined to remove such a restriction without proof of a real need for the resulting service. Carrier's petition seeking elimination of "in truckload lots" restriction from its authority was not filed until after investigation into its operations was instituted, and the reasons advanced are not convincing; its predecessor did not object to such restriction, existence thereof was a factor in approval of petitioner's purchase of the certificate, and no documentary evidence as to nature of predecessor's operations is offered; petition denied.—Southwest Freight Lines, Extension—Removal of Restriction, 95 M.C.C. 269 (275, 277-8)*.

Although under certain circumstances the Commission has imposed restrictions against the transportation of truckload shipments, proposed restrictive amendments against the transportation of "truckloads of frozen foods" and for transportation in "peddle service," are not imposed on considered grant of authority. Such restrictions, offered solely to eliminate carrier opposition, effectively limit proposed service to the handling of less-than-truckload shipments and are indefinite, impractical, and difficult to enforce. In addition to the refusal to impose considered restrictions, the many complex problems related to the imposition and description of restrictions in motor carrier operating rights are herein reviewed. Fox-Smythe Transp. Co. Extension—Oklahoma, 106 M.C.C. 1 (29-30).

The "in truckload lots only" restriction imposed in applicant's certificate is presently of no force and effect in view of the Commission's decision in 106 MCC 455 to remove such restrictions from all outstanding certificates issued under §206 and §207 of the Act. Accordingly, the issues presented in the complaint premised on the alleged violation of this restriction, are moot and the complaint will be dismissed.—Ben Blinder, Extension—Alternate Routes, 107 M.C.C. 67 (70).

Weight: [Vols. 18, 19, 21].—The Commission is always reluctant to impose restrictions in grants of operating authorities that are administratively undesirable or difficult to enforce. In a grant of express authority to REA, a condition that the shipments be limited to those of not more than 500 pounds from one consignor to one consignee was found to possess both these characteristics and would serve no useful purpose. An arbitrary weight limit is incompatible with the concept of "express service". Restrictions in REA's certificate should deal with the type of service to be performed without reference to any particular type of traffic handled in the performance of such service. Weight restriction removed and certain conditions in conformity with Commission's policy of framing grants of REA certificates are imposed.—Railway Express Agency, Inc., Extension—Traverse City, Mich., 96 M.C.C. 727 (728-9).

Authority requested by applicant limited to "shipments not to exceed 5,000 pounds" is justified by the record. This type of restriction has the advantage of making unnecessary the use of the undesirable vehicle limitation proposed, or any other such limitation; if this restriction does not protect all possible interests of all protestants, they have only themselves to blame for withdrawing from the proceeding on the tenuous assumption that vehicle restriction to station wagons and panel trucks, often rejected by the Commission, would here be found acceptable.—Jet Messenger Service, Inc., Common Carrier Application, 99 M.C.C. 585 (588-9).

Analysis of shippers' testimony indicates a need for expeditious transportation of packages under 100 pounds. Authority to transport articles in excess of 100 pounds would, in effect, amount to authorization of an additional carrier to participate in traffic now being transported by existing motor carriers in a reasonably satisfactory manner. Also, a realistic appraisal of applicant's proposed service indicates that hauling of packages weighing up to 250 pounds would hamper and militate against the expeditious transportation of smaller packages for which a need exists.—Wycoff Co., Inc.—Extension, 107 M.C.C. 776 (779-80).

7. Competition.—[Vols. 10-19, 21].—See also Carl Subler Trucking, Inc., Modification of Certificate case, §206(b), n. 16 *Broadening;* Herrin Transp. Co. Extension case, §207(a), n. 25 *Necessity*.

Commission finds that use of vendor's rights in conjunction with those of vendee to perform a through service is not a wholly new service but the substitution of a single-line service for previously two-line-service, as vendee had interlined with another carrier (not a protestant herein) and would not be a new competitive service. Approved.—Howard's Exp., Inc.—Purchase—Exchange Trucking Corp., 97 M.C.C. 341 (348-9).

Where respondents' services between points in California and Mexicali, Mexico, have existed, although unauthorized, under their state certificates registered with the Commission under §206(a)(7), the continuance of the service under certificates of public convenience and necessity cannot fairly be said to create a new or aggravated competitive situation to the detriment of other carriers since it has been conducted for a number of years, without challenge, under color of right.—Imperial Truck Lines, Inc.—Common Carrier Application, 106 M.C.C. 741 (753).

As the present record does not support protestant's argument that a grant of motor common carrier authority to an air freight forwarder will enable the applicant to discriminate in favor of its customers and gain a competitive advantage over competing certificated air carriers, and since the record does show that applicant has been performing service for another air forwarder under temporary authority, application for a certificate of public convenience and necessity, restricted to traffic having an immediately prior or subsequent movement by air, should be granted.—Direct Air Freight Corp.—Common Carrier Application, 106 M.C.C. 785 (790-91).

Protestants are now and for some time have been faced with effective competition from freight forwarders supporting the instant motor carrier applicants and in view of the past history of applicants' service it is plain that protestants will suffer little, if any, detriment as a result of grants of authority so as to permit applicants to continue to provide the same general service they have in the past. It is at least questionable whether the nationwide van lines and their agents could practically handle the volume of traffic which would become available to them were the instant applications denied, particularly during the peak season, in view of the significant tonnage heretofore handled by applicants. In these circumstances, the grant and not the denial of these applications will best serve to preserve the existing competitive balance.—Central Forwarding, Inc., Extension, 107 M.C.C. 706 (716).

Commission found that unfair competition would not result from grant of authority sought herein. No protestant offers service comparable to that proposed by applicant and denial of application would adversely affect public. Applicant has conducted similar operations under color of right since 1961 with no detrimental effect on protestants.—Federal Transfer Co., Inc., Extension—Seattle, Wash., 111 M.C.C. 559 (567)*.

The existing rates of protestants in fact effectively preclude supporting freight forwarder from using protestants' services, and thus constitute an embargo as to freight forwarder's traffic amounting to a service failure by protestants. By such action protestants have demonstrated a willingness to forego this traffic. Application granted—Armellini Express Lines, Inc., Ext.—F.F. Traffic, 113 M.C.C. 603 (614-5)*.

Harrassment of smaller competitor by filing of successive applications is not condoned by Commission. See also, §206(b), n. 15.—United Parcel Service Ext.—Tenn., Ark, and Miss. Points, 117 M.C.C. 621 (626).

A grant of authority to applicant would make available to institutional group members of the traveling public a usable charter service and inject into the market an element of effective competition which is now lacking. Granted. See also §207(a), n. 25 *Existing carriers*.—Western Mass. Bus Lines, Inc., Com. Car. Applic., 118 M.C.C. 74 (84)*.

Exceptions to the Commission's general policy of not granting authority which would result in common control of a motor common carrier and its supporting shipper are made when it is shown that there is no substantial opportunity to engage in discriminatory practices, despite the relationship, e.g., when shippers other than the affiliated shipper support an application in full awareness of the relationship, and when it appears that the importance of the other shippers' traffic is sufficient to overcome a natural tendency to discriminate. The instant application falls properly within such an exception; authority granted. This control situation does not require express approval of the Commission because §5 of the Act requires approval of common control situations involving carriers subject to parts I, II, and III of the Act, but not part IV carriers.—Sullivan Lines, Inc., Extension—Far West, 118 M.C.C. 801 (812-3).

Carriers under common control: [Vol. 14].—See also Cousins, Inc., Common Carrier Application case, §206(b), n. 18.

Although Commission has on occasion deemed it to be in the public interest to deny an application where discrimination might result from a common control relationship between an applicant and a shipper supporting its application, applicant in this proceeding would have no significant opportunity to discriminate if the authority sought is restricted to the transportation of traffic originating at or destined to the facilities of controlling shipper, which has operations only at Chicago. Further, the evidence conclusively establishes a need for service which is not available from existing carriers, and thus to grant the sought authority would not create unfair competition. Authority granted, so restricted.—SES Corporation Common Carrier Application, 117 M.C.C. 93 (98-99)*.

Existing motor carriers: [Vols. 12, 19, 21].—See also Almeida Bus Lines, Inc., Extension, at §207(a), n. 25 *Existing carriers;* and Carolina Freight Carriers Corp. v. United States at §207(a), n. 9.

There is no invariable rule that a certificated carrier "should be given an opportunity to perform before new service is authorized". When authorized carriers have failed to meet transportation needs of their service areas without valid excuse, they should not be allowed to defeat a new application merely by an offer of, or actual, improvement in their service during the hearing thereon, much less after it; any such rule would discourage new applications and condemn the public to continuation of ineffective service which had provoked them. In instant case, however, certificate was issued to defendant bus line, affording very little service that plaintiff (protestant) cannot render, largely because plaintiff offered no proof of the service being provided under authorities granted after the hearings ended but prior to the examiner's recommended report; yet a Commission review board had denied two protestants' timely request for opportunity to submit precisely such proof. The Commission course of action is not consistent with fair procedure or with the spirit of 5 USC §554(c); order vacated and case remanded for further proceedings.—Blue Bird Coach Lines, Inc. v. United States, 328 F. Supp. 1331 (1332, 1336-7, 1338)*.

Although protestants transport parcel shipments within Iowa in connection with interstate traffic from Des Moines, Iowa, to points within that state, need is shown for the proposed service between points in Iowa and points in other states embraced in application which cannot be satisfied by the Iowa carriers. There is no showing by those carriers that they would suffer from any diversion of their present traffic; but applicant is cautioned that its interstate certificate does not give it the right to transport intrastate traffic. Applicant may not convert intrastate traffic into interstate traffic by routing. While one protestant handles small package traffic between points in Kansas City, Mo.—Kansas City, Kans., commercial zones under partial exemption of §203(b)(8) and in adjoining areas of Kansas and Missouri in intrastate commerce, and also provides interline delivery service for interstate shipments arriving by connecting carrier from outside Missouri to points in that state, such service does not permit the expeditious deliveries from points of origin as proposed by applicant. Moreover, it cannot be concluded that protestant is handling any appreciable traffic or that it is capable of meeting demonstrated broad territorial need as would applicant. Mere existence of a carrier rendering a somewhat similar service in a certain area does not preclude a grant of authority to render service on a wide territorial basis where a need therefor has been shown.—United Parcel Service, Inc., Extension—Midwest Territory, 96 M.C.C. 10 (13).

Since protestant carriers have only recently obtained their certificates, the Commission would not be warranted in granting additional operating authority on this record until such time as their services have been utilized and found deficient. Applicant relies heavily on its deluxe equipment in proving need for the proposed charter operations, yet there does not appear to be any public need for the particular features which protestants are not able to provide; the quantum of public support for the application is extremely small in view of the very populous areas proposed to be served; and witnesses have made no genuine attempt to determine the extent of charter service available to them.—American Buslines, Inc., Extension—Long Island, N.Y., 99 M.C.C. 506 (512-13).

While the now invalid 15,000-pound rule did not and was never intended to authorize heavy-haulers to perform driveaway or so-called "towaway" service, protestants' truckaway operations of motor vehicles weighing 15,000 pounds or more are insufficient to warrant restricting applicants against movement of such traffic. In addition, farm carriers, seeking restriction against movement of farm tractors and farm machinery by applicant, have failed to indicate what proportion of their traffic consists of vehicles weighing over 15,000 pounds and, therefore, have failed to show that their operations would be affected by any material degree.—Ashworth Transfer, Inc., Ext.—15,000 lb. Articles, 103 M.C.C. 404 (411-2).

Where protestants are opposing an application for public convenience and necessity not from the standpoint of any immediate competitive effect, but rather upon the possibility that the applicant would be in a better position to either sell its certificated rights or to obtain additional multi-state rights through purchase or application, protestants apprehensions are rather remote, and, in addition, each would have ample opportunity to oppose any sale or request for additional operating rights by applicant.—Imperial Truck Lines, Inc.—Common Carrier Application, 106 M.C.C. 741 (754).

While inauguration of the operations proposed from the facilities of supporting shipper could conceivably divert to applicant tonnage that protestants might otherwise have enjoyed, the Commission concluded that existing carriers should not be insulated from the introduction of a competitive service where the public is shown to require a new and improved service that existing carriers cannot provide.—Saldutti & Son, Inc., Ext.—Inedible Fish Oils, 118 M.C.C. 58 (64)*.

Express: [Vols. 11-13, 19, 21].—Because the Railway Express Agency is affiliated with railroads within the meaning of §5(2)(b), special circumstances must be shown to exist in order to obtain certificated authority wholly disassociated with rail operations, i.e., operations unhampered by rail-haul restriction. Found, that the opposing carrier herein has not been shown to be providing a service comparable to the bona fide express service here proposed, which fact constitutes special circumstances warranting grant of express authority.—Railway Exp. Agency, Inc., Extension, 96 M.C.C. 727 (730).

Monopoly: [Vols. 12, 13, 16].—See also P.C. White Truck Lines, Inc., Extension, n. 25 *monopoly* below.

The mere existence of a monopoly, standing alone, is not sufficient justification for the establishment of a new operation in the absence of a showing of some inferiority or inadequacy in the transportation service of the existing carriers.—D&M Taxi Co., Inc., Extension—More Passengers, 115 M.C.C. 294 (297).

Motor-carrier membership systems: [Vols. 11, 12].—Major obstacle to issuance of passenger authority sought between Lincoln and Grand Island, Nebr., is that for many years applicant, a member of Greyhound System, and protesting bus line, a member of National Trailways System, have successfully competed for traffic between Lincoln and points east thereof over direct routes. Protestant now operates four round-trip and one one-way schedules between considered termini, and some diversion of its traffic between Lincoln and western points, via Grand Island, will probably occur; however, applicant does not propose to serve intermediate points along proposed route, and record is convincing that amount of traffic diverted would be insignificant in comparison with protestant's total number of passengers. Moreover, Lincoln is a growing commercial center beginning to compete with Omaha, Nebr., and is entitled to a similar quantum of bus service to and from Grand Island; benefits from proposed service more than offset any resulting disadvantages to protestant granted.—Greyhound Corp. Extension, 96 M.C.C. 630 (633-6).

Railroads: [Vols. 11, 12, 19, 21].—Railroads; contention that a grant of authority to transport containerized general commodity freight from west coast ports to points in the United States would result in diversion of traffic is without merit. A grant of authority would not result in a substantial diversion from the railroads but rather a diversion from other motor carriers not offering containerized services. It is the policy of the Commission to promote containerization and, therefore the application was granted, but restricted to the transportation of traffic having a prior or subsequent movement by water.—IML Freight, Inc., Ext.—Containerized Freight, 118 M.C.C. 31 (33).

9. Jurisdiction of the Commission.—[Vols. 10-12, 14, 15, 17-19, 21].—See also Burham Van Service, Inc., Extension—Hawaii, at §208, n. 30; Connecticut Limousine Service, Inc. v. United States, at §207(a), n. 25; Garrett Freight Lines, Inc. v. United States, at §212(a), n. 30; Greenstein Trucking Co. v. United States, at §212(a), n. 30; Midwest Emery Freight System, Inc. v. United States, at §207(a), n. 25; Removal of Truckload Lot Restrictions, at §208(a), n. 2; Towne Services Household Good Transp. Co. v. United States, at §207(a), n. 25 *Household goods;* and Truck Transport, Inc., v. United States, at §207(a), n. 25.

The Commission has the power to grant broader authority than that sought in an application, and such broader authority has been granted in instances where it was limited in scope and proposed restrictions as to service or equipment would be objectionable, unnecessary, or difficult to police. However, practice of granting broader authority than requested should not be extended beyond such limited instances to case where removal of restrictions contained in defendant carrier's extension application, as amended, and accepted by the examiner (without giving any further notice), together with permitted tacking of the new authority with other rights held by applicant, constitutes a grant not contemplated by the application which could adversely and materially affect operations of other authorized carriers. Order and certificate as granted should be republished in Federal Register, with opportunity given to plaintiffs and other interested parties to offer eivdence and be heard; then the Commission will re-examine the evidence and arguments and determine whether its certificate and order should stand or be set aside.—Georgia-Florida-Alabama Transp. Co. v. United States, 290 F. Supp. 764 (766-9)*.

There is no apparent reason why the Commission could not require performance reports from a carrier under its general powers, nor why it does not have sufficient power to police performance under the requirements in order granting a certificate that the holder render reasonably continuous and adequate service. Plaintiffs argue that, in granting certificate to defendant carrier, the Commission should have required advance demonstration of its capacity to perform and should have ordered performance reports as a condition on exercising the rights granted; however, performance reports have never been required until recent months. Moreover, when the Commission conditioned certificate granted in 106 MCC 692 on the filing of annual performance reports, that was apparently an experimental move, not required by statute though commendable if the Commission judged it to be advisable. Since record shows that applicant has the capacity and intends to provide the improved service needed, the Commission's order is sustained.—Carolina Freight Carriers Corp. v. United States, 297 F. Supp. 848 (852)*.

Generally, absent a competing carrier, the Commission may authorize new service shown to be needed and, where there is service, it may even authorize competition in order to compel adequate service; however, in light of the national transportation policy, its powers over competition are not all-inclusive. Thus, when applicant (intervenor) sought authority restricted against transfer of lading between tank vehicles, but the Commission omitted the restriction (because difficult to enforce and administratively undesirable) and granted authority which permits the same service as that offered by plaintiff (protestant), the certificate does not authorize an "improved" or a "new and unique" service and it cannot be approved without a finding based on substantial evidence that existing service is inadequate; no such finding was made and the facts of record would not support such a finding. And since resulting competitive situation is due to the omission of requested restriction in certificate granted, the case is remanded so that the Commission may either (a) correct the certificate, or (2) conduct hearings to develop facts supporting a finding as to adequacy of existing service.—Drum Transport, Inc. v. United States, 298 F. Supp. 667 (670, 672-3)*.

In view of the Commission's statutory authority and its discretion in determination of public convenience and necessity, the theory advanced by plaintiffs in suit to set aside order denying bus line's extension application that, having found some public convenience, the Commission was bound to consider whether approval of the application would unduly prejudice intervening defendant (protestant), while appealing, is beyond the reach of the court's circumscribed competence. The proposition is appealing because an applicant (plaintiff) which appears to meet operational and financial standards proposes to offer increased service to the public over public highways, and there is no substantial indication of harm to existing carrier; however, were such proposition to be accepted, the Commission would be obligated to grant authority to responsible operators whenever any added service was proposed—even if it convenienced only one or two persons. Such minuscule accommodation would not rise to the magnitude of "public convenience and necessity", moreover, plaintiffs' authorities do not really support their proposition. Complaint dismissed.—Town of Montague v. United States, 306 F. Supp. 1227 (1229)*.

It is not the Commission's "unvariable rule" that, where need for additional service is found, existing carriers must be afforded an opportunity to transport all traffic they can handle adequately and efficiently before a new competitive operation is authorized. The Supreme Court held, in 398 US 409, that the Commission's power is not so circumscribed; and that no such limitation has been established by the Commission's decisions or by judicial determination. The public interest in maintaining the health and stability of existing carriers should be considered; however, on the basis of appropriate findings, the Commission may authorize a new operation even though existing carriers might arrange to provide the proposed service. The record amply supports the Commission's conclusion that existing carriers, including two recently authorized, cannot meet the Florida Peninsula's need for better service; therefore, its order granting defendant carrier (applicant) authority to provide needed single-line service should be sustained. Complaint dismissed.—Carolina Freight Carriers Corp. v. United States, 323 F. Supp. 1290 (1295, 1297)*.

In its action to set aside Commission orders granting authority to the three defendant carriers, plaintiff (protestant in Commission proceedings) failed to show that it has a right to be absolutely free from competition in order to be afforded the opportunity to meet the "performance report" requirements which the Commission attached as a condition to the granting of plaintiff's opposing authority. As the Supreme Court stated, in 389 US 409, the Commission's power is not so circumscribed; no such limitation has been established by Commission decisions or by judicial determinations; and, while public interest in maintaining the health and stability of existing carriers should be considered, the Commission may, on appropriate findings, authorize a certificate even though existing carriers might arrange to furnish successfully the proposed service. The challenged commission orders appear reasonable and well founded; sustained. —Curtis, Inc. v. United States, 327 F. Supp. 291 (293-4)*.

If Commission order granting a certificate shows a reasonable relation to provisions of the statute within its administrative responsibility and is supported by substantial evidence, the reviewing court must affirm. However, though charges against the applicant were accepted as true by the review board, it was the Commission's statutory duty to refer application for authority to operate in two States to a joint board for determination where there were bona fide factual issues as to fitness and need for proposed service; therefore, in absence of such referral, considered order of the Commission granting the certificate must be annulled by the court on review.—Land-Air Delivery, Inc. v. United States, 327 F. Supp. 808 (809-10, 811)*.

Congress delegated to the Commission the power to find the facts, and make the reasonable judgments, involved in determining whether or not a certificate of public convenience and necessity should be issued; and, in exercise of its administrative authority and discretion, the Commission not only may issue standards for determining public convenience and necessity but may alter its policies and standards when, in its judgment, the necessity arises. Thus, the Commission has broad discretionary power in application cases to determine from its analysis of the total situation on which side the public interest lies; also, a reviewing court may not substitute its judgment for that of the Commission on factual matters or on mixed questions of fact and law as may have been committed by law to its discretion. Upon review, record in plaintiff's application case shows that the Commission applied the correct rule of law and, also, that denial of the application because no public need was shown for plaintiff's service was not arbitrary or capricious; Commission order sustained.—Feature Film Service, Inc. v. United States, 349 F. Supp. 191 (202)*.

To the extent that motor carrier services are performed on land appropriate operating authority from this Commission is required as well as compliance with other provisions of the Act, although there is a possibility that ferry transportation of motor carriers may be subject to the Shipping Act, 1916, and therefore to the jurisdiction of the Federal Maritime Commission. And in the event such terminal motor carriers establish through routes or joint rates with carriers subject to the Shipping Act, such routes and rates are subject to regulation by this Commission under §216(c), as amended.—

Lindstrom Extension, 98 M.C.C. 647 (652-654).

While in an application proceeding under §207 of the Act a finding must be made concerning applicant's fitness and to that extent possible unlawful operations are pertinent, and while it is also proper for the Commission or any hearing officer to take notice of any unlawful or improper practice duly established in the course of such a proceeding and to deliver an appropriate admonition, the entry of a cease and desist order is inappropriate. Under §204(c) the entry of a cease and desist order requires "notice and hearing" which applicant did not receive in this proceeding; and therefore, §9(a) of the Administrative Procedure Act renders the recommended entry of a cease and desist order ineffective and a nullity. —Frozen Food Exp. Extension, 100 M.C.C. 369 (371-2).

Section 207 of the Act empowers the Commission, in applying the statutory standards of public convenience and necessity, to authorize part or all of the requested operations which, when authorized, must be performed according to its "Requirements, rules, and regulations." The initial problem in framing motor carrier operating rights is how best to describe the reasonable transportation requirements revealed by the evidence of record in any given proceeding, and at the same time protect existing carriers from unwarranted incursions into their authorized fields of service. Thus, the Commission is not, and cannot be, bound by restrictions agreed to by the parties which achieve results inconsistent with public interest and inimical to practicable and effective regulation.—Fox-Smythe Transp. Co. Extension—Oklahoma, 106 M.C.C. 1 (6-8).

Protestant's motion to dismiss that portion of the application covering charter operations beginning and ending at a point in the Washington Metropolitan District and extending to another point in the said District for lack of jurisdiction was properly granted, since the Washington Metropolitan Area Transit Commission has exclusive jurisdiction coextensive with the Washington Metropolitan Area Transit District for the "regulation and improvement of transit" . . . except as otherwise specified in the compact which created the WMATC. An examination of that compact with respect to the granting of certificates of public convenience and necessity discloses no exception that would permit jurisdiction to remain with this Commission, or that would permit this Commission to entertain concurrent jurisdiction relating to such matters with the WMATC. Accordingly, any authority granted applicant herein will be restricted against the transportation of charter parties beginning and ending at a point in the Washington Metropolitan Area Transit District and extending to another point in the District. —Harry Lee Eyre, Jr.—Extension, 106 M.C.C. 851 (855-56).

Although Department of Transportation Act, 49 USC 1655(e)(4), transferred powers to promulgate and enforce safety regulations applicable to interstate motor carriers to that Department, this Commission retained power to issue new authority or attach conditions to existing operating rights. Jurisdiction over these retained powers must conform to our adjudicative responsibilities under the Interstate Commerce Act and the mandate of the national transportation policy to promote "safe, adequate, economical, and efficient service . . ."—Regulations Governing Hazardous Materials, 111 M.C.C. 575 (585-8).

10. Violation of act.—[Vols. 10-16, 18, 19, 21].—See also LaBar's, Inc., and St. Johnsbury Trucking Co. v. United States, at §207(a), n. 25 *Fitness;* and Schenck Tours, Inc., Extension, at §207(a), n. 25, *Past operations.*

On reconsideration, respondent's transportation of 22 representative shipments, moved on one truck on one day, from one consignor (who requested service and paid the costs) at one origin on one bill of lading, found not to violate "truckload lots" restriction in its certificate. Each bill of lading named one consignee at final destination, but called for from 1 to 3 "stop-offs" at separate points and at destination; t.l. rates applied on each shipment with an extra charge for each stop for partial unloading, in accord with lawfully published tariffs. Each such shipment is clearly "in truckload lots" within rationale of 51 MCC 25 in that one bill of lading covered the entire shipment, subject to provisions allowing multiple deliveries en route, each was from a single consignor, and each had the exclusive capacity and use of at least one truck. In view of such indicia, those operations were lawfully performed; and, as record shows that movement of a few shipments together under separate bills of lading was due to inadvertent error, respondent's unlawful l.t.l. transportation cannot be considered a willful violation of the Act.—Southwest Freight Lines Ext.—Removal of Restriction, 98 M.C.C. 607 (610-11)*.

Good faith in conducting unauthorized operations together with a cessation of such operations when they were determined to be unlawful, indicated that applicant is willing to comport in the future with applicable regulations.—Holt Motor Exp., Inc.—Staten Island, N.Y., 113 M.C.C. 478 (483).

Applicant's violative conduct held to be ameliorated by subsequent remedial program, and provisional extension of authority granted on basis of need.—S.T.L. Transport, Inc., Extension—New York Points, 115 M.C.C. 14 (23).

Applicant's "frequent and flagrant" violation of the Act resulted in denial of its application.—Metler Hauling & Rigging Ext.—Loudoun County, Tenn., 117 M.C.C. 557 (558).

11. Status of applicant.—[Vols. 10-13, 15, 16, 18, 19, 21].—See also Fanshaw Extension and International Automobile Delivery, Inc., both at §206(b), n. 18; and National Trailer Convoy, Inc., Extension, at §207(a), n. 25 *Fitness.*

Authority held by applicant's affiliate need not be modified as a condition precedent to a grant to applicant, as that carrier's operations differ substantially from those proposed. However, if the common control of applicant and its affiliate is subject to provisions of §5(2) by virtue of their operating over 20 vehicles in interstate commerce, a grant of authority cannot be made prior to approval of such control. [See 38 MCC 547.] As applicability of §5(2) cannot be determined on the present record, grant is conditioned on applicant's either obtaining such approval if needed or, if it is not, informing the Commission by affidavit that it and any affiliated carriers operate less than 20 vehicles collectively.—White Air Freight Service, 95 M.C.C. 616 (623).

Since if common carrier authority sought is granted, applicant's major stockholder, who is also principal owner of a contract carrier, will control both a common carrier and a contract carrier holding authority from the Commission, such common control must be approved; therefore, authority is granted subject to the filing of an appropriate application under §5 of the act and subsequent Commission approval thereof.—LaBar's, Inc., 95 M.C.C. 773 (775).

It is well settled that any corporate status will not preclude the Commission from considering all pertinent operations. [Citing 86 MCC 369]. Since about 4 years prior to obtaining its present charter authority, applicant, its sole stockholder, and latter's "travel club" have conducted some form of unlawful operations, mainly providing interstate passenger tours under individual ticket arrangements. While the stockholder's relationships with the club (now incorporated) have diminished, record is not convincing that the organization is an independent travel club which only charters buses for its members. Until it obtains a status equal to that of any other similar club, and considering past events, it must be considered (1) as a device used by applicant or its representatives to obtain tour passengers, or (2) as an unlicensed broker.—S & S Bus Service, Inc., 95 M.C.C. 796 (798, note, 802)*.

Applicant's conduct of both regulated transportation in special and charter operations and exempt taxicab service will not be contrary to public interest. Numerous authorized carriers conduct, in addition to their certificated operations, such exempt activities as carriage of unprocessed agricultural commodities and transportation between points in the same commercial zone.—D & M Taxi Co., Inc., 96 M.C.C. 439 (447).

Inasmuch as the State of Alaska does not transport freight under the normal carrier-shipper relation, and, except for the distances involved, operates in exactly the same manner as an ordinary ferry, the services performed by applicants at places served by the State Ferry System cannot be considered as being performed "for" the State Ferry System. Therefore, the proposed operations in interstate or foreign commerce by applicant motor carriers between the points in question, some of which can only be reached by water, are those of motor common carriers subject to part II of the Act.—Lindstrom Extension, 98 M.C.C. 647 (652-653); Alaska Motor Coaches, Inc., Extension, 98 M.C.C. 642 (644).

24. Proceedings remanded.—[Vols. 11, 13-19, 21].—See also Georgia-Florida-Alabama Transp. Co. v. United States, at §207(a), n. 9; and Ray Price, Inc. v. United States, at §206(a)(6)(7), n. 2.

Had the Commission fully explained basis of its conclusion that plaintiff's certificate was "patently ambiguous" and why it resorted to matters behind the certificate, rather than relying solely on language therein, the court would not question its interpretation of the description of the base territory authorized. However, record reveals no reasons to support Commission decision to ignore its well-established rule that a certificate must speak for itself and that, absent a patent ambiguity, extraneous matters will not be considered in construing authority, or to explain why it considered record in the original proceeding in determining ambiguity of the certificate on its face. Under that rule, the prior record was not available; therefore, no other guides being available, ordinary rules of grammar and punctuation entailed in "Doctrine of the Last Antecedent" were proper, pertinent, and logical aids which should have been applied in initial determination that disputed restriction "within 100 miles of Columbus Circle" was patently ambiguous. Remanded for further Commission proceedings consistent with the court's opinion.—T.I. McCormack Trucking Co. v. United States, 251 F. Supp. 526 (529-31, 533-6, 540-1)*.

In action to set aside Commission order granting plaintiff (applicant for authority to transport frozen foods and potato products) authority to transport only frozen fruits, berries, and vegetables and potato products, the Commission's finding that commodity description in the certificate should be so limited is not based on adequate subsidiary findings and its ultimate conclusion is not supported by substantial evidence. Though recognizing evidentiary factors that would support finding that a broader commodity description, such as "frozen foods," was required, the Commission made no such finding; nor did it make findings to support its grant of the lesser commodity description. No evidence supported its "scheme" (which included only potato products and frozen fruits, berries, and vegetables) for determining commodity description in authority granted; and no consideration was given to the copious evidence as to the need for authority to transport frozen foods other than those named. Order set aside and case remanded for further proceedings consistent with the court's opinion.—Dunkley Refrigerated Transport, Inc. v. United States, 253 F. Supp. 891 (894-6)*.

In action to set aside order granting interstate certificate, the Commission's report and order do not set out how or in what way two services offered by applicant—in addition to over-the-road movement of mobile homes—support its findings that (1) applicant was "fit, willing, and able" to provide proposed service and (2) complete service proposed was "required by" public convenience and necessity; thus, rationale of its conclusion that applicant met those requirements is not clear. In order to be sustained, the agency's reasoning must be sufficiently clear so that the reviewing court need not guess as to rationale thereof; furthermore, the court must be sufficiently informed of the Commission's reasoning to enable it to exercise the scope of review entrusted to it by statute. Therefore, order under review is set aside and the case remanded for further Commission action in accordance with the court's opinion.—National Trailer Convoy, Inc. v. United States, 293 F. Supp. 634 (637)*.

Plaintiffs (protestants in application proceeding) were denied procedural due process when, after publication of, and hearing on, the application (including proposed restrictions) as filed, the Commission deleted the multiple pickup and delivery restrictions originally sought by applicant and substituted a "mixed load" restriction of its own, without any further notice or hearing. The Commission's action is not held to be wrong; however, at some point in the proceeding plaintiffs should have been given an opportunity to urge that it was wrong and to show, if they could, the pernicious consequences they now claim. Upon a full hearing, the Commission may conclude that its determination was correct, but plaintiffs are entitled to a chance to show the gravity of the substitution at a hearing; that opportunity has been arbitrarily denied. Therefore, the matter must be remanded for further consideration by the Commission.—Refrigerated Transport Co., Inc. v. United States, 297 F. Supp. 5 (6-7, 9)*.

Two other facets of the controversy, developed at the court hearing, may be of help and could satisfy the demands of all concerned. Plaintiffs state that if the Commission would (1) define the phrase "mixed loads" as used in the certificate issued to intervenor, and (2) require him to operate within such definition, their objections might well disappear; those questions are commended to the Commission. In any event, the order and certificate as granted should be republished in the Federal Register, with plaintiffs given an opportunity to offer evidence and to be heard; the Commission will then re-examine the evidence and arguments and determine whether its action and order should stand or be set aside. So ordered.—Id., pp. 8-9..

While new authority may be granted for a proposed service that would be a "substantial improvement" over existing service or constitute a "new and unique service not presently available" to shippers, those are proper standards for granting a certificate if the application thereof is supported by proper findings based on sufficient evidence and if actual certificate granted is not inconsistent with the Commission's findings. However, the "new and unique service" standard is not applicable where, though applicant (intervenor) sought authority restricted against transfer of lading between vehicles, the Commission omitted the restriction (because difficult to enforce and administratively undesirable) and, without finding present service inadequate, granted authority that would permit intervenor to offer the same service which plaintiff provides. Grant of considered new certificate, with requested restriction removed, cannot stand without a finding supported by substantial evidence that existing service is inadequate; no such finding was made and record does not set forth facts that would support such a finding. Case remanded to the Commission for action consistent with the court's opinion.—Drum Transport, Inc. v. United States, 298 F. Supp. 667 (669, 670-3)*.

In Hawaiian carriers' appeal from Commission order in proceeding on 28 applications for household goods authority between points in Hawaii and those in mainland United States, insofar as it granted authority to 19 mainland carriers, scope of judicial review is limited; however, the Commission has a duty to set forth facts from which its findings and conclusions can follow rationally and to apply the relevant law thereto. Findings of the Commission show that mainland applicants expected to continue their same operating methods, whether granted authority or not; nothing therein indicates that shippers using the "motorvan-seavan" and "through container" arrangements for land-sea-land movement of the traffic from origin to destination were receiving a substandard type of service; that the shipping public would be given any different interline service if mainland carriers were not granted authority; or that those carriers would be adversely affected by denial of their applications.—HC&D Moving & Storage Co., Inc. v. United States, 298 F. Supp. 746 (747-9)*.

Moreover, there is no showing of either need for additional service in the Hawaii end of considered traffic, or that existing service would be improved by additional physical services in that State which wholesale certification of the mainland carriers would make possible. In light of the relevant law, therefore, the Commission's findings are not sufficient to support its conclusion that the Hawaiian situation was "unique" —in that mainland applicants had solicited Hawaiian household goods business for years and had individually handled mainland end of such traffic; and that tenuous "unique factor" is insufficient for its disregard of the well-established legal principle that two carriers cannot each rely on the same physical operations as support for a grant of authority based solely on past operations. Since the court will not substitute its judgment for the factual expertise of the Commission, the case is remanded for such further proceedings (including further evidence if necessary) as the Commission deems necessary for its subsequent decision and order, in light of the court's ruling.—Id., pp. 750-2.

Certificate granted defendant-intervenor authorizing it to transport "passengers and their baggage, in round trip special operations, limited to not more than nine passengers in any one vehicle" between points in designated areas, over irregular routes, fails to specifically describe the authorized special operation for which public need and convenience was found. The record amply showed that considered operation is unique, but it is no answer to the lack of specificity to say that evidence of record restricts the authority granted. The Commission has sufficient expertise and artistry to frame the certificate in such terms and language as not to deprive the special operation of its unique nature and flexible characteristics; also, while it has a rulemaking program regarding special operation certificates now in process, that administrative problem cannot justify a certificate that might allow non-unique operations for which no need was shown. Remanded to Commission for imposition of appropriate restrictions; and in drafting the final certificate, the guidelines, as set forth in 28 MCC 91, have been established by the Commission itself.—Hudson Transit Lines, Inc. v. United States, 314 F. Supp. 197 (203-4)*.

Inasmuch as the Commission inadvertently overlooked consideration of a former Commission regulation bearing directly on the rolling of certain explosives (i.e., prohibits rolling packages or containers of explosives, except barrels or kegs) during the time involved in the consolidated case before the court, the cause must be remanded so that the Commission may reconsider its findings and opinion in the light of that regulation and its bearing, if any, on the matters involved. Additionally, the Commission may find it desirable to take additional evidence or make a further record concerning several factual matters which counsel have raised on appeal to the court, Case remanded to the Commission for rehearing and reconsideration.—International Transport, Inc. v. United States, 318 F. Supp. 763 (764-5)*.

Where plaintiff bus lines (protestants in the Commission proceeding) had applied for extension authority before learning of intervening defendant's similar application, and the applications were approved after close of hearings on defendant's application but before recommended report was filed; and where defendant bus line appeared in plaintiff's application proceeding but failed to urge that new authorization be withheld until its own application had been decided, the Commission abused its discretion by refusing to accord plaintiff bus lines a fair opportunity to present evidence concerning service rendered under the new authorities and which could not effectively have been submitted during hearings on defendant carrier's application. And because of abuse of its administrative discretion, the court remands for further consideration on a reopened record. The Commission's order granting intervenor's certificate vacated; cause remanded for prompt further proceedings consistent with the court's opinion. —Blue Bird Coach Lines, Inc. v. United States, 328 F. Supp. 1331 (1332, 1337-8)*.

Operation; Extension

25. Necessity, demand, for service, in general.—[Vols. 10-19. 21].—See also American Buslines, Inc., Extension, at §208(c), n. 4; Caravelle Express, Inc. v. United States, at 5 USC *Judicial review;* Exley Exp., Inc., Extension, at §207(a), n. 30; Feature Film Service, Inc. v. United States, at §207(a), n. 9; Iowa Beef Packers, Inc. v. United States, at 5 USC *Judicial review;* Key Trans-port Service, Inc., at §203(b), n. 40; and Traf. At or Near U.S.—Can. Boundary Lines, at §204(a)(6), n. 2.

The Commission is vested with broad discretion in determining whether public convenience and necessity will be served by a grant of authority and, unless it acts arbitrarily or capriciously in establishing and administering criteria to that end, it will not be reversed upon review. Moreover, in action to set aside the Commission's denial of plaintiff's application, it is not the court's function to make factual findings, though it might have reached other conclusions from the same record. The Commission's findings and order are supported by substantial evidence on the record; sustained.—Neptune World-Wide Moving, Inc. v. United States, 284 F. Supp. 135 (138)*.

In action alleging invalidity of Commission order granting special and charter-party passenger authority to intervenor, criteria by which the Commission chose to make determinations of convenience and necessity are not subject to review by the court. The statute does not expressly delineate factors to support such a determination; thus, Congress has entrusted the Commission with wide discretionary authority to draw its conclusions from the varied circumstances that may occur in specific instances. Courts have held that the fact that there is no finding of inadequacy of existing service, or that existing service would not be injured, does not invalidate a Commission order; and, as most recently stated in 389 US 409, a specific finding of inadequacy of existing service is not a prerequisite to a grant of authority. However, record in instant case shows that deficiencies existed in plaintiff's service and that the authority granted was limited to preclude undue encroachment upon services of existing carriers in the destination area; sustained.—Greyhound Lines, Inc. v. United States, 285 F. Supp. 318 (321-2)*.

Congress entrusted to the Commission, not to a reviewing court on a *de novo* consideration, a sound discretion in the exercise of a specialized knowledge in the field of interstate transportation. In order to properly determine the existence of public need or necessity for a grant of authority, the Commission must consider, weigh and balance against each other, and decide numerous complex and complicated quesitons; one element to be considered is the adequacy of existing carriers' service, but the Commission may find that additional service is needed in a particular area without specifically finding that existing service is inadequate. Under facts and circumstances of record, the Commission's judgment (following remand), that need existed for additional service authorized by the certificate in issue, cannot be found arbitrary, capricious, an abuse of discretion or otherwise unlawful, or not supported by substantial evidence. Accordingly, plaintiffs' motion for summary judgment is without merit; defendants' motion to dismiss pursuant to reversal and remand by the Supreme Court, 389 US 409, sustained.—Dixie Highway Exp., Inc. v. United States, 287 F. Supp. 473 (474-5)*.

In suit to set aside grant of operating authority between Mobile, Ala., and Pensacola, Fla., to defendant carrier, the Commission erred in failing to apply the same standard for determining need to all points where joint line service of plaintiff and intervening plaintiff, Bay Line, is available. The Commission found that GFA-Bay Line were rendering timely and efficient joint line service between Mobile and Panama City, Fla., by interlining at Dothan, Ala., and authority granted was restricted against "traffic moving solely between" those points. However, it failed to restrict the certificate similarly to other Bay Line points which the record shows have the same efficient joint line service of GFA-Bay Line available; moreover, there was no finding of any material inadequacy of service available between Mobile and those points. Order and certificate as granted should be republished in Federal Register with opportunity to plaintiffs and others interested to offer evidence and be heard; the Commission will then re-examine the evidence and arguments. —Georgia-Florida-Alabama Transp. Co. v. United States, 290 F. Supp. 764 (768-9)*.

In action to set aside Commission report and order denying plaintiff's application for common carrier authority because it failed to establish that existing service was inadequate, the Commission did not use an improper standard in requiring applicant (plaintiff) to make such a showing. Plaintiff's reliance on the decision in 389 US 409 as supporting its assertion that it need only show that its proposed service would be unique or superior to that presently available, not that existing service is inadequate, is misplaced; grant of additional authority in the cited proceeding was premised on a Commission finding of inadequacy of existing service. There is substantial evidence of record to support the Commission's conclusion that since applicant failed to demonstrate that existing service was inadequate, no need was shown for its proposed operation; sustained.—V. Van Dyke Trucking, Inc. v. United States, 291 F. Supp. 97 (98)*.

In action to set aside Commission order granting intervening defendant carrier a certificate authorizing single-line transportation of meats and packinghouse products from Chicago to certain eastern States, scope of the court's review is limited to determining only whether the Commission's findings are supported by substantial evidence on the record, as a whole, and whether its conclusion as to public convenience and necessity has a rational basis in the facts found. Criteria by which the agency makes a determination of public convenience and necessity are not subject to review; and the statute expresses no delineation of factors to support such a determination. Congress has entrusted the Commission with wide discretionary authority to draw its conclusion on that matter from the variety of circumstances which may be present in specific instances.—Midwest Emery Freight System, Inc. v. United States, 293 F. Supp. 403 (405)*.

Commission finding that applicant (defendant carrier) was not a new competitive factor in the area, since it had handled considered traffic in joint-line service for several years, is supported by substantial evidence; and, in circumstances presented, its past performance is a relevant consideration to grant of the certificate sought. Further, no specific finding of inadequacy of existing service is necessary in order to find need for additional service in a particular area. In addition, the Commission's conclusion that any restriction of the authority granted would preclude applicant from continuing service it had performed for years, and would adversely affect shipper and interlining carrier making use thereof, finds substantial basis in the evidence. The decision made, and procedures followed, by the Commission are consistent with applicable law, and its findings and conclusions are supported by substantial evidence on the record as a whole; sustained.—Id., pp. 405-6, 408.

In action to set aside the Commission's grant of authority to three carriers to transport meats and packinghouse products from Colorado origins to points in several states, the reviewing court may not disturb the Commission's findings as to whether or not public convenience and necessity justify issuance of a certificate if they are supported by substantial evidence in the record, even though record may also contain substantial evidence supporting (or the court might reach) a contrary conclusion. Conclusions of the Commission (1) that, in light of expansion and extension of supporting meat shippers' business, potential traffic in origin area was real and not ephemeral and (2) that public convenience and necessity required the various services proposed by applicants, some of which existing carriers (plaintiffs) could not provide, are supported by specific findings; and since those findings and conclusions are supported by substantial evidence, the Commission's orders are sustained.—Midwest Emery Freight System, Inc. v. United States, 295 F. Supp. 112 (117-9)*.

In suit to set aside the Commission's grant of certificate to intervening defendant authorizing regular-route motor bus passenger service over approximately same routes as existing limousine service of plaintiff (protestant), the lower fare bus competition will undoubtedly cause plaintiff to lose some potential passengers; however, the question of whether the two services can exist, side by side, filling successfully a wider public need than either alone is for the Commission's judgment. Accordingly, since evidence of need for bus service was sufficient and the Commission's weighing of probable effects of competition and deciding the two services could so exist was well within its competence, its grant of considered authority (as interpreted by the court) is justified on the record. Action of the Commission was not without substantial evidence on the record as a whole, or in disregard of statutory mandates; complaint dismissed.—Connecticut Limousine Service, Inc. v. United States, 295 F. Supp. 1335 (1336-8)*.

In action challenging the Commission's grant to defendant carrier of authority to transport general commodities between Birmingham, Ala., and Houston, Tex., but only insofar as intermediate-point service is authorized at Beaumont, Tex., the reviewing court may not substitute its judgment for that of the Commission on far reaching technical questions which it was created and empowered to decide. The record amply supports Commission determination that there was need for improved service between the Southeast and Texas, contains abundant evidence of need for motor carrier service to and from Beaumont and, also, supports the Commission's conclusion that existing carriers would not be adversely affected by the applicant's proposed service. The deference which is due the Commission's expertise in matters of interstate commerce is justified, not impugned, by the record; therefore, since its action was within its statutory authority, is based on adequate findings, and is supported by substantial evidence, the Commission's order is sustained.—Herrin Transportation Co. v. United States, 297 F. Supp. 529 (530, 531-2)*.

Though plaintiffs (protestants in Commission proceeding in which defendant carrier was granted authority to transport general commodities between Charlotte, N.C. and Florida) hold authority to transport some but not all freight from Charlotte to some but not all points in Florida, none of them provide complete service to North Carolina shippers. Applicant's proposed regular pick-up at Charlotte, prompt transport to Florida, and prompt delivery to outlying Florida points would materially improve present service and, also, supply service not now being rendered. Viewing the record as a whole, evidence abundantly supports Commission findings that existing service is unsatisfactory and inadequate and that public convenience and necessity justify and require the additional service authorized. And while there may be doubt that applicant could carry out its "hearing room promises" as to proposed service, evidence supports Commission decision that it should be given the opportunity. Record shows that applicant has the capacity and intends to perform a service which will be in the public interest; grant of authority sustained.—Carolina Freight Carriers Corp. v. United States, 297 F. Supp. 848 (850-2)*.

Whether or not a given proposed operation could prosper and provide a viable service is a matter particularly within the Commission's expertise; and it properly concluded that proposed service would not meet the supposed need when plaintiff (applicant) offered no positive evidence that its own service would be any more adequate than that provided by protesting carrier. In denying plaintiff's application, the Commission clearly used its old and well established criteria, i.e., whether the new operation will serve a useful public purpose, responsive to a public demand or need; whether that purpose can be served as well by existing carriers; and whether it can be served by applicant without endangering or impairing operations of existing carriers contrary to the public interest. However, had it departed from its basic criteria and precedents, as plaintiff asserts, or had it changed them, that would not be a basis for annulling considered order. Commission decision that, in view of existing service and of the shapeless nature of the proposal, no need was shown for proposed service is in accord with the law and supported by substantial evidence on the whole record; complaint dismissed.—Jerry Lipps, Inc. v. Interstate Commerce Commission, 299 F. Supp. 942 (945-6)*.

Congress specifically provided that the Commission can, and must in some cases, make a determination of need for proposed service on the basis of what will be required in the future. Such a decision is particularly within the Commission's expertise and, indeed, in instances where future transportation needs are unclear, grant of additional authority in order to clarify the situation and provide an assured transport base is both within the Commission's power and in furtherance of the national transportation policy. Commission decision complained of, that public convenience and necessity required grant of authority sought, was based on (1) future need in the area and (2) the competitive situation; and the evidence and legitimate inferences drawn therefrom, it being the Commission's province to draw such inferences, support its findings and conclusions that the grant was warranted. The decision is rational, in accordance with the law, and based on adequate findings supported by substantial evidence on the whole record; complaint dismissed.—Truck Transport, Incorporated v. United States, 300 F. Supp. 159 (161-2)*.

In suit to set aside the Commission's grant of common carrier authority to serve various points in southern Mississippi, including the Gulf coast, the court's sole function is to determine whether the Commission order is supported by substantial evidence and is in accord with the applicable law. The Commission is given wide latitude, in granting certificates, to determine what constitutes public convenience and necessity; the reviewing court cannot make such a determination anew, but decides if the agency observed legal requirements and whether its conclusions as to convenience and necessity had a rational basis in the facts found which are supported by substantial evidence of record. Evidence amply supports findings of fact that (1) shippers were familiar with, and had tried, available service, (2) available services were inadequate in terms of transit time, claims and reliability, and (3) proposed service would improve conditions and eliminate inadequacies. Considering the entire record, Commission decision and order is not arbitrary or capricious, is supported by the evidence, and is in accord with applicable law; sustained.—West Brothers, Inc. v. United States, 303 F. Supp. 1171 (1172-4)*.

In carriers' suit to set aside issuance of a certificate to another carrier, fact that the Commission considered specialized service and equipment available from the applicant does not show that it used contract-carrier standards in determining need for common-carrier service. In establishing the inadequacy of existing service, an important element in determination of public convenience and necessity, the Commission properly looked at whether plaintiffs' (protestants) equipment was satisfactory for shippers' needs. Applicant's equipment was neither more highly specialized than that available to protestants, nor specifically tailored for individualized needs of shippers, and the other carriers also used sophisticated equipment in attempting to meet shipper needs; however, mere availability of sophisticated equipment cannot keep a carrier from receiving a certificate. Also, the Commission noted that existing carriers had not supplied either adequate service or standard equipment on numerous occasions; and equally important, services of the applicant under temporary authority could be, and to some extent were, performed by common carriers. Commission order sustained.—Superior Trucking Co. v. United States, 306 F. Supp. 872 (876-7)*.

The statute predicates issuance of certificates on a finding by the Commission that the proposed service is "required by the***public convenience and necessity;" thus, the Commission is given exclusive discretion to determine public convenience and necessity. On the record as a whole, in suit to set aside Commission order denying plaintiff bus line's application for passenger authority between East Northfield and Springfield, Mass., the court cannot find that the Commission's conclusion, that "relatively small additional convenience to passengers" did not warrant authorization of a new through service duplicative of existing bus service, was unsupported by substantial evidence. Accordingly, the Commission's decision and order must be approved; complaint dismissed.—Town of Montague v. United States, 306 F. Supp. 1227 (1229)*.

In suite to set aside Commission grant of a certificate to defendant-intervenor, authorizing a car pool commuter service for passengers, in small groups, the Commission and not the reviewing court is the arbiter of the public interest. Congress has entrusted it with broad discretion, in the exercise of its expertise, to grant or deny authority for a particular operation provided, always, that there is warrant in the record; and, in clear exercise of its expertise and judgment, the Commission concluded that the grant of authority was justified because of the applicant's distinctive type of commuter service. Scope of the court's review is limited to determining whether the agency's findings are supported by substantial evidence of record, and whether its conclusion as to public need for proposed services has a rational basis in fact and is legally permissible. Therefore, since record before the Commission, which is replete with evidence that carrier's special service was distinctive, amply contained a rational basis for its conclusions, the Commission's grant of special common carrier authority is sustained.—Hudson Transit Lines, Inc. v. United States, 314 F. Supp. 197 (200-202)*.

Plaintiffs complain of Commission order granting defendant carrier authority to transport general commodities and explosives between certain Utah and Nevada points primarily because, as no interline restriction was imposed, it authorizes carrier (applicant) to interline shipments without a showing of need therefor. Interlining generally is a right and duty of common carriers and, since undesirable complications result, the Commission imposes such a restriction on new authority only where it is shown to be necessary in the public interest. Uncontroverted evidence showed need for proposed general-commodity service in sparsely-settled northeastern Nevada area and for limited interline of shipments from or to points therein; once need was shown for basic grant of such new authority, the right to interline Utah-California overhead traffic followed as a reasonable concomitance of providing the needed service within Nevada. Thus, since protestants (plaintiffs) failed to show that a restriction against interlining was warranted, and evidence supported the Commission's findings of need for such service in northeastern Nevada, the grant of unrestricted general-commodity is sustained.—Ashworth Transfer, Inc. v. United States, 315 F. Supp. 199 (201-3)*.

But evidence consisting only of sworn but equivocal statements of two users of explosives is not sufficient to show need for grant of additional unrestricted authority for movement of classes A and B (dangerous) explosives; neither user indicated volume, frequency or type of explosives used, nor was it shown that they had sought services of existing carriers. Though the explosives grant was made simultaneously with that for general commodities, the Commission report places no reliance on relationship between the two grants, but instead bases explosive authority granted upon need for a new explosives carrier in the area. Review of the Commission order is limited to an appraisal of its action solely upon the grounds invoked by the agency; and the inquiry as to those grounds is whether its decision has rational basis supported by substantial evidence on the whole record. Therefore, since evidence of record does not sustain Commission findings of need for proposed transportation of explosives, the grant of unrestricted explosives authority is set aside. Otherwise, Commission order under review is affirmed in all respects—Id., pp. 203-4.

In motor carriers' action for judicial review of the Commission's grant of authority to another carrier, the question of whether a public need exists and, hence, whether there is need for additional motor carrier service, is a matter for Commission determination; but such finding must be supported by substantial evidence. Commission finding that requirements of shipping public were not being met, in the transportation of l.t.l. shipments, was supported by substantial evidence of record; thus, there was adequate basis for the grant of extension authority to applicant carrier.—Georgia Highway Exp., Inc. v. United States, 331 F. Supp. 906 (909-10)*.

Also, since determination of whether or not the authority granted should be restricted against interchange is within discretion of the Commission, and since it concluded that protesting carriers had not shown they would be materially and adversely affected by failure to impose requested interchange restriction on applicant's certificate, the Commission's refusal to impose interchange restrictions on authority granted applicant was not an abuse of discretion.—Id., p. 911.

In suit to annul and vacate Commission order converting outstanding permit of defendant carrier (applicant) into a certificate, court review is limited to determining whether the facts and the law warranted the Commission action; the court is not concerned with soundness of the Commission's reasoning or the wisdom of its decision. The Act does not define public convenience and necessity; that is a matter within the discretion of the Commission which has expertise in transportation matters, and to which Congress entrusted the execution of the national transportation policy. Evidence in the record showed need for applicant's service as a common, rather than a contract, carrier; the Commission considered all relevant factors of public convenience and necessity and, on the facts before it, was warranted in finding that applicant qualified and was entitled to a common-carrier certificate in lieu of its contract-carrier permit. Commission report and order under review is substantially supported by the evidence and accords with the applicable law; sustained.—Perkins Furniture Transport, Inc. v. United States, 333 F. Supp. 879 (882-4)*.

Supporting witnesses from banking institutions require an expeditious door-to-door pickup and delivery service on cash letters during nonbanking hours, which will permit the banks' transit departments to have daily letters available at the beginning of work. Transit or remittance time is important, as the money paid for checks is unavailable to the banks until the checks have been presented to the bank on which drawn, and the amount credited to account of the country bank or remitted to the correspondent bank. Applicant's proposed 2-day service would reduce amount of uncollected money or credit which is unusable until the letters are collected. Most of the traffic presently is moving by U.S. mail or bus, but such service does not include the convenience of a pickup and delivery or the 2-day remittance time. Moreover, the weight of cash letters varies from a few ounces to 10 to 12 pounds, and in practically all instances, the rate proposed will permit substantial savings.—Continental Dispatch, 95 M.C.C. 483 (487).

Although service to portions of area sought is not directly supported by witnesses, numerous banks therein operate under similar procedures, and as no existing carrier is authorized to provide such service, applicant should be permitted to make it available to them. Granted, except between certain points served by protestant.—Id., p. 487, 488.

Because of slow rail transit time, perishable nature of bananas shipped, and because they cannot serve all destination points involved, protestant railroads are unable to satisfy supporting shippers' needs with respect to expeditious movement of a substantial portion of the banana traffic involved; shippers require motor carrier service in addition to rail service, and the only motor carrier protestant has only one refrigerated vehicle and has never transported bananas. Need is shown for proposed service from Balitmore and the New York harbor area to points specified, and, in addition, to points in Michigan and West Virginia (those States being within shippers' normal distribution territory). However, since applicant's fitness is presently in issue in another proceeding, proceeding is held open for further consideration of that issue.—Midwest Emery Freight System, Inc., 95 M.C.C. 642 (645-6, 648-9).

The Commission recognizes that termination of related proceeding in applicant's "interim" application under §7(c) of Transportation Act of 1958, while leaving open its §207 proceeding pending determination of its fitness, may cause interruption of service applicant heretofore provided and for which a continuing need is found; however, where there is need for service in a territory having no carrier service capable of meeting such need, an appropriate remedy is available under §210a.—Id., p. 648.

Manufacturer of small toys and playground equipment shows need for applicant's proposed service on inbound shipments of materials and supplies from designated points in California to shipper's plant in Pennsylvania and on outbound shipments of its products from the plant to designated points in California. Inbound shipments would be greatly facilitated since present shipment by rail in unsatisfactory; shipper's plant is not located on a siding and consequently shipment has to be loaded onto trucks and hauled to the plant site. The extra handling causes inconvenience and frequent damage to the lading; additionally, outbound shipments would be greatly expeditied for with the use of proposed service, time in transit can be cut to about six days from the 14 to 21 days required by rail transportation.—La Bar's, Inc., Common Carrier Application, 95 M.C.C. 773 (776).

Another supporting shipper establishes a present need for applicant's proposed service from Burwick, Pa., on outbound shipments of designated commodities to 4 of 7 destination states sought, and a definite future need into one other, Ohio, to which it is in the process of expanding its marketing area. However, there being no concrete evidence of need as to the other 2 states sought, grant of authority only to described points within those states sufficient to meet the present and foreseeable needs is warranted; prospect of future need of service to points other than those so described is too vague and speculative to form the basis for a grant of operating rights. On inbound shipments of raw materials necessary to shipper's operations, evidence establishes a need for inbound service only from Ohio; a shipper's mere desire for more authority than it has definite plans to use is not sufficient grounds to grant such additional authority. Granted in part.—Id., pp. 776, 777.

While shipper asserts a need for applicant's proposed service to some 10 states, the evidence of record shows need for service to only 4 of those 10 states. Therefore, while a wide grant of authority as was requested might be of some convenience to the supporting shipper at some remote future date, authority will be granted only on the basis of the shipper's present or reasonably foreseeable future transportation requirements.—Skinner Motor Exp., Inc., Extension, 96 M.C.C. 135 (142).

Some 3 months after applicant filed for certificate to transport fiberboard or pulpwood boards and walls in "converta" van type trailers or flat-bed trailers, it applied for alternate-route authority to move general commodities over the same route, from Meridan, Miss., to Birmingham, Ala. Applicant was already handling 30 percent of the single supporting shipper's traffic, having to route it through Mobile, Ala. There were two protestants who showed they had necessary authority and were presently participating in the movement for shipper's remaining 70 percent, and while shipper experienced occasional difficulty in obtaining converter vans, there was no evidence of how a grant of the authority sought would make any additional equipment available to the shipper. Applicant apparently does not intend to add equipment to its fleet, and its claim that a grant of the application would enable it to improve its service seems inconsistent with its position that it took in asking for alternate authority that authorization to operate between Meridan and Birmingham would not materially better the quality of its service. Application denied.—West Bros., Inc., Extension, 96 M.C.C. 490 (499).

Existence of contract carriage providing satisfactory service to a shipper is not ordinarily a bar to a grant of coextensive common carrier authority.—Tajon Trucking Co. Extension, 96 M.C.C. 591 (595).

Where a need for service is shown and more than the necessary number of carriers seek to fulfill that need, it is the function of the Commission to determine which applicant or applicants should be granted authority. Primary considerations are the amount of prospective traffic at different points and the capabilities, if any, of existing service, the location of terminal facilities and availability of appropriate equipment, and applicants' sphere of operations under present authority in relation to the proposed operation.—Transport, Inc., Extension, 96 M.C.C. 671 (678).

A change in the technique of marketing cement has resulted in numerous applications for the same motor carrier authority to handle distribution of ex-rail traffic in states where, generally, there is no established existing service. Also in those states, there are several competitive supporting cement shippers as well as competitive rail carriers, and the competitive services of two motor carriers is required; however, the Commission is not bound by any numerical formula, and selection of an appropriate number of carriers to be given authority will vary according to competitive circumstances in any particular case. Accordingly, in one instance four carriers are selected to operate in North Dakota because of the relatively slight quantity of equipment operated by the smaller carriers and the highly competitive situation between motor carriers and rail carriers; in Minnesota and South Dakota, several applicants are selected to receive authority over one applicant that does not have terminal facilities or intrastate operations in these states.—Id., p. 681.

Public convenience and necessity is a fact and once established it is not the property of any particular carrier. Normally, in determining which one of two applicants should be selected to provide a proposed service, requiring only a single carrier's service, an important consideration would be what carrier produced public support. Herein East Coast, which produced the most public support, has failed to establish that it is fit. In view thereof and of the public need shown for service, shippers should not be penalized for Refrigerated's failure to produce greater public support for its application. Granted in part.—East Coast Trucking, Inc., Extension, 98 M.C.C. 594 (600-601).

While the Commission is not bound by limitations in one applicant's intrastate certificate, it is required to determine whether all service proposed between Washington, D.C., and Richmond, Va., is calculated to meet a public need or whether, if all proposed service were authorized, it would so divide existing traffic as to cause both applicants' operations to become uneconomical. In this light, only the other applicant is authorized to serve intermediate points between Springfield, Va., and Richmond along proposed route, since it already serves most of these points, since possibility of future residential development is insufficient to establish need for two carriers along the same route, and since proposed overabundance of service could seriously affect the operations of both carriers.—Virginia Stage Lines, Inc., Extension, 102 M.C.C. 568 (571).

Supporting shippers have demonstrated distinct need for irregular-route multiple pickup and delivery, service proposed by applicants. Protestant rail carriers offer a stop-in-transit service, but this lacks the speed and flexibility of proposed service; in addition protestant regular-route motor carriers have failed to show that, as a practical matter, they can provide a similar service. Fact that supporting shippers seek proposed service in order to lower transportation costs does not invalidate their support of applicant, since it would be unjust to deny shippers the inherent advantages of truckload service and force them to use more costly and generally less efficient less-than-truckload service. Granted.—Watkins Motor Lines, Inc., Ext.—North & South Carolina, 103 M.C.C. 227 (246-8).

Record in proceedings on four applications, seeking similar authority, is convincing that California shippers of frozen, refrigerated, and nonrefrigerated foods require a more flexible and responsive service than that presently available to them. Shippers also have shown clearly that availability of the type of service proposed would facilitate development of new markets for their products throughout the destination area sought; and based on their present volume of shipments and the reasonable foreseeable increase therein which would result from a more responsive service, need is shown for services of two additional carriers. While all four applicants are equally capable of performing proposed services, since services of only two carriers are required, authority is granted to the two named who, being established carriers in the area handling considerable traffic, merely would expand the range of commodities which they are authorized to transport in the territory.—Frozen Food Express Extension, 103 M.C.C. 913 (916-7)*.

As to selection of specific carriers to receive authority among multiple applicants, it is appropriate to observe the criteria set forth in 102 MCC 336, and, while prior report did not specifically so indicate, it is apparent that all applicants were considered equally qualified in light of those criteria, except in one respect, i.e., the extent of their existing authorities. However, on the basis of a third applicant's "grandfather" operations in transporting frozen fruits, berries, and vegetables between points in the four-State area, it should have been considered on the same basis as the two previously selected. On reconsideration, therefore, in view of the particular traffic involved (which will often consist of frequent shipments in small lots) and the significance of applicants' existing service, and applying the applicable criteria, prior grant to the two applicants is affirmed and authority is granted to third named applicant as well.—Id., 106 M.C.C. 161 (163-4)*.

Need is shown for proposed transportation of meats and packinghouse products from supporting shipper's Fremont, Nebr., packinghouse plant to points in Oklahoma. Applicant is not satisfactorily serving the shipper from considered plant to States adjacent to Oklahoma and to parts of that State; existing carriers are unable to provide the required service; and a grant of authority sought will insure the rendition of a complete and flexible service. Furthermore, initial opposition to the application appears to have been based primarily on a desire that restrictions be imposed on any authority granted to applicant, rather than on any real or active interest of protestants in providing the service required by the supporting shipper.—Fox-Smythe Transp. Co. Extension—Oklahoma, 106 M.C.C. 1 (30).

Although Florida is often referred to as essentially a consumer State since traffic to points in Florida is considerably heavier than traffic moving out of Florida, that fact does not justify inadequate service; this traffic imbalance must be weighed against the lack of a reasonable fast and consistent service which the Florida shippers are not receiving, for which they have established a need, and to which they are entitled. Factors establishing need for proposed service include: (1) protestants' reluctance to interline truckload traffic at Charlotte, N.C., (2) their inability to interline traffic between Florida points, and (3) excessive and erratic transit time of L.T.L. shipments between Charlotte and Florida points. Applicants, therefore, granted regular route authority between Charlotte and various Florida points and between specified Florida cities; in addition all points in Mecklenburg County, N.C., all points in Florida and Florala, Ala., not on the described routes are to be served as off-route points in connection with the described routes.—Alterman Transport Lines, Inc., Extension, 106 M.C.C. 402 (418-22)*.

A proper public convenience and necessity finding may be made upon an appropriate record pursuant to §208(a) of the Act without carriers' first filing an application under §207 of the Act. To conclude otherwise would be to read provisions of §208(a), particularly those starting "at the time of issuance and from time to time thereafter," right out of the statute. Congress in enacting this provision was aware that a sound job might not be done initially and left the door open to correct any resulting deficiency. —Removal of Truckload Lot Restrictions, 106 M.C.C. 455 (476)*.

Were air carriers, direct or indirect, able to utilize motor contract carrier service beyond the air carriers' air terminal area, the control and direction of such traffic clearly would reside with the air carrier, regardless of whether or not the shipments move on through air bills of lading or on separate bills of lading for the air and surface portions of the entire movement. By extending their control and direction over traffic beyond their air terminal areas, the air carriers would constitute themselves as surface freight forwarders under part IV of the Act, and appropriate authority to act in such a capacity would be required. Since applicants' operations would be to serve the general public rather than the air carriers, the proposed operations would be those of common carriers by motor vehicle as defined in the Act. Contract carrier authority denied; common carrier authority granted. —Theodore Savage Contract Carrier Application; 108 M.C.C. 205 (212-13)*.

Applicant, a common carrier by motor vehicle, seeks authority to transport such merchandise as is dealt in by wholesale, retail and chain grocery and food business houses, and applicant also seeks to have a prior rail-haul restriction in its certificate removed. Removal of the restriction would enable applicant to provide a through single-line motor carrier service to points in the sought destination area that it is now precluded from serving because of the prior rail-haul restriction in its certificate. Removal of the restriction is justified to enable applicant to regain some of the traffic which it previously moved and which it has now lost because of shippers' preference for motor service instead of rail service. However, applicant has not shown that it should receive the broad commodity authority it seeks to serve the destination area. Issuance of such broad authority would enable applicant to institute service that would be potentially disruptive of the operations of certain existing carriers that are providing adequate service for other shippers to and from the involved area. Authority granted as to service from one origin point, denied as to the other orgin point.—Auclair Transportation, Inc., Extension—Wilder, Vt., 108 M.C.C. 604 (605, 611, 612).

Supporting shipper has shown a need for single-line service for the transportation of gelatin. Shipper has used applicant's service under color of right and characterizes its service as outstanding. Protestant does not have single-line authority to service many of the involved points, but proposes to serve shipper by interlining with other carriers who are not parties to this proceeding; such proposal is entitled to little weight inasmuch as there is no evidence of record that these carriers with which protestant would interline are suitably authorized and available for the movement of the involved traffic; application granted.—Rowley Interstate Transp. Co., Inc.—Investigation, 110 M.C.C. 285 (292).

The impressive number of shippers who support one or all of considered applications must be given weight in assessing the public requirements at issue in the proceedings;

however, expressions of public interest, even though numerous, are insufficient standing alone to warrant certification of new motor carrier services. Under its statutory mandate, the Commission must scrutinize all the evidence presented with a view toward determining to what, if any, extent proposed operations are required by the public convenience and necessity; and when such proposals involve several distinct phases, the requisite determination must be made as to each aspect individually. In that connection, tests to be applied are, in substance, (1) whether the new operation will serve a public purpose, responsive to public demand or need, (2) whether that purpose can or will be served as well by existing lines or carriers, and (3) whether it can be served by applicant's proposed new operation or service without endangering or impairing that of existing carriers contrary to the public interest.—Dealers Transit, Inc., Extension, 110 M.C.C. 317 (332-3)*.

Authority to operate as a regular-route common carrier of passengers and their baggage between named airports and indicated destinations granted. The dramatic increase in number of air passengers in recent years shows a need for proposed service, and with the advent of jumbo jets such need can be expected to increase. Authority granted herein will enable applicant to provide a complete service responsive to the demands for an efficient intermodal transportation system. Only one protestant offers service comparable to that proposed by applicant, but protestant's service is territorially limited and consists of ordinary bus service while applicant proposes a luxury-type operation at twice protestant's rates. Mere possibility that applicant may institute competitive service is no basis for denial of authority where substantial public benefit is shown.—Connecticut Limousine Service, Inc., Modification, 110 M.C.C. 830 (836-7).

On reconsideration, Commission granted authority as general-commodity carrier, with certain exceptions and upon compliance with certain specified conditions, between described points. Where record demonstrates that supporting shippers require service in transportation of wide range of diverse commodities belonging to numerous different classes, this Commission will regularly grant general-commodity authority rather than limit authorization to those various specific commodities which the evidence discloses will be shipped.—Comet Messenger & Deliv. Serv., Inc., Com. Car. Applic., 111 M.C.C. 13 (16)*.

Commission granted applicant two-way authority between points in Middlesex County, N.J. and Baltimore, Md., although applicant sought only one-way authority since Commission has duty to authorize a viable operation and this allows applicant to render complete and practicable service without unduly affecting existing carriers' operations. Application is supported by two named shippers and is unopposed by any existing carrier.—Swan Messenger Service, Inc., Ext.—General Commods., 112 M.C.C. 26 (34)*.

Commission found that the emergency transportation situation created by the temporary closing of West Virginia Highway 2 required a general finding of public convenience and necessity and the inclusion of affected carriers in a special limited certificate to ensure continuous service between indicated West Virginia points via described Ohio highway. Only those carriers now engaged in intrastate transportation of goods or those holding West Virginia certificates of registration are eligible for inclusion under such certificates.—Special Relief for Motor Carriers, 112 M.C.C. 323 (329-30).

Authority granted where consignees require multiple pickup of mixed, less-than-truck-load shipments of (1) so-called dry-line grocery store items, and (2) dry-line grocery store items and frozen foods, combined, for over-the-road movement, in truckloads, a service existing regular-route carriers are unable to provide due to commodity and territorial limitations in their authorities.—Montana Express, Inc., Extension, 113 M.C.C. 73 (79-81)*.

The record establishes that the four supporting shippers each require motor transportation services, not adequately available from existing motor carriers, as a supplement to rail transportation which mode handles the predominant portion of the commodities shipped, during the "potash season" which generally extends from October to April of each year and when expeditied deliveries and other services characteristically supplied by motor carriers are essential.—Steere Tank Lines, Inc., Extension, 113 M.C.C. 118 (126)*.

As the supporting shipper's customers order less-than-truckload quantities for delivery at jobsites throughout the southeastern States, necessitating the provision of up to 10 stops for partial unloading at points in the considered territory, and as protestant offers a maximum of 3 such stops and failed to reply to applicant's petition for reconsideration, a grant of the requested authority to transport sheet metal products to all points in Florida and Georgia was found to be warranted.—Pittsburgh & New England Trucking Co. Extension, 113 M.C.C. 385 (389)*.

Requirements of supporting steel fabricators and warehousemen for complete service featuring special equipment, timed, split, and jobsite deliveries, found to warrant grant of additional authority.—Tanksley Transfer Co. Extension—Iron and Steel Articles, 113 M.C.C. 423 (427).

Authority to conduct passenger round trip charter operations beginning and ending at High Point, N.C., and points in its commercial zone, and extending to points in Florida, Georgia, South Carolina, Tennessee, Virginia, Maryland and the District of Columbia, granted when existing charter operations found not to be responsive to the particular needs of user public supporting the application.—City Transit Co. Common Carrier Application, 113 M.C.C. 471 (476)*.

Application granted when health and safety of persons in the involved communities depend directly upon an adequate and immediate supply of equipment during adverse weather conditions, which protestant alone is unable to meet, and shipper's present volume of traffic is sufficient to support all three involved carriers and protestant will continue to participate proportionately.—Mohawk Trucking & Salvage Co., Ext.—Sodium Chloride, 113 M.C.C. 579 (584-6)*.

Commission issued a special certificate of public convenience and necessity to any carrier meeting the special eligibility requirements detailed herein inasmuch as a need for transportation of "waste" products for recycling and reuse has been shown by the national concern for our environmental quality and the deterioration of our natural surroundings.—Transportation of "Waste" Products for Reuse, 114 M.C.C. 92 (109-10)*.

Proposal for a National finding of public convenience and necessity to expedite the transportation of new furniture rejected as there does not appear to be the broad range of support that should exist for the adoption of proposal which would affect large segments of the shipping public and the motor carrier industry.—Motor Service on Shipments of New Furniture, 114 M.C.C. 144 (160-2).

The Commission favors sufficient carrier capacity to encourage competition and provide incentives for innovation and improved service. However, multiple-application proceedings require care not only to avoid proliferous operating authorities not needed by the public but also to select carriers with ability to perform needed service. When evidence of record justifies grant to only one of several applicants for basically similar authority, selection of the carrier to receive authority requires consideration of: (1) existing authorities and operations of all applicants; (2) location of their terminal facilities and equipment they operate; (3) relative date of filing the applications; and (4) carrier which produces the evidence supporting a finding of public need.—Herrin Transp. Co. Extension—Atlanta, Ga., 114 M.C.C. 571 (601-2)*.

In application proceedings, the paucity of evidence relating to the weight or other basic characteristics of the supporting shipper's commodities negates rather than establishes the heavy haulers' right to handle such commodities. Issuance of certificate conditioned upon compliance with the requirements established in 111 MCC 151.—Sammons Trucking Extension, 115 M.C.C. 36 (41, 43)*.

While there are numerous carriers presently operating in the area of the proposed service, evidence adduced from a large number of shippers, most of whom ship less-than-truckload amounts, indicates a need for complete, expeditious, single-line service. The grant of authority made is conditioned on applicant's filing of the annual performance report specified.—Transamerican Freight Lines, Inc., Extension, 115 M.C.C. 416 (426, 429).

Public need found to require transportation by applicant of refuse containers and compactor systems, and of commodities used in the manufacture and distribution of refuse compactor systems and refuse containers (except commodities in bulk), from 2 points in New York to points in 15 additional states.—Indian Bow Truck Lines, Ltd., Extension—15 States, 117 M.C.C. 671 (675)*.

In an embraced proceeding, public need found to require a grant of authority to only one of four applicants, to transport certain commodities to points in 18 states from East St. Louis, Ill.—Behnken Truck Service, Inc., Ext.—East St. Louis, 117 M.C.C. 825 (833)*.

Alaska: [Vols. 18, 19, 21].— See also AADA Systems, Inc. Case, *Truckaway* below.

Due to the fact that there is no overland highway connection between any of the named places in the southeastern Alaska panhandle, which are separated one from the other by water or extremely difficult mountainous terrain over which no land highways have been constructed, the only surface means of travel between them is by water. Therefore, operations proposed by applicant, utilizing the services of vessels of the State Ferry System, found to be over a regular route within the meaning of the statute. The report notes the possibility that the port-to-port service might be found to be that of a carrier subject to Shipping Act, 1916; however, such duplication is no bar to the Commission's exercise of jurisdiction over such operations. Applications granted.—Alaska Motor Coaches, Inc., Extension, 98 M.C.C. 642(645); Lindstrom Extension, 98 M.C.C. 647 (650).

Commercial competition: [Vols. 18, 21].—It was held that the evidence of record clearly establishes a public need for the services generally proposed by each applicant. While most of the protestants have participated in some of shipper's traffic, many have carried only minimal volumes of the involved traffic, and therefore will not suffer any substantial loss of revenue. With respect to those carriers which are now transporting substantial portions of shipper's traffic, the evidence indicates that shipper's present and future production will assure sufficient traffic for existing carriers as well as applicants. This, coupled with unexplained instances in which no equipment was available to the shipper, leads to the conclusion that little, if any, adverse effect will befall protestants as a result of the grant of these applications.—Kroblin Refrigerated Xpress, Ext.—Sterling, Colo., 118 M.C.C. 869 (874)*.

Commercial zones: [Vol. 18].—See also Arkansas-Best—Purchase—Indianhead, at §5(2), n. 15 *Commercial.*

A grant of authority to conduct passenger charter operations beginning and ending at points within a commercial zone of a named municipality is proper.—City Transit Co. Common Carrier Application, 113 MCC 471 (476)*.

Commodity description: [17-19, 21].—See also Ecoff Trucking, Inc., Extension, at §204(b), n. 7 *Liquid chemicals;* Morrison Application, at *Existing carriers* below; and Olson Transportation Co. Ext.—Dry Plastics, at *Existing service* below.

In action to set aside the Commission's order granting plaintiff authority to transport frozen fruits, frozen berries, frozen vegetables, and potato products, the record, in its entirety, warrants a commodity description broad enough to enable plaintiff to transport "frozen products". Supporting shippers manufacture or market, or expect to market, frozen potatoes, other frozen potato products and vegetables and processed meats; and while the Commission recognized that the consolidated record evidenced "the shippers' desire that the carriers serving them be awarded a commodity description broad enough to enable them to transport each of the food products they handle", it did not make such a finding. Instead, it referred to a "scheme" unsupported by evidence to which each application should conform and restricted, in accordance therewith, the authority granted. Remanded for further proceedings in conformity with the court's opinion.—Dunkley Refrigerated Transport v. United States, 253 F. Supp. 891 (894-5,6)*.

Claim of plaintiffs in suit to set aside and annul the Commission's grant of authority to another motor carrier, that commodity description "iron and steel articles" in the certificate permits transportation of a broader category of articles than the evidence warrants, is not in accord with supporting shippers' testimony of record. Review of that shipper testimony makes vividly evident the importance of the Commission's established policy of favoring broad commodity descriptions, such as that in question, in order to provide comprehensive service to an industry and avoid the need for recurrent extensions of an original narrow grant. Moreover, in granting a broad certificate, the Commission does not require an applicant to show need as to each article; such a showing as to a representative number of items in a category establishes need for a grant covering a broader group including those representative items.—Superior Trucking Co. v. United States, 306 F. Supp. 872 (876-7)*.

While some of commodities dealt in by supporting shippers are not "construction supplies" (the authority applied for) but "construction materials" as those terms are construed in certificates issued by the Commission, fact that applicant has been transporting such commodities under its intrastate authority for several years without objection from the Idaho Public Utilities Commission strongly suggests that the State regulatory body places a broader construction on "supplies" than does the Commission; and, in absence of any evidence that applicant's intrastate authority has been interpreted by the issuing agency to exclude transportation of what the Commission would term "construction materials," its prior transportation of such materials has been conducted in good faith and under color of right. In the circumstances, applicant is entitled to have all its past good-faith operations considered in determination of issue of public convenience and necessity.—Statewide Transport, Inc., Extension, 95 M.C.C. 57 (63-4).

Proposed operations would be more responsive to shippers' needs than the intrastate service applicant presently affords, and authorization thereof would not have materially detrimental effect on operations of existing carriers. However, while some of the construction materials and items requiring use of special equipment transported by applicant may have been intended for use by mining and logging industry, no real justification is shown for grant of specific authority to transport mining and logging machinery, equipment, materials and supplies; granted accordingly.—Id., pp. 64, 65.

Protestant's argument that the commodity description "scrap iron" rather than "scrap metal" should be used in the authority granted is without merit; evidence is clear that scrap metals other than "iron" are involved.—Skinner Motor Exp., Inc., Extension, 96 M.C.C. 135 (142).

In coordinated rail-motor movement of cement where the cement moves by rail to a storage area and then by motor movement to individual consignees, to movement of the ex-rail cement "in packages" and "in bulk" because such restrictions would not be responsive to the needs of supporting shippers and would not allow them to receive a comprehensive service.—Transport, Inc., Extension, 96 M.C.C. 671 (681-2).

The evidence establishes an undisputed need for applicant to transport salt, salt products and mineral mixtures in bulk since there is no authorized salt carrier and since the protestant's authority to transport chemicals in bulk does not include the handling of such commodities because considered raw materials have not lost their identity through any chemical process. Granted in part.—Schwerman Trucking Co. Extension, 98 M.C.C. 350 (353-354).

Applicant's present "groceries" authority limits it to the transportation of "articles for human consumption which are customarily served as food, or which are used in the preparation of food" and does not authorize the transportation of inedible commodities even though such commodities may be purchased in a grocery store. Since need for the transportation of these inedible commodities is evidenced, authority granted applicant to transport "such commodities as are dealt in or sold by grocery stores."—Interstate Grocery Distribution System Ext., 98 M.C.C. 546 (547-548).

Considered nitrogen fertilizer solution is composed of nitrogen, anhydrous ammonia, urea and water. Anhydrous ammonia, a compound of hydrogen, nitrogen and water, is itself a nitrogen fertilizer solution and the base material from which all other nitrogen fertilizer solutions are derived and, since it is manufactured by combining hydrogen derived from natural gas or petroleum with nitrogen extracted from the air, it is a petroleum product. However, although applicant has shown need for proposed service, it has failed to show that the considered fertilizer is a petroleum product and as such excluded from protestants' authorized service which is restricted against the transportation of petroleum products. Accordingly, authority granted limited to points not within protestants' respective territories.—Delaware Exp. Co. Extension, 98 M.C.C. 733 (737-8).

Authority to transport "pipe, pipeline material, machinery, and equipment incidental to and used in connection with the construction, repairing, or dismantling of pipelines" is not authority to transport waste disposal pipe; "pipeline" is understood to be a means by which water, gas, oil or other liquids are conveyed from one place to another, and not service pipes or connecting lines of consumers.—C&H Transp. Co., Inc., Extension, 99 M.C.C. 112 (115).

Since petitioner's authority to transport "photographic equipment and photographic equipment parts" does not permit it to perform the service needed, the commodity description in its certificate is amended to include "sound recording, sound reproducing, and sound amplifying equipment, parts, and supplies used in connection with ***photographic equipment, parts, accessories, materials, and supplies."—I. L. & C. Corp. Petition for Modification of Certificate, 99 M.C.C. 400 (403).

Authority, as extension, granted to one of four applicants on consolidated record to transport coal tar and creosote oil, based on future need for service as established by sales solicitation. Objections are lack of pubic notice raised when commodity description "wood preservatives" amended to "coal tar and creosote oil" dismissed; amendation considered restrictive rather than expansive.—Hearin-Miller Transporters Ext.—Point Comfort, Tex., 100 M.C.C. 50 (50-57).

Authority sought to transport "trailers designed to be drawn by passenger automobiles," does not embrace transportation of "double-wide" units [two separate trailer units designed for use as a single structure], and since evidence also shows limited need for transportation of such units, the authority as originally sought is amended to authorize the needed transportation of prefabricated buildings, in sections, in addition to "trailers designed to be drawn by passenger automobiles." As a result, the grant of authority herein is conditioned upon publication in the Federal Register of notice of Actual authority granted.—National Trailer Convoy, Inc., Extension, 100 M.C.C. 101 (106-7, 109).

Demonstrated need for transportation of "air, water, and gas cooling and heating equipment and materials, accessories, and supplies used in the installation thereof, which because of size or weight require the use of special equipment" or which do not require special equipment but move in the same vehicle or as part of the same shipment as such commodities requiring special equipment, warrants a grant of such authority, allowing applicant to perform service on highly specialized items, and on mixed loads, which neither general commodity nor heavy hauling carriers can now perform. Granted.—Daily Exp., Inc., Extension, 100 M.C.C. 208 (213).

In framing grants of operating authority, the Commission attempts to utilize generic terms which afford meaningful yardsticks. Therefore, rather than attempting to authorize service by naming individual commodities, by classifying each group of commodities manufactured by aerospace industry under specific descriptions reflecting an intended use test, or by attempting to distinguish between those craft that operate in space and those that are operable both within and beyond the atmosphere, all products manufactured and shipped by aerospace industry, including "aircraft," should be subsumed under one broad commodity description. In this light term "aerospace craft" will be employed to refer to those commodities manufactured by aerospace industry, which operate within or beyond the earth's atmosphere or which are adaptable for flight within either performance spectrum. This description, while sufficiently flexible to accommodate new products and technological improvements in the industry, is susceptible of workable, day-to-day application.—U.S.A.C. Transport, Inc., Extension—Missiles, 103 M.C.C. 23 (33-35).

In light of need shown, 56 applicants are granted authority to operate as common carriers by motor vehicles, in interstate or foreign commerce over irregular routes, of (1) earth drilling machinery and equipment and (2) machinery, equipment, materials, supplies and pipe incidental to, used in, or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites and (d) the injection or removal of commodities into or from holes or wells, from and to/or between points in their respective territories. Roy L. Jones, Inc., Ext.—Earth Drilling Equipment, 103 M.C.C. 447 (456)*; modified as to proper description of territorial authority sought by respective applicants.—Id., 103 MCC 823 (829)*.

The record evidences need for applicant to transport "iron and steel articles," not "iron and steel" and "iron and steel articles." "Iron and steel articles" includes rough or semifinished articles such as nails, bolts, castings and tubing, as well as a number of building-material items, none being complex items such as a piece of machinery made from an assemblage of many different items, nor approaching the character of a finished replacement part or tool such as is used in the repair and maintenance of tractors or engines; in addition to these articles this description also includes those basic materials embraced by the description "iron and steel" such as pigs, ingots, blooms, slabs, billets, scrap, bars, rods, strips and sheets, if intended for future fabrication or shaping. Other items also embraced within authority as granted are structural steel, stampings and fabricated steel, steel door frames and tractor-trailer couplers. Granted in part.—Smith's Truck Lines Ext.—Iron & Steel Articles, 103 M.C.C. 635 (638-9).

Since protestants' authority to transport petroleum and/or coal tar products does not authorize them to transport liquid gilsonite asphalt sealer, need for applicant's proposed motor carrier service established. Although liquid gilsonite asphalt sealer resembles petroleum asphalt both in appearance and in use, it is the product of neither petroleum nor coal tar and, since the underlying purpose of 61 MCC 209, is to establish commodity lists under class or generic headings specifying commodities which can be transported thereunder, it cannot be transported under protestants' existing authorities. Granted.—W.S. Hatch Co., Extension—11 States, 103 M.C.C. 731 (734).

Since many past formulations of classifications and descriptions have proven inadequate and have fallen into disuse, because they were either ignored or because changes in technology and development of new products have outmoded them, general guidelines as to appropriate commodity descriptions, which accurately reflect the needs of supporting shippers, are set forth. Instructions appended to application should be read; commodity descriptions formulated in 61 MCC 209, should be used where appropriate, or commodity descriptions, already found in Commission grants of authority, should be employed; if some other description is necessary, it should be clear, definite and employ no duplicating or overlapping terms. Also, as a general policy the Commission favors use of broad commodity descriptions, where a carrier serves a particular class of shipper; rationale for such policy is that, in an industry constantly developing new products, the shipper should not have to be confronted with the recurring problems of obtaining transportation for each new product.—Fox-Smythe Transp. Co. Extension—Oklahoma, 106 M.C.C. 1 (24-25, 28).

Basically applicant pipeline commodity carriers desire authority to transport commodities already embraced in their Willett authorities (See 89 MCC 427), when such items are intended for use in construction of water and sewerage projects. Supporting shippers have been marketing or utilizing considered items increasingly in connection with construction of water and sewerage systems, and in light of many considerations, particularly growing government support, it appears that volume of such freight will continue to increase. Furthermore, since considered commodities possess several unique handling and transportation requirments with which applicants are already familiar and since the end use of many consignments is unknown when tendered, broadening of applicants' existing pertinent authorities would, at a minimum, materially lessen confusion and delay. However, with two exceptions, evidence lacks necessary precision to broaden territorial grants beyond their present scope or to remove standard restrictions on movements from or to pipeline right-of-way. Granted accordingly.—Willett Extension—Pipeline Machinery, 106 M.C.C. 354 (357, 363, 364-5).

Protestants' authority to transport frozen fruits, frozen berries, frozen vegetables, and potato products, frozen and not frozen, is not broad enough to encompass all the various commodities involved herein; this narrow fragmented authority does not meet the proven needs of supporting shippers even with respect to the commodities which they are authorized to transport, because shippers require shipment on the same vehicle of various commodities. Futhermore, as new frozen foods are constantly being developed, consignees are making smaller orders at more frequent intervals, in order to alleviate inventory problems caused by this multiplication. To remedy this situation one applicant proposes to ship mixed frozen foods and the other applicant proposes to ship frozen foods mixed with nonfrozen or canned foods.—United Buckingham Frt. Lines, Extension, 106 M.C.C. 539 (545-7).

Some shippers have tried to cope with these trends by combining their shipments with those of other shippers in order to get small shipments moved. The addition of canned goods to shipments of frozen foods is another way of attempting to deal with this problem. On this record it is clear that existing carriers have been unable to cope with the developing situation due, in part, to the commodity limitations in their authorities. Accordingly one applicant granted authority to transport over irregular routes frozen foods and potato products, not frozen, when moving in the same vehicle with frozen foods; the other applicant is granted authority to transport over irregular routes frozen foods, potato products not frozen, and canned goods, subject to finding this applicant fit in another proceeding [see 107 MCC 506].—Id., pp. 550, 552-6.

Aluminum dross, the nonmetallic skimmings and residue of melting operations, is not embraced by the commodity description "chemicals" since it is not considered as such by common usage.—Truck Transport, Inc.—Extension, 106 M.C.C. 880 (882-83).

Upon application of the principles used in construing certificates authorizing heavy hauler transportation as they are summarized in 108 MCC 717, the Commission found that iron and steel articles that applicant proposes to transport (including steel bars less than 40 feet long and weighing under 200 pounds, lightweight fence posts and roof decking) are susceptible to hand loading and unloading and are not within protestant's heavy hauler authority. However, a portion of the application was denied for failure to show public need or to demonstrate deficiencies in protestant's joint-line service. Thus, protestant would be deprived of revenues important to its conduct of a balanced operation without a concomitant benefit to the shipping public. Application granted to extent specified.—Steel Haulers, Inc. Ext.—Tulsa, Okla., 110 M.C.C. 612 (617-20)*.

Many articles commonly transported by heavy haulers, though within the academic definition of machinery, have names, characteristics, and uses of their own and may not be transported under the commodity description "heavy machinery." It is therefore clear that authorities framed by reference to the commodities which may be transported, such as "heavy machinery", are not as broad as those certificates phrased in terms of the service provided.—North Penn Transfer, Inc.—Petition for Modification, 115 M.C.C. 208 (214).

The phrase "raw materials" was held to be restricted by the phrase "used in the manufacture of piece goods", since to grant unlimited authority to transport raw materials would have been an absurd act, and the term "materials" has been consistently held to be used only in connection with a particular industry.—Skyline Transport, Inc.—Investigation & Revocation, 115 M.C.C. 807 (823).

The Commission found no reason, on the record, to make a distinction between motorized campers and motor homes for purposes of motor carrier regulation. Despite the lack of certain sanitary facilities, they are fundamentally the same type of vehicle as a motor home. Some shippers apply the term "camper" to the slide-in type of units which are mounted on pick-up trucks. These units, although somewhat analogous to automobile or truck bodies, are not motor vehicles.—American International Driveaway Ext.—Hawaii, 117 M.C.C. 63 (68).

"Double-wides" are sectionalized buildings, and are not embraced by the commodity description "mobile homes".—Chandler Trailer Convoy, Inc., Ext.—Lexington Trailers, 117 M.C.C. 653 (657)*.

Since the term "pesticides" includes insecticides, herbicides, fungicides, and rodenticides, only "pesticides" was used in a grant of authority embracing the transportation of the foregoing commodities.—Behnken Truck Service, Inc., Ext.—East St. Louis, 117 M.C.C. 825 (833)*.

Applicants' contention that their proposed transportation of "antipollution systems" and related "equipment, materials, etc." is supported by the "field of service" doctrine is incorrect. The "field of service" doctrine represents long-established Commission policy allowing specialized carriers to keep pace with technological changes and new product developments in their specialized industry; it is not intended to authorize a new service. Applicants herein hold Mercer authority to serve the oil and gas industries and it is readily apparent that applicants propose an operation of vast and indeterminate scope encompassing a highly diverse range of commodities not readily identifiable with the gas and oil industries. Application denied.— Jones, Inc., Ext.—Antipollution Control Commodities, 118 M.C.C. 253 (271-73).

Motor homes come in various sizes and configuraEions and the motor home body is either placed on a separately manufactured chassis or converted from a separately manufactured van. Motor homes usually contain the following features: automatic transmission, power steering and brakes, mud flaps, 40- to 50-gallon fuel tank, power converter electrical system, city water hookups, lights throughout the interior, storage cabinets, cold food storage unit, range, bathroom, manual water system, and interior outlets for electrical appliances. Motor homes may range in length up to about 28 feet.—Nationwide Petition for Declaratory Order, 118 M.C.C. 468 (473).

Motor homes, even those consisting of a motor home body mounted upon a truck chassis, are not included within the definition of the term "trucks". On the other hand, a carrier authorized to transport motor vehicles or recreational vehicles is authorized thereby to transport motor vehicles or recreational vehicles is authorized thereby to transport motor homes. The Commission has recognized, and will continue to recognize, motor homes as a unique category of motor vehicle separate and distinct, for commodity description purposes, from all other types of motor vehicles.—Id, p. 475.

The term automobiles does not include motor homes, and a motor carrier which has authority to transport automobiles, trucks, chassis, or buses is not authgrized thereby to transport motor homes. Likewise, a carrier authorized to transport motor homes may not transport automobiles, trucks, chassis, or buses pursuant to such authority.—Id, p. 474.

It has been the general practice of the Commission, notwithstanding a number of minor and immaterial inconsistencies, in granting certificates and permits authorizing the transportation of motor vehicles, to distinguish between automobiles, trucks, tractors, buses, and certain other specific types of over-the-highway vehicles including motor homes. The term "automobile" has long had a specific and well-defined meaning as a particular type of relatively small passenger-carrying motor vehicle; and there is no basis for concluding that, as used in operating authorities, it should be construed to include motor vehicles in general or even all passenger-carrying vehicles.—Id, p. 474.

***Conversion to common carrier operation*:** [Vols. 17-19, 21].—Even considering the application as one for common carrier authority, applicant has failed to demonstrate that there is a need for any additional motor carrier service or that he is willing to perform proposed operation. Supporting shipper appears to have a mere preference for applicant's service and a desire to provide him with a profitable backhaul to balance his northbound transportation of soda ash; furthermore, the services of existing carriers have not been shown to be inadequate. Denied.—Gorski Extension, 95 M.C.C. 514 (517-8).

Applicant argues that it has proved need by showing past lawful operations. However, this is insufficient in light of 95 MCC 312, which states that in support of an application for conversion of contract carrier rights to those of a common carrier under §207 applicant should submit a detailed statement of past lawful operation under the authority sought to be converted, offer to surrender authority which has not been the subject of past operations, and offer shipper testimony demonstrating need for its services as a common rather than a contract carrier. Herein applicant has failed to produce shipper testimony demonstrating need for its proposed common carrier services and this need cannot be inferred from the resume of applicant's past operations and industry practices.—Eastern States Transp., Inc., 99 M.C.C. 524 (530-531) [But see dissent]

Since conversion applications are subject to the same evidentiary standards generally used to determine whether common carrier operations are required by public convenience and necessity, applicant has failed to show requisite need. Supporting statements fail to disclose any salient facts with respect to past operations performed by applicant's contract carrier affiliate, the volume or distribution patterns of supporting shippers' traffic, or the experience of these shippers regarding available for-hire motor service in the affected territory; therefore, the expression by each of these shippers of desire for continuation of "Schilli service" is not corroborated by any specific evidence. Denied.—Schilli Motor Lines, Inc., Conversion Application, 105 M.C.C. 90 (94-5).

Dilemma that forced applicant to file instant application, specific purpose of which is conversion of its permit into a common carrier certificate because (in recent common carrier application) issuance to it of a certificate for the service shown to be needed is being withheld pending elimination of the possibility that unlawful dual operations might result from applicant's holding both a permit and a certificate, cannot be ignored; but specific consideration thereof is unnecessary, since applicant has satisfied criteria in 95 MCC 312, for issuance of a certificate in lieu of a permit. Record shows the history of applicant's past lawful operations; supporting shipper shows continuing need for the services applicant is providing under its permit, whether performed under a permit or certificate; and applicant's current service comports as well with common as with contract carriage. Moreover, grant of authority sought will not adversely affect any party, and the existing competitive situation will not be altered. Certificate granted.—Ferree Moving and Storage, Inc., 110 MCC 375 (376, 378-9)*.

In converting a permit to a certificate under §207(a), an applicant must submit detailed proof of past lawful operations for a substantial period, and also a public need for proposed service. Applicant herein has presented such proof even though its past operations were not lawful contract carriage, applicant honestly believed they were lawful and they are no basis for denial. However, contracts entered into after commission of such unlawful operations are entitled to no consideration. Granted, upon compliance with indictated restrictions and condition.—Cleveland General Transport Co., Inc., Conversion, 114 M.C.C. 536 (546-7).

That a contract carrier seeking to convert certain of its authority to common carrier authority utilized the services of a broker, dealer, and agent does not constitute unlawful operation, since applicant entered into a contract only with the shipper named in its permit, it did so to serve a purpose of the contracting shipper, and the contracting shipper guaranteed payment of freight charges.—P.C.M. Trucking, Inc., Extension—Allentown, Pa., 117 M.C.C. 201 (206)*.

When it appears that a contract carrier has engaged in deliberate, rapid expansion of diverse operations, seeking to serve a number of multi-faceted industries, its operations must be closely observed and must be limited so that it may not claim, *ipso facto*, common carrier status and obtain conversion of its authorities without giving existing common carriers any real opportunity to defend their existing rights under the criteria of §207 of the Act.—Crete Car. Corp.—Maremont Contr.—Auto Parts, 117 M.C.C. 634 (640)*.

***Delay*:** [Vols. 11, 17-19, 21].—All indications were that consignor's tender of freight to protestant was the controlling factor which determined the day of delivery to consignee. The Commission, therefore, shared protestant's view that the difficulty which consignee experienced of late and uncoordinated shipments appeared to be attributable more to a lack of coordination between consignee and consignor than to any shortcoming in protestant's service. Denied.—Nationwide Carriers, Inc., Ext.—Television Antennas, 118 M.C.C. 757 (760)*.

***Denied*:** [Vols. 11, 18, 21]—On reconsideration, application for authority to transport radioactive waste denied as application is supported only by one carrier who evinces requirements which can be adequately met by protestant.—Long Island Nuclear Service Corp. Com. Car. Applic., 110 M.C.C. 398 (404)*.

Involved applications to transport size-and-weight commodities in mixed loads with non-size-and-weight items denied. Supporting shippers' evidence did not show that lack of proposed service caused them any disadvantage or that protestants were unwilling or unable to meet shippers' transportation needs. Therefore, applicant has failed to show that the proposed service is required by public convenience and necessity.—Ashworth Transfer, Inc., Ext.—Colo. and N. Mex., 111 M.C.C. 56 (64-6).

Application for authority as common carrier of passengers denied as applicant's evidence is insufficient to warrant granting of any authority. Applicant's contention as to procedural errors in this matter were found invalid.—Carolina Transit Lines, Com. Car. Applic., 111 M.C.C. 630 (633)*.

Non-size and non-weight items may be combined with size-and-weight items if the smaller items are related to size-and-weight items. General commodity carriers can also provide proposed service if size-and-weight commodities are handled by shippers and consignees. Application by heavy-hauler carriers for authority to combine and transport non-size and non-weight items with larger items when the smaller items are not related to the size-and-weight items transported is denied as shippers' testimony on need for such service is so generalized and lacking in specific details as to prohibit reasonable analysis by Commission.—Ashworth Transfer, Inc., Ext.—Complete Service, 111 M.C.C. 652 (660-1).

Where existing interline service was not shown to be inadequate and a grant of the application herein would have an adverse effect on communities receiving "peddle" service from the sole protestant, application was denied.—Bowman Transp., Inc., Ext.—Jackson, Ala., 113 M.C.C. 633 (636)*.

Commission, citing 86 MCC 536, denied application as no plan was put forward showing the involved ex-rail "commodities in bulk" will indeed move in future and applicant is supported only by a connecting rail line that seeks intermodal transportation in its own interest.—Commercial Carrier Corp. Extension—Dade County, Fla., 113 M.C.C. 684 (686)*.

Commission denied application herein in light of the findings that existing service was not shown to be inadequate, protestant would be adversely and materially affected, and that the "follow the traffic" aspect of the application was virtually the only factor weighing in applicant's favor (see 61 MCC 748).—Theatres Service Co. Ext.—Duluth, Ga., 113 M.C.C. 744 (751-2)*.

Applicant's proposed operations found to be common carriage of general commodities, rather than alleged contract carriage, and evidence of record does not warrant the granting of motor common carrier authority as no need for additional service has been shown.—C-Line, Inc., Extension—Precious Jewelry, 114 M.C.C. 226 (232-3).

Applicant has not shown that additional irregular-route, general-commodity service of an essentially short-haul nature is needed as supporting shippers have failed to solicit protestants for service or otherwise show protestants' service inadequate.—Jayne's Motor Frt., Inc., Ext.—Southampton Township, N.J., 115 M.C.C. 700 (705-6)*.

Applicant's petition for permanent extension of authority held on a temporary grant was denied when evidence adduced by protestants revealed that supporting shipper did not make a concerted effort to utilize other available carriers whose service to points in question was considered adequate by Commission. It has been held frequently that emergency transportation demands during peak periods of shipping activity do not afford a proper basis for a grant of permanent operating authority.—Gra-Bell Truck Line, Inc., Ext.—Coloma, 115 M.C.C. 872 (879-880)*.

Applicant sought authority to transport clay from Thomas County, Ga., to points in 27 States (with exceptions). Evidence in support of the application failed to show a future need for service to all States west of the Rocky Mountains, where, admittedly, shipper had no customers and was not soliciting business. Division 1, on reconsideration, concluded that shipper's evidence was generally vague and nonspecific as to present transportation needs and that the services of one protestant had not been shown to be inadequate in any material respect. Therefore, applicant failed to demonstrate a need for any portion of the proposed service. Denied.—Caravan Refrigerated Cargo, Inc., Ext.—Clay, 118 M.C.C. 690 (693-4)*.

Desire for connecting link: [Vols. 12, 19, 21].—See Alterman Transport Lines, Inc., Extension Case, *interchange*, below.

Desire for particular carrier: [Vols. 11, 12, 16-19, 21].—See also Schilli Motor Lines, Inc., Conversion Application, at §207(a), n. 25 *Conversion*.

Mere desire of supporting shippers for applicant's service, rather than an actual need therefor, does not justify granting authority sought. Therefore, since the testimony of supporting shippers is indicative only of a preference for the proposed service and demonstrates that vendee's proposed operations would not substantially meet any demand for service not presently being satisfactorily provided by existing carriers, application denied.—Eagle Motor Lines, Inc.—Purchase—Victory Frt. Lines, Inc., 101 M.C.C. 368 (375)*.

Supporting shippers' statements do not establish a real need for proposed additional service but rather are at most only indicative of shipper preference for applicant's proposed service. Moreover, grant herein would effect substantial diversion of traffic from protestants whose services have not been shown inadequate. Denied.—Commercial Motor Frt., Inc., Ext.—Crawfordsville, Ind., 114 M.C.C. 500 (523)*.

Economy and efficiency: [Vols. 12, 18, 19, 21].—See also AADA Systems, Inc., at §207(a), n. 25 *Truckaway;* and Dieckbrader Express, Inc., Extension at §207(a), n,25*Special equipment*.

The operating rights applied for could not be operated profitably solely as a regular local service in view of the sparse population of the area; therefore, a need for the service having been shown, a restriction against overhead traffic, which would make the proposed service feasible, is not warranted.—Garrett Freightlines—Control and Merger—Eastern Oreg., 104 M.C.C. 515.

Applicant's proposed operation must be sustained by a reasonable daily volume of traffic in order to be economically feasible. Protestant's experience based upon actual operations between the points under consideration indicates that there is insufficient traffic moving between Memphis and Florida points to sustain applicant's proposed schedules and, as a consequence, applicant, if this application were granted, would be unable to maintain the flexibility of an irregular-route operation.—Bowman Transportation, Inc., Extension, 107 M.C.C. 876 (881)*.

The Commission granted authority for extension of applicant's regular route operations to Michigan and the Midwest from points in the Southeast, in order to create single-line service. The joint-line service available was found to be inadequate in terms of the economy and efficiency of its operations, and therefore protection was not considered justified.—Ryder Truck Lines, Inc.—Ext.—Mich. and Short Routes, 114 M.C.C. 852 (860-861)*.

Applicant seeking to modify its 11 passenger restriction to a 20 passenger restriction in transportation between Wilmington, Del. and Philadelphia and between an airport in New York City and points in Pennsylvania, on the basis of economy and needed improvements, failed to substantiate adequately either the alleged economy or the improvements to be derived from the proposed modification. Specifically, applicant did not indicate any consideration of cost difference between operation of the different size vehicles required to transport the differing number of passengers, and failed to consider that passengers may not all simultaneously require the transportation offered. Application denied.—Salem Transp. Co., Inc. Ext.—Additional Passengers, 117 M.C.C. 405 (409)*.

Extended authority to transport sectionalized buildings ("double-wides") granted, inasmuch as authority will result in efficiency and operating economies redounding to the benefit of the supporting shipper, and whatever slight effect limited additional competition from applicant may have upon protestants was found to be outweighed by shipper's need for additional service.—Chandler Trailer Convoy, Inc., Ext.—Lexington Trailers, 117 M.C.C. 653 (658-659)*.

Applicant was not a newcomer in the area of proposed operation, and would be able to utilize its existing equipment and facilities more efficiently and with greater economy if it were to receive the interstate charter rights sought in this application. Not only would applicant's operating efficiency be enhanced by a grant of such authority, but also the chances for its continued economic viability would be materially improved, resulting in the continuation of local transit service, under private ownership, to the residents of the small communities of the area. Granted.—Western Mass. Bus Lines, Inc. Com. Car. Applic., 118 M.C.C. 74 (83)*.

Applicant would offer generally small shippers located in Mississippi efficient and economical single-line motor common carrier service to Memphis, by obtaining authority to operate over additional routes. The single protestant had no direct authority to serve Memphis, and on numerous occasions its joint-line through the Memphis gateway proved unsatisfactory to supporting shippers. Granted.—Merchants Truck Line, Ext.—Hattiesburg, Etc., Miss., 118 M.C.C. 87 (94)*.

Environment: Although the environmental impact of the outcome in this proceeding is not of great significance when considered in its isolation, applicant's commendable plan to acquire propane-fueled buses, in order to reduce noxious exhaust emissions, is a feature of public importance and should be accorded due consideration. Granted.—Western Mass. Bus Lines, Inc., Com. Car. Applic., 118 M.C.C. 74 (84)*.

The Commission disagrees with applicants' position that established criteria governing applications for certificates of public convenience and necessity must give way to more "liberal" standards of proof when the commodities to be transported will arguably have a beneficial effect upon the environment. We believe that adherence to existing standards of public convenience and necessity will best achieve goals of the National Environmental Policy Act (NEPA). However, we believe also that it would be contrary to letter and spirit of NEPA, as well as our duties under the Act, to adopt rigid rules or presumptions for cases where environmental issues are alleged or found to be present. Service proposed may be adequately provided by existing carriers, including applicants under their present broad authorities. Proposal authorizes operation of vast and indeterminate scope presenting substantial possibilities for abuse. Application denied.—Jones, Inc., Ext.—Antipollution Control Commodities, 118 M.C.C. 253 (266-71).

Existing carriers: [Vols. 12, 18, 19, 21].—See also Click Messenger Service, Inc., Ext.—N.Y. & N.J., at §207(a), n. 25 *Express;* Drum Transport, Inc. v. United States, at §207(a), n.9; Frozen Food Express Ext.—Four States, at §207(a), n. 25; and M. R. & R. Trucking Co., Extension—Birmingham, at §207(a), n. 25 *Existing service.*

Grant of new authority for proposed service over irregular routes between designated points is not warranted where record is devoid of specific complaints respecting services offered by 45 protestants whose operations blanket the territory sought to be served; protestants operate sufficient equipment, maintain terminals throughout the territory and have shown their willingness and ability to handle additional traffic. Additionally, shippers require, essentially, a less-than-truckload service, and their desire for continuance of satisfactory service rendered by applicant under its authority restricted to "truckload lots" does not show need for proposed service.—Southwest Freight Lines Ext.—Removal of Restriction, 95 M.C.C. 269 (278-9)*.

As protestant holds recently issued permit to transport cash letters in part of area wherein applicant seeks similar common carrier authority, duplicative service by applicant should not be authorized.—Continental Dispatch, Inc., 95 M.C.C. 483 (489).

Owing to circuity, interchanges required, and excessive transit time of existing motor carrier service available between Nashville, Tenn., and points in northern Mississippi, existing service is clearly inadequate. Nashville shippers are at a disadvantage compared to their competitors in Birmingham, Ala., and Memphis, Tenn., in trying to serve present customers or gain new ones in the northern Mississippi area. Authority granted between Selmer, Tenn., and Nashville, serving Selmer for purposes of joinder only, and restricted against transportation between Nashville, on the one hand, and, on the other, any point in Tennessee, will enable applicant to provide the single-line, overnight service shown to be needed.—Dean Truck Line, Inc., Extension, 96 M.C.C. 184 (189-91).

Shipper of variety of canned and frozen foods showed need for services of either of two applicants both of whom are experienced and possess equipment and terminal facilities suitable for shipper's needs. One carrier, however, presently participates extensively in movements to two of the three destination States involved so that the authority sought would be merely an extension of its present operations, whereas the other shipper would be conducting a new service. While the shipper has reason to complain of instances of breakage, the carrier participating in the movement has conducted experiments to reduce this breakage and has installed special equipment, and although that service is less than perfect, it is not so deficient to be ruled inadequate and the carrier providing it should be granted the authority.—Willis Shaw Frozen Exp., Inc., Extension, 96 M.C.C. 225 (228, 230-31).

Grant of authority sought will cause protestant to lose revenue it receives, under lease agreements with applicants, on shipments moving from considered origins to interchange points; however, since applicants have been rendering in effect a single-line service, operations of protestant connecting line (that exercises little control over the interchanged equipment and does little more than collect payments for applicant's use of its rights) would be neither endangered nor impaired.—Kroblin Refrigerated Xpress, Inc., Extension, 96 M.C.C. 233 (240)*.

Shipments of frozen foods from Oregon and Idaho to Wyoming, Nebraska and Nevada and Nevada generally involve less-than-truckload quantities which are handled in connection with shipments en route to final destinations in Colorado, Arizona and California. Applicant's request for authority to serve these states was denied on a showing that one or more of the six protestants has authority to transport and drop off shipper's traffic at all points and areas embraced in application. The relatively few occasions when shipper was troubled by rejected shipments carried by protestants appear to have been isolated and to have occurred during periods of extreme shipping activity and are not sufficient to justify a finding that protestants' services have been inadequate to a material degree.—Willis Shaw Frozen Exp., Inc., Extension, 96 M.C.C. 560 (563-5).

While it was recognized that the phenomenal growth of the frozen food industry has generated a need for additional motor carrier service, existing carriers are entitled to the opportunity to provide the needed service before a new competitive operation may be authorized. During this proceeding, the protestants pointed out in their exceptions that they had applications filed and pending with the Commission for various authorities which would duplicate, in whole or in part, the authority applicant seeks. After service of examiner's report and the filing of exceptions and replies, the Commission granted the protestants' pending applications, and on the basis that protestants now possess authority to provide the services for which the shipper professed a need in the proceeding, the application was denied.—Id., pp. 564-5.

As charter revenues are becoming increasingly more important to passenger carriers, the holders of charter rights, incidental or otherwise, should not be subjected to the added competition of a carrier offering similar service without a clear showing that there is a substantial demand for that service. Protestants collectively hold authority to provide regular-route service at, and incidental charter service from, the major population centers of nine Iowa or Nebraska counties where applicant seeks charter authority, and applicant has not shown that they are unable or unwilling to meet the reasonable charter transportation requirements of the traveling public in those areas. Accordingly, no new charter service will be authorized that will infringe upon protestants' operating rights.—Arrow Stage Lines, Inc., Investigation and Revocation, 96 M.C.C. 572 (579).

Protestants have not shown they will be seriously injured by a grant of authority which would enable applicant to continue the service shown to be needed; evidence presented by protestants with respect to loss of traffic remains unsubstantiated, and there is no evidence produced to show to what extent they have been injured by applicant's interstate operations conducted under color of his registered authority. Additionally, protestants cannot provide the type of service performed by applicant, shown to be required and they cannot be said to rely upon such traffic.—Bowser—Investigation of Operations, 98 M.C.C. 170 (178-9).

If existing carriers' authority enabled them to transport the considered commodity, they still could not service the whole of the proposed territory. Therefore, application granted, limited to areas not served under protestants' existing territorial authority, because applicant failed to show that the protestants could not transport liquid fertilizer under their existing authority, which prohibited them from transporting petroleum products.—Delaware Exp. Co. Extension, 98 M.C.C. 733 (739-40).

Protestant carrier cannot provide the needed service because its authority to transport "pipe, pipeline material, machinery, and equipment incidental to and used in connection with the construction, repairing, or dismantling of pipeline" is not authority to transport waste disposal pipe; the considered waste disposal pipe is not a "pipeline" as used in the construction or transportation industry and as employed in protestant's commodity description; thus, protestant is not authorized to provide needed service—C&H Transp. Co., Inc., Extension, 99 M.C.C. 112 (115).

Protestants' authority to transport trailers designed to be drawn by passenger automobiles does not authorize them to transport considered individual units of prebuilt houses which, although tendered for initial transportation on wheeled undercarriages equipped with frames and hitch ball connections for towing by power units, are intended for use in permanent, as opposed to mobile, residences and are suitable for use only after they are joined together at their destination to form complete houses. Granted.—Morrison Common Carrier Application, 99 M.C.C. 617 (619-20).

Protestant railroads offer a service similar to, but lacking flexibility of, that proposed; and although protestant regular-route motor carriers also offer a similar service, evidenced by their tariffs, they have failed to show, as a practical matter, that such service is generally available to supporting shippers. Thus, no existing carriers provide needed irregular-route multiple pickup and delivery service proposed by applicant. Granted.—Watkins Motor Lines, Inc., Ext.—North & South Carolina, 103 M.C.C. 227 (248-250).

As an authorized carrier whose services have not been shown to be inadequate, and which stands to lose traffic if requested authority is granted, protestant would normally be entitled to protection against additional competition; however that policy is not absolute. Since protestant is commonly controlled through management with a competitor of one supporting shipper, and is the only motor carrier offering service of the type proposed, possibilities for discrimination and favoritism are present. A shipper should not be required to choose between inadequate transportation and the dangers of using a carrier with interests inimical to its own; therefore, since the public interest will best be served by grant of authority to a carrier not afflicted with a conflict of interest, applicant is granted authority to transport audit media and other business records.—American Courier Corp., Extension, 103 M.C.C. 298 (303-4)*.

The quality of for-hire bus service used by patrons of six casinos supporting applicant's proposed passenger service, particularly the type of equipment furnished and convenience of schedules afforded, is a vital factor upon which success of the casinos' operations largely depends. As stated in 99 MCC 506, bus passengers, especially those using pleasure tour services, are interested in and entitled to more than mere expeditious transportation and, in such situations, evidentiary standard of "convenience and necessity" implies more than mere adequacy or availability of agencies whereby a traveler is conveyed from one point to another. Record discloses that scheduling and equipment deficiencies in protesting bus lines' operations, manifested by the casinos' complaints, are sufficiently material to justify a finding of reasonable public need for applicant's proposal; and protestants failed to show that they can remedy the deficiencies and provide the type of service needed. Authority granted will inject improvement in present services and will serve as a deterrent to future service deterioratios.—Gray Line Scenic Tours, Inc., 103 M.C.C. 807 (813-16)*.

Existing carriers' practice of leasing their equipment does not necessarily give rise to a need for motor service, which can be cured only by private ownership of equipment operated by carriers' own personnel. This does not mean, however, that such arrangements may not be considered when they have resulted in carriers' inability to meet shippers' needs for adequate transportation service.—Point Transfer, Inc., Extension, 105 M.C.C. 634 (658-9)*.

Existing operations of any opposing carriers become an important element for consideration in determining whether public need for an applicant's proposed service is shown; however, that cannot be the limit of the Commission's inquiry, especially in a proceeding which involves passenger services between highly populated areas. Accordingly, in ruling on application for authority to transport passengers between Wareham, Mass., and New York, N.Y., consideration must be given to the maintenance of a balanced passenger transportation "system" within scope of the application; also, factors such as the existence of sufficient carrier capacity to encourage competition, incentive for real innovation and improvement in services to the public, and constraint against monopolistic-bus operations must be evaluated.—Almeida Bus Lines, Inc., Extension, 106 M.C.C. 311 (323)*.

Applicant's proposed service will provide travelers with several contrasting schedules that will serve the expressed need of that section of the traveling public which desires direct and favorable schedules more suitable to their needs. Moreover, grant of the application will generate new traffic from those who have not traveled because of personal inconvenience of existing bus service or from persons now using other modes of transportation and, in addition, the indicated public support shows that territory proposed to be served can support more than one passenger carrier. Opposing carriers will not be deprived of a significant amount of traffic that would threaten their continuation of service, in view of the restrictions and limitations of the authority granted. However, as New London is the only community in Connecticut having adequate support for inclusion as a service point, authority to serve other intermediate points in that State is not justified. Granted in part.—Id., pp. 325-6.

While on a collective basis there appears to be a fairly sizeable quantum of service available from existing carriers, it is not sufficient to meet the foreseeable future needs as developed on the record. Accordingly, applicants' *Willett* commodities authority (89 MCC 427, which excluded service on behalf of builders or operators of water systems and sewerage lines from applicant carriers engaged in pipe-stringing operations) expanded to enable them to provide pipe industry shippers with a complete service at various rights-of-way within their respective currently licensed territories. Such action is consistent with numerous Commission decisions, where the Commission has taken into account the effect of changing industrial patterns on carriers serving particular industries.—Willett Extension—Pipeline Machinery, 106 M.C.C. 354 (357, 363-4).

Inadequacy of existing service is clearly shown by protestant carriers' (1) reluctance to interline truckload traffic at Charlotte, N.C., gateway, (2) inability to interline traffic between points in Florida, and (3) excessive and erratic transit time in transporting less-than-truckload shipments between Charlotte and points in Florida. Moreover, carriers serving Charlotte have tariff restrictions or operational procedures which impair the movement of traffic from Charlotte to points in Florida, and carriers, authorized to serve points in Florida do not meet need established by supporting shippers for a reasonable, consistent transportation service between these points and Charlotte, either by single or joint-line movement. Application granted accordingly.—Alterman Transport Lines, Inc., Extension, 106 M.C.C. 402 (415-20)*.

Although the Commission has often stated that existing carriers are entitled to transport all traffic they can handle adequately and efficiently before a new carrier may be authorized to enter the field, need for proposed authority stems basically from the growing number of frozen food products on the market and from the need or desire of shippers' consignees to keep their inventories as low as possible. The trend is away from truckload shipments of one food from one origin to one destination; consignees are ordering smaller lots of different foods, more frequently, and hence the increase to L.T.L. shipments, which due to the diversity of foods produced at different points require pickup and delivery at multiple origin points in order to fill out a truckload. Therefore, since protestants' regular route authority is not adequate to meet needs of supporting shippers, considered applications to transport mixed shipments of frozen foods and commodities over irregular routes granted.—United Buckingham Frt. Lines, Extension, 106 M.C.C. 539 (550-56).

The preponderance of evidence militates against any grant of authority in that (1) shipper testimony is unconvincing that the present interline service results in unreasonable delays, (2) testimony pertaining to shipments that were delayed is vague and contradictory, and (3) opposing carriers provide ample single line service between heavy-volume shipping points. Thus there is no specificity to establish any general pattern of real service inadequacies, and the grant of applicants' requested extensions would only serve to diffuse the available traffic among the competing carriers.—Cushman Motor Delivery Co., Extension, 106 M.C.C. 809 (818-19).

Protestants are not authorized either collectively or separately to perform the service for which applicant seeks authority, since one protestant's ambiguous certificate is interpreted to authorize his service from only 2 of the 12 origin points and only to 6 destination points, while another protestant may not tack his round-trip charter authority to his regular route authority for lack of a point of service common to both; another protestant has not established by significant evidence that its incidental charter authority extends to all points within 10 miles of its regular routes as he claims, while another who has shown that it may transport charter parties as a matter of right by tacking its round-trip and one way charter operations to the District of Columbia with its regular route authority out of the District of Columbia would, as a practical matter, conduct an inadequate service involving backtracking and circuity.—Harry Lee Eyre, Jr.—Extension, 106 M.C.C. 851 (857-61).

Applicant has demonstrated a need for service which clearly is not counter balanced by any possible adverse effect which a grant of authority might have on protestant since applicant is shown to be an active participant in the movement of all types of contractors' machinery and equipment under color of right; moreover, the protestant carrier is shown to have prospered to a somewhat greater extent than has applicant during the period in which they have been competitors. Accordingly, a grant of the authority would not create a new or aggravated competitive situation to the detriment of other carriers.—Mayfield Sons Trucking Co.—Removal of Restriction, 106 M.C.C. 892 (896)*.

Applicant's proposed service differs materially from that provided by the mass transportation media in that it offers door-to-door service, with all expenses paid, eliminates the inconvenience experienced by commuters in transferring from one carrier to another, often accompanied by delays; the need of using private transportation or walking some distance to reach the existing service; and will permit the passengers to enjoy all the comforts of personal transportation without the attendant disadvantages, a service which cannot be made available to the general public served by protestants. Applicant desires to operate over irregular routes, which further distinguishes its service from that of the protesting regular-route carriers and will better meet the need expressed by the supporting witnesses.—Monarch Associates, Inc., 107 M.C.C. 277 (284-85)*.

Grant of authority for proposed transportation of mushrooms and mushroom products (including canned mushrooms) in refrigerated equipment is warranted by applicant specializing in transportation of perishable and frozen foods; when supporting shippers have demonstrated a clear need for less-than-truckload shipments in single-line service because of the highly perishable nature of the commodity; and protestants, although they hold adequate authority to provide the proposed service, have failed to show a willingness to provide service on less-than truckload shipments.—Belford Trucking Co., Inc. Extension 108 M.C.C. 5 (7, 15)*.

Applicants' fleet of vehicles includes air-ride suspension trailers designed solely for carriage of nuclear materials, and its drivers are specially trained in handling of radioactive materials. Both applicants offer supporting shipper on-call service, and will provide timed deliveries tailored to customer specifications. Shipper requires, on both inbound and outbound movements, pickup and delivery service in exact accordance with Atomic Energy Commission rules. Protestants, all heavy-haulers, lack either experience in nuclear transportation or the air-ride equipment required. Although the forecast as to origin and destination of such traffic is, of necessity, somewhat imprecise, it is obvious that from the actual and planned construction of atomic reactors that there exists potential nationwide market for such service which cannot be met by existing carriers; applications granted.—Tri-State Motor Transit Co., Ext.—Radioactive Mats., 108 M.C.C. 228 (231-34).

Modification of the review board's decision with respect to movement of sugar from Baltimore to points in Ohio and Michigan is required when supporting shipper's complaints relating to existing carriers' inability to supply sufficient equipment at all times and the failure of such carriers to return pallets used on outbound movements of sugar from Baltimore is not substantiated by the evidence. There is no substantial evidence to show when and how often these shortages of equipment occurred, or from and to what points needed transportation was denied shipper. Shipper was unable to give any specific testimony concerning lost sales due to protestants' unwillingness to return pallets. Therefore, that portion of the application relating to movement of sugar from Baltimore is denied. Since protestants are unable to render complete and flexible service required by remaining shipper, grant of authority to serve this applicant is affirmed.—Bilyeu Refrigerated Transp. Corp. Ext.—Baltimore, 108 M.C.C. 238 (241-43)*.

Supporting shipper requires transportation of cooling towers from its plant sites at or near Stockton, Calif., to points in Arizona, California, Idaho, Nevada, Oregon, Utah, Washington, and Wyoming. Protestant offers no service to points in Arizona and Nevada; while to points in Utah and Wyoming a joint-line trailer interchange service is offered in connection with a carrier limited to "size and weight" commodities, which connecting service is not sufficiently shown in the record to be willing or able to participate in such movements. The somewhat piecemeal transportation available from protestant cannot meet the supporting shipper's reasonable requirements for a flexible, complete and economical source of motor distribution for its products. Application Granted.—C & H Transportation Co., Inc., Extension—Stockton, Calif., 108 M.C.C. 395 (396-400)*.

Common carrier authority is granted to applicant, a specific-commodities carrier, to transport pipe, plate or sheet, steel roofing, iron or steel and similar articles, from Beechbottom, Va. and Steubenville, Martins Ferry, and Yorkville, Ohio to various points in the destination states. Public need for the proposed service has been shown by the supporting shippers since heavy-hauler protestant cannot provide shipper with a complete service. Authority granted is subject to certain conditions. In the embraced proceedings a need has been shown for the transportation of agricultural machinery and parts thereof when moving incidental to and in the same vehicle with said agricultural machinery subject to certain conditions. However since applicant's fitness is in issue in another of its application proceedings, this proceeding will be held open for further consideration of applicant's fitness after final determination of applicant's fitness in the other proceeding.—Herr's Motor Exp., Inc., Extension—Wheeling Steel, 108 M.C.C. 626 (627, 631-37)*.

Before this application proceeding, shipper successfully supported 26 motor carriers for authority to transport the involved commodities to points in its destination territory. Each of those applicants was granted authority to transport the involved commodities (chemicals and fertilizers) which commodity description embraces the products involved in this application. Nevertheless, the shipper alleges that it has experienced numerous difficulties in obtaining equipment. Shipper has used the services of only five of these carriers. Shipper does not state that it has requested service from any of the others nor that those others have been unable or unwilling to provide the needed service. Two of the 26 carriers which shipper originally successfully supported oppose this application. They express an interest in moving the traffic, yet have been given limited opportunities by the shipper. Preference for a particular carrier's services is not enough to warrant a grant of authority, and the mere fact that other existing motor carriers do not oppose the application is not, of itself, sufficient to warrant the conclusion that they are unable or unwilling to meet the normal transportation requirements of the shipper; denied.—Umthun Trucking Co., Extension—Colorado, 108 M.C.C. 669 (671, 674)*.

The decision of the Commission to grant an extension of nationwide nonradial authority to applicant constitutes a reversal of a prior ruling (107 MCC 556), and is the first such grant in several decades. The principal basis of the decision was the inability of extant carriers to provide timely service. That the applicant specifically solicits and handles substantial amounts of national account business did not defeat its cause, particularly since it was shown to advertise, solicit, and handle a considerable tonnage of c.o.d. business and intended to continue to do so if the authority sought were granted. Proceeding designated as one involving issues of general transportation importance.—Fernstrom Storage & Van Co. Ext.—Nationwide, 110 M.C.C. 452 (455-457)*.

Application for authority to transport osseine between indicated points denied as protestant has the authority and equipment to perform the involved transportation and should be afforded an opportunity to provide the service.—Bonded Freightways, Inc., Ext.—Osseine, 111 M.C.C. 137 (143).

Authority for nationwide transportation of described commodities granted to extent that existing carriers lack commodity or territorial authority to provide such service. although service by existing carriers considered individually is satisfactory, shippers' testimony shows that their products are marketed on a nationwide scale and proposed service is required to fill operational voids resulting from certificate restrictions on existing carriers which preclude such carriers from offering a complete service.—Warren Transport, Inc., Ext.—Vehicles, 112 M.C.C. 264 (266-70)*.

Protestants' failure to reply to applicant's petition for reconsideration is an indication of lack of interest in the involved traffic and such action detracts from the weight that their opposition would normally be accorded. Since this lack of interest shown reflects that fact that they will not be affected by the grants of authority requested, application is granted.—Morgan Drive-Away, Inc., Extension, 113 M.C.C. 137 (138, 140)*.

Except for one protestant no existing carriers can offer the supporting shipper the complete and flexible service required. Shipper's volume of traffic is considerable, encompasses the entire proposed service area, and is likely to increase. An additional carrier is needed in order to provide the complete and flexible service required.—Holt Motor Exp., Inc., Staten Island, N.Y., 113 M.C.C. 478 (483).

A grant of authority to applicant would divert desirable traffic from protestant short-haul carrier's lines, and impair if not destroy protestant's ability to serve other shippers in the area.—Theatres Service Co. Ext.—Duluth, Ga., 113 M.C.C. 744 (752)*.

At the instigation of a petition for reconsideration filed by protestant, a prior report and order was modified to restrict applicant's authority in two states which conflicted with protestant's authority. Supporting shipper had no complaint as to protestant's LTL service to the two states, and had not utilized his truckload service. Protestant should be given opportunity of meeting shipper's need before new service to same points is authorized. Applicant's petition for authority to three other states and the District of Columbia was unopposed, and granted.—Oliver Trucking Co., Inc., Ext.—Delaware, 115 M.C.C. 554 (557)*.

Shipper's utilization of its primary carrier (Mason and Dixon) found to belie the contention of Chemical Leaman (secondary applicant) that a trend toward bulk shipment justifies or requires an additional carrier, since shipper's use of its primary carrier declined in preceding years. Secondary application denied.—Mason & Dixon Tank Lines Ext.—Florida Chemicals, 117 M.C.C. 539 (547)*.

Supporting shippers and receivers of general commodities, with exceptions, between Portland, Oreg., and Seattle, Wash., require consistent overnight service, scheduled pickup, available specific types of equipment and a carrier willing to handle the involved traffic; and shippers have shown that the existing joint-line service is not meeting their reasonable transportation requirements. Applicant has provided satisfactory single-line service under temporary authority and shippers have indicated that they wish to be able to continue using it. Application granted subject to conditions.—Trans West Exp., Inc., Ext.—Seattle-Portland, 118 M.C.C. 1 (10, 11).

The record established that intermodal containerized movements of general commodities, with exceptions, in containers, and empty containers on return, between ports of entry located in California, Oregon, and Washington, on the one hand, and, on the other points in United States, except Hawaii, require a greater flexibility than regular-route carriers are efficiently capable of providing; that protestants lack the capacity to serve broad territorial areas and do not transport loaded containers from ports of entry to inland break-bulk points; that protestants are not providing shippers with a container service comparable to that proposed; that protestants must interline to pickup or deliver shipments beyond the scope of their limited authorities and that shippers have found such interline services unsatisfactory. Since it is the policy of the Commission to promote containerization the application was granted, restricted to the transportation of traffic having a prior or subsequent movement by water.—IML Freight, Inc., Ext.—Containerized Freight, 118 M.C.C. 31 (32).

The Commission cannot blind itself to the possible demise of a critically needed local transit service upon which the public relies, under the guise of protecting an existing carrier from a relatively insubstantial amount of harm resulting from the establishment of a competitive service in the more lucrative interstate charter business. Equitable considerations as well as sound public policy must be applied.—Western Mass. Bus Lines, Inc., Com. Car. Applic., 118 M.C.C. 74 (84)*.

Inability or unwillingness of existing carriers to supply enough equipment to meet shipper's reasonable requirements resulted in extension of authority to applicant to transport meat and meat products to three states.—Coats Freightways, Inc., Ext.—Swift Meats, 118 M.C.C. 739 (744)*.

Existing service adequate: [Vols. 11, 18, 19, 21].—In action to set aside the Commission's grant of a certificate to intervening defendant carrier, plaintiffs assert that the evidence did not show existing service in the area to be inadequate or unsatisfactory, and stress the examiner's failure to make a finding that existing service was inadequate; however, the Commission was not obligated specifically to find that plaintiff carriers' services were inadequate in order to find need for additional transportation service in the area. That was merely one of the elements to be considered but was not an indispensable finding, although, as recently stated in 389 US 409, the Commission should consider the public interest in the continued health and stability of existing carriers. As a whole, the record supports the Commission's findings and conclusions; sustained.—Midwest Emery Freight System, Inc. v. United States, 293 F. Supp. 403 (406-7, 408)*.

In action to set aside Commission order denying plaintiff's application for authority to provide single-line service between St. Louis, Mo., and points in Florida, there is substantial evidence of record on which the Commission could base a finding that protesting carrier's single-line service was adequate to meet the shipping public's needs.

Although interline or multiple-line service was not fast enough for supporting shippers' needs, during pendency of the hearing the merger of two affiliated protestants provided those shippers with requested single line service and, while there is some indication of inadequacy of that post-merger single line service, evidence supports the Commission's finding that such service is reasonably adequate and will probably improve. Certainly, contrary to plaintiff's assertion, the Commission did not err in considering that service when determing existence of a public need for plaintiff's service. The Commission's decision, being in conformance with the law and supported by substantial evidence on the record, as a whole, must be upheld; complaint dismissed.—Jerry Lipps, Inc. v. Interstate Commerce Commission, 299 F. Supp. 942 (945-6)*.

In suit to set aside Commission order denying plaintiff's application for permanent authority to transport iron and steel, to replace temporary authority granted it to meet the increased traffic caused by threatened nationwide steel strike, the Commission must weigh the requirements of public need and convenience; and its judgment, not the court's must prevail, if it has support in the record and the law. Applying the rulings in 340 US 474 and 385 US 57, as to extent that the record must support the Commission's conclusions, considered decision should be affirmed. The Commission was justified in refusing to accord much importance to volume of shipping requirements during months of union negotiations when virtually all statistics thereon showed dramatic decrease in volume when the strike was averted; thus, it acted wisely in measuring adequacy of existing services against the market norm. Viewing the record as a whole, substantial evidence supports the Commission's decision that existing services were adequate, both in quantity and quality, to meet shippers' demands and needs; complaint dismissed.—Yourga Trucking, Inc. v. United States, 308 F. Supp. 625 (626-8)*.

Applicants have not shown need for their proposed service over irregular routes transporting carbonated canned beverages, from NY point to certain points in designated states; applicants are presently authorized to provide a goodly portion of the service in the area involved since, under their authorities to transport "canned foodstuffs" and "canned and preserved foodstuffs", the involved commodity can lawfully be transported. Additionally, available service of the protestants is sufficient to meet all of shipper's requirements and obviates any need for applicants' additional service. Denied.—Stevens Truck Lines, Inc.—New England, 95 M.C.C. 63 (68-9).

As proof of public need for proposed limousine service between Fort Dix., N.J., area and New York and Philadelphia airports, applicant relies almost exclusively on the fact that as a taxi operator it has transported a number of passengers to and from many of involved points. It adduced virtually no user testimony, and record as a whole shows no significant public demand or need for additional limousine service. Thus, there is no indication that service provided by opposing carriers within limits of their certificates is other than satisfactory, and applicant's ability to develop an economically viable limousine service under a grant excluding those portions of New York and Philadelphia covered by one protestant's authority is doubtful. Grant of authority for limousine service would therefore not be warranted.—D & M Taxi Co., Inc., Common Carrier Application, 96 M.C.C. 439 (445).

The protestants to an application for an alternate interline point are short-haul carriers, who, although able to meet the reasonable requirements of the shipping public in usual circumstances, are tardy with transportation in emergencies, on weekends, or afternoons. While the existing services are somewhat slower than the supporting shippers would desire, they appear able to meet the reasonable transportation needs of the shipping public and application will be denied.—Brada Miller Freight System, Inc., Extension—Kokomo, Ind., 96 M.C.C. 473 (476-7).

Even assuming that protestant is authorized to transport coal from Pennsylvania counties to western N.Y., which is service area sought by applicant, protestant's operations would involve a circuity of routing through an Ohio gateway which, with its tariffs based on mileage, would render its service less than adequate. Rail service is inadequate, because it lacks the flexibility required by supporting shippers, a quality inherent in motor service. This portion of authority requested, granted.—Tajon Trucking Co. Extension—Specified Commodities, 96 M.C.C. 591 (594).

Absence of specific valid complaints indicates that existing service is generally adequate. Applicant's argument regarding service advantages, being in the abstract, is not concretely related to specific needs of shipper for machinery, parts, and attachments. Considering the few actual stopoffs made, asserted need for stopoff service is insignificant, and, in addition, the service record lacks specific traffic figures on shipments of 5,000 pounds or less, although this is the traffic primarily involved. Also, existing carriers would lose substantial traffic if requested authority were granted. Denied.—C & H Transp. Co., Inc., Extention—Compressors, 98 M.C.C. 1 (9).

Applicant Canadian carrier has shown material inadequacy in present service on specified commodities from proposed U.S. origins to port of entry at Buffalo on traffic moving to Canadian destinations. Rail service does not meet need for expedited service and direct deliveries to various Canadian points; none of protestant motor carriers serving any of the U.S. origins involved have arrangements with the protestants serving ultimate destinations within Canada; and carriers serving Canadian points, although they attest to interchange arrangements with other carriers serving internal U.S. points, do not show extent of the operations authorized or whether they involve the type traffic under consideration. None of the protestants are authorized to serve one of the origin states, and there is no showing that any of them can provide the service shown to be required from the other points recommended by the examiner. Also, none of the protestants which may serve supporting shippers operate automatic unloading equipment necessary for efficient, economical, and damage-free delivery at final destinations. Granted in part.—Balzas Common Carrier Application, 98 M.C.C. 522 (526-7)*.

Existing transportation services are adequate to meet the shipping public's reasonable requirements. Neither supporting shippers were aware that protestants could, under their combined authorities, render service from Nebraska origins to California and Colorado, or that they hold out through-trailer service involving no physical transfer of lading. Not only do these carriers appear fully capable of meeting the shippers' requirements, but the shippers themselves have also indicated their willingness to use any satisfactory available for-hire service. Thus, since existing carriers should be afforded the opportunity to transport all traffic they can handle adequately, economically and efficiently in the territory they service before a new carrier is permitted to enter the field and since applicant has not sustained the burden of proving that such carriers cannot or will not satisfactorily perform proposed new service, application denied.—Curtis, Inc., Extension—Diary Products, 102 M.C.C. 388 (391-2).

While the supporting shippers testified to need for specialized transportation of large, heavy, complex, and in some instances fragile machinery and equipment, there is no definitive showing that existing service is materially inadequate to meet the shippers' needs. Shippers' testimony is vague and not supported by specific examples; it merely reflects a desire for the services of as many carriers as possible. In addition, although statement of facts discloses some minor dissatisfaction with joint-line service, it falls far short of establishing that interlining is productive of any significant delay in transit time at the interchange points. Also, interline service between two or even among three carriers cannot be said to be *per se* inadequate particularly where, as here, some very long hauls are involved. Denied.—Leonard Bros. Transfer, Inc., Ext.—California-Texas, 103 M.C.C. 263 (265-67).

On the record, the existing operations of protestant carriers do not reflect an overall pattern of service deficiencies which, *per se*, warrant grant of authority to applicant. Although many of the supporting shippers express dissatisfaction with the general level of protestant Ryder's service, said service has not been shown to be in excess of the standard of reasonableness (determined by considering various factors, including the theoretical over-the-road running time, past comparable operations by applicant and protestants, pick up and delivery time, and terminal handling time). Moreover, most of the shippers who express said dissatisfaction have not been concerned enough about receiving an improved service to acquaint themselves with other protestants' existing services, nor have they made a reasonable effort to move their traffic by means of the other services available. Protestants conduct services similar to those proposed, and applicant has failed to show any significant deficiencies in them. Denied.—Terminal Transport Co., Inc., Ext.—Birmingham, 103 M.C.C. 699 (714).

In view of the plethora of direct and indirect service, still untied by supporting shippers, applicants have failed to show need for their proposed service, especially when the only shipper complaints are not directed to substantive defects in the existing service. In addition protestants' present authority to transport in bulk plastic pellets permits them to transport plastic liners as an item incidental to that authorized, since the liners are required to safeguard the pellets from contamination and, in light of past attempts, it is impractical for the liners to be transported in any other manner.—Olson Transportation Co. Ext.—Dry Plastics, 103 M.C.C. 919 (923-4).

The record does not show any lack of existing service which might warrant granting applicant authority between Birmingham, Ala., and the Florida Panhandle. An examination of the demonstrated standards of operation and the number of carriers who are competitive participants in the overall existing motor common carrier transportation "system" between Florida Panhandle and northern Alabama commercial centers shows that the single-and joint-line services provided, or which are available and untried, are reasonably adequate to meet needs of the shipping public. However, as to application for authority to operate between Mobile, Ala., and Panhandle points, there is little indication by existing carriers of any significant interest or demonstrated willingness and ability in meeting expressed needs of supporting shippers for movement of traffic through the Mobile gateway; accordingly, authority sought in embraced proceeding, as restricted, is granted.—M. R. & R. Trucking Co., Extension—Birmingham, 105 M.C.C. 69 (81, 83)*.

Although in prior report there was no showing that protestants or other existing carriers are unable or unwilling, or are not, in fact, presently providing adequate service in the handling of considered traffic, a determination as to the adequacy of the service of existing carriers is not, in the circumstances here present, a controlling factor as to whether proposed service is required by public convenience and necessity, inasmuch as this service has existed, albeit unauthorized, under color of right for a number of years. Therefore, continuance of this service cannot be said to create a new or aggravated competitive situation to the detriment of other carriers. Granted.—Dixie Ohio Exp., Inc., Investigation and Revocation, 105 M.C.C. 835 (841-2)*.

Since opposing carriers provide ample single line service between heavy-volume shipping points, and shipper testimony is unconvincing that the presently used interline services result in unreasonable delays, testimony pertaining to such shipments being vague and contradictory, the preponderance of the evidence militates against any grant of authority in that it lacks specificity to establish any general pattern of real service inadequacies. Grant of applicants' requested extensions would only serve to diffuse the available traffic among the competing carriers.—Cushman Motor Delivery Co.—Extension, 106 M.C.C. 809 (818-9).

Existing carriers are entitled to all the traffic they can handle adequately, efficiently, and economically within the limits of their authorities before a new competitive service may be authorized. In the instant proceeding, each protestant has the authority to perform the proposed service. In the proposed service area, protestants collectively (a) have numerous terminals and over 500 assigned vehicles which, through efficient communication systems, can be supplemented by equipment from other areas, (b) attempt to attract traffic by means of extensive advertising, (c) are able and willing to comply with service requests within a reasonable time, and (d) are actually handling the involved traffic. Further, only one actual user of the proposed service supports the application, and complaints about existing service consist primarily of general allegations. Of the two specific complaints about existing service, one is so remote in time as to be of minimal probative value, and the other, a delay in the pickup and delivery of a trailer resulting from weather conditions and mechanical failure, is of minor significance. Denied.—Hintze, Common Carrier Application, 107 M.C.C. 348 (356).

Applicant's proposed performance of accessorial services in the transportation of mobile homes does not warrant a grant of the instant application, since protestants do perform and are willing to perform, or to secure the performance of, any accessorial services of any consequence mentioned by the supporting witnesses herein. The record shows that requests by shippers for various services, in addition to the line-haul service, are dependent to some extent on financial and other considerations and not the availability of such services. Further, applicant's evidence fails to establish that he is in compliance with, or even aware of, the state of Maryland's provisions regarding the performance of plumbing services.—Id. at 357-8.

Seventeen public witnesses support this application for authority as a common carrier of passengers and their baggage in charter operations. Of the seventeen public witnesses, four witnesses characterize the services of the protestants as satisfactory. Ten other witnesses indicate that the services of either one or both of the protestants has not been used. A few complaints have been registered against one of the protestants, but, where such was the case, the service of the other protestant has not been used. Protestants own equipment suitable for charter operations, employ drivers experienced in transporting charter parties, and actively solicit charter business in the involved area. The Commission does not consider mere preference for a particular carrier sufficient to warrant a grant of authority. The record shows that the existing service, as a whole, has not been tested and shown to be inadequate. Protestants have demonstrated that they are able to meet the reasonable transportation requirements of the traveling public; denied.—Roesch Extension—Eleven Western States, 108 M.C.C. 706 (707, 713, 714).

Normally, existing service must have been used and found deficient to support a conclusion of inadequacy. There has been no pertinent use of protestants' service by supporting shippers herein; but, however, only two of the protestants are capable of furnishing the required heavy-hauler service, and they have expressed minimal interest in shippers' traffic in the past because of the great distance they must deadhead to provide such service Granted.—Wehe Common Carrier Application, 110 M.C.C. 798 (808-9).

Application for authority to transport printer's ink from Buffalo, N.Y., to Sylacauga, Ala., denied as applicant has failed to establish any inadequacies in protestant's service. Protestant's authority to transport "liquid chemicals" was found to include printer's ink.—Ecoff Trucking, Inc., Extension—Buffalo, N.Y., 111 M.C.C. 395 (399).

Applicant has not met the burden of proving that the existing service performed by protestant motor carriers on secondary, truckaway movements of housetrailers is inadequate. Shippers' complaints against protestants' service are few and represent only occasional service failures normally occurring in transportation business. Applicant's extra accessorial services are infrequently required and protestants have met such requirements in past by use of hired third persons. Application denied.—Martin Trailer Toters, Inc., Common Carrier Application, 111 M.C.C. 841 (857-9)*.

Since existing for-hire carrier service is reasonably adequate to meet supporting shippers' transportation requirements, no need is shown for proposed service. Mere desire for more expeditious service is insufficient to warrant grant of new authority; denied.—Overnite Transp. Co. Elimination of Gateway, 103 M.C.C. 135 (144, 146); although supporting shippers desire improved service, desire is counterbalanced when consideration is given to limited traffic flow to and from involved area. Protestant's single-line service may not reach optimum adequacy and may leave room for improvement, but does not reflect an overall pattern of deficiencies; denied.—Bowman Transportation, Inc., Extension, 107 M.C.C. 876 (880)*; protestant's successful answer of all complaints of supporting witnesses without rebuttal proves its service not inadequate. Supporting witnesses' vague preference for applicant's service is insufficient basis for grant; denied.—Everett Charter System, Inc., Com. Car. Applic., 111 M.C.C. 214 (215-6)*; applicant has failed to meet burden of showing protestants' charter service inadequate, as no public witness indicated any inadequacy on protestants' part but only supported applicant for sake of convenience and proximity of a locally based charter operator; denied.—Pathfinder Bus Lines, Inc., Common Carrier Applic., 111 M.C.C. 609 (611)*; on reconsideration, application for extension of authority as expedited messenger service denied in certain respects specified herein, as protestant provides same type of service as that proposed, and supporting shippers have shown only a desire for services of an additional carrier.—Swan Messenger Service, Inc., Ext.—General Commods., 112 M.C.C. 26 (33-4)*; Midwestern Express, Inc., Extension—Paper, 117 M.C.C. 720 (723)*; applicant's petition for permanent extension of authority held on temporary grant denied when evidence adduced by protestants reveals that supporting shipper has not made concerted effort to utilize other available carriers whose service is considered adequate by Commission.—Gra-Bell Truck Line, Inc., Ext.—Coloma, 115 M.C.C. 872 (879-80)*; supporting shipper's statement of intentions to expand its operations is inadequate to establish future need, the more so since shipper has not used existing service to an appreciable extent, and has not shown such service deficient.—Frostways, Inc., Extension—Livonia, Mich., 117 M.C.C. 209 (215)*; application to transport meats, meat products, and meat byproducts from St. Louis, Mo., and points in Illinois to points in 3 States denied, on basis of adequate existing service.—Ill.-Pac. Coast Transportation Co., Ext.—Three States, 117 M.C.C. 455 (458)*.

On reconsideration, Commission limited authority granted herein to those areas not served by protestants in light of criteria for such grants as stated in 1 MCC 190, as to whether shipper's needs can be served by existing carriers. Although shipper anticipates increased volume of shipments, facts of record do not show a need for service over routes duplicative of those protestant is authorized to serve.—Central Transport, Inc., Extension—Barite, 112 M.C.C. 410 (412-3)*.

Application denied as protestant holds appropriate authority to provide sole supporting shipper with comprehensive service to all destination States for which need is asserted, has suitable equipment available, is experienced in transportation of canned goods, has already provided some pertinent service for shipper without complaint, and has a traffic embalance which would be partially corrected by the involved traffic. Proposed operation poses no significant improvement over protestant's service. In the embraced proceeding, however, existing service is found to be inadequate when same protestant cannot serve all destination States for which same shipper now asserts need, and a denial to extent of protestant's authority would fragment shipper's distribution operation.—Kroblin Refrigerated Xpress, Inc., Ext.—Michigan, 113 M.C.C. 306 (312-3)*.

Although protestant can provide the service sought to some extent, inasmuch as applicant's service has existed, albeit unauthorized, under color of right for many years, continuance of these operations cannot be said to create a new or aggravated competitive situation to the detriment of existing carriers.—Cotter Garage Corp. Common Carrier Application, 113 M.C.C. 589 (595-6).

Application denied when the evidence establishes that (1) existing carriers are willing and able to perform that portion of the proposed service for which a need was shown, and (2) the remaining portion of the authority sought does not satisfy the standards set forth in 103 MCC 555 (1967).—Cloud Common Carrier Application, 115 M.C.C. 77 (79)*.

Applicant granted authority as sought, with the major exception of Hopkinsville, Ky. The evidence of the proceeding demonstrated that the 20 shippers located in that city had received a consistently satisfactory service from protestant.—Pulaski Highway Express, Inc., Extension—Ky., 117 M.C.C. 552 (554)*.

Supporting shipper's assertion that the location of protestant's closest terminal at Mineola, Tex., is more than 100 miles from

Shreveport, La., and would lead to the late delivery of needed equipment, resulting in inadequate service, serves as no basis for depriving protestant of an opportunity to serve it where, as here, protestant has made clear its intention to spot equipment at shipper's Shreveport facility when necessary and when given adequate notice. Existing authorized carriers normally are entitled to all the traffic that they can handle adequately, efficiently, and economically within the territories which they are authorized to serve, without the added competition of an unneeded service not shown to be warranted by other factors.—Eagle Trucking Co. Ext.—Shot and Grit, 118 M.C.C. 108 (112-13)*.

Applicant did not meet those facets of its evidentiary burden dealing with existing service. Although the Commission was informed that shippers are dividing their size-and-weight and nonsize-and-weight traffic among a number of carriers including applicant, other heavy specialized carriers, and conventional transporter of general freight, such testimony does not establish that presently available services are inadequate to shippers' expressed transportation needs. Denied.—Eagle Motor Lines, Inc., Ext.—Machinery, Tools, 118 M.C.C. 604 (612).

A major question in motor carrier application cases is whether advantages to the public that would use the proposed service outweigh disadvantages, real or potential, that may result upon existing services and those dependent upon them. See 118 MCC 74. Even if we do not find existing service inadequate in any material respect, we are not precluded from finding that other factors require the proposed operation. See 111 MCC 645. In the instant case, existing service has not been poor enough to be characterized as wholly inadequate, but it is clear that supporting shippers are not receiving all the service needed to operate their businesses efficiently. Proposed service would benefit shippers by making more refrigerated vehicles available and by facilitating transportation of LTL shipments through more frequent service. Application granted.—Onley Refrigerated Transp., Inc.—Foodstuffs and Drugs, 118 M.C.C. 715 (721-22)*.

One of the basic elements in determination of public need is a showing of the inadequacy of existing services. See 105 MCC 634. Normally, existing carriers should be afforded an opportunity to transport all the traffic they can handle in an adequate manner without added competition of new operation. In instant case, we do not view multiple telephone calls by shippers to locate a carrier with equipment available as a service deficiency in the absence of definite evidence that unreasonable delays subsequently occurred. In any event, shippers' complaints concerned less than two percent of all involved shipments and few complaints concerned the area petitioners served. However, to extent that other applicants in this consolidated proceeding (who were not subject to petitions for reconsideration) were granted authority by original review board decision, applicant herein will also be granted authority to serve these nine States and District of Columbia.—Colonial Refrigerated Transp., Ext.—Cherokee Meats, 118 M.C.C. 731 (736-37)*.

United States case, §207(a), n. 25 *Special service*; Point Transfer, Inc., Extension—Pa. and Ohio Origins case, §206(b), n. 18; Schilli Motor Lines, Inc., Conversion Application case, §207(a), n. 25 *Conversion*.

Express: [Vols. 19, 21].—Motor express authority has been granted in some instances when substantial operating economies are established, but only in particular circumstances as when the mode of transportation used materially handicaps the rendition of express service, when there is no significant change in the character of service, and when the opposing carriers, in the absence of adequate service, can not provide a complete express service. While some economies would result from proposed operation, including saving in operation and the savings of 1 day in transit for some shipments and 2 days for others, there is no indication of inadequacy of underlying rail transportation which would handicap applicant's existing express service or that REA and other carriers are not providing adequate transportation to shippers. Described reductions in transit time involve substantial service improvements which would result in a new service; and improvements implicit in applicant's proposal likely would result in additional diversion of traffic from existing carriers. Denied.—Railway Exp. Agency, Inc., Extension—Atlanta and Greenville, 96 M.C.C. 127 (133-4).

A material reduction in passenger train service and the protestants' failure to provide suitable express service constitute special circumstances which warrant granting to R.E.A. authority, unburdened with either a rail-haul or key-point restriction, to transport general commodities in express service, a bona fide express service viewed in light of the report in 323 ICC 468.—Railway Exp. Agency, Inc., Ext.—Rochester-Albany, N.Y., 98 M.C.C. 341 (345-7).

Supporting shippers, many of whom have used applicant's service where it is authorized, require extremely rapid service in the proposed territory for the movement of a wide range of commodities in very small shipments. Although both protestants hold authority to perform the service, it is apparent that neither provides anything approaching the expeditious type of service required and that the shippers' needs can only be met by the applicant. Moreover, considering the differences in quality between the proposed service and the services of protestants, comparing the vast potential rapid shipment market to New York City area with the small size of the existing service, and noting the lack of past development of this territory by existing carriers, service herein authorized will not have a material effect upon protestants.—Click Messenger Service, Inc., Ext.—N.Y. & N.J., 103 M.C.C. 851 (855)*.

Applicant has been rendering 24-hour on call airfreight service on small shipments to both supporting shippers between Standiford Field, Kentucky, and thirteen Kentucky counties. Applicant specializes in expeditious same day service, and will provide emergency service when requested. Shippers' experience with regular-route carriers is unsatisfactory. Protestant does not offer flexible and specialized surface motor transportation on air traffic. It holds itself out to provide no better than an overnight service. The prime benefit of airfreight, namely its speed, is neutralized if expeditious motor carrier service is not available for moving the merchandise to or from the air terminal. Grant of this application will enable applicant to perform a more complete service for each of the supporting shippers. Extension authority granted subject to a prior or subsequent movement by air restriction.—Kato Express, Incorporated, Extension—Standiford Field, 108 M.C.C. 222 (223-4, 226)*.

Fitness in general: [Vols. 10-12, 14-19, 21].—See also n. 10, above. See also AADA Systems, Inc. case, §207(a), n. 25 *Truckaway;* Herr's Motor Exp., Inc., Extension—Wheeling Steel case, §207(a), n. 25 *Existing carriers;* Sawyer Transport, Inc.—Purchase—R.C. Wilson case, §5(2), n. 110 *Fitness;* United Buckingham Frt. Lines, Extension case, §207(a), n. 25 *Commodity.*

In action to enjoin and set aside Commission order denying plaintiff's common carrier application, evidence of record supports the Commission's findings and conclusions that, in view of existing common control of applicant and its principal supporting shipper (which could create opportunity for favoritism and discrimination), plaintiff had failed to establish its fitness to operate as a common carrier that would serve all shippers impartially; and those findings and conclusions are not erroneous as a matter of law. Determination that a substantial opportunity for favoritism and discrimination exists is a matter peculiarly within the Commission's expertise; moreover, a review of the entire record shows that such determination in instant case was entirely rational, reasonable, and supported by substantial evidence. Accordingly, the Commission's decision is sustained and temporary restraining order currently in effect is vacated.—Alter Trucking and Terminal Corp. v. United States, 299 F. Supp. 819 (822-4)*.

In action to review Commission decision and order which found plaintiff (applicant) unfit to receive the authority sought and denied its application, the judicial function is exhausted when it is found that the agency's conclusion has rational basis in the evidence. Record contains substantial evidence of violations of the law and Commission rules and regulations and a basis therefrom for inferring that the applicant was unreliable and insincere and that the past violations would persist in the future; and the case was peculiarly one for expertise and experience of the agency and its evaluation of the implications of the evidence. Determination of whether leniency should be accorded to the erring applicant is a matter for the Commission's discretion; and, even though the reviewing court might have reached other conclusions from the same record, such a difference of opinion would not be a basis for setting aside the Commission's action.—Consolidated Carriers Corp. v. United States, 321 F. Supp. 1098 (1100)*.

While it is argued that the Commission should have found that plaintiff was a fit applicant because it had been granted temporary authority, and had operated thereunder for a considerable period of time prior to final denial of its application, the grant of temporary authority created no presumption of fitness in plaintiff's favor. Plaintiff also contends that considered order should be set aside because it was made on the recommendation of an examiner who had not conducted the oral hearing; however, since the hearing officer had retired before rendering his report, the Commission properly assigned a substitute examiner to prepare the initial or recommended decision. Complaint dismissed.—Id., p. 1100.

Questions of fitness and paramount public interest are uniquely committed to the Commission's expertise; and scope of the court's review in action to set aside Commission order granting extension authority to defendant carrier (applicant) is limited to determining whether there is warrant in the law and fact for the agency's action. Plaintiffs' claim that the applicant's failure to produce evidence of its ability to comply with Commission rules and regulations makes it *per se* unfit, and mandates a remand, is not in harmony with realities of the case. Compliance with operating regulations was not in issue before the Commission, as the carrier was merely seeking enlargement of its existing authority; applicant produced evidence from which a conclusion could properly be drawn that it was not unfit financially; and in making the basic finding of fitness, the Commission considered question of regulation compliance though it was not seriously in issue. Furthermore, the court finds no prejudicial departure from provisions of the law that requires remand of the case for further consideration. Complaint dismissed.—St. Johnsbury Trucking Co. v. United States, 326 F. Supp. 938 (940, 943)*.

Inasmuch as it has been found that appropriate authority is required for considered transportation service, applicant's past operations have been unauthorized. While these operations are not condoned, evidence indicates that applicant conducted its service in good faith and under a mistaken color of right; further applicant promptly filed instant application when informed of the impropriety of his actions. A finding of fitness, therefore, is warranted.—Nilson Extension—South Carolina, 95 M.C.C. 326 (329); protestant's contention that applicant is unfit to perform proposed service because of past unauthorized operations found not justified as evidence of record shows such operations performed under color of right. Applicant was diligent in testing that right and in applying for appropriate authority upon learning that its operations might be unauthorized.—Mohawk Trucking & Salvage Co., Ext.—Sodium Chloride, 113 M.C.C. 579 (586)*; applicant operated under color of right for several years, and, although such continued operation without authority since filing application cannot be condoned, the record does not establish that applicant intended to flout statutory requirements; finding of fitness warranted.—Cotter Garage Corp. Common Carrier Application, 113 M.C.C. 589 (595).

While operation without proper authority is by no means to be condoned, fact that applicant's prosecution for operating as a for-hire carrier without authority grew out of unlawful equipment leasing arrangements, a refinement of Commission policy that laymen might not understand, suggests that its assertion that these violations were innocent might be the case. In any event, the cooperative attitude reflected by applicant's compliance to Commission policy since the prosecution, entitles it to a finding of fitness.—La Bar's, Inc., Common Carrier Application, 95 M.C.C. 773 (774-7).

Record is convincing that applicant and parties have conducted some form of unlawful operations since 1948; for about 4 years, bus service was furnished without authority from the Commission, and, after obtaining the present charter authority, certain operations were conducted beyond the scope of such authority as shown by a criminal conviction and a cease and desist order from the Commission. Except for the injunction proceeding now pending in a Federal court, there have been no formal proceedings brought against these parties since 1957; however, unlawful operations have continued, consisting of providing tours under the individual ticket arrangements to ski resorts, race tracks, and other points. Also there have been trips to points beyond applicant's territorial authority. Since the violations are willful and continuing, applicant is not fit to receive a grant; denied.—S & S Bus Service, Inc.—Special Service, 95 M.C.C. 796 (802)*.

The contention that there was some basis for applicant's past activities, since the original grandfather certificate of its predecessor authorized "special or charter service," is not consistent with its other argument concerning the veil of legality surrounding applicant's activities with other parties. Furthermore, this claim arose after an extended history of unlawful operations, and the certificate applicant now holds is clear on its face. Applicant could, but has not sought to have its certificate modified to reflect the actual operations conducted in the "grandfather" period, and there are continuous willful violations of the Act. Applicant is not fit to receive a grant.—Id., p. 803.

Although applicant's fitness is being questioned in another proceeding and it would be inappropriate to make a finding with respect to its overall fitness, where alternate-route application proceeding does not involve institution of a new competitive service but only services which are to be used as a convenient alternative to those already performed, applicant can properly be found fit, willing and able to perform proposed operation. However, this conclusion is specifically limited to the instant proceeding and should not be construed to foreclose, in any manner, a possible contrary conclusion in any other proceeding involving applicant.—The Overland Express, Limited Extension—Alternate Route, 96 M.C.C. 24 (27-8).

Viewing the record in its entirety, applicant, by repeated and willful violations of the Act, has failed to establish that it meets the standards of fitness requisite to the granting of authority under §206. Evidence shows that applicant, without appropriate authority, had transported several bus loads of passengers from and to points specified; had entered into an illegal "lease arrangement"; and had operated unlawful charter trips to Canada. Applicant, who is an experienced motor carrier, is charged with knowledge of Commission's rules and regulations especially since a cease and desist order had been entered against it because of its unlawful activities. It is not being overly harsh to say that subsequent to examiner's reports, and certainly after issuance of prior report, applicant should have been aware that its operation would be carefully examined by the Commission before further operating authority was granted. In view of described violations, applicant has not demonstrated since that time that it is disposed to comply with the Act. Therefore, it cannot be found fit to receive the extension authority sought. Denied.—Schenck Tours, Inc., Extension—Nassau, 96 M.C.C. 66 (71-8)*.

Neither of two applicants seeking broad territorial authority for transportation of used automobiles by driveaway has submitted a fully thought-out proposal which would permit the proper determination whether it would or could comply with the requirements of the Act and the Commission's regulations, and whether proposed operation would be conducted with a view to protecting interests of the automobile owners and other users of the public highways. Applicants are not regulated motor carriers, and, although their managerial personnel have had varying degrees of experience in performing for-hire transportation, officers of one admitted lacking familiarity with the Commission's safety and other regulations and director of the other was unable or unwilling to name a single point where it would establish offices. Neither has indicated how it would enforce driver compliance with the safety regulations or what arrangements it would provide in the broad area through which it seeks to operate to permit the making of claims by automobile owners; denied.—Autocar Shipping Co. Common Carrier Application, 96 M.C.C. 357 (364-5).

Although applicant and its affiliate have admittedly performed substantial interstate operations without appropriate authority, its claimed taxicab operations were conducted under a not wholly unreasonable interpretation of exemption of §203(b2). Applicant's impression that its operations were a bona fide taxicab service was based on legal advice, and its activities apparently were not questioned by Commission personnel, warranting finding that they were not conducted in willful disregard of the law and that applicant is fit to receive authority granted. However, applicant is reminded that with issuance of certificate it becomes subject to all regulatory requirements and must conduct its operations accordingly.—D & M Taxi Co., Inc., Common Carrier Application, 96 M.C.C. 439 (443, 447-8).

Although applicant has been engaged in round-trip charter operations originating at points not within its regular-route territory, in violation of §206(a), such past violations apparently resulted from misapprehension of the applicable law rather than from defiance of the Commission's charter service regulations or any willful purpose to evade them. In the circumstances, the Commission is reluctant to deny authority for rendition of the limited round-trip tour service shown to be needed by the public; applicant is therefore found fit to conduct the special operations authorized.—Arrow Stage Lines, Inc., Investigation and Revocation, 96 M.C.C. 572 (581).

The Commission would be remiss in its duty if it were to ignore the concurrent finding in investigation proceeding, heard on consolidated record with extension application, that applicant has been in willful violation of the Act, and at same time allow applicant to be found fit to receive additional authority. Applicant's continued performance of of unauthorized transportation and continued violations of the Commission's leasing and safety regulations demonstrate either intentional disregard of, or plain indifference to, the Act and regulations, and preclude a finding of fitness. Application denied.—S & C Transport Co., Inc., Investigation and Revocation, 96 M.C.C. 642 (646).

Although applicant has shown public need for a grant of the additional authority requested, certain questions have been raised in another application proceeding which cast doubts on applicant's compliance with the Commission's safety and leasing regulations, and hence on its fitness to receive the authority requested herein; authority requested withheld pending such determination.—W. T. Byrns Motor Exp., Inc., Extension—Rooseveltown, 96 M.C.C. 765 (770); applicant has brought certain aspects of its operation into compliance, but the evidence is insufficient to resolve certain other questions related to fitness. Application conditionally granted, but proceeding set for further hearing on the limited issue of fitness.—Distributors Service Co. Extension—Foods, 113 M.C.C. 129 (136)*; inasmuch as proceedings involving fitness of two applicants in this consolidated proceeding are pending, it is considered inappropriate to determine their fitness.—Kroblin Refrigerated Xpress, Ext.—Sterling, Colo., 118 M.C.C. 869 (875)*.

Applicant's past unauthorized single-State operations in interstate commerce under its registered state authority, do not preclude a finding that he is fit and able properly to conduct proposed irregular-route operations between designated Pennsylvania points for which a need has been shown. Unlawful operations conducted by applicant were the result of some misapprehension by him of applicable law rather than any defiance of the Commission's regulations or willful purpose to evade them. The operations have been conducted openly and without any element of disguise or concealment.—Bowser—Investigation of Operations, 98 M.C.C. 170 (178).

Since the issue of common control between applicant East Coast and Ontario is involved in another proceeding, it should not be prejudged herein; however, there is another matter reflecting upon East Coast's fitness. East Coast gives 95 percent of its gross revenues to East Coast Trans. Corp. (ECTC), with all responsibility resting in ECTC for payment of East Coast's expenses; furthermore. employees of ECTC are conducting East Coast's operations. In other words, the certificated operations of East Coast, are conducted by ECTC, which is not authorized to conduct such operations. It has long been the policy of this Commission to deny a grant of authority to a motor carrier which does not intend to conduct operations thereunder; under these circumstances East Coast has failed to establish that it is fit properly to conduct the operations proposed herein. Denied.—East Coast Trucking, Inc., Extension—New York Counties, 98 M.C.C. 594 (599-600).

Although applicant has limited opportunity to achieve competitive advantage at expense of protestant, by reason of its affiliation with supporting shipper Mobilease, it is not automatically unfit; since applicant and protestant are vigorous competitors for automobile trailer traffic throughout much of the country, since applicant as a common carrier will be obligated to publish and to observe tariffs stating rates and rules governing performance of its services for all shippers, and since other supporting shippers are aware of this affiliation between applicant and Mobilease, there is little opportunity for favoritism or discriminating practices among users of applicant's services and therefore applicant is not deemed unfit as a result of this affiliation. However, should the activities of Mobilease develop in any significant scope or form to warrant a reexamination on our part, it will be open to protestant or any other person, as well as our field staff, to bring such facts to our attention.—National Trailer Convoy, Inc., Ext.—Initial Movements, 100 M.C.C. 101 (102, 105).

Although there is need for proposed transportation of wearing apparel, applicant cannot be found fit solely on basis that there is no other carrier able to provide the service required, because such a finding would be in contravention of Commission's duty "to protect the public from carriers whose conduct demonstrates an unwillingness to operate in accordance with the requirements of regulation". Applicant's unlawful operations viewed in their entirety indicate an attitude of conscious indifference to Commission regulation and a design to evade it whenever expedient. Under such conditions applicant is deemed unfit. Denied.—Fanshaw Extension—Emporia, 100 M.C.C. 173 (178, 180).

In an application proceeding under §207 of the Act, a finding must be made concerning applicant's fitness and to that extent possible unlawful operations are pertinent. And since the record is clear that applicant has violated conditions in its temporary authority which prohibited it from transporting traffic from or to origins or destinations other than those named in the temporary authority itself, either entirely by it or by interline with another carrier, these unlawful operations are pertinent. However, although such conditions may be occasionally and unwittingly violated, on a proper showing they can be and often are relaxed or eliminated entirely. Consequently a general compliance with these conditions should be expected of all motor carriers in the future. Application denied.—Frozen Food Exp. Extension—Indiana and Ohio, 100 M.C.C. 369 (370-2).

Fact applicants lease equipment, standing alone, plays no part in disposition of instant applications; it is well established that applicants' fitness and ability to provide adequate service should not be measured by the extent to which they financially invest in privately owned and operated equipment and that applicants may not be found unfit simply because they use leased equipment, provided the leasing arrangements and operations thereunder are lawful and proper.—Point Transfer, Inc., Extension—Pa. and Ohio Origins, 105 M.C.C. 634 (658)*.

Applicant has failed to establish that it is fit and able to perform proposed operations; if a carrier is not in substantial compliance with applicable safety rules and regulations it is axiomatic that such carrier is a threat to the public. Although applicant has intensified its efforts to comply with these rules and regulations, remedying certain of its problems, especially with respect to proper logging, it has failed to bring a reduction in the number of its vehicles placed out-of-service. However, as the aim of the Commission is compliance, not punishment, this proceeding held open for a year during which time applicant may petition for further consideration in order to show that its operations have been brought into and maintained in substantial compliance with the applicable rules and regulations; moreover, the Commission noted that since the national average is not to be considered as the standard of compliance required, such comparisons are not determinative, although entitled to consideration along with other factors.—Midwest Coast Transport, Inc., Ext.—Duluth, Minn., 105 M.C.C. 724 (732-5)*.

However, on further consideration the Commission found that, based upon applicant's operational record during a 12 month period, the fruits of applicant's revitalized safety and maintenance programs have begun to ripen; the out-of-service problem appears to have been alleviated. Therefore, applicant's operations now are in substantial compliance with the applicable safety rules and regulations; furthermore, continuation of applicant's renewed safety and maintenance programs should also show greater results in the reduction of its overall accident frequency rate, especially those in the so-called "preventable" category. In view of these circumstances applicant is fit to conduct the operation for which authority is sought herein.—Id., 106 M.C.C. 380 (383)*.

Although applicant admits that on numerous occasions over a 10-month period, it has engaged in unauthorized operations and other improper practices pertaining to bills of lading, drivers' logs, and extension of credit, the evidence, considered as a whole, justifies conclusion that considered successor partnership is fit to receive authority for which need has been shown. However, applicant is warned that a record of past substantial noncompliance makes its burden of establishing the firmness of its resolve and its ability to maintain compliance more difficult and that in any future application proceeding it will be expected to show affirmatively the continuing nature and extent of its efforts to assure compliance with the Act and regulations thereunder.—L & M Express Co., Extension—Crewe, Va., 106 M.C.C. 334 (338-9).

Respondents' continuation of unauthorized operations in foreign commerce under their state certificates registered under §206(a)(7) of the Act does not reflect adversely upon their fitness notwithstanding their failure to file immediate applications for certificates of public convenience and necessity, considering the conflicting opinions of the Bureau of Enforcement as to the legality of such operations; the lack of action by the Commission after the investigation by the bureau; the aura of uncertainty that surrounded respondents' operations; and the character of the operations and the apparent commencement of such operations under color of right.—Imperial Truck Lines, Inc.—Common Carrier Application, 106 M.C.C. 741 (750-1).

In considered circumstances, applicant is found fit and able, financially and otherwise, to conduct proposed operations in transportation of passengers assembled into small groups, in vehicles leased by carrier to a group and operated by a member thereof, who are commuting between their homes and employment. While applicant had not realized a profit from operating, at time of the hearing, it had begun the operation (believing it was not subject to Commission regulation) about 6 months earlier, using eight vehicles, and had incurred certain expenses in organizing its new business, but it was operating 14 vehicles when the hearing closed 8 months later. Financing for its cars is obtained from a local bank; and its stockholders are willing and able to advance any necessary additional funds. Furthermore, as to ability of applicant to comply with the safety regulations concerning hours of service of drivers, the transportation time of 2 hours a day, 5 days a week, plus the normal 8 hours at work will not exceed either the allowable 60 hours per week or the aggregate 10 consecutive hours driving time within a 24-hour period; however, to insure conformity with the safety rules, necessary conditions may be imposed in the future.—Monarch Associates, Inc., Common Carrier Application, 107 M.C.C. 277 (285-6)*.

Applicant has failed to establish its fitness since portions of its reply dealing with efforts toward compliance with the Commission's cease and desist order concern events which occurred after the record was closed. However, in view of the change in applicant's management several months prior to the hearing in these proceedings, and the final determination by the Supreme Court of the issues in the investigation case one month after the hearing, applicant should be afforded an opportunity to show that its operations have been brought into substantial compliance. The proceeding will be held open for a period of one year in order that applicant may file a petition for further consideration.—Whitehouse Trucking, Inc., Extension, 107 M.C.C. 486 (493).

Applicant's failure to observe gateways in its present operations does not warrant a finding that it is unfit to perform the proposed operations since the challenged movements cannot be found to be of a representative or recurring nature, considering the few violations admitted and alleged, in light of applicant's authority, scope of operations, and number of shipments moving through the gateway. Further, where applicant has discovered that its drivers have failed to observe gateways, it has taken disciplinary action, and the decrease in the number of gateway violations between the periods checked show its compliance efforts. These factors taken together with those in prior proceedings concerning the fitness of applicant, show that its conduct does not represent a flagrant and persistent disregard of the provisions of the Act.—Eagle Motor Lines, Inc., Extension, 107 M.C.C. 499 (503-4).

Where an applicant's past conduct shows a pattern of continued or serious violations, such applicant has the burden of refuting the import of its past conduct in order to establish its fitness to acquire additional authority. The record in this proceedings establishes (1) that at times applicant has failed to render reasonably continuous and adequate service, (2) that it has not kept its records in accordance with the Commission's accounting regulations, (3) that it is commonly controlled with other motor carriers in apparent violation of the provisions of §5(2) of the Act, (4) that it falsely answered at least one question relating to common control in its application, and (5) that its principal stockholder operates as a broker without authority under §211 of the Act, participates in the receipt of a rate concession in violation of §217(b) and §222(c) of the Act, or participates in improper pooling of revenues within the purview of §5(1) of the Act. Denied Peoples Express Co., Extension—Containers, 108 M.C.C. 174 (175); however, while applicants herein violated regulations by giving false answers pertaining to applicants' interest in other carriers, Commission finds such violations not willful and applicants fit to perform operations for which a need is shown.—L. & M. Express Co., Ext.—North Carolina, 110 M.C.C. 845 (850-1).

Before a grant of common carrier authority can be made, the Commission is required not only to ascertain that the proposed operations are required by the public convenience and necessity but also to find that applicant is fit and able properly to conduct the proposed operation. Applicant has established a long-continued history of noncompliance and disregard for the Commission's regulations. Where an applicant's past conduct demonstrates a pattern of serious or continuous violations, then such applicant has the clear burden of refuting the import of its past conduct in order to establish its fitness to receive additional authority. A carrier's self-serving statements and belated remedial efforts announced at the time of the hearing are not persuasive and can be afforded little weight when viewed against a background of continued noncompliance. Application denied.—W. G. Thalmann Extension—Kentucky, 108 M.C.C. 269 (272-3).

Applicant is not unfit despite unauthorized operations which resulted in an agreed judgment in a Federal District Court and a resultant civil forfeiture by this applicant during the span of the hearings herein. The recurrence of violations by applicant after the close of the hearings cannot be condoned. The alleged changes in the management of this applicant's operations may correct the cause of the infractions but do not mitigate the unlawful conduct. However, the Commission is reluctant to find applicant unfit primarily in response to matters occurring subsequent to the hearings herein, and, in effect, to impose an additional penalty to the fine and 5-year probationary period adjudged against applicant by the Federal District Court, in view of its apparent willingness to reform the situation.—Houston Lines, Inc., Extension—Steel, 108 M.C.C. 467 (475).

As scope of the incidental-to-air exemption of §203(b7a) had not been finally settled at time of hearing on instant application, applicant's past performance of service from and to considered airports in mistaken belief that it was within that exemption should not militate against a finding of fitness.—White Air Freight Service, Inc., Common Carrier Application, 95 M.C.C. 616 (619); but the legitimate doubt among carriers concerning the scope of the partial exemption of

§203(b)(7a) has been largely removed by 95 MCC 71, and applicant's violations, which do not relate to any reasonable interpretation of §203(b)(7a) and which cannot be considered excusable in view of applicant's past violations and its actual or constructive awareness that it was operating beyond the scope of its authority, render applicant unfit, especially since applicant has engaged in other improper practices involving safety regulations and tariff requirements, continuing its improper practices without any significant sign of remedial action up to time of the hearing. Denied.—Fournier's Express, Inc.—Hartford, Conn., 108 M.C.C. 584 (586).

§207(a) of the Act provides a certificate may be issued to any qualified applicant therefor, if among other things, it is found that it is fit, willing, and able to properly perform the service proposed and to conform to the provisions of the Act and the rules and regulations thereunder. A finding of fitness is prerequisite to a grant of authority. The purpose of the fitness provision of the Act is to protect the public from carriers whose conduct demonstrates an unwillingness to operate in accordance with the requirement of regulation. Whenever the record of an applicant's past conduct demonstrates a pattern of serious or continuous violations, then that applicant has the burden of refuting the import of its past conduct in order to establish its fitness to receive additional authority. Nonissuance of a certificate on the basis of unfitness of a carrier is not a punitive measure aimed at past unlawful operations. Rather, it is the result of the Commission's evaluation of applicant's willingness and ability to conduct its future operations in a lawful manner.—Id., pp. 585-6, 590.

The record shows that applicant in the past provided some service after it was advised by the Commission that it did not possess appropriate authority therefor. While such practice reflects unfavorably upon its fitness, in the light of all the circumstances involved herein, applicant's infractions are not sufficient to bar an approval of the application solely to the extent that a need has been shown by a substantial preponderance of the evidence. Authority granted to transport meats, meat products, meat by products, dairy products, and sugar to the involved destination area. However, applicant is admonished to adhere strictly to the limited number of commodities it will be authorized to transport.—Auclair Transp., Inc., Extension—Wilder, Vt., 108 M.C.C. 604 (611-2).

As found by examiner in his initial report, applicant became aware 3 years prior to hearing that its transportation of commodities between San Diego County points it served and the Los Angeles Airport was well beyond the normally allowed exempt collection and delivery area of the §203(b)(7a) exemption. Despite examiner's finding of applicant's unfitness, temporary authority was granted when the review board found that the proposed operations were those of a common rather than a contract carrier. On further hearing the examiner recommended a grant of common carrier authority. On exceptions, applicant seeks to excuse past violations on color of right plea. No remedial action was taken until applicant received temporary authority. Applicant's decision not to seek proper authority for approximately 3 years after it had become aware of probable need for authority, and its continued illegal line-haul operations in avoidance of our regulations even at the time it had filed for permanent authority, do not establish its claim to past good faith operations. Denied.—Weston Trucking Company Contract Carrier Application, 108 M.C.C. 614 (615-8)*.

Under §207 of the Act, weight may be given evidence of past unauthorized operations conducted under color of right. The Commission has recognized in past proceedings (108 MCC 584) the existence of interpretive problems regarding the partial exemption provisions of §203(b)(7a) of the Act. Questions in this area were substantially resolved by the Commission in 95 MCC 71. In a proceeding where the applicant's past conduct of record is shown to exhibit a pattern of serious or continuous violations, applicant has the burden of refuting the import of its past conduct before the Commission can affirmatively find that it is willing and able to conduct its future regulated operation in a lawful manner. Applicant has persisted in its unlawful operations, improper conduct, and overall disregard for the

Commission's opinions and regulations; and its color or right plea is not founded upon a reasonable question of mistaken interpretation. Applicant is not entitled to enhance its past operations with any status of righteousness.—Id., pp. 617-8.

Applicant's application for a "grandfather" certificate of registration under the "grandfather" provisions of §206(a)(7) was denied because of its admitted affiliation with a multi-state carrier engaged in interstate commerce. Applicant misrepresented its status on its §206(a)(7) application with respect to whether or not it was under common control with any other person. In its corresponding §207(a) application for operating authority, applicant has failed to rebut or offer any explanation for such conduct. An applicant who willfully and knowingly misrepresents its operating status before the Commission can hardly be trusted to comply with the obligations that a regulated carrier is expected to observe in its relations with shippers and the general public. Application denied.—Merritt Corporation Common Carrier Application, 108 M.C.C. 865 (869, 871-2)*.

Applicant in its exceptions maintains that it had been found fit in the prior report and recommended order served May 26, 1967, and, thus, "the fitness of applicant has already been fully considered and passed upon and was not and should not have been considered in issue either at the continued hearing on June 13, 1968, or at the present time". The report and recommended order served May 26, 1967, never, by operation of law or otherwise, became the order of the Commission. Therefore, the fitness of applicant remains in issue.—Id., p. 871.

Applicant has conducted its past operations in a manner demonstrating a substantial indifference to or a willful disregard of applicable safety regulations. Applicant has been shown to be guilty of a number of serious violations perpetuated shortly after it received its initial temporary authority and continuing almost up to the time of the hearing. Compliance with the safety requirements is necessary to protect the public and to promote safe operating conditions on the highways. Applicant's only excuse for these violations was ignorance of applicable safety rules and regulations. Applicant's past conduct demonstrates a pattern of serious and continuous violations which make it unlikely that it will be willing and able to conduct future operations in a lawful manner. A carrier's self-serving statements and belated remedial efforts announced at time of hearing are not persuasive of future compliance and can be afforded little weight when viewed against a background of continued noncompliance. Denied.—Ewen Brother, Inc., Common Carrier Application, 108 M.C.C. 878 (885-6).

Each applicant challenged the fitness of the other. Neither applicant appears to have any insurmountable financial problems. Department of Transportation has not intervened in either proceeding on the issue of safety practices. The record will not support the conclusion that either applicant's conduct is indicative of a flagrant and persistent disregard of the law; nor will it support a conclusion that either applicant should be punished by withholding an affirmative finding of fitness. The interest of one applicant's president in a vehicle leasing concern does not, ipso facto, require a finding that that applicant has failed to establish its fitness.—Turner Expediting Service Extension—Montgomery County, Ky., 110 M.C.C. 342 (349-50)*.

Disputes between protestant City of Chicago and applicant concerning the pertinent municipal regulations are matters resting between Chicago and applicant and are not within our province to consider, compare 33 MCC 383. The Commission presumes that applicant will comply with Chicago's lawful requirements and our grant of authority should not be construed as a sanction of any violation of those requirements. Questions of local regulation and possible unlawful obstruction of interstate passenger transportation may be resolved by a court of appropriate jurisdiction. Applicant's failure to enter into a contract as required by Chicago constitutes no basis for denial of the application.—Tri-State Coach Lines, Com. Car. Applic., 110 M.C.C. 601 (610).

Applicant has continued to transport commodities not covered by its contract carrier permit despite being advised by Commission personnel that such transportation was unauthorized. Applicant also has transported contract carrier commodities for companies not authorized by its permit. Such conduct indicates that it is unlikely applicant will be willing and able to comply in future with applicable rules and regulations. The application is denied without prejudice to subsequently filed applications.—McRay Truck Line, Inc., Ext.—Forty-Eight States, 111 M.C.C. 602 (605-7).

Applicant's past operations were conducted in a manner which indicates that it will directly or by subterfuge engage in unauthorized activities in future in disregard of Commission's rules and regulations. Applicant took action to remedy its unlawful practices only when pressured by investigation. Nonissuance herein is not a punitive measure for past conduct but rather a protection of the public from a carrier whose actions demonstrate no willingness or ability to operate in accordance with Commission's requirements.—Ritter Trucking Co., Extension, 111 M.C.C. 771 (775-7).

Application for authority to serve indicated plant site of sole supporting shipper granted despite applicant's past violations of the Act and its certificates by failure to render service. Such violations were brief, caused by mitigating circumstances, and have been adequately remedied so as to indicate applicant's willingness and ability lawfully to perform proposed operations. Nonissuance of certificate based on unfitness is not a punitive measure for past unlawful operations.—Spector Freight System, Inc., Extension—Whitley, 111 M.C.C. 889 (892-3).

Although applicant is guilty of unauthorized transportation, failure to collect charges promptly, and improper billing and record keeping, it has made sincere efforts at correction by institution of improved business procedures. Such efforts outweigh prior unlawful conduct, and applicant is found fit. However, in view of serious nature of violations, grant is limited to 3 years.—Johnny Brown's, Inc., Extension—Winchester, Va., 111 M.C.C. 905 (909); applicant's past unauthorized operations and violations of mixed-load restriction are not such as to justify finding of unfitness, when applicant has made sincere effort to correct past mistakes and has indicated willingness to effect compliance with mixed-load restriction. 3-year term authority granted.—Radke Extension—Various Commodities, 113 M.C.C. 89 (96); applicant's failure to maintain pickup records, transportation of traffic in violation of a self-imposed embargo, and failure to effect pickups on shippers' requests do not warrant finding of unfitness since applicant has shown mitigating circumstances and has promptly and cooperatively terminated such violations. Applicant reprimanded for past violations, and 3-year term authority granted.—Associated Transport, Inc., Ext.—T.V.A. Power Plant, 113 M.C.C. 637 (640-2); applicant's admitted violations are held to be technical and ameliorated by subsequent remedial program, while Bureau of Enforcement's objections to grant of extended authority lack citation of specific regulations violated and evidence to define extent of violations. Applicant found fit, and 3-year term authority granted to afford reappraisal of applicant's effort to comply with regulations.—S.T.L. Transport, Inc., Extension—New York Points, 115 M.C.C. 14 (22-3); on further proceedings, Division 1 finds that it has been stipulated that applicant has terminated its illegal tacking operations which were begun on erroneous advice of counsel, while remaining violations, performed under lease and interchange arrangements, have been terminated, as verified by Bureau of Enforcement. 3-year term authority granted.—Distributors Service Co., Extension—Foods, 118 M.C.C. 322 (329-30)*; applicant's more recent conduct warrants conclusion that a sincere effort is being made to perform only lawful service in keeping with all applicable rules and regulations. Limited term authority granted.—Peoples Express Co. Ext.—Empty Containers, 118 M.C.C. 675 (679-80).

Commission found that the irregularities committed by applicant in obtaining notarized statements of support result from a misunderstanding of the notarization function, are not intended to deceive, and are no reasonable basis for finding applicant unfit. However, parties to all future and pending Commission proceedings are hereby warned that such irregularities in future will reflect adversely on their fitness.—Arrow Line, Inc., Ext.—Saratoga Race Track, 112 M.C.C. 116 (119).

Intervention by the Federal Highway Administration (FHWA) of the Dept. of

Transportation produced many violations by applicant of safety regulations which were held to bring its fitness into question. Subsequent agreement between FHWA and carrier whereby FHWA would not press its exceptions for 9 months was held inconsistent and unreconcilable with FHWA' former action. Commission initiated an investigation of carrier's fitness.—Eagle Motor Lines, Inc., Invest. & Revoca. of Certif., 117 M.C.C. 30 (35).

The fitness of a carrier encompasses its financial ability to perform service it seeks to provide; its willingness to adhere to the rules and regulations established pursuant to the Act; and its ability to perform service in a safe manner for the protection of the public.—Id., p. 35.

While the Federal Highway Administration of the Dept. of Transportation has jurisdiction with respect to motor carrier safety, the Commission is charged by statute to make the ultimate finding as to fitness of a carrier and to assure that the carrier thereafter maintains compliance with the applicable safety and other lawful requirements. The concept of fitness is a continuing one. Having previously found a carrier fit, the Commission is not foreclosed from reopening the proceeding to consider the matter further.—Id., 117 M.C.C. 72 (74-5).

It is a spurious argument that because applicant conducts only a small operation it should not be held to as strict a fitness accountability as larger carriers. Fitness is a concept which does not vary. Applicant found unfit for certificate authority on basis of repeated violations of regulations, which were held to establish a pattern of willful disregard for all rules and regulations from which applicant was unable or unwilling to remove itself.—Ewen Brothers, Inc., Com. Car. Applic., 117 M.C.C. 101 (104).

Division 1 concluded that applicant had not been shown fit to receive a certificate authorizing its proposed operation as an irregular-route motor carrier of general commodities, with certain exceptions, between 14 Pennsylvania counties and Philadelphia, Pa., restricted to transportation of shipments having prior or subsequent movement by air. The division found that applicant had continued to tack authority set forth in two paragraphs of its lead certificate despite a previous Commission notice that such paragraphs could not be tacked. Such conduct demonstrated a pattern of serious and continual violations inconsistent with a finding that applicant is fit to receive a grant of authority. Application denied.—Conahan Extension—Pennsylvania, 117 M.C.C. 488 (504-5).

Section 207 of the Act establishes, as preconditions to the issuance of a certificate of public convenience and necessity, findings (1) that the applicant for a certificate is fit, willing, and able properly to perform a proposed service, *and* (2) that the proposed service is required by the present or future public convenience and necessity. Both findings must be made. One may not be based on the other. The findings concerning fitness should be based on evidence concerning the applicant alone, and not on how strong a case has been presented by the supporting shipper or protestants.—Metler Hauling & Rigging Ext.—Loudoun County, Tenn., 117 M.C.C. 557 (559-60).

Financial fitness: [Vols. 16, 18, 19, 21].—While determination of whether motor carrier applicant is financially fit to perform proposed service is a matter within the Commission's discretion, such a finding must be supported by and based on substantial evidence. In proceeding under review, substantial evidence of record supports the Commission's finding that carrier seeking extension authority to transport general commodities between certain Alabama and Georgia points, which had annual gross receipts of less than $7,000 with a deficit of over $3,000, and which had a good credit rating, was financially fit; sustained.—Georgia Highway Exp., Inc. v. United States, 331 F. Supp. 906 (908-9)*.

Although applicant's assets exceed its liability by only $3,096, all but $1,002 of its liabilities is owed to associated companies. Inasmuch as contemplated interrelation between applicant, Transcontinental Bus System, and affiliated companies is expected to give applicant many economies of operation through use of affiliates' personnel, terminal, shop, and other facilities, it may be found financially fit to conduct the proposed operations.—Continental Dispatch, Inc., Common Carrier Application, 95 M.C.C. 483 (486).

While applicant did not formally introduce in evidence the usual financial data, its balance sheet was submitted under oath with original application and is entitled to consideration in assessing its overall fitness where there is no reasonable doubt as to its financial stability.—D & M Taxi Co., Inc., Common Carrier Application, 96 M.C.C. 439 (447-8).

Financial fitness of applicant is pertinent only in determining whether it can adequately conduct proposed operations. Therefore, although applicant long has operated at a deficit, this alone does not render him unfit. Extension herein sought is for operations in area applicant already serves; and since proposed operations can be performed with applicant's existing manpower and equipment, there will be no added financial burden on applicant if authority sought is granted; indeed extension of applicant's present authority probably will enable it to reduce its present operating deficit to a considerable degree. Granted in part.—Brown's Connecticut Airport Service, Inc., Conversion. 103 M.C.C. 6 (11).

Since applicant's financial position was shown to be weak, and applicant failed to conform to the requirements of the Act and the rules and regulations thereunder, sought authority was denied.—Colorado Air Cargo, Inc., Common Carrier Applic., 110 M.C.C. 442 (446-7).

Commission found applicant financially fit although its operations for one year showed a substantial deficit because such deficit resulted from extraordinary expenditures connected with acquistion of another carrier and new equipment and such expenses are not recurring items. Applicant had no difficulty in obtaining bank financing and currently operates at a profit.—Tennessee Carolina Transp., Inc., Ext.—Memphis, 113 M.C.C. 711 (713).

Although applicant's balance sheet revealed current liabilities exceeding current assets to a slight degree, its operations were profitable during the period in question, and a grant of authority would enable it to better its financial position. Therefore, protestants' allegation that applicant (which already has the required equipment for the proposed operation) is not financially fit properly to perform the considered service was rejected.—Saldutti & Son, Inc., Ext.—Inedible Fish Oils, 118 M.C.C. 58 (66)*.

The financial fitness of an applicant is pertinent only in relation to whether it can adequately conduct the proposed operations. Compare 103 MCC 6. Authority sought herein is for operations in an area which applicant already serves, and applicant indicates that the proposed operations would be provided with its existing manpower and equipment. Additionally, applicant has demonstrated that two banking institutions have agreed to lend it any needed financial assistance. Therefore, although applicant's current liabilities exceed its assets we conclude that applicant is financially fit.—Distributors Service Co., Extension—Foods, 118 M.C.C. 322 (328-9)*.

Following the traffic: [Vols. 11, 12, 14, 16-19, 21].—Adequacy of existing service is only one element in determining whether a carrier may be permitted to follow traffic whose orgin has been relocated and which it served at the former plant site. An equally important consideration is the effect a grant or denial of authority will have on the existing competitive scheme in the area involved. Since applicant and several protestants served supporting shipper at prior origin and shipper is now using additional service which it did not utilize before, although available, approval of the application preserves the existing competitive scheme rather than disrupting it.—G.P. Ryals, Extension, 107 M.C.C. 434 (438-9).

Foreign commerce: [Vols. 10, 11, 14, 16, 18, 19, 21].—Since Massena, N.Y., is a New England type town and a village within that town (a town need not be located in New England to be considered a "New England type town" for purposes of construing operating authority), then both applicants, one a regular-route, general commodity carrier with authority to serve Massena as an off-route point and the other, an irregular-route carrier with authority to transport general commodities to Massena, may also serve Rooseveltown, N.Y., which is located 7 miles from the Village of Massena but within the town and the international boundary point located at Rooseveltown. While this enables the applicants to transport Canadian traffic moving to or from points outside the town of Massena, neither may move traffic to or from Canada, which originates or terminates within Massena. As need was demonstrated for services of two carriers, authority was granted to both to operate between Massena and the port of entry on the international boundary between the U.S. and Canada at Rooseveltown.—W. T. Byrns Motor Exp., Inc., Extension—Rooseveltown, 96 M.C.C. 765 (767-9).

While the Commission is aware that its regulatory jurisdiction does not extend beyond United States borders, it must look to the overall substance of a proposed service from United States origins to port of entry on international boundary on traffic moving to Canadian points, both the interstate and foreign aspects, in determining whether authority sought is required and, if so, to what extent. To deny the application without giving any consideration to the totality of the proposal could leave foreign consignees helpless where, as in instant case, the traffic is destined to points beyond United States border and none but applicant can meet shippers' reasonable transportation requirements. On reconsideration, therefore, consideration is given to proposed single-line service (without change of lading at the border) direct to Canadian jobsites required by supporting shippers and to the inadequacies and facilities within Canada to meet that requirement; granted in part.—Balzas Common Carrier Application, 98 M.C.C. 522 (527)*.

Shipment of urea imported from Trinidad to North Carolina for consignees, who are known in advance and bound by contract to accept fixed monthly quotas, is in foreign commerce; and shipment's subsequent movement from Wilmington, N.C., to other points in N.C. is part of a continuing movement in foreign commerce, since the only uncertain element in the entire movement is the ultimate delivery date for each account and the essential character of commerce is not affected by such temporary storage as may be required. The record is clear that supporting shipper requires the service of carriers authorized to transport these shipments; however, authority granted restricted to the transportation of shipments of urea, in bulk, having a prior or subsequent movement by water.—Petroleum Transit Co., Inc., Extension—Wilmington, N.C., 102 M.C.C. 380 (385-6).

Supporting shipper's plants are located in Canada. Shipper, a manufacturer of trucks, has in the past transported vehicles in private carriage to points on the border for interchange with one of the applicants. Protestants do not hold authority to originate an "initial movement" from a point in Canada to a point in the United States. It is within scope of Commission's power to grant initial movements authority from the Canadian border even though the involved plants are located in Canada. Shipper should not be forced to rely on private carriage to avail itself of the ample "secondary movements" service shown to exist herein. Authority granted to both applicants to move considered traffic, in foreign commerce only, upon condition that each applicant submit a sworn statement that it has received proper authority or that no Canadian authority is necessary.—Dallas & Mavis Forwarding Co., Inc., Ext.—Canadian Ports of Entry, 108 M.C.C. 295 (298-300)*.

It is not any inadequacy among carriers that impedes efficiency in foreign commerce between the U.S. and Mexico, but rather the stringent requirements of Mexican law regarding use of only Mexican-owned equipment on Mexican soil.—Transportes Azteca Extension—Eastern States, 117 M.C.C. 645 (650).

Future need: As established in 67 MCC 252, a shipper may establish a future need by showing that it is actually soliciting business or has some definite plan upon which it can be reasonably found that the commodities sought to be transported will move in the near future.—West Motor Freight, Inc., Extension—Fleetwood Foods, 118 M.C.C. 50 (55)*; here, shipper has been shipping involved commodities into a number of destination States, its sales are increasing at a very rapid rate, and it has established a sales force designed to sell its products throughout the continental U.S. Protestants are unable or unwillingto perform proposed service. Both applications granted substantially as filed.—Belger Cartage Service, Inc., Extension—Vehicles, 113 M.C.C. 540 (543)*.

In order to prove a future need, an applicant must demonstrate with competent evidence that the need for transportation service at issue will develop with reasonable certainty. This is most often accomplished by the submission of evidence indicating the shipper's *specific* plans for future development of its product or market. A declaration by the supporting shipper that it expects to market its products in all principal cities in the U.S. does not constitute adequate or proper evidentiary support for a finding of future need for service. See also 67 MCC 252 (1956).—Frost-ways, Inc., Extension—Livonia, Mich., 117 M.C.C. 209 (215)*.

Hours of service; safety regulations: [Vol. 16].—The examiner's finding that applicant was not fit and able to conduct proposed operations, i.e., transportation of passengers in assembled groups of not more than nine persons to which it leases automobiles for operation by a group member in commuting to and from work, was based on his conclusion that applicant would be unable to comply with applicable safety regulations pertaining to hours of service of drivers; however, transportation time involved of about 2 hours a day, 5 days a week, plus the normal 8 hours at work will neither exceed the allowable 60 hours per week nor the aggregate 10 consecutive hours within a 24-hour period. Certificate authorizing described operations will be conditioned on the Commission's reserving the right to impose in the future such terms, conditions, or limitations as it may find necessary in order to insure that the service authorized is performed in conformity with applicable safety regulations.—Monarch Associates, Inc., Common Carrier Application, 107 M.C.C. 277 (285-6)*.

Household goods: [Vols. 12, 16, 18, 19, 21].—Scope of judicial review of Commission orders, which granted plaintiff authority to transport household goods subject to so-called "Kingpak" restriction, is limited to ascertaining whether there is warrant in the law and facts for the agency action. Under §207(a), the Commission has broad and exclusive discretion in determining whether a certificate of public convenience and necessity shall be granted; and so long as its report, read as a whole, discloses the essential basis for its judgment, it is not required to make formal and detailed findings of fact regarding the evidence. Purpose of Congress was to leave to the Commission authority to decide whether additional motor service would serve public convenience and necessity; that, of course, gives it administrative discretion to draw its conclusion from an infinite variety of circumstances that may occur in specific instances. [326 US 60.] The Commission, not hearing examiner, has responsibility of evaluating public need and, in making its decision, it is free to accept or reject the examiner's recommendation.—Towne Services Household Goods Transp. Co. v. United States, 329 F. Supp. 815 (819-20)*.

The judicial function is exhausted when a rational basis for an agency action is found. It is the Commission's duty and obligation to accept or reject findings and recommendation of its examiner and, in considered instance, it rejected only those portions thereof which would grant plaintiff an unrestricted, rather than a "Kingpak," certificate. Although plaintiff argues that, since other carriers have in recent years been granted unrestricted household goods certificates on the basis of evidence adduced in other proceedings, it is entitled to a similar certificate as a matter of right, such reasoning completely misinterprets the statutory plan for granting certificates and the nature of applicant's burden to show need for his proposed service. Also, the fact that the Commission did not affirm hearing examiner's findings is not important since, under governing statutes, the Commission and not an examiner or employee board must render the final decision. Considered decision is amply supported by substantial evidence of record; therefore, the Commission's action in granting plaintiff a restricted certificate is sustained.—Id., pp. 820-2.

Although protestant argues that it is ready, willing, and able to handle all foreseeable needs of household goods shippers in the State, the fact that its service, rendered through local agents or otherwise, is admittedly competitive with activities of supporting shippers, who are forwarders of used household goods, negates any claimed willingness to provide shippers with the underlying transportation service required. Record is also clear that no carrier, other than applicant, is willing and able to handle the particular traffic movement here considered. If application were denied, shippers would be without adequate transportation between South Carolina points.—Nilson Extension—South Carolina, 95 M.C.C. 326 (329).

Supporting witnesses' testimony as to their use of, and complete confidence in, applicant's existing service does not establish a public need for proposed single-line transportation of household goods between applicant's authorized area in eastern States, on one hand, and points in 13 named western States, on the other; also, a finding that existing service is inadequate to meet transportation needs of the public is not warranted on the record. Applicant has been, and continues to be, an effective competitor within its authorized area and, under an exclusive joint-line arrangement with another household goods carrier, participates in movement of interline traffic from and to considered western States; however, there is no showing that authority sought is necessary to enable applicant to maintain its competitive position, or that its continued participation in the interline traffic is threatened by a possible termination of the joint-line arrangement. Application denied.—Neptune World-Wide Moving, Inc., Extension—Western States, 103 M.C.C. 533 (537, 538-9)*.

Operations of household goods carriers have long been considered different from those of other motor carriers and to deny authority which seeks only to replace a cancelled interline portion of a joint-line service for which substantial public need has been shown because of indicated technical reasons would harm public interest, the participating carriers, and abrogate the Commission's expressed policy as to household goods carriers.—Cartwright Van Lines, Inc., Ext.—Calif., 112 M.C.C. 399 (405).

On reconsideration, Division 1 reversed denial of authority sought herein as contained in report of Sept. 23, 1968 (not printed) inasmuch as said denial was due to the erroneous consideration of the application under the "Kingpak" standard. When considered in light of criteria of public convenience and necessity, testimony of supporting witnesses coupled with failure of protestants actively to pursue their objections demonstrates that sought should be granted.—Empire Fuel & Transfer Co., Common Carrier Applic., 113 M.C.C. 38 (44)*.

Applicant, an agent of an authorized household goods carrier, having established that its proposed service is required in addition to that of existing carriers including that of its principal, authority duplicating the principal's is granted.—Kriegsman Transfer Co. Extension—Household Goods, 113 M.C.C. 554 (559)*.

Applicant has presented sufficient evidence of past good faith operations and indicated support of shippers who have utilized its service, in accord with findings in 103 MCC 318, to warrant grant of authority to transport household goods.—Panda Transport, Inc., Extension—Baltimore, Md., 114 M.C.C. 75 (78-9)*.

Application for nationwide authority to transport household goods granted as it is consistent with findings in 110 MCC 452. Applicant is a large, established carrier which effectively competes for such traffic at present, and conditions in the household goods carrier industry are such that a grant of authority will so redound to the benefit of the public as to offset any slight detrimental effect to existing carriers.—King Van Lines, Inc., Extension—48 States, 114 M.C.C. 866 (869-72).

See also H C & D Moving & Storage Co., Inc. v. United States case, §207(a), n. 24.

Interchange: [Vols. 17-19, 21].—While applicant, seeking authority between points in 50-mile radius of Kokomo, Ind., limited to shipments moving in interline service with other common carriers, which would permit it to interline traffic at Indianapolis rather than some more distant point, claims that use of that interline point would allow it to achieve operating economies by avoiding circuitous operations, it made no real attempt to show what, if any, savings in mileage, time-in-transit, or operating costs would result. Furthermore, shippers' support was wholly based on need for transportation of emergency, weekend, or afterhours shipments which protestants were not always able to pick up promptly. Grant of authority sought would enable applicant to serve a major nearby consolidation and break-bulk point in competition with protesting short-haul carriers presently serving that gateway, and thereby provide a new competitive service for which no need is shown; denied.—Brada Miller Freight System, Inc., Extension—Kokomo, Ind., 96 M.C.C. 473 (475-7).

After a thorough analysis of the record, it is clear Florida shippers are not receiving a reasonable and consistent service for which they have established a need and to which they are entitled. And although protestants argue that they will interline traffic at Charlotte, N.C., destined to Florida points, most protestants have either tariff restrictions or operational procedures which impair movement of volume traffic between these points. One protestant requires both supporting carriers to contact it before they accept truckload or volume traffic destined to Florida points in order to determine its willingness to interline; another has a tariff restriction requiring it to be either originating or delivering carrier; and a third is competitive with both supporting carriers in the same origin territory, and, as they fear single-line solicitation, they do not offer this protestant their traffic. Moreover, the record also discloses protestants' inability to interline traffic between points in Florida. Granted.—Alterman Transport Lines, Inc., Extension—General Commodities, 106 M.C.C. 402 (415-6, 419-20)*.

Public convenience and necessity found to require proposed operation when applicant demonstrated that the sought relocation of its interchange point on traffic moving between Salt Lake City, Utah, and Denver, Colo., from Rico to Montrose, Colo., will result in operating economy and efficiency which will inure to the public's benefit; that proposed service will not be different from that it can now perform at Rico; that a grant of the authority sought will not materially enhance its competitive position; and that protestants will not be materially and adversely affected by such grant of authority. Irregular-route authority between Salt Lake City and Montrose, with service at Montrose restricted to interlining of traffic only, and subject to a restriction against severance from applicant's existing Salt Lake City-Rico authority, granted.—R. A. Gould, Inc., Extension—Montrose, 108 M.C.C. 69 (72-4)*.

Cancellation of an interline arrangement so jeopardizes continuance of a joint-line service for which a need has been shown by substantial public use over many years as to warrant applicant's requested operation. Fact that proposed operation will be joint-line rather than single-line, as in cited 98 MCC 58, is merely incidental as no requirement for single-line service was shown therein.—Cartwright Van Lines, Inc., Ext.—Calif., 112 M.C.C. 399 (404).

After proceeding under various theories of proof including elimination of gateway, alternate route, or extension of a new service route, under which it failed to meet its required burden of proof, applicant, a regular-route motor common carrier operating through interchange points at Detroit and Bay City, Mich., and Toledo, Ohio, on the one hand, and on the other, points in Michigan and other States, was granted authority to establish additional interchange points at Grand Rapids and Lansing, Mich., based upon a showing that its present interchange point at Detroit was heavily congested with traffic, that the proposed operation will result in greater operating economy and efficiency, and that the additional interchange operations will not result in a service competitively different from that which applicant renders at its present interchange points.—Short Freight Lines, Inc., Extension—Grand Rapids, Mich., 113 M.C.C. 316 (321-2)*.

Except as to those points between which one protestant could operate directly, applicants were granted authority where existing joint-line service was found to be inadequate.—Curtis, Inc., Extension—Textiles and Floor Covering, 113 M.C.C. 340 (347).

Deterioration of interline conditions at Nashville, Tenn., due to congestion warrants grant of authority to applicants to transport general commodities between Nashville and Memphis, Tenn. The latter point is less congested and is a more advantageously located gateway for the considered area, thus preserving a valuable transportation service for interlined shipments.—Tennessee Carolina Transp., Inc., Ext.—Memphis, 113 M.C.C. 711 (720-2).

Application, relying upon 98 MCC 58, denied as applicant's attempts to reestablish the interline service, deteriorated by one carrier's bankruptcy, have been minimal and reliance upon traffic generated under applicant's temporary authority is inappropriate in such a case as this. Thus, applicant has not complied with the principles set forth in 98 MCC 58 for grants of authority.—Cartright Van Lines, Inc., Ext.—Calif., 114 M.C.C. 303 (307-9)*.

Commission, citing *Eagle Motor* (N/P/R) decision of Dec. 15, 1969, modified prior grant by restricting applicant's authority against tacking and interlining, since applicant has agreed that protestants would be materially and adversely affected by a grant lacking such restrictions. Partial restrictions rejected as administratively unworkable. Authority in all other respects granted.—Duenow Extension—Fertilizer, 114 M.C.C. 525 (528-9)*.

On reconsideration, Commission modified prior grant of authority to applicant so as to allow a limited joint-line service, including transportation of traffic having a prior or subsequent movement by water or air, as such joint service will enhance the cooperation between carriers so essential to a balanced and effective transportation system.—Watkins Motor Lines, Inc., Ext.—General Commodities, 114 M.C.C. 562 (566)*.

Application for extended common carrier general commodity authority to Jacksonville, Fla., was based on 5 years of difficulties in applicant's interchanging Florida traffic generated on its system. Connecting carriers were reluctant to enter into or maintain joint and through rates, insisted on premium divisions as price for continuing joint rates, and refused to exchange trailers or to pay rental for applicant's trailers. Authority granted.—Overnite Transp. Co. Ext.—Jacksonville, Fla., 115 M.C.C. 718 (725)*.

Protestants' proposals to serve shipper by interlining with other carriers not parties to this proceeding are entitled to little weight inasmuch as there is little evidence of record that the interlining carriers are suitably authorized and available for the movement of the involved traffic.—West Motor Freight, Inc., Extension—Fleetwood Foods, 118 M.C.C. 50 (55)*.

Applicant and its supporting shipper both view the instant application as an effort to substitute direct, single-line service to the involved destination territory for joint-line service assertedly being performed by applicant in conjunction with other motor carriers. Although carriers that have provided a significant quantum of joint-line service may be granted direct-line authority if the interline arrangement is cancelled through no fault of their own, such is not the case here. Applicant named only one carrier with which it has interlined traffic to the involved destination states, and is not confronted with an impending cancellation of joint-line concurrence. Denied.—Onley Refrigerated Transp., Inc., Ext.—Conn., 118 M.C.C. 127 (132)*.

Intrastate certificate: [Vols. 16-19, 21].—Valid intrastate certificates can be relied upon by applicant in proving need for proposed service. However, under color of such certificates non-authorized operations cannot generally be shown. Since a person could control operations of both applicant and a multi-State carrier, applicant cannot be said to be operating within a single State for purpose of former single-State exemption since its operations are not independent of those of commonly controlled carrier; fact this power of control has not actually been exercised does not alter this situation.—Barton Truck Line, Inc., Ext.—General Commodities, 99 M.C.C. 460 (467-9)*; however, since the question of common control was not patent, applicant's prior operations under the former second proviso were conducted under color of right granted by the Commission and were subsequently conducted under a statutory right conferred by the "grandfather" provision of §206(a)(7). Therefore, such operations may properly be considered in determining whether or not proposed service is required by the public.—Barton Truck Lines, Inc., Eligibility—Utah, 106 M.C.C. 234 (237)*.

In applications for interstate authority based on operations conducted under state certificates registered under §206(a)(7) of the Act, a showing of past continued performance of lawful transportation is itself evidence of public need for continuance thereof; on the other hand, any request for authority more extensive than that lawfully authorized to be performed under the certificate of registration requires substantially the same degree of proof of public need for service as would be required in any application under §207. Accordingly, proper weight will be accorded respondent's past good faith operations, although unauthorized, along with other relevant facts in determining whether a public need has been established for the proposed service, and whether such continuing operations justify the issuance of the authorities requested.—Imperial Truck Lines, Inc.—Common Carrier Application, 106 M.C.C. 741 (751-2).

See also Western Gillette, Inc.—Control—Desert case, §5(2), n 110, *Certificate under §207.*

Labor difficulties: [Vols. 19, 21].—Applicant, a contract carrier, was granted temporary authority to serve the supporting shippers when protestant was forced to cease operations in the involved areas due to labor difficulties which resulted in a strike and acts of violence. Protestant has restored operations in the affected areas except as to points in southeastern Pennsylvania including Philadelphia. The supporting shippers' reason for supporting this application is that protestant is not now operating in part of the area to be served and has not provided service for this area for approximately 20 months. The public convenience and necessity dictate that a major American city (Philadelphia) should not be left without motor carrier service simply a carrier ceases operations, whatever the cause may be. Furthermore, it is clear that the cessation has now gone far beyond the stage of a temporary disruption. Sucessive grants of temporary authority are not the best method of assuring service to the public in this case as that procedure is not calculated to provide the continuous presence of motor carrier service shown to be needed here.—Hourly Messengers, Inc., Ext.—Parcels and Packages 108 M.C.C. 402 (404-5)*.

The hypothetical possibility of future strikes or work stoppages is not a sound basis for a grant of authority. Except in the unusual instance, the appropriate course of relief for such occurrences is an application for temporary authority.—Paulaski Highway Express, Inc., Extension—Ky., 117 M.C.C. 552 (554)*.

Lease arrangement: [Vols. 12, 16, 18, 19, 21].—See Point Transfer, Inc., Extension—Pa. and Ohio Origins case, §207(a), n. 25 *Fitness.*

Monopoly: [Vols. 12, 19].—Mere existence of a monopoly is not in itself sufficient justification for establishment of a new operation in absence of inferiority or inadequacy in existing service; however, where fact of monopoly has been established and where questioned carrier has not used its exclusive occupancy or has allowed itself to operate to the disadvantage of the public, the very fact of monopoly may be considered as a circumstance requiring remedial action. On instant record it is clear that protestant's monopoly has been a factor contributing to less than adequate service; testimony of supporting shippers and receivers of freight clearly indicates that they are not receiving the consistent overnight service which they desire and need. And, although considered Northwest Florida territory has not been a source of heavy traffic, proposed competitive service is practical and, perhaps, it will provide the stimulus needed to improve service. Granted.—P. C. White Truck Lines, Inc., Extension—Northwest Florida, 102 M.C.C. 204 (212-15).

One-way service: [Vols. 17-19, 21].—Four applicants seek authority to transport liquid acids and chemicals from points in the United States to the St. Louis commercial zone area. Applicants want inbound authority (return authority) commensurate with their outbound authority in order to provide an efficient and economical two-way service for respective supporting shippers. Shippers then would be able to avail themselves of reduced round-trip tariff provisions published by applicants covering return load movements. The rate question is one of economic savings through a more efficient operation rather than one of mere desire for lower rate levels, and this proceeding was determined as one of NTP. Only one of the several shippers is in a position to generate a feasible outbound-inbound circuit of motor transportation without a diversion of traffic which will seriously affect opposing carriers; the preponderance of susceptible traffic is transported by rail carriers, and, since the other existing carriers do not have authority to perform round-trip movements, any appreciable traffic which might be diverted from them is already subject to diversion. The economies of such coordinated movements will benefit both the carriers and the public alike. Authority granted as to two of the applicants.—Rogers Cartage Co., A

Corporation—Ext., 110 M.C.C. 139 (140, 141, 144, 148)*.

Past operations: [Vols. 10-19, 21].—See also Dixie Exp., Inc., Investigation and Revocation case, §207(a), n. 25 *Existing service;* D. S. Scott Transport Ltd. Extension case, §206(b), n. 22 *Admissibility;* Eastern States Transp., Inc. case, §207(a), n. 25 *Conversion;* H C & D Moving & Storage Co., Inc. v. United States case, §207(a), n. 24; Wilson Trucking Corp.—Purchase—Compton Lines, Inc. case, §5(2), n. 110 *Certificate under §207.*

In competing carriers' suit to enjoin and set aside Commission order granting extension authority to defendant carrier, the question of past violations bears equally on issues of public convenience and necessity as well as fitness; however, illegality of past willful operations does not *ipso facto* block a grant of a certificate. The Commission carefully considered past violations of defendant carrier (applicant) and admonished it to cease such operations; and in an investigation proceeding, 112 MCC 228, it was found that applicant's violations in 1967 were not willful and did not warrant a suspension of authority. Also, there is evidence of record in instant case, other than that based on applicant's operations beyond commodity scope of its certificate, supporting Commission finding of public convenience and necessity which consisted of shippers' testimony of need for proposed service. The Commission made the basic statutory finding of public convenience and necessity; and the finding of need is supported by subsidiary findings which are supported by substantial evidence on the record as a whole. Complaint dismissed.—St. Johnsbury Trucking Co. v. United States, 326 F. Supp. 938 (942-3)*.

Supporting shippers require, essentially, l.t.l. service, and desire continuance of applicant's satisfactory service heretofore rendered under its authority restricted to "truckload lots"; however, carrier's past transportation is not evidence of need for proposed service, although it was performed in good faith under color of right. Even though it might constitute such evidence, it could not outweigh the unquestioned availability of existing carriers offering the same service without complaint form shippers; denied.—Southwest Freight Lines Ext.—Removal of Restriction, 95 M.C.C. 269 (278-9)*; furthermore, since authority is sought as an alternative to a construction of applicant's "truckload lots" certificate so as to permit operations of type depicted by considered representative truckload shipments, the application was filed primarily as a defensive measure. Record does not show need for additional service; denied.—Id., 98 M.C.C. 607 (611-2)*.

Evidence of applicant's past operations from and to considered airports in mistaken belief that they were within scope of the §203(b7a) exemption need not be summarily rejected. While the examiner apparently interpreted 88 MCC 37 as requiring a finding that applicant's past transportation for air freight forwarders had been unlawful and was entitled to no weight, application of the incidental-to-air exemption, at least insofar as operations of air forwarders were concerned, had not been finally settled at time of instant hearing. Moreover, decision in 95 MCC 71 overruled 88 MCC 37 to extent that latter purported to define position of air forwarders using services of underlying motor carriers.—White Air Freight Service, Inc., Common Carrier Application, 95 M.C.C. 616 (618-9).

Since applicant's prior operations under former second proviso of §206(a)(1) were conducted under color of right granted by the Commission, are presently being conducted under statutory right conferred by §206(a)(7), and have not been shown to be willfully or knowingly unlawful, they may properly be considered in determining whether proposed service is required by the public. While evidence of public support is limited, grant of authority is warranted by the showing of applicant's past operations under its registered intrastate authority, and by need shown for service of a carrier able to operate between points in Idaho over highways traversing neighboring States; the configuration of Idaho's boundary lines and geographical peculiarities of its highways system are such that the shortest or most suitable routes between northern and southern points therein often lie over highways through adjacent States. In addition, applicant's prior service as a distribution carrier in Idaho of interstate freight received from connecting rail and motor carriers is itself persuasive evidence of public need for continuance thereof. However, since performance of proposed operations will render applicant ineligible to continue present registration of its intrastate authority or to receive a certificate of registration under §206(a)(7), grant of authority is conditioned on applicant's request in writing for cancellation of its BMC-75 registration and the withdrawal of its BOR-99 "grandfather" application.—Statewide Transport, Inc., Extension—Idaho, 96 M.C.C. 57 (60, 62-5).

Although applicant's past transportation of passengers between Fort Dix and McGuire Air Force Base, N.J., and New York and Philadelphia airports does not establish need for proposed limousine service, it supports a grant of authority for special and charter operations with vehicles of 6-passenger maximum capacity. While supporting evidence is limited to traffic results of what is found to have been unauthorized service, the pertinent operations were performed under a bona fide, albeit erroneous, interpretation of the taxicab exemption of §203(b2) and as such are relevant to determination of application. Moreover, since involved traffic consists almost entirely of transient military personnel, presentation of user testimony would be impractical if not impossible. In the circumstances, applicant's transportation of an impressive number of passengers under color of right is indicative of a need for certificated service to extent indicated. However, as there is no proof of movement of persons from Springfield Township, N.J., application is to that extent denied.—D & M Taxi Co., Inc., Common Carrier Application, 96 M.C.C. 439 (433, 445, 446).

While interstate traffic handled by single-State operator subsequent to negotiations for sale of its rights is entitled to little weight, since augmentation of traffic handled by intrastate carrier to be acquired in §5 proceeding resulted primarily from fact that its interstate operations increased, and was free from the "control, influence, and dominion of the proposed purchaser," such operations may be considered along with other evidence respecting whether continuance thereof by acquiring multiple-state carrier would meet a public need. Furthermore, assuming that acquired carrier's past operations were unlawful, as protestants charged, they were conducted under color of right and therefore are entitled to consideration as evidence which, together with that of supporting shippers, warrants grant of certificate sought as a matter directly related to proposed control and merger transaction.—Helphrey Motor Freight Inc.—Purchase—Manning Freight, 97 M.C.C. 549 (562-3)*.

Vendor's past continued lawful performance of operations in interstate commerce under the exemption of the former second proviso of §206(a)(1), or under §206(a)(7), found sufficient, in and of itself, to establish a public need for vendee's continuance of such operations; certificate of public convenience and necessity issued in proceeding directly related to proposed purchase which is approved.—Lake Shore Delivery, Inc.—Durst Delivery, Inc., 97 M.C.C. 623 (627).

As held in 97 M.C.C. 411, principles previously applicable in §5 proceeding involving former second proviso single-State operations are equally applicable to operations under §206(a)(6) and (7). Accordingly, in single-State carrier's §207 application proceeding, a matter directly related to proposed stock control transaction, applicant's past performance of lawful operations conducted under the single-State exemption is evidence itself of public need for their continuance in interstate commerce; evidence of such past operations, together with shipper testimony clearly justifies grant of authority sought.—Transport Motor Exp.—Control—Capitol Freight Lines, 97 M.C.C. 721 (725).

Applicant's very substantial past unauthorized single-State operations between Big Run, Pa., and points within 25 miles thereof, on the one hand, and Pittsburgh and Philadelphia, on the other, are proper subjects for consideration in determining whether need exists for continuation of his service. Supporting shippers have used, and have come to rely on, applicant's service, and evidence amply demonstrates that he has been providing highly satisfactory service and has attracted a large volume of traffic; however, authority granted is limited to that for which need is shown.—Bowser—Investigation of Operations, 98 M.C.C. 170 (178-9).

Applicant has been serving major aerospace shippers in belief that its "aircraft" authority was sufficient to perform considered operations; this misunderstanding was the result of several informal expressions by Commission's Bureau of Operations and Compliance and the wide-spread trade usage of term "aircraft" to embrace the new rocket and space age commodities. Thus, since evidence establishes that supporting shippers have depended upon applicant to handle substantial volumes of their traffic and that the continuation of extensive service of type provided by applicant is essential to their operations, authority granted.—U.S.A.C. Transport, Inc., Extension—Missiles, 103 M.C.C. 23 (31-2).

Although applicants have not served every potential shipper nor operated between all points in their respective territories, this is no bar to grant of authority, since they have transported traffic of type involved under color of right between representative points in their individual territories and have adduced shipper support for their application. While protestants should be protected with respect to type of traffic they have historically handled, their limited transportation of motor vehicles weighing 15,000 pounds or more is insufficient to offset the need for continuance of past services of applicant in movement of such traffic. Granted in part.—Ashworth Transfer, Inc., Ext.—15,000 lb. Articles, 103 M.C.C. 404 (411).

It is well established that evidence of past operations will support a finding of convenience and necessity and will warrant a grant of authority substantially identical to the previously conducted operations. Futhermore, past operations conducted illegally, but under color of right, have also been found to support a finding of public convenience and necessity. Evidence of past single-State operations in Illinois conducted by applicant (controlled carrier in §5 transaction authorized) under its "grandfather" certificate of registration, including its service at Freeport under color of right, warrants finding that public convenience and necessity requires its operation as a common carrier, except as to service at Joliet and the transportation of certain specified commodities; thus, authority for described irregular-route operations, to replace applicant's certificate of registration, is granted.—Arrow Motor Transit, Inc.—Control, 104 M.C.C. 436 (440-1).

When applicant seeks certificated authority without shipper support to operate between points in Utah and Nevada points in Wendover, Utah, commercial zone, solely upon basis of its past operations under former single-State proviso, such past operations are at issue, and it is incumbent upon applicant to establish its right to operate thereunder.—Barton Truck Line, Inc., Ext.—General Commodities, 99 M.C.C. 460 (469)*; however, on further hearing the Commission determined that since question of applicant's common control with multi-State carrier was not patent and was resolved only after a full determination of the facts, applicant's prior operations under former second proviso were conducted under color or right granted by the Commission and were subsequently conducted under a statutory right conferred by the "grandfather" provisions of §206(a)(7); also, Barton's past occasional service to Nevada points in the Wendover, Utah, commercial zone are not shown to have been willfully performed in violation of the Act and were terminated when Barton was informed of their unlawfulness. Since applicant's past operations have not been shown to be knowingly or willfully unlawful, they may be properly considered in determining whether or not proposed service is required by the public.—Barton Truck Lines, Inc., Eligibility—Utah, 106 M.C.C. 234 (237)*.

Past operations, even when conducted in good faith, are not necessarily determinative of the issue of public need for the continuance thereof; due consideration must be given to the interests of carriers already authorized to provide proposed service. Applicant, although an experienced operator of many years, claims he transported considered commodities in good faith; this is a difficult premise to accept, since considered operations were contrary to numerous and consistent Commission pronouncements for 10 or more years, during which legality of considered services was challenged. Therefore, on this record, it is clear that applicant's claim of good faith is of doubtful validity and little, if any, weight may be accorded to the evidence of applicant's past operations in support of such operations; further, protestants, collectively, have the necessary authority and wherewithal to provide proposed service. The fact that denial of the application will foreclose applicant's participation in traffic it previously enjoyed for a number of years is not controlling. Denied.—Beaney Ext.—Ports of Entry Between U.S. and Canada, 106 M.C.C. 243 (247-9).

Applicant's past operations under color of right are entitled to consideration in deciding the question of public convenience and necessity; however, that such operations have been conducted in the past is not, in and of itself, proof of need for continuance thereof; past operations must be considered with other evidence to determine whether proposed service is required by the public. Though applicant has continuously operated under considered certificate since about 5 years prior to the Commission's decision (in 103 MCC 307) that a portion of the authority should be canceled because it was granted pursuant to proceedings in which proper notice had not been given to interested parties, the record shows that protestants have faithfully provided supporting shippers with satisfactory service for a long period of time and no serious defects in their service are shown. Grant of the authority would adversely and materially affect protestants' operations without concomitant benefit to shippers; moreover, availability of applicant's added service in protestants' authorized area is, at best, a matter of shippers' convenience and not of public necessity; denied.—Carl Subler Trucking, Inc., Modification of Certificate, 107 M.C.C. 539 (540-1, 549-50)*.

Applicant's predecessor had grandfather authority to transport "heavy machinery". The record establishes that applicant's predecessor engaged in rigging, erecting buildings, and the movement of heavy commodities (other than machinery) which because of size or weight require heavy equipment. Applicant contends that grant of grandfather authority to transport "heavy machinery" is the equivalent of heavy hauling pursuant to 2 MCC 710, which identified heavy haulers as carriers of heavy machinery. Record shows abundant shipper support for service proposed as well as substantial proof of applicant's past bona fide operations over many years as a so-called heavy hauler. Therefore, review of all the evidence of past operations and of public convenience and necessity now presented on this record is not founded upon need for the transportation of new commodities; rather, it is based upon a service which utilizes special equipment in the transportation of any heavy commodity. Thus, authority granted to applicant's predecessor was intended to include all the articles normally handled by a heavy hauler. Grandfather certificate modified to authorize such service.—Jetco, Inc.—Investigation and Revocation of Certificate, 108 M.C.C. 498 (503-5)*.

Although applicant was allowed to continue operations under the former second proviso of §206(a)(1), after denial of its §206(a)(7) "grandfather" application, pending determination of corresponding §207(a) application, in view of its admitted affiliation with a multi-State carrier the past operations of applicant under the registration provisions have been unlawful from the beginning. Thus, the prior operations under the former second proviso were not conducted under color of right, and applicant's past operations may not be considered in determining whether or not the proposed service is required by the public.—Merritt Corporation Common Carrier Application, 108 M.C.C. 865 (870)*.

While applicant, a household goods carrier, indicates that it has served both "exempt" freight forwarders and the Department of Defense (DOD) in the past and has submitted abstracts of past operations performed under "pack and crate" contracts and orders for the latter, it has failed to present evidence of shipper support which would indicate a need for the continuance of these past services; and, while the demonstrated conduct of such past operations is accordingly entitled to weight, it has not as yet been deemed sufficient to warrant a grant of authority in the absence of appropriate support by those relying on such a service for the future. In reaching this conclusion, we recognize the possible difficulty in obtaining DOD support. However, appropriate DOD authorities have appeared in support of similar applications. If DOD is the only shipper to be served, a statement of its position is essential to warrant any grant of authority. Application denied without prejudice to the right of applicant to file an appropriate petition seeking the reopening of the proceeding for the purpose of submitting specific and concrete evidence of shipper support, and the precise nature of all the commodities involved.—Keenan Transfer and Storage, Inc., Ext.—Household Goods, 110 M.C.C. 1 (4-5).

It is apparent that the defendant has performed the questioned operations in an open manner, and it is probable that the defendant has conducted past operations under color of right which would be entitled to evidentiary weight in evaluation by the Commission of a request for authority under §207. The defendant's past unauthorized operations under substantial color of right warrant consideration on the question of whether the public convenience and necessity require the continued performance of its past service. Complaint dismissed, conditioned, however, upon the filing by defendant of an application for authority to conduct the local operations questioned herein. Otherwise, defendant is ordered to cease and desist from subject operations.—Red Star Express Lines of Auburn, Inc. v. Maislin, 110 M.C.C. 23 (27).

Applicant's past unlawful operations arose from a misconstruction of its pertinent heavy-hauler authorities. Such misconstruction resulted naturally from the complicated evolution of the definition for heavy-hauling from a service described in terms of commodities handled to one defined by type of service performed. In view of these factors, past operations in unlawful service are insufficient to preclude a finding that applicant is fit. Granted.—Equipment Transport, Inc., Ext.—Heavy Hauling, 111 M.C.C. 74 (83-5).

Applications to transport bulk commodities having prior movement by rail granted, with indicated exceptions, to those applicants participating in involved movements prior to Penn Central's introduction of Flexi-Flo operations. Additionally, applications directly supported by shippers are granted to extent indicated herein. No valid reason is given for limiting grants to only two carriers from each terminal.—Mutrie Motor Transportation, Inc., Ext.—Ex-Rail, 111 M.C.C. 251 (275)*.

On reconsideration, application to transport general commodities, with exceptions, between Seattle, Wash., and points in specified Washington State counties granted as evidence of applicant's past operations is conclusive proof of a need for the proposed service to the extent demonstated by such operations. Where past operations are not territorially coextensive with the application herein, supporting shippers' testimony establishes a public need for the proposed service to the extent specified.—Federal Transfer Co., Inc., Extension—Seattle, Wash., 111 M.C.C. 559 (564)*.

Applicant's past unauthorized operations in proposed charter service do not support a grant of authority, particularly in view of the complete absence of showing of any inadequacy in service of the protestant motor carriers. Denied.—Pathfinder Bus Lines, Inc., Common Carrier Application, 111 M.C.C. 609 (613-4)*.

Applicant's past non-certificated operations were shown to be conducted under color of right and are accorded substantial weight in instant case, as applicant made timely request for temporary authority after judicial determination that such operations were subject to this Commission's regulations. Such operations were never questioned by this Commission; and, as applicant's actions compare favorably with those of another carrier whose operations were previously found bona fide, as cited herein, application is granted.—Morgan Express, Inc., Extension—Amarillo, Tex., 111 M.C.C. 784 (789-90)*.

Evidence of record shows that applicant's past operations in movements for which authority is sought herein, were conducted under an erroneous, but bona fide, interpretation of its existing certificate and were thus conducted under a color of right. Additionally, record shows that such operations, conducted without authority, developed in response to a public demand in part due to inadequacy of existing service. A denial of this application would be injurious to the public interest whereas a grant of authority has not been shown to be injurious to protestants. Application granted.—Byers Transp. Co., Inc., Ext.—Restriction Removal, 113 M.C.C. 50 (56-7).

Application to perform motor common carrier operations, which had been conducted by carrier on an extensive scale for many years unlawfully without appropriate authority but under a color of right in good faith that they were authorized under the terms of its existing certificate, granted primarily on the basis of such past "color of right" operations pursuant to subsidiary findings that the supporting shippers' evidence had established a public need for the continuance of carrier's service, that carrier does not represent a new competitor entering the field, and that a grant of authority allowing carrier to continue its operations will not create a new or aggravated competitive situation to the detriment of other carriers.—Malone Freight Lines, Inc., Investigation of Operations, 113 M.C.C. 442 (463-5)*.

Past unauthorized operations performed under color of right, together with testimony adduced by institutional witnesses, especially in the absence of protestants' ability to provide the proposed service, is sufficient to warrant a grant of authority to transport passengers, in charter operations, limited to the transportation of not more than six passengers in any one vehicle.—Airfield Service Co. Ext.—Charter Operations, 114 M.C.C. 493 (496-8)*.

Petroleum; petroleum products; stringing pipelines: [Vols. 19, 19, 21].—See Willett Extension—Pipeline Machinery case, §207(a), n. 25 *Commodity*.

Prior denial: [Vols. 13, 18, 19, 21].—In applicant's initial proceeding evidence of protestants' proposed merger was considered; in view thereof, applicant's authority, as granted, did not extend to two supporting shippers, since protestants' merged authorities would more than adequately handle the need evidenced. However, considered merger was never consummated, and protestants' individual authorities are inadequate to provide needed service. Therefore, applicant's authority amended on reconsideration.—Frozen Food Exp., Inc., Extension—Indiana, 103 M.C.C. 86 (88-9).

Public interest: [Vols. 11, 17-19, 21].—Although applicant is owned and controlled by one of the supporting shippers, it is a separately incorporated legal entity, and, under the circumstances, no harm is anticipated from an unrestricted grant of authority. Favoritism from common control can result in two ways. First, traffic applicant can obtain from affiliate could afford it a competitive advantage over other carriers inconsistent with public interest; secondly, a commonly controlled carrier might favor its affiliate against the interest of other shippers. The first possibility is clearly inapplicable, inasmuch as the evidence shows no existing motor carriers which could compete with applicant; as concerns the second possibility, transportation needs of applicant's shipper affiliate are small and other shippers, aware of considered relationship, unquestionably support applicant. Evidence establishes need for service and benefits accruing from grant of such authority outweigh any other considerations. Granted.—Super Speed Transport, Inc., Common Carrier Application, 96 M.C.C. 335 (336-7).

Applicant, the Greyhound Corporation, was granted closed door, passenger operating authority between Lincoln and Grand Island, Nebr., in spite of the presence of protestant, a Trailways affiliate, which was satisfactorily rendering a complete service, because with this additional service the benefits to the public will more than offset the harmful effects to Trailways. Unlike Trailways, Greyhound will have no authority to serve intermediate points and passengers using Greyhound's transcontinental bus service will no longer have to transfer or use Greyhound's circuitous route to the north in order to reach Lincoln. Greyhound already operates between Omaha and Grand Island; Lincoln, which is a growing commercial center, in attempting to compete with Omaha, is entitled to a similar quantum of motorbus service as Omaha, that is, the services of two major bus systems.—Greyhound Corp. Extension—Lincoln, Nebr., 96 M.C.C. 630 (633-5).

Extension authority proposed by applicant granted, although ordinarily a grant of new authority will not be issued until it is established that the existing carriers are unable or unwilling to handle the available traffic. A finding that the existing service is inadequate is not a prerequisite nor indispensable to the grant of a certificate of public convenience and necessity; especially when the applicant's proposed operation has developed in response to a specific public need, and it would not be in the public interest to deny applicant continued participation in traffic which it developed under a color of right.—

W. C. McQuaide, Inc., Extension—Air Freight, 108 M.C.C. 24 (27).

Application for permanent charter authority denied as grant of such authority would cause such traffic to be diverted from protestant motor carriers who rely upon their charter operation revenues in effect to subsidize their regular service operations. Diversion of this revenue from protestants would lead to a curtailment of regular service.—Pathfinder Bus Lines, Inc., Common Carrier Applic., 111 M.C.C. 609 (612-3)*.

Public interest generated by advertisement by applicant in the attempt to obtain support in establishment of public convenience and necessity was neither approved nor acceptable. See also, §206(b), n. 15.—Transportes Azteca Extension—Eastern States, 117 M.C.C. 645 (651).

See also American Courier Corp., Extension case, §207(a), n. 25 *Existing carriers*.

Public need: [Vols. 13, 18, 19, 21].—Public need is a fact and not the property of any particular applicant. Therefore, in determining which of two applicants should be granted authority, unless all other things are equal, which carrier offers proof of public need is unimportant.—Willis Shaw Frozen Exp., Inc., Extension—Springdale, Ark., 96 M.C.C. 225 (230); application for authority to serve 3 named cities, exclusive of intermediate points, granted, as benefits accruing to public outweight any adverse effects on protestants, and as applicant has shown itself best qualified to perform proposed operations under the criteria, stated herein, for choosing among 2 or more applicants seeking to perform the same service.—Braswell Motor Freight Lines, Inc., Extension, 112 M.C.C. 558 (568-70)*.

Application for authorization to transport prospective purchasers to and from a planned community under continuing contract with the sponsoring foundation must be denied when considered under §207 since the proposed service is indistinguishable from that which applicant and protestants can provide under their incidental charter authority. Further, the evidence tendered does not warrant a finding that traffic volume will require any additional service, and a grant of authority to the applicant would only result in a new authorization to provide service from a city which one of the protestants is already authorized to serve.—Suburban Transit Corp.—Contract Carrier Application, 106 M.C.C. 763 (770-71).

A need for the proposed service having been established by supporting shippers' testimony, protestant's pending application is not a sufficient basis for denying the application herein. Protestant cannot now provide the service, and shippers should not have to rely on the successful prosecution of a pending application to obtain a transportation service for which a present need has been demonstrated.—Direct Air Freight Corp.—Common Carrier Application, 106 M.C.C. 785 (789).

Commission determined that existing authority no longer describes the complete service required; supporting shippers are experiencing difficulties in obtaining deliveries of l.t.l. shipments of cartons and crated items and have a definite need for the comprehensive commodity and territorial service proposed in the applications, and evidence clearly shows that existing carriers cannot meet the reasonable transportation needs of the shippers. Applications expressed in terms of "intended use" commodity descriptions create interpretive problems, and are denied on that basis. Three applications granted.—North American Van Lines, Inc. Ext.—Overall, 107 M.C.C. 750 (762).

Protestant's ability satisfactorily to perform involved operation is not questioned. Grant of authority herein will have some detrimental effect on protestant when and if it resumes operating in Philadelphia after resolution of its labor problems. However, continuous need of a large class of shippers for specialized motor carrier service is of overriding importance here. While grant might be viewed as remedy more drastic than called for by the circumstances, such action is only satisfactory alternative available. Dangers involved in strike in which protestant is involved render its operations impossible. Commission order directing protestant to cease and desist embargo would be ineffectual because the continuing strike would prevent provision of service. The penalty for failure to obey a cease and desist order, suspension and eventual revocation of certificate, obviously would constitute a more drastic remedy than authorization of a competing service.—Hourly Messengers, Inc., Ext.—Parcels and Packages, 108 M.C.C. 402 (404-5)*.

On reconsideration, authority sought herein granted to extent that evidence of record shows a need for the proposed service and existing service is shown to be inadequate to meet shippers' transportation needs.—West Brothers, Inc., Extension—Baton Rouge, La., 108 M.C.C. 485 (489-91)*; Cobo, Inc., Common Carrier Application, 111 M.C.C. 200 (211-2)*; Carl Subler Trucking, Inc., Extension—Canned Goods, 111 M.C.C. 624 (628)*.

Since proposed operations do not meet the statutory definition of contract carrier operations, proposal was treated as an application for common carrier authority. Supporting shippers have shown a need for single-line, same-day delivery of books, and equipment, materials, and supplies used in the composition, printing, and binding of books. Same-day delivery is necessary to meet competition from other areas. Therefore, shippers need immediate access to equipment on such expedited shipments. Applicant has programmed a collection and delivery service to meet shippers' needs. While protestants have not sought shippers' business. Commission concludes that the present and future public convenience and necessity require operations porposed by applicant.—Frost Trucking Co., Inc., Ext.—Phila., Pa., 110 M.C.C. 203 (210-11)*.

Authority sought herein granted as testimony of consignors and consignees show a need for applicant's proposed direct-line, expedited service and show protestants' service inadequate to meet such needs due to extended time in transit and refusal to handle indicated consignments. Increase in protestant's operating revenues in period during which the applicant operated under temporary authority indicates that permanent authority will not have a materially adverse effect.—Texas-Oklahoma Express, Inc., Ext.—Oklahoma Points, 110 M.C.C. 769 (780-82).

Supporting shippers' testimony shows a need for a prompt, local short-haul service of "size or weight" traffic. Although no specific inadequacy in protestants' service has been established, the Commission concluded that no protestant could handle such traffic efficiently, economically, or adequately due to great distance between protestants' equipment location and proposed area of service. Thus, need has been shown for proposed service sufficient to warrant grant of authority sought herein.—Wehe Common Carrier Application, 110 M.C.C. 798 (809-12).

Application for authority sought herein granted. Shippers' testimony shows need for proposed service which provides time-scheduled deliveries to all points within destination territory. Protestants fail to show they would be adversely affected by a grant of sought authority or that they could provide the required service.—Sammons Trucking Extension—Fort Dodge, Iowa, 111 M.C.C. 92 (96-100).

Authority to transport general commodities having prior or subsequent movement by air between 3 specified airports in Kentucky and named Kentucky counties granted. Shipper's testimony shows need for an expedited service on such traffic, and no protestant offers such a service or specializes in air-truck traffic as does applicant. However, application is denied to extent applicant seeks authority to transport air-truck traffic between 3 named airports as protestant presently holds such authority, and, absent evidence of inadequacy of protestant's service, no public need may be shown for additional service.—Murphy Surf-Air Trucking Co., Inc., Ext.—Kentucky, 111 M.C.C. 570 (572-3)*.

Application for authority as common carrier of general commodities, with exceptions, between indicated cities denied. Applicant's evidence indicates that all operations proposed herein are exempt from Commission regulation as incidental to transportation by aircraft (as codified in 49 CFR 1047.40(b). No clear and specific need for "non-exempt" motor carrier operations has been shown.—Hill Trucking Co., Ext.—Jumbo Jets, 111 M.C.C. 742 (744); Application to operate as common carrier of general commodities, with exceptions, incidental to movement by aircraft granted. Applicant's past operations involving such traffic, although unlawful, were conducted under color of right and, in conjunction with shippers' testimony, show a need for applicant's services. No protestant now can offer service comparable to applicant's and such authority will not economically impair them.—Morgan Express, Inc., Extension—Amarillo, Tex., 111 M.C.C. 784 (790-91)*.

On reconsideration, application for authority as common carrier of specified perishable commodities granted. Commodities involved are highly susceptible to spoilage and deterioration and require dependable refrigerated motor service. Applicant's service under its grant of temporary authority has been especially responsive to such requirements as shown by shipper testimony and volume of this traffic handled. Protestants' service found inadequate .due to lack of suitable equipment, lack of flexibility, and especially protestants' disinterest in l.t.l. shipments.—Inco Express, Inc., Ext.—Five Western States, 111 M.C.C. 877 (884-6)*.

On reconsideration, application to operate as common carrier of iron and steel articles from supporting shipper's plant site to indicated destinations granted with certain restrictions. Shipper's established traffic pattern and projected future tonnage show need for the proposed service. Protestant rail carriers lack flexibility to serve all destinations, and protestant motor carriers are unable to provide such service due to limitations to designated points or lack of authority to handle aggregated commodities not subject to "size and weight" authority as defined in 79 MCC 335.—Vant Transfer, Inc., Common Carrier Application, 112 M.C.C. 36 (42-5).

On reconsideration, application for authority to transport shipping cartons, pulpboard, and paperboard between points in Washington and Oregon granted with certain restrictions. Applicant will provide direct service to meet shipper's need for short-notice, expeditious deliveries, a need which protestants cannot meet due to limitations of territorial authority. Denial would force shipper to use unsatisfactory mixture of private and common carriers. Applicant originally requested contract carrier authority, but to avoud objectionable dual operations it asked for appropriate common carrier authority for same movements as an alternative. Proposed service is very similar to applicant's present operation, and grant avoids fragmentation of its present authority and damage to its present shippers, and allows service to both supporting shippers and present customers on an f.o.b. orgin plant basis.—Vancouver Fast Freight, Inc., Contr. Car. Applic., 112 M.C.C. 53 (57)*.

Evidence of supporting witnesses indicate a need for proposed service that protestant is unable to fulfill as its authority over the involved routes is restricted to special operations in "tour" type service which is not the type of service at issue herein. Application granted.—Arrow Line, Inc., Ext.—Saratoga Race Track, 112 M.C.C. 116 (120).

Application granted, as shipper's testimony has shown a need for the proposed service that protestant is unable to meet, because its authority does not include transportation of parts independently of the basic commodities specified.—Kenosha Auto Transport Corp. Ext.—Seat Cabs, 112 M.C.C. 224 (249)*.

Application granted, as shipper's testimony shows a need for the proposed service which protestants are unable or unwilling to provide. Fact that the purchase of the involved operating rights from protestant by applicant was previously approved by Commission is not relevant herein, as the time period for completion of the transfer has passed without consummation of the transfer.—Lockhart Common Carrier Application, 112 M.C.C. 308 (311)*.

Testimony of supporting shipper demonstrates that it will require increased transportation of sectionalized buildings and mobile homes in the future, based on reasonable forecast of increased business volume, which is an acceptable basis for a grant of authority (see 84 MCC 684). Protestants are not authorized to transport mobile homes, so cannot provide the required complete service as proposed by applicant.—Morgan Drive-Away, Inc., Ext.—Harnett, 112 M.C.C. 392 (395-7)*; commodity descriptions "buildings, complete, knocked down or in sections" and "trailers designed to be drawn by passenger vehicles" were found to be mutually exclusive in 337 ICC 111, and evidence of need for authority to transport the one does not of necessity justify a grant of authority to transport the other.—Transit Homes, Inc., Extension—Buildings (Idaho), 112 M.C.C. 422 (432).

Applicant has made a prima facie showing predicated on a valid forseeable need for transportation of aluminum chloride. The record establishes the existence of prospective users of this commodity in the involved area and shippers will require experienced, reliable transportation to develop a market they are now actively soliciting. Application granted.—Schutt, Inc., Extension—Lockport,N.Y., 112 M.C.C. 471 (473)*.

On reconsideration, authority sought granted, with indicated restrictions, as testimony of supporting shippers shows a need for proposed connecting-line service which protestant is unable to meet due to territorial limitations of its authority. Such grant is a natural extension of an existing service and will provide a more efficient transportation service for shippers.—Hare Extension—Wearing Apparel, 113 M.C.C. 561 (571-2)*.

Testimony of three shipper witnesses establishes existing motor carriers' failure to meet shippers' reasonable transportation needs for a complete service in transporting a variety of tractors and related equipment which meet the criteria of "intended use" test detailed herein. Issuance withheld pending determination of applicant's fitness in another proceeding.—Diamond Transp. System, Inc., Ext.—Tractors, 113 M.C.C. 733 (741-2)*.

Shippers' testimony shows a need for a more complete, efficient, and economical service which applicant's proposed service will meet. Protestants cannot provide such service due to commodity and territorial restrictions of their authorities, circuitous operations, and inability to provide multiple pickup or delivery service.—Berger Transfer & Storage, Inc., Ext.—48 States, 113 M.C.C. 753 (757-8)*.

On the basis of public need, a certificate of convenience and necessity authorizing operation as a common carrier granted to an agricultural cooperative for transportation of general commodities, including explosives, for the Department of Defense.—American Farm Lines Common Carrier Application, 114 M.C.C. 30 (41-2)*.

On reconsideration, unrestricted authority to transport the involved commodities from Philadelphia, Pa., granted as evidence of 7 supporting shippers was representative enough of total existing need to warrant a broader grant of origin authority in place of the previous grant restricted to supporting shippers only.—Weiss Transportation Co. Extension—Delaware, 114 M.C.C. 70 (72)*.

Testimony of Department of Defense and of a number of occasional shippers of mobile homes establishes a need for proposed service and that protestants are not meeting transportation requirements of these occasional shippers. The Department is the largest single shipper of such traffic, and, because of its rotation system for transportation, the protestants will not be materially and adversely affected by such a grant.—Chandler Trailer Convoy, Inc., Ext.—49 States, 114 M.C.C. 436 (444-5).

Although services of existing carriers are not shown inadequate on basis of past failures to provide service, Commission is not thereby precluded from concluding that proposed operations are required and should be authorized to extent specified. Applicant is presently authorized to, and does, provide much of the required service, and an additional grant will serve to enhance the effectiveness and usefulness of an existing service.—Gateway Transp. Co., Inc., Ext.—St. Marys, Ga., 114 M.C.C. 484 (486-7)*.

On reconsideration the Commission determined that a 40,000 pound minimum weight provision in applicant's current tariff, not being related either to its existing authority or to that proposed, constituted a "service embargo" within the meaning of 111 MCC 151, notwithstanding the fact that it was willing to handle its shipper's individual LTL shipments but had never been tendered any. Applicant's receipt of authority was conditioned upon its taking whatever steps might be necessary to bring about compliance with the indicated requirements of 111 MCC 151 with respect to both its present and new tariffs. Applicant was granted a 3 year term certificate and required to file performance reports.—Midwestern Express, Inc., Extension—Paper Products, 114 M.C.C. 834 (838).

Shippers' testimony shows that a substantial amount of traffic moves in considered East-West and North-South movements and that existing carriers are not providing the required reasonably expeditious or consistent service. Protestants have not shown that grant herein would materially and adversely affect them. Application granted with indicated conditons.—East Tex. Motor Frt.

Lines, Inc., Ext.—Miss. & La., 115 M.C.C. 122 (137-9).

On reconsideration, applicant has established a prima facie need for its proposed service in light of 103 MCC 555, as supporting shipper has satisfactorily described the commodity involved and volume of traffic to tendered applicant if successful. Constantly changing nature of destination points prohibits precise proof and therefore authority granted is restricted to protect protestants' irregular-route operations.—Pre-Fab Transit Co. Ext.—Insulation Materials, 115 M.C.C. 692 (695-7)*.

Authority granted to eliminate gaps in applicant's service to shipper in transporting bulk chemicals radially between Kingsport, Tenn., and all points in the contiguous U.S.—Mason & Dixon Tank Lines Ext.—Florida Chemicals, 117 M.C.C. 539 (547)*.

Supporting shippers demonstrate need for expedited, single-line service including use of special equipment and minimal handling to ensure lack of shipment damage. Joint-line services, by their nature, cannot offer minimal handling. Granted.—Watkins Motor Lines, Inc., Ext.—General Commodities, 113 M.C.C. 658 (668-70); supporting shipper, a large processor of fresh meats and packinghouse products, demonstrates need for expeditious single-line transportation of perishable commodities, Applicant now meets shipper's requirements, for split deliveries in most of its consignments, under temporary authority, and to other areas under permanent authority. Granted.—Coats Freightways, Inc., Ext.—Swift Meats, 118 M.C.C. 739 (743-4)*.

Railroad service considered: [Vols. 18, 19, 21].—See also Watkins Motor Lines, Inc., Ext.—North & South Carolina case, § 207(a), n. 25 *Existing carriers.*

Where partial pickup and delivery service is required over a multi-state destination area and, because of the inherent limitations of the rail portion of the overall movement, TOFC service would not provide the full flexibility of an all-motor carrier operation, the rail carrier's contention that TOFC service alone could meet shippers' needs is unfounded, particularly when the evidence established that both the motor carrier applicants and the rail lines would continue to receive a comparable percentage of the traffic. To hold otherwise would falsely equate TOFC service with irregular route, all-motor carrier service.—Kroblin Refrigerated Xpress, Inc., Extension—Dension, Iowa, 96 M.C.C. 233 (240)*.

Existing rail services are not designed to meet supporting shipper's need for expedited, multi-point deliveries, and the record amply establishes that the shipper requires motor carriage as an additional mode of transportation. Authority granted.—Pulley Freight Lines, Inc., Extension—Compounds, 115 M.C.C. 106 (109-10)*.

Rates: [Vols. 11, 12, 15-19, 21].—Shipper's desire to consolidate its traffic and thereby enjoy more favorable rates is inadequate basis for grant of new authority sought.—C & H Transp. Co., Inc., Extention—Compressors, 98 M.C.C. 1 (9).

Public witnesses' support of applicant in order to obtain a locally based, low-cost, charter bus service is no basis for a grant of authority. Reasonableness of rates is generally not an issue in an application proceeding under §207 (see 84 MCC 264). Denied.—Pathfinder Bus Lines, Inc., Common Carrier Application, 111 M.C.C. 609 (613)*.

Authorization sought herein granted in light of decision in 110 MCC 139, to permit shippers to avail themselves of efficient and economical two-way motor operations which eliminate added cost of empty return movements and create savings which ultimately redound to the benefit of the consuming public.—Maxwell Co., Ext.—Chicago to Cinncinnati, 112 M.C.C. 235 (238-9)*.

Freight forwarders, supporting applicant herein, are wholly dependent on common carriers for line-haul transportation and transport services. Facts that protestants' rates are designed to preclude movement of freight forwarder's traffic and that protestants have refused to negotiate for lower rates constitute an embargo on such traffic, which could jeopardize the very existence of freight forwarder industry. Applicant has shown ability to move such traffic under temporary authority, providing forwarder access to a second mode of transportation; application granted.—Armellini Express Lines, Inc., Ext.—F. F. Traffic, 113 M.C.C. 606 (614-5)*.

Applicant's supporting evidence consisted primarily of mere expressions by shippers that they are desirous of the proposed service, and that protestant's rates and charges are, at times, too high. Absent a showing that such rates effectively embargo the traffic, a shipper's desire for lower rates is not a proper basis for a grant of authoriy. If shippers believe that existing rates are too high, appropriate relief, such as the filing of a complaint, is available under the provisions of the Act.—United Parcel Service Ext.—Tenn., Ark. and Miss. Points, 117 M.C.C. 621 (625).

Special equipment: [Vols. 12, 13, 17-19, 21].—Shipper of light, bulky packaging materials has shown need for applicant's specialized motor equipment; demands of its customers for expeditious, efficient and dependable transportation, permitting maintenance of limited inventories, cannot be met by existing rail service, nor can these demands be adequately met by protestants, whose standard-sized motor-equipment renders their service uneconomical. In contrast, applicant, by using specialized equipment which accomodates significantly more cargo and is better suited than standard units to mechanical loading techniques employed by some of shipper's customers, offers transportation which combines the advantages of motor operations with the economies of increased cargo capacity. While shipper is interested in savings attainable through use of specialized equipment, desire of a shipper to benefit from economies resulting from technological innovation differs from preference for services of carrier offering more favorable rates; the results of technological advance must be recognized when advantage to be derived from their usage will inure to shippers, receivers, and the public.—Dieckbrader Express, Inc., Extension—Massilon, Ohio, 103 M.C.C. 540 (542-4).

On reconsideration, findings in the prior report reversed in part to permit applicant to transport urethane and urethane products to all of the destination points listed in the original application, rather than the single destination point authorized in the prior report. Applicant proposes to furnish extra high-cube trailers, which have a 25 percent greater capacity than standard trailer equipment for carriage of the extremely light and bulky commodities involved, and which none of the protestants have offer-to place at shipper's disposal. The application should be granted since the public should not be denied the use of an improved service and its resulting benefits.—Hinchcliff Motor Service, Inc., Extension, 107 M.C.C. 662 (665)*.

Applicant seeks authority to transport liquid gilsonite asphalt sealer in bulk in tank vehicles. Applicant's proposed service includes the spreading of liquid sealer from the same tank vehicles on the surface at the jobsite location shortly after the completion of the line-haul movement. The involved commodity is used as a sealer for asphalt paving. Sales of this commodity include the work of spreading the sealer on the paving. Such jobs require trucks equipped with spreaders and operated by specially trained personnel. Shipper seeks to obtain a single carrier to serve all points in the 11 destination states in order that it may have better control over the distribution of its traffic. It is clear on this record that spreading the sealer on the surface is the most feasible means of accomplishing the delivery of the commodity. Protestants do not have tank trucks equipped with spreaders necessary to spread this commodity on the paving at the various jobsites. Thus, no existing motor carrier is shown to be able to render the complete service, including transportation and spreading, as proposed by applicant. Consequently, the proposed service is required by the public convenience and necessity. Authority granted.—W. S. Hatch Co. Extension—11 States, 108 M.C.C. 853 (856, 857, 861, 862).

Where heavy-hauling constitutes the sole or primary sphere of specialized carriage required, applicant may carry those commodities which, because of their comparatively modest weight or the techniques used in loading or unloading them (including self-loading), are not covered by protestants' heavy-hauler authority. Similarly, commodities falling outside protestants' size and weight authority due to "intended use" test may be carried by applicant.—Warren Transport, Inc., Ext.—Vehicles, 112 M.C.C. 264 (270-73)*.

Special service: [Vols. 12, 18, 19, 21].—The Commission's determination that, although existing carriers provided adequate service to extent that they were able, grant of authority sought was justified by distinctive type of the proposed limousine passenger service between El Paso, Tex., and Los Angeles, Calif., is supported by substantial evidence on the record as a whole. Record shows that proposed service was designed to be faster, overcome language barrier encountered by, and be more advantageous to, Spanish-speaking people, assure arrival of luggage along with the passenger, and be more comfortable than bus travel; also that proposed service might be instrumental in curbing illegal "wildcat" limousine services operating in the area. Accordingly, since the Commission's decision is based upon adequate findings supported by substantial evidence, and is in accordance with applicable law, order granting certificate to intervening defendant is sustained.—National Bus Traffic Association, Inc. v. United States, 284 F. Supp. 270 (271-2)*; application for common carrier authority to transport passengers and their baggage in minibuses (10 passengers), between Chicago and Laredo, Tex., granted, inasmuch as proposed service was held to offer something new and different, directed at a specific segment of the community (Spanish-speaking citizens). See also dissents.—Transportes Hispanos, Inc., Com. Car. Applic., 117 M.C.C. 894 (897)*.

Applicant has established public need for a specialized motor carrier service providing expedited pickup and delivery of air freight beyond air carriers' terminal areas. Since, owing to the nature of air freight, most such shipments are small and are composed of items that are needed promptly, a grant restricted to such traffic should have no adverse effect on opposing general freight carriers and will allow applicant to provide the airlines, the air freight forwarders, and the shipping public with a needed transportation service. Furthermore, the Texas counties named in the applications form a contiguous territory so situated that residents would look to the Houston or Jefferson County airport for air freight service. No need, however, has been shown for service at the Andrau Park airport. Granted accordingly.—White Air Freight Service, Inc., Common Carrier Application, 95 M.C.C. 616 (622-3); the unique characteristics of air cargo transportation and the essential idea of related trucking within and beyond air terminal areas suggests a need for authorization of motor carriers which specialize in air-truck traffic. Both applicants propose a specialized service in the handling of ex-air traffic; because adequate surface transportation is lacking, shippers have been forced to use private carriage for the transportation of inbound and outbound ex-air shipments of freight. Protestants cannot provide this specialized service required by shippers; and, since none of protestants derive a substantial portion of their revenues from the transportation of ex-air traffic, grant of authority to both applicants will have no material adverse effect on any of protestants; granted.—Turner Expediting Service Extention—Montgomery County, Ky., 110 M.C.C. 342 (347, 348, 353)*.

On further consideration the Commission found that proposed irregular route, on-call or non-scheduled operations, providing door-to-door service territorial in scope is distinct from bus service offered by protestants; and where public need for such distinct service is clearly demonstrated, as here, the existence of reasonably adequate bus service should not preclude the granting of service which, while superficially competitive, is not actually so. Granted.—Arrow Line, Inc., Extension—Limousine Service, 103 M.C.C. 195 (198)*.

. Authority granted to unopposed applicant, holder of current heavy hauler authority, to transport non-size-and-weight shipments is limited to bona fide mixed loads, without specific quantity limitations on lading mixture, moving on a single bill of lading from single consignor. Such authority is further restricted against "motor vehicles and motor vehicle cabs and bodies" precluding any traffic of this nature. Authority is made nonseverable by sale, or otherwise, from applicant's size-and-weight authority.—Carroll Trucking Co., Ext.—Three States, 111 M.C.C. 44 (47-50).

On reconsideration, both applicants, Wehe and Reliance, were granted the "size or weight" authority sought herein as the rural, remote nature of the involved area, the highly specialized service required, and the possibility that Reliance (the applicant previously approved) may experience conflicting demands on its equipment demonstrate a need for the services of two carriers.—Wehe Common Carrier Application, 112 M.C.C. 315 (319)*.

In general, authority to transport passengers, in special operations in round trip sightseeing and pleasure tours, has been granted under criteria stated in 1 MCC 190, but numerous cases cited herein show that authority is granted where only general public testimony is adduced when existing carriers are shown unauthorized, unwilling, or unable to provide comparable service, but not granted in cases where no showing is made that public has tried to use available service or that existing service was inadequate.—Brush Hill Transp. Co. Com. Car. Applic., 112 M.C.C. 348 (357-8)*.

Evidence clearly shows that an increasing number of supporting shippers' customers require that the carrier delivering the shipment use its own equipment mechanically to unload the trailer, thus saving the consignee the cost of unloading it manually with attendant cost of having consignee's crane and employees doing the unloading. The advantages are plain and the service is authorized especially since existing carriers generally refuse to acquire the type of equipment which applicant would provide.—Pittsburgh & New England Trucking Co., Extension, 113 M.C.C. 46 (47-8)*.

The Commission has consistently found it appropriate that carriers specializing in serving shippers with only one or two products, marketed through the same dealer network, should be in a position to meet their changing and complete transportation requirements, and that in proper circumstances this constitutes sound reason for authorizing the transportation of sectionalized buildings in markets where a carrier previously held a authority only to transport mobile homes.—Chandler Trailer Convoy, Inc., Ext.—Lexington Trailers, 117 M.C.C. 653 (658)*.

Protestants' unwillingness or inability to provide supporting shipper with the type of service it required, and applicant's possession of equipment necessary to such service, resulted in grant of authority to applicant.—Saldutti & Son, Inc., Ext.—Inedible Fish Oils, 118 M.C.C. 58 (64)*.

On reconsideration, Appellate Division 1 broadened the review board's grant of authority from 3 origin points to also include service from Magnolia, Ark., concluding that the evidence of record shows that applicant proposes a clearly unique transportation service for the supporting shipper involving the use of high-cube vans, an expedited pickup service at any one of the 4 origin points, and delivery directly to any point within the pertinent 11-State destination area. The Division found that none of protestants, individually or collectively, can provide shipper with this flexible statewide distribution service, and that a grant of authority from all 4 of the origin points to the 11 destination States is essential if the supporting shipper is to have the services of a carrier willing and able to provide shipper with the type of service it requires.—Overland Co., Inc., Extension—Gales Ferry, Conn., 118 M.C.C. 725 (728-29)*.

Speculation; trafficking in certificates: [Vols. 15, 16, 18, 21].—Though applicant for authority which will enable it to interline traffic moving between Salt Lake City, Utah, and Denver at Montrose, instead of Rico, Colo., professes an intent to continue its interline operations, the fact that it had entered into a contract to sell its authority between Salt Lake City and Rico, and had brought suit for specific performance of that contract, raises a question as to whether it seeks authority between Salt Lake City and Montrose for the purpose of subsequent sale or whether it intends to operate thereunder. Applicant has been engaged in interlining Denver-Salt Lake City traffic and asserts an intent to continue; and there is no evidence that it is not sincere in its intentions or that instant application is merely a guise for trafficking in certificates such as the Commission has condemned; however, to assure against creating a situation whereby applicant might sell part of its authority while retaining such portion as would permit it to continue substantially identical operations, a nonseverable restriction is imposed on authority granted.—R. A. Gould, Inc., Extension—Montrose, 108 M.C.C. 69 (72-3)*.

Temporary authority: [Vols. 12, 15-19, 21].—See also Frozen Food Exp. Extension—Indiana and Ohio case, §207(a), n. 25 *Fitness.*

Fact that applicant Wehe has performed involved service under temporary authority is not controlling in consideration for grant of the permanent authority. Successful applicant Reliance was found better qualified to perform proposed service and Wehe's application was accordingly denied.—Wehe Common Carrier Application, 110 M.C.. 798 (814); evidence of past operations under temporary authority is of probative value in support of applications for permanent authority where it is used to determine the ability of a carrier to provide the service involved, indicate the volume of traffic, and the effect of the grant on existing carriers; and where there is other supportive evidence, as herein.—Id., 112 M.C.C. 315 (320)*.

Applicant's operations under temporary authority, as supported by shippers' testimony, are probative evidence with respect to a need for service from and to points in a portion of the sought territory especially where no protestant is authorized to provide such service. The evidence is vague with respect to the remaining portions of the application; authority sought is granted in part.—Feed Transports, Inc., Extension—Three States, 113 M.C.C. 763 (766-7)*.

Applicant has been providing single-line service in the transportation of general commodities, with exceptions, between Portland, Oreg., and Seattle, Wash., under temporary authority. The volume of traffic transported supports witnesses' testimony that it is providing satisfactory service. Although operations under temporary authority raise no presumption of a need for corresponding permanent authority and are alone insufficient to justify a grant of authority, evidence of past operations under temporary authority is, nonetheless, of probative value to support an application for permanent authority. Granted.—Trans West Exp., Inc., Ext.—Seattle-Portland, 118 M.C.C. 1 (10, 11).

Through service: [Vols. 12, 18, 19, 21].—See also Jerry Lipps, Inc. v. Interstate Commerce Commission case, §207(a), n. 25 *Existing service*.

A clear need for single-line, overnight service between Nashville, Tenn., and points in northern Mississippi is established when existing service requires a minimum of 3 interchanges and the best possible service now available takes a minimum of 3 days for 150 miles. This has placed Nashville shippers at a disadvantage with Birmingham, Ala., and Memphis, Tenn., shippers, who enjoy single-line service, and has caused them to use, in a limited way, private carriage for prompt and dependable service. Granted.—Dean Truck Line, Inc., Extension—Nashville, Tenn., 96 M.C.C. 184 (189-190).

To the supporting shippers, slaughter houses and meat packers, presently moving their meat products by interline service, expeditious single-line tranportation is essential because fresh meats, even under refrigeration, are subject to shinkage and moisture loss which can result in considerable loss of money when shipments are delayed; also, the proposed services would reduce strain on their limited storage facilities by providing more frequent pickups. Granted.—Kroblin Refrigerated Xpress, Inc., Extension—Dension, Iowa, 96 M.C.C. 233 (236-7)*.

The record shows that the supporting shipper has experienced difficulties in utilizing the joint-line service of protestants to points within the destination territories because of shipper's need for expeditious, safe, and reliable service on movements of furniture to points within the described destination territories. Protestants contend that shippers are not entitled as a matter of right to single-line service where reasonably adequate joint-line service is available. While it is true that existing carriers are normally entitled to handle whatever traffic they can before additional services are authorized, this does not mean that a shipper must be deprived of the opportunity to utilize what appears to be a practical, efficient and comprehensive method of distributing its products simply because an existing service may be faced with added competition. Authority granted except as to authority duplicative of the direct single-line service of two of the protestants.—Trans-Cold Express, Inc., Extension—Furniture, 108 M.C.C. 129 (138, 139, 141).

Applicants' proposed single-line heavy-hauler service, over irregular routes between points in Pacific Coast States and those in named Rocky Mountain States, is shown to be needed by shippers of heavy commodities who have found it difficult to obtain satisfactory service because, due to either incomplete territorial and commodity authority or lack of sufficient equipment, protestants cannot meet their transportation needs. Despite the imposing volume of traffic available between California, on one hand, and the other States involved, which volume is likely to increase, there exists at best a limited quantum of single-line service; moreover, fragmentary nature of existing single-line operations does not meet shippers' need for multi-stop pickup and delivery service. Therefore, while a grant of any new authority to conduct strictly local operations between the Rocky Mountain States involved, with two minor exceptions, is not justified, the record warrants certification of all four applicants to provide service between points in California, on one hand, and, on the other, points in remainder of the territory involved in their respective proposals. In addition, the record supports the proposed service of one applicant between Pacific Northwest and points in Arizona, and proposed services of two other applicants between Pacific Northwest and the Rock Mountain States. Granted in part.—Dealers Transit, Inc., Extension—Eight Western States, 110 M.C.C. 317 (322-5, 335-41)*.

Testimony of shippers establishes that movement of small shipments between the indicated points is characterized by long delays in transit, damaged shipments, and many difficulties in tracing shipments due to multiplicity of carriers used. Applicant's proposed service granted as its single-line, through service would alleviate such problems occasioned by use of two-, three-, or four-line services at present.—Thurston Motor Lines, Inc., Extension—Tennessee, 113 M.C.C. 801 (810-11)*.

As was pointed out in 62 MCC 513, the National Transportation Policy does not tolerate the thought that all shippers and all points are entitled to single-line service.—Herrin Transp. Co. Extension—Atlanta, Ga., 114 M.C.C. 571 (608)*.

Public witnesses' testimony shows a need for proposed direct single-line transportation of passengers and baggage between Norwich, Conn., and New York, N.Y., to eliminate present circuity and changing of vehicles. Witnesses' failure to try protestant's joint-line service cannot be faulted as no passenger likes to change vehicles or wait for connecting carriers. Approved.—Greyhound Lines, Inc., Ext.—Norwich, Conn., 115 M.C.C. 617 (618-9)*.

Supporting shipper's desire for availability of single-line service from which it hopes to enjoy economies and transit time savings does not warrant a grant of authority in the absence of a showing of inadequacy in available joint-line services. Moreover, a grant to applicant would adversely affect protestants. Denied.—Poole Truck Line, Inc., Extension— Pensacola, 117 M.C.C. 1 (6-7)*; shipper's support of application was predicated on mere desire for single-line service, and shipper failed to supply specific evidence of need for such service. Denied.—Midwestern Express, Inc., Extension—Paper, 117 M.C.C. 809 (814)*; the same showing of inadequcy of available joint-line service is required when the supporting shipper has access to services of general-commodity motor carriers operating over regular routes and the preference is for an irregular-route carrier.—Midwestern Express, Inc., Extension—Bossier City, La., 117 M.C.C. 886 (890)*; shipper is not entitled to single-line service as matter of right, and since existing joint-line service is not shown inadequate, no need exists for grant of additonal authority sought herein.—Gra-Bell Truck Line, Inc., Ext.—Paint, 118 M.C.C. 334 (338)*.

Truckaway, driveaway, secondary movement: [Vols. 18, 19, 21].—Applicant seeking broad territorial authority to transport used automobiles by driveaway has not established that proposed operations would meet any existing public need. Although it is difficult to obtain witnesses in a driveaway type proceeding, the evidence here in relating to what service may be needed is extremely vague, and where it is specific is so limited that it would be impossible to determine on either record what would be a reasonable and responsive territorial authorization. Denied.—Autocar Shipping Co. Common Carrier Application, 96 M.C.C. 357 (365).

Guided by rationale of 96 MCC 264, need has been shown for applicant's proposed transportation of automobiles in driveaway service to and from Washington and Alaska points; and under present circumstances applicant's past unlawful operations are not a bar to grant of authority. Services of protesting commercial automobile haulers are often too costly for small concerns and individuals, and such service, where available, often is not responsive to obvious public demand for type of service proposed by applicant. Also record discloses that granting proposed service would not have a material adverse effect upon protestants' operations, especially in light of their limited participation in considered traffic. However, because of unique safety problems involved, certificate restricted to reserve jurisdiction to impose any future conditions which may be deemed necessary. Granted accordingly.—AADA Systems, Inc., Common Carrier Application, 102 M.C.C. 23 (26-7).

On the record applicant has established need for its continued transportation of used passenger automobiles between points in the United States, including Alaska and excluding Hawaii. Public support of 27 individual and corporate witnesses is impressive, in light of the infrequent or one-time users of this type of service; and considering the inherently sporadic nature of the involved operations, applicant has been providing an essentially nationwide service. Furthermore, under instant circumstances applicant's past operations were conducted under color of right and are entitled to consideration, and, since applicant has been providing this type of service for a number of years, its continuance cannot be said to create a new or aggravated competitive situation. However, because of the unique safety problems involved, certificate restricted to reserve jurisdiction to impose in the future any further considerations which may be deemed necessary to insure safety of operations.—AAA Con Drivers Exchange Common Carrier Application, 102 M.C.C. 393 (400-2).

Secondary authority granted applicants to transport from U.S. distribution centers automobiles manufactured at Brampton, Ontario. Applicants already hold authority to transport from these centers automobiles manufactured at Kenosha, Wisconsin. Comingling of this traffic is for shipper an economically sound arrangement and, although the availability of existing services is an important factor to be considered in determining whether or not new operations should be authorized, when such availability is weighed against the respective interests of supporting shipper and applicants, equitable considerations are on side of applicants. Denial of the applications would seriously affect applicants' existing operations and would deprive shipper of services upon which it had come to depend. On the other hand, a grant of authority could have little or no impact upon protestants' operations. They have not participated in shipper's traffic in the past and, therefore, there can be no loss of revenues from or diversion to applicants of any traffic in which protestants are not participating.—Kenosha Auto Transport Corp. Ext.—Secondary Movements, 105 M.C.C. 754 (760).

Applicant granted authority to transport in secondary movements and in truckaway service, trailers (mobile homes) designed to be drawn by passenger automobiles, from certain points in Georgia to certain points in Florida. Supporting shippers contended that existing carriers were not interested in their traffic, and that existing carriers' lack of ready accessibility to source of traffic would prove economically prohibitive.—Marrone Common Carrier Application, 117 M.C.C. 680 (681, 683)*.

Volume of traffic: [Vols. 13, 18, 19, 21].—Volume of traffic involved herein now available for movement found to require the proposed service, with indicated restrictions, of 11 applicants as well as that of protestant. Although expansion of commercial zone of involved area would alleviate the difficulties of shippers, the delay resulting from such a proceeding should be avoided. The record does not support protestant's contention that grants of authority would prevent existing carrier from meeting its public obligations or impair the quality of overall service.—Consolidated Freightways Corp. of Del. Ext.—Phoenix, 108 M.C.C. 379 (383-5).

Commission concluded that the volume of traffic considered herein was insufficient to warrant two grants of authority. Accordingly, the application of Reliance was approved as its numerical superiority of special equipment required and the location of its terminals indicate that it is better qualified to perform the proposed service.—Wehe Common Carrier Application, 110 M.C.C. 798 (813).

Supporting shipper's testimony as to potential volume of movements of liquid chemicals, in bulk, shows a need for service of at least 1 more carrier. Protestant carriers are unable to satisfy this need because of either territorial or commodity limitations of authority or inadequate supply of specialized containers required by nature of considered traffic. All applicants were found qualified to perform proposed service but lack of specific evidence as to future volume of traffic required limitation of authority to one carrier. Applicant Kaw Transport now performs proposed service under temporary authority, was first applicant for authority, and is primary choice of supporting shippers. Application of Kaw Transport granted and all other applications denied.—Klipsch Hauling Co., Extension—St. Joseph, Mo., 111 M.C.C. 295 (307-8)*.

Application granted as evidence indicates there is a substantial volume of the considered traffic moving in an extremely large, sparsely populated area and protestants are unable adequately to service this area due to lack of sufficient equipment.—Baker Extension—Alaska, 112 M.C.C. 251 (254-5)*.

Supporting shipper's testimony as to substantial volume of considered traffic establishes need for proposed service except to the extent that such traffic, having prior movement by water, is not conclusively shown to move in interstate commerce or the existing service of protestant is not shown inadequate.—Commercial Carrier Corp. Extension—Salt, 112 M.C.C. 415 (419-20)*.

Commission granted authority, in ten applications embraced herein, only to extent that present and future need for service is shown by supporting shippers' evidence that rapid and continuing increase in the production and sales of involved commodities warrants additional service that existing service is inadequate to meet and where at most only one carrier is presently authorized to meet shippers' needs. Also, such grants are necessary to authorize reasonable service area where operations beneficial to public may be conducted.—Transit Homes, Inc., Extension—Buildings (Idaho), 112 M.C.C. 422 (430-1).

Evidence of the exact volume of traffic to be handled by applicant under the authority sought is not essential to establishing a prima facie case or to receiving a grant of authority.—Transloric Trucking Corp. Common Carrier Application, 113 M.C.C. 82 (87)*.

26. Operation over irregular routes.—[Vols. 10-19, 21].—See also AAA Trucking Corp., Inc. v. Burgmeyer Bros., Inc. case, §212(a), n. 1; Gregory Heavy Haulers, Inc., Extension case, §206(b), n. 15; Red Line Transfer & Storage, Inc. case, §207(a), n. 30; Western Truck Lines v. J. H. Rose Truck Line, Inc. case, §204(c), n. 126.

Irregular route authority granted applicants when evidence revealed that motor and rail protestants, as well as freight forwarder protestants, could not practically provide multiple pickup and delivery service needed by supporting shippers. In addition, certain of the supporting shippers have need for the faster transit time proposed by applicant, which would be used by them in meeting peak demands and when materials used in their products are in short supply; and, although applicant is unable to provide such 3- to 5-day service 100 percent of the time, it is able to place emphasis upon individual shipments and provide this faster service when specifically requested by shipper.—Watkins Motor Lines, Inc., Ext.—North & South Carolina, 103 M.C.C. 227 (247-9).

In addition to authority to transport frozen foods, frozen berries, frozen vegetables, and potato products, frozen and not frozen, more than half of the protestants hold authority to transport general commodities; and, although these protestants may transport proposed mixed shipments of frozen foods and commodities, they are confined to operations over regular routes with service only at points on those routes. Thus, while protestants provide satisfactory service on long hauls involving one pickup and delivery, the trend is away from truckload shipments of one food from one origin to one destination. Consignees are ordering smaller lots of different foods more frequently, resulting in increase in l.t.l. shipments, which, due to the diversity of foods produced at different points and in order to fill out a truckload, require pickup at multiple origin points. Also, maintenance of smaller inventories requires more prompt pickup and delivery. Therefore, delivery from one truckload of mixed l.t.l. shipments to different consignees at multiple destination points is the end result of the general trends towards the maintenance of smaller inventories and the rate of the increasing number of frozen food products. Accordingly one applicant granted authority to transport over irregular routes frozen foods and potato products, not frozen, when moving in the same vehicle with frozen foods; the other applicant is granted authority to transport over irregular routes frozen foods, potato products not frozen, and canned goods, subject to finding this applicant fit in another proceeding [see 107 MCC 506].—United Buckingham Frt. Lines, Extension—Frozen Foods, 106 M.C.C. 539 (547-50, 552-6).

Application for common authority to transport valuable commodities, as specified, over irregular routes between points in Rhode Island and Massachusetts using armored vehicles is granted with noted modifications as supporting shippers' testimony demonstrates a need for applicant's on-call service, and availability of such service would free shippers from an inferior bargaining position in respect to protestant Brink's Inc., a contract carrier now holding the only authority for such movements.—International Detective Serv., Inc., Com. Car. Applic., 111 M.C.C. 828 (831-2).

Operation over irregular routes authorized where existing service is primarily regular route and traffic will move to jobsites at remote points not on or near protestants regular routes.—Ashton Trucking Co. Extension—Pulverized Limestone, 113 M.C.C. 142 (145)*.

28. Change in route; alternate route.—[Vols. 10-19, 21].—See also Regulations Governing Hazardous Materials, §208(a), n. 30.

Applications for authority to operate through an alternate port of entry, based on theory that increased efficiency would result, have been treated by Commission as analogous to alternate route or gateway elimination proposals. Shipper support is not deemed essential if the tests established in such cases are met: (1) whether applicant is actually engaged in transporting a substantial volume of traffic between points involved, and, in so operating, is effectively competing with existing carriers; and (2) whether grant of authority would enable applicant to institute a new service or a service so different from that presently provided as to improve materially the applicant's competitive position to the detriment of existing carriers.—The Overland Express, Limited, Extension—Alternate Route, 96 M.C.C. 24 (26-7).

Authority granted to operate through Port Huron as an alternate port of entry in connection with Canadian applicant's present service between Detroit, Mich., and Ontario, Canada, restricted to traffic to or from points in Canada and against shipments originating or destined to Sarina, Ontario. Substanial amount of tonnage transported through Port Huron and Detroit ports of entry pursuant to its existing authority clearly supports conclusion that applicant effectively competes with existing carriers for such traffic and authorization of proposed service will not permit any marked improvement in the service applicant now performs where mileage between such points would be about the same regardless of which port of entry were used. Restriction is imposed to maintain competitive balance with respect to local traffic moving between Sarnia and Detroit.—Id., p. 27.

In cases where applicant is presently conducting part of its operations over an alternate route, as here, where applicant is presently hauling traffic from Birmingham, Ala., to points in Mississippi by moving some of the distance over an alternate route and some of the distance over a service route, and it applies for authority for another alternate-route segment that would shorten this combined route and presents evidence showing the nature of the service it is performing over the combined route, it must be shown that service over the combined route could have been performed with equal effectiveness competitively over its all-service route. By use of its existing alternate-route segment, the combined route now used is 15 miles shorter than the all-service route, but, since the overall time-in-transit would not be appreciably different, it is held that applicant's transportation activities could have been conducted over its all-service route with equal competitive effectiveness as over the combined alternate-service route.—West Bros., Inc., Extension—U.S. Highway 11, 96 M.C.C. 490 (496).

In determining whether a grant of alternate-route authority would result in a change in the competitive situation to the disadvantage of existing carriers, a comparison of the proposed operations over the proposed routes with applicant's present operations over its all-service route reveals that applicant would reduce its mileage on movements between Birmingham and representative points by 33, 43, 44, 38, 32 and 62 percent. Where such large savings will result from operations over the proposed alternate route, the evidence must be positive and convincing that use of the proposed route will not result in any material change in applicant's service. As the applicant would experience a minimum savings of transit time from 3 to 4 hours by use of the proposal and would be in a position to offer overnight service on traffic not now receiving it, thereby increasing the attractiveness of its overall service, and enabling applicant to compete substantially more effectively with the involved carriers now operating over the proposed routes, application will be denied.—Id., p. 497.

The fact that the proposed route is essentially an alternate route to applicant's existing service routes is insufficient, standing by itself, to establish public convenience and necessity.—Greyhound Corp. Extension—Lincoln, Nebr., 96 M.C.C. 630 (633).

Change in route, in general: [Vols. 18, 19, 21].—Record in unopposed irregular- to regular-route conversion application, filed under provisions of the Commission's special procedural rules governing such applications, 49 CFR 2a, amply established that at each of the considered intermediate and off-route points applicant's pertinent irregular-route service has evolved into a regular-route operation, within the criteria of 47 MCC 23, and that applicant is fit, financially and otherwise, to perform such service. Also, while evidence of applicant's past operations pertains only to inbound movements to considered points, to impose a one-way restriction on the regular-route authority granted would render applicant unable to provide those services required of a regular-route carrier. Granted, conditioned on receipt of applicant's written request for imposition of described restriction on certain of its outstanding authority.—Midwest Motor Exp., Inc., Extension—Intermediate Points, 96 MCC 402 (404, 406-7).

It is the Commission's statutory responsibility, before granting authority which would allow relocation of an interline point, to find that public convenience and necessity require proposed service; thus, applicant must show that it would achieve improved efficiency which would redound ultimately not only to its own but to the public's benefit. The record being devoid of any evidence of actual savings in time, mileage, or operating costs which applicant expects to achieve, grant of authority which would enable it to use nearby major consolidation and break-bulk point as an alternative interline point, and thus provide an entirely new service in competition with existing carriers serving that gateway for traffic it cannot now handle, is not warranted.—Brada Miller Freight System, Inc., Extension—Kokomo, Ind., 96 M.C.C. 473 (475-6).

Since portion of applicant's irregular-route authority has evolved into a regular-route operation and since applicant is fit, conversion of said authority to conform with present operations is granted, subject, however, to applicant's written request that its present irregular-route certificate be amended so as not to include any points serviceable under this new regular-route authority, which is nonseverable, by sale or otherwise, from present certificate.—Cole's Exp. Route Conversion Application, 99 M.C.C. 783 (784, 786).

Inasmuch as the implied authorization under the "intermediate-point service" provision of the Superhighway Rules to serve points on the superhighway and connecting highways is specific in nature, service is permitted at all portions of the commercial zones of such "on highway" points, including those portions of the commercial zones of such points which extend beyond 1 airline-mile of the superhighway and connecting highways. The authorization to serve points within 1 airline-mile of the superhighway and connecting highways represents, in part, an acknowledgment that superhighways are often constructed around rather than through major traffic centers, and that in many instances an "on superhighway" authorization would fail to confer effective operating rights.—Property Motor Carrier Superhighway Rules, 117 M.C.C. 119 (150).

The requirement under the "25-mile" rule of the Superhighway Rules that the superhighway route (including the highways connecting such superhighway route with the carrier's authorized underlying regualr service route) between the point of departure from and the point of return to the carrier's authorized underlying service route by "wholly within 25 airline-miles of the authorized regular service route" means that every point on the superhighway route must be within 25 airline-miles of the authorized service route, and at the same time every point on the authorized service route must be within 25 airline-miles of the superhighway route. The "intermediate-point service" provision under the "25-mile" rule of the Superhighway Rules is not to be construed to permit a carrier to serve points within a 50 mile radius of the superhighway (25 miles on each side), either separately, or in conjunction with the other provisions of the "25-mile" rule. The "25-mile" rule is limited by the very terms of the "intermediate-point service" provision to points which are on and within 1 airline-mile of the superhighway (and "connecting " highway).—Id., pp. 150-1.

Deviation rule: [Vols. 18, 19, 21].—See also §208(b), n. 1, 5.

Applicant granted authority over service route; at the same time its application was denied to operate over an unfinished superhighway along side of the service route, on the basis that when such superhighway is finally completed, section (c)(8)(i) of the Commission's Deviation Rules Revised, 1957, 49 CFR 211, would allow applicant, upon filing for appropriate authority under the rule, to operate over the superhighway without the need of obtaining actual authority as requested.—Greyhound Corp. Extension—Lincoln, Nebr., 96 M.C.C. 630 (636-7).

Applicant, a carrier of passengers and their baggage, by application (letter-notice) notified the Commission of its intention to use an alternate route under the Commission's Deviation Rules Revised, 1957, (49 CFR 311.1). Before operations may be lawfully conducted under section (c)(8)(i) of the Deviation Rules, applicant must indicate that (1) the superhighway extends in the same general direction as the authorized service route, and (2) that its use will not materially change the existing competitive situation between such carrier and any other. Applicant's proposal is not in harmony with the general purpose and intent of the Deviation Rules because it would substitute one superhighway for another; such proposal is not within the relief contemplated in the superhighway provisions of the Deviation Rules. Also applicant's proposed deviation route is so much shorter and faster from the standpoint of time and distance that the reduced transit time would be to the competitive disadvantage of the existing passenger carriers as reduced transit time is a decisive factor in the extremely competitive bus industry. Denied.—Arrow Line, Inc., Extension—Deviation Route, 108 M.C.C. 92 (94).

Petition (letter) from an official of the Tennessee Public Service Commission was treated as a declaratory order requesting Commission to render an opinion as to whether Tennessee deviation rules authorize Tennessee certificate of registration holders to utilize superhighways in interstate or foreign commerce as well as intrastate commerce. Tennessee deviation rules allow regular-route motor carriers to operate over interstate highways as alternate routes after giving 20 days' prior notice to the Tennessee commission; the rules do not contemplate reissuance of outstanding authorities, and motor carriers lawfully utilizing deviation routes pursuant to the prior proceedings are not required to file any further notice with the state commission. Certificates of registration obtained pursuant to §§206(a)(6) and 206(a)(7) of the Act authorize service in interstate or foreign commerce to the same extent as corresponding intrastate authority issued by the state commission. The purpose of the deviation rules is to permit regular-route motor carriers to operate over superhighways without the necessity of individual applications. Consequently, no notice to the Commission is necessary to allow deviation operations in interstate commerce.—Tennessee Deviation Rules, 110 M.C.C. 199 (200-02).

Elimination of gateway: [Vols. 18, 19, 21].—In a proceeding involving the elimination of a gateway the applicant must establish, among other things, that such elimination will not enable it to institute a competitively different service to the detriment of existing carriers. Since the examiner concluded that the elimination of the North Brunswick, N.J., gateway would result in such a new and different service, he recommended as a substitute one at Pomona, N.J. However, a gateway at Pomona would allow applicant consistently to render same-day delivery service, instead of its previously provided next-day service, and, although applicant maintains that same-day service is not desired by the shipping public and that it has no intention of providing regular same-day service, the fact that the grant recommended would enable it to provide same-day service on a regular basis is sufficient to defeat the application.—Hermann Forwarding Co. Extension—Pomona, N.J., 99 M.C.C. 476 (478, 480).

Although application merely seeks authorization of a new route, a grant thereof would result in elimination of applicant's Monroe gateway on traffic moving between its eastern terminals, on one hand, and, on the other, Nashville, Knoxville, and off-route East Tennessee points. However, grant of application would leave applicant's Monroe gateway requirement intact and applicable to traffic moving to or from the rest of its authorized East Tennessee irregular-route service area, thereby resulting in only partial elimination of Monroe gateway, contrary to Commission policy. Furthermore, since applicant's present operations between considered points are not competitive with those of protestants, grant of authority sought would result in the probable exterior enhancement of applicant's service between these points to the detriment of protestants and institution of a new service. Denied.—Overnite Transp. Co. Elimination of Galeway, 103 M.C.C. 135 (146-7, 149).

In considering household goods carrier's application for elimination of four of its gateway restrictions and for extension of its authority, the Commission stated that an "elimination-of-gateway application" must be considered in the context of applicant's entire operation. And in eliminating more gateways than requested and in rewriting and reissuing applicant's authority in a much simpler form, the Commission stated that simplification of outstanding operating authority is a virtue in itself, if not contrary to the public interest and the interests of existing carriers. By the same token, addition of any complications and inflexibilities to operating authority is undesirable is absence of showing that they are required by the public interest. However, all applicant's gateway restrictions were not eliminated, because complete elimination would be too radical a modification and would enable it to compete in new traffic markets.—Atlas Van-Lines, Inc., Extension—Elimination of Gateway, 105 M.C.C. 156 (163-5).

On findings (1) that proposed savings would be minor, (2) that there would be no extraordinary lessening of transit time and (3) that removal of considered gateway would not materially improve applicant's competitive position to the detriment of established carriers, applicant's Charlotte, S.C., gateway eliminated; however, Clover, S.C., was not eliminated as a gateway for applicant's more northerly routes, because elimination of this gateway would permit applicant to institute a new service, significantly different both in quality and quantity, which would materially improve applicant's competitive position. Furthermore, the Commission noted that while it should not be precluded from granting or modifying authority to describe more efficient and coherent route structures where a carrier has met the basic "gateway elimination" criteria, it must first ascertain whether considered operations are devisible and independent of one another before the separate route structures may be described and considered as separate proposals; otherwise, the entire application might fail because of the partial elimination restriction.—Thurston Motor Lines, Inc.—Charlotte Gateway, 105 M.C.C. 586 (594-8).

Applicant, seeking to operate between two points presently served only by traversing a third, may prove requisite convenience and necessity in two ways: (1) by showing need not adequately met by existing carriers, or (2) by showing that elimination will result in more economical operations. Applicant failed to demonstrate need for proposed service between points in California, on one hand, and, on the other, points in southern Idaho and southern Oregon, because, apart from general expressions of need, the record lacks specificity. However, applicant did demonstrate as between points in Washington, on one hand, and, on the other, points in California, Montana, Utah, Wyoming, Colorado, and Oregon (1) that it is transporting substanial traffic from and to these points through considered gateways as an effective and efficient competitor with existing carriers and (2) that the elimination of considered gateways would not enable it to institute a new service or a service so different as to materially improve its competitive position to the detriment of existing carriers. Granted in part.—Cartwright, Inc., Ext.—Elimination of Circuity, 106 M.C.C. 106 (110-11, 115).

Applications seeking elimination of gateways are granted or denied in the context of applicant's complete operations; a partial elimination of a gateway is not sanctioned upon a mere showing of operating convenience. Applicant must show that it has provided a substantially complete territorial service through considered gateways between all its authorized origins and destinations. Evidence presented by applicant fails to demonstrate operations between substantially all origins and destinations authorized to be served; it is not enough for applicant to show that it has handled a substantial volume of traffic if it has provided service only at selected points. Evidence of record is designed to support only a partial elimination of considered gateways; such fragmentation of authority is contrary to sound regulatory policy and prohibited. Denied.—Dallas & Mavis Forwarding Co., Inc., Extension, 106 M.C.C. 154 (158-60).

Since applicant's three part application is designed to eliminate certain Alabama gateways and since it elected to proceed without shipper support, it must establish (1) that it is transporting a substantial volume of traffic through considered gateways as an effective and efficient competitor with existing carriers, (2) that elimination of gateway requirements would not enable it to institute a new service or a service so different from that presently provided as to improve applicant's competitive position to detriment of existing carriers, and (3) that it has been providing service at substantially all points in its authorized territory. As to part I of its application, applicant has failed to show that it is providing service at substantially all points in the territory it is authorized to serve via its Alabama gateways; as to part II, four shipments are not enough on which to base grant of authority, even on theory that transportation of textile machinery is sporadic; and as to part III, applicant has failed to show that it is an effective competitor on this traffic either as to origin points or commodities authorized. Denied.—Floyd & Beasley Transfer Co., Inc., Extension, 106 M.C.C. 250 (251-4).

Carrier's application for regular route authority to operate between Albany, N.Y., and Springfield, Mass., treated as an alternate route application, was denied by the review board because applicant had no authorized route with respect to which proposed route could be considered alternate; on reconsideration, however, the application is considered as one for elimination of Hartford, Conn., gateway since, by a combination of its slow and circuitous regular and irregular routes, applicant could operate between Albany and Springfield, using Hartford as a gateway. Although applicant has been operating between named termini, in actual fact such operations, even using the Hartford gateway, were not performed over its authorized regular and irregular routes; rather, using its irregular-route radial authority as the sole basis therefore, applicant used a more expeditious but clearly illegal crosshaul. Thus, these operations which constitute the basis for the requested gateway elimination are clearly unauthorized; applicant has failed to meet its burden of demonstrating that it is operating in good faith through the gateway; denied. Applicant admonished to adhere to strict compliance with the terms of its outstanding authority.—Dorn's Transp., Inc., Ext.—Springfield, Mass. 110 M.C.C. 92 (93-95)*.

Applicant is authorized to transport household goods in nonradial operations, between points in most of states east of Mississippi River, including Louisiana, and in radial operations between points in Arkansas, on the one hand, and, on the other, points in Louisiana and Texas. By joining its nonradial and radial authority at a point in Louisiana, it has been transporting household goods between points in east, on the one hand, and, on the other, points in Texas assertedly for purpose of rendering a more efficient service to shippers by eliminating necessity of operating through Arkansas gateway. Applicant disclaims reliance on "elimination of gateway" criteria but rather premises its application, which is supported by three shippers, on proposition that elimination of gateway is necessary in order to render a more expeditious service to shippers. Commission has consistently found that a carrier authorized to conduct radial operations may not operate between two radial points by operating through the base point. In view of the fact that applicant has produced no evidence to show that the service of existing carriers is unsatisfactory or indequate, it has failed to establish that present or future public convenience or necessity require proposed operation; denied.—Engle Bros., Inc., Ext.—Arkansas Gateway, 110 M.C.C. 263 (264-5).

Commission denied applicant's claim that these proceedings are gateway eliminations. Applicant seeks to operate in territories substantially broader than those now authorized and to transport commodities it is not now authorized to carry. Thus, basic criteria for elimination of gateways—actual competitive transportation of traffic between all points—cannot be met.—Ashworth Transfer, Inc., Ext.—Explosives, 111 M.C.C. 860 (868-9).

To allow motor carriers to ignore the routing and gateway limitations in their operating authorities and thus to provide totally new motor services for which no public need had been established would be largely to negate the certificate and permit requirements of the Act. However, if a proposed substitute service bears a reasonable relationship to the authorized service for which it is substituted, and if the proposed substitution would not affect the carrier's competitive situation, it is permissible.—World Storage & Transfer, Inc. v. Alaska Transfer, Inc., 115 M.C.C. 288 (291-2).

Proposed substitution of one named gateway for another rejected as applicant has failed to show that such a substitution would result in operating economies or efficiencies from avoidance of circuitous operations and would not materially and adversely affect the competitive situation of existing carriers.—Jayne's Motor Frt., Inc., Ext.—Southhampton Township, N.J., 115 M.C.C. 700 (705-6)*; applicant failed to meet the standard gateway elimination requirements (see 83 MCC 451) and to show itself to be an effective competitor at to substantially all commodities involved.—Kroblin Refrigerated Xpress, Ext.—Sterling, Ohio, 118 M.C.C. 869 (875)*.

30. Extension of operations.—[Vols. 10-19, 21].—Part I, §1(18), n. 29, 129.

See also Masselink Bros. Trucking Ser., Inc., Ext.—Restrictions case, §207(a), n. 35; Roy L. Jones, Inc., Ext.—Earth Drilling Equipment case, §207(a), n. 25 *Commodity;* Salem Transp. Co., Inc. case, §212(a), n. 30; Terminal Transport Co., Inc., Ext.—Birmingham case, §207(a), n. 25 *Existing service.*

Applicant, a motor common carrier of perishable commodities, files for authority to transport all sorts of food products, i.e., meats, oils, fruits, vegetables, and bakery products, from Texas to points in 6 western states. The concept on which applicant bases its case is that there is a need for a peddler type service meeting all the requirements of all the supporting shippers. There is, however, no justification for grouping the shippers nor of treating their needs as though they were a single shipper. More properly the application should be considered as several extension proposals consolidated in a single proceeding. In such circumstances, the proposed movements will be looked at individually, the shippers' needs weighed and the protesting carriers' services evaluated and authority granted or denied for each movement on its own merits.—Zero Refrigerated Lines Extension—Six States, 96 M.C.C. 482 (483).

Applicant's offer to afford in-transit storage privileges at Portland, Oregon, is only an element to be considered in finding that a public need exists for the proposed service; standing alone it is not of controlling importance (see 100 MCC 18). Furthermore, although protestants are willing to accord intransit storage privileges in connection with traffic moving through Portland, neither applicant nor supporting shipper have attempted to participate in transiting arrangements under existing authorized service. Denied.—Exley Exp., Inc., Extension—Storage in Transit, 100 M.C.C. 284 (287).

Although shown to be required by supporting shipper, proposed operation by common carrier applicant as contract carrier would permit applicant to serve West Virginia Pulp and Paper Company as both a common and contract carrier; therefore, §210 requires that approval of such operations be withheld, because the resulting dual operations would give rise to opportunities for discrimination. However, because of considered circumstances proceeding held open for 90 days during which applicant can present to Commission some plan of action which would enable it to perform contract-carrier service required while eliminating any objectionable dual operations.—Schock Transfer Co., Inc., Extension—Kansas City, 100 M.C.C. 718 (720, 722).

Since it is well established that a carrier may transport parts or accessories of a commodity for which it holds specific authority as part of the same undertaking (in same vehicle or in separate vehicle if transported in same manner and at same time as primary commodity of which they are ultimately to become an integral part) without specific authorization, no new authority is required to transport parts or accessories of commodities which may be transported under applicant's modified certificate. Denied.—Ray Carter, Inc., Extension—Heavy Commodities, 102 M.C.C. 217 (221-2).

As no real inadequacy has been shown in existing service between Memphis, Tenn., and Monroe, La., authority granted is restricted against tacking to protect existing carriers' interest; and although applicant seeks authority to serve points in southeastern Arkansas to or from which supporting shippers desire service over irregular routes, it is apparent that nature of proposed service and needs of supporting shippers are basically attuned to regularly scheduled less-than-truckload operations between fixed termini, serving numerous intermediate and off-route points. Applicant itself has applied for conversion to regular routes of part of its irregular-route authority in this area; and, since most of considered points in this sparsely populated territory are within 40 miles of designated regular routes, grant of only regular-route authority to serve points in described area is more appropriate.—Red Line Transfer & Storage, Inc., Extension—West Monroe, La., 102 M.C.C. 486 (488-9).

Demand for proposed service (except to Milford) is not extensive and mere convenience, standing alone, is not sufficient to support grant of authority. Also, since it is apparent that applicant's overall method of operation, involving as it does the transportation of passengers over essentially a single route, according to a predetermined plan between fixed termini, and in observance of a published schedule, is in the nature of a regular-route operation, regular-route authority granted. However, since applicant has agreed to apply for a revocation of its lead certificate in event titled application is approved, and since all points in titled application are presently authorized in lead certificate or applied for in embraced applications, this grant is conditioned on cancellation of applicant's lead certificate.—Brown's Connecticut Airport Service, Inc., Conversion, 103 M.C.C. 6 (13).

Evidence of past operations conducted under color of right by most applicants warrants grant of authority to transport articles weighing 15,000 pounds or more, whether self-propelled or not, including those within authority to transport heavy machinery and/or contractor's machinery, equipment, materials, and supplies; however, one applicant's failure to demonstrate that it had participated in this traffic is fatal to its application.—Ashworth Transfer, Inc., Ext.—15,000 lb. Articles, 103 M.C.C. 404 (411, 433).

That an applicant for extended authority specifically solicits and handles substantial amounts of national account business does not defeat its cause, particularly since it was shown to advertise, solicit, and handle a considerable tonnage of c.o.d. business and intended to continue to do so if the authority were granted as sought.—Fernstrom Storage & Van Co. Ext.—Nationwide, 110 M.C.C. 452 (457)*.

Public convenience and necessity not shown to require operation by applicant as common carrier of described explosive commodities over irregular routes as applicant and sole supporting shipper, Department of Defense, fail to support a prima facie showing of need for service through absence of evidence as to volume of traffic and specific inadequacies of existing service.—

Ashworth Transfer, Inc., Ext.—Explosives, 111 M.C.C. 860 (863-6).

Applicants now authorized to transport mobile homes granted additional authority to transport "double-wides" (sectionalized buildings) to enable them to provide complete service to shippers they presently serve. This Commission, under "field of service" doctrine as stated in 107 MCC 445, will grant extensions of authority to carriers whose existing authorities prevent them from handling new commodities for industries they already serve.—Transit Homes, Inc., Extension—Buildings (Idaho), 112 M.C.C. 422 (432).

Applicant's petition for extended authority granted to three states and the District of Columbia, but refused to two states on basis of protestant's evidence of adequate available service.—Oliver Trucking Co., Inc., Ext.—Delaware, 115 M.C.C. 554 (557).

Public convenience and necessity found to require operation by applicant, in interstate or foreign commerce, as a common carrier by motor vehicle, over irregular routes, of trucks (3/4 ton or less) and passenger automobiles, in secondary movements, in truckaway service, between points in New Mexico and points in Colorado, restricted against tacking duplicating authority.—Transport Trucking Co. of Texas Ext.—New Mexico, 117 M.C.C. 517 (521)*.

Applicant's desire to extend its authority was based primarily on a wish to retain in his family the operating rights of the contract carrier owned by his son and daughter-in-law; existing service held adequate. Application denied.—Buanno Transp. Co., Inc., Ext.—Gloversville, N.Y., 117 M.C.C. 700 (704)*.

Commodities: [Vols. 17, 19, 21].—See also W. S. Hatch Co., Extension—11 States, §207(a), n. 25 *Commodity*.

Since no inadequacy is shown in services now available for transportation of explosives, applicant has failed to show need for grant of such authority. Both protestants are authorized to transport explosives, which is a specialized service not ordinarily rendered by carriers of general commodities, and despite the fact that Department of Defense was represented at the hearing by counsel experienced in transportation matters, it demonstrated no specific need for commingling general commodities and explosives, it presented no specific evidence as to quantity of explosives that might require transportation between involved points, and it did not specify the frequency of possible movements.—M.R.& R. Trucking Co., Extension—Birmingham, 105 M.C.C. 69 (82-3)*.

The phrase "business records" is a broad commodity description denoting those papers and instruments ordinarily used by all firms engaged in a commercial or mercantile enterprise. Banks and banking institutions are a particular type of commercial activity or business. While protestants hold authority as contract carriers to transport business records restricted to those used in the business of banks and banking institutions and common carrier authority to transport business records restricted against such service for any bank or banking institution, such phraseology was necessary to avoid the possibility of unlawful practices prohibited by §210 of the Act. It does not follow that applicant must choose to serve only banks and banking institutions, or other businesses except banks and banking institutions. Where applicant seeks to handle the same commodities for all types of businesses there is no bar to granting such authority provided a public need is shown that cannot or will not be met by existing carriers.—Ted W. Betley, Extension, 107 M.C.C. 55 (61-62).

Applicant should be granted authority to transport a new type of portable structure known as "double wides" from points in Michigan to points in the destination territory where it now is certificated to handle single unit mobile homes. The development of this product represents an addition or extension of the industry which constitutes a shipper product that has evolved into a commodity beyond the scope of applicant's specialized initial authority and for which applicant has satisfactorily met its burden of establishing a future need for service.—Transit Homes, Inc., Extension, 107 M.C.C. 445 (449-50).

Lift trucks loaded and unloaded under their own power cannot be transported under applicant's "heavy hauling" authority nor can they be handled by protestants under their various intended use authorities since the intended use of any particular lift truck is not known at the time of shipment and because sufficient numbers of such lift trucks are not so intended for a particular use as to create a presumption favoring such use. Also, since the lift trucks are loaded and unloaded under their own power and no special equipment is necessary to perform these functions, they may not be transported as "heavy machinery".—Eagle Motor Lines, Inc.—Extension, 107 M.C.C. 629 (633-34).

Two applications for similar authority to transport paper and paper products were virtually unopposed, and the evidence presented amply warranted the grant of such authority; however, applicants failed to meet the requisite burden of proof with regard to the inability of existing carriers to handle the involved traffic in an adequate and satisfactory manner, or that protestant's service within the territorial scope of its authority is inadequate. Denied, in part.—Mitchell Bros. Truck Lines Ext.—Lewiston, Idaho, 118 M.C.C. 171 (175-6)*.

35. Operations by and with railroads.—[Vols. 10-15, 17-19, 21].—Within the underlying policy of §5(2)(b), railroads, and their affiliates, frequently have been authorized to conduct substituted motor-for-rail service when record shows that: (1) a public need exists or a more economical and efficient service will result; (2) the service authorized is, unless special circumstances are shown, restricted to insure that service is auxiliary to and supplemental of rail service; and (3) a grant of authority will not appreciably alter the existing competitive situation and seriously endanger operations of existing motor carriers. To be a substituted service and one that is auxiliary and supplemental to rail service, the motor transportation must be functionally related to the rail service.—Great Northern Ry. Co. Extension—Ex-Rail Cement, 96 M.C.C. 699 (703).

If proposed motor carrier operations of railroads, or their affiliates, were limited to points within 25 miles of the rail lines (as opposed to railheads), applicants' motor vehicles could move from or to any destination point as long as that point was within 25 miles of the rail lines; new off-rail points could be served in moderately long hauls over irregular routes that are not parallel or related to rail points; and the service performed would not be tantamount to local delivery within railroads' terminal area as defined in their tariffs. Proposed service would be to territory beyond applicants' reasonably defined territorial area and/or would constitute a new service; thus, service shown to be needed is to predominately off-rail points and cannot be considered as an auxiliary or supplemental service that is functionally related to rail service. Therefore, applicants must prove need for unrestricted operating authority by showing "special circumstances".—Id., pp. 703-5.

Such "special circumstances," i.e., (1) that a grant of authority will not result in undue restraint of competition and (2) that public interest requires the proposed operations which are not furnished by independent motor carriers, are not established by evidence of cement industry's new distribution technique, composed of volume movement by rail with short-haul distribution by motor vehicles to off-rail destinations, when independent motor carriers are willing and able to serve the needs of supporting shippers either under existing authority or that acquired in contemporaneous application proceedings. While the economies of long-distance rail transportation insure rail participation in the overall movement, the railroads, through their affiliated motor carriers, appear intent upon establishing one-mode control of proposed ex-rail service to the exclusion of intermodal coordinated rail-motor transportation with independent motor carriers, contrary to public interest and the National Transportation Policy. Application denied.—Id., pp. 705-6.

Except where justified by special circumstances, common-carrier operation proposed by motor subsidiary of railroad must be functionally subordinated to rail service; that is, it must be truly auxiliary to or supplemental of rail operations conducted by parent railroad. Since no "special circumstances" have been shown justifying a grant of such unrestricted authority, application is denied insofar as such authority is sought.—Missouri Pac. Truck Lines Ext.—Removal of Keypoint, 100 M.C.C. 677 (682).

Applicant seeks to remove from its present authority any restriction limiting its participation in trailer-on-flatcar (TOFC) traffic, and its motion to dismiss seeks, in effect, a

Commission ruling that its existing authority (restricted to points on the rail line of the Chesapeake and Ohio Railway Company, the C & O, and restricted to traffic having a prior or immediately subsequent movement by rail) allows it to participate in all TOFC operations. A review of most common TOFC plans reveals that applicant's present authority permits it to transport loaded trailers moving in C & O's plan II TOFC service, a railroad controlled operation where shipments move at all-rail rates and where railroad provides complete transportation service. Applicant cannot operate under other plans since it is neither authorized to perform line-haul motor service for which rail service could be substituted, nor may it operate under its existing authority in any way other than as an agent of the C & O; and, since applicant has relied solely upon its own operations to establish that it should be authorized to participate in all TOFC traffic and has produced no public witnesses, it has failed to show need for additional authority.—Masselink Bros. Trucking Ser. Inc., Ext.—Restrictions, 103 M.C.C. 507 (508-11).

Where unrestricted authority is sought for substituted motor-for-rail service, establishment of public convenience and necessity must be accomplished in same manner as in any motor common carrier proceeding. Additionally, applicant must show that special circumstances prevail which negate any disadvantage to the public resulting from grant of unrestricted authority to a railroad affiliate. Commission finds grant of unrestricted authority sought herein to be in public interest because of the existence of special circumstances. Proposed service will alleviate the long-standing problem of lack of adequate transportation of small shipments at small communities. Application is supported by numerous shippers, and revenues from resulting traffic will contribute to profitability of applicant's service to all supporting shippers. Protestant motor carriers are in good financial condition and have not shown that proposed service will so injure them as to threaten overall quality of their service or their obligation to the public. Protestant trucking association has not demonstrated adverse effects on independent motor carriers and such effects cannot be implied absent affirmative evidence.—Santa Fe Trail Transp. Co. Ext.—Colo. & Kans. Points, 111 M.C.C. 224 (230-2).

Commission, citing 63 MCC 91, approves authority sought herein by applicant, a rail motor common carrier affiliate, without restrictions limiting its service to operations supplementary to rail service as "special circumstances" are found to exist because of failure of independent motor carriers to provide needed full common carrier service to their authorized points, except where and when it has suited their convenience. Such a grant will not result in undue restraint of competition.—Santa Fe Trail Transp. Co. Ext.—Dallas & Forth Worth, 114 M.C.C. 321 (345)*.

Although 355 US 141 made it clear that the Commission enjoys a measure of discretion in determining on specific facts and circumstances that the public interest requires a grant of unrestricted authority to a rail-owned carrier, the Commission has exercised that discretion in conservative fashion when granting functionally unrestricted operating authority to rail motor carrier affiliates since 1957 when that cases was decided. Since then there have been few large grants of unrestricted motor carrier authority to rail affiliates, and where large grants have been made they usually have not involved substantial opposition by existing motor common carriers offering competitive services at small intermediate points.—Southern Pac. Transp. Ext.—Elimination of Restrictions, 117 M.C.C. 224 (327).

Applicant sought unrestricted operations which were geographically more extensive than those granted since 1957, and the application was opposed to a substantial extent by motor carriers which actually were providing services at most of the small intermediate points involved in the application. However, the quality of the existing service was held lacking. It is not the purpose of the Act to protect independent motor carriers at all costs where a grant of authority to a rail subsidiary is unlikely to result in undue restraint of competition and where the public interest requires services which the motor carriers are not providing. Granted, subject to restrictions.—Id., pp. 331-2. See also §5(2), n. 2 *Dual operation.*

Substituted freight service: [Vols. 17, 19, 21].—In granting authority to provide a substituted motor-for-rail service it must appear that the new operation "is one in which the motor carrier would be acting in a subordinate capacity, aiding the railroad in its rail operations rather than competing with independent motor carriers"; and, moreover, substituted service must actually be substituted for something; it must replace "an existing rail service in which the traffic to be handled by truck has previously moved by rail". There is no showing that there is now being performed a rail service for which the proposed motor service would be substituted; therefore, it is clear that applicant's service would not be subordinate to the railroad's operations but would be no different from the services provided by protestant motor carriers. Denied.—Missouri Pac. Truck Lines Ext.—Removal of Key Point, 99 M.C.C. 754 (759-60).

Since applicant has established that removal of key point restriction would be in its interest and that of its parent rail company without materially infringing upon the established service of protestants, the application should not be denied on the basis of the Commission's prior denial of applicant's request in 94 M.C.C. 146 where the decision was predicated largely on failure to present evidence upon which relief could be granted; nor is denial warranted by findings in 99 M.C.C. 754 where, unlike the instant application, protestants established that their substantial participation in the traffic under consideration would be subject to diversion if the application were granted.—Missouri Pacific Truck Lines, Inc., Extension, 107 M.C.C. 441 (443-44).

Applicant is a commonly controlled affiliate of another railroad having multi-state subsidiary motor carrier authority; on acquisition of applicant by the other railroad, applicant's right to engage in single-state subsidiary motor service under the exemption proviso of §206(a)(1) ceased by operation of law. Applicant now seeks to convert its temporary authority to engage in substitute motor-for-rail in single-state operation into permanent authority to conduct this some service and in addition commercial zone authority that would extend into adjacent states. Applicant made no attempt to restrict its proposal to motor carrier service auxiliary to or supplemental of its rail service; therefore, applicant must show that special circumstances exists i.e., applicant must show a public need for the service and that the service of the existing carriers is inadequate; having failed to show that existing carriers are unwilling or unable to meet the transportation needs of the public, the application must be denied.—Chicago & Eastern Illinois Railroad Company Common Carrier Application, 108 M.C.C. 53 (54, 61-2, 66).

On reconsideration, applicant railroad has shown a prima facie need for proposed service by evidence of supporting shippers. Sole protestant showed nothing about the nature and quantity of its equipment and filed no reply to applicant's petitition for reconsideration. Such showing fails to rebut applicant's prima facie case, and authority, as specifically restricted, is granted.—Erie Lackawanna Ry. Co. Ext.—Substituted Service, 110 M.C.C. 823 (827).

36. Operations by and with water carriers.—Complainants sought intervention of Commission based on alleged violation of §203(c). Defendant had substituted water for motor transportation when it was no longer possible to utilize ferry service. Complaint dismissed.—Wold Storage & Transfer, Inc. v. Alaska Transfer, Inc., 115 M.C.C. 288 (292).

Regulations of the Commission

34 FR 18392, Nov. 18, 1969, Part 1041: Interpretation—Certificates and Permits, Part 1041 amended by addition of §1041.23 Operating authority to serve a particular airport, effective Nov. 26, 1969.

35 FR 17264, Nov. 10, 1970, Part 1060: new Part 1060 Special Relief for Motor Carriers Affected by a Temporary Highway Closing, §1060.1 Special relief for motor carriers affected by temporary closing of West Virginia Highway 2, added, effective upon publication in the Federal Register.

36 FR 21596, Nov. 11, 1971, Part 1062: Speical Regulations for For-Hire Motor Carriers Engaged in the Transportation for Recycling or Reuse of "Waste" Products in Furtherance of Recognized Pollution Control Programs, new Part 1062 setting forth special procedures, added, effective Dec. 15, 1971.

37 FR 14307, July 19, 1972, Part 1041: Interpretation; Certificates and Permits, §1041.11(a) Service to, from, and between points in Hawaii, added effective Aug. 21, 1972.

37 FR 16944, Aug. 23, 1972, Part 1041: Interpretation; Certificates and Permits, §1041.11 Service to, from, and between points in each Alaska and Hawaii, codification and heading in order (37 FR 14307) corrected.

39 FR 7794, Feb. 28, 1974, Part 1065: Gateways and Tacking-Irregular Route Motor Common Carriers of Property. New part 1065 added to 49 CFR regarding petitions for elimination of gateways, effective April 5, 1974.

39 FR 8327, Mar. 5, 1974, Part 1060: Special Temporary Relief for Motor Carriers Affected by a Highway Closing. Notice that regulations published at 35 FR 17264 (Nov. 10, 1970) are no longer in force.

39 FR 9830, Mar. 14, 1974, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce. Promulgates rules concerning consumer problems involving carrier information to be given to shipper and cost estimates, effective April 25, 1974.

39 FR 17444, May 16, 1974, Part 1065; Gateways and Tacking-Irregular Route Motor Common Carriers of Property. Extension of date for filing of gateway eliminations and letter-notices to June 4, 1974, effective upon publication.

Section 207. (b) *[§307 (b) U.S.C.]* Certificate not to confer proprietary or property rights in highways.—[Unchanged. See vol. 10,p.8020.]

Section 208. *[§308 (a) U.S.C.]* Terms and conditions of certificate—(a) Specification of routes and termini; extension of routes; restriction on additions to equipment.—[Unchanged. See vol. 10,p.8021.]

Notes of Decisions

Volume 10—p. 8021; Volume 11—p. 9450; Volume 12—p. 10401; Volume 13—p. 11077; Volume 14—p. 11598; Volume 15—p. 12204; Volume 16—p. 12853; Volume 17—p. 13553; Volume 18—p. 14462; Volume 19—p. 15720; Volume 21—p. 17403.

2. Construction and interpretation.—[Vols. 12-19, 21].—Geographical terms, conditions, and limitations can be imposed on certificates by the Commission under §208(a) of the Act. However, they must be reasonable and be required by public convenience and necessity or be necessary to implement any requirements established under §204(a)(1) and (6); moreover, they cannot encroach upon carrier's right, safeguarded by statute, to enlarge its equipment and facilities within scope of its authority. Thus, the initial problem in framing motor carrier operating rights is how best to describe the reasonable transportation requirements evidenced by the record, and, at the same time, protect existing carriers from unwarranted incursions into their authorized fields of service. In this light, the Commission is not, and cannot be, bound by restrictions agreed to by the parties where they achieve results inconsistent with public interest and inimical to practicable and effective regulation; protestants who withdraw from a proceeding relying on such proposed amendments do so at their own peril. —Fox-Smythe Transp. Co. Extension—Oklahoma, 106 M.C.C. 1(6-9).

Power conferred by §208(a) to attach terms, conditions, and limitations to certificates is a broad one; the standards are only that they be reasonable and be either required by public convenience and necessity or necessary to implement requirements of the Motor Carrier Act. They cannot, however, nullify another provision of the Act, nor encroach upon a carrier's right, specifically safeguarded by statute, to enlarge its equipment and facilities within the scope of its authority. Moreover, there is no statutory provision which dictates a hearing under §208(a) in order to impose on outstanding certificates such terms, conditions, or limitations as the public convenience and necessity may require. In present rulemaking proceeding, oral hearings are not required either by mandate of law or in order to afford procedural or substantive due process; nor has it been demonstrated that any useful purpose would be served by assigning the proceeding for oral hearing.—Removal of Truckload Lot Restrictions, 106 M.C.C. 455 (474-5, 478-80)*.

It follows, then, that a proper public convenience and necessity finding may be made upon an appropriate record pursuant to §208(a) without a carrier's first filing a §207 application. Congress, in enacting the statute, was aware that a lasting job might not be done initially and left the door open to correct any resulting deficiency; also, as stated in 387 US 397, Congress has placed trust in the Commission to reviw constantly its past actions in order to seek out and correct any which—through changing conditions—have become out of gear with public convenience and necessity. Thus, the Commission has power under §208(a) to make a general finding—on a national scale—of public convenience and necessity; the statute does not confine such a finding to a multiplicity of individual cases dealing with each separate certificate. A contrary conclusion would ignore practicalities of the situation, unduly complicate, and defeat the very purpose of, regulation, and impossibly burden both the Commission and the industry.—Id., pp. 476-7, 480-81.

Therefore, contrary to arguments that a conflict between public convenience and necessity and operating rights previously granted may be resolved only on an individual case-by-case basis, the only sound and feasible method of of determinig whether "truckload lot" restrictions in outstanding certificates is incompatible with the public convenience and necessity is to consider all of them on a national basis. In addition, rulemaking is a process aimed at situations rather then particular persons, and one in which possible individual detriments are subordinated to achievement of the greater good; and rulemaking, rather than adjudicative, procedures are the best ones for a determination as to whether or not public convenience and necessity requires removal of the truckload restriction from all existing certificates.—Id., pp. 477, 479-81.

Following numerous decisions (see 106 MCC 1), Commission on reconsideration concludes that proposed restrictions are administratively undesirable and difficult to enforce and therefore refuses to impose them. A shipper's expressed requirement for "complete" service to several destination points should not become a "gimmick" whereby a "preferred" applicant may obtain authority merely by the naming of some destination points which cannot be served adequately by existing carriers. It is important to ask whether Commission should sanction grants of unrestricted authority when such grants result in actual service less than that expected, and in effect result in a certificate being issued on basis of false premise. On the other hand, a shipper who supports an application should be able to rely on the actual development and continuance of the type of service promised by applicant. It is not unreasonable to require applicant, who has successfully obtained authority on basis of proposed shipper-tailored pickup-and-delivery service, to report to Commission in annual "Performance Report" its success in meeting shipper's requirements.—Bilyeu Refrigerated Transp. Corp. Ext., 106 M.C.C. 692 (694);—shipper, who has successfully obtained authority on basis of its proposal to tailor service to the needs of the small shipment shipper, required to report to Commission in annual "Performance Report" its success in meeting shippers' requirements.—Transamerican Freight Lines, Inc., Extension—Columbia, Ga., 115 M.C.C. 416 (428).

The Commission specifically reserves the right to impose in the future such terms, conditions and limitations as it may deem necessary and which public convenience and necessity may from time to time require, since it is not known what, if any, action might be indicated by the data to be furnished in appplicant's "Performance Report" which it is required to file annually for three years to show its success in meeting shipper's needs.—West Brothers Inc., Extension, 106 M.C.C. 792 (799-800).

In this rulemaking proceeding, Commission prohibited motor common carriers from establishing self-imposed service restrictions which result in a carrier providing service less than its full operating authority or which exceeds such authority.—Restrictions on Service by Motor Common Carriers, 111 M.C.C. 151 (164-7).

Commission's power to attach terms, conditions, and limitations to certificates conferred by §208(a) is exceptionally broad and provides Commission with jurisdiction to promulgate regulations as regards smoking on interstate buses.—Smoking on Interstate Buses, 114 M.C.C. 256 (260-64).

From the inception of Federal motor carrier regulation the Commission has used three separate, distinct, and mutually exclusive terminologies to authorize irregular-route trucking operations [106 MCC 1, 26, 27]. These are the simple and self-explanatory "from and to" description, and the radial and nonradial "between" descriptions. A radial description depicts operations between a base point and other points in a described area; employs the language "between ***, on the one hand, and, on the other, ***"; and is limited to the transportation of traffic from and to the base point points. Incontrast, a nonradial grant which is described in terms of service "between *** and ***" authorizes operations between all points within the described area.—Hilt Truck Line, Inc.—Investigation of Operations, 117 M.C.C. 9 (23-4).

25. Restriction of addition of equipment, facilities, forbidden.—[Vols. 10-14, 16]—See Removal of Truckload Lot Restrictions, n. 2 above.

30.-Routes, streets, points to be served.—[Vols. 13-19, 21].—See also Cole's Exp. Route Conversion Application and Midwest Motor Exp., Inc., at §207(a), n. 28 Change.

A certificate prescribes origin and destination points which the carrier may serve, and also restricts it to routes specified therein; it does not authorize common carriers to roam wherever they choose. It seems basic to the policy underlying enactment of the Motor Carrier Act that before common carriers can take advantage of their published tariff rates, they must follow authorized routes, since allowing them to transport goods over whatever route they choose would invite the kind of chaos the act was intended to forestall. Certificate authorizing plaintiff to operate (1) between certain New Jersey counties and parts of New York, including Peekskill, and (2) between those same counties and parts of Connecticut, including Bridgeport, does not permit direct operation between the two named points; therefore, since plaintiff was not operating legally when it carried defendant's shipments directly from Peekskill to Bridgeport, it cannot assert a claim for undercharges based on its published tariff rate.—Mars Express, Inc. v. David Masnik, Inc., 401 F. 2d 891 (894).

In action to set aside Commission order on further consideration, following remand in 251 F. Supp. 526, which required plaintiff to cease certain operations found to exceed its territorial authority, the court holds that, as a matter of law, plaintiff's certificate authorizing it to operate "between points in Connecticut, Pennsylvania, New Jersey, and New York within 100 miles of Columbus Circle, New York, N.Y., **" permits it to provide service in the first three States listed without regard to the 100-mile limitation therein, which applies only to operations in New York State. Whether under the rule of grammer designated as "Doctrine of the Last Antecedent," or as a matter of simple common sense, absence of a comma after first reference to "New York" indicates that, as a matter of grammatical construction, the 100-mile provision applies only to New York. Commission order under review, set aside and enjoined.—T. I. McCormack Trucking Co., Inc. v. United States, 289 F. Supp. 39 (40-41)*.

Commission finding that defendant carrier's certificate for regular-route limousine service between Philadelphia airport and Atlantic City, N.J., did not preclude the pickup and discharge of passengers at locations other than its established terminal within Atlantic City, was made within its statutory powers and, also, in accord with its regulations governing regular-route passenger carriers' transportation of special or chartered parties. And there was no abuse of administrative discretion in the Commission's finding that all of Atlantic City was on defendant's route for two reasons: (1) since certificate did not specify a route, or terminal, to be used within that city, carrier could travel throughout the minucipality; (2) the "terminal area exception" of §202(c) permits motor carriers to perform transfer, collection, and delivery service within their terminal areas and the Commission has held that passenger carriers' terminal areas are the corporate limits of points they serve. Accordingly, plaintiff's suit to enjoin and set aside the Commission's order is dismissed.—Salem Transp. Co. v. United States, 314 F. Supp. 693 (694-6)*.

In suit to set aside the Commission's order that plaintiff cease and desist from providing service at Chesapeake, Va., under the regular-route certificate (issued in its route conversion proceeding) authorizing it to serve "all points in . . . North Carolina" as off-route points, the record adequately supports the commissions ruling that authority so limited to a definite territory does not allow any service at any point beyond the limit prescribed, even if such point is within commercial zone of a town in the authorized area. Moreover, plaintiff concedes that prior to conversion from irregular- to regular-route status, it could not serve Chesapeake; and it is clear that a carrier does not broaden its authorized area by converting from irregular to regular route operations. Therefore, by virtue of converting its certificate, plaintiff did not expand its authorized service territory to include Chesapeake, although that point is within commercial zone of Moycock, N.C., which it may serve as an off-route point. Commission cease-and-desist order, upheld; action dismissed, with prejudice, at cost of plaintiff.—R-C Motor Lines, Inc. v. United States, 350 F. Supp. 1169 (1170-1, 1173-4)*.

Since permit issued to applicant's predecessor authorized service to and from "railheads", and record does not show an established meaning for that term peculiar to the trade or industry, it is proper to consult definitions in accepted dictionaries. Of the definitions of "railhead" in Webster's dictionary, none suggest that its meaning is limited to exact rail siding or other rail facility actually used; rather, the preferred definition speaks of it as "a point." Moveover, the analogous term "station on the railway," used in many interstate authorities, has been interpreted as authorizing service to and from points within commercial zones served by rail stations. Authority from the Commission to serve railheads is authority to serve any point on a "railroad" at which freight is loaded or unloaded, is not limited to service at or within physical limits of rail facilities or freight terminals, and authorizes service within commercial zones of municipalities in which such rail facilities are located. Applicant's 100-mile radius of railheads must be measured from the municipal limits or, there being no municipality, from the rail facility itself.—Contractors Cargo Co.—Extension, 96 M.C.C. 306 (312-3)*.

In granting mainland-based carriers statewide authority to transport household goods in Hawaii, the required waterborne movement over which the Commission has no jurisdiction precludes issuance of a radial grant framed "between points in Hawaii, on the one hand, and, on the other, points in the continental United States," since such grant would include in part transportation by water. Also, a grant of unrestricted authority "between points in Hawaii" might well be interpreted to include inter-Island transportation, as well the type of operations for which authority is sought, thus bringing the Commission into a possible jurisdictional conflict with other Federal regulatory agencies. In the circumstances, therefore, mainland applicants should be granted authority to transport household goods between points in Hawaii, restricted to the handling of traffic originating at or destined to out-of-State points.—Burham Van Service, Inc., Extension, 103 M.C.C. 372 (392-3)*.

In order to insure people in Florida an adequate transportation service, applicant granted general commodity authority to operate over regular routes between Charlotte, N.C., and Pensacola, Tallahassee, Jacksonville, Orlando, Tampa, and Miami, Fla., and, in effect, between all points in Florida (authority granted between specified Florida cities and all other points in Florida were authorized as off-route points); in addition all points in Mecklenberg County, N.C., and Florala, Ala., authorized as off-route points in connection with the above regular routes. This unusual grant of authority was the result of existing carriers' (1) reluctance to interline truckload traffic at Charlotte, (2) their inability to interline traffic between points in Florida and (3) the excessive and erratic transit time for L.T.L. shipments between Charoltte and points in Florida.—Alterman Transport Lines, Inc., Extension, 106 M.C.C. 402 (415-422)*.

Petitioner's certificates to transport various motor vehicles from Warren Township, Mich., should be modified to reflect the present nominal and political situation; but its proposed modification which would authorize service from Warren, Mich., is unacceptable. Inasmuch as Warren Township has been incorporated into a municipality known as Warren, Mich., it is no longer a political entity and it is now totally comprised of the city of Warren which, as a municipality, has a commercial zone that would include such important automotive centers as Detroit. Due to fact that Warren Township no longer exists, modification of the certificates is appropriate; however, like present description of the origin, the new description should be territorial in nature. Therefore, the words "that part of Macomb County, Mich., south of 14 Mile Road and west of Gratiot Avenue (except Fraser, East Detroit, and Roseville, Mich.)," are substituted in each certificate in lieu of words "Warren Township, Macomb County, Mich.," to properly describe the service authorized.—Dallas & Mavis Forwarding Co., Inc., Modification, 110 M.C.C. 253 (254-6).

Protestant's contention that the decision in 398 F. 2d 36 precludes an affirmative disposition of this application is without merit. In that case, the applicant had authority to serve Chicago but was precluded from serving O'Hare Airport because in order to serve the airport, applicant would have had to traverse a public highway, not described in its certificate, which is outside Chicago. In the instant case, O'Hare Airport is itself the terminus and to preclude service to O'Hare under the rationale in the cited court case would be to contravene a specific Commission grant of authority to serve O'Hare.—Tri-State Coach Lines, Com. Car. Applic., 110 M.C.C. 601 (608).

Commission denied petition to allow for-hire motor carriers of hazardous materials to transport such commodities using nearest direct route approved by stat and local authorities. Evidence does not assure us that a claimed increase in the safety factor would result or would offset adverse economic consequences and administrative difficulties inherent in proposed regulations. Carriers may avoid circuitous operations by availing themselves of new deviation rules (110 MCC 514) or by filing applications seeking gateway eliminations, alternate routes, or relocation of interchange points.—Regulations Governing Hazardous Materials, 111 M.C.C. 575 (589-93).

Administrative Ruling 84, which indicates that a regular-route carrier of property, with authority to serve all intermediate points on a designated route is allowed to serve all points situated wholly within 1 mile of the highway composing such route, is as workable and enjoys as much acceptance today as it was and did in 1960. Respondent's motion to institute a rulemaking proceeding to inquire into policies embodied in the ruling denied.—Adams Trucking, Inc.—Revocation of Certificate, 118 M.C.C. 567 (570-571).

31.—Combination of routes.—[Vols. 12-19, 21].—Round trip charter authority "beginning and ending" in a certain county of a state cannot be said to authorize service to other points within the state and such authority may not be tacked to regular authority under which there is incidental charter rights since the existence of a point of service common to two authorities is the key to the right to tack. Protestant lacks this common point because he is precluded from serving the state under the terms of his specific charter authority except to the extent that the state may be traversed in transporting charter groups to and from the authorized "beginning and ending" territory, and traversal is not synonomous with service.—Harry Lee Eyre, Jr.—Extension, 106 M.C.C. 851 (857-59).

In remanding the investigation proceeding to the Commission, the District Court, in 286 F. Supp. 213, had determined that certain motor common carrier operating rights held by carrier in two separate paragraphs of its certificate were patently ambiguous with respect to whether they constituted two separate grants of authority, in which case such rights could lawfully be combined with each other, or a single grant of authority, in which case such rights could not be combined; and that, therefore, the Commission, on remand, must examine the administrative history of such rights to resolve this issue. On remand, Commission found that the history disclosed that the subject operating rights constituted a single grant of radial authority; and accordingly, such rights may not be tacked or combined with each other. —Malone Freight Lines, Inc., Investigation of Operations, 113 M.C.C. 442 (446-461)*.

35. Duplicate operating rights.—[Vols. 11-16, 18, 19].—Since applicants cannot perform operations in foreign commerce, to the extent that such operations take place in the United States, under their state certificates registered under §206 (a) (7), issuance of certificates of public convenience and necessity would not lead to the creation of duplicating operating rights.—Imperial Truck Lines, Inc.—Common Carrier Application, 106 M.C.C. 741 (755).

Section 208. (b) [*§308(b) U.S.C.*] **Deviation from route.**—[Unchanged. See vol. 10,p. 8023.]

Notes of Decisions

Volume 10—p. 8023; Volume 11—p. 9452; Volume 14—p. 11600; Volume 15—p. 12207; Volume 16—p. 12857; Volume 19—p. 15732; Volume 21—p. 17416.

1. Construction and interpretation.—[Vols. 10, 11, 14-16, 19, 21].—The Commission found that the standard approach to deviation rules, which focuses upon the ratio (specified herein as not less than 90 percent) between the distance over the proposed route between the points of departure from and return to the regular service route and the distance between such points over the regular service route, was appropriate to superhighways as deviation routes. This approach has been found under the nonsuperhighway alternate route provision (49 CFR 1042.1 (c) (8) (ii)) of the deviation rules to be a most effective safeguard against the occurrence of unwarranted changes in the competitive situation between the applicant carrier and any other. Under the rule, as here modified, a carrier meeting the burden of proof would be able to utilize the superhighway route as to all of its passengers without regard to their respective points of origin and destination under its authority.—Motor Service on Interstate Highways—Passengers, 110 M.C.C. 514 (525-526).

In keeping with this approach, however, applicants under this rule were hereby placed on notice that undue service restrictions in the use of such routes, proposed merely to eliminate opposition, will not be countenanced and will be rejected.—Id., p.526.

Carriers' understandable desires for definite certificates setting forth all of their operating rights must yield to the practicalities of the total situation. As a result, and so that the Commission can continue to be in a sound position to handle reasonably and with dispatch the extremely heavy motor carrier operating authority caseload, it was found that the present rule requiring the dismissal of applications for certificated authority embracing operations capable of being performed under the deviation rules, as modified herein, should be continued.—Id., p. 526.

Section 1 of passenger carrier superhighway rules modified to reflect that the superhighway routes (including highways connecting such superhighways with the carrier's authorized regular service route or routes) to which the rules apply are those which extend between the point of departure from and the point of return to the carrier's regular service route or routes. Section 3 of these rules also modified to reflect that the highways connecting the superhighway route with the carrier's regular service route or routes are to be considered along with the superhighway in determining such factors as the mileage over the proposed route and the extent of parallelism of the proposed route to the underlying service route or routes.—Id., p. 527.

That the .applicable guideline ratio between the distance over the superhighway route between the point of departure from and the point of return to the regular service route and the distance between the same points over the regular service route is 85 percent under the property carrier superhighway rules as opposed to the less liberal 90 percent ratio adopted under the passenger carrier superhighway rules is, in part, a reflection of the premise that there is generally less intense competition existing between carriers of property than between passenger carriers, which factor amply warrants the slightly more liberal standard adopted under the property carrier rules.—Id., p.539.

Carrier's use of superhighways found to require operation over "connecting" highways to such an extent as to comprise a significant portion of the total distance traversed between the point of departure from and point of return to the carrier's authorized underlying service route. Cease and desist order issued.—Philipp Transit Lines, Inc. v. Main Line Hauling Co., 117 M.C.C. 466 (466).

Since respondent's operations between St. Louis and Washington (Mo.) and that between St. Louis and Linn (Mo.) involve the utilization of nonsuperhighway "connecting" highways which constitute a significant portion of the total over-the-road distance traversed between the point of departure from and the point of return to the underlying authorized regular service route, neither operation may be performed under the Superhighway Rules [49 CFR 1042.3]. The Superhighway Rules contemplate the utilization of nonsuperhighway "connecting" or "access" highways extending between the authorized regular service routes and the superhighways merely as incidental to the operation over the superhighways themselves. These regulations do not envision that operation over nonsuperhighway "connecting" or "access" highways shall constitute a significant portion of the total over-the-road distance traversed over the superhighway-nonsuperhighway "connecting" highway route between the point of departure from and the point of return to the underlying authorized regular service route.—Burggrabe Truck Lines, Inc. v. Beaufort Transfer, 117 M.C.C. 567 (576, 577).

As a general rule of thumb and subject to reasonable variations depending upon a particular situation, where operation over nonsuperhighway "connecting" highway or highways constitutes an over-the-road distance of more than 20 percent of the total superhighway-nonsuperhighway "connecting" highway operation between the point of departure from and the point of return to the underlying authorized regular service route, the nonsuperhighway "connecting" highway operation should be deemed to constitute a significant portion of the said total superhighway-nonsuperhighway "connecting" highway operation, and this total operation, therefore, should be considered as not falling within the permissible scope of the Superhighway Rules [117 MCC 119, 149].—Id., p. 577.

Respondent's operation between St. Louis (Mo.) and Hermann (Mo.) does fall within the permissible ambit of the Superhighway Rules, since operation over the nonsuperhighway "connecting" highway is incidental to the operation over the superhighway inasmuch as the "connecting" highway constitutes only approximately 18.7 percent of the total superhighway-nonsuperhighway "connecting" highway distance traversed between St. Louis and Hermann. Moreover, the "connecting" highway route is not less than 85 percent of the distance over the underlying authorized service route between these points. Thus the "connecting" highway route comports with the guidelines of, and may be utilized under, the "25-mile" [§1042.3(a)(1)] and "intermediate-point service" [§1042.3(b)] provisions as well as the "85-percent" [§1042.3(a) (2)] provision of the Superhighway Rules.—Id., p.577.

Petitioner, lacking the authority to serve "all intermediate points (without regard to nominal exceptions)" on its underlying certificated service route, was found not to qualify for operation under the "intermediate point service" provision of the Superhighway Rules. Petitioner's contention that his authority to serve 11 of 29 intermediate points between Louisville, Ky. on the one hand, and 23 of 41 points between Louisville, Ky. and Sharon, Ind. on the other hand, is tantamount to "all intermediate-point service", based on population, was held unjustified by the Commission. "Nominal exceptions", therefore, refers to intermediate points as such rather than to population figures.—Lafayette, Ind., Superhighway Operations, 117 M.C.C. 660 (662, 667).

Since one-third of petitioner's operation between Indianapolis, Ind. and Sharon, Ind. involves the utilization of connecting nonsuperhighways, constituting a significant portion of the total over-the-road distance traversed between the points of departure from and return to the authorized regular service route, such operation is not within the scope of and may not be performed under any provisions of the Superhighway Rules.—Id. p. (666).

Since defendants' operations involved utilization of nonsuperhighway "connecting" highways which constitute a significant portion (52 per cent) of the total over-the-road distance traversed between the point of departure from and the point of return to the underlying authorized regular service route, the operations are not within the scope of or may not be performed under the Superhighway Rules. Defendants were therefore in violation of §§203(c) and 206(a) (1) of the Act; cease and desist order entered.—Great Lakes Exp. Co. v. National Transit, 117 M.C.C. 735 (744-45).

5. Regulations governing.—[Vols. 19, 21].—The requirement under the "25-mile" rule of the Superhighway Rules that the superhighway route (including the highways connecting such superhighway route with the carrier's authorized underlying regular service route) between the point of departure from and the point of return to the carrier's authorized underlying service be "wholly within 25 airline-miles of the authorized regular service route" means that every point on the superhighway route must be within 25 airline-miles of the authorized service route, and, at the same time, every point on the authorized service route must be within 25 airline-miles of the superhighway route.—Property Motor Carrier Superhighway Rules, 117 M.C.C. 119 (150).

The "intermediate-point service" provision under the "25-mile" rule of the Superhighway Rules is not to be construed to permit a carrier to serve points within a 50 mile radius of the superhighway (25 miles on each side), either separately, or in conjunction with the other provisions of the "25-mile" rule. The "25-mile" rule is limited by the very terms of the "intermediate-point service" provision to points which are on and within 1 airline-mile of the superhighway (and "connecting" highway).—Id., pp. 150-51.

Inasmuch as the implied authorization under the "intermediate-point service" provision of the Superhighway Rules to serve points on the superhighway and connecting highways is specific in nature, service is permitted at all portions of the commercial zones of such "on highway" points, including those portions of the commercial zones of such points which extend beyond 1 airline-mile of the superhighway and connecting highways. The authorization to serve points within 1 airline-mile of the superhighway and connecting highways represents, in part, an acknowledgment that superhighways are often constructed around rather than through major traffic centers, and that in many instances an "on superhighway" authorization would fail to confer effective operating rights.—Id., p. 150.

7. Destructive competition.—It is the complaining carriers' burden, under the "destructive competition" provision of the Superhighway Rules (49 CFR 1042.3), to establish affirmatively that their services have been, or are reasonably certain to be, materially adversely affected by operations of competing carriers conducted pursuant to such rules. Such a showing is not made where, as in the instant proceeding, the complainants merely make general allegations of destructive competition unsupported by specific probative evidence.—Burggrabe Truck Lines, Inc. v. Beaufort Transfer, 117 M.C.C. 567 (578).

Regulations of the Commission

34 FR 18459, Nov. 20, 1969, Part 1042: Superhighway and Deviation Rules. Entire Part 1042 (Deviation Rules) revised, and title thereof changed, effective Dec. 15, 1969.

35 FR 17264, Nov. 10, 1970, Part 1060: new Part 1060 Special Relief for Motor Carriers Affected by a Temporary Highway Closing, §1060.1 Special relief for motor carriers affected by temporary closing of West Virginia Highway 2, added, effective upon publication in the Federal Register.

Section 208. (c) [*§308(c) U.S.C.*] Transportation of special or chartered parties.—[Unchanged. See vol. 21, p. 17418.]

Notes of Decisions

Volume 10—p.8024; Volume 11—p. 9452; Volume 12—p. 10404; Volume 13—p. 11080; Volume 14—p. 11601; Volume 15—p. 12207; Volume 16—p. 12857; Volume 17—p. 13556; Volume 18—p. 14465; Volume 19—p. 15733; Volume 21—p. 17418.

1. Construction and interpretation.—[Vols. 10-19, 21].—Although passenger carrier's application for extension of its authority was not accompanied by the full $200 filing fee required when it reached the Commission on Dec. 19, 1966, and the remainder of the fee was transmitted after Jan. 1, 1967, it was within the Commission's power to regard the application as filed before Jan. 1, 1967, within the meaning of 1966 amendment of §208(c) which limits the automatic grant of charter rights to applications filed "on or before January 1, 1967."—Blue Bird Coach Lines, Inc. v. United States, 328 F. Supp. 1331 (1333)*.

In view of the rationale of 76 MCC 215, applicants' regular route authority to serve New York City does not authorize it to provide charter service under §208(c) to and from points on Long Island in Suffolk and Nassau Counties. Therefore, applicants' motion to dismiss their pending applications for such additional authority is based on the erroneous presumption that such charter rights are incidental to their present authority and is denied.—Greyhound Corp. Extension, 98 M.C.C. 712 (726)*.

No incidental charter rights accrue under provisions of §208(c) of the Act to carriers restricted to performance of special operations; therefore, Salem may not perform charter operations between McGuire Air Force Base in Wrightstown, N.J., and John F. Kennedy International Airport, in New York, N.Y., under its present authority, which, while authorizing transportation between these points, is limited to special operations in non-scheduled door-to-door service of not more than eight passengers. Thus, Salem's transportation of airplane crews under charges assessed and based on the use of a vehicle as a unit, without regard to the number of passengers transported, constitutes unauthorized charter operations.—Salem Transp. Co. Inc., 100 M.C.C. 373 (374, 381).

Although protestant can perform charter operations incidental to its regular route operations, it may not tack this authority to a specific round trip charter authority limited to operations beginning and ending in a specified county not within the territory served by its regular routes because tacking by definition requires a common point of service between the two authorities.—Harry Lee Eyre, Jr.—Extension, 106 M.C.C. 851 (858-59).

Commission issued a new certificate authorizing operation for which applicant has shown need. Such issuance is made to prevent any doubt concerning applicant's incidental charter rights and to insure that applicant will provide continuous and adequate limousine service under its existing certificates. Authority granted upon condition that it cannot be severed by sale or otherwise from applicant's existing corresponding authority.—Connecticut Limousine Service, Inc., Modification, 110 M.C.C. 830 (838).

The establishment and protection of regular-route motorbus industry is of primary importance to national transportation. This must be kept foremost in mind in proceedings involving special operations as special operator could, under guise of tour service, poach in field of regular-route transportation. "Tour service" may be differentiated from other forms of special operations by accessorial services which tour operators perform, as indicated herein. Commission rejected proposed limitations on "tour" service since to require now that specific accessorial features be included in each tour would intrude on operator's business prerogatives; would prevent creativity and flexibility necessary to attract patrons; and would tend to promote unsound business practices thus raising the cost of tour service to the public.—Passenger Transportation in Special Operations, 112 M.C.C. 160 (172-73).

Section 208(c) of the Act found not to require suspension of underlying regular route authority as a prerequisite for suspension of incidental charter authority.—Federal Highway Admin. v. Safeway Trails, Inc., 113 M.C.C. 815 (828-30).

Commission prescribed regulations limiting smoking on interstate buses engaged in regular route, special operations to a maximum of 20 of the total seating capacity of such buses as smoking was found to be a substantial nuisance and a possible health hazard.—Smoking on Interstate Buses, 114 M.C.C. 256 (264-7).

3. Definitions.—[Vols. 11-19, 21].—Notwithstanding apparently contrary conclusions in 47 MCC 737, the provision of a vehicle for the exclusive use of the group which hires it, and charging a flat rate per vehicle vis-a-vis a per-passenger rate, are not sufficient to make the operation a "charter". To determine whether a particular group is sufficiently cohesive to be lawfully transported by a carrier holding charter authority the community of interest standard is applied See 100 MCC 453.—Airfield Service Co. Ext.—Charter Operations, 117 M.C.C. 165 (169-170)*.

Applicant's proposal constitutes a special operation because, although its operations will usually be over the same route, no schedules will be published and the other attributes of a regular route service are not present.—Transportes Hispanos, Inc., Com. Car. Applic., 117 M.C.C. 894 (897)*.

Charter operation: In view of "charter party" definition in regulations governing transportation of special or charter parties under §208(c), a true chartered party must have a community of interest, i.e., a common purpose other than a desire for transportation. Record in Commission case, involving alleged unlawful operations by broker who arranged for, and carriers who provided, transportation of passengers on a per capita fare basis, shows that no community of interest existed among passengers on considered trips from Milwaukee, Wis., to Sportsman's Park near Chicago; broker advertised the trips as available to individuals, with no mention of group activity or offer of significant nontransportation features; and that individual tickets were in fact sold. Also, assuming that bona fide charter parties were formed for the trips, there is substantial evidence, unrebutted by plaintiffs (defendants in Commission case), that such charter operations violated the regulations because the frequency thereof made them regular scheduled or non-scheduled services. Commission ruling that providing such service without authority was unlawful, sustained.—Travel & Tour Service, Inc. v. United States, 302 F. Supp. 188 (191-3)*.

As applicant's charges for transportation in nonexempt taxicab service between New Jersey military bases and New York City and Philadelphia are based on use of entire vehicle at a fixed rate per mile, and would entitle the individual or group traveling to exclusive use of the vehicle furnished, the operation is charter service where the traveling party is formed independently of the carrier.—D & M Taxi Co., Inc., 96 M.C.C. 439 (447).

Charter service, as distinguished from special operations, is characterized by existence of a collective contract or charter for the exclusive use of the vehicle by a complete, cohesive, homogeneous group organized by someone other than the carrier. Authority requested by applicant to conduct chartered passenger operations, wherein it would provide service basically for existing groups but would sell individual tickets, either to fill the chartered bus and thus render the operation profitable, or to provide a convenient method of collecting money for a particular trip, would create an anomalous, hybrid type of service that would be confusing to the public and difficult to police, and which would utterly destroy the distinction between special and charter operations. For the sake of public, private, and administrative interests such a proposal must be rejected.—Arrow Stage Lines, Inc., Investigation and Revocation, 96 M.C.C. 572 (578, 579).

The test of a valid bona fide charter group is that it be pre-formed and have a common purpose and a community of interest for at least the duration of the trip and the nontransportation group activities related thereto and facilitated thereby; hence a group of prospective purchasers transported to a cooperative-ownership community are members of a charter group since they are motivated by the participation of the group in a tour of the town with an eye to possible residence rather than just a desire for transportation. Since the community is a social and recreational world of its own shared by residents of like mind, the decision to purchase may well rest on the individual members' estimation of the group as prospective neighbors; thus it is not in the same class as a casual shopping tour, where the group tends to dissolve except during the actual transportation, and the identity of members of the group has substantially less importance after the destination is reached.—Suburban Transit Corp.—Contract Carrier Application, 106 M.C.C. 763 (768-69).

Special operation: See also Archambault case, no. 10, below.

In suit to set aside Commission order granting defendant carrier authority to conduct irregular-route special operations in round-trip transportation of passengers (not more than nine in one car) commuting to and from work, plaintiffs' reasoning that the Commission has no authority to classify regular commuter transportation as "special operations," would unduly restrict the Commission's classification under the statute. As the courts and the Commission have held, the phase "special or charter operations" used in the statute is a "catchall" category; also, it does not necessarily follow, because an operation may appropriately be designated as "special," that it may not also possess many characteristics of an "ordinary regular-route operation" The Commission's broad statutory discretion to decide that a particular service is a special operation need only be exercised rationally; in case under review, it met that standard by validly differentiating defendant carrier's service from that offered by plaintiffs. Grant of "special operations" authority sustained.—Hudson Transit Lines, Inc. v. United States, 314 F. Supp. 197 (201-2)*.

In applicant's nonexempt taxicab service between New Jersey military bases and New York City and Philadelphia airports, groups which it transports are normally organized by its own personnel and it is obvious that their primary if not sole purpose is to obtain transportation. As carrier's activities in formation of traveling parties violate established charter concepts, its service to that extent falls in category of special operations.—D & M Taxi Co., Inc., 96 M.C.C. 439 (446).

Special operations include the various kinds of operation which are neither charter service nor the usual operations of ordinary regular-route common carriers of passengers, and involve the sale of tickets by the carrier to each individual passenger. The most common of authorized special operations is that in provision of round-trip sightseeing or pleasure tours. Such operations differ from normal regular-route passenger operations in being designed especially to meet the needs of individual sightseers or tourists, and not to serve persons requiring expeditious service between particular points.—Arrow Stage Lines, Inc., Investigation and Revocation, 96 M.C.C. 572 (578-9).

Proposed operations involving a flexible, non-scheduled door-to-door operation, in vehicles of limited capacity, operated on an on-call, reservation basis, over irregular routes found on further consideration by the Commission to be those of a "special operation."—Arrow Line, Inc., Extension—Limousine Service, 103 M.C.C. 195 (196)*.

Commission granted authority sought herein as proposed limousine service between Fort Lee, N.J. and New York, N.Y. is shown to be a nonscheduled, specialized, door-to-door operation rendered at rates that are substantially higher than those of protestants. Proposed service will not adversely affect protestants' operations because supporting public witnesses are not regular bus riders, are willing to pay higher rates, and show a need for the proposed service.—Horizon Limousine Service, Inc., Com. Car. Applic., 111 M.C.C. 1 (5-7)*.

Commission herein affirmed its definition of special operations as previously set forth in 62 MCC 731 and 100 MCC 432 as a "catchall" classification covering a service not designated as ordinary regular route or charter operation and which is not bare expeditious point-to-point service.—Passenger Transportation in Special Operations, 112 M.C.C. 160 (173).

Pursuant to 62 MCC 802, the requirement that an all-expense or package "tour" include "something substantial" in addition to bare expeditious transportation between two points is not satisfied by the inclusion of box lunches, refreshments, free parking, and admission to the entertainment objective of the tour.—Chieppo Petition for Modification of Certificate, 117 M.C.C. 358 (371, 378)*.

4. Evidence.—[Vols. 14, 17-19, 21].—The phrase "convenience and necessity" implies more than mere adequacy or availability of agencies by which a traveler can be conveyed from one point to another, without regard to special and distinguishing characteristics of the service afforded, and to find that such characteristics are without probative value in applications would have a stifling effect upon carrier initiative and would greatly reduce incentive for development of new and improved types of service. However, it must be emphasized that the mere introduction by an applicant of deluxe equipment and service features not provided by existing passenger carriers is not sufficient to establish a basis for new authority apart from a showing that such features are proposed to meet a public demand or need which existing carriers have shown themselves unwilling or unable to meet.—American Buslines, Inc., Extension, 99 M.C.C. 506 (512).

While a portion of proposed operations concern the exempt transportation of school-children, nonexempt operations are also proposed for which appropriate authority is necessary. And since the evidence fails to establish that present or future public convenience and necessity require proposed charter operations, authorization of new service, competitive with existing service, is not warranted. Denied.—Pat & Gordon, 102 M.C.C. 553 (559).

Revenues from incidental charter operations are an important part of a carrier's total revenues and are entitled to the same consideration as certificate rights in the preservation of carrier's ability to serve the public. Protestant is not required to prove its regular route operations radiating out of a particular point are profitable. Application denied.—Everett Charter System, Inc., Com. Car. Applic., 111 M.C.C. 214 (216)*.

Applicant, in support of its contention that the proposed service is required by the public convenience and necessity, relied almost exclusively on past operations assertedly performed under the mistaken belief that they were exempt. No user testimony was adduced, and the supporting witnesses—five airlines and an airport facilities operator—merely refer requests for service to applicant. Application denied.—Airfield Service Co. Ext.—Charter Operations, 117 M.C.C. 165 (169)*.

10. Special or charter party operations.—[Vols. 10-12, 14-19, 21].—Since bus line seeking to set aside Commission order, which required plaintiffs (defendants in Commission case) to cease and desist from operations found unlawful, holds no specific authority to operate between Milwaukee, Wis., and Sportsman's Park near Chicago, its common-carrier passenger operation between those points is prohibited by the Act unless charter-party transportation, permitted by §208(c), is involved. The Commission ruled that considered transportation of passengers on an individual per capita fare basis, without proper authority, violated the statute and the regulations governing special or charter parties because no agent for a collected group of patrons (whose only community of interest was attending a racing meet) arranged for the trips, the transportation was arranged for before a group was formed and it was afforded so frequently as to constitute regular scheduled or nonscheduled service. Crucial Commission findings on the issue of lawfulness of such operations are supported by substantial evidence and the record shows no error of law; complaint dismissed.—Travel & Tour Service, Inc. v. United States, 302 F. Supp. 188 (191-2, 193)*.

Charter or special operations established under the incidental authority of §208(c) are entitled to the same degree of protection against new competitive service, such as would result from purchase and reactivation by vendee of a vendor's dormant certificated charter rights, as is afforded operations established under rights conferred by a certificate, and it is immaterial that carriers are not obligated to provide charter service under the provisions of §208(c).—Eagle Charter Bus Service, Inc.—Purchase—Eagle Bus Lines, 93 M.C.C. 705 (709).

Contention of applicant, holding authority to operate in charter service, that any of considered past unlawful operations arose from the "narrow thread" distinguishing charter operations from special operations, cannot justify the past unlawful activities and practices described. While the original "grandfather" certificate of applicant's predecessor authorized special or charter service, it was amended by the Commission to its present form more than 10 years before it was transferred to applicant. The certificate is clear on its face and applicant has not sought correction or modification thereof; thus, its claim that there was some basis for its past activities is inconsistent with its argument concerning the veil of legality surrounding those activities. To authorize additional authority sought would, in effect, condone past acts and encourage unlawful operations on a broader scale. Record is conclusive that applicant is not fit to receive authority sought; denied.—S & S Bus Service, Inc., 95 M.C.C. 796 (799, 800, 802-3)*.

As passengers transported by applicant in nonexempt taxicab service, under license issued by Department of Defense, between Fort Dix and McGuire Air Force Base, N.J., and New York City, Philadelphia, and airports in or adjacent thereto consist almost entirely of transient military personnel, applicant should be afforded the widest latitude in fulfilling its agreements with the military establishment. Therefore, authority is granted for both special and charter operations over irregular route.—D & M Taxi Co., Inc., 96 M.C.C. 439 (442, 447).

As protestants collectively are authorized to provide regular-route service at, and incidental charter service from, the major population centers of 9 of 15 Iowa or Nebraska counties where from applicant seeks charter authority, and no unwillingness or inability on their part to meet the reasonable charter transportation requirements of the traveling public in those areas is shown, no new charter service that would infringe upon protestants' operating rights should be authorized. And while the remaining 6 counties apparently have no charter service available, none appears to be needed, as the territory encompassing those counties is sparsely populated and no representative of a cohesive, homogeneous group from that area supported the application. Accordingly the authority sought for charter service must be denied.—Arrow Stage Lines, Inc., Investigation and Revocation, 96 M.C.C. 572 (579-80).

Nor is there any justification for a grant of special-operations authority from the 15-county area to points in the United States and ports of entry on the Canadian boundary. Supporting testimony is either highly speculative and vague or indicates merely a desire for charter service with the attendant convenience of the carrier itself collecting the money from each individual and soliciting additional customers to fill the bus. The type of special operations proposed, involving a broad territorial grant without limitation to specific events or provision of substantial accessorial services in addition to the transportation offered, would unduly encroach on services normally provided by regular-route passenger carriers and therefore would be contrary to public interest and the national transportation policy.—Id., p. 580.

However, numerous supporting witnesses desire special round-trip tour services to the New York World's Fair similar to those previously provided by applicant to the World's Fair at Seattle. As those witnesses do not comprise a complete and cohesive group, but most of them reside in Norfolk, Nebr., or communities in reasonable proximity thereto, and protestants are not authorized to perform special round-trip tour operations from that area, nor does it appear that such service will be made available through their affiliated brokers, authority is granted applicant to conduct special round-trip tour operations solely from Norfolk to the New York World's Fair for such period in 1965 as the Fair is open to the public.—Id., p. 580.

Since proposed motor "tour" service is conducted pursuant to common arrangements with a regulated multi-State water carrier, which assembles the "tour" group and charges one fare for lunch, round-trip boat transportation, and applicant's bus transportation on Long Island, N.Y., it is a "special operation". And, although applicant has participated in providing such through transportation as a connecting carrier without appropriate authority, these tours have generated much public support, and a service such as applicant provided in the past is required if these tours are to be offered in the future. Therefore, since none of the protesting motor carriers can provide considered service and since applicant's past operations appear to have been conducted pursuant to an honest misunderstanding of the law, appropriate authority granted.—Archambault, 99 M.C.C. 535 (538-40).

In view of protestant's authorized operations and insufficient evidence of record, applicant has failed to show that a public need exists for proposed extension of its special operations authority and/or for elimination of the seasonal restriction in its existing authority. No witnesses indicate a desire to travel to considered area at any time when applicant could not accommodate them under its present seasonably restricted authority and testimony as to other areas (specifically Florida, New Orleans and the west coast) is "vague" or of a "wishful variety." The report also expresses concern over applicant's dual status as a broker and common carrier, which apparently has created a situation where applicant as a broker has failed to exercise proper discretion and independent action in awarding or allocating traffic and where preferential treatment to neglect of other common carriers has resulted. Denied.—The Gray Line, Inc., Extension, 102 M.C.C. 519 (525-6).

Proposed operations include such features as lodging, meals, tips, baggage handling, and admission to points of interest in addition to the transportation service performed; therefore, application contemplates something more than bare expeditious, point-to-point transportation and is consistent with Commission's view of what constitutes sightseeing and pleasure tour operations, citing 62 MCC 731. "Special operations" authority granted, but jurisdiction retained so that limitations may be imposed if necessary in light of decision in Ex Parte No. MC-29 (Sub-No. 1).—Eastern Massachusetts S. Ry. Co. Ext.—Tours, 103 M.C.C. 126 (129).

Applicant's proposed transportation of assembled, and preformed, groups of passengers between certain California points and location of six supporting casinos in Reno-Lake Tahoe, Nev., area, over regular and irregular routes and under flexible schedules designed to accommodate the casinos' various activities, found to be in the nature of a common carrier service similar to that provided in special or charter operations, rather than contract carriage, when proposed service would be held out to an indeterminate number of casino patrons solicited from the general public for each trip. Proposal corresponds to the type of service most appropriately covered by a grant of special operations authority, to the extent that individuals assembled into groups would be transported. However, under special operations authority alone, bona fide charter groups—also envisioned by the proposal—could not be transported; therefore, to provide for that segment of California patrons of supporting casinos, applicant is granted authority to provide special and charter party service.—Gray Line Scenic Tours, Inc., 103 M.C.C. 807 (816-8)*.

Authority granted applicant to transport, in charter operations, airline crews between specified airports and New York, N.Y., and Philadelphia, Pa. The evidence establishes that flight crews will use applicant's proposed on-call service, involving transportation in 11-passenger vehicles, between considered areas and that the supporting air carriers and crew members desire single-vehicle transportation of each crew in order to avoid separation of crew members and possible jeopardy of confidential papers and equipment, and while authority to transport a particular class of passengers is uncommon, exceptions exist, especially in the case of special and charter operations where a limited need for service has been established and the limitation can be enforced.—Salem Transp. Co. Inc., Ext.—Charter Operations, 106 M.C.C. 225 (231-2)*.

The fact that applicant operates daily with regularly scheduled departure hours does not forstall designating as "special operations" its transportation, over irregular routes, of groups of passengers in proposed commuter service by automobile.—Monarch Associates, Inc., 107 M.C.C. 277 (286)*.

Four applicants sought similar authority to transport passengers and their baggage, in special operations, beginning and ending at points in Westchester County, N.Y. and extending to points in the United States. The evidence of record indicates that the potential tour patronage from Westchester County would support the operations of only one applicant. When the number of applicants exceeds the number of carriers for which there is a need for service, we are required to evaluate the applicants and to choose which of them should be granted operating authority. Priority in time of filing similar applications, although of pertinent consideration at times, does not justify the granting of the first filed application where as here, there exists other factors weighing against this result. Manhattan (one of the four applicants) proposes to pickup and discharge passengers at those points which are most convenient for the majority of patrons of a particular tour. There is no indication that any of the other applicants are able to offer such an extensive tour service. Manhattan's proposed service will adequately provide the needed service and will alleviate the present inconvenience experienced by some tour patrons who must arrange their own transportation to and from other tour origin and termination points.—Manhattan Transit Co. Ext.—Special Operations Westchester County, N.Y., 108 M.C.C. 763 (764, 770, 771).

Applicant's proposal to transport passengers having a prior or subsequent movement by air between O'Hare International Airport at Chicago, Ill., and Wisconsin points was denied because applicant's supporting evidence consists primarily of speculation and conjecture necessitating the conclusion that applicant has failed to bear its evidentiary burden. Despite the absence of opposition, an applicant must satisfy such a burden. See 100 MCC 50.—Tri-State Coach Lines, Com. Car. Applic., 110 M.C.C. 601 (608-9).

Where applicant and affiliated broker may already perform substantially the same service under combination broker-charter authority, application for special operations authority granted upon proof that (a) applicant is participating in substantial lawful operations within the territory sought to be served, (b) that some benefit will accrue to applicant in the form of more economical or efficient operation, but (c) that any such benefit will not be so great as to amount to the institution of a new service, not previously available, and competitive with existing services. Further, any such grant of special operations authority will be conditioned upon receipt of request for cancellation of that portion of the affiliate's broker license which duplicates authority granted here. The latter condition is imposed in conformity with established Commission policy not to grant authority to allow a carrier to perform operations that may already be performed under existing laws or regulations.—Greyhound Lines, Inc., Ext.—Special Operations, 115 M.C.C. 82 (89, 90).

15. Applicability of rules.—[Vols. 11, 12, 18, 19, 21].—See also Mohawk Coach Lines, Inc., Interpretation, at §208(c), n. 16; and Salem Transp. Co. v. United States, at §208(a), n. 30.

Charter rights that are incidental to common carrier authority and which have been conferred by operation of law without additional proof of need are not severable from underlying regular routes, and thus are distinguishable from specific charter authority issued upon proof either of need or of past "grandfather" operations. The benefits of §208(c) do not accrue unless the carrier is actually performing interstate regular route operations as authorized by its certificate.—Estacada-Molala Stages, Inc.—Revocation of Certif., 118 M.C.C. 115 (123).

16. Origins.—[Vols. 11-16, 18, 19, 21].—Petitioner is authorized to perform incidental charter operations from only a few points in Westchester County, despite rule 111(2) [established in 29 MCC 25, amended 48 MCC 521] that a common carrier may "originate * * * (charter parties) within the territory served by its regular route." This rule is not susceptible of application with mathematical precision; factors considered include the terrain, density of population, proximity to other highways, operations of competing carriers and their ability to perform such service. Since the intent is to authorize operations incidental to or supplementary of regular-route service, there must be a mutuality between the two; mutuality is lacking, however, where persons in the area sought to be served in charter operations are unlikely to rely upon or use the regular-route service of the carrier in travelling to or from that area. Thus, except for along a small portion of petitioner's route, traversing the extreme northwest corner of Westchester County, petitioner does not have authority to provide considered service.—Mohawk Coach Lines, Inc., Interpretation, 103 M.C.C. 758(760-2).

The Commission has never established specific limits for the phrase "within the territory," as used in its regulations governing the origin territory of special or charter operations; exact limits must be considered individually. And under circumstances of record defendant may originate charter service from points within 18 miles of its Evansville, Ind., to Henderson, Ky., regular route, since the area along this route is not densely populated and since area residents depend on its charter service. Furthermore, since Camp Breckinridge is within considered territory and since there is an economic relationship between the camp and Henderson, it is proper for defendant to originate charter service from Camp Breckinridge. Complainant's contention that, since the camp (a service point on its regular route) is solely within its origin territory, it cannot be within defendant's origin territory, is erroneous; the mere fact a point is on one carrier's regular route does not preclude a finding that such point is not within origin territory of another carrier's charter-party operations.—Greyhound Lines, Inc. v. Evansville & O. V. Ry. Co., Inc., 105 M.C.C. 376 (378-9).

Regulations of the Commission

39 FR 11191, Mar. 26, 1974, Part 1061: Limitation of Smoking on Interstate Passenger Carrier Vehicles. Effective date of order of Nov. 8, 1971, as to Smoking on Interstate Buses, fixed as April 22, 1974.

39 FR 14596, April 25, 1974, Part 1061: Limitation of Smoking on Interstate Passenger Carrier Vehicles. Petition for reopening of this proceeding denied.

Section 208. (d) [*§308(d) U.S.C.*] Transportation of baggage, newspapers, express, or mail.—[Unchanged. See vol. 10,p. 8028.]

Historical Note, vol. 17—p. 13557.

Notes of Decisions

Volume 10—p. 8028; Volume 11—p. 9459; Volume 12—p. 10406; Volume 13—p. 11080; Volume 14—p. 11602; Volume 15—p. 12208; Volume 17—p. 13557; Volume 18—p. 14469; Volume 19—p. 15737; Volume 21—p. 17426.

1. Construction and interpretation.—[Vols. 10-15, 17-19, 21].—Commission herein prescribed tentative regulations requiring interstate bus operators to provide clear and adequate public notice as to their free allowance on the valuation of baggage and all procedures and charges required for valuation of baggage in excess of their free allowance. Carriers are also required to provide adequate opportunity and facilities for passengers to ensure proper valuation of their baggage.—Limitation of Free Baggage Allowance—Greyhound, 114 M.C.C. 56 (63-5).

Commission adopted regulations requiring motorbus operators to post conspicuous public notice as to baggage liability procedures at specified points and to permit the declaration of baggage value in excess of the free allowance limitations, during specified time periods, at baggage counters and the side of the bus. Commission also instituted an investigation into the adequacy of the existing free baggage allowance limitation.—Limitation of Free Baggage Allowance—Greyhound, 115 M.C.C. 566 (572-77)*.

10. Property, mail etc., transported with passengers.—[Vols. 10-12, 14, 18, 19].—The primary duty of a motor carrier of passengers is to its passengers,and any transportation of property must be subordinated to their interests. Passengers carriers' authority to transport express is limited by their certificates to transportation in same vehicles with passengers, which impliedly limits their transportation of express to shipments which can be carried without disturbing the comfort and convenience of passengers or interfering with the essential qualities of common-carrier passenger service. Transportation of property by a passenger motor carrier is a special service, distinctly different from that provided by an ordinary motor carrier of property, for which commensurate compensation is required.—Continental Dispatch, Inc., 95 M.C.C. 483 (491-2).

Section 209. [*§309(a) U.S.C.*] Contract carriers by motor vehicle.—(a) (1)—(3) Permit essential to operate; carriers in bona fide operation on July 1, 1935; laws relating to national parks and monuments unaffected; traffic moving to and from Territories and possessions; "grandfather" provisions.—[Unchanged. See vol. 10, p. 8031, vol. 15, p. 12208.]

Amendments, see footnotes, vol. 10, p. 8031, vol. 15, p. 12209.

Notes of Decisions

Volume 10—p. 8032; Volume 11—p. 9459; Volume 12—p. 10406; Volume 13—p. 11081; Volume 14—p. 11602; Volume 15—p. 12210; Volume 16—p. 12859; Volume 17—p. 13558; Volume 18—p. 14469; Volume 19—p. 15738; Volume 21—p. 17427.

1. Construction and interpretation.—[Vols. 10-12, 14-19].—Permit issued to a motor carrier constitutes formal determination of public need for motor transportation, regardless of the availability of other modes and authorizes holder to engage in for-hire transportation by motor vehicle, not by rail or other modes, on the public highway. Motor carriers must perform their authorized services by motor vehicle unless shipment by other modes is permitted by some specific statutory exception.—Atchison, T. & S. F. Ry. Co. v. United States, 244 F. Supp. 955 (955)*.

That a contract carrier utilized the services of a broker, dealer, and agent not authorized by its permit does not constitute unlawful operation, so long as the carrier entered into a contract only with the shipper named in its permit, did so to serve a purpose of the contracting shipper, and the contracting shipper guaranteed payment of freight charges.—P.C.M. Trucking, Inc., Extension—Allentown, Pa., 117 M.C.C. 201 (206)*.

Control of shipments is determined by payment of freight charges and routing of traffic, among other less significant factors, but if both of these criteria are met, then it can reasonably be found that such a shipper controls the shipment in question. A person who does not control the routing of a shipment is not such a shipper, even though it may pay the transportation charges either directly or ultimately, and a contract carrier under contract with such a person could not transport such a shipment. Therefore, evidence that a shipper does not control the routing of a shipment is usually sufficient to rebut the presumption emanating from its payment of the transportation freight charges.—Administrative Ruling No. 76, 117 M.C.C. 433 (441-2).

If a consignee controls the selection of carriers and the routing of the shipment, it controls the shipment whether such transportation is prepaid or collect. However, the mere request by a contracting shipper that a noncontracting shipper, who controls the selection of motor carriers, accommodate it by utilizing the services of a specific motor carrier does not convert control of the transportation to the contracting shipper. The determination that this is so does not modify existing business or carrier practices in any significant manner. Rather, that determination merely serves to clarify a situation which appears to have caused considerable confusion among contracting shippers and carriers. The Minnehan rule [that payment by a consignor does not automatically qualify him as the actual shipper of the traffic] effectively terminated the negative aspects of the payment-control situation. This presumption is still valid but can be rebutted by evidence relating to selection of the carrier and the routing of the shipment.—Id., p.442.

5. Contract carrier, in general; definitions.—[Vols. 10, 15, 16, 18, 19, 21].—A prerequisite of contract carriage is existence of contract between carrier and shipper; such contract must be bilateral and impose specific obligations upon carrier and shipper. In addition, considered contract may be with any person who contracts with carrier and pays transportation charges or is responsible for payment of transportation charges. Consequently, it is clear that there can be no valid contract between applicant and its parent, Produce Terminal Cold Storage Company, for transportation of estimated 85-90 percent of the outbound shipments owned by customers who both pay transportation charge and select carrier.—Produce Terminal Trucking Co. Contract Carrier Applic., 100 M.C.C. 695 (698-99).

The remaining 10 to 15 percent of affected outbound shipments are also owned by customers who have power to select carrier and ultimately pay transportation charge. Evidence does not indicate that Storage Company is obligated by agreement with its customers to designate carrier on these shipments, but merely that it does name the carrier if requested, or if the customer fails to do so. It is doubtful, therefore, whether Storage Company could contract with applicant for transportation of this traffic.—Id., p. 699.

However, assuming that Storage Company is a "shipper" within Commission's requirements as to shipments on which it names carrier, a permit still should not be issued. Ordinarily fact applicant is a wholly-owned subsidiary of shipper does not affect contract carrier relationship; but, as in 52 MCC 772, where opportunity for favoritism, discrimination, and unfair competitive practices is present, a grant of authority should be precluded. Accordingly, proposed service is inconsistent with public interest and national transportation policy. Denied.—Id., pp. 699-701.

Grant of general-commodity authority to contract carriers will not lead to a blurring of the distinction between common and contract carriage, and open the way for applicants to acquire additional shippers and subsequently convert to common carriage. Proof required of a contract carrier differs from that required of common carriers in that its ability to meet the §209(b) criteria must be demonstrated; moreover, §209(b) authorizes the imposition of conditions as to service and, since the 1957 amendment, the Commission has consistently limited the service to be performed to the shipper or shippers to be served, and the number of contracts is accordingly limited. Instant record indicates that applicants in consolidated proceedings are, in effect, "house carriers" for the supporting shipper; furthermore, since the Commission would closely examine applicants' future attempts to serve additional shippers, a common-carrier type of service could not be offered under the permits sought. Proposed contract carriage of general commodities, with exceptions, for the shipper named, subject to certain restrictions, found to be consistent with public interest and the national policy; granted.—Gypsum Haulage, Inc., Extension, 108 M.C.C. 314 (322-3, 326-8).

Proposed service found to be contract carriage as applicant assigns a specific driver and vehicle, to be used by a designated contracting shipper on a specific day, each week. Such assignment constitutes dedication of equipment to the exclusive use of a shipper for the shipper's distinct needs.—Luper Transportation Co.—Petition for Amendment, 111 M.C.C. 39 (42)*.

12. Competition.—[Vols. 10-19, 21].—Since opportunity for favoritism, discrimination, and unfair competitive practices is present, grant of authority precluded because under present circumstances proposed service is inconsistent with public interest and national transportation policy. However, this result should not be construed as any reversal or modification of principle enunciated in numerous Commission decisions that a close relationship or financial affiliation between a contract carrier applicant and its supporting shipper is not, in and of itself, contrary to public interest.—Produce Terminal Trucking Co., 100 M.C.C. 695 (700-1).

Applicant's proposed direct, single-line service not found to materially adversely affect protestants' operations as protestants are authorized to serve only one destination point and evidence does not show that protestants have transported a substantial amount of the considered traffic and supporting shipper is at a competitive disadvantage due to the necessity of using joint-line transportation. Application approved.—D & G Trucking Co., Inc., Contract Carrier Application, 113 M.C.C. 883 (885-88)*.

15. Violation of Act as affecting fitness.—[Vols. 10-12, 16-19, 21].—See also Frigid Food Express, Inc., Ext.—Floor Covering, §209(a)(1), n. 27.

When a contract carrier suddenly and abruptly ceases to operate in contract carriage and within one year transforms its operations into those of a common carrier, the unauthorized conversion, not being one of gradual evolution, cannot be said to have been accomplished without the carrier having given consideration to its unlawfulness under §203. This ignorance of, or deliberate flouting of, the regulatory requirements of conversion renders applicant unfit to receive a grant of operating authority.—Contractors Cargo Co.—Extension of Operations, 96 M.C.C. 306 (316-7)*.

Although supporting shipper was convicted for violations of §203(c) of the Act through participation in unlawful leasing arrangements, record shows shipper sought legal counsel for such unlawful actions, cooperated with Commission personnel to resolve the problem of such unlawfulness, and did cease such arrangements. In view of these factors, shipper's past unlawful arrangements should not be imputed to applicant. Applicant found otherwise fit and permit approved.—Petro Transport, Inc., Contract Carrier Application, 111 M.C.C. 68 (72-3).

19. Restriction of operation.—[Formerly n. 18; see Vols. 10-19, 21].—See also J & J Trucking Co., Inc., at n. 25 below.

Although record in proceeding in which applicant's predecessor was granted authority to provide service to and from "railheads" strongly suggests that the applicant therein contemplated only transportation of shipments having prior or subsequent rail movement, the report therein does not state that such limitation was intended. In the absence of a specific restriction to that effect, shipments transported under "railhead" authority need not move in prior or subsequent rail hauls.—Contractors Cargo Co.—Extension, 96 M.C.C. 306 (312-3)*.

Restrictions contained in the application for contract carrier authority to transport packaged petroleum products from Kansas City, Kans., to east Texas and Louisianna requiring that east Texas shipments be moved in consolidated truckloads and prohibiting transportation on the same vehicle of any of the commodity moving to points in west Texas, would limit applicant's ability to provide a complete service to shipper, would be difficult to enforce, administratively undesirable and will not be imposed.—Western Lines, Inc., Extension, 96 M.C.C. 657 (667).

Applicant's record of safety compliance is not a satisfactory one, but there are indications that it is taking appropriate steps to correct the situation. Nevertheless it is time to pursue a stricter approach to problem of safe transportation of migrant workers in order to terminate the tendency in this area of passenger transportation to "cut corners" on standards of equipment and driver compliance. Therefore, authority granted herein limited to a 2-year duration; such action is comparable to that taken to improve carrier compliance with regulations governing transportation of dangerous explosives.—Bracero Transp. Co., Inc., Extension, 100 M.C.C. 359 (366-7).

Grant of authority herein is limited to indicated New Jersey counties as evidence of record does not show any shipment moving to points in New York and shipper requires no service on inbound movements. A grant in terms of miles should be avoided (see 78 MCC 157). The grant of authority herein exceeds the scope of the application and therefore publication of such grant in the Federal Register is notice that any interested person may petition to intervene.—United States Trucking Corp., Ext.—Sugar, 111 M.C.C. 26 (35-36).

Contract carrier authority granted to transport general commodities (except in bulk), in containers and on trailers, and empty trailers and containers, restricted to prior or subsequent movement by water.—Service Transfer, Inc., Contract Carrier Application, 115 M.C.C. 29 (35).

Petitioner Mercury, a motor common carrier, contends that it was induced to withdraw its opposition to permit-holder Lawton's authority at the original hearing when Lawton and its supporting shipper restricted proposed operations against service at St. Augustine, Fla. Petitioner subsequently discovered that shipper's plant is not located at St. Augustine but near that point. However, evidence of record shows that specific location of the plant was apparently known by shipper's witness, surmised by applicant, and, especially, in view of its prior service for shipper, should have been known by protestant, inasmuch as party must be presumed to know the consequences of its actions (herein the actions of protestant's drivers acting as agents for protestant). There has been no showing of deliberate misrepresentation and petition for modification of Lawton's certificate is denied.—Lawton, Inc., Extension—Foodstuffs, 118 M.C.C. 882 (886-90)*.

24. Proceeding remanded.—[Vols. 19, 21].—See also Mercury Motor Exp., Inc. v. United States, §17(6), n. 10.

Though the scope of judicial review is limited, Commission decision denying plaintiff's application for a permit must be reversed when, with one exception, evidence of record does not support its conclusion that applicant failed to show that proposed operation would be consistent with the public interest and the national transportation policy. No substantial evidence supports the Commission's finding that plaintiff (applicant) failed to satisfy requirements of any of the five criteria which §209(b) directs it to consider in determining whether issuance of a permit would be consistent with public interest, except as to findings on fourth criterion (effect of denying application, and while there is evidence to support the findings on the fourth criterion, those findings are neither complete nor correct. Considered in light of principal reasons given therefor, the record fails to disclose substantial evidence to support the Commission's findings, except for the fourth criterion; decision reversed and cause remanded for further proceedings consistent with the courts opinion.—Continental Contract Carrier Corp. v. United States, 311 F. Supp. 390 (393-7, 398)*.

Following remand by the District Court, the Commission on further consideration discussed applicant's proposed operations in light of the §209(b) criteria after finding them to be within the "exclusive use" definition of contract carriage. Record establishes that supporting shipper requires the 4-day delivery service applicant proposes, since its motor bus manufacturing plant at Pembina, N. Dak., is limited to storing component parts for 5 buses, although designed to produce one bus each day for a 5-day week. Moreover, applicant, who presently holds no authority from the Commission, seeks to serve only this shipper to whose particular needs proposed operations are suited. And, if application is denied, shipper intends to enter into proprietary carriage operations and completely discontinue use of protestants' services. Thus, weighing and balancing the evidence, applicant has established need for proposed service. Granted.—Mid-West Truck Lines, Ltd., Contract Carrier Application, 105 M.C.C. 822 (823-5)*.

25. Necessity, demand, for service; in general.—[Vols. 10-19, 21].—See also Mid-West Truck Lines, Ltd., Contract Carrier Application case, at n. 24 above.

In action to set aside decision and order of Commission Review Board No. 3 denying plaintiff's application for contract carrier authority, the decision that issuance of the permit sought would not be consistent with the public interest and the national transportation policy was based upon adequate findings supported by substantial evidence and was in accordance with applicable law. Considerations of public interest and the national policy are many and varied and are within the special expertise of the Commission and the review board; and, while the examiner's findings and opinion might have been more explicitely stated, or might have been clarified when adopted by the board, the meaning thereof is abundantly clear when viewed as a whole, Since considered decision and the refusal to grant a further hearing was a rational exercise of administrative discretion, and no error is apparent therein, the complaint is dismissed.—Transportation Unlimited of California, Inc. v. United States, 300 F. Supp. 474 (475)*.

Record does not support the Commission's denial of authority to plaintiff to operate as a contract carrier for intervening shipper on the ground that it (applicant) failed to show that proposed operation would be consistent with the public interest and national transportation policy, in that it did not satisfy any of the five criteria which §209(b) directs the Commission to consider in determining whether a permit should be issued. With respect to the first criterion (number of shippers), the Commission should not have taken into account previously granted and pending applications relating to other shippers in considering the consistency with public interest of the particular operation for a single shipper; that other applications are pending is not relevant. If considered application should be granted, plaintiff would be serving four shippers and, while no absolute maximum has been fixed, the Commission has held that maximum number of shippers permitted is between six and eight; moreover, in 92 MCC 1, permit was granted to a carrier that served four shippers. Thus, no substantial evidence of record upholds the Commission on this point.—Continental Carrier Corp. v. United States, 311 F. Supp. 390 (393-4)*.

Nor does the record support Commission holding (on the second criterion) that plaintiff failed to establish a prima facie case and, also, did not prove it could provide better service than could protestants. Procedure on burdens of proof as to the nature of proposed service was outlined in 368 US 81 and, in light thereof, examination of plaintiff's evidence relative to distinct need and protestants' rebuttal thereof is convincing that plaintiff met its required burdens of proof. Evidence showed that shipper requires flexible, single-line, multiple pickup and delivery service with numerous stops-in-transit to serve its customers; that it could substantially reduce warehouse costs if it had such service; that plaintiff would station equipment at shipper's production plants and, also, display shipper's advertising on vehicles dedicated to its use; and that drivers used are familiar with shipper's customers and their inventories and provide specialized loading and unloading services for them. While any one of those factors standing alone might not be sufficient, taken together they show that plaintiff met its initial burden of proving distinct need; and defendant carriers' (protestants) rebuttal evidence was not sufficient to refute plaintiff's showing.—Id., pp. 394-7.

With respect to the third criterion, no substantial evidence supports the Commission's finding that protestants collectively were handling a large part of the shipper's traffic which would be subject to diversion if the application were granted. Although, throughout the proceedings opposing common carriers indicated a desire to handle all of shipper's traffic, it does not appear that they ever enjoyed that business and, on the record, the court finds no indication that there would be any diversion at all. Moreover, shipper states that if the application is denied, it will use proprietary or private carriage rather than common carriers and, while intervening carriers challenge that argument, record indicates it has made some studies relating to private carriage and, also, that prior to use of plaintiff's services under temporary authority it used a shippers' association, the costs of which would be comparable to those of private carriage.—Id., p. 397.

As to the effect which denial would have on applicant and/or shipper, the Commission did not deal with non rate-related adverse effects claimed by shipper in its express finding that no showing was made that applicant could provide service at a lower cost to shipper than could protesting common carriers; with respect to the rate-related effects, however, there was evidence of shipper's effort to obtain common-carrier commodity rates. Thus, though findings on the fourth criterion cannot be said to be complete or correct, in light of the limited scope of judicial review, there is sufficient evidence to support the Commission on that point. But the record does not support Commission findings on the fifth criterion, i.e., applicant failed to show that protestants would be unable to meet shipper's potential distribution requirements. Also, the Commission misallocated the burden of proof on that point as a matter of law; requiring applicant to show that shipper's requirements would change and, also, that common carriers could not meet those changes, puts too great a burden on applicant. Reversed and remanded for further proceedings consistent with the court's opinion.—Id., pp. 397-8.

In suit to enjoin and set aside Commission order granting defendant carrier, that had served an explosives shipper from three origins for 32 years, a permit to serve same shipper from three other origins to points in 41 of its 43 authorized States, the evidence concerning number of shippers to be served, nature of proposed service, effect that grant of the permit would have on protesting carriers and that denial would have on applicant and/or its shipper, and changing character of shipper's requirements, supported the Commission conclusion that the application should be approved. On review, the record shows that the Commission followed the five criteria which §209(b) requires it to consider; and that there is substantial evidence to support its finding as to each separate criterion and its ultimate conclusion on the application. Therefore, the Commission's decision that issuance of the permit in question would be consistent with the public interest and the national transportation policy is supported by substantial evidence; complaint dismissed.—C. I. Whitten Transfer Co. v. United States, 328 F. Supp. 1120 (1123-6)*.

Evaluating the evidence in light of the statutory criteria in §209(b), issuance of permit sought would be consistent with public interest. While protestant has provided service, under its authority to transport buildings, materials, etc., to supporting shipper of wood flooring, any resulting adverse effect on protestant is outweighed by the advantage to shipper of having a complete service commoditywise available to meet its needs at all times; additionally, record shows that protestant's service is not entirely adequate; granted, subject to condition specified.—Owens, 95 M.C.C. 586 (590-1)*.

There are no facts of record to controvert shipper's asserted need for expeditious service in the transportation of involved commodities to points in the destination territory; applicant plans the dedication of specified equipment to the exclusive use of shipper, and can render a service more responsive to the shipper's needs than those offered by protestants. In fact, shipper has found protestants' service unsatisfactory at times because of delays in the furnishing of equipment. Granted.—Bertsch, 96 M.C.C. 108 (109-110)*.

Applicant's operation would consist of multiple pickup of plumbing fixtures and air conditioners at four Eastern points and transportation of them to points in Arizona, Nevada and California under contract with a supplier of plumbing contractors. In some instances the fixtures would be stored in the shipper's western warehouses, but in other instances, as directed by shippers' customers, jobsite delivery on a house-to-house basis would have to be made during the extended construction of large housing developments. Such jobsite service is presently being handled by private carriage. Shipper's business is such that it is essential that delivering carriers be familiar with the various items for loading purposes and for house-to-house deliveries. In these circumstances, applicant has demonstrated that its proposed service is tailored to meet shipper's distinct needs.—Continental Contract Carrier Extension, 96 M.C.C. 321 (323-24, 327).

About 75 percent of considered traffic presently transported for the shipper from the East to western destinations moves by rail, and in spite of problems of time in transit, inability to perform jobsite delivery and damage claims, there would not be substantial diversion from this mode if the application were approved. Nor can motor common carrier protestants meet supporting shipper's requirements because they lack, for most part, proper equipment, and they do not have the experienced personnel necessary. Some protestants depend on interline carriers to reach shipper's destinations, but no interchange carriers were present to indicate they would make such deliveries, and no protestant would dedicate equipment to shipper's exclusive use. No diversion would exist as protestants have not been handling the considered traffic, but denial of application would mean shipper would have to continue to rely on private carriage.—Id., p. 328.

The nature of the transportation proposed is a flexible, on-call motor service, keyed to the shipper's distribution requirements in a five-State territory. In order to effect satisfactory delivery, these movements will require a number of dropoffs in transit over a broad area and a knowledge of the products being transported. Applicant proposes to keep close contact with the shipper's operations providing an integrated house carrier type service. In the circumstances, applicant has demonstrated that proposed service is tailored to meet shipper's complete distribution requirements throughout destination States; whereas, protestants have not succeeded in establishing that they are better able to meet this need. In fact, protestants' operations are so limited in territorial scope as to render their services, individually or jointly, unresponsive to shipper's transportation requirements.—Minnesota Trucking, Inc., 96 M.C.C. 330 (333).

Moreover, a denial of the application would deprive shipper of a service particularly well suited to meet its transportation needs and would lead to the continued utilization of a proprietary trucking operation which it desires to curtail. Although denial of the application would have no apparent adverse effect upon applicant which is not now an interstate carrier, the evidence does not indicate that a grant would divert any significant volume of traffic from protestants. It appears that protestants, however, have not participated in considered shipments to any great extent, and if application is denied, shipper intends to continue its private carriage operations. Granted.—Id., p. 333-4.

Though supporting shipper asserts a need for lower rates and cost of transportation must be considered in determining whether a proposed operations meets the "distinct need" test of contract carriage, applicant did not establish that the proposed service will be rendered at rates lower than those of opposing common carriers or, if so rendered, that such service is required if the involved shippers are to remain competitive with other shippers of the same commodity. No testimony established if the low rates being charged under applicant's existing temporary service would remain in effect after proposed service were authorized nor did applicant submit into evidence rates that will be charged or cost of performing proposed operation or any comparisons of rates charged by other carriers. Without evidence of this sort, it is impossible to determine if the proposed operations would be economically feasible, if a rate advantage is offered or, assuming one is, if such advantage establishes a "distinct need' for the proposed service.—Liberty Transfer., Co., Inc., Extension, 96 M.C.C. 530 (533)*.

Distinct need for contract motor carrier is shown by supporting shipper who needs carrier that will station equipment at its plant, that will employ drivers familiar with its particular products to "almost represent" it to its customers, and that will provide a single-line service to all points within the sales area of the plant.—Tractor Transport, Inc., Extension, 98 M.C.C. 335 (338).

Since protestant Graff's "paper mill materials and supplies" authority only permits transportation of those things consumed in, or necessary to, the maintenance or operation of a paper mill, including commodities used as ingredients or parts of the finished product, Graff can not provide shipper with needed flexible transportation of corrugated paper boxes. In deciding whether proposed service is needed and whether granting it is consistent with the public interest, frequently it is necessary to determine if another carrier is authorized to provide proposed service, and, while no actual order may run against this carrier, this does not diminish effect of such interpretation.—Ullery, 99 M.C.C. 86 (89-92).

Although there is a similarity in service to be provided to the supporting shipper by the common carrier applicants and C & E, as far as the carriers themselves are concerned, the degree to which each "holds out" its service is not at all similar, nor is the fact that the service could be performed by a common carrier determinative. However, although C & E's proposed service is designed to meet the "distinct need" of supporting shipper, as evidence by its current operations for the supporting shipper from another origin and by shipper's requirement for use of specialized equipment, shipper's requirements have not changed, other than the opening of a new plant site, and, therefore, extended destination territory is not warranted. Granted accordingly.—T. I. Mccormack Trucking Co., Inc., Ext., 99 M.C.C. 725 (730-1).

Since applicant's request for authority is based upon past unlawful operations, since record is silent as to nature of shipper's requirements, and since only adverse effect of denial would be that applicant could not reinstitute the operations previously performed unlawfully, applicant has failed to establish that the proposed operations will be consistent with public interest and the national transportation policy. Denied.—Aubrey Extension, 100 M.C.C. 652 (658-60).

In view of the seasonal nature of the toy business, supporting shippers' specialized needs include: (1) service on less-than-truckload shipments with multiple deliveries; (2) deliveries made upon instruction; (3) deliveries timed and scheduled as to date and hours so as to coordinate delivery with receiving departments of consignees; and (4) loading or delivery performed 7 days a week at odd hours, so that the delivery can be effected when needed or to meet any special emergency. Applicant has geared and tailored proposed service to meet these individual needs. Granted in part.—Parkway Expediters, Inc., 103 M.C.C. 411 (443-5).

In light of decision in 227 F. Supp. 730, remanding instant application proceeding to the Commission, before need for proposed service to transport house trailers can be determined, it is first necessary to distinguish between the transportation and non-transportation needs of supporting shippers. Supporting shippers' need for a carrier to condition used trailers for over-the-road movement, connect electrical and plumbing facilities, and expand and set up "expando" home trailers at their destination constitutes a need for transportation services "incidental" to the movement of house trailers from one place to another; such services are, therefore, part of the total transportation service and are to be considered in determining whether issuance of a permit is consistent with the public interest and the national transportation policy. Applicant has made the requisite showing of need for specialized transportation service on part of supporting shippers; granted accordingly.—Griffin Mobile Home Transporting Co., 103 M.C.C. 482 (500-2)*.

Evidence of record is clear that North Central Airlines, a common carrier by air operating under authority issued by the Civil Aeronautics Board, requires proposed scheduled operations between Kalamazoo Airport, Kalamazoo, Mich., and O'Hare Field, Chicago, Ill.; these operations are not within the statutory exemption of §203 (b)(7a), since a regular, scheduled service is proposed as opposed to substituted motor-for-air transportation in emergency situations. And as only North Central will be served by applicant, who proposes to dedicate equipment to North Central's exclusive use permitting its employees to dispatch equipment at its convenience, applicant's proposed service is suited to North Central's special needs. Futhermore, North Central should not be required to use the services of protestant carrier with interests inimical to its own; application granted accordingly.—Howard Contract Carrier Application, 105 M.C.C. 354 (356-9).

On further consideration the Commission concluded that applicant has failed to establish that its proposed service meets shippers' special needs and is consistent with the public interest and the national transportation policy. Balancing all of the §209(b) criteria in light of 231 F. Supp. 905, the Commission found (1) that supporting shippers failed to demonstrate a need for service more specialized than that provided by protestant common carriers, (2) that a grant of the permit would have an adverse effect upon the service of certain protestant carriers, and (3) that applicant and none of the four supporting shippers would be adversely affected by denial of this application. Denied.—Samack, Inc., Contract Carrier Application Segundo, 105 M.C.C. 524 (545)*.

Need for proposed service is shown by supporting shipper's demands for (1) daily pickups, (2) a carrier prepared to handle a myriad of different types of shipments, (3) truckload as well as less-than-truckload service, (4) odd-hour pickups, (5) same-day service, (6) sequential loading, and (7) a carrier familiar with the various markings and codes used to identify imported merchandise. However, since the record concerns only foreign commerce, grant of authority will be limited accordingly; furthermore, although no additional authority is required for transportation of "rejected" shipments, applicant has not established need for transportation of "returned" shipments (those which have been accepted by consignee and which consignee later desires to return to the original consignor). Granted accordingly.—J & J Trucking Co., Inc., 106 M.C.C. 345 (351, 352-3)*.

Proposed operations found to be those of a contract carrier inasmuch as applicant seeks to serve only one shipper for whom applicant has provided a complete, integrated transportation service for five years. Evidence discloses that denial of sought authority would adversely affect applicant and supporting shipper but not protestant. Applicant has established that it is better able to meet shipper's total transportation needs than protestant, which is interested in only part of those needs.—United States Trucking Corp. Ext.—Sugar, 111 M.C.C. 26 (33-5).

Authority sought herein granted, with indicated exception, as supporting shipper's requirement for a more expeditious service constitutes a "distinct need" under §209(b) as previously decided in 113 MCC 329. Protestants' service is inadequate as they must interchange traffic to reach destination points whereas applicant proposes a direct-line service.—D & G Trucking Co., Inc., Contract Carrier Application, 113 M.C.C. 883 (888-9)*.

Commission will not grant an application if the "follow the traffic" principle is the only factor weighing in its favor but applicant has established a future need for its services by showing that shipper has definite plans for moving substantial volume of traffic from a designated plantsite and applicant would only expand the "house carrier" service it renders at shipper's other plant.—Bursal Transport, Inc., Extension—Clay, 114 M.C.C. 557 (559-60)*.

Specialized service: See also H. Prang Trucking Co., Inc.—Purchase—Hyer Trucking, at §5(2), n. 3.

Two supporting shippers have established a distinct need for a prompt, dependable, and expeditious motor carrier service closely coordinated with their overall operations, and applicant's service will be designed to satisfy those unique needs, which none of the protestants authorized to provide service from and to the points in question has shown they are capable of meeting.—Eddleman Bros. Contract Carrier Application, 98 M.C.C. 681 (691-692)*.

Although proposed trailer retention service is an accessorial service, it may be properly considered in determining proposed operation's consistency with public interest, because it amounts to a dedication of equipment at destination and is clearly a transportation service within meaning of the Act, distinguishable from proposal of common-carrier applicants to provide such nontransportation services as spreading asphalt in road construction or washing and repairing foreign cars.—H. Messick, Inc., Extension, 102 M.C.C. 492 (507)*.

Commission granted authority sought herein as the nature of the proposed service is specialized and tailored to shipper's needs as it is a flexible, single-line, multiple pickup and delivery service, offering numerous stops in transit. Applicant's drivers will perform many various additional services, as indicated, acting as shipper's emissaries to the public. Protestants are able but unwilling to provide such proposed service. Fact that applicant will serve seven shippers is not supportive of its case but is insufficient for a denial.—Continental Contract Carrier Ext.—45 States, 112 M.C.C. 145 (150-1).

Application granted as proposed service at all times will be closely geared to shipper's own operation in a specialized "house carrier" service uniquely designed to meet shipper's needs. Opposing carriers are unable to meet these transportation needs due to certificate restrictions on their territorial or commodity authorities and the uncertainty as to protestants' ability to furnish the required transportation on an assured basis.—C & R Trucking Co., Ext.—Winslow, N.J., 112 M.C.C. 336 (340-42).

Supporting shippers' testimony has shown a need for applicant's proposed service as shippers require a flexible, "round-the-clock" service and experienced drivers familiar with transportation of malt beverages who can be relied upon to exercise good judgment when conditions require deviation from shipper's instructions. Applicant has conclusively established that it is better able to meet these distinct needs because of its familiarity with such operations.—P-N-J Kornacker, Inc., Extension—Malt Beverages, 112 M.C.C. 580 (587-9)*.

Application granted as proposed operations are found to be contract carriage as defined in §203(a) (15) of the Act, and inasmuch as applicant will serve only two shippers by providing vehicles of sufficient interior dimensions specially equipped with recessed rollers to meet shippers' particular transportation requirements.—Fairchild General Freight, Ext.—Fiberboard Containers, 113 M.C.C. 598 (601)*.

Petition to modify existing permit to allow service to additional shipper is in reality an application for an extension of service. Application was granted as the proposed service was tailored to shipper's need and more specialized than that of protestants.—Blue Fleet Distributors Corp. Modification of Permit, 113 M.C.C. 778 (780-1)*.

Unopposed application granted as applicant will provide only one shipper with a service closely coordinated to shipper's distinct transportation needs.—Skriba, 115 M.C.C. 855 (860).

Dedication of equipment, coupled with the performance of multiple deliveries, does not make the resulting service distinct or specialized.—Wharthen Extension—Cranberrier, 117 M.C.C. 470 (477)*.

There was found to be nothing special or distinct about a shipper's requirement for the prompt return of empty containers, and several of the common carrier protestants in this proceeding actively participated in the transportation of shipper's traffic, which thereby negates any claim of specialization. Further, protestants offered to provide service as required by shipper. Application denied.—Wagner Express, Inc., Contract Carrier Applic., 117 M.C.C. 752 (757)*.

Denied: Petition to add proposed operations to existing permit denied as petitioner failed to establish proposed service is responsive to shipper's needs. Shipper testified it presently has no need for proposed service and its testimony supporting applicant is of a general nature, lacking specificity as to tonnage or percentage of traffic to be shipped. Application has not been shown to be required by public convenience and necessity, denied.—Luper Transportation Co.—Petition for Amendment, 111 M.C.C. 39 (42-3)*.

Application for authority sought herein denied as applicant was found unfit to perform proposed operation because applicant's president was shown to be closely affiliated with two carriers having a history of unlawful operations, and no evidence showed that these two carrier's had ceased such activity or that applicant had disassociated himself from such operations.—International Carriers, Inc., Contr. Car. Applic., 112 M.C.C. 195 (201).

Normally brokers merely arrange or provide for the transportation of traffic belonging to the general public, and as such are neither consignees nor consignors of the traffic. Because contract carriers are authorized to move the traffic of only a limited number of persons, brokers cannot be the principal supporting shipperwitnesses to successful contract carrier applications unless they can prove (1) that they have some overriding interest in the traffic for the purpose other than providing, selling, arranging or offering a transportation service therefor, or (2) that they engaged exclusively as agents for a limited number of shippers and as such cannot be said to be involved with the traffic of the general public, application denied.—Jensen Contract Carrier Extension, 113 M.C.C. 205 (210).

Approval of application herein would encourage a practice whereby common carriers would be relegated to handling l.t.l. traffic to the exclusion of more desirable truckload traffic. Application denied as applicant has not proven that shippers will derive such benefits from its proposed service as to offset the harmful effects on protestants, thus failing to comply with the third criterion of §209(b).—Fuller Contract Carrier Application, 115 M.C.C. 675 (682)*.

Shipper fails to demonstrate the nature of its manufacturing and/or distribution activities requiring a dedicated service. Common carriers now available can dedicate equipment to exclusive use of shipper, a legally acceptable service as long as they are willing to do so for other shippers, and are able directly or through interlining to provide multiple stopoff service. Denied.—Kerr Contract Carriage, Inc., Contr. Car. Applic., 115 M.C.C. 862 (869-71).

Conversion to contract carrier operation: Applicant, a common carrier of cash letters, seeks conversion of those portions of its outstanding certificates covering cash letters to corresponding contract carrier authority. Applicant is supported by 3 Federal Reserve banks and 67 other banking institutions who regard applicant's service as highly specialized and applicable to their shipping needs; they believe proposed operations will give them more flexibility and convenience, avoiding the stricture of 7-day billing requirements incident to existing common carrier service. Under this proposal, applicant would provide same service presently offered as a common carrier but under continuing contracts with each institution served. Since applicant had shown need for its service as a common carrier, a further showing of need is not required. Authority granted conditioned upon concurrent revocation of existing common carrier authority to carry cash letters.—Bankers Dispatch Corp. Conversion Application, 110 M.C.C. 294 (300, 302, 305, 308).

27. Fitness, in general.—[Vols. 10-12, 15, 17-19, 21].—See also Bracero Transp. Co., Inc., Extension, §209(a)(1), n. 18, supra.

Since applicant has contracted to sell both much of his operating authority and the very equipment necessary to provide the service which the supporting shipper desires, and there is no showing how, without such equipment, he would be able to perform this transportation, applicant has failed to show that he is fit to conduct the operations proposed; furthermore, a question is presented whether applicant intends to use the authority sought or include it in the planned sale of the equipment and related operating rights. The Commission has consistently refused to grant authority to a carrier not intending to perform operations thereunder, and a grant here, under the questionable circumstances, would not be in the public interest; denied.—Gorski Extension—Hardboard, 95 M.C.C. 514 (518).

Although applicant conducted proposed operation for a considerable time in the past without proper authorization, the evidence reflects no willful violation of the Act or of Commission's regulations. Applicant is prosecuting the application in good faith, and is endeavoring to comply with the law; therefore, applicant's fitness to conduct the operations has been established.—Bertsch Contract Carrier Application, 96 M.C.C. 108 (110)*.

Applicant has failed to establish that it is fit to conduct proposed operations. The record shows that applicant has failed to comply with leasing regulations, particularly with regard to proper receipt of equipment and inspection of leased equipment before taking possession of it; the evidence also shows numerous and persistent violations of safety regulations, including failure to report an accident to the Commission within 15 days, to observe drivers' log requirements, to comply with hours of duty requirements, and to observe regulations pertaining to systematic maintenance and inspection of vehicles. A belated effort to take remedial action shortly before the hearing, viewed in light of applicant's long-continued history of noncompliance, is insufficient. Moreover, applicant has transported shipments of cottage cheese, butter, and empty drums without appropriate authority.—Frigid Food Express, Inc., Ext.—Floor Covering, 106 M.C.C. 259 (261-3).

Applicant found unfit to perform proposed operations as record discloses applicant's president and sole stockholder was a principal officer in two carriers having a history of unauthorized activity. The record shows no mitigating circumstances for such activity or concrete evidence that such activity has ceased but does indicate that applicant's president remains closely affiliated with these carriers. Such unlawful past conduct indicates an unwillingness by applicant to comply with Commission's rules and regulations.—International Carriers, Inc., Contr. Car. Applic., 112 M.C.C. 195 (199-201).

Commission does not believe supporting shipper herein should be deprived of a required contract carrier service specially coordinated to its transportation needs because of applicant's past unlawful operations. However, applicant is admonished that the Commission cannot condone such operations in the future.—Skriba Contract Carrier Application, 115 M.C.C. 855 (860-1).

28.—Irregular routes.—[Vols. 10-12, 18]. —Shipper needs applicant's irregular-route carrier service to provide its customers located throughout eastern Texas and Louisiana with split deliveries. These customers maintain small inventories and neither rail service, which is to slow to be responsive, nor protestant's regular-route service, which only allows a fraction of shipper's customers to be reached with direct, single-line service, can meet the needs of providing multiple-dropoffs on consolidated truckloads of less-than-truckload shipments which fluctuate with seasonal demands. Also, applicant's service, from a rate standpoint, will be more economical for shipper. Application approved.—Western Lines, Inc., Extension.—Kansas City, Kans., 96 M.C.C. 657 (666).

29.—Operation in connection with other business.—[Vols. 10-12, 14, 15, 18, 19, 21].—Grant of contract carrier authority will not generally be made to an applicant whose primary business is other than transportation, and who proposes to conduct private carriage operations outbound in connection with its regular business, and for-hire operations on the backhaul movement. Since a private carrier has the advantage of assured traffic without the necessity for solicitation and other expenses, applicant will, by reason of the mixture of its private and for-hire operations, compete on better than even terms with other carriers engaged exclusively in for-hire operations. Denied.—Adams Egg Farms, Inc., Contract Carrier Application, 95 M.C.C. 282 (285-6).

Applicant's proposal to maintain separate corporate entities for conduct of its private and for-hire trucking operations would not alter the circumstances; same vehicles used in proprietary operation would be used in the for-hire one, with a view toward subsidizing private motor carriage of a company managed under common control and in a common interest with a for-hire carrier. Fact that applicant, a producer and marketer of eggs, transports otherwise exempt commodities in its private carriage does not effect application of that principle as its primary business is not transportation, and it still has advantages of assured traffic and the sharing of overhead expense with the commercial enterprise; also, the same principle would apply to both common and contract carriage. Proposed mixture of private and for-hire operations would not be consistent with the public interest and the national transportation policy.—Id., p. 286.

34. Extension of operations.—[Vols. 10-19, 21].—The number of applicant's outstanding contracts (6), detracts somewhat from the strength of its presentation, but standing alone or in conjuction with any possible minor effect on protestant does not warrant denial of application. It was clearly established that the supporting shipper's distinct transportation needs can best be satisfied by applicant.—Prang Trucking Co., Inc., Ext.—New Brunswick, N.J., 117 M.C.C. 38 (48)*.

Regulations of the Commission

34 FR 18392, Nov. 18, 1969, Part 1041: Interpretation—Certificates and Permits, Part 1042 amended by addition of §1041.23 Operating authority to serve a particular airport, effective Nov. 26, 1969.

37 FR 14307, July 19, 1972, Part 1041: Interpretation; Certificates and Permits, §1041.11(a) Service to, from, and between points in Hawaii, added effective Aug. 21, 1972.

37 FR 16944, Aug. 23, 1972, Part 1041: Interpretation; Certificates and Permits, §1041.11 Service to, from, and between points in each Alaska and Hawaii, codification and heading in order (37 FR 14307) corrected.

37 FR 24036, Nov. 11, 1972, Part 1053: Contracts for the Transportation of Property, §1053.7 Contract carrier authority—definition of shipper, added, effective Dec. 26, 1972.

Section 209. (a) (4), (5) [*§309(a)(4),(5) U.S.C.*] Traffic moving from, to, and within Alaska; "grandfather" provisions.—[Unchanged. See vol. 19, p. 15758.]

Section 209. (b) [*§309(b) U.S.C.*] Application for permit; form and contents; issuance of permit; terms and conditions.—[Unchanged. See vol. 18, p. 14494.]

Notes of Decisions

Volume 10—p. 8057; Volume 11—p. 9468; Volume 12—p. 10410; Volume 13—p. 11082; Volume 14—p. 11603; Volume 15—p. 12213; Volume 16—p. 12863; Volume 17—p. 13561; Volume 18—p. 14496; Volume 19—p. 15759; Volume 21—p. 17452.

2. Construction and interpretation.—[Vols. 19, 21].—See also Griffin Mobile Home Transporting Co. case, §209(a) (1), n. 25, supra; Keller Trucking, Inc. v. United States case, §203(a) (15), n. 1, supra.

In considering whether an applicant for contract carrier authority has established that its shipper possesses an individual need and whether the service which it proposes is specialized and tailored to meet that need, the standard is not the "furnishing of transportation services designed to meet the distinct need of each individual customer" as under §203(a)(15) but whether the shipper has a distinct or individual need for a different or more select or a more specialized service. §203(a) (15) is only the definition of a contract motor carrier and is nothing more. Its use of the phrase "distinct need" is to be distinguished from §209(b) phrase "nature of the service proposed". These two phrases are distinct and are not to be confused and used interchangeably. To do so is error.—Eddleman Bros. Contract Carrier Application, 98 M.C.C. 681 (684-686)*.

In determining whether issuance of a permit to applicant will be consistent with public interest and National Transportation Policy evidence must be considered in light of statutory criteria, each factor being weighed to find where the public interest lies with no room for a presumption in favor of, or against, any of the five factors; each factor must be given its proper weight, judged, in the words of the Supreme Court, "with as much delicacy as the prospective nature of the inquiry permits" (368 US 81, 89.) Only in rare cases would the balancing of competing interests of shippers, applicant, and existing carriers admit of the assignment of equal weight to each one of the five criteria.—H. Messick, Inc., Extension—Explosives, 102 M.C.C. 492 (499-500)*.

On reconsideration, application for a permit authorizing transportation of prospective purchasers to and from a planned community under continuing contract with the sponsoring foundation should be denied in view of the statutory criteria found in §209(b). The proposed service can be performed by applicant and protestants under their incidental charter authority pursuant to §208(c). Denial would not be harmful to the sole shipper since it can obtain by charter service substantially the equivalent of that proposed in the application and the evidence does not show that traffic growth would require additional service. Approval would probably give the applicant a preferred status, whereas denial would only preclude applicant from access to traffic from one city. Additionally the proposal, as granted by the board, further contemplates passenger service to and from a community with a projected population of 50,000. Even though applicant's contract is with the foundation, such a proposal is tantamount to an offer to serve the general public.—Suburban Transit Corp.—Contract Carrier Application, 106 M.C.C. 763 (771-73).

While protestant is correct that the review board erred in only considering its common carrier authority and not its pertinent contract carrier authority in granting the present applicant's contract carrier application, such inadvertence, standing alone, is not the decisive factor in modification of the review board's report. While a contract carrier has standing to appear in opposition to an application for operating authority, the interests of such contract carrier normally are protected only in unusual circumstances, as when it already is serving the supporting shipper or has obtained its authority with such shipper's support. There is no evidence presented in the instant proceeding to indicate that these unusual circumstances are present; however, the findings in the prior report are modified since applicant has not established a prima facie case with respect to a need for service between all points it proposes to serve.—Protective Motor Service Co., Inc.—Extension, 106 M.C.C. 867 (868-69).

Applicant has failed to establish a prima facie case of need for service between all points it proposes to serve since the certifications of support submitted with its application are not representative of applicant's many shippers and their need for service to the total area as it contends; the purpose of shipper certification is to assure the Commission that the application will be supported and serves as a source of information and guidance with a view toward expeditious and fair disposition of the proceeding. Conversely, the certifications of support are not intended for use as supporting evidence should the application be assigned for handling without an oral hearing. Additionally, the evidence of record does not support applicant's contention that the shippers who did submit verified statements are representative of shipper support to serve all points in a certain state since none of the shippers indicated either a present or future need for service from any points in the six counties in the state which comprise over half the population of that state.—Id., pp. 869-70.

Applicant's service is found not consistent with public interest and the National Transportation Policy; in considering criteria of §209(b), protestant has shown that it has the ability and willingness to meet shipper's transportation requirements as well as and in some instances better than applicant, and there is nothing in the record to show that rates can be used to aid applicant's case. Further, approval would adversely affect protestant since a grant of authority would permit supporting shipper to destroy, in effect, the value of protestant's certificate, which was obtained with the support of the shipper in the present case, but never utilized by the shipper. On the contrary, applicant holds no permanent authority from this Commission and would be placed in no worse a position by a denial of the application.—Wickliff & Son—Contract Carrier Application, 107 M.C.C. 652 (658-61).

In determining if issuance of a permit will be consistent with National Transportation policy, §209(b) requires consideration of five criteria: (1) number of shippers to be served, (2) nature of service proposed, (3) effect of granting permit upon services of protesting carriers, (4) effect of denial of permit upon applicant or his shipper, and (5) the changing character of shipper's requirements. Commission denied the application herein as the record failed to disclose who, as between shipper and its suppliers, controlled the selection of carrier; and the Commission was unable to determine whether or not the proposed service would actually be used, and the effect of a denial upon protestants or shipper. Also, testimony of sole witness for supporting shipper is too vague and general as to shipper's changing requirements.—Art Quiring Contract Carrier Application, 110 M.C.C. 480 (484-6).

On reconsideration, authority to transport limestone from York, Pa., to designated plant site granted under the "follow the traffic" principle as applicant proposes to serve only the same shipper and a denial of grant would probably cause applicant to go out of business. Commission further notes that inadequacy of existing service need not be proven in every case.—Patterson Extension—York, Pa., 111 M.C.C. 645 (648-9)*.

On reconsideration, Commission granted contract carrier authority to transport roofing and insulation materials as applicant seeks to serve only one carrier; proposed service is of flexible, on-call nature tailored to shipper's needs not satisfied by protestants; protestants have not shown such grant would divert significant traffic from them; and denial would deprive carrier of valuable backhaul traffic and the shipper of a "house-carrier" service particularly responsive to its needs.—Interstate Distributor Co., Contr. Car. Applic., 111 M.C.C. 746 (748-50)*.

In determining whether issuance of a permit will be consistent with public interest and National Transportation Policy, the facts of every case will determine which of the §209(b) criteria will carry the most weight in any given proceeding. Experience shows most cases turn, properly so, on the second standard because that criterion looks to the supporting shipper's specialized needs and applicant's ability to satisfy them.—Continental Contract Carrier Ext.—45 States, 112 M.C.C. 145 (153).

10. Applications, in general; parties; notice.—[Vols. 10-15, 17-19, 21].—See also Fox-Smythe Transp. Co. Extension—Oklahoma case, §206(b), n. 15, supra.

While a contract carrier has standing to appear in opposition to an application for operating authority, the interests of such a carrier normally are protected only in unusual circumstances, as when it already is serving the supporting shipper or has obtained its authority with such shipper's support. Generally, the Commission has granted applications for contract-carrier authority if the alternative would be to require a shipper to contract unwillingly with a given contract carrier. See 94 MCC 563.—Kendrick Cartage Co. Extension—Allied Oil Co., 95 M.C.C. 366 (369).

While applicant's amendment at the hearing of its request for authority to include transportation of "parts" broadened the application, opposing carriers present at the hearing apparently were not prejudiced thereby; however, other members of the public who relied upon the notice as published may have an interest which has been prejudiced by lack of proper notice. Accordingly, authority actually requested will be republished in the Federal Register, and issuance of permit withheld for 30 days from republication date, during which time any interested party may file a protest.—Minnesota Trucking Contract Carrier Application, Inc., 96 M.C.C. 330 (334).

Applicant holds common carrier authority to transport cash letters for banking institutions. It seeks conversion of its certificates authorizing such transportation to permits coextensive with its common carrier authority, basing its application upon our determination in 102 MCC 411 that transportation of cash letters for banking institutions was contract carriage. While characterized as a "conversion" application, there is no provision in the Act for conversion of a certificate to a permit such as that found in §212(c) for the one-time conversion of permits to certificates. Even though this proceeding is similar by analogy to a conversion of a permit to a certificate under §207, it involves considerations novel in nature and broader in scope than the usual proceeding in which a carrier seeks permit authority. Following our decision in 61 MCC 539, applicant must still show a public need for its contract carrier operations but the standards of proof will be more lenient than in the usual case.—Bankers Dispatch Corp. Conversion Application, 110 M.C.C. 294 (305-6).

Applicant's numerous violations did not prevent authorization of a limited term permit, since, while the considered unlawful operations must be classified as flagrant and willful, they were prompted by shippers' solicitation of applicant's services and were not initiated by applicant; moreover, applicant's proposed operations were unopposed, and a need for the service was established.—Jamerson Contract Carrier Application, 110 M.C.C. 469 (473-4).

Authority granted to applicant for transportation of general commodities, restricted to traffic having a prior or subsequent movement by water, after establishment by applicant of conformity to all criteria of §209(b) of the Act, specifically cited. Protestants' authority to conduct the transportation service required by shipper, and with respect to commodities subject to the water carriage restriction, was held to be doubtful.—Service Transfer, Inc., Contract Carrier Application, 115 M.C.C. 29 (34-35).

Supporting shipper failed to disclose that it was supporting several applications, filed at approximately the same time as this application, for common carrier authority duplicative in whole or in part of the contract carrier authority sought in this proceeding. While the denial of this application is based solely upon applicant's failure to demonstrate a need for its proposed contract carrier service in the light of the criteria embraced in §209(b), it should be noted by shipper absolute and complete candor is expected on the part of all parties coming before the Commission.—Warthen Extension—Cranberries, 117 M.C.C. 470 (478)*.

11. Amendments.—[Vols. 10-12, 14, 15, 17, 18].—See Fox-Smythe Transp. Co. Extension—Oklahoma case, §216(b), n. 16, infra.

18. Burden of proof.—[Vols. 10-13, 16-19, 21].—See also Continental Carrier Corp. v. United States case, and Samack, Inc., Contract Carrier Application Segundo case, §209(a)(1), n. 25; Mid-West Truck Lines, Ltd., Contract Carrier Application case, §209(a)(1), n. 24, supra.

When cost of transportation is considered in determining whether a proposed operation meets the "distinct need" test of contract carriage, the applicant asserting that it will meet a shipper's distinct need for low cost transportation has the burden of establishing that it can and will perform such service on an economical and sustained basis at a specified reduced level of changes. And, although one supporting shipper claims that competitors enjoy use of low-cost contract carrier service, this general statement is not supported by the names and locations of such competitors or the carriers involved. The shippers have not requested protestants to establish lower commodity rates nor is there any persuasive showing that the rates of existing motor common carriers are so high as to prohibit movement of the involved traffic. To the contrary, traffic data show that one of the protestants is presently moving a substantial amount of the traffic.—Liberty Transfer Co., Inc., Extension—Specified Points, 96 M.C.C. 530 (533-4)*.

Applicant predicating its contract carrier status upon the first alternative test of §203(a)(15) must establish not only that specific equipment will be assigned to the supporting shipper's use for a continuing period of time but, in order to meet the §209 standards, it must likewise demonstrate, inter alia, that the type and quantum of equipment to be so assigned is sufficient to meet the shipper's needs insofar as they relate to proposed service; and, since the performance of, or absence of, a backhaul movement influences latter requirement, applicant's showing as to arrangements for return of equipment to shipper's place of business must be weighed in the light of all other evidence affecting availability of equipment for shipper's exclusive use.—Owens Contract Carrier Application, 100 M.C.C. 34 (40-1)*.

On reconsideration, use of "adequacy-willingness-ability" test, basis for previous partial denial, rejected; citing 368 US 81 the division reiterated that such test is not applicable in contract carrier application proceedings and that the burdens of proof are allocated differently. Applicant must first demonstrate that proposed contract carrier service is specialized and tailored to shipper's individual need; then protestants may present evidence to show that they can and want to meet that specialized need; and finally burden shifts back to applicant to demonstrate that it is better equipped to provide needed service. Record shows that shipper requires service of a carrier that can transport all of its commodities between all points in its market area and, in addition, provide a flexible, on-call, coordinated service utilizing experienced drivers who are able to safeguard its business secrets. Applicant's proposal is specifically designed to meet these needs, while none of the protestants can provide the complete service required. Granted accordingly.—Interstate Sand & Gravel Transp., Extension—Nine States, 102 M.C.C. 60 (65-7)*; Mid-West Truck Lines, Extension—Pembina, N. Dak., 113 M.C.C. 329 (335)*.

Shippers and consignees supporting an application for a permit, which authorizes the transportation of property, must "identify clearly the commodities they ship or receive, the points to or from which their traffic moves, the volume of freight they would tender to applicant, the transportation services now used for moving their traffic, and any deficiencies in their existing services". This is the minimum showing expected of any applicant seeking a grant of motor carrier authority. In this proceeding these minimum legal requirements have not been met; applicant, therefore, has not made a prima facie case. Denied.—Novak Contract Carrier Application. 103 M.C.C. 555 (557); where the record lacks evidence of the volumes to be moved from and to the respective origin and specified destination points, such record prevents the proper framing of authority to applicant responsive to the supporting shipper's needs and is insufficient to meet the minimum requirements necessary to sustain a grant of authority; denied.—Yelle Contract Carrier Application, 115 M.C.C. 408 (413)*.

Applicant, a common carrier of cash letters, seeks conversion of those portions of its outstanding certificates covering cash letters to corresponding contract carrier authority. Application is based upon determination in 102 MCC 411 that transportation of cash letters was contract carriage. Protestant does not challenge applicant's position that proposed service is contract carriage but it argues that a contract carrier permit cannot be issued in absence of shipper support for each point sought in each portion of territory sought. Considering distinctly unique nature of service provided and proposed, including dominating factor that any permit which might issue will be limited not to any individual shipper but to a class of shippers (banking institutions), and to require applicant to show shipper need for its service at each point sought would be totally unwarranted.—Bankers Dispatch Corp. Conversion Application, 110 M.C.C. 294 (295-8, 307).

Since applicant failed to prosecute its application after being afforded ample opportunity to do so, Commission denied said application for lack of evidence, without prejudice to filing of a new application.—New Rochelle Moving & Storage—Contr. Car. Applic., 111 M.C.C. 418 (422).

In remanding this case, court ruled that Commission erred in placing burden on applicant of proving that protestant could not satisfy the changing requirements of supporting shipper. Burden is on the protestant to prove it can satisfy such requirements.—Continental Contract Carrier Ext.—45 States. 112 M.C.C. 145 (152-3).

Shippers are not automatically entitled to the authorization of a new motor carrier service by virtue of the discontinuance of a prior contract carrier service, but only where it is shown that existing services are unable or unwilling to meet the shipper's reasonable transportation requirement. (See also §206(b), n. 18 *Public*)—Saldutti & Son, Inc., Ext.—Inedible Fish Oils, 118 M.C.C. 58 (65)*.

20. Evidence; admissibility.—[Vols. 10-19, 21].—An exhibit, showing the elapsed length of time between placing order by shipper with consignor and the dispatching of protestant's equipment to consignor's plant, supported by oral testimony that shipper called consignor about the delays and was informed that they were due to the failure of protestant to send equipment, are both admissible. While it is true that no representative of consignor appeared to testify to the facts, the shipper witness was qualified to give testimony as to the accuracy of the data in the exhibit, although the exhibit itself does not establish that protestant was responsible for the delays. Furthermore, the oral testimony, admittedly hearsay, concerning conversations which witness had with consignor, is also admissible because it bolsters the materiality of the exhibit and can be accorded some weight as it consisted of information obtained in the regular course of business.—Owens Contract Carrier Application, 95 M.C.C. 586 (588-9)*.

In a contract carrier application proceeding, comparisons between applicant's proposed rates and the published rates of existing motor common carriers are relevant factors to be considered. Also, evidence by supporting shipper indicating that exempt commodities for backhaul traffic would be available if the permit were issued, is proper and admissible.—Continental Contract Carrier Extension—Plumbing Fixtures, 96 M.C.C. 321 (323).

Application seeking authority for contract-carrier service which does not meet the requisite criteria must be specifically denied on that basis before any alternatives are explored. Denial may be either on the grounds that the applicant has failed to establish that it is fit, willing, and able to perform service it proposes, or because the evidence, viewed in light of §209(b) criteria, fails to establish that the proposed contract carrier operation will be consistent with the public interest and the National Transportation Policy.—Eddleman Bros. Contract Carrier Application, 98 M.C.C. 681 (684)*.

In deciding whether proposed service is needed and whether granting it is consistent with public interest, frequently it is necessary to determine if another carrier is authorized to provide proposed service and, while no actual order may run against such carrier, this does not diminish effect of such interpretation. Therefore, the scope of protestant's authority to transport "paper mill material and supplies" is subject to interpretation when protestant appears in opposition to an application pending before the Commission and such interpretation can be considered in determining whether or not proposed service is, in fact, needed.—Ullery Contract Carrier Application, 99 M.C.C. 86 (91).

Rather than rewarding applicant for past illegal operations of its corporate alter ego, which has engaged in unauthorized operations within scope of authority sought, loss of potential traffic to protestants from these operations is considered as having an adverse effect on them; the effect of granting proposed permit on protesting carriers is one element considered in determining whether or not issuance of permit is consistent with public interest and National Transportation Policy, and, where protestants have not handled considered traffic, a grant to a newcomer effects them only in an "unusual case," citing 368 US 81. However, since grant of authority to applicant would divert traffic from protestants and discourage all such authorized carriers from making innovations and improvements, proposed operations are contrary to National Transportation Policy and constitute the "unusual case". Moreover, as applicant is a mere corporate shell, it would suffer no recognizably adverse effect. Denied.—Specialized Transp. Services, Inc., Contr. Car. Applic., 106 M.C.C. 70 (71-2, 76).

Although applicant failed to indicate certain shippers' support in the proper place in its application form, no harm has resulted from this deficiency as protestants had ample time to reply to these verified statements. Accordingly, such statements of these supporting shippers will be admitted with their full weight.—P-N-J Kornacker, Inc., Extension—Malt Beverages, 112 M.C.C. 580 (585-6)*.

Normally brokers merely arrange or provide for the transportation of traffic belonging to the general public, and as such are neither consignees nor consignors of the traffic. Because contract carriers are authorized to move the traffic of only a limited number of persons, brokers cannot be the principal supporting shipper-witnesses to successful contract carrier applications unless they can prove (1) that they have some overriding interest in the traffic for a purpose other than providing, selling, arranging, or offering a transportation service therefor, or (2) that they are engaged exclusively as agents for a limited number of shippers and as such cannot be said to be involved with the traffic of the general public; application denied.—Jensen Contract Carrier Extension—Foodstuffs, 113 M.C.C. 205 (210).

Evidentiary standards for establishing prima facie case include requirement that applicant show "*any* deficiencies in existing service" in initial verified statement (103 M.C.C. 555, 558). When applicant failed in its duty of submitting specific evidence of service deficiencies in its initial statement, but presented such specific evidence in its rebuttal statement, protestant (by rule of practice 23, prohibiting filing of a reply to a reply) was unfairly prevented from presenting an adequate defense. Rebuttal statements cannot be used to introduce new evidence not referred to in intial statements but must be confined to answering points raised by protestants in their reply statements. Motion to strike evidence in rebuttal granted.—Kerr Contract Carriage, Inc., Contr. Car. Applic., 115 M.C.C. 862 (866).

A party alleging fraud or misrepresentation bears a heavy burden when seeking to overturn a formal action by this Commission. Petitioner contends that it was induced to withdraw its opposition to applicant's proposed operation because applicant and its supporting shipper misrepresented the location of shipper's plant and then offered a restriction against service at St. Augustine, Fla., an area which was near but did not include said plant. The record fails to support petitioner. Shipper's use of St. Augustine on its company letterhead is a common business practice not designed to mislead the public.—Lawton, Inc., Extension—Foodstuffs, 118 N.C.C. 882 (890)*.

23. Official notice; res judicata; stare decisis.—Official notice is taken that petitioner under its presently held permits has contracts with 5 shippers, including 2 additional shippers which it now seeks to serve between points already authorized.—Kendrick Cartage Co. Extension—Allied Oil Co., 95 M.C.C. 366 (367).

25. Hearing, generally.—[Vols. 18, 21].—No oral hearing is required in contract carrier application proceeding where there is no material dispute of fact. In instant case, plaintiffs (protestants in Commission proceeding) allege there was "a material issue or a discrepancy of the facts"; however, the mere assertion that supporting shipper of explosives had no need for multiple pickup service, supported by no positive and little negative evidence, did not produce a material dispute of fact when the need for such service had been shown by applicant's actual operations on behalf of the shipper, as well as by the shipper's statement. Therefore, the Commission's refusal to grant an oral hearing on the application was not error; complaint dimissed.—C. I. Whitten Transfer Co. v. United States, 328 F. Supp. 1120 (1121-3)*.

The District Court held that the Commission failed to afford applicants a proper hearing, when it considered the question of public need for the service in contract carrier application proceeding, inasmuch as evidence of need was irrelevant to the issues. Therefore, in the future, proper care should be taken so that there can be no mistake concering the disposition of a formal application for a permit; however, when the application appears, in substance, more appropriately one for common carrier rights, the Commission believes that the applicants are entitled to additional consideration, as if they were seeking a certificate.—Eddleman Bros. Contract Carrier Application, 98 M.C.C. 681 (683, 685)*.

Failure of applicant's attorney to appear at a duly scheduled hearing, because of a conflicting appearance before the Commission, did not constitute "good and sufficient cause" for postponement as provided in rule 55(b) of the Rules of Practice. If applicant relies upon counsel with limited time for the client's interests, then client must bear the consequences thereof. Application denied.—New Rochelle Moving & Storage—Contr. Car. Applic., 111 M.C.C. 418 (421-2).

Regulations of the Commission

36 FR 4984, March 16, 1971, Part 1003: List of Forms, §1003.1(a) Application forms, amended by adding Form OP-OR-10, Application for Postal Motor Carrier Certificate, effective on date of order.

36 FR 5911, Mar. 31, 1971, Part 1003: List of Forms, §1003.1(a), Form OP-OR-10 (36 FR 4984) prescribed for use by person who were contractors under a star route, mail messenger, or contract motor vehicle service contract on effective date of the Postal Reorganization Act (P. L. 91-375), effective on date of order.

37 FR 14307, July 19, 1972, Part 1033: List of Forms, §1033.1 Motor Carrier and Broker Froms, OP-OR-9 revised, effective Aug. 21, 1972.

Section 210. *[§310 U.S.C.]* Dual operations.—[Unchanged. See vol. 11, p. 9469.]

Notes of Decisions

Volume 10—p. 8063; Volume 11—p. 9469; Volume 12—p. 10411; Volume 13—p. 11083; Volume 14—p. 11604; Volume 15—p. 12214; Volume 16—p. 12864; Volume 17—p. 13562; Volume 18—p. 14499; Volume 19—p. 15766; Volume 21—p. 17459.

1. Construction and interpretation.—[Vols. 10-16, 18, 19, 21].—See also Hourly Messengers, Inc., Extension case, §207(a), n. 6 *Prior-air;* Northern Motor Carriers, Inc.—Purchase—Bonded case, §5(2), n. 48 *Dual;* Ryder System, Inc.—Control—Complete Auto Transit case, §5(2), n. 110 *Dual;* Vancouver Fast Freight case, §207(a), n. 5, supra; W. T. Mayfield Trucking Co.—Interpretation case, §212(a), n. 1, infra.

The proposed purchases, control, and merger by vendee do not change the situation with respect to dual operations of vendee and its carrier affiliates which are under the common control of a holding company, since vendee is now authorized to serve the sole supporting shipper, and the operating rights proposed to be acquired authorize service to the same shipper; the areas or operations to be added by vendee do not duplicate, as to commodities, shippers, or territory, those served by vendee's affiliates.—Signal Delivery Service, Inc.—Purchase—Marc's Delivery Corp., 104 M.C.C. 280 (287).

The holding by applicant of a certificate of public convenience and necessity authorizing transportation of aluminum dross is substantially dissimilar from the authorization held by applicant's contract carrier affiliate to transport dry fertilizer, ammonium nitrate, classes A and B explosives, blasting materials and agents, clay and clay products, and corrugated fiberboard boxes and related items, and there does not appear to be an opportunity for engaging in any of the discriminatory or other undesirable practices against which §210 of the Act is aimed, and with the reservation of the Commission's right to impose such conditions or limitations as may be deemed necessary in the future, the holding by applicant of the certificate granted herein and of the permits held by its affiliate will be consistent with the public interest and the National Transportation Policy.—Truck Transport, Inc.—Extension, 106 M.C.C. 880 (883).

Applicant sufficiently separated the service operations to be performed for different classes of shippers to allow approval of the proposed dual operations under §210 of the Act. It was noted that essentially similar dual operations of protestant were approved.—Loomis Courier Service, Inc., Com. Car. Applic., 117 M.C.C. 424 (429)*.

3. Discrimination resulting from dual operation.—[Vols. 10-19, 21].—Fact that common carrier applicant's major stockholder is also principal owner of a contract carrier holding authority to serve part of the territory involved does not stand in the way of granting common carrier authority shown to be needed since the same shippers will not be served by both; applicant seeks authority to transport empty milk containers to dairies whereas permit held by the contract carrier authorizes transportation of such merchandise as is dealt in by wholesale, retail, and chain grocery stores and food business houses and equipment, materials, and supplies used in the conduct of such businesses. The distinct nature of the two transportation services thus does not create the mischievous situation against which §210 was directed.—La Bar's, Inc., Common Carrier Application, 95 M.C.C. 773 (775, 777).

Since common carrier authority granted is restricted against service for department or retail stores and against service to premises of persons served by applicant or its affiliates pursuant to their permits, dual operations which would result from applicant holding considered authority and by it and its affiliates holding contract carrier authority to serve retail accounts may be approved.—United Parcel Service, Inc., Extension—Midwest Territory, 96 M.C.C. 10 (14).

Although there is great deal of territorial duplication between the authority held by applicant in its outstanding permits and certificates, as well as authority sought in the instant proceeding, the commodities transported under these authorities, petroleum products in containers, dry manufactured fertilizer, animal feed supplements, industrial urea, steel articles, and highway construction materials, differ substantially, and there does not appear to be any possibility for discrimination. However, jurisdiction is reserved for future in this matter.—Western Lines, Inc., Extension—Kansas City, Kans., 96 M.C.C. 657 (667).

Since corporate vendee, organized by vendor and his family for purpose of proposed purchase of vendor's contract-carrier rights and property, would be managed by its stockholder (vendor's son) who also holds common-carrier authority to transport the same commodities in the same general area, approval of the §5 transaction would afford opportunity for discriminatory practices by commonly controlled carriers which are prohibited by the statute. On the evidence of record, proposed dual operations under common control and management of vendee's manager are not shown to be consistent with the public interest and the National Transportation Policy and, while objectionable aspects have been minimized or removed in some cases by restriction of operating rights involved, the requested cancellation of part, and restriction of part, of considered certificated rights would not eliminate the objectionable features of proposed operations, would be inconsistent with the common-carrier duty to serve the public, and would also complicate enforcement by the Commission. Application denied.—Milton K. Morris, Inc.—Purchase—Morris, 97 M.C.C. 544 (545, 546-8).

There can be no discrimination by carrier applicant when its common carrier authority is for the transportation of "household goods" and its proposed contract carrier authority is for the transportation of new furniture, even though the same territory is involved, because new items of furniture for shipment from a factory to dealers and institutions are not "household goods"; nor can new home furnishings be transported from a factory or store under "household goods" authority unless they have been purchased by householder who intends to use them in his dwelling and who arranges for their transportation as an incident of his moving from one dwelling to another. Granted.—Ferree Moving & Storage, Inc., Contract Carrier Application, 99 M.C.C. 454 (457).

If Refiners' common carrier application is granted, it could operate to some of the same points and serve some of the same consignees as does its affiliated contract carrier, Sugar Transport, and if applicant Conley's common carrier authority is granted, it would have extensive and somewhat duplicating contract and common carrier authority, thereby enabling these carriers or their affiliates to engage in operations as both common and contract carriers over the same route or within the same territory without any evidence that such operation is consistent with public interest and the National Transportation Policy. Such duplication of authority, if granted, would enable the considered carriers to engage in prejudicial and discriminatory practice. Denied.—T.I. McCormack Trucking Co., Inc., Ext.—Montezuma, N.Y., 99 M.C.C. 725 (728-30).

Because grant of authority sought would place applicant in position of being able to serve West Virginia Pulp and Paper Company as both a common and contract carrier, approval of proposed operations is withheld. However, applicant is given opportunity to select or suggest method by which possibilities for conducting objectionable dual operations could be eliminated. Therefore, proceedings held open for 90 days during which applicant can present to Commission some plan of action which would enable it to perform contract-service shown to be required by supporting shipper while at same time eliminating any objectionable dual operations.—Schock Transfer Co., Inc., Extension—Kansas City, 100 M.C.C. 718 (722); because grant of contract carrier authority to applicant common carrier creates opportunity for discrimination due to nature of supporting shipper's business, proceeding is held open for 90 days to allow applicant to select or suggest method of eliminating objectionable dual operations.—Interstate Distributor Co. Contr. Car. Applic., 111 M.C.C. 746 (750-1)*.

Applicant was granted a certificate in lieu of its permit. Its permit allows it to transport the same commodities between points in the same general territory, and, therefore, it would be placed in a position to serve the same shippers both as a common and a contract carrier. Such a situation would create the possibility of discrimination against which the provisions of §210 of the Act are directed and would preclude the required findings that the resulting dual operations would be consistant with the public interest and the National Transportation Policy. Applicant has indicated that it is willing and able to convert its operations to those of common carriage. To prevent dual operations, issuance of a certificate will be conditioned on applicant's prior submission of a written request for cancellation of its permit.—Frost Trucking Co., Inc., Extension—Philadelphia, Pa., 110 M.C.C. 203 (211)*.

Applicant, holder of a permit, was granted a certificate for the transportation of ex-air shipments of freight in radial operations between three airports. Grant of authority is subject to reservation of jurisdiction by the Commission to impose terms, conditions, or limitations in the future as it may deem necessary to insure that applicant's operations shall conform to the provisions of §210 of the Act, and be consistent with the public interest and the National Transportation Policy.—Turner Expediting Service Extension—Montgomery County, Ky., 110 M.C.C. 342 (350, 351)*.

Authority as contract carrier of sugar sought herein granted as any possibility of discrimination is eliminated by authorizing applicant to transport both bulk and packaged sugar under contract authority and restricting applicant's current common carrier authority against those commodities and against serving facilities of the supporting shipper herein.—United States Trucking Corp., Ext.—Sugar, 111 M.C.C. 26 (36).

While there is no specific showing that applicant for common carrier authority and its affiliate holding contract carrier authority would engage in discriminatory practices, the resulting dual operations would give rise to opportunities for discrimination. To preclude the possibility of such discrimination the common carrier authority was granted upon the condition that the permit authority of applicant's affiliate be transferred or that applicant and its stockholders divest themselves of their interest in the affiliate corporation.—Transloric Trucking Corp. Common Carrier Application 113 M.C.C. 82 (87)*.

As the commodities authorized to be transported by applicant as a contract carrier are entirely different from that requested as a common carrier, there does not appear to be any opportunity for discriminatory or other undesirable practices, dual operations approved.—Ashton Trucking Co. Extension—Pulverized Limestone, 113 M.C.C. 142 (146)*; commodities entirely different and to be transported for different shippers; granted.—Mid-West Truck Lines, Extension—Pembina, N. Dak., 113 M.C.C. 329 (337)*; commodity and territorial descriptions in certificate and permit granted herein sufficiently distinguishable; granted.—Fairchild General Freight, Ext.—Fiberboard Containers, 113 M.C.C. 598 (601)*; commodities authorized by certificate granted herein different from those authorized by permit; however, express condition reserves Commission's jurisdiction in the matter; granted.—Nationwide Carriers, Inc., Extension—Hide-a-Bed, 117 M.C.C 582 (584)*.

Applicant's alternate request to retain part of its contract carrier authority in a conversion proceeding denied because approval of such request create a situation in which applicant could employ discriminatory practices prohibited by §210 of the Act inasmuch as applicant could transport similar commodities in same territory as both a common and contract carrier.—Cleveland General Transport Co., Inc., Conversion, 114 M.C.C. 536 (546).

5. Relinquishment of dual operation.—[Vols. 10-15, 18, 19, 21].—See also Miller Van Lines, Inc., Certificate of Registration case, §206(a)(6),(7), n. 75, supra.

Since it appears on this record that the present and proposed operations of affiliated contract and common carriers, including applicant, reflect transportation of the same or similar commodities to destinations in the same widespread territory, all of these carriers, managed under common control, have reached a state in their respective present and proposed operations wherein the spectre of objectionable dual operations confronts, or is likely to confront, each carrier. Accordingly, not intending to preclude another decision by the common management of these carriers, a practical solution may be for all outstanding contract carrier authority held by the contract affiliate to be converted to common carrier authority, and for all pending applications by this carrier for permit authority to be amended so as to request certificated rights.—Schilli Motor Lines, Inc., Conversion Application, 105 M.C.C. 90 (98-9).

Applicant, a common carrier of cash letters for banks and banking institutions, was granted contract carrier authority coextensive with its common carrier authority for the transportation of cash letters pursuant to Commission's decision in 102 MCC 411 that such operations were contract carriage. In order to prevent dual operations prohibited by §210 of the Act, the grant of authority will be conditioned upon the concurrent revocation of all existing authority to the extent that it authorizes the transportation of cash letters with reservation of the right by the Commission in the future to impose such terms and conditions as it deems necessary to assure that applicant's operations will conform to the requirements of §210.—Bankers Dispatch Corp. Conversion Application, 110 M.C.C. 294 (298, 313).

When the matter of common control has been raised in any proceeding, an applicant or the person who controls an applicant and another carrier bears the burden of showing complete divestiture of interest therein. Mere asserted transfer of ownership does not meet that burden.—Crete Car. Corp.—Maremont Contr.—Auto Parts, 117 M.C.C. 634 (637-638)*.

Section 210a. [*§310a U.S.C.*] **Temporary authority.—[Unchanged. See vol. 18, p. 14501.]**

Amendments, see footnote, vol. 11, p. 9472; historical notes, vol. 11, p. 9472, vol. 12, p. 10412, vol. 18, p. 14502, vol. 21, p. 17465.

Historical Note

For extension of temporary authority pending determination of permament authority see the last sentence of §558(c) of the Administrative Procedure Act, 5 USC §558(c).

Notes of Decision

Volume 11—p. 9472; Volume 12—p. 10412; Volume 13—p. 11084; Volume 15—p. 12215; Volume 16—p. 12864; Volume 17—p. 13563; Volume 18—p. 14502; Volume 19—p. 15771; Volume 21—p. 17465.

1. Construction and interpretation.—[Vols. 11-13, 15-19, 21].—See also East Tex. Motor Frt. Lines—Purchase—Lee case, §5(2), n. 110 *Temporary*, supra; I.C.C. v. Milk Producers Marketing Co. case, §212(b), n. 10, infra.

The statute gives the Commission wide discretionary power to grant motor carriers temporary authority to provide a "service for which there is an immediate and urgent need" and where there is "no carrier service capable of meeting such need'; applications for such authority are processed under the Temporary Authority Rules which require, among other things, that applications be accompanied by supporting statements of shippers which contain certain information to establish an immediate and urgent need for service that cannot be met by existing carriers. Those rules were promulgated in order to provide "necessary information" for the Commission's use in deciding temporary authority applications; they were not adopted, or intended, to confer important procedural benefits on individuals in the face of otherwise unfettered discretion as in 359 US 535; thus instant case falls within general principle that it is always within the discretion of a court or an agency to relax or modify its procedural rules when in a given case the ends of justice require it; and such action is not reviewable except on a showing of substantial prejudice to complaining party.—American Farm Lines v. Black Ball Freight Service, 397 U.S. 532 (533-4, 538-9)*.

Though rule 2(c) says that each shipper statement "must contain at least" 11 items of information, failure of Department of Defense statement (on which grant of appellant's temporary authority was based) to provide particular specifics in rule 2(c)(8) and (9) did not prejudice carriers in making precise and informed objections to the application. Neither was the statement so devoid of information that it, along with protesting carriers' replies, could not support a finding that appellant's service was required to meet shipper's immediate and urgent transportation needs. Decision in 292 F. Supp. 842, aff'd, 394 US 718, which upheld a temporary authority grant even though there may not have been literal compliance with 2(c)(8) and (9), was in line with design of §210a(a) to give the Commission a swift and procedurally simple ability to respond to urgent transportation needs; that functional approach is served by treating (8) and (9) as tools to aid agency exercise of its discretion, not as inflexible procedural conditions.—Id., pp. 534, 536-9.

The Commission's Temporary Authority Rules, unlike some rules, do not involve "jurisdictional" problems but only require certain information to be set forth in statements filed in support of the application; they are mere aids to the exercise of the agency's independent discretion. Therefore, in setting aside the grant of appellant's temporary authority application because the Commission failed to require strict compliance with its own rules, the three-judge district court exacted a standard of compliance with procedural rules that was wholly unnecessary to provide an adequate record to review the Commission's decision; judgment reversed.—Id., pp. 537-9, 542.

In suit seeking judicial review of Commission order granting temporary authority to 25 household-goods carriers, review of the administrative record shows that the Commission acted on basis of applications filed by carriers and supported by letters from shippers which asserted immediate and urgent need for proposed additional service and lack of other available service; and shows, further, that the Commission determined that an urgent and immediate need for service existed in each of the cases. In issuing the temporary authority certificates on the basis of an application thus supported, the Commission did not act arbitrarily or capriciously. Therefore, though defendants' motion for dismissal because of lack of jurisdiction to review grants of temporary authority is denied, judgment in favor of the Commission is entered.—Hussey v. United States, 271 F. Supp. 650 (653-4)*.

On basis of additional evidence received at further hearings, the oral arguments and the entire record before the court, plaintiffs' motions (1) for a new trial, (2) to order the Commission to answer certain of plaintiffs; interrogatories, and (3) to file an amended complaint, are denied; judgment sustaining the Commission order in issue remains in effect. However, denial of the motion to amend the complaint, adding a second cause of action based on the allegedly unreasonable delay of the Commission in making final determinations on carriers' applications for permanent authority, should not be construed as a decision on the merits of a possible cause of action based on delay in hearing and deciding such applications.—Id., pp. 654-5.

Temporary authority may be granted without extensive investigation into factors which will determine a grant of corresponding permanent authority, and it would be contrary to the purposes and express language of the statute to limit the Commission's ultimate decision as to the permanent authority by its grant of temporary authority to applicant. Decision relied on by plaintiff (applicant in Commission proceeding), 253 F. Supp. 891, does not support its argument that the Commission, having granted it temporary authority, has an additional burden to specify its reasons for subsequently changing its position and denying corresponding permanent authority. Commission order denying a portion of the authority sought, sustained; complaint dismissed.—Caravelle Express, Inc. v. United States, 287 F. Supp. 585 (587, 589)*.

By its terms, §210a(a) vests discretion in the Commission to grant temporary authority only when both conditions specified therein are shown; and when both conditions exist, the Commission has wide latitude in exercising such discretion. However, language of the statute makes it clear that, before the Commission may exercise that discretion, existence of both conditions is mandatory and absent either one of them the Commission has neither power nor discretion to grant temporary authority applications. When, as authorized by the statute, the Commission had adopted Temporary Authority Rules emphatically requiring applicants to provide essential information specified therein, it was capricious and arbitrary of the agency, without good cause shown, to ignore or waive compliance with critically important provisions thereof in granting considered temporary authorities.—Acme Cartage Co. v. United States, 290 F. Supp. 453 (455-7)*.

In action by motor carriers (protestants in Commission proceeding) to set aside orders of Temporary Authority Board granting temporary authorities to seven noncertificated carriers in the State of Washington to continue service they previously provided under "grandfather" certificates of registration of intrastate authority (the certificates having been cancelled pursuant to decision in 266 F. Supp. 287), evidence shows that none of supporting statements accompanying the seven applications contained information as to shippers' efforts to obtain service from existing carriers, or as to failure or refusal of existing carriers to provide needed service, which is mandatory under the Temporary Authority Rules; nor is such information otherwise shown in the record. Requirement to furnish such information is not satisfied by supporting statements concerning applicants' previous "grandfather" service; and, obviously, such information bears directly on whether needed service can and will be provided by existing certificated carriers. Therefore, as a matter of law, considered temporary authorities were erroneously granted; each of them is held null and void.—Id., pp. 456-7.

In action to annul Commission orders granting REA temporary authority to transport general commodities in express service between Washington, D.C., and Richmond, Va., the Commission did not err in considering supporting shippers' statements. While regulations governing temporary authority applications require that such statements contain detailed information on the shipper's needs, inquiries of §2(c)(8) and (9) thereof were reasonably answered when each shipper explained why it had made no effort to obtain express service from existing carriers; also, the statements were sufficiently particular to alert the Commission to continuing transportation needs of the shippers. Furthermore, the Commission could consider shippers' statements along with REA's supporting statement and in light of protesting carriers' failure to show that they were providing service comparable in all respects to REA's nationwide, co-ordinated, express service. The exercise of its discretionary authority was not arbitrary or capricious; complaint dismissed.—Estes Express Lines v. United States, 292 F. Supp. 842 (843-4)*.

In action to enjoin and set aside Commission orders granting temporary authority to transport steel to defendant carrier, the reviewing court need find only some evidence in the record to support the Commission's findings; substantial evidence is simply not required to uphold a grant of temporary authority. The Commission had before it the fact that (prior to its issuance of a cease-and-desist order) carrier and its predecessor had provided service for several years, under incorrect assumption that it had authority to do so, as well as supporting statements from 13 shippers filed with the application; thus some evidence in the record supported its finding that there was an immediate and urgent need for defendant carrier's service in a territory that had no carrier service capable of meeting that need.—Superior Trucking Co. v. United States, 302 F. Supp. 257 (261-2)*.

Although Commission regulations governing temporary authority applications require that supporting statements contain detailed information on the shipper's needs, the regulations were designed to facilitate the Commission's findings of an urgent and unmet need; thus, if facts supporting those findings are in the record, the fact that the regulations were not strictly followed should be immaterial. While numerous cases clearly state that agency regulations have the force of law and are binding on both the agency and the applicants acting thereunder, those decisions also found either substantial prejudice to one party or a tainted proceeding because crucial regulations were not followed. In instant case, however, plaintiffs cannot be prejudiced by the Commission's alleged failure to follow §2(c)(8) and (9) of the regulations, since the decision is supported by some evidence of record; also, there was substantial compliance with the temporary authority rules. As the Commission did not act arbitrarily or capriciously and did not abuse its discretion, the grant of temporary authority is sustained.—Id., pp. 262-6.

In suit to enjoin and annul Commission orders granting temporary authority to defendant carrier scope of judicial review is limited to determining whether the orders are arbitrary or capricious, an abuse of agency discretion, or otherwise unlawful. Unlike court review of many Commission orders relating to grants of certificates, the "substantial evidence" rule is not applicable in temporary authority grants. In accord with Commission Temporary Authority Rules, promulgated under §210a, many supporting letter statements of shippers were filed with the application; after considering the statements and checking them with the 11 requirements of its rule governing content, the Commission found there was immediate and urgent need for proposed service and no carrier service was available capable of meeting the need, and granted the temporary authority sought. Since the application and supporting letters, considered with all other record information including the several carrier protests, presumedly constituted a sufficient showing for the grant, considered orders are supported by the evidence of record.—Bell Lines, Inc., v. United States, 306 F. Supp 209 (213, 215, 218)*.

The Commission's Temporary Authority Rules were designed to aid shippers and carriers in furnishing information required of applicants; they were not intended as rigid limits on the Commission's discretion but as administrative guidelines; and the 11 items of information required to be contained in supporting statements have consistently been considered as guides and not as prerequisites in every case. Commission chart of the letter statements accompanying the application shows that, after checking them with the 11 criteria, each of those requirements was checked a varying number of times. Also, while it is not the court's duty to read all the letters statements, examination of a number of them verifies that some deny existence of carrier service capable of meeting shippers' need while others affirm the fact that certain carriers refused to render service desired by shippers and receivers. Thus, in view of the Commission's statutory discretion, the nature and application of its rules, and the record information before it, the court cannot say that the grant of temporary authority was arbitrary or capricious or an abuse of its discretion.—Id., pp. 215-6, 218.

Plaintiff's position in alleging that the grant of temporary authority deprives them of their property without due process of law, i.e., deprives them of revenues to be derived from services rendered thereunder, is not tenable. Under §210a, a grant of temporary authority creates no presumption that corresponding permanent authority will be granted; discretion is vested in the Commission to ascertain the need, whether carrier services capable of meeting the need are available in the area, and, if not available, to grant temporary authority to a carrier to supply the need for a limited period of time. That was a policy decision of the policy making branch of the government. Plaintiffs' position echoes arguments urged in the 268 F. Supp. 239; but the Supreme Court reversed that decision, 389 US 409, negating any such property rights of those protestants. Also, in 355 US 83, the court quoted with approval a Commission statement that no carrier should be protected from competition in continuing service that fails to meet a public need, nor should the public be deprived of a new and improved service because it may divert traffic from other carriers. Complaint dismissed.—Id., pp. 217-19.

Standards for granting temporary authority are not the same as those demanded for grants of permanent authority; the Commission has broader discretion and may act much more summarily under §210a; and administrative review process for grants of temporary authority calls for different legal evaluations than for permanent orders. In short, the procedures for granting temporary and permanent authority are statutorily and legally separate and distinct. Therefore, when the Commission, after its decision and order granting similar permanent authority to 19 household goods carriers was set aside and remanded by the court, proceeded to consider and grant the same carriers' applications for temporary authority to transport household goods between Hawaiian points and points on the mainland, it did not interfere in the slightest with the court's order regarding grants of permanent authority. Thus, it was not necessary for the Commission to seek the court's permission before processing the applications for temporary authority. Moreover, even if the Commission may have based its orders granting temporary authority upon the same evidence that the court found insufficient to support the permanent-authority grants, that was properly within its discretionary power under§210a and did not contravene the court's orders under §§206 and 207. Plaintiffs' motion to enforce judgment and for temporary relief is denied.—H C & D Moving & Storage Co., Inc. v. United States, 317 F. Supp. 881 (883)*.

The Commission's action granting temporary authority is subject to judicial review only when it is arbitrary or capricious or where the agency exceeded its statutory authority or committed an error of law. As the definition of an arbitrary or capricious administrative action in 155 F. Supp. 581, applies to Commission grants of temporary authority, the record must show only that there was "some evidence" upon which it could based its decision. Therefore, the Commission's initial grant and extension of temporary authority to defendant carrier were not arbitrary or capricious when record before the court, to which more than 30 supporting statements of shippers are attached, shows the agency had sufficient information to give the application therefor reasoned consideration. The court will not inquire into soundness of the decision reached by the Commission after such consideration.—Navajo Freight Lines, Inc. v. United States, 320 F. Supp. 318 (320)*.

Also, the Commission acted within its legal authority in extending considered temporary authority until final disposition of pending application for permanent authority. The Supreme Court held in 353 US 436, that the Commission has authority to extend duration of temporary authority until final disposal of the permanent-authority application; and though plaintiff contends that, in addition, that case requires the Commission to meet four listed criteria before exercising that power, and claims two of those criteria were not met, the evidence of record in the case shows, to the contrary, that all four of those criteria were, in fact, met. Accordingly, since there was some evidence to support the initial grant and extension of temporary authority, and the Commission acted within its legal authority, plaintiff's action to enjoin the Commission's orders is dismissed.—Id., pp. 320-1.

It is argued in action to review Commission decision which found plaintiff (applicant) unfit to receive the certificate applied for, that plaintiff had received temporary authority to provide the service which it held for a considerable period of time prior to final denial of its application for permanent authority and that, consequently, the Commission should have found that plaintiff was a fit applicant; however, by statutory command, the grant of temporary authority created no presumption of fitness in plaintiff's favor. Also, the Commission's conclusion is supported by substantial evidence in the record of violations of the law and Commission rules and regulations. Complaint dismissed.—Consolidated Carriers Corp. v. United States, 321, F. Supp. 1098 (1100)*.

Review of the record in competing carriers' action to set aside and annul Commission order granting temporary authority to defendant carrier and, also, authorizing it to tack the authority with its existing authorities and to interline traffic at Silver City, N. Mex., reveals evidence in support of the required statutory finding by the Commission of an immediate and urgent need for the service and a present lack thereof in the service area. The cases speak of "any" and not "substantial" evidence as being sufficient to support the finding; and in fact, carrier's statement in its application and the supporting letters as to urgent need and lack of service constitute a sufficient evidentiary showing. [265 F. Supp. 669.] Also, the Commission's finding of need for and lack of service in the area necessarily means toward and from; that need is met by the tacking and interlining authority in considered order; and resulting "bridge" for through east-west service is incidental to the requisite satisfaction of that need.—Braswell Motor Freight, Inc. v. United States, 336 F. Supp. 709 (713)*.

Under §210a, the Commission has discretionary authority to grant temporary authority to meet urgent needs for service through either the tacking and interlining technique or by an express wording of a temporary duplication of existing routes east and west of the service area. In addition, equities are with intervening defendants because the temporary operating rights granted are merely a replacement of long time services that had been disrupted by cancellation and discontinuance of joint or connecting services by other carriers. The Commission did not abuse its discretion nor act arbitrarily or unlawfully in (1) reopening defendant carrier's temporary authority proceeding, (2) granting it the temporary authority, and (3) authorizing it to tack that authority and to interline traffic; and the challenged order is in all respects a lawful, valid and enforceable order. Complaint dismissed.—Id., p. 713.

Contrary to plaintiff's contention, the precedent governing judicial review of the Commission's orders granting temporary authority to intervenor to transport trailers designed to be drawn by passenger vehicles, in initial movement over irregular routes, between named points in the "some evidence" test as set forth in 302 F. Supp. 257. Review of instant record clearly shows that supporting shippers filed numerous affidavits to the effect that there was an immediate and urgent need for service and that they were unable to obtain service from plaintiff (as well as receive services promised by it) and from carriers holding permanent authority to provide transportation of the kind, and in the area, involved; thus, there was some evidence supporting the grant of temporary authority to intervening carrier. Commission orders under review, sustained; complaint dismissed.—National Trailer Convoy, Inc. v. I.C.C., 352 F. Supp. 945 (946)*.

Nothing in §210a(b) suggests that the Commission has authority to impose employee protective conditions thereunder, and its authority to do so under §5 is found only in the power to impose just and reasonable conditions in connection with authorizing and approving §5 transactions. Therefore, in view of denial of proposed motor carrier purchase transaction, employee union's argument that employees are entitled to severance pay even if application is denied, which is premised on the grant of temporary authority under §210a(b), and union's claim that temporary authority granted was in contemplation of possible approval of the purchase, need not be further considered.—National Freight, Inc.—Purchase—Pittsburgh Wheeling Exp., 97 M.C.C. 642 (649-50, 655).

In cases involving conversions of certificates of registration to certificates of public convenience and necessity under §207 when they are directly related to a §5 application, the Commission's objective in approving temporary authority under §210a(b) pending disposition of the §5 application is to preserve existing motor carrier operations, if failure to grant such temporary approval may result in their destruction or interfere substantially with future performance of continuance service to the public. New operations instituted under such temporary authority which deviate substantially from operations conducted under existing authority cannot alone be considered evidence of past lawful operations supporting a public need for their continuance. Thus, applicant's operation under temporary authority is not best evidence of public need for the proposed service.—Transport Serv.—Control—Gould, Inc., & Co. Frt., 109 M.C.C. 359 (378-9).

In this rulemaking proceeding, Commission abolished the exception accorded the Department of Defense allowing the Department, when appearing as a supporting shipper in applications for temporary operating authority, to furnish its supporting statements directly to Commission's Motor Carrier Board, which exception placed an undue burden on possible protestants. Commission also required Department to certify the accuracy of such statements as this would impose no burden on the Department and would place it on an equal footing with other shippers.—Motor Carrier Temporary Authorities, 112 M.C.C. 288 (297-9)*.

The Commission was unable to find satisfactory evidence to establish an immediate and urgent need for service which could not be met by existing carriers, and such evidence is statutorily required for the issuance of emergency temporary authority. Applicant was found to seek to restructure an existing service rather than to institute a needed service. Denied.—REA Express, Inc., Application for ETA, 117 M.C.C. (87, 90).

Although operations under temporary authority raise no presumption of a need for corresponding permanent authority and are alone insufficient to justify a grant of authority, evidence of past operations under temporary authority is, nonetheless, of probative value to support an application for permanent authority where it is used to determine the ability of a carrier to provide the proposed service and indicates the volume of the traffic involved and the effect of a grant of authority on existing carriers, and there is other evidence to support the application. Since applicant has been providing the transportation of general commodities, with exceptions, in single-line service, between Portland, Oreg., and Seattle, Wash., under temporary authority and has satisfactorily met the reasonable transportation requirements of the supporting shippers application granted subject to conditions.—Trans West, Exp., Inc., Ext.—Seattle-Portland, 118 M.C.C. 1 (10, 11).

Entire Commission rejected proposed modifications of present procedures in processing of contract carrier temporary authority applications as regards filing and notice requirements, and permission for automatic extensions of service by contract carriers to displace service not subject to part II of the Act. Petitioner failed to show an immediate and urgent need for the types of temporary authority at issue; existing service must be accorded a reasonable trial before new service is authorized even temporarily; proposals are inherently discriminatory against common carriers; and the proposals would void the Commission's statutory responsibility to determine if an immediate and urgent need exists for new service. The Commission feels that present regulations are sufficiently flexible and responsive to meet any immediate and actual emergencies that may arise.—Motor Carrier Temporary Authority, 118 M.C.C. 444 (455-60).

Regulations of the Commission

34 FR 441, Jan. 11, 1969, Part 1131: Temporary Authority Applications Under Section 210a(a) of the Interstate Commerce Act, §1131.2(a), (c), and (d)(4), §1131.4(a)(1) and (b), and §1131.6(a) and (c) are amended by changing "Temporary Authorities Board" therein to read "Motor Carrier Board", effective Jan. 21, 1969.

34 FR 18122, Nov. 11, 1969, Part 1131: Temporary Authority Applications Under Section 210a(a) of the Interstate Commerce Act, §1131.2 Filing of applications, "BOR-95" changed to "OP-95" in paragraphs (b) and (d)(1), effective on publication in the Federal Register.

35 FR 17045, Nov. 5, 1970, Part 1131: Temporary Authority Applications Under Section 210a(a) of the Interstate Commerce Act, §1131.2 Filing of applications, paragraph (c) *Supporting statements* amended to read as set forth, effective Dec. 14, 1970.

36 FR 14384, Aug. 5, 1971, Part 1131: Temporary Authority Applications Under Section 210a(a) of the Interstate Commerce Act, new General Policy Statement Concerning Motor Carrier Temporary Authority Procedures, to appear ss a note following §1131.2, effective as of the date of service.

36 FR 14431, Aug. 5, 1971: General Temporary Order 7, temporary authority to perform motor carrier services during emergency caused by strike of railroad employees, effective on date of order.

38 FR 4457, Feb. 14, 1973: General Temporary Order No. 8, temporary authority for motor carriage of property or passengers, for not more than 30 days, because of emergency caused by strike of Penn Central Transp. Co. railroad employees, effective Feb. 8, 1973.

38 FR 10445, Apr. 27, 1973, Part 1003: List of Forms, §1003.1 Motor carrier and broker forms, subhead OP-95 (temporary authority applications) revised to read OP-MCB-95 (revised 1972), effective May 28, 1973.

38 FR 26205, Sept. 19, 1973, Part 1003: List of Forms, Prescribing Form OP-F 46 to be used for application for temporary operation of motor carriers pursuant to §210a(b), effective Sept. 23, 1973.

39 FR 2771, Jan. 24, 1974, Part 1341: Temporary Authority Applications Under §210a(a) of the Interstate Commerce Act. Promulgates 49 CFR 1131.7 regarding State registration of temporary authorities, effective Mar. 1, 1974.

39 FR 7925, Mar. 1, 1974, Part 1341: Temporary Authority Applications Under §210a(a) of the Interstate Commerce Act. Effective date of order of Dec. 17, 1973, regarding State Registration of Emergency Temporary and Temporary Authority set at May 31, 1974.

39 FR 11192, Mar. 26, 1974, Part 1131: Temporary Authority Applications under §210a(a) of Interstate Commerce Act. Correction of regulations published at 39 FR 2771 and 39 FR 7925 as to part heading.

39 FR 12010, Part 1131: Temporary Applications Under §210a(a) of Interstate Commerce Act. Effective date of order entered Dec. 17, 1973, set for May 31, 1974.

Section 211. *[§311(a) U.S.C.]* Motor transportation brokers—(a) License required.—[Unchanged. See vol. 10, p. 8067.]

Notes of Decisions

Volume 10—p. 8067; Volume 11—p. 9473; Volume 21—p. 17468.

5. Employment of carriers not authorized to operate.—[Vols. 10, 11, 21].—Operations of plaintiff broker (defendant in Commission complaint) in arranging for daily bus transportation of individual passengers on a per capita fare basis between Milwaukee, Wis., and Sportsman's Park near Chicago, Ill., are prohibited by the statute when carrier used holds no authority to operate between those points and considered transportation does not involve incidental charter-party service permitted by §208(c). The Commission found that plaintiff advertised the trips as available to an individual, without mentioning any group activity or nontransportation features, and sold individual tickets; patrons did not appoint plaintiff as agent to arrange trips for the group; also the transportation was arranged before a group was formed and was so frequently performed that it amounted to a regular scheduled or non-scheduled service. Commission findings being supported by substantial evidence, and no error of law being shown, complaint to set aside the cease-and-desist order is dismissed.—Travel & Tour Service, Inc. v. United States, 302 F. Supp. 188 (191-2, 193)*.

Section 211.(b) [*§311 (b) U.S.C.*] Issuance of license; brokers in operation prior to enactment of section.—[Unchanged. See vol. 11, p. 9473.]

Amendments, see footnote, vol. 11, p. 9473, historical note, v. 14, p. 11605, vol. 21, p. 17468.

Notes of Decisions

Volume 10—p. 8068; Volume 11—p. 9474; Volume 12—p. 10413; Volume 13—p. 11084; Volume 14—p. 11605; Volume 15—p. 12215; Volume 16—p. 12865; Volume 17—p. 13564; Volume 18—p. 14503; Volume 19—p. 15772; Volume 21—p. 17468.

3. Applications, generally; parties; notice.—[Vols. 11-15, 17, 18, 21].—On further consideration the entire Commission affirmed grant of broker authority to applicant, a wholly owned subsidiary of Kerrville Bus Company; the majority found that discriminatory possibilities were not present, since applicant and Kerrrville Bus Company have separate corporate identities, since while operated by common officers and directors such officials have no financial interest in either corporation, and since there is no indication on record that applicant will favor parent bus company over other bus companies. Futhermore, applicant has affirmatively shown on the record that it will use the motor bus carrier best able to perform service for tour patrons; therefore, circumstances herein do not negate exercise of independent action and decision by applicant broker (but see dissent).—Kerrville Tours, Inc., Broker Application, 100 M.C.C. 270 (271-2)*.

While applicant corporate broker and Texas, New Mexico and Oklahoma Coaches, Inc., have common officers and directors, such persons have very little financial interest in the bus company. In addition, there is no indication that applicant will prefer said company over other carriers; in fact, to the contrary, applicant has shown that it will use all available bus carriers and that it will exercise discretion in awarding traffic to particular carriers. Therefore, on reconsideration the entire Commission reversed prior findings and granted the requested authority (but see dissent).—T. N. M. & O. Tours, Inc., Broker Application, 100 M.C.C. 279 (281)*.

Fitness of applicant: Applicant's past violations, consisting of arranging tours similar to proposed operations without authority, were not the result of a willful design to evade the regulatory jurisdiction, but appear to be the result of misunderstanding of the applicable law, and apparently it will henceforth operate lawfully. In the circumstances, applicant is fit to receive the authority requested; however, such findings are not to be construed as condoning the past unauthorized operations, and applicant is admonished to conform to the statutory requirements.—Howard Tours, Inc., Broker Application, 95 M.C.C. 405 (411).

Protestants' assertion that applicant is unfit, because its Rhode Island corporate charter may not authorize it to engage in the proposed operation, is without merit. The Commission has no jurisdiction to determine whether or not operations by applicant under the license here sought would be *ultra vires*.—Automobile Club of R.I., Inc.—AAA Broker Application, 98 M.C.C. 540 (542).

Applicant's petition for operation as broker denied on following bases: failure to establish fitness, willingness, or ability to perform the proposed service (including financial inadequacy); proposals by applicant appear to be needlessly duplicative of existing service; and applicant's relationship with common carriers. It has long been held by Commission that common directorates and common ownership between a broker and a motor carrier of passengers would deprive the broker of the unrestrained independence of judgment which is required of a broker in order that he may provide the best and most economical services available. 83 MCC 406 (1960). Applications granted in exception to such relationships were generally unopposed and approved after establishment of public interest.—Gray Line National Tours Corp. Broker Application, 114 M.C.C. 914 (921-923).

4. Public interest, in general.—[Vols. 10-19, 21].—See also The Gray Line, Inc., Extension case, §208(c), n. 10; Gray Lines National Tours Corp. case, §211(b), n. 3, supra.

In passenger brokerage applications an essential element is a showing that proposed service will benefit the traveling public and carriers providing the acutal transportation service, and will fulfill a public need not already being met. Such showing would normally be made through testimony of interested members of the public, or, under certain conditions, a plan of future operations, coupled with supportive evidence by existing motor carriers, might suffice. No public witnesses appeared, and declarations of applicant's operating witnesses that there is public support for its tour service are unconvincing in absence of a showing of specific future plans and public response to applicant's past offerings. Insofar as applicant seeks authority for general brokerage of round-trip tours from York, Pa., to all points in eastern States, it has clearly failed to sustain its burden of proof.—White Rose Motor Club Broker Application, 95 M.C.C. 101 (104).

Insofar as applicant seeks authority to arrange motor transportation from York to airports and steamship docks in connection with its foreign travel tours, a grant might be justified without public support from prospective tour patrons, since that limited type of service is one which it requires if its foreign tours are to be attractive and which it would be in better position to arrange than protestants. However, applicant's evidence so completely lacks specificity that it is impossible to determine the actual requirements for brokerage authority. Although applicant has arranged 65 to 70 all-expense tours, there is no evidence concerning the number of its patrons who used motor service, nor any showing of the points to which applicant has arranged or expects to arrange bus service from York; denied.—Id., p. 104-5.

Although supporting evidence did not demonstrate with clarity a need for applicant's service to the entire extent proposed, and the record is uncertain whether applicant's proposed tours would receive substantial public response in certain locations, applicant has demonstrated a need for proposed service from points in California; applicant has had experience in arranging tours in the past, and an educator who appeared in support of the application asserted that students and teachers desire and would benefit from tours of an educational nature as proposed; furthermore, protestant does not provide educational tours, and will benefit from business thus generated. Granted in part.—Howard Tours, Inc., Broker Application, 95 M.C.C. 405 (408-9).

Applicant broker, authorized at New Bedford, Mass., is required to show that its proposed service will fulfill a useful function and be of benefit to carriers or the public; and the record is persuasive that another authorized service at Fall River, Mass., will be responsive to a public need and generate traffic to the benefit of certificated motor carriers. Moreover, although applicant has performed considered operations through an unauthorized branch office at Fall River, it did not intend to evade regulation, but rather it misunderstood the extent of its operating authority. Granted.—Paragon Travel Agency, Inc., Extension—Mass. and R.I., 100 M.C.C. 641 (644)*.

Proposed broker operation would be conducted only in connection with passenger service to be provided by applicant bus line, and there is no indication that broker applicant is willing to perform brokerage service using other underlying carriers; therefore, and in absence of any reasonable showing of public demand for such service, the application is denied.—Gray Line Scenic Tours, Inc., Contract Carrier Application, 103 M.C.C. 807 (808, 818)*.

Applicant, a travel agency, seeks a license authorizing operations as a broker at Washington, D. C., for transportation by motor vehicle, of passengers and their baggage, in charter operations, between points in United States. On exceptions, examiner's denial as to transportation for domestic passengers was affirmed. However, as to brokerage service in behalf of passengers from foreign lands, applicant proposes to promote and organize custom-made tours, of various nationalities gathered in Europe, designed to cater to European tastes. One protestant has an office overseas; but applicant is proposing custom-made tours whereas protestant offers package tours. Protestant uses New York and California gateways for such brokerage service whereas applicant will use Washington, D. C. Thus, proposed service will not result in useless duplication of service but will generate traffic beneficial to both public and existing carriers; application granted in part.—Sanders World Travel, Inc., Broker Application, 110 M.C.C. 246 (248).

To meet the statutory requirement of consistency with the public interest, applicant for a borkerage license must establish that the proposed service will contribute something of value or be of benefit to carriers or the public.—Elegante Tours, Inc., Broker Application, 113 M.C.C. 156 (159).

Applicant, a bus terminal operator, has merely shown that it acts as a ticket agent for several motorbus operators, but it has shown no plans to arrange or formulate tours, no professed expertise or experience in this overall field, and no support by the traveling public or the carriers it serves as agent. Denied.—Newburgh Terminal Corp. Broker Application, 115 M.C.C. 358 (364-5).

5. License covering part of operations sought.—[Vols. 10, 12, 14, 18, 21].—The Commission may grant applicant's requested authority in whole or in part. Evidence shows that applicant's proposed service will meet the needs of the traveling public and that the Providence and Cranston, R.I., areas are clearly able to support additional broker services; however, need is shown for broker activities only in connection with round trip, all-expense tours, and authority granted is so limited.—Automobile Club of R.I., Inc.—AAA Broker Application, 98 M.C.C. 540 (544).

10. Hearings; evidence.—[Vol. 19].—Although its counsel was unable to attend hearing, protestant's requests for postponement were denied, after applicant pointed out that protestant had already delayed disposition of case through late intervention and that numerous witnesses had planned to appear on scheduled date. Protestant's right to select counsel and have reasonable continuity in representation is not an unqualified one, and it does not give him right to choose a particular attorney without regard whether attorney has time to try case; furthermore, counsel's inability to attend hearing does not in itself deprive protestant of right to due process of law. In instant proceeding, protestant had sufficient time to call on other counsel, and, although protestant's president, experienced in examing witnesses and giving testimony, appeared at hearing, he declined to cross-examine witnesses or present evidence. Full opportunity was given protestant to present evidence and confront applicant's witnesses in cross-examination, and any further delay in disposition of case would constitute infringement upon applicant's right to prompt decision.—Francisco Oliveira Travel Agency, Inc., Broker Applic., 99 M.C.C. 545 (548-50).

The division granted a motion to strike the testimony of more than 30 witnesses for whom no certifications of support had been filed. This proceeding was handled under special rules of procedure, and at a prehearing conference applicant had specifically agreed to submit certifications. The rule in 111 MCC 630 (1970), did not apply because (1) applicant did not show it was unaware of the interests of these witnesses when it prepared its initial statement regarding support, and (2) the witnesses themselves were not members of the travelling public, but rather were professional travel agents whose interests are generally fixed and who should be familiar with the requirements of testifying in support. That case cannot be viewed as an open-ended invitation to secrete witnesses and spring them on unsuspecting protestants.—Gray Line National Tours Corp. Broker Application, 114 M.C.C. 914 (917-918).

24. When license necessary, in general.—[Vols. 10-19, 21].—See also Automobile Club of R.I., Inc.—AAA Broker Application, §203(a)(18), n. 1.

A New York City newspaper was charged with illegally engaging in operations as a broker without first having obtained appropriate authority from the Commission. Defendant entered into a purported agency agreement with an authorized broker; however, the defendant had assumed the power to establish and develop tours, to enter into contracts, to establish charges, to take the risk of profit and loss, and had assumed the responsibility to maintain records of the transportation arranged without consultation with the purported principal. An independent travel agent may perform those functions which establish and maintain contact between a tour patron and the broker who is licensed to establish and conduct such tours. However, a broker's license entails many responsibilities of a personal nature that can be performed only at a point specified in the license and only by the actual holder of the license.—Manhattan Transit Company v. Staats Herold Corp., 108 M.C.C. 168 (173).

The basic discretionary acts of a broker may not be performed by another, separate entity, and the power to exercise a broker's primary functions may not be leased, sold, or otherwise transferred without the approval of the Commission. A licensed broker may not delegate to another under a purported agency agreement those basic functions of direction and control for which the authorized holder of the license is primarily responsible. In this case there was no domination, direction, and control by the actual holder of the license over the tour operations of the defendant. Defendant was found to be performing many of those functions which a broker may not delegate to another, and is therefore operating as a broker without holding appropriate authority in violation of §211(a) of the Act. A cease and desist order was entered against the defendants.—Id., pp. 172-3.

28. Change in control of association or corporation licensed.—[Vol. 15].—Change in control of a corporation holding a broker license may be accomplished only with Commission approval upon application and proof that the change in control will not be contrary to the public interest. Showing that defendant signed a refund check of A-1 Coach, while indicating that he holds a position of some authority in that company, is not sufficient evidence to establish that he has acquired control thereof.—Allied Bus Corp. v. Goldman, 103 M.C.C. 559 (569).

30. Conditions imposed; scope of operations.—[Vols. 17-19, 21].—Generally, in grants of brokerage authority, limitations either as to a class of users or as to a type of tour should not be imposed, except where only specialized brokerage service, e.g. ski tours, is proposed or where the protection of existing services warrants appropriate limitation. There are no circumstances which warrant a narrowing of the service proposed by applicant to the conduct of "educational tours" or "tours available only to students and teachers". Such a limitation would be undesirable, as it would preclude applicant from including others who might reasonably want to be included in touring groups, even those primarily with an educational purpose, and would not be in the public interest.—Howard Tours, Inc., Broker Application, 95 M.C.C. 405 (409-10).

Kirkland case, 61 MCC 691, not only limits broker's making or entering of contracts to point or points of authorized operation, but also restricts operations in arranging for and selling of transportation by motor vehicle to point or points named in broker's license; such restriction cannot be defeated by using or establishing agencies located at other points. Therefore, except for noted exceptions, operations of a broker in arranging for and selling of transportation by motor vehicle is restricted to point or points named in its license; applicant's activities at Fall River, Mass., where he is not licensed to operate, are unlawful.—Paragon Travel Agency, Inc., Extension, 100 M.C.C. 641 (643-4)*.

Applicant, a travel agency located at Washington, D.C., was granted authority to transport foreign tourists between points in United States, in sightseeing and pleasure tours. All of the protestants (except one) have authority to transport domestic passengers in similar operations. In order to protect the interest of existing motor carriers of passengers, applicant's authority is restricted to making arrangements for persons having a prior movement in foreign commerce by air and using Dulles International Airport, Va., as a port of entry so that the authority granted will conform to the need shown.—Sanders World Travel, Inc., Broker Application, 110 M.C.C. 246 (252).

Commission found it unnecessary to adopt separate regulations concerning the meaning of terms used in brokerage licences as Commission herein categorized and described various types of passenger brokers, including "tour" brokers; brokers of regular route, charter, and special operations; brokers of "special and/or charter operations"; and brokers of all forms of passenger transportation as well as the relationship between a broker and its agents.—Passenger Transportation in Special Operations, 112 M.C.C. 160 (186-90).

When granting passenger brokerage authority, a limitation either as to a class of users or as to a particular type of service should not be imposed, except where a specialized service is proposed or where the protection of existing service warrants appropriate limitation.—Elegante Tours, Inc.—Broker Application, 113 M.C.C. 156 (159).

Citing 61 MCC 691 (1953), it has been consistently held that a broker, although limited by the terms of his license to doing business at a particular location, may nevertheless solicit business and interview prospective patrons, either himself or through agents at other points, provided that the actual brokerage contract is entered into or executed at his authorized place of business. That is, the parties must mutually sign the contract at that specific point. The reason is that a need for brokerage services at other points has not been shown. The defendant was therefore issued an order to cease and desist from the practice of contracting tours through unauthorized agents at points other than Dallas, Tex.—Trails West, Inc. v. Continental Trailways, Inc., 115 M.C.C. 269 (273-276)*.

Section 211. (c) [§*311(c) U.S.C.*] Rules and regulations; bond or other security required.—[Unchanged. See Vol. 10, p. 8072.]

CONSULT THE TABLE OF CASES WHENEVER A CITATION IS FOLLOWED BY AN ASTERISK

In a proceeding instituted on the Commission's own motion, it was found that no affirmative action with respect to changing or modifying the existing bonding requirements for brokers subject to economic regulation under the Act was warranted. This finding was based on the following: since the implementation of record-keeping requirements of brokers no problem has been found with respect to the handling of funds entrusted to licensed brokers; there have been only two complaints filed against licensed brokers since 1936; since in all but a few cases bonds are obtainable only on a full collateral basis, any increase in required security would eliminate effective brokers and prevent others from entering the field; and the public interest is already well protected by the conservative practices of surety companies.—Broker Security for Protection of the Public, 115 M.C.C. 1 (8-11).

1. Construction and interpretation.—[Vols. 11-19, 21].—See also Ace Doran Hauling & Rigging Co. Investigation case, §204(b), n. 7 *Heavy;* All-American Transport, Inc.—Control and Merger case, §206(a)(1), n. 2; Bowser—Investigation of Operations case, §206(a)(1), n. 26; C & H Transp. Co., Inc. Petition for Interpretation case, §204(b), n. 7 *Heavy;* Connecticut Limousine Service, Inc. v. United States case, §207(a), n. 6 *Passenger;* Lester C. Newton Trucking Co.—Purchase—Buglio case, §5(2), n. 115; May Trucking Co. v. United States case, §17(3), n. 1a; Passenger Transportation in Special Operations case, §211(b), n. 30, and §208(c), n. 3; Southwest Freight Lines Ext.—Removal of Restriction case, §207(a), n. 10, supra; Zuzich Truck Lines, Inc., Investigation of Permit case, §212(c), n. 5, infra.

The Commission's conclusion, in its investigation proceeding, that terms of certificate in issue are not patently ambiguous and that, therefore, the certificate must be construed in accordance with language therein without considering any matters antecedent to its issuance, is without a rational basis in the record. The Commission found that certificate granting general commodity authority and describing geographical scope thereof in two sub-paragraphs, each indented from (and placed below) the granting clause, conferred two separate operating rights that could be tacked at common points; however, there is another equally (if not more) reasonable interpretation of the authority that reasonably could be adopted, i.e., that the two sub-paragraphs, each of which permit service from and to certain points and places, merely modify a single right—the authority to transport general commodities. Hence, conceding *arguendo* that the Commission's interpretation is a reasonable one, and concluding that interpretation as a single right is also a reasonable one, then by any plain use of the English language, considered certificate is "patently ambiguous".—Akers Motor Lines, Inc. v. United States, 286 F. Supp. 213 (219-22)*.

The court is not displacing the Commission's choice of two reasonable interpretations of the certificate with its own preference; rather, it is the existence of two conflicting, but plausible, constructions which creates sufficient ambiguity in the certificate terms to warrant holding that the Commission's finding of no patent ambiguity was erroneous, and that such finding was arbitrary, capricious, and constituted an abuse of agency discretion. Furthermore, since the Commission's interpretation permits a cross-haul service for which no need was shown, and since it discontinued the investigation without determining whether the certificate could be modified because inadvertently issued, the Commission acted in disregard of its statutory mandate. Reversed and remanded with instructions to (1) examine administrative history of, and determine scope of authority conferred by, considered certificate and (2) decide whether inadvertent issuance thereof illegally enlarged the scope of carrier's authority.—Id., pp. 222-3, 226.

In suit to set aside the Commission's decision on further consideration, following remand in 251 F. Supp. 526, wherein it found that plaintiff's certificate was clear and unambiguous on its face and that territorial description therein "Between points in Connecticut, Pennsylvania, New Jersey, and New York within 100 miles of Columbus Circle, New York, N.Y., ***" did not permit it to serve any points or places in those four States which are more than 100 miles from Columbus Circle, the Commission improperly concluded that disputed language of the restriction "within 100 miles of Columbus Circle" involved technical terms of art, interpretation of which was subject to its own peculiar expertise. As a matter of grammatical construction, there can be no question but that the 100-mile provision applies only to New York; and whether under rule of grammar designated as "Doctrine of the Last Antecedent", or as a matter of simple common sense, absence of a comma after first reference to "New York" clearly indicates such interpretation of authorized base territory described in plaintiff's certificate. Commission order at issue is set aside and enjoined.—T. I. McCormack Trucking Co., Inc. v. United States, 289 F. Supp. 39 (40-42)*.

In suit to enjoin enforcement of Commission decision as an unreasonable interpretation, on its face, of plaintiff's certificate, nothing of record marks as clearly erroneous the Commission's finding that language in the certificate limited commodities authorized to road-building machinery and equipment and, thus, plaintiff's authority to transport "road building machinery and equipment which because of size or weight requires special equipment" permits it to transport only such machinery and equipment which is identified with road construction and which, because of size or weight, requires the use of special equipment. Evidence in initial proceeding on application of plaintiff's predecessor clearly shows that road-building machinery and equipment, not complete heavy-hauling, authority was sought and granted. And the Commission's application of its "intended use" test, i.e., that the machinery and equipment be intended for use in road construction, was not unreasonable, arbitrary, impractical, or inappropriate to the issues involved. Injunction denied, previous issued restraining order dissolved, and Commission decision sustained.—Heavy Duty Haulers, Inc. v. United States, 293 F. Supp. 879 (882-6)*.

The Commission's interpretation of plaintiff's certificate (Part B) to transport "Buildings, complete, knocked-down, or in sections, * * * materials, * * * and when shipped with such buildings, accessories used * * * ", as not authorizing it to transport considered independent shipment of ornamental iron columns is supported by a rational basis of record. Part B of the certificate is limited by the "intended use" restriction, a commodity description technique used by the Commission as a practical necessity whenever use of specific names or generic terms to identify commodities to be transported would prove impractical; and, as the authority is clearly limited, restricted, and characterized by the phrase "buildings, complete, knocked-down, or in sections" and cannot reasonably be construed as "building(-) *** materials" generally, the materials plaintiff transports must be related to either "buildings" or "pre-fabricated and precut buildings or houses" (Part A of the certificate), or be so destined.—Pre-Fab Transit Co. v. United States, 306 F. Supp. 1247 (1251)*.

Plaintiff's reliance on earlier decision of the court as authority under Part B for its transporting building materials generally, such as ornamental iron columns, is misplaced. That decision held that plaintiff could transport independent shipments of building materials which were intended to be used as a part of some determinable building in the future; but deciding that it could haul building materials (including component parts) for transportable buildings independently—not as part of same shipment—of the entire building, however, is not the same as holding that it has authority to haul "building materials" generally. And measured by entire context of plaintiff's certificate, the Commission's finding that the ornamental iron columns in question constituted "standardized building material" in general was, under the circumstances, the only reasonable conclusion to be reached. Therefore, since on the record the Commission properly and reasonably decided the issues presented, its decision is sustained.—Id., pp. 1250, 1251-2.

While only condition specified for revoking or modifying a certificate under §212(a) is "willful failure to comply" with applicable law or a lawful Commission order or regulation, both court and Commission decisions recognize that the Commission has inherent power to correct an obvious injustice by revoking or modifying a certificate obtained by fraud or misrepresentation or inadvertently issued. Plaintiff's ostensibly restrictive amendment actually broadened scope of its application; thus, when that amendment (accepted after notice of application was published) was incorporated into the certificate without republication of notice, intervening defendants who had no notice of the amendment could not have anticipated that the certificate would enable plaintiff to operate in competition with them; lack of proper notice deprived interveners of the opportunity to appear in opposition to the application and, therefore, the Commission had inherent power to correct the obvious injustice. A broadening amendment having been incorporated therein without notice to competing carriers, the Commission had the power to cancel plaintiff's certificate and issue the modified one; it correctly exercised such power; sustained.—Carl Subler Trucking, Inc. v. United States, 313 F. Supp. 971 (976-7)*.

The Commission had jurisdiction to act on carriers' complaint requesting investigation into alleged unlawful operations under certificate which one plaintiff (defendant) was seeking to transfer to the other and, also, that such certificate (if transferred) be corrected to show that carriage of general commodities was not authorized between named Montana points. Plaintiff's argument that the Commission lacked grounds for an investigation under §212(a), as the complaint did not specify any illegal operations, is based on cases involving certificate revocations but, in instant case, there was no revocation; the Commission's decision withdrew nothing from plaintiffs which they legitimately had. Also, as noted in 358 US 133, correction of inadvertent ministerial errors is authorized by §17(3); and it is well settled that the Commission may review mistakes due to inadvertence. The Commission specifically found that patent ambiguity in considered certificate was due to inadvertent ministerial error and it was justified in reviewing the certificate. Thus, the court can find no jurisdictional deficiency.—Lund v. United States, 319 F. Supp. 552 (555-6)*.

The Commission concluded that the certificate should be modified because portions thereof were ambiguous, never intended to be authorized, and were the result of inadvertent clerical error; and the reviewing court is bound by the Commission's interpretation of an interstate certificate unless it is capricious or arbitrary, constitutes an abuse of discretion, or violates a principle of law. Congress placed the task of construing a certificate upon the Commission and such construction will not be disturbed unless clearly erroneous. The Commission was not in clear error when it found an ambiguity on the face of certificate in question; indeed, litigants' arguments express a manifest ambiguity in language used therein; and, since neither interpretation of the general-commodity authority is without some merit, the Commission properly reviewed original "grandfather" proceedings to decide the extent of authority intended to be granted. Review of the record discloses no error in the Commission report regarding the originally intended grant of general-commodity authority or in the order correcting and modifying the certificate transferred; sustained.—Id., pp. 556-8.

The courts have recognized the Commission's power to interpret certificates it has issued in the light of its own standards and industry usage. And in instant case, the Commission was interpreting plaintiff's certificates with reference to a long-existing regulatory scheme and industry usage when it concluded that certificated authority to transport "complete buildings" and "prefabricated buildings" did not authorize plaintiff to transport single-unit mobile homes, and required it to cancel its tariff rates on mobile homes; the Commission's action in that regard was proper. The substantial evidence of an historical, both industrial and regulatory, distinction between mobile housing—exemplified by house trailers—and prefabricated, sectionalized buildings designed to be permanently erected at delivery site, supports the Commission's finding that there is a valid distinction between the terms "mobile home" and "prefabricated building" as used in commodity description of the authority granted. The Commission's order is founded upon substantial evidence and is sustained; temporary restraining order dissolved and complaint dismissed.—Pre-Fab Transit Co v. United States, 321 F. Supp. 1147 (1150-2)*.

The interpretation of a certificate it issues is properly with the Commission, not the courts; and such interpretation is binding on the courts unless it is capricious or arbitrary, constitutes an abuse of discretion, or departs from established legal standards. Plaintiff's "grandfather" certificate, granting authority between Vichy, Mo., and International Stockyards, Ill., explicitly states that the general-commodity authority is (eastbound) from Vichy to International Stockyards; in addition, it granted specific commodity authority from International Stockyards to Vichy, and authorized service to and from named intermediate points. Under the Commission's construction of the language used, considered certificate does not authorize westbound transportation of general commodities; and, though a different interpretation of the certificate is possible, the Commission's interpretation is a reasonable one and is neither capricious nor arbitrary.—Beaufort Transfer Co. v. United States, 324 F. Supp. 649 (652-3)*.

Also, there was no abuse of discretion in the Commission's denial of the petition to modify the "grandfather" certificate so as to authorize westbound transportation of general commodities. The Commission found, and plaintiffs agree, that the certificate is not ambiguous; and, in analyzing the material available, the Commission further found that it had not in fact originally intended to grant general-commodity authority other than for eastbound movements. Therefore, plaintiffs having failed to demonstrate that the Commission's decision is arbitrary or capricious or not in accord with the applicable law, the complaint is dismissed.—Id., pp. 652, 653.

Where the Commission, in issuing motor carrier certificate, intended to include all authority applied for and the carrier's outstanding authority, any other interpretation would be invalid, and limits of the grant are not clearly defined, authority granted should be interpreted as intended. Accordingly, when the Commission combined two such authorities and issued the carrier a certificate to operate "between Centre, Alabama and Atlanta, Georgia, serving all intermediate points between Centre, Alabama and Rome, Georgia, including Rome," as intended, the certificate conferred authority to transport cargo (1) between Centre and Rome and (2) between Centre and Atlanta, provided that (a) cargo originated in Atlanta go directly to Centre before being delivered to intermediate points between Centre and Rome (including Rome), (b) cargo terminating in Atlanta come directly from Centre, and (c) cargo originating at points intermediate to Centre and Rome (including rome) destined for Atlanta is transported first to Centre and then directly to Atlanta.—Georgia Highway Exp., Inc. v. United States, 331 F. Supp. 906 (911-12)*.

On review of Commission decision that plaintiff's heavy-hauler certificate does not authorize it to transport 500- and 750-pound bombs on pallets each of which, when loaded, weigh over 3,000 and 1,700 pounds, respectively, the question for the court is whether the agency findings and order are arbitrary, capricious, or unsupported by substantial evidence. The reviewing court is bound by the Commission's interpretation of its own certificate unless it is clearly erroneous or insufficiently supported in the record. Due to the Commission's informed and time-tested expertise, it is the natural one to interpret a certificate which it has issued; and it is free to draw upon its accumulated experience to assist it in reaching a decision. On careful examination, the evidence is convincing that all of the Commission's findings of fact, on further hearing, are fully supported by substantial and credible evidence of record, are not arbitrary or capricious, and are not dependent on any presumption as such; sustained.—International Transport, Inc. v. United States, 337 F. Supp. 985 (991, 994-7, 1001-2)*.

In addition, since plaintiff's heavy-hauling certificate has been properly found not to include authority to haul the palletized 500- and 750-pound bombs, nothing has been taken from it that it ever possessed; and since nothing has been taken away from plaintiff, there was no violation of the §212(a) procedure that must be used if a carrier's certificated authority is to be lessened. Nor is plaintiff deprived of due process of law where the Commission has not changed or narrowed its certificate under the guise of interpretation to deprive it of something it once had; and the facts of record fail to show that there has been a partial revocation of plaintiff's authority. Therefore, it is not contrary to law for the Commission to interpret its certificates in the manner it employed in considered case.—Id., pp. 1000-1.

Structuring and interpreting a motor carrier certificate is an exercise of the Commission's special expertise. A presumption of validity attaches to such exercise of expertise, and those who would overturn the Commission's judgment take on heavy burden of proving that it is invalid because it is unjust and unreasonable in its consequences; thus, in absence of exceptional circumstances, the Commission's interpretation of a certificate issued by it will not be overturned. Function of the reviewing court is limited to ascertaining whether there is warrant in the law and facts for the Commission's action. Substantial evidence of record supports the Commission's judgment that, since its certificated authority to serve "points in . . . North Carolina" is territorially limited and does not allow service at points beyond prescribed limits, plaintiff could not serve Chesapeake, Va., which is beyond the limits authorized in its certificate. Therefore, Commission cease-and-desist order is upheld; temporary restraining order is dissolved; and action dismissed, with prejudice, at cost of plaintiff.—R-C Motor Lines, Inc. v. United States, 350 F. Supp. 1169 (1171-2, 1174)*.

The Commission will not go behind a certificate which, after applying the usual rules of grammar and punctuation, is found to be clear on its face. Since the respondent's certificate contains a modifying heavy-hauling restriction which follows the last antecedent "boats" and is not preceded by a comma, only term "boats" is qualified by the restriction. Such interpretation is consistent with the usual rules of grammar and punctuation. A contrary interpretation requires a strained and illogical construction and would necessitate resort to matters extrinsic to the certificate.—Road Paving Materials Between Points in New England, 329 I.C.C. 199 (203)*.

Although questions were raised at the hearing on Canadian carrier's application for motor carrier authority from certain United States points to ports of entry near Buffalo, N.Y., respecting the scope of one protestant's authorized operations within Canada, it would be manifestly improper for the Commission to presume to determine the scope of such operations; that is a matter for the Canadian authorities.—Balazs Commom Carrier Application, 95 M.C.C. 631 (636)*.

The cardinal rule in interpreting motor carrier authority is that the certificate must speak for itself. Consideration may properly be given to circumstances surrounding authority granted only if the authority itself is patently indefinite or ambiguous. Since the wording of applicant's present permit makes it unclear whether radial or nonradial operations were to be authorized, the permit was patently indefinite and unclear and the proceedings underlying its issuance must be examined. In the prior proceeding, applicant sought authority to transport construction materials between railheads, in named states, on the one hand, and construction sites in same states, on the other hand.

Therefore, it is clear that, even though the words "on the one hand" and "on the other" were left out, authority intended was for radial operations between railheads and construction sites actually served and no service was authorized outside the named states.—Contractors Cargo. Co.—Extension, 96 M.C.C. 306 (310-12)*.

An interpretation of authority has the effect of delineating the transportation which the Commission intended could be performed; thus, such an interpretation, unless "clearly erroneous," cannot be construed as constituting a revocation of authority. Since the courts have already concluded that the Commission's interpretation of Dillner's authority is not erroneous, it is clear that its operating rights have not been revoked improperly, and its argument to such an effect amounts to a collateral attack on 79 MCC 335, sustained 193 F. Supp. 823, and need not be considered further.—W. J. Dillner Transfer Co., 99 M.C.C. 485 (488).

Since Commission's power to revoke, suspend, etc., under §212(a) is corrective, rather than punitive, this section charges the Commission with choosing the proper remedy to effect the remedial objectives of the Act. Here the majority concluded that since respondent had engaged services of experienced motor carrier consultant in apparent good faith attempt to achieve compliance with previously entered cease and desist order and had instituted certain remedial measures, a 30-day suspension of respondent's considered operating authority, would be best suited to bring about remedial action.—Querner Truck Lines, Inc.—Investigation, 100 M.C.C. 215 (220-1).

Defendant's certificate authorizes service at "points in Pennsylvania east of the Susquehanna River;" and in order to provide a convenient delineation of the authorized service area, the branch of the Susquehanna River referred to must be the Sayre-Slate Hill Susquehanna, which clearly bisects the State into east and west portions, because the other branch [West Branch] runs primarily east and west and, unless coupled with other geographical features such as highways, county lines, or the like, cannot be used to define any clear-cut territorial boundary.—AAA Trucking Corp., Inc. v. Burgmeyer Bros., Inc., 100 M.C.C. 470 (474).

Moreover, the irregular-route operating rights in defendant's certificate are multiple grants of authority. If considered certificate described a single grant in separate paragraphs it would be usually because the base area for the outbound radial authority is smaller than, and usually included within, a larger base area for corresponding inbound authority, necessitating a separate description of each; however, such is not true of considered authority and therefore, since outbound radial areas are completely different, two separate authorities are granted which may be tacked.—Id., p. 475.

Respondent's commodity authorization for "packinghouse products, and supplies, restricted to items incidental to and directly connected with the business of the slaughtering of animals and the preservation and sale of meats but not including dairy products" is clear and unambiguous on its face. The restrictive phrase applies to both "packinghouse products" and "supplies"; while the phrase "the business of the slaughtering of animals and the preservation and sale of meats," is used as a definition of, and synonymously with, the term packinghouse. Thus, considered authority should be interpreted as if it reads "packinghouse products and supplies, restricted to items incidental to and directly connected with the packinghouse business, but not including dairy products."—Commercial Freight Lines, Inc.—Investigation, 103 M.C.C. 683 (684, 686-88).

Petitioner's certificate authorizing transportation of "contractors' machinery and equipment" does not permit it to transport such machinery and equipment unless at the time of the actual transportation it is intended for use by a contractor. Although petitioner conducted operations under prior temporary authority similar to those now authorized, §210a(a) of the Act provides that such temporary authority "shall create no presumption that corresponding permanent authority will be granted"; in addition, basic procedural fairness dictates that a grant of certificated operating authority under §207 of the Act must be based on objective evidence of record. Thus, since no evidence is adduced indicating that anyone required considered transportation to be used by someone other than a contractor in the initial application proceeding, or, for that matter, in the proceedings involving the applications for temporary authority, the Commission's interpretation of the scope of petitioner's certificate has neither narrowed nor limited its scope.—W.T. Mayfield Sons Trucking Co.—Interpretation, 103 M.C.C. 736 (736,744-5)*.

It is well established that in interpreting a certificate, unless there is patent ambiguity on the fact of the instrument, the Commission may not refer to extraneous matters such as the record which gave birth to the certificate. And, while complainants argue that ambiguity is created because certain portions of defendant's authority are "descriptive" while other portions are subject to the "intended use" test, a careful analysis of considered certificate indicates that each paragraph or clause in it is readily susceptible to interpretation independently of every other.—Jack Cole Co. v. Brooks Trucking Co., Inc., 105 M.C.C. 41 (45).

Therefore, the Commission concluded that defendant's authority to transport "such commodities as are manufactured, processed, or dealt in by rubber or rubber-products manufacturers" does not limit defendant to service for these manufacturers, provided that the commodities transported are of the actual type manufactured, processed, or dealt in by such manufacturers (see 94 MCC 605.) However, those portions of defendant's certificate which include the words "used in" and/or "incidental to" require an "intended use" test, that is, it must reasonably appear to the carrier that the commodity is intended for use by a rubber or rubber-products manufacturer.—Id., pp. 45-7.

Although respondent's considered authority is restricted against combining the separate parts thereof for the purpose of performing any through service, it has combined separate portions of this authority to permit movement from a terminus on one portion to a terminus on a second portion by tacking at and proceeding through a middle point common to both portions. Respondent's position is that there is a distinction between through service, which respondent desires to equate with single-line service, and joint-line service, which allows it to combine separate portions of its restricted authority provided that it interchanges the freight involved with another carrier, which freight originates at or is destined to points beyond its authority; however, the Commission does not recognize the existence of any such distinction. The meaning of this restriction is clear and unambiguous; thus, respondent, in combining the separate portions of its certificate, has violated restriction against tacking.—Baggett Transportation Co.—Investigation of Operation, 105 M.C.C. 628 (632-3).

Although one of defendant's authorities is restricted against service at Phillipsburg, N.J., this does not prevent it from offering such service under another certificate, which is not so restricted. Separate grants of operating authorities may be combined at a point of service common to both, unless there is a tacking restriction in one or both of these certificates. Therefore, defendant may join two authorities at an authorized point of service, common to both, although this has the effect of permitting it to provide service which it has been specifically precluded from offering under one of its certificates.—Public Service Coordinated Transport v. Trans-Bridge, 105 M.C.C. 679 (680-2).

Defendant's certificate authorizes, in part, transportation of mobile-home trailers in initial movements from places of manufacture to Bourbon, Ind., to all points in the United States; it does not authorize secondary movements from Bourbon to Harahan, La. Since term "initial movements" embrances only transportation of new vehicles from place of manufacture or assembly for delivery to consignee or connecting carrier, subsequent movement by a second carrier is a "secondary movement". Movement in private carriage, equivalent to intraplant shuttling from assembly line to storage area, would not, in most cases, destroy initial character of subsequent for-hire carriage. However, considered trailers move in private carriage some 30 miles from city of manufacture to Bourbon, where no further manufacture or assembly occurs before they are tendered to defendant. The character of this private movement is "initial", and defendant's initial movement authority is insufficient to perform subsequent movement.

Cease and desist order entered.—Morgan Drive-Away v. Mid-States Trailer Transport, 105 M.C.C. 896 (900-01).

Respondent's regular-route authority, restricted to serving "all intermediate and off-route points within 25 miles of Churdan, Iowa", does not authorize service from Dennison, Iowa, and to and from Cedar Rapids, Iowa, because, although these points are intermediate points on respondent's authorized routes, they are not within 25 miles of Churdan. The adjective "intermediate" modifies the noun "points" which in turn is modified by the prepositional phrase "within 25 miles of Churdan, Iowa." "Intermediate" cannot stand alone, but must be read (and only has meaning) when considered in connection with the word "points." Thus, fact that words "and off-route" separate "intermediate" from "points" is of no consequence; it is insignificant that there is no punctuation between the words "points" and "within"; and the rule of the last antecedent is not applicable. This view does not make the words "intermediate and off-route" superfluous; the Commission traditionally uses "intermediate" and "off-route" as words describing points, other than the termini. Cease and desist order entered.—Nolte Bros. Truck Line, Inc.—Investigation and Revocation, 106 M.C.C. 330 (331-2).

Applicants' general commodities authorities, restricted against the transportation of "articles of unusual value," permit the transportation of commodities of "high value" including considered aerospace parts and items, chemicals and dyes, communications equipment, drugs and pharmaceuticals, electric and electronic equipment and components, fabricated metal products, industrial control equipment, optical and photographic equipment and materials, radio and tape recorders, refractory metals, and scientific equipment and instruments. Thus, since applicants can already transport considered commodities, they have failed to establish need for proposed authority.—Garrett Freightlines, Inc.—Modification, 106 M.C.C. 390 (400).

The Commission's and the transportation industry's past usage distinguishes between articles or commodities of "unusual value" and "high value" articles or commodities. "Articles of unusual value" embraces the concept of both service and value, see 95 MCC 551; the value involved is an "intrinsic value" based upon rarity, high monetary value (both in permanence and marketability), and legal usage or negotiability and exchangeability in channels of commerce. Such a description does not include, per se, those articles in commercial, educational, industrial, or scientific usage named by supporting shippers which merely have a "high" monetary value; similarily, although fabricated metal products might be "high value" products, they are not necessarily "unusual value" products. Furthermore, while iridium, osmium, paladium, rhodium and ruthenium are "precious metals," they have not been shown to have the negotiability and exchangeability of other more common precious metals, and therefore, they have not been shown to be "articles of unusual value."—Id., pp. 398-9, 400.

In accordance with §208(a), and with the Commission's duty to review its past actions in order to correct any which—through changing conditions—have become out of gear with public need, the public convenience and necessity require removal (on a national scale) of "truckload lot" restrictions from all outstanding certificates; also, such restriction being imprecise and having become onerous, removal thereof is in the public interest and consistent with the national transportation policy. Therefore (in lieu of physical reissuance of each affected certificate at this time), for reasons of efficiency and economy, "truckload lot" restrictions with or without additional weight provisions henceforth will, by appropriate rule, be considered as having no force or effect, and their excision from existing certificates will be accomplished on subsequent administrative reissuance of those certificates, should such reissuance occur.—Removal of Truckload Lot Restrictions, 106 M.C.C. 455 (480, 493-4)*.

No sufficient or proper cause exists for the invalidation of respondents' state certificates registered under §206(a)(7) of the Act since the investigation proceedings disclose that while respondents' operations were unauthorized, they were conducted under color of right and in good faith, without intent to deliberately flout the statutory requirements.—Imperial Truck Lines, Inc.—Common Carrier Application, 106 M.C.C. 741 (751).

Petitioner seeks to have its heavy machinery "grandfather" authority either construed according to what was intended to be granted, revised to conform to what should have been granted, or enlarged by a grant of additional authority based upon a showing of public convenience and necessity. In the early days of federal motor carrier regulation, commodity descriptions set forth in certificates then granted to heavy haulers were not uniform. The Commission, in 2 MCC 703, identified heavy haulers as carriers of heavy machinery which description lacks precision and is susceptible to differing interpretations, Therefore, the Commission may review the records in which this type of authority was granted in order to determine whether the authority encompasses all services performed and all commodities transported by applicant during the grandfather period or whether a need for such service has been demonstrated by shippers, and to modify certificates to reflect the service that was initially intended to be granted.—Jetco, Inc., Investigation & Revocation, 108 M.C.C. 498 (501-03)*.

Respondent excepted to the lack of clarity in the definition of household goods and argued that the unauthorized transportation of new fixtures had been conducted in good faith under its household goods authority. In 17 MCC 467, this Commission provided for the transportation by household goods carriers of, among other things, fixtures and furniture which are parts of stores, offices, and various other establishments but only when moving such fixtures and equipment of stores to new locations. Since the inception of regulation, the proper nature of the household goods carriers' transportation of new fixtures has historically been considered to be the transportation of new fixtures as an incident to a change of location of a business establishment. The definition in this respect has been unambiguous. Thus, transportation of new fixtures from places of business unassociated with removal of the establishment or a portion thereof, that is, normal repetitive transportation in regular commercial channels as performed by applicant, is not permissible under household goods authority.—American Red Ball Transit Company, Inc.—Investigation, 108 M.C.C. 774(776).

Commission concluded that the commodity description of petitioner Home's certificate reading "machinery, equipment, and supplies used in maintenance and operation of industrial plants" was equivalent to the description in petitioner H & S's certificate reading "industrial plants, and in connection therewith, machinery, equipment, and bulk stocks" although stated differently and that the record shows that each discription was originally intended to cover heavy hauler authority and that therefore each certificate should be modified so as to clarify that each petitioner holds heavy hauler authority.—Home Transp. Co., Inc.—Extension, 109 M.C.C. 137 (151-55)*.

Cardinal rule in interpreting motor carrier authority is that the certificate or permit must speak for itself. Absent the authority itself being patently indefinite or ambiguous, or errors of a ministerial nature, operating rights must be construed according to their terms regardless of what may have been intended at the time of issuance. The paragraph in certificate in question granting general-commodity authority "between the above-specified points and over the above-specified routes" follows four paragraphs granting livestock authority, first two of which grant authority between named Montana points while the last two grant livestock authority from Lewistown to Great Falls and from Lewistown to Billings; thus, with respect to authorization of general-commodity service at Lewistown, Great Falls, and Billings, it is not clear from language of the certificate whether return movements are authorized since livestock authority at those points is only for one-way movements. Consequently, there is considerable patent ambiguity in the certificate, and it is necessary to review the underlying record to determine its meaning.—Great Northern v. Stendal Transp. and Elmer's Exp., 110 M.C.C. 35 (39)*.

Review of record in "grandfather" proceedings granting considered authority to defendant Stendal Corp. shows that the Commission did not intend to authorize transportation of general commodities between Lewistown, Great Falls, and Billings, Mont.; that the only commodity applicant transported between those points was livestock; and that findings in the report did not grant applicant any general-commodity authority involving those cities. Moreover, though all of the livestock grants were erroneously placed ahead of the general-commodity authority in the original certificate, there can be no doubt that such rearrangement thereof so as to authorize an apparent service at Lewistown, Great Falls, and Billings, in carriage of general commodities, was an inadvertent ministerial error, and that such general-commodity authority was never intended to be granted. Thus, even if certificate issued to defendant Elmer's—following approval of transfer of the rights—were not ambiguous, it would have to be modified to correct the Commission's inadvertent error in the initial certificate; certificate in question corrected accordingly.—Id., pp. 38, 40-2.

The Commission has no power to enlarge any operating authority except in accordance with the standards established by the Act. To warrant the proposed modification of petitioner's certificate in the absence of evidence as to the present and future public convenience and necessity, it must be shown that such modification is necessary to eliminate a patent ambiguity or to correct a manifest injustice. At the least, it must reasonably appear that the broader grant of authority sought would more accurately reflect what should have been issued on the basis of the evidence adduced at the original hearing.—Widing Transp., Inc., Investigation & Revocation, 110 M.C.C. 106 (109-10).

Complaint alleges that defendant has been operating in contravention of a tacking restriction placed in its certificate at the time defendant purchased the authority. Restriction precludes "joinder or tacking for the purpose of performing a through service between Omaha, Nebr., Council Bluffs or Des Moines Iowa, on the one hand, and, on the other, points beyond St. Joseph, Mo." Examiner recommended that complaint be dismissed; division affirmed the examiner, finding that the described restriction does not preclude joinder at those points within the commercial zone of St. Joseph which are located outside the city limits. On reconsideration, Commission found questioned restriction capable of two reasonable interpretations. In construing motor carrier authority, consideration may properly be given to the record upon which such authority was granted and other extraneous matter if the authority is itself indefinite or patently ambiguous.—Couch Bros., Inc. v. Byers Transportation Co., Inc., 110 M.C.C. 127 (128, 131,132)*.

Defendant is authorized under both its original and purchased authorities to serve St. Joseph, Mo. and points in its commercial zone. The authority granted defendant was restricted to preclude joinder with the existing regular and irregular rights of carrier at St. Joseph, Mo., for the purpose of performing a through service between Omaha, Nebr., Council Bluffs or Des Moines, Iowa, on the one hand, and, on the other, points beyond St. Joseph, Mo. Defendant has been operating between Council Bluffs and Kansas City, Kans. by tacking at point within St. Joseph commercial zone outside the city limits of St. Joseph claiming that the restriction does not preclude such operation. On reconsideration, Commission found questioned restriction ambiguous on its face, and susceptible of two reasonable interpretations; on the one hand there is defendant's interpretation that the restriction against service at St. Joseph did not preclude tacking at points within St. Joseph commercial zone beyond municipal limits of that city, and on the other, the avowed purpose of restriction is included in certificate itself and is notice to the world of its intent i.e., to preclude any service between the involved points. Commission concluded that latter construction was the one that was intended to be imposed in the purchase proceeding in order to preclude all overhead operations between the involved points.—Id., 131,133.

The cardinal rule in interpreting motor carrier authority is that the carrier's certificate or permit must speak for itself. Following judicial remand in 298 F. Supp. 39, Commission finds, in accordance with the district court's decision, that the qualifying phrase "within 100 miles of Columbus Circle, N.Y." applied solely to points in New York State and not to those in Connecticut, Pennsylvania, and New Jersey. Thus, applicant may serve all points in the three last named states.—T. I. McCormack Trucking

Co., Inc.—Investigation, 110 M.C.C. 499 (502-3)*.

Court's remand is based on finding that the issue is not a review of "technical terms of art" as the territorial description is nontechnical and court need not defer to Commission expertise in interpretation of certificates; and the grammatical and statutory "doctrine of the last antecedent" which states that placement of the comma in English usage as shown in applicant's certificate permits an interpretation which allows applicant to serve the broader territory which applicant claims.—Id., p. 502.

On reconsideration, recognizing that adherence to interpretive law would render totally useless many of the involved routes, it was found that the considered restriction against tacking as now framed in relation to subject routes is ambiguous and resort must be had to the underlying record to determine what authority was intended to be granted.—Consolidated Freightways Corp. of Del.—Interpretation, 110 M.C.C. 667 (669-70)*.

Applicant's contention that intermediate point authorization, because of its "specific" nature, takes precedence over, and is unaffected by, a general "territorial" restriction found not proven. Such an interpretation was specifically rejected in 54 MCC 21 and by careful study of applicant's certificate we are convinced the Commission intended a territorial limitation of applicant's authority, which limitation is unambiguous and clear in meaning.—Bi-State Express, Inc., Interpretation, 111 M.C.C. 615 (617-9).

Territorial restriction limiting applicant's operations to points south of U.S. Highway 50 deleted to allow applicant to serve involved small, rural communities which straddle said highway as these communities have traditionally experienced difficulties in obtaining adequate service and protestants face no additional competition in view of applicant's past operations under color of right.—Id., p. 619.

On petition for interpretation, Commission found petitioner's authority to transport commodities defined as "store fixtures and store equipment" cannot be construed to allow transportation without any regard to article's ultimate intended use. Such construction would actually be an extension or modification of authority without sufficient evidence and clear notice. Record of "grandfather" operations of the petitioner's predecessor provide no valid basis for relief sought in instant case.—Mural Transport, Inc., Interpretation, 111 M.C.C. 637 (641-3)*.

Applicant is a holder of *Mercer*-type authority which is an example of authorities which identify the type of commodities to be transported by reference to their intended future use. A carrier holding such authority has a duty to investigate the intended use of the commodity to be transported, if that use is not known to the carrier. To facilitate such investigations, a "rule of reasonableness" was developed in 61 MCC 666. Upon application of that rule, Commission found that transportation of plate steel does not fall within applicant's *Mercer* authority because the controlling intended use of plate steel has not been established and the commodity was not "earmarked" for use in the natural gas and oil industries encompassed in *Mercer* description.—Eagle Trucking Co.—Investigation of Operation, 113 M.C.C. 148 (152-54).

In remanding the investigation proceeding to the Commission, the District Court for the Western District of North Carolina, in 286 F. Supp. 213, had determined that certain motor common carrier operating rights held by carrier in two separate paragraphs of its certificate were patently ambiguous with respect to whether they constituted two separate grants of authority, in which case such rights could lawfully be combined with each other, or a single grant of authority, in which case such rights could not be combined; and that, therefore, the Commission, on remand, must examine the administrative history of such rights to resolve this issue. On remand, Division 1 of the Commission found that the administrative history of the subject operating rights disclosed that they constituted a single grant of radial authority; and that, accordingly, such rights may not be tacked or combined with each other.—Malone Freight Lines, Inc., Investigation of Operations, 113 M.C.C. 442 (446, 461)*.

In respondent's certificate which contains a restriction against service "between Lubbock, Tex., on the one hand, and, on the other, Clovis, N. Mex., and Amarillo and El Paso, Tex., and between Lubbock, Tex., and Hobbs, N. Mex., through Tatum, N. Mex.," the last quoted phrase found to modify only the phrase immediately preceding it, that is, against service between Lubbock and Hobbs; that the restriction prohibits movements through as well as from and to the named points; that even if respondent's interpretation were found to be reasonable, a review of the underlying proceeding which gave rise to the restriction would affirm the result reached; and that respondent may not be accorded the same rights as a bona fide purchaser for value.—Illinois-California Express, Inc.—Investigation, 113 M.C.C. 532 (534-38).

Commission concluded that §212(a) does not require the issuance of an order under §204(c) of the Act prior to a suspension of operating authority. The Memorandum of Agreement between Commission and the Department of Transportation does not and could not limit the statutory jurisdiction of either agency.—Federal Highway Admin. v. Safeway Trails, Inc., 113 M.C.C. 815 (821-2). .

The rule of the last antecedent, adopted in 89 MCC 5, 102 MCC 577, and 110 MCC 499, does not apply in the interpretation of respondent's authority, since application of the rule would require interpreting the certificate to entail a grant to transport the almost limitless commodity of "raw material", and such an interpretation does violence to logic, grammar, experience, established practice, and common sense. Therefore, all commodities named in the sentence in question are modified by the phrase "used in the manufacture of piece goods", rather than only the immediately preceding commodity named.—Skyline Transport, Inc.—Investigation & Revocation, 115 M.C.C. 807 (823-824).

Respondent's authority to transport store, restaurant, and bar fixtures and equipment does not include authority to transport generally manufactured displays, not specifically intended for use in bars, restaurants, or stores. Therefore, respondent's transportation of displays, display materials and exhibits for use at various trade shows and exhibitions was not authorized. Cease and desist order entered.—Roberts Cartage Co. Investigation & Revocation, 115 MC.C. 830 (834-39).

Following district court's instructions in 318 F. Supp. 763, Commission, on remand, considered whether a Department of Transportation (DoT) regulation prohibiting the rolling of "explosives, except barrels or kegs" precluded the commodities at issue herein (500 and 750 pound bombs) from manual handling. The Commission agrees with a written interpretation by DoT's General Counsel that these bombs are "basically round objects capable of being rolled". Additionally, undisputed testimony given by a former Army safety engineer with 24 years experience in supervising munitions indicated that rolling was regarded as an acceptable method of handling bombs of the size and weight involved. Therefore, such bombs are found capable of manual handling and are not within respondent's heavy-hauler authority.—International Transport, Inc.—Investigation, 118 M.C.C. 536 (554-55)*.

Commodity description "such commodities as are dealt in by wholesale, retail, and chain grocery and food business houses" is not limited by the "intended use" test. Although commodities embraced in descriptions such as one at issue are broad, there are limits as to scope. These descriptions neither limit the class of shippers served nor do they permit transportation of general commodities. Compare 94 MCC 605. A merchant operating as a wholesale or retail grocer may carry a line of merchandise beyond scope of petitioner's authority and thus is operating as more than a grocer. See 78 MCC 275, 282. The broad, generically described, range of commodities at issue reaches far beyond the proper scope of grocery or food business house merchandise and are not within petitioner's authority as expressed in the considered commodity description.—Russell Transfer, Petition for Declaratory Order, 118 M.C.C. 862 (865-67).

However, nonprescription medicines, such as common pain relievers, cold remedies, and other nonprescription drugs sold over-the-counter are ordinarily carried on chain grocery store shelves and we conclude that nonprescription patent medicines are included within the considered commodity description when moving in the form in which they are normally sold by such chain groceries.—Id., p. 867-68.

Many certificates, such as that considered herein, were issued in the early days of motor carrier regulation, without formal proceedings and using descriptive commodity terms which then seemed clear to all parties but which subsequently have been found ambiguous and susceptible to conflicting interpretations or which did not describe accurately the type of service the "grandfather" applicant performed. In such cases, we must look behind the certificate to determine what service was authorized. From the record of Commission proceedings and applicant's transportation history, we conclude that applicant performed services beyond those included in its certificate description of "supplies" under the belief that it held proper authority and therefore applicant's certificate should be modified as requested to reflect applicant's past transportation services.—Paffile Petition, Modification, "Grandfather" Certif., 118 M.C.C. 904 (907-909)*.

The commodity description "heavy machinery, mining equipment, supplies, and mine ores not including coal" in petitioner's "grandfather" certificate was interpreted by petitioner and his predecessor, with some justification, to embrace more than mining supplies. We agree and will therefore modify petitioner's certificate as set forth herein to reflect petitioner's past operations. This is not, however, a grant of general-commodity authority.—Paffile Petition, Modification, "Grandfather" Certif., 118 M.C.C. 904 (907-909)*.

10. Remedy of abuses, in general.—[Vols. 10, 12, 17-19, 21].—Defendant contract carrier's unlawful entry into the common carrier field was unintentional because a substantial number of the contracts which exemplified the expanded availability of its services were entered into by its predecessor, and the continued increase in their number did not constitute an abrupt change in the nature of the operation; therefore, entry of cease and desist order would not be appropriate until defendant has been given an opportunity to bring its operations into conformity with the statute. Proceeding held open for 90 days, during which period defendant may reduce the number of its contracting shippers, make application for conversion of its permit to a certificate, or present some other plan of achieving compliance with the law and the commission's regulations.—E.A. Gallagher & Sons v. Cleveland General Transport, 98 M.C.C. 356 (359-360).

In considering language of the statute in several cases, the Commission has said that its findings should not be understood as holding that a certificate obtained by fraud or misrepresentation or inadvertently issued may not be changed or revoked without §212(a) procedure. In instant case, seeking modification of previously issued certificate because petitioners had no notice of application amendment accepted at the hearing, circumstances are not present which permit a certificate to be changed or revoked under §212(a); thus, as there is no claim or suggestion of fraud or misrepresentation, the issue is whether certificate can be revoked or modified, or both, because issued without proper notice, i.e., if lack of such notice constitutes inadvertence. Examiner's apparent mistake at initial hearing in accepting amendment without providing for published notice, while not condoned, is not considered to be an inadvertent administerial error that would justify collateral attack on the certificate; once duly granted consistent with the Commission's intent, authority should not be revoked, particularly absent any certainty that, but for an apparent mistake, a different certificate would have been issued.—Carl Subler Trucking, Inc., Modification of Certificate, 99 M.C.C. 193 (196-8)*.

However, the Commission's power to correct an obvious injustice is not limited to situations envisioned by §212(a) or where a certificate or permit is obtained by fraud, misrepresentation or inadvertently issued. Thus, while a certificate issued as a result of proceedings conducted without proper giving of notice is not void *ab initio*, it is voidable by the Commission after appropriate proceedings in which the holder has been given due notice of the issues involved and an opportunity to be heard; and such procedures have been followed in instant case. Amendment of considered application, after notice of its filing had been published, broadened scope thereof and resulted in issuance of a certificate that enabled applicant to institute a new service which no competitor could have anticipated from the original notice; thus, the original lack of notice resulted in a failure of due process of law, depriving those who rely on Federal Register publication of their statutory right to notice and the opportunity to participate in the proceedings in which the certificate was issued.—Id., 103 M.C.C. 307 (310-14)*.

On reconsideration, therefore, the questioned certificate is canceled and, concurrently therewith, a corrected certificate is issued which (consistent with published notice of the application as filed) precludes service in Indiana located in the Owensboro, Ky., commercial zone. However, in order to give applicant all possible opportunity to show that it should be authorized to continue rendering service through those Indiana points, notice of such proposed operation will be published in the Federal Register and the proceeding assigned for further hearing on the question of need for such operation.—Id., pp. 315-17.

Statute does not limit Commission jurisdiction in petition for reopening of eight §5(2) proceedings (wherein respondent Greyhound acquired passenger rights encircling petitioner) and for a general supplemental order requiring, in effect, that Greyhound abide by its commitments which the Commission relied on in approving the acquisitions. As Greyhound is not charged with operations contrary to its certificates, and certificates are not the sole measure of legality of its activities, its argument that to order it to cease actions which are not unlawful *per se* would be to modify or revoke its certificates, contrary to §212(a), is not relevant or correct. Certificates are not licenses to destroy a competitor, when it suits holder's interest, by practices that are opposite to commitments made to secure them. Also, even if not unlawful *per se*, actions may be unlawful when they are part of a plan to restrain commerce; and if false statements are willfully made, a certificate may be revoked without resort to §212(a). Greyhound's failure to abide by its commitments, without sound reason, justifies §5(9) supplemental proceedings which, though the certificates were issued 10 years earlier, are not contrary to §212(a).—Mt. Hood Stages, Inc.—Petition for Modification, 104 M.C.C. 449 (455-8)*.

Respondent's failure to provide a direct-line service of less-than-truckload shipments from and to 366 named points found to constitute failure to provide a reasonably continuous and adequate service in violation of §216(b) and the terms of its certificates even though respondent claims its service is satisfactory to the shipping public. Respondent ordered to institute continuous and adequate service within a specified term.—T.I.M.E.—D.C., Inc.—Investigation & Revocation of Certs., 113 M.C.C. 897 (900-02).

15. Change of status.—[Vols. 10-15, 19, 21].—Although §203(a)(14) uses the terms regular and irregular routes, nowhere is regular- and irregular-route carriers defined, or the identifying characteristics of either set forth in the Act; and while the statutory dichotomy was recognized and generally described at the inception of federal motor carrier regulation, no attempt was made to trace definitely a line of demarcation between the two types of service until 47 MCC 23, in which the Commission enunciated 8 specific guidelines for use in distinguishing between the two. Noting the tendency of irregular-route carriers of general commodities or of a wide range of diverse commodities to evolve into regular-route operations between certain terminals, the Commission imposed the duty on irregular-route carriers in such circumstances either to check this tendency by preserving their status or to obtain appropriate authority for the conversion.—Midwest Motor Exp., Inc., Extension, 96 M.C.C. 402 (407).

20. Abandonment, generally.—[Vols. 10-15, 17-19, 21].—Respondent found to have failed to provide a continuous and adequate service and to have discriminated against interline and l.t.l. traffic. Evidence showed that respondent refused to accept interline traffic in 1968 and 1969 and also had refused interline shipments under 10,000 pounds. Financial difficulties found to be no excuse for a cessation of operations. Compliance and cease and desist order entered.—A.C.E. Freight, Inc.—Investigation and Revocation, 115 M.C.C. 96 (103).

25. Revocation of authority.—[Vols. 10-19, 21].—See also Brinke Freight Forwarder Application, at §410(c), n. 35; Greyhound Lines, Inc., Ext.—Grand Canyon, at §5(2),

n. 110 revocation; May and Pearson—Modification of Certificate, at §205(e), n. 10; Mt. Hood Stages, Inc.—Petition for Modification, at §212(a), n. 10; and Pacific Intermountain Exp. Co.—Investigation, at §216(b), n. 550.

Revocation or cancellation of petitioner's registration of its Massachusetts certificate under the second proviso of §206(a)(1), because of finding that it has used that authority in performing an unauthorized freight forwarder operation, cannot be accomplished in a proceeding on petition for declaratory order, but only in a proceeding brought for that purpose under §212(a).—Bab Transfer, Inc., Petition for Declaratory Order, 323 I.C.C. 574 (599).

Certificate of a motor common carrier authorized to transport passengers moving on a through rail ticket between named points revoked on carrier's own petition inasmuch as the involved rail service has been discontinued and further motor carrier operations are neither possible nor required by the public convenience and necessity.—Kansas City S. Ry. Co. and Louisiana & A. Ry. Co., 334 I.C.C. 807 (809,823).

Although the record is clear that the defendant has been violating Wisconsin regulations, these violations have not been shown to be willful or of a sufficiently serious nature as to warrant formal compliance action or revocation of its authority to operate in that State. Defendant has initiated many improvements in its safety and compliance program; has increased its field inspectors as well as its office staff; established an inspection terminal at Chicago for checking the compliance of all equipment entering the State of Wisconsin; and has obtained an agreement with that State's officials for immediate notification of all violations of the kind dealt with here. In view of the above considerations, especially the subsequent reduction in safety violations during 1963, no formal compliance action is required at this time.—Wisconsin Public Service Comm. v. Ace Doran, 96 M.C.C. 347 (356).

Although applicant has brought itself into compliance with §215 of the Act, its permit should be revoked as it has not operated as an actual contract carrier for over three years since the cancellation of its contract with the Great Atlantic and Pacific Tea Company in October 1964. Moreover, its authority to carry cement and carbon dioxide has been dormant for 9 years or more, and it has made no attempt to revitalize these latter operations. Since the cancellation of its groceries contract respondent has disposed of most of its equipment and its solicitations of shippers in this category have gone unrewarded. It appears unlikely that there will be a need for the resumption of such transportation service in the future. Under these circumstances there are no mitigating factors which would indicate that respondent is affected by a mere temporary inability to negotiate a contract with a potential shipper. Accordingly, applicant is found to have ceased to engage in the business of transportation as a contract carrier.—Kenny Transfer—Revocation of Permits, 107 M.C.C. 81 (82-4).

By statutory definition a motor contract carrier has an obligation which requires that it "engage in transportation" rather than merely holding itself out to transport; the Commission may call upon both common and contract carriers who cease to engage in the business specified in their authority to resume such business upon penalty of revocation.—Id., p. 83.

Although a sound beginning had been made, control by another carrier failed to reverse the decline of respondent and the reestablishment of it as a competitor. Therefore, respondent should demonstrate the sustained performance of service throughout its system of a quantum, quality, and consistency clearly indicative of its capacity to effect future compliance with the Act. If respondent's efforts should not prove effectual Commission could revoke its certificates without instituting a new investigation. Order entered directing compliance for 3 years in which period reports will be submitted at the close of each 6-month period describing efforts at such compliance.—A.C.E. Freight, Inc.—Investigation and Revocation, 115 M.C.C. 96 (102).

27. Suspension of authority.—[Vols. 15, 16, 18, 19, 21].—Although respondent's continued violations of the Commission's leasing regulations and violations of §206(a) in performance of unauthorized transportation demonstrate either intentional disregard of, or plain indifference to, the regulations and compel conclusion that it is in willful noncompliance with the Act and regulations thereunder, the Commission is reluctant to suspend respondent's certificates at this time because of the somewhat stale nature of the record, the last compliance or road check shown having been made almost a year prior to hearing on investigation. Moreover, respondent has recently undertaken a program a realign its operations. For these reasons, respondent's certificates will not now be suspended, but the proceeding will be held open to allow the Bureau of Inquiry and Compliance to petition for suspension or revocation if future compliance is not forthcoming or sustained.—S & C Transport Co., Inc., Investigation and Revocation, 96 M.C.C. 642 (646).

On finding that respondent had willfully failed to comply with Commission's cease and desist order by continuing to engage in unauthorized transportation of certain commodities in interstate commerce in violation of §206(a) of the Act and by continuing to disregard specific sections of safety regulations, all operations under considered certificates suspended for 30 days, affording respondent opportunity to bring its procedures and operational equipment within acceptable requirements prior to the resumption of operations.—Querner Truck Lines, Inc.—Investigation, 100 M.C.C. 215 (221). [But see dissent].

Upon investigation of a complaint by the Federal Highway Administration, the Commission suspended defendant's certificates insofar as they authorize charter or special operations for thirty days for willful failure to comply with rule 395.3(b) of the Motor Carrier Safety Regulations. Commission rejected complete suspension because of the probable adverse effect on persons who rely upon daily intercity regulated service when weighed against the remedial effect of a complete suspension.—Federal Highway Admin. v. Safeway Trails, Inc., 113 M.C.C. 815 (822-8).

30. Amendment of certificate or permit.—[Vols. 12-19, 21].—See also Atlas Van Lines, Inc., Extension, at §207(a), n. 28 elimination; Cole's Exp. Route Conversion Application, at §207(a), n. 28 change; Great Northern v. Stendal Transp. & Elmer's Exp., at §212(a), n. 1; Southwest Freight Lines Ext.—Removal of Restriction, at §207(a), n. 6 truckload; and Zirbel Transport, Inc., at §204(b), n. 7 building materials.

The Commission had authority to grant carrier's petition for modification of its initial-movement authority to transport automobiles (from Detroit manufacturing plant to Texas points) to include secondary movements of its former traffic shipped part way by rail from the plant. The procedure established in 91 MCC 935, which was approved in 235 F. Supp. 250, was followed; and the modification order was based on the Commission's recognition of fact that TOFC and MLRC methods of movement had caused substantial trend from motor to rail shipment and on carrier's showing as to its loss of revenue resulting from the manufacturer's switch to rail movements. While considered order was issued without a hearing and a finding of need for the secondary-movement authority, nothing in the record indicates that the Commission failed to consider all available relevant evidence; also, plaintiff has failed to show what relevant testimony, if any, it would have offered if the Commission had granted oral hearing. Complaint dismissed and Commission order allowed to stand.—United Transports, Inc. v. United States, 245 F. Supp 561 (563-5)*.

For the same reasons set out in 245 F. Supp. 561, the Commission's order under review in another case involving identical issues, and consolidated for trial with the cited case, which granted modification of petitioner's initial-movement authority to transport trucks and other motor vehicles (from manufacturing and assembly plants to twenty-seven State area served by petitioner) to include secondary movements of its former traffic which manufacturer ships part way by rail, is sustained. Complaint dismissed.—Id., 245 F. Supp. 570 (571-2)*.

It is clear that the Commission has statutory power—and the duty—to modify certificates issued improperly through inadvertent error on the part of its staff. Similarly, while properly issued certificates cannot be modified under the guise of interpretation, the Commission can, by interpretation, declare the authority inhering in a certificate at the time of its issuance.—Akers Motor Lines, Inc. v. United States, 286 F. Supp. 213 (223)*.

Inasmuch as the original Commission decision in defendant carrier's application proceeding became final with the issuance of a certificate of convenience and necessity therein, the Commission was thereafter without jurisdiction or authority to modify that certificate merely on the basis of a change of policy which it may have subsequently adopted. Therefore, since the Commission's order on reconsideration and the revised certificate, issued on authority thereof, constituted changes based wholly on a change of policy, order of the Commission under review, granting certain changes in defendant carrier's certificate, is annulled and set aside.—Garrett Freightlines, Inc. v. United States, 324 F. Supp 575 (575-6)*.

On further hearing, the Commission had authority to modify plaintiff's certificate to include a "single plantsite" rather than "mixed load" restriction, under the law and the court's order remanding prior decision because competing carriers were not given proper notice and hearing as to the consequences of Commission substitution of a "mixed load" restriction for "multiple pick-up and delivery" restrictions in the application, as published, in granting greater authority than that sought. The court's mandate is mute as to what action, if any, the Commission could or should take if it set aside the "mixed load" certificate; thus, since the action taken is neither prescribed not proscribed, the Commission had authority and power to modify the certificate as it did on rehearing. In fact, the court intended for the Commission to re-examine the "mixed load" certificate in light of all the circumstances, particularly those developed on rehearing, and to take whatever action seemed appropriate; the Commission has done so. Sustained.—Greenstein Trucking Co. v. United States, 343 F. Supp 194 (195-7, 200)*.

Modification of contract carrier's permit for transportation of residual fuel oil, presently restricted to service for a single named shipper, to authorize performance of same service between same points for two additional shippers specified, is warranted when it is already serving those shippers between other points and modification sought will not increase the number with which it has contracts or otherwise affect its status. No other motor carrier in the area can provide those shippers with the personalized service required, except one whose route would be circuitous, and petitioner's proposed operation will serve a useful public purpose responsive to their distinct needs.—Kendrick Cartage Co., Extension, 95 M.C.C. 366 (368-9).

Petitioner Strang, on the basis of its, and its predecessor's, past unauthorized operations as well as shipper support, has established need for modification of its operating authority to transport "grain and animal feeds;" however, as Strang is reluctant to relinquish unrestrictive parts of its present authority, considered modification includes only those commodities which serve to enlarge Strang's present authority and omits duplicating any authority already authorized. Therefore, grant to Strang is for authority to transport "poultry feed and animal and poultry feed ingredients (except grain)," instead of requested authority for "animal and poultry feed and animal and poultry feed ingredients."—Strang Transp., Inc., Modification of Certificate, 99 M.C.C. 364 (367-8).

Description of authority in petitioner's certificate amended to include "sound recording, sound reproduction, and sound amplifying equipment, parts and supplies used in connection with *** photographic equipment, parts, acessories, materials, and supplies" because the original description in the certificate as employed, and as subsequently interpreted by the Commission, did not authorize the complete service required and then intended by the Commission to be granted and because supporting shipper demonstrates present need for such complete service.—I.L.&C. Corp. Petition for Modification of Certificate, 99 M.C.C. 400 (402-4).

In seeking modification of its certificate, it is incumbent upon petitioner to indicate in what manner it is being prejudiced by the present wording of the certificate and to give reasons for the requested change. This petitioner has not done and in the absence of any factual or legal basis for reinserting the disputed comma in petitioner's certificate the requested relief should not be granted.—

W. J. Dillner Transfer Co., 99 M.C.C. 485 (491).

Applicant, a wholly-owned subsidiary of the Missouri Pacific Railroad Company, sought removal of Laredo, Texas, key point, which, together with other key points, had been imposed on its motor carrier authority to insure that its operations remained supplemental to those of parent railroad. In denying this modification it was pointed out that a substituted motor-for-rail operation must replace an existing rail service and that parent railroad is not now providing, in any significant sense, such service; therefore, there is no showing that a rail service is being performed for which motor service can be substituted. In addition it was noted in disposing of applicant's disclaimer of any intention to operate as an independent motor carrier that it is not what applicant intends to do that is critical, but rather, what it could do.—Missouri Pac. Truck Lines Ext.—Removal of Key Point, 99 M.C.C. 754 (759-760).

In light of the record and in order to make it commensurate in scope with applicant's current intrastate authority, applicant's certificate is amended by removing restrictions which (1) prohibit applicant from charging less than the rate applicable to a specified weight level and (2) limit applicant to transporting shipments moving from one consignor to one consignee. The record shows that these restrictions penalize shippers and prevent them from toploading larger shipments, that they have been removed from applicant's California intrastate authority, that their removal will advance the efficiency and economies of applicant's operations, and that there is a specific and convincing need by shippers for a complete service.—Miles Motor Transport System, Extension 100 M.C.C. 255 (257, 260-1).

Filing a petition for modification of existing authority is a proper and long-established practice; it is, in fact, a better vehicle for modification of existing authority than application for additional authority. Since public convenience and necessity is found in operating economics and improvements in existing service and since modification would not result in a new or substantially different service, considered authority is modified to authorize Salem to transport up to 11 passengers in a vehicle. However, as one of the most important characteristics of door-to-door limousine service is that it is not scheduled, considered authority is not modified to include scheduled operations.—Salem Transp. Co., Inc., 100 M.C.C. 373 (376-80).

Since Carter's commodity description, "heavy machinery, contractors' equipment and parts and accessories, in special equipment, in quantities of not less than 10,000 pounds", consists of several redundant terms each of which has been the subject of interpretive difficulties, and since commodity description sought more accurately reflects that which should be issued to Carter on basis of interpretation of its certificate and evidence of current shipper support and past bona fide operations, certificate clarified to read "commodities which, because of size or weight, require the use of special equipment." And although Commission is reluctant to impose proposed complex territorial limitations, they will be imposed insofar as they tend to serve public purpose in protecting existing carriers in areas where Carter has not been a competitive factor and as they are based primarily upon pre-existing conditions.—Ray Carter, Inc., Extension, 102 M.C.C. 217 (219, 221-22).

Since the limitation of limousine service to transportation of passengers having prior or subsequent movement by air is unduly restrictive, inasmuch as it prohibits the transportation of persons who wish to accompany travelers to airports, it is eliminated.—Brown's Connecticut Airport Service, Inc., Conversion, 103 M.C.C. 6 (14).

Considered certificate amended by deletion of St. Joseph, Mo., from the authorized territory, since petitioner, in absence of evidence showing otherwise, should not be compelled to continue and uneconomic and unnecessary service. The critical underlying issue is whether a present need exists for petitioner's service at St. Joseph. The lists of the numerous carriers authorized to serve St. Joseph and other points do not show precisely the qunatum and quality of motor transportation which will remain available; however, such evidence is not decisive. The absence of any opposition from shippers, receivers, carriers and others arranging for transportation clearly negates public need.

In addition, because there is limited traffic available to petitioner, there can be no finding that it has "skimmed off the cream," and there is no probative basis for concluding the shipping public will suffer by granting the partial revocation of service.—Arkansas-Best Frt., Inc., Petition for Revocation, 103 M.C.C. 621 (624-5).

Respondent's certificate modified to permit heavy hauling operations, since the record leaves no doubt that its predecessor, Arrow, was engaged in heavy hauling operations when it filed its "grandfather" application and that Arrow and its successors in interest continued to engage in such operations under color of right. In addition to the record in the original "grandfather" proceeding, the documentary material is substantiated by the independent testimony of a former manager and part owner of Arrow, and former employees of Arrow and its competitors; citing 94 MCC 120, the Commission ruled that these are qualified witnesses.—Heavy & Specialized Haulers, Inc., Investigation & Revocation, 105 M.C.C. 63 (66-7).

Considered authority modified to allow petitioner to provide service in both directions over its authorized routes. The Commission on review of the record in the grandfather proceeding and of the records in successive transfer proceedings failed to find any regulatory purpose in limiting service in the disputed manner; in fact, since said authority does not apply to shipments moving locally between New Jersey points, the limiting of petitioner's regular-route service to movements in one direction without further explanation lacks a clear rational or regulatory basis and appears to be the result of error. In addition, modification does not alter the territorial scope of the involved authority; it merely allows petitioner to render to its shippers a more economical, efficient, and expeditious service between points it is presently authorized to serve.—Tarantola Trucking Co., Inc., Modification of Certificate, 105 M.C.C. 783 (786)*.

Commodity description in carrier's certificate amended to authorize transportation of "textile factory products" in lieu of "cotton factory products." The evidence demonstrates that the two terms are virtually synonymous and that the latter term, originating when the principal fiber of the textile industry was cotton, has become obsolete with the development and subsequent increased use of synthetic fiber. Thus, considering carrier's past operations in serving the textile industry and the changing character of that industry, no basically new service is proposed, no new field of carrier operations is to be invaded, and no change is involved which will materially affect the competitive situation of existing carriers. In addition, the Commission removed the "in truckloads" restriction in Dixie's certificate on the basis of its present policy against the imposition of such restrictions, the need for less-than-truckload service, and the problems presented to shippers in their use of Dixie's existing service.—Dixie Ohio Exp., Inc. Investigation and Revocation, 105 M.C.C. 835 (843-5)*.

Petitioners herein request heavy hauler authority based on "grandfather" claims performed by their respective predecessors and continued by petitioners. Both petitioners were competitive in the same area and both adduced same evidentiary basis for their claims but the commodity descriptions in each certificate were stated differently although covering equivalent commodities. Petitioners' heavy hauling operations had been unquestioned for 30 years; documentary evidence and oral testimony also confirm that heavy hauler operations have been continuously performed since prior to the "grandfather" date. Therefore, both certificates were modified so as to reflect that each petitioner has heavy hauler authority.—Home Transp. Co., Inc.—Extension, 109 M.C.C. 137 (155-57)*.

The title and embraced proceedings arose as a result of Commission's investigation into the operations of respondent, and of a petition by respondent for clarification and modification. In the investigation proceeding, respondent was found to be engaged in unauthorized for-hire transportation under its certificate of violation of §206(a) of the Act; in the modificatio proceeding, joint board modified alleged ambiguous term "jobsite" to mean a place at which work is in progress, about to begin, or recently terminated, involving construction or destruction of improvements to real property. Respondent's movements of shipments from docksite to damsite is clearly not a movement from one jobsite to another jobsite. The fact that the Commission's interpretation of the certificate differs from respondent's is not controlling; the Commission's expertise in these matters and its construction is controlling unless clearly erroneous, arbitrary, an abuse of discretion, or in contrevention of some established principle of law; Commission's findings constitute a definitive declaration of what rights existed from the very beginning under the certificate and cannot be equated with modification; modification denied and cease and desist order entered.—Widing Transp., Inc., Investigation & Revocation, 110 M.C.C. 106 (107, 109, 110, 111).

It would be appropriate that petitioner's certificates, that authorize it to transport various motor vehicles from Warren Township, Macomb County, Mich., be modified to reflect the fact that Warren Township no longer exists as a political entity, due to its recent incorporation into a municipality known as Warren, Mich., and is now totally comprised of a city that has a commercial zone under the mileage-population formula which would include other important automotive centers. However, petitioner's proposed modification so as to authorize service from Warren is unacceptable since, like present origin area description in its certificates, the new description should be territorial in nature. Accordingly, to reflect the present nominal and political situation, each of the considered certificates is modified by substituting in lieu of the words "Warren Township, Macomb County, Mich." therein, the new territorial description set forth.—Dallas & Mavis Forwarding Co., Inc., Modification, 110 M.C.C. 253 (254).

In light of prior holdings that authority granted in early days of motor carrier regulation for "heavy machinery" was actually intended to authorize a complete heavy hauling service, amendment of petitioner's grandfather" authority to transport "heavy machinery" to authorize transportation of commodities which because of size or weight require the use of special equipment is justified by evidence that at the time of passage of the Motor Carrier Act its predecessor was transporting a variety of heavy and bulky commodities in addition to machinery and that it has continued to do so. Amended description will permit it to continue the general heavy hauling service provided in the past.—Case Driveaway, Inc., Petition for Modification, 113 M.C.C. 512 (518-20).

Petitioner's certificate is amended to include the transportation of "fresh meats", as evidence of record shows that a need for such transportation was shown but the Operating Rights Board granted authority, erroneously, to transport such "fresh meats" under commodity description of "food products" which does not cover "fresh meats" as herein defined.—Hilt Truck Lines, Inc., Petition for Interpretation, 113 MC.C. 784 (799).

Evidence of supporting shipper shows that approval of proposed modification will allow petitioner to provide a more complete service, including expedited movement of the considered traffic. Protestant lacks authority to transport significant portion of involved traffic and has not shown that its operations will be materially and adversely affected. Approved.—North American Van Lines, Inc.—Modification, 113 M.C.C. 867 (871-2).

Respondent's petition for modification of "grandfather" authority to transport stock in trade of drugstores, on basis of ambiguity, denied, since respondent introduced no evidentiary justification for enlarging the authority to general commodities and no ambiguity was present.—North Central Truck Lines, Inc., Invest & Revoca., 117 M.C.C. 180 (192).

35. Cessation of operations exceeding authority.—[Vols. 15-19, 21].—See also R-C Motor Lines, Inc. v. United States, at n. 1 supra.

While Commission order under review required plaintiffs to cease and desist from operations "of the character found in the examiner's report to be unlawful" unless authority therefor be obtained, and it would have been better form had the report capsulized elements of those unlawful operations, such elements can be gleaned from the report with sufficient clarity to give adequate directions to plaintiffs. And, though the hearing was limited to operations conducted by plaintiffs between particular points, operations of the same character between other points without authority would be equally unlawful. Framing the cease and desist order in terms of the unlawful operation wherever conducted, without limiting it to unlawful operation between specific points, does not render such order vague or invalid. The Commission's crucial findings are based on substantial evidence and record shows no error of law; complaint dismissed.—Travel & Tour Service, Inc. v. United States, 302 F. Supp. 188 (193)*.

Since, following the decision in 214 F. Supp. 34, defendant's transportation of considered large military cargo trucks in the manner described is beyond the scope of its heavy-hauler certificate, and is in violation of §206(a), an order requiring defendant to cease and desist from such operation will be entered.—United Transports, Inc. v. Gulf Southwestern Transp. Co., 95 M.C.C. 443 (449)*.

Railway Exp. Agency's extension of its intraterminal motor carrier activities at Salt Lake City, Utah, to include Tooele Ordnance Depot 36 miles away, through publication of §22 rates, exceeds the permissible limits of a reasonable terminal area; therefore, motor carrier operations conducted by defendant between those points are in violation of §206(a)(1); cease and desist order entered.—Barton Truck Line, Inc., v. Railway Exp. Agency, Inc., 95 M.C.C. 625 (627, 628-30).

On finding that respondent has been and is engaged in interstate transportation of salt in furtherance of his transportation business without appropriate authority and not in furtherance of his noncarrier business as contended, cease and desist order entered.—Johnson and Independent Salt Co.—Investigation, 96 M.C.C. 164 (172).

Record clearly shows that applicant contract carrier, by radically expanding the number of shippers it serves and by making its service available to any shipper willing to contract with it, has abandoned operations as a contract carrier and has been operating unlawfully as a common carrier without appropriate authority. In addition, it has exceeded its authorized 100-mile radius of railheads in operations in three States. Applicant ordered to cease and desist from further unlawful common carrier operations and, also, from exceeding the territorial scope of its existing permit.—Contractors Cargo Co.—Extension, 96 M.C.C. 306 (313, 317-8)*.

However, on reconsideration and further examination of the antecedents of the carrier's operations, record is not convincing that it has deliberately expanded its operations into the common carrier field without regard to the requirements of regulation. Therefore, since its past unlawful conduct is not presumed to have been willful, entry of a cease and desist order—as to unlawful common carrier operations—would not be appropriate until carrier has had an opportunity to bring its operations into conformity with the principles expressed. Complaint and investigation proceedings held open for 90 days in order to give carrier opportunity to pursue one of the courses of action outlined that are open to it.—Id., 105 M.C.C. 683 (696-705)*.

Record clearly shows that, despite respondent bus lines' agreement to interchange their equipment reciprocally for the mileage operated over each other's routes, control of the vehicles never passed from whichever respondent originated a through run; thus, such through runs may properly be characterized as operations by one carrier over the routes of another without authority in violation of the Act. Furthermore, even though respondents are now operating under common control, they will continue to exist as separate corporate entities and, therefore, their separate operations must be conducted in accordance with the commission's rules and regulations. Cease and desist order entered.—Carolina Scenic Stages—Investigation and Revocation, 96 M.C.C. 566 (571).

Inasmuch as respondent is found to have been engaged in charter operations originating at certain points not within the territory served by its regular routes, in violation of §206(a), cease-and-desist order is entered.—Arrow Stage Lines, Inc., Investigation and Revocation, 96 M.C.C. 572 (573, 574, 581).

Respondent's continued performance of unauthorized transportation and continued violations of the Commission's leasing regulations compel conclusion that it is in willful noncompliance with the Act and regulations thereunder. Cease-and-desist order entered; providing that respondent shall file with the Commission a report setting forth the manner of its compliance, and further providing that it may petition for vacation of such order at any time after expiration of 1 year from effective date thereof.—S & C Transport Co., Inc., Investigation and Revocation, 96 M.C.C. 642 (646).

Respondents' unauthorized transportation of complex rolling mill rolls and stamping dies under their "iron and steel products" authority was the result of an honest misunderstanding of the scope of their respective operating authorities; and therefore, without prejudice to their filing appropriate petitions seeking modification of their "grandfather" authorities and without finding that respondents are unfit to receive a grant of operating authority, a cease and desist order entered.—Charles J. Rogers Transp. Co.—Investigation, 99 M.C.C. 351 (358, 359).

Respondent's authority to transport (1) road building machinery and equipment which because of size and weight requires the use of special equipment and (2) road building machinery and equipment requiring special equipment, does not authorize it to transport items clearly not related to or connected with road construction work; its argument that the words "road building" modify only "machinery" and not "equipment" is without merit. Thus, considered shipments of commodities, including a boiler destined for installation in a textile mill, a dryer and parts removed from a minerals producing plant, air washer tanks for installation in a textile plant, and doll houses are clearly beyond its authority. Cease and desist order entered.—Heavy Duty Haulers, Inc., Investigation of Operations, 99 M.C.C. 578 (579-80, 84)*.

Respondent's transportation of kymane and plasticizers is not authorized under its authority to transport petroleum products; fact that a small percentage of the total composition of these products might have been derived from a recognized petroleum product does not mean that they automatically classifiable as petroleum products. Cease and desist order entered.—Zirbel Transport, Inc., 100 M.C.C. 307 (312-3).

The phrase "points in Pennsylvania east of the Susquehanna River" in defendant's certificate is meant to provide a convenient delineation of the authorized service area. And only the Sayre-Slate Hill Susquehanna provides a boundary to effectuate that purpose, since the Sayre-Barnesboro Susquehanna does not define any clear-cut territorial boundary. Therefore, defendant's operations to points west of the Sayre-Slate Hill Susquehanna, but east of the Sayre-Barnesboro Susquehanna, are unauthorized. Cease and desist order entered.—AAA Trucking Corp. Inc. v. Burgmeyer Bros., Inc., 100 M.C.C. 470 (474-6).

Since defendant motor carrier issued no bill of lading and marked his transportation charges on the air bill of lading, which was executed only after the air carrier received physical custody of the goods, there was no bill of lading covering defendant's operations. Furthermore, since considered transportation does not qualify as "incidental to transportation by aircraft" within meaning of §203(b7a), defendant's operations between Stapleton International Airport at Denver, Colo., and Golden, Colo., which is within 25 miles of the airport, are subject to Commission regulation. Cease and desist order entered.—Colorado Cartage Co., Inc. v. Murphy, 100 M.C.C. 745 (748-50).

Cease and desist order entered on finding that respondent unlawfully transported flakeboard under its authority to transport lumber and that it unlawfully performed service between points in its radial authority area by using the radial base point as a gateway.—Barnes Truck Line, Inc., Investigation & Revocation, 102 M.C.C. 281 (287).

On finding that respondent was engaged in unauthorized interstate for-hire transporation of asphalt a cease and desist order entered.—Garland—Investigation of Operations and Practices, 102 M.C.C. 437 (455).

On finding that respondent association was not a lawfully constituted agricultural cooperative within requirements of the Agricultural Marketing Act and therefore not entitled to operate under exemption of §203(b5), cease and desist order entered.—Agricultural Transp. Assn. of Tex. Investigation, 102 M.C.C. 527 (552)*.

Respondent's heavy-hauler authority does not include transportation of considered imported farm tractors on ordinary flat-bed equipment when special equipment is not "required" for loading or unloading. Such tractors are comparatively light vehicles and not only may be, but usually are, pushed manually on and off flat-bed trailers; and fact that a small tractor is sometimes used to push them abroad cannot change the factor that manual loading and unloading is a practicable method of handling which, in fact, is used in transporting them. Respondent's handling of such farm tractors in manner described of record has been unauthorized; cease and desist order entered.—Moss Trucking Co., Inc., Investigation of Operations, 103 M.C.C. 91 (112, 114)*.

Motor transportation, in interstate or foreign commerce, in collection and delivery service, beyond municipalities of Los Angeles, San Francisco, Oakland, Alameda, and Richmond, Calif., offered by defendant water-carrier includes points not embraced within the industrial, commercial, and business communities at defendant's authorized ports. Cease and desist order entered.—Atchison, T. & S.F. Ry. Co. v. Sea-Land Service, Inc., 103 M.C.C. 184 (193-4).

Cease and desist order entered on findings that A-1 Coach failed to restrict performance of its broker operations to Brooklyn and that defendants Sheldon Goldman and Travelers' Bus Service, Inc., individually and collectively, have been holding themselves out to engage in broker operations, and that Travelers' Bus Service, Inc., has actually performed unauthorized operations. Since a broker may not perform service at a point not authorized by its license nor establish a division or agent to do so and since A-1 Coach is authorized to operate only at Brooklyn, any advertising, soliciting, or distributing activities in which it engages in Manhattan must be done in such a way as to make it clear that the actual arrangements and sale of transportation are conducted by A-1 Coach in Brooklyn.—Allied Bus Corp. v. Goldman, 103 M.C.C. 559 (567-9, 571).

Cease and desist order entered on finding that respondent has been, and is engaged in the transportation of cheese and other commodities not authorized to be handled under the terms of its certificate, which authorizes it to transport "packinghouse products, and supplies, restricted to items incidental to and directly connected with the business of the slaughtering of animals and the preservation and sale of meats but not including dairy products."—Commercial Freight Lines, Inc.—Investigation, 103 M.C.C. 683 (684-89).

Cease and desist order entered on finding that respondent jobber was rendering unauthorized transportation services not in furtherance of its primary business, but as a secondary enterprise.—T & T Supply, Inc.—Investigation of Operations, 103 M.C.C. 946 (955).

Cease and desist order entered on finding that respondent agricultural cooperative is engaged in performing direct transportation for nonmembers, which is neither incidental to its exempt traffic nor necessary for its continued operations.—Edgerton Coop. Oil Assn.—Investigation, 105 M.C.C. 100 (108-9).

On finding that respondent had combined separate portions of its considered authority to permit movement from a terminus on one portion to a terminus on a second portion by tacking at and proceeding through a middle point common to both portions in violation of restriction in its certificate which prohibited combining the separate parts thereof for the purpose of performing any through service, cease and desist order entered.—Baggett Transportation Co.—Investigation of Operation, 105 M.C.C. 628 (632-3).

On findings that defendant Mid-States Trailer Transport was unlawfully operating beyond scope of its "initial movement" operating authority in performing initial and secondary operations and that Mobile Homes Express was unlawfully operating in interstate commerce without authority, cease and desist order entered.—Morgan Drive-Away v. Mid-States Trailer Transport, 105 M.C.C. 896 (901).

Respondent Shelby ordered to cease and desist from performing unauthorized for-hire carriage, since the record shows that its transportation of sugar was neither part of its primary business as a distributor of cookies nor in furtherance of any other primary business as a dealer or distributor of sugar.—Shelby Biscuit Co. Investigation of Operations, 106 M.C.C. 79 (85)*.

On finding that respondent's regular-route authority, restricted to serving "all intermediate and off-route points within 25 miles of Churdan, Iowa," does not authorize service from Dennison, Iowa, and to and from Cedar Rapids, Iowa, a cease and desist order entered.—Nolte Bros. Truck Line, Inc.—Investigation and Revocation, 106 M.C.C. 330 (332).

On finding that considered motor carrier operations are in violation of the Act, the Commission can under §204(c) issue an appropriate order to compel compliance therewith; furthermore, §2 of the Elkins Act provides that shippers participating in transportation covered by the Act are subject to investigations, orders, and such provisions authorized by law with respect to carriers. Since respondent lessee-shipper Marane has failed to (a) control, direct, and dominate the leased vehicles' operations and (b) assume the responsibilities, duties, risks, and burdens of transportation, it is not a bona fide private carrier; in addition, since respondent lessor-carrier Uxbridge does not have authority to transport considered commodities, it is also operating without appropriate measure; however, entry of such an order does not preclude the lawful transportation of property by Marane in a vehicle leased from Uxbridge. Cease and desist order entered accordingly.—Uxbridge Motor Lines, Inc.—Investigation of Operations, 106 M.C.C. 372 (374).

Respondent is required to cease and desist from transporting bicycles and plywood under the commodity description of "merchandise as is dealt in by wholesale, retail and chain grocery and food business houses" since these articles are not commonly or ordinarily dealt in by either retail and wholesale grocery houses across the country as a whole or by food business houses in the area of respondent's operations and are thus beyond the scope of respondent's certificates.—Wiley & Sons, Inc.—Investigation and Revocation, 106 M.C.C. 686 (690-91).

Since, under its certificate to transport (A) prefabricated and precut buildings or houses, etc., and (B) Buildings, complete, knocked-down, or in sections, etc., defendant is not authorized to transport the ornamental iron columns involved, its transportation of independent shipment of such columns is violative of its authority; cease and desist order entered.—Miami Transp. Co. of Indiana v. Pre-Fab Transit, 107 M.C.C. 383 (390)*.

Since it is beyond question that respondent's transportation of 500- and 750-pound bombs is outside the scope of its heavy-hauler authority and, so far as appears of record, it continues to participate in the movement thereof, respondent is ordered to cease and desist from its unlawful operations. Moreover, in view of the abundant indication of other heavy haulers' present or intended participation in the carriage of explosives, all such carrier are admonished to conform their operations with the conclusions in instant report regarding the transportation of explosives generally by heavy haulers.—International Transport, Inc.—Investigation, 108 M.C.C. 275 (292-4)*.

On reconsideration by the entire Commission, respondent's transportation of earth-moving tractors, telescoping trailers, rails, pipe, and other specified commodities, is found to be beyond the scope of its heavy-hauling authority; cease-and-desist order entered. Also, to the extent that heavy-haulers generally are engaged in activities of the type found by the decision to be not covered by their franchises, they are admonished immediately to discontinue such operations until appropriate authority is obtained.—Ace Doran Hauling & Rigging Co. Investigation, 108 M.C.C. 717 (758)*.

Since operations which respondent had been conducting in movement of imported iron and steel articles from docksite to a jobsite violated its certificate authorizing operations "between jobsites," they were unlawful. Contrary to carrier's argument, the certificate is not ambiguous merely because it authorized service at "jobsites"; cease and desist order entered.—Widing Transp., Inc., Investigation and Revocation, 110 M.C.C. 106 (111).

Restriction in defendant's certificate is susceptible of two reasonable interpretations, and the two conflicting but plausible and rational constructions of the same certificate create sufficient doubt as to its true meaning such as to characterize the certificate itself as patently ambiguous, and upon analysis of the questioned restriction against a through service between specific points; defendant's single line, overhead operations between said points is in contravention of the restriction in its certificate and is unlawful; cease and desist order entered.—Crouch Bros., Inc. v. Byers Transportation Co., 110 M.C.C. 127 (133)*.

Defendant has been operating in excess of its authority by unlawful tacking of its separate state certificates of registration in order to provide an unauthorized through service. Cease and desist order entered requiring defendant to abstain from providing unlawful through service until appropriate authority has been obtained.—Flying Freight v. Van's Auto Express, Inc., 110 M.C.C. 358 (361, 362).

A cease and desist order is entered only in cases where respondent is likely or is in a position to continue its unlawful operations and the record herein indicates that much of this unlawful transportation is being continued by respondent. Although a suspension of respondent's certificate is possible under §204(c), suspension is not warranted without a showing that the unlawful activities were conducted "willfully" but a cease and desist order may be issued whether involved violations were "willful or otherwise".—Gleason Transportation Co., Inc., Revocation, 112 M.C.C. 228 (230-31).

Respondent's refusal to operate within the limits of its authority to transport "stock in trade of drugstores", despite Supreme Court ruling that the commodity description is not ambiguous [355 US 554], resulted in cease and desist order, and an acknowledgment that continued violation may result in suspension or revocation of the authority.—North Central Truck Lines, Inc., Invest. & Revoca., 117 M.C.C. 180 (184, 195).

Section 212.(b) [*§312(b) U.S.C.*] Transfer of operating rights.—[Unchanged. See vol. 11, p. 9479.]

Amendments, see footnote, p. 9479.

Notes of Decisions

Volume 10—p. 8077; Volume 11—p. 9479; Volume 12—p. 10418; Volume 13—p. 11087; Volume 14—p. 11608; Volume 15—p. 12222; Volume 16—p. 12872; Volume 17—p. 13573; Volume 18—p. 14523; Volume 19—p. 15790; Volume 21—p. 17596.

10. Transfer of operating rights, including "grandfather" rights.—[Vols. 10-19, 21].—See also Beaufort Transfer Co. v. United States, at §5(2), n. 126; and Heavy & Specialized Haulers, Inc., Investigation & Revocation, at §212(a), n. 30.

Contrary to plaintiffs' contention, neither §212(b) nor due process required the Commission to hold a hearing before denying their petitions for reconsideration of its order approving intervening bus lines' transfer application. A transfer involving small carriers is governed by §212(b) and the Commission regulations pursuant thereto; the Commission's transfer regulations give it the discretionary right to hold or refuse to hold a hearing; and examination of the record reveals no abuse of that discretion. Nor does the Administrative Procedure Act require any Commission hearing since, as stated in 339 US 33, the limitation in that Act to hearings "required by statute" exempts from application thereof those hearings which an administrative agency may hold by regulation, rule, custom, or special dispensation; thus, in the context of a §212(b) proceeding, APA imposes no hearing requirement on the Commission.—Monumental Motor Tours, Inc. v. United States, 316 F. Supp. 663 (666-7)*.

However, on judicial review of Div. 3 order approving the application, which also reversed Transfer Board's initial denial thereof because, since transferor was found to have ceased operating under the rights due to financial difficulties not shown to have been beyond its control, proposed transfer was not in conformity with §1132.5(b) of the transfer rules, that order leaves unanswered three questions relative to transferor's "cessation of operations" and gives no reason why the transfer should be approved. It is the Commission's failure to state its reasons with regard to applicability or nonapplicability of relevant parts of §1132.5(b) of the regulations, not is denial of plaintiffs' reconsideration requests, that is important since, in exercising its discretion, the agency is required to make findings of fact that show the basis of that exercise. Therefore, case is remanded to the Commission to state clearly and precisely, in the context of its own regulatory language, its reasons for approving or not approving, in whole or in part, considered application; and, further, to specifically address itself to the transferability of transferor's charter, and special service, rights.—Id., pp. 668-70.

Where after defendant agricultural cooperative was enjoined from engaging in unlawful carrier operations, the Commission approved transfer of certificated rights to cooperative and, because the transfer order was stayed pending determination of certain issues raised, granted it temporary authority to lease the certificate under which it is operating, the Commission should make initial decision on the issues. Therefore, while the doctrine of primary jurisdiction is not applicable where only a question of law is involved, and defendants' motion to modify the injunction involves questions of law which the court could decide, the court will stay its hand pending Commission determination of whether an agricultural cooperative may hold temporary authority to lease from the owner a certificate which it has a contract to purchase and, conversely, whether the Commission can issue, or authorize transfer of, certificate to a qualified agricultural cooperative, either on a temporary or permanent basis. Proceedings on defendants' motion are stayed pending Commission decision or further court order.—I.C.C. v. Milk Producers Marketing Co., 320 F. Supp. 738 (742)*.

Although Commission's transfer rules limit leases to one year except in unusual circumstances, Commission found that lease of a certificate of registration for period of 10 years where State commission had approved lease for such period should be approved. Under §206(a)(6) State commission has initial duty of determining whether public convenience and necessity support certificate of registration corresponding to intrastate authority granted.—H. C. Daniel, Houston, Tex., Transferee, 104M.C.C. 899 (909-10)*.

The purpose of the non-severability clause of §206(a)(6)(7) was to give Commission power which it had under §5 but not under §212(b) to prevent the creation, from a single underlying intrastate certificate, of two interstate operating rights without a showing of public need for such service. Commission found that the non-severability clause did not foreclose automatically consideration of every situation where there had been separation where, as herein, the parties could not control the separation due to State procedures.—Id., p. 903-4.

Case herein contains comprehensive discussion of Transfer Rules as they apply to transfers under §212 and supplemental rules governing transfers under §206(a)(6)(7) and a review of the governing precedents.—Id., p. 904-909.

Applicant's proposal to transfer its bulkhaulage operations to a non-carrier, wholly-owned subsidiary approved as such division of applicant's operating rights would not lead to duplication of service in violation of the applicable Transfer Rule, 49 CFR 1132.5(a)(3).—C F Tank Lines, Transferee, & Consolidated, Transferor, 109 M.C.C. 688 (698-701)*.

Transfer Rule 1132.5(a)(3) does not preclude the separation of a commodity class, such as commodities in bulk, from general commodity authority. It is noted that transferor herein was authorized to transfer its household goods authority under comparable circumstances to those herein. Those specified commodities retained where bulk transportation is possible modified with condition against transportation of bulk commodities.—Id., p. 701-3.

Protestants' objection to this proceeding is based on transferees' status as a public transit company enjoying taxpayer subsidy and taxation relief which protestants claim is an unfair advantage for transferees. Under Transfer Rules, 49 CFR 1132.3, applicant must show only its fitness to perform the authorized service. There is no specific provision for denial because of detrimental competitive impact. Protestants' objections do not reach transferees' fitness; application approved.—Mercer County Improvement Authority, Transferee, 109 M.C.C. 795 (798-9)*.

Though transfer of authority to transport livestock and general commodities between named Montana points was approved, and certificate issued to defendant transferree, before decision on complaint alleging unlawful operations and requesting that certificate, if transferred, be corrected to show that transportation of general commodities is not authorized between Lewistown, Great Falls, and Billings, transferee cannot contend it is an unsuspecting buyer. The complaint was filed while transfer proceeding was pending; and since transferree had full notice of issues in complaint case before the transfer was approved and certificate issued, it cannot claim to be an innocent purchaser for value. Also, as the intial certificate was patently ambiguous, due to inadvertent ministerial error of the Commission, certificate issued to transferee is subject to the infirmities present in it. Transfer Board's approval of the transfer does not signify Commission acquiescence in wording of the certificate issued; authority acquired could not exceed that previously held. Therefore, transferee's certificate should be corrected to reflect Commission findings which authorized issuance of the original certificate.—Great Norhtern v. Stendal Transp. and Elmer's Exp., 110 M.C.C. 35 (38, 40-2)*.

Transfer of rights denied, since (1) applicants' interest lay in the incidental charter operations that were conducted under the involved certificate, rather than the regular-route authority, and these routes are not severable, (2) proof of public convenience and necessity is required to obtain specific charter authority, and (3) the benefits of §208(c) do not accrue unless the carrier is actually performing interstate regular-route operations as authorized in its certificate, and these operating rights were dormant.—Estacada-Mollala Stages, Inc.—Revocation of Certif., 118 M.C.C. 115 (123).

Section 212.(c) [*§312(c) U.S.C.*] Conversion of authority.—[Unchanged. See vol. 18, p. 14523.]

Notes of Decisions

Volume 18—p. 14524; Volume 19—p. 15791; Volume 21—p. 17510.

2. Construction and interpretation.—[Vols. 19, 21].—In carrier's action to set aside Commission order denying its petition for removal of keystone-type restriction from certificate issued to it under §212(c), a finding that the Commission has authority to impose such restrictions on conversion certificates is required by both the clear meaning of 206 F. Supp. 455 and the logic of the statutes. Thus, the court's function is to determine whether restrictions actually imposed in plaintiff's certificate constitute a legitimate exercise of that Commission authority; and initial question in that determination is whether terms of the prior permit or the actual scope of carrier's pre-1957 activities are determinative of the limits on the Commission's power to restict conversion certificates.—Scott Truck Line, Inc. v. United States, 339 F. Supp. 1169 (1174-6)*.

There is logic in both approaches, since purpose of the statutory limitation is to preserve for the converted carrier his prior authority. Using the actual scope of pre-1957 activities as the measure seems to reflect a more realistic appraisal of what the carrier actually enjoys under his permit; on the other hand, however, §212(c) states that the certificate shall authorize the same transportation "as authorized in the permit," and thus the terms of the permit should be controlling. On balance, the better view appears to be that the Commission cannot restrict the certificate beyond the terms of the permit; this accords closer to language of the statute and prevents the Commission from depriving a carrier of a prior right. Of course, should it appear that the Commission sanctioned operations under the permit which it later asserts were not authorized, those operations should be permitted under the certificate.—Id., p. 1176.

Plaintiff's permit authorized operations only under contract with persons "who operate wholesale or retail establishments, the business of which is the manufacture, processing, or sale of groceries or food" and, in the Commission's view, certificate issued in lieu thereof, which is "restricted to shipments moving from, to, or between warehouses, and wholesale, retail, or chain outlets of grocery and food business houses," carries over that restriction but does not limit plaintiff in any manner not shown by the permit. Plaintiff's pre-1957 activities being limited to shipments "moving from, to, or between" the specified types of food and grocery houses, and that being the Commission's construction of its permit, then the restrictions in its §212(c) certificate do not impose any new limitations and are valid. Accordingly, as plaintiff did not object to the Commission;s findings of fact, and presented no evidence of nature or scope of its pre-1957 operations, nor of need for the grant of an unrestricted certificate, the Commission's decision is sustained.—Id., pp. 1176-8.

Although statute governing conversion of authority from contract to common carriage provides that certificate issued in lieu of a permit authorizes transportation of the same commodities as authorized in the permit, it does not bind the Commission to give effect in such certificate to the precise wording of respondent's reissued permit, including portion thereof which embraces a ministerial error; however, whatever authority is granted in the certificate should be the same generally as that contained in its underlying permits. Mere conversion should not create for a carrier new common carrier rights which are not substantially similar to those "intrinsic" in its old status.—Zuzich Truck Line, Inc., Investigation of Permit, 96 M.C.C. 160 (162)*.

The legislative history of conversion proceedings under §212(c) of the Act indicates that the converted carrier cannot be limited, as a common carrier, to a certain class of shippers and, in this respect, said converted carrier will be left in a better position than it previously enjoyed, i.e., the change from a permit authorizing transportation for limited classes of persons under contract to an operation as a common carrier to serve the general public would very probably result in an expanded scope of operations for a converted carrier under a §212(c) conversion proceeding.—J.B. Montgomery, Inc., Conversion Application, 108 M.C.C. 638 (645)*.

Petitioner's contention that under decision in 376 US 389, the Commission is without authority to impose keystone-type restrictions in certificates issued in §212(c) proceedings and, therefore, restriction in its conversion certificate (imposed in lieu of keystone restriction in its permit) should be removed, ignores the Supreme Court's holding in that case that, on remand, the Commission would be free to contest appellee's factual claim as to what service it performed under its permit and to limit the certificate to such activity. Furthermore, following that case, the district court in 263 F. Supp. 239, unanimously upheld the Commission's power under §212(c) to impose keystone-type restrictions; that court also stated that the Congressional intent underlying §212(c) requires that the Commission impose no new restrictions after conversion and that so long as carrier is permitted to enjoy the same rights it had as a contract carrier, the keystone-type restriction is lawful.—Scott Truck Line, Inc., Modification of Certificate, 108 M.C.C. 896 (898-900, 905)*.

5. Conversion of authority.—[Vols. 18, 19, 21].—There can be no doubt that omission of the comma following "supplies" in respondent's permit authorizing transportation of "packinghouse products, and supplies, restricted to ***" was a ministerial error occurring in connection with reissuance thereof for sole purpose of reflecting certain acquisitions and consolidating all its authority in a single permit; respondent's request for modification of the restriction in its authority as to both "packinghouse products" and "supplies" would have been needless had the comma not been regarded as applying to "packinghouse products." The change in punctuation in the reissuance, being a ministerial error, did not enlarge the authority originally granted; and the conversion certificate is framed in the same language as would have been used had there been no error, or had it previously been discovered and rectified. Certificate issued to respondent in lieu of its permit reflects those rights intrinsic in the permit.—Zuzich Truck Line, Inc., Investigation of Permit, 96 M.C.C. 160 (162-3)*.

To be successful in proceeding involving conversion of contract to common carrier rights applicant must present not only a detailed statement of its past lawful operations as a contract carrier, but also shipper testimony demonstrating need for its continued service as a common carrier. Therefore, only that part of application supported by shippers' evidence showing that common carrier service was required by public convenience and necessity granted; and that part of application not so supported denied.—Major Conversion Application, 100 M.C.C. 410 (417-18).

On remand to the Commission, the district court affirmed the Supreme Court decision in 376 US 389 that the Commission will be free to contest appelee's factual claims as to what service it performed under its contract carrier permit and to limit the common carrier certificate to such activity, but required the Commission to abandon the doctrine of substantial parity. This proceeding was assigned for further hearing for the purpose of receiving evidence concerning the service actually performed by applicant under its former contract carrier permit. The examiner's summary of shippers' evidence indicates that applicant, during the time it operated as a contract carrier, was engaged in an unrestricted general freight operation within in the territorial scope described in its permit. Therefore, in view of the judicial action herein, and in consideration of the broad scope of applicant's former contract carrier authority, the certificate to be issued to applicant must be without the keystone-type restrictions imposed in the prior reports. Applicant's operations will be adequately limited by the commodity descriptions without imposition of additional keystone-type restrictions.—J. B. Montgomery, Inc., Conversion Application. 108 M.C.C. 638 (639-46)*.

Contrary to carrier's argument, Supreme Court decision in 376 US 389, does not hold that the Commission has no authority to impose keystone-type restrictions in certificates issued in conversion proceedings; also, the district court later held in 263 F. Supp. 239, that the Commission could impose such restrictions provided no new restrictions are imposed after conversion and so long as carrier enjoys under the certificate the same privileges it had under its former permit. Therefore, to justify removal of keystone-type restriction in its conversion certificate, petitioner must submit evidence of the services actually provided under its former contract carrier authority; however, other than evidence admitting that 42 percent of the revenue derived from selected shipments would not have been earned had it not construed its authority as not being so restricted (following the Supreme Court's decision) and its own certificate, petitioner has submitted nothing of substance to warrant removal of the keystone-type restriction.—Scott Truck Line, Inc., Modification of Certificate, 108 M.C.C. 896 (905-6)*.

Record clearly shows, and petitioner openly admits, that services not authorized by its certificate have been provided to a substantial extent since the ruling in 376 US 389; thus its past operations are not founded upon such a reasonable question of mistaken interpretation that they could be considered as having been conducted under a color of right; in fact, such past illegal operations show a pattern of continuous violations tending to establish that carrier is unwilling and unable to conduct future operations in a lawful manner, and reflecting on its fitness to operate as a regulated carrier. More important to the central issue, however, is the fact that the record is devoid of requisite evidence respecting petitioner's operations under its permits prior to conversion, and which of those operations, if any, cannot now be conducted under the certificate in its present form. Petition for modification of certificate is denied, and carrier is admonished to adhere strictly to the limitations therein.—Id., pp. 906-7.

15. Parties; procedure.—[Vols. 19, 21].—Applicant, in a §212(c) conversion proceeding, moved that the exceptions be stricken because they are filed by parties having no valid standing in the proceeding. There is no merit in applicant's motion to strike the exceptions on the ground that they were filed by parties having no valid standing in the proceeding. The present proceeding is simply a further hearing in a matter commenced in 1958 and all of the present exceptants were parties in the original proceeding and they have remained parties throughout the administrative proceedings. As competing carriers they are parties in interest and have a right to participate in developing a record. Applicant's motion to strike is denied.—J.B. Montgomery, Inc., Conversion Application, 108 M.C.C. 638 (641, 646)*.

20. Evidence.—[Vols. 19, 21].—See also Eastern States Transp., Inc., at §206(b), n. 18; and Scott Truck Line, Inc., Modification at n. 5 supra.

It is well established that evidence which pertains to events occurring subsequent to hearing and to which opportunity to cross examine has not been afforded is inadmissible. Therefore, protestants' motion to strike granted.—Major Conversion Application, 100 M.C.C. 410 (411).

Section 213. [*§313 U.S.C.*] Validity and Perfection of Certain Security Interests in Motor Vehicles.—[Unchanged. See vol. 18, p. 14525.]

Section 214. [*§314 U.S.C.*] Issuance of securities.—[Unchanged, except by the act of Feb. 5, 1976, Pub. L. 94-210, §308, 90 Stat. 57, "That the exception" and all that follows through "*And provided further,*" is struck out. See vol. 18, p. 14256, vol. 21, p. 17514.]

Historical Note

The amendment made by Pub. L. 94-210, 90 Stat. 57, takes effect on the 60th day after the date of enactment of the act, and does not apply to any bona fide offering of a security made by the issuer, or by or through an underwriter, before the 60th day.

Notes of Decisions

Volume 10—p. 8122; Volume 11—p. 9480; Volume 12—p. 10419; Volume 13—p. 11088; Volume 14—p. 11609; Volume 15—p. 12223; Volume 16—p. 12874; Volume 17—p. 13574; Volume 18—p. 14527; Volume 19—p. 15798; Volume 21—p. 17514.

2. Construction and interpretation.—[Vols. 10-14, 16-19, 21].—See also Atlas Van Lines, Inc.—Notes, at §20a(11), n. 1 supra.

In this proceeding, Commission found that it is necessary to place restrictions on applicant, a carrier under control of a holding company, as to declaration and payment of dividends, placing liens on its assets for noncarrier purposes or any intercompany property transactions in order to preserve the financial integrity of the carrier. Proposed issuance of warrant certificates and common stock approved subject to said restrictions.—Greyhound Corporation Securities, 336 I.C.C. 575 (582-4).

It is incumbent on the Commission at the time of passing on §20a (or §214) applications to give major consideration to the use which the carriers have made of their credit arrangements which did not involve the issuance of securities, to determine whether such credit was used prudently and therefore is not inimical to the purposes of §20a (or §214) applications.—Expanded Definition of Term "Securities", 340 I.C.C. 817 (824).

Commission's exercise of §214 jurisdiction over noncarrier controller of applicant as to future securities' issuance is similar to that imposed in 338 ICC 805, wherein it was determined that our jurisdiction will be retained over such issuances to degree that they are related to the carriers under the control of the parent holding company. Accordingly, approval herein is conditioned upon consideration of such noncarrier as a carrier under §5(3) and its subjection to §20a of the Act.—Branch Motor Exp. Co.—Control—Middle Atl. Transp., 109 M.C.C. 807 (823-4).

8. Securities defined.—[Vols. 10-19, 21].—Deposit receipts issued by depository bank as a receipt for shares of acquired carrier's stock deposited with it by shareholders, and used as a mechanism for maintaining the status quo pending Commission approval of acquiring carrier's applications to issue shares of its own stock to be exchanged for that of acquired carriers in connection with proposed control transactions, are not securities within meaning of §20a and, thus, do not require Commission approval prior to issuance. Since the deposit receipts were not issued by control applicant with respect to its stock, they could scarcely be viewed as its securities, as plaintiff claims, but only as securities of the acquired carrier; moreover, they did not affect acquired carrier's capital structure, or alter terms of its stock to the disadvantage of shareholders or in violation of its corporate purpose.—Interstate Investors, Inc. v. United States, 287 F. Supp. 374 (386, 387-8)*.

9. Carriers, corporations, individuals subject to section.—[Vols. 10, 11, 13, 15, 16, 18, 19, 21].—See also Matlack, Inc.—Control—Southern & T. I. McCormack, at §5(3), n. 10.

Since §11(f) of Washington Metropolitan Area Transit Regulation Compact between the States of Virginia and Maryland and the District of Columbia, as approved by Congress, is clear that the Commission's jurisdiction over issuance of securities is not suspended when the issuing carrier does not operate exclusively in the Metropolitan District as defined by Public Law 86-794, and D.C. Transit System (DCT) by virtue of its special racetrack and charter rights, is authorized to serve points outside the Metropolitan District, the Commission has jurisdiction over DCT's proposed note issue. Although DCT argues that 99 percent of its operations are conducted within the defined district, the phrase "does not operate exclusively in the Metropolitan District" is unambiguous and not susceptible of a construction that it means "almost exclusively" within that district.—D.C. Transit System, Inc.—Control—W., V. & M., 93 M.C.C. 621 (625).

Applicant for authority to issue bonds, a bi-state development agency that holds interstate motor carrier operating rights and also operates noncarrier activities, is subject to the jurisdiction of the Commission in matters relating to securities, although it maintains maximum separability of functions and State laws are a bar to organization of separate legal entities. While similar State instrumentalities can and have avoided the Commission's jurisdiction by organizing separate transportation corporations, applicant was found to be a carrier subject to Commission jurisdiction in 93 MCC 579 and therefore it is subject to provisions of §20a and §214. Authority granted.—Bi-State Development Agency of Mo.—Ill. Met. Dist., Bonds, 97 M.C.C. 747 (748, 750).

Inasmuch as acquiring carrier's subsidiary is not authorized to operate as a common carrier and will not, as a result of Commission approval of the transaction proposed herein, become a common carrier, its secondary liability on acquiring carrier's promissory note as a guarantee of the note by the corporation which applicant seeks to acquire is not subject to prior approval under §214 since it is a noncarrier holding company which has never been subjected to the provisions of §5(3) as its acquisition of carrier subsidiaries comprised a single-established common carrier system and did not present a transaction within the scope of §5(2). Additionally, it has never filed an application for common carrier authority nor for authority under §5 of the Act.—United Buckingham Freight Lines, Inc.—Control—Nortruck, 104 M.C.C. 367 (371).

Securities issuable by the subsidiary or any of the noncarrier affiliates of vendee, a motor common carrier, would not be subject to the provisions of §214 inasmuch as said noncarrier affiliates are not in control of vendee and therefore cannot be considered as carriers under the provisions of §5(3) of the Act which provides that noncarriers controlling a regulated carrier may themselves be deemed carriers.—East Tex. Motor Frt. Lines—Purchase—Lee, 109 M.C.C. 299 (320).

10. Corporate powers considered; subsidiaries; corporate control.—[Vols. 10-13, 16, 19, 21].—See Refiners Transport & Term. Corp.—Purchase—Mitchell case, §5(3), n. 10; Schwerman Trucking Co.—Control and Merger case, §5(2), n. 52, supra; Yosemite

Park & Curry Co. Stock Dividend case, §214, n. 28, infra.

13. Assets capitalizable, generally.—[Vols. 10-19, 21].—Applicant's capitalizable assets include among its tangible property not only property used directly in the service of transportation, but also property used for storage of household goods and terminal operations. Such combination of activities is usual among household goods carriers and, considering nature of the business, capitalization of such property may properly be approved.—Beking Van & Storage Co. Stock, 93 M.C.C. 558 (561).

Stock

24. In general.—[Vols. 10-14, 16-19, 21].—Authority granted to applicant to issue not exceeding 2,500 shares of common stock of the par value of $5 each, pursuant to the provisions of an executive restricted stock plan (a recent development in the field of deferred compensation) whereby the stock awarded would be placed in escrow in the employee's name during his continued tenure. The plan is for a lawful object within applicant's corporate purposes and compatible with the public interest and will not impair its ability to perform its service to the public as a common carrier.—Bekins Van & Storage Co. Stock, 331 I.C.C. 638 (642).

In seeking authority to issue stock to provide funds for capital expenditures under a general expansion program, applicant suggests creation of a special fund from which no expenditure would be made without further authorization by the Commission, upon appropriate showing by applicant as to purposes of the proposed expenditures. Such a fund would best permit it to coordinate scheduling of building plans with cash receipts under the plan for sale of the stock and cash available from retained earnings; approval conditioned accordingly.—Bekins Van & Storage Co. Stock, 93 M.C.C. 558 (559); and since the stock is to be sold on reasonable terms to officers, employees, and contract drivers of applicant and its affiliates for the further purpose of creating incentive for them to be loyal and work efficiently for the employer, approval is further conditioned that applicant make available to any person solicited to purchase the stock a copy of the offering circular in substantially the form submitted with the application.—Id., p. 560.

Issuance by transferee of 10,000 shares of common stock of par value $100 each concurrent with consummation of transaction herein approved as consistent with the public interest since it will enable transferee to provide the transportation to the extent approved herein.—C F Tank Lines, Transferee, & Consolidated, Transferor, 109 M.C.C. 688 (692)*.

27. To finance additions and betterments; equipment.—[Vols. 10-12, 14-16, 18, 19].—Issuance of not exceeding 70,000 shares of applicant's $5 capital stock, to be sold to its officers, employees, contract drivers, and their spouses on terms outlined, the proceeds to be used to provide funds for additional expenditures as part of expansion program of applicant and its subsidiaries and controlled affiliates, authorized, subject to certain conditions. Based on its experience in recent years, applicant anticipates need to build new warehouse and truck terminal facilities in new, fast-growing urban areas, particularly in western States.—Bekins Van & Storage Co. Stock, 93 M.C.C. 558 (559, 560).

28. Stock dividends.—[Vols. 10-13, 15-19, 21].—While the Commission should not substitute its judgment for that of management as to whether fractional interests in proposed stock dividend may be paid in cash or stock, in finding that stockholders entitled to fractional interests are being fairly and justly treated it must determine whether the price to be paid therefor is reasonable and commensurate with fair market value of applicant's stock immediately or within a reasonable time prior to declaration of the proposed stock dividend.—Yosemite Park & Curry Co. Stock Dividend, 97 M.C.C. 582 (585).

29. Retirement of other negotiable instruments.—[Vol. 10].—Though holding company may properly be authorized to issue not over 500,000 shares of its common stock, par value $2.50 each, to effect conversion of debentures concurrently authorized, authority to issue additional shares as may be required from time to time for like purpose is denied. Authorization of an undefined number of shares, or a maximum of stock, which might be required by terms of the indenture for an indefinite future period, without consideration of applicant's financial condition at time of actual issuance, would not be in public interest. Authority for issuance of additional shares may be sought when it becomes evident that convertibility will be endangered.—Ryder System, Inc., Securities, 93 M.C.C. 405 (407).

30. To finance acquisitions.—[Vols. 10-19, 21].—The clearing up of a subsidiary's expenses and obligations incurred in acquisition of a pipeline company is the use to which applicant intends to apply proceeds from proposed note and stock issuance; such transportation is not the primary transportation concern of applicant motor carrier, and diversion of applicant's credit to such ends is not consistent with its welfare, since there is an inadequate showing that proposed investment would be judicious when considered in relation to the business itself and there is reason to believe that it would be damaging to applicant's traffic and revenue. Furthermore, if considered transaction were approved, applicant would be over capitalized. Denied.—Redwing Carriers, Inc., Securities, 101 M.C.C. 764 (767-9).

Notes

77. Payment for carrier properties; noncarrier properties.—[Vols. 10-12, 14-19, 21].—Authority granted vendee to issue four secured nonnegotiable promissory notes in aggregate principal amount not exceeding $643,000, covering balance of purchase price of operating rights, payable to each of vendors in 120 equal monthly installments with interest at 5 percent on all unpaid balances; also four unsecured nonnegotiable promissory notes in aggregate principal amount not exceeding $150,000 to provide for possible upwards adjustment in the purchase price, payable to each of vendors in 14 months with interest at 5 percent payable semiannually.—Glendenning Motorways, Inc.—Purchase—Moland Bros. Trucking, 93 M.C.C. 194 (195, 196, 198-9).

Authority granted D.C. Transit System (DCT) to issue secured promissory notes in aggregate principal amount not exceeding $1 million, to finance acquisition of control of Washington, V. & M. Coach Co. On basis of DCT's income statements and balance sheets of both companies, DCT should be able to generate sufficient funds to service its long-term debt, including current maturities on the notes to be issued.—D.C. Transit System, Inc.—Control—W., V & M., 93 M.C.C. 621 (626).

81. Payment of indebtedness.—[Vol. 19].—See Redwing Carriers, Inc., Securities case, §214, n. 30, supra.

Bonds

102. Payment for properties.—[Vols. 12, 14, 19].—See Bi-State Development Agency of Mo.—Ill. Met. Dist., Bonds case, §214, n. 9, supra.

Miscellaneous Securities

115. In general; authorization; terms, conditions.—[Vols. 17, 19, 21].—Applicant holding company proposes to issue $5,500,000 principal amount of convertible debentures, bearing interest at not over 6 percent per annum and subordinated as to principal and interest to all senior indebtedness, $3 million of the proceeds to be advanced to a carrier subsidiary for retirement of a like amount of vehicle debt outstanding, and the balance to be used to supplement applicant's working capital. As the subsidiary has filed application to evidence the advance by issuing its note to applicant, and ratio of applicant's capitalizable assets to capitalization would thus not be significantly changed, authority for the debentures is granted on condition that it be not exercised unless and until the subsidiary's note is authorized and issued.—Ryder System, Inc., Securities, 93 M.C.C. 405 (406, 408, 409).

Because of belief that a substantial portion of the debentures will be subscribed for by applicant's stockholders, leaving only a relatively small portion to be purchased by underwriters, applicant has not entered into a firm agreement with its underwriters, and proposes that such agreement provide for a sliding scale of fees based on amount of debentures actually purchased by them. However, the underwriters' fee should not remain an indefinite quantity; therefore, approval is further conditioned that such fee shall not exceed applicant's estimate of $80,000, or 10 percent of the face amount of debentures purchased, whichever is less.—Id., pp. 408-9.

Assumption of Obligation or Liability

125. Subsidiaries' or affiliated companies, obligations.—[Vols. 10-19, 21].—See also Schwerman Trucking Co.—Control and Merger case, §5(2), n. 52 supra.

Provision of stock-purchase agreement whereby acquiring carrier warrants that during temporary control it will pay principal and interest, according to their terms, on certain promissory notes executed by acquired carrier, on which two of the selling stockholders are endorsers or comakers, that deeds of trust securing those obligations will not be permitted to become in default, and that the stockholders will be indemnified for any loss or expense arising out of their obligations on those notes, constitutes an assumption of obligation and liability on the notes within meaning of §§20a and 214. Approval of control is therefor conditioned on cancellation of that provision, or, alternatively, on acquiring carrier's filing application for appropriate authority and deferring consummation of the transaction until it is granted.—Arkansas-Best Freight System, Inc.—Control—Delta, 93 M.C.C. 474 (478, 479).

126. Vendor's obligations.—[Vols. 19, 21].—Authority granted vendee to assume obligation and liability on unpaid balance of secured promissory notes of vendors not to exceed $40,241.—Glendenning Motorways, Inc.—Purchase—Moland Bros. Trucking, 93 M.C.C. 194 (195, 198-9).

Regulations of the Commission

37 FR 7160, Apr. 11, 1972, Part 1115: Issuance of Securities, Assumption of Obligations, and Filing of Certificates and Reports, §1151.1 Application form, Form BF-6 referred to amended, effective 60 days after publication in the Federal Register.

37 FR 9119, May 5, 1972, Part 1115: Issuance of Securities, Assumption of Obligations and Filing of Certificates and Reports, effective date of order of March 22, 1972 (37 FR 7160) postponed to July 17, 1972, effective on date of order.

38 FR 25686, Sept. 14, 1973, Part 1115: Issuance of Securities, Assumption of Obligations, and Filing of Certificates and Reports, Regulations prescribing form for offering circulars published for public sale of securities, effective Nov. 13, 1973.

Section 215. *[§315 U.S.C.]* Security for protection of public.—[Unchanged. See vol. 10, p. 8134, vol. 17, p. 13577.]

Historical notes, see vol. 10, p. 8134, vol. 11, p. 9483, vol. 12 p. 10422.

Historical Note

On July 10, 1973, the Commission recommended to Congress legislation (S. 2249) which would authorize the Commission to prescribe security standards for protection of the public for loss or damage to property transported by carriers subject to parts I and III of the Interstate Commerce Act.—Annual Report, 1974, p. 83.

Regulations of the Commission

33 FR 10572, July 25, 1968, Part 1043: Surety Bonds and Policies of Insurance, §1043.2 Insurance, minimum amounts (b) *Motor common carriers; cargo liability*, amended, effective Jan. 1, 1969.

34 FR 3628, Feb. 28, 1969, Part 1043: Surety Bonds and Policies of Insurance, §1043.1 Surety bond, certificate of insurance, or other securities (b) *Common carriers—cargo insurance; exempt commodities*, amended, effective upon publication in Federal Register.

35 FR 2829, Feb. 11, 1970, Part 1043: Surety Bonds and Policies of Insurance, §1043.7 Forms and procedure *** (3) *Termination by replacement*, amended, effective upon publication in the Federal Register.

39 FR 10254, Mar. 19, 1974, Part 1043: Surety Bonds and Policies of Insurance. Amendment of 49 CFR §1043.2(a) regarding limits of liability, effective July 1, 1974.

39 FR 11891, April 1, 1974, Part 1003: List of Forms. Regulations promulgated for freight forwarder liability forms, effective July 1, 1974.

39 FR 13159, April 11, 1974, Part 1043: Surety Bonds and Policies of Insurance. Correction of order of Mar. 27, 1974 (39 FR 11891).

Section 216. [§*316 U.S.C.*] Rates, fares and charges—(a) Duty to establish reasonable rates; etc.; service and equipment; rules and regulations; reasonable divisions of joint fares.—[Unchanged. See vol. 10, p. 8142.]

Historical note, see vol. 11, p. 9487.

Historical Note

The Commission recommends that §216 be amended so as to enable the Commission to order the establishment of through routes and joint rates between motor common carriers of property, and between those carriers and carriers subject to parts I and III of the Act.—Annual Report, 1973, p. 86.

Notes of Decisions

Volume 10—p. 8142; Volume 11—p. 9487; Volume 12—p. 10425; Volume 13—p. 11092; Volume 14—p. 11614; Volume 15—p. 12227; Volume 16—p. 12880; Volume 17—p. 13579; Volume 19—p. 15811; Volume 21—p. 17527.

1. Construction and interpretation.—[Vols. 11-17, 19].—See also Loss and Damage Claims case, §1(6), n. 731, supra.

The Commission's determination as to whether charges resulting from the detention of motor common carrier equipment are just and reasonable does not exceed the indicated jurisdictional bounds even though questions of agency and contract law may be involved.—Payment for Detention Charges, Eastern Central States, 335 I.C.C. 537 (539)*.

10. Duty to furnish service.—[Vol. 21].—Applicant's petition to alter its existing authority by increasing the number of passengers it can carry and by acquiring round trip authority was denied when Commission found evidence lacking to establish either an economic or a public need for the service. Neither is proof of operating economy or improved service alone sufficient to sustain applicant's burden of proof re public convenience and necessity; proof of both is necessary is the absence of public support. See also dissent.—D & M Taxi Co., Inc., Extension—More Passengers, 115 M.C.C. 294 (297-298)*.

Shippers have some duty to seek out existing carriers for their transportation requirements, especially when shippers' available traffic amounts to only one or two truckloads a month.—Graham Extension—Port Huron, Mich., 117 M.C.C. 412 (417)*.

Within fairly wide limits, carriers are free to conduct operations as large or as small as their resources and business judgment may dictate. However, certificates are issued with the expectation that the holder will provide a service substantially conforming in scope to the rights described therein. When a carrier has ceased operations, or has curtailed service to a level tantamount to a cessation of operations, it is in violation of the statute and the conditions pursuant to which the certificate was issued, and the carrier may be directed to resume a reasonably continuous and adequate service or face the loss of its certificate.—Estacada-Mollala Stages, Inc.—Revocation of Certificate, 118 M.C.C. 115 (121).

101. Through routes.—[Vols. 12, 19].—Motor carriers of passengers have a statutory duty to establish reasonable through routes and just and reasonable fares, charges, regulations, and practices relating to passenger transportation. While Commission initiative is not assumed, if it appears that the public interest will otherwise suffer, the Commission may undertake to prescribe terms and conditions under which such through routes shall operate. Legislation dealing with interchange problems is in general terms, with meaning of the terms in particular cases left to administrative or judicial decision. Accordingly, though no language in the Act specifically commands the carriers to interchange buses with each other, respondent Greyhound's argument that through-bus arrangements are wholly voluntary and bus interchanges cannot be required, on just and reasonable terms, is rejected. Greyhound should promptly agree with petitioner for restoration of through bus service (using latter's route) in effect on date of earlier §5(2) case in which it obtained authority encircling petitioner; and should they fail to agree on acceptable terms, a §5(9) supplemental order will require restoration of practices and traffic patterns then existing.—Mt. Hood Stages, Inc.—Petition for Modification, 104 M.C.C. 449 (458-9, 462)*.

Through-bus regulations (i.e., §§5 and 6 under the passenger carrier superhighway rules) are designed to enable certificated regular-route motor carriers of passengers to utilize the new superhighways on a joint basis for safety, convenience, efficiency, or economy in continuing the interline services which they conduct over other highways by combining their operations at common points of service. A through-bus service could be considered either a mutual relocation of existing interline points or a jointly operated alternate route.—Motor Service on Interstate Highways—Passengers, 110 M.C.C. 514 (542-43); joint requests for certificates encompassing through-bus operations will be entertained and considered on a case-by-case basis. The carriers will be required to supply such information as the point on the superhighway at which the interline and change of control of the operation would be brought about, and should state whether an actual change of vehicles would take place at the point of interline or whether the operation would be performed in the same vehicle in a through movement under a leasing arrangement. These bus operators also must bear in mind that the actual control of the operation must pass to that carrier under whose authority the vehicle is moving.—Id., p. 543; in the light of the type of authority involved under the through-bus regulations, and consistent with the other passenger carrier superhighway regulations, it will be appropriate to incorporate into the through-bus regulations adopted in the instant proceeding an added requirement that the applicant carriers must demonstrate that the proposed operations will not materially change the competitive situation between themselves and any other carrier or carriers.—Id., pp. 543-544.

Section 216. (b) [§*316(b) U.S.C.*] Rates, facilities for carriers of property.—[Unchanged. See vol. 10, p. 8145.]

Notes of Decisions

Volume 10—p. 8145; Volume 11—p. 9489; Volume 12—p. 10427; Volume 13—p. 11092; Volume 14—p. 11614; Volume 15—p. 12228; Volume 16—p. 12882; Volume 17—p. 13581; Volume 18—p. 14534; Volume 19—p. 15813; Volume 21—p. 17527.

2. Construction and interpretation.—[Vol. 12].—Commission in dealing with the entire spectrum of freight shipments rather than fixing or approving commodity rates, may not lawfully sanction complete elimination of classification without sufficient reason, and once the Commission has recognized certain classifications to be fair and reasonable it cannot sanction significant departures from them without adequate record support and reasoned explication. Evidence was insufficient to support Commission's determination that rates and charges under new tariff which abandoned all classification factors on shipments under class 100 in the 101-200 pound range for small shipments were just and reasonable.—National Small Ship. Traf. Conf. v. United States, 321 F. Supp. 500 (501)*.

4. Safe and adequate equipment to be furnished.—[Vols. 10, 11, 19].—See Loading, Unloading by Winch, Oil Field Haulers case, §216 (g), n. 26, infra.

Tests of Reasonableness

25. Competition considered.—[Vols. 10-13, 16-19, 21].—See Motor Vehicles, Kansas City, Mo., to Southwest case, §1(5), n. 289, supra.

Weight as Factor

60. Weight basis.—[Vols. 10-12, 14, 16, 18, 19, 21].—See also Assembling Rates to Atlanta, Charlotte, Greensboro case, §408, n. 2, infra.

The rule prescribed herein (49 CFR 1056.6) clarifies procedures for determining the loaded weight, tare weight, and net weight of vehicles engaged in transportation of household goods by specified modifications of the language of the former rule fixing for such determinations. Use of constructive weights should be strictly limited to shipments moving between points where scales are not available or to those instances where the entire movement occurs when scales are not open. Carrier shall obtain a weight ticket, signed by weighmaster or carrier's driver, for each weighing. Such ticket shall show number of bill of lading accompanying the shipment. Copy of such ticket shall be retained in carrier's file and a copy given to shipper. Carriers shall reweigh shipments upon request of shipper made prior to the delivery date. Gross, tare, and net weights on reweigh shall be recorded on bill of lading and the vehicle-load manifest and a copy given to shipper. The lower of the 2 net scale weights is determinative of applicable reweigh charges, which are to be paid by shipper requesting such reweighing.—Practices of Motor Common Carriers of Household Goods, 111 M.C.C. 427 (439-44)*.

Comparison of Rates

78. Value dependent upon similarity of circumstances.—[Vols. 12, 14, 17-19, 21].—Part I, §1(5), n. 222.—Comparison of assailed rates on salt with higher rates of other carriers does not establish that they are unreasonably low, when circumstances surrounding establishment of the compared rates are not shown.—Midwest Emery Freight System, Inc. v. Lee Bros., Inc., 322 I.C.C. 701 (704)*.

Cost of Service

100. Costs considered; truck capacity; truck capacity.—[Vols. 10, 11, 19, 21].—We have generally considered line-haul costs as being jointly incurred by the outbound and inbound movements. Accordingly, in computing costs for truckload shipments, a round-trip load factor has been developed by adding the proposed minimum weight of the rate in question to the load, if known, in the reverse direction, or if not known to the system average load, and dividing the result by two. However, certain exceptions thereto have been recognized which apply here.—Atchison, T. & S. F. Ry. v. Morris, 340 I.C.C. 51 (58).*

101. Terminal services.—[Vols. 10-19, 21].—Respondent's cost data are not sufficiently accurate to reflect its out-of-pocket costs for 37 t.l. shipments on which helper service was furnished; though it claims overall profits of $30.48 to $122.60 per truckload on those shipments, rates applicable thereon are not shown. Its computations fail to take into consideration pickup and delivery costs other than "the cost of the road driver" and amount paid the helper, and manner in which it developed those costs is not indicated. Other evidence intended to show that use of a helper results in maximum use of equipment has little probative value in determining compensativeness; its proposed rule providing for free helper service for loading and unloading t.l. freight is not shown to be compensatory.—Free Helper Service in Middle Atlantic Territory, 323 I.C.C. 709 (711).

102. System average costs.—[Vols. 10-19, 21].—Part I, §1(5), n. 95.—See also §216(g), n. 66.

In suit to set aside Commission orders holding certain motor carrier rates on clay and drilling mud to be noncompensatory and, therefore, unreasonable, the court agrees with the Commission that regional average cost studies have been and can be used in determining whether rates assailed in a complaint proceeding are just and reasonable; however, the carriers' actual costs, if ascertainable, are a better guide than regional average costs. In instant case, the examiner erred in not permitting plaintiffs (defendants) to introduce actual motor-carrier costs, probably on the theory that, since he found complainants' regional average cost studies had not established a prima facie case, such evidence was not proper. When the Commission reversed the examiner, however, and determined that a prima facie case had been made, it should have seen to it that the record was supplemented before it acted. Plaintiffs' evidence was available; and when the ultimate decision is best based on costs of carrier against whom complaint is made those costs, when available, should be considered.—United Buckingham Freight Lines v. United States, 288 F. Supp 883 (885)*.

Evidence supporting the prima facie case on which the Commission relied was subject to being rebutted if actual costs had been available; plaintiff motor carrier was denied opportunity to present its actual costs by the examiner's erroneous application of a rule of procedure; therefore, since the Commission must see to it that the record is complete, it is manifestly unfair for it to reverse the examiner's conclusions and decide the case on the record presented to him, which was obviously incomplete due to his ruling. Record before the court is not convincing that the Commission would find considered rates unreasonable on a complete record showing actual costs of motor carriers who originate the traffic; accordingly, the Commission's report and orders are vacated and annulled and the case is returned for a full hearing as to whether the rates in issue are noncompensatory.—Id., pp. 886, 887.

As a general rule a carrier's system average expense is considered of little value in determining lawfulness of rates for particular traffic movements. However, as an exception, system average expense of a specialized carrier, engaged in hauling a single commodity or group in a particular area, may be regarded as a fairly reliable measure of that carrier's cost of operations in absence of evidence to the contrary. Contract-carrier defendant being a specialized carrier of salt, its system average costs are an acceptable measure of cost of considered service; and as the common-carrier defendant handles salt as a separate operation, such handling is tantamount to operations of a specialized carrier. The common carrier's data, pertaining only to salt traffic, are therefore entitled to more weight than complainant's cost evidence, which reflects system and regional averages, the former including that defendant's perishable traffic, which manifestly entails higher costs than salt. As the common-carrier defendant's costs parallel the contract carrier's, latter's latest system average costs of record fairly represent the cost to both of handling the involved salt traffic.—Midwest Emery Freight System, Inc. v. Lee Bros., Inc., 322 I.C.C. 701 (703)*.

On reconsideration, protestants' evidence based on regional average cost fails to show that respondent's proposed initial rates are below a minimum reasonable level, and will not support a finding that the proposed rates are non-compensatory since regional average costs are based on the costs of carriers of general commodities and are not representative of respondent's costs as an irregular route carrier of specified commodities.—Foodstuffs & Agricultural Commodities, California & Arizona, to West and South, 329 I.C.C. 321 (324).

The round trip movement is an indivisible unit of production resulting in a joint cost and, whether an empty movement occurs in the line-haul, the cost therefor is borne by all of the revenue freight for the entire round trip.—Composition Roofing, Stroud, Okla. to St. Louis, Mo., 329 I.C.C. 612 (618)*.

104. Ascertaining cost.—[Vols. 12, 14, 18, 19, 21].—Respondent motor carriers' cost study is deficient to the extent it is based on regular-route, general-commodity carriers with 6 percent additive for circuity inapplicable herein as operations involved are irregularly routed and specialized. Commission examiner adjusted study by elimination of 6 percent additive, restatement of out-of-pocket costs as 95 percent of total cost rather than 90 percent, and reduced terminal costs. As adjusted, study is acceptable approximation of out-of-pocket costs on instant traffic and as basis for prescribed minimum rates.—Rates on Formerly Exempt Commodities, 329 I.C.C. 61 (64-5).

The Commission has consistently held that where regional average costs are based on the costs of carriers whose operations differ from those of the respondent, those costs are not necessarily representative of that carrier's costs. Since the regional average costs submitted by protestants are based on the costs of carriers of general commodities and reflect a regional line-haul cost of 38.99 cents per vehicle-mile, whereas respondent is an irregular-route carrier of specified commodities, and has shown that its total system average expense per vehicle-mile was only 30.4 cents, the general cost evidence adduced by the protestants cannot be accepted as representative of the respondent's operating expenses.—Foodstuffs & Agricultural Com., Calif. & Ariz. to West, 329 I.C.C. 321 (324)*.

Protestant compared rates of a specialized motor common carrier with the average costs of class I and class II general-commodity carriers in an effort to show that the proposed initial rates are noncompensatory. However, where regional average costs are based on operations different from those of a particular respondent, such costs are not necessarily representative of the latter's operations. This principle is especially pertinent here since the regional average figures include both truckload and more costly less-than-truckload traffic, while respondent's traffic is in truckload movements. Also, the operations of the compared carriers are not otherwise shown to be similar to those of the respondent. Proposed rates not shown to be unjust or unreasonable.—Meats & Packinghouse Products, Midwest to Far West, 329 I.C.C. 604 (609).

When respondents' cost data on shipments of chemicals, drugs, and related articles from New Jersey and New York to Chicago by owner-operators cannot be accepted as reliable owing to deficiencies indicated, then protestant motor carrier associations' regional average cost computations may be accepted as basis for cost of such service subject to rebuttal by competent evidence that an individual carrier's costs are different.—Chemicals, Drugs, and Related Articles, 335 I.C.C. 601 (603-05).

112. —Out-of-pocket costs, with margin over, as basis.—[Vols. 10-12, 16, 18, 19, 21].—Upon investigation, rates of respondent motor carriers on commodities formerly exempted from economic regulation by §203(b)(6) were shown just and reasonable and not otherwise unlawful, with certain indicated exceptions, as cost evidence submitted by respondents and adjusted by hearing examiner reasonably approximate respondents' out-of-pocket costs and prove such currently effective rates generally exceed costs and are compensatory.—Rates on Formerly Exempt Commodities, 329 I.C.C. 61 (70).

Assailed rates on shipments of chemicals, drugs, and related articles from New Jersey and New York to Chicago were found to be below respondents' out-of-pocket costs for such service. Since out-of-pocket costs represent the floor below which rates should not be allowed to gravitate, the assailed rates are noncompensatory and so are unjust and unreasonable to the extent they are lower than 129 cents, minimum 35,000 pounds, and 120 cents, minimum 40,000 pounds.—Chemicals, Drugs, and Related Articles, 335 I.C.C. 601 (606-7).

Rates by Commodities

125. Commodities; rates prescribed or approved.—[Vols. 10-19, 21].—Part I, §1(5), n. 350; Part III, §305(a), n. 125; Part IV, §404(a), n. 125.

Aluminum; articles, scrap: [Vols. 10. 11, 14, 16-19, 21].—Reduced t.l. rates of $1.35, minimum 38,000 pounds on aluminum extrusions from Miami to Chicago, approved for respondent only.—Aluminum Extrusions from Miami to Chicago, 325 I.C.C. 188 (188).

Building materials; roofing: [Vols. 10-12, 14, 17-19].—Proposed reduced truckload commodity rate of 41 cents, minimum 88,000 pounds, on composition or prepared roofing from Stroud, Okla., to St. Louis, Mo., found just and reasonable for proponent only. Rate applies only when a shipment is loaded on not more than two trucks by the shipper, and unloaded by consignee.—Composition Roofing, Stroud, Okla., to St. Louis, Mo., 329 I.C.C. 612 (612)*.

Proposed reduced t.l. commodity rate of 80 cents, minimum 44,000 pounds, on gypsum and plaster from Southard, Okla., to Chicago, Ill., not shown just and reasonable. Such rate is not compensatory on a round-trip cost basis and one-way costing is not herein applicable.—Gypsum and Plaster, Southard, Okla. to Chicago, 332 I.C.C. 48 (52).

Candy, confectionery: [Vols. 10-13, 16-19].—Proposed t.l. commodity rate of 93 cents, minimum 40,000 pounds on candy and related articles from Hackettstown, N.J., and New York, N.Y., to Chicago found not compensatory and not otherwise lawful. Other proposed rates on such traffic considered herein found just and reasonable.—Candy & Confectionery, New Jersey & New York to Chicago, 332 I.C.C. 43 (44-5).

Carbon black: [Vols. 11, 18].—Proposed rate of 127 cents per hundredweight for carbon black approved for applicant, based on added-traffic theory.—Carbon Blacks from the Southwest to Ind., Ohio & Mo., 325 I.C.C. 138 (146).

Chemicals: [Vols. 10-12, 16-19].—Assailed rates on chemicals, drugs, and related articles of 101 cents, minimum 40,000 pounds, and 109 cents, minimum 35,000 pounds, from points in New Jersey and New York to Chicago, Ill., found unjust and unreasonable to extent they are lower than 129 cents, minimum 35,000 pounds, and 120 cents, minimum 40,000 pounds.—Chemicals, Drugs, and Related Articles, 335 I.C.C. 601 (607).

Clay; fullers' earth; shale; products: [Vols. 11, 12, 18, 19].—Assailed rates on clay and drilling mud from points in South Dakota and Wyoming to destinations in midwestern states found unjust and unreasonable in certain instances and not unjust and unreasonable in other instances.—Atchison, T. & S. F. Ry. v. Morris, 340 I.C.C. 51 (61)*.

Feeds, animal, poultry: [Vols. 10, 11, 13, 14, 18, 19, 21].—Proposed motor common carrier rate of 45 cents, minimum 40,000 pounds, on prepared animal feed, other than frozen, from Kansas City, Mo., to Chicago, Ill., and points taking the same rates, found just and reasonable, and otherwise lawful, for one respondent only.—Animal Feed from Kansas City, Mo., to Chicago, 325 I.C.C. 147 (147).

Household goods: [Vols. 12, 16-18].—49 CFR 1056 was amended by addition of a regulation requiring that no motor common carrier of household goods shall have in effect for its account more than one level of rates, whether local or joint, for the same transportation service in interstate or foreign commerce between the same two points in the same direction (49 CFR 1056.21).—Practices of Motor Common Carriers of Household Goods, 118 M.C.C. 762 (769-770).

Iron and steel articles: [Vols. 10-12, 14, 16-19,21].—Reduced rate of 36 cents, minimum 36,000 pounds, on sheet steel, Sparrows Points, Md., to Scranton and Carbondale, Pa., found just and reasonable.—Sheet Steel, Sparrows Point to Scranton and Carbondale, 323 I.C.C. 554 (556)*.

Petroleum, petroleum products: [Vols. 10-12, 14, 16-19, 21].—Weekly rates on gasoline and distillate fuel oil from Sparks, Nev., to points within 200 miles thereof, the same as corresponding intrastate rates and applicable when minimum quantities of 120,000, 180,000, 240,000, or 300,000 gallons (including intrastate as well as interstate gallonage) are tendered by shipper for transportation by one carrier in a single unit of equipment in 7 consecutive days, approved as just, reasonable, and otherwise lawful. The rates are subject to a weekly minimum charge of $900 per vehicle unit, and are based on separate scales, somewhat lower for gasoline than for oil, stated in amounts per gallon shown in appendix, for distances not over 20 miles, progressing by approximately 10-mile blocks to 200 miles, except that the 300,000-gallon rates do not apply beyond 130 miles.—Weekly Rates on Petroleum Products—from Sparks, Nev., 332 I.C.C. 541.

Particular Descriptions of Freight Rates

160. Loading and unloading.—[Vols. 10-12, 14, 15, 19, 21].—Proposed rule in tariff naming rates on oilfield commodities, providing that carrier may for its convenience substitute vehicles not equipped with winches for the line-haul transportation and at its expense obtain a winch for loading or unloading commodities not requiring additional lift equipment, does not violate orders entered in 300 ICC 409 and subsequent reports prescribing minimum rate scales on those commodities in the Southwest. When the minimum-rate order was entered, loading and unloading services were included in the line-haul rates, and the order did not alter those tariff provisions. Moreover, in that proceeding the Commission stated that if a carrier holds out to perform pickup and delivery services at line-haul rates it may elect to have them performed by others and absorb the cost thereof; thus the service contemplated by the new rule—which merely clarifies services offered at present rates under a widespread and longstanding practice—is not prohibited by that proceeding. And since the proposal relates to manner of performing service already included in line-haul rates, it will not affect the existing rate structure.—Loading, Unloading by Winch, Oil Field Haulers, U.S.A., 323 I.C.C. 359 (361-2, 367-8).

Although respondent will be expected to comply with outstanding order in 321 ICC 406, to which proceeding it was a party, and which prescribed a rule governing furnishing of helper service for loading and unloading t.l. freight moving between middle Atlantic territory and Pittsburgh-Wheeling area, it would be improper to use that proceeding as a basis for prescribing that rule for future application by respondent in connection with all intraterritorial traffic in middle Atlantic territory outside the Pittsburgh-Wheeling area; record in instant suspension proceeding is too meager to warrant prescription of such a rule for respondent.—Free Helper Service in Middle Atlantic Territory, 323 I.C.C. 709 (711-2).

Respondents' practice of furnishing more than one man to load and unload shipments without specific tariff authority or charge therefor violates §216. Such practices were found, in 321 ICC 406, to be unduly preferential of consignors and consignees receiving such services, and prejudicial to those who do not receive them. The proposed "one man" rules requiring carrier to furnish only one man to load, be he driver or helper, not shown just and reasonable as the rules are indefinite as to conditions under which carrier's employee would not load, and consignor must load due to bulk or weight of a unit of a shipment. Proposed "extra-labor" rules authorizing carrier to furnish labor when requested by consignor or consignee at a specific hourly wage are, however, not ambiguous and are shown just and reasonable.—Tennessee Carolina Transp., Inc.—Investigation, 337 I.C.C. 542 (548-50).

The Commission held various sorting rules in issue not to conform with the tariff filing requirements of 325 ICC 631. Moreover, an evidentiary deficiency precluded any determination of the reasonableness of the proposed charges for sorted delivery of shipments which are not presorted or which for other reasons are not within the "no-charge" provisions of the rules in issue. The evidence submitted was inadequate to establish the reasonableness of the "no-charge" provisions under the various rules, which finding was premised on the failure of the proponents to make a convincing showing that a sorted delivery of presorted shipments actually results in no additional expense to the carriers.—Segregation of Freight, New Eng. & Mid Atl. States, 340 I.C.C. 306 (318)*; permitting only truckload traffic to engage in reverse sequence unloading would not result in violation of §216 and §217, since the circumstances and conditions attending truckload and LTL traffic vary substantially and, therefore, the preference and prejudice complained of may not be properly condemned as being *undue*. Moreover, the economic benefits that normally can be derived from the practice of reverse sequence unloading would not normally accure when that practice is applied to smaller LTL and AQ shipments.—Id., p. 323.

180. Proportional rates.—[Vols. 10-12, 16-19, 21].—Part I, §1(5), n. 402.—Proposed motor-water-motor multiple-trailer proportional rates on canned foodstuffs shown just and reasonable on such movements from Oakland and Long Beach, Calif., to indicated eastern destinations but not just and reasonable on shipments from other points on the Pacific coast as these rates neither are compensatory nor cover respondent's out-of-pocket costs.—Canned Foodstuffs, Pacific Coast to the East, 335 I.C.C. 612 (629).

190. Weekly minimum quantity rates.—Respondents' weekly rates on gasoline and fuel oil tendered in stated minimum gallonages for transportation by one carrier in one equipment unit in round-the-clock movement over a period of 7 consecutive days, in interstate or interstate-and-intrastate commerce, from Sparks, Nev., to points within 200 miles thereof, based on mileage scales stated in cents per gallon, somewhat lower for gasoline than for oil, and subject to a minimum weekly charge of $900 per unit, found just, reasonable, and not competitively destructive or otherwise unlawful. Considered rates are adequately compensatory when for only carrier handling traffic thereunder prior to hearing they have produced a better record of equipment utilization and a better ratio of vehicle-mile earnings and expenses than its systemwide bulk commodity operations. Operations under the involved rates will substantially reduce operating costs and enable the carriers to regain traffic now moving in private carriage; approved.—Weekly Rates on Petroleum Products—from Sparks, Nev., 322 I.C.C. 541 (542-3, 545, 551).

The weekly rates are not unlawful on ground that they are essentially contractual. Decision in 313 ICC 247, condemning contract rates based on a percentage of shipper's traffic, is not controlling because, first, a contract which ties up traffic for only a week is hardly comparable to one which removes traffic from competitive bidding for 6 months to a year, and second, no regulated carrier has contended that it would be injured by the so-called contract rates in issue.—Id., pp. 548-9.

201. Classifications; rules, exceptions.—[Vols. 10-16, 17, 19].—Evidence was insufficient to support the Commission's determination that rates and charges under the new tariff which abandoned all classification factors on shipments under class 100 in the 101 to 200 pound range and all except density in the 201 to 499 pound range for small shipments were just and reasonable.—National Small Ship. Traf. Conf. v. United States, 321 F. Supp. 500 (501)*.

Normally, if a rating in the general classification is too low, the carriers should correct it by changing the general classification and not by providing exceptions ratings or commodity rates higher than the classification basis. This does not mean that an exceptions rating or commodity rate may not be established if (1) the transportation characteristics of the excepted article moving between certain points differ substantially from the common characteristics of similar articles generally, or where (2) special circumstances peculiar to a particular area warrant it. However, it has been held that, once the complainant has shown that the defendants' exceptions rating exceeds the classification rating on the commodity under consideration, the defendants than have the burden of going forward with evidence to establish the reasonableness of the higher exceptions rating.—Feather & Down Assoc., Inc. v. Middlewest M. Frt. Bur., 340 I.C.C. 76 (78-79).

Commission determined the applicable classification ratings on shipments of plastic packaging containers prior to March 5, 1971, but held that issues regarding applicability and reasonableness on future shipments, due to changes in classification effective on above date, are moot.—Mammoth Plastics v. National Classification Board, 341 I.C.C. 15 (18-19).

230. Any-quantity rates.—[Vols. 11-13, 18, 19, 21].—Any-quantity exceptions ratings maintained by motor common carriers on shipments of pillows and cushions between points in the midwest found to be unreasonable to the extent that they exceed ratings in the National Motor Freight Classification. Exceptions ratings required to be cancelled.—Feather & Down Assoc., Inc. v. Middlewest M. Frt. Bur., 340 I.C.C. 76 (76).

275. Minimum rates; minimum charges.—[Vols. 10-15, 18, 19, 21].—Part I, §1(5), n. 14.—Minimum charge of $900 per unit of equipment per week, published in connection with weekly rates on gasoline and fuel oils, based on stated aggregate minimum gallonages of shipments tendered for round-the-clock movement in a single vehicle over a period of 7 days, which minimum charge applies when the total volume is less than the lowest stated minimum (as may occur when shipper makes deletions in the composite tender of shipments), is necessary to justify economically the dedication of particular equipment for 7 days; approved.—Weekly Rates on Petroleum Products—from Sparks, Nev., 322 I.C.C. 541 (543, 550).

Evidence supports finding that the lowest t.l. revenue consistent with cost of transporting salt from Marysville and St. Clair, Mich., to Chicago would be about $120. On this basis defendant's rate of 35 cents, minimum 80,000 pounds, is not shown to be unreasonable; but its rates of 43 cents, minimum 20,000 pounds, and 38 cents, minimum 30,000 pounds, earn less than cost of handling the traffic and are therefore unreasonably low. While finding that a reasonable minimum rate for the future must yield not less than $120 a truckload will require defendant to publish a rate of 60 cents, minimum 20,000 pounds, or 8 cents higher than present rates of complainant and other carriers, lawfulness of the compared rates is not in issue.—Midwest Emery Freight System, Inc. v. Lee Bros., Inc., 322 I.C.C. 701 (704)*.

In seeking to justify a need for proposed minimum charges, the respondents relied in part on a comparison of the revenue per vehicle-mile with the regional average cost per vehicle-mile on one shipment of aircraft wings. The record does not contain any other revenue-cost comparisons based on actual movements. Assuming, but without deciding, that revenue-cost comparisons of the nature described would be of probative value, there is no reasonable basis for concluding that movement establishes a need for minimum charges with such widespread application as proposed.—Minimum Charge for Capacity Loads, Transcon. Terr., 329 I.C.C. 706 (709-710).

Commission determined that exemption of all nonoilfield commodities on a territorial basis would destroy beneficial results achieved by the minimum-rate order prescribed in the original report, 300 ICC 407, as later modified. In recognition of circumstances peculiar to oil industry rate structure, the respondent carriers were permitted separately to establish rates on nonoilfield commodities included in pipe and machinery groups, without regard to minimum rate order, if tariff applicable thereto provides shipper certification that involved articles are not intended for ultimate use in the oil industry.—Oilfield Equipment To and Between the Southwest, 332 I.C.C. 688 (691-4).

Although on further hearing there is some suggestion that the minimum rate order be vacated in its entirety, no evidence warrants such a finding; nor is there any basis for concluding that the scope of these proceedings and the minimum rate order are limited to movements of oilfield machinery, equipment, materials, and supplies only when transported by Mercer-type carriers and that other common carriers transporting these commodities are exempt from complying with the order. Furthermore, while the record does not warrant granting all the relief requested, it does warrant further modification of considered order to relieve respondent motor common carriers from maintaining the prescribed minimum rates on movements of (1) standard or merchants pipe (less than 2 inches in diameter and 24 feet in length) and (2) asbestos-cement pipe and conduit and related articles between points in considered States.—Oilfield Equipment to and between the Southwest, 106 M.C.C. 298 (305-10)*.

Rates for Special Classes of Service; Practices

400. Pickup and delivery; split pickup, delivery.—[Vols. 10-19, 21].—Separate minimum charges on each l.t.l. shipment of imported bulbs tendered as one lot to defendant motor carriers at piers in New York City area for movement to defendants' terminals in same area found unjust and unreasonable as the amount of service performed in picking up multiple l.t.l. shipments does not vary with the number of consignees. Tariff provisions prescribed for such services.—Holland Bulb Exporters Assn. v. A.A.A. Trucking Corp., 329 I.C.C. 152 (157).

Proposed charge for pickup or delivery to and from points in Greene Co., Pa., based on alleged additional expenses incurred in servicing these points denied, since (1) no amount for billing and collecting had been included in computing regional average costs, (2) no underlying data were furnished to support any of the factors which were used to arrive at the cost per trip to and from the points in question, and (3) no evidence was offered to support the proposed minimum charge of $1 per shipment.—Pickup & Delivery at Pennsylvania Points, 340 I.C.C. 46 (49)*.

A motor common carrier of household goods shall notify shipper of delays in pickup or delivery of such shipments and reason therefor, as soon as it is apparent that it cannot meet the date or time specified on the order for service or bill of lading. Carrier is to pay the cost of such notification. Except upon request or concurrence of shipper, a shipment shall not be tendered for delivery prior to the agreed delivery date or period or time specified in the bill of lading. Carrier may, in indicated circumstances, place a shipment in storage near its destination, at the expense of carrier, and with notification of such action to shipper.—Practices of Motor Common Carriers of Household Goods, 111 M.C.C. 427 (459, 482-84)*.

412. Line-haul rates and accessorial services included.—[Vols. 18, 19].—Pursuant to respondent's holding out under its rates on imported shipments of frozen meats which are loaded direct from piers and wharves and its pickup and delivery rule, it is required to bear the costs of loading of vehicles. Pickup service contemplated by respondent's tariff embraces both calling for and loading at origin; and, there being no specific provision in the tariff for loading by the shipper, the loading is an integral part of the transportation service offered. Fact that labor contracts require that loading of vehicles at piers be done by terminal operators does not change, in any way, nature of the service to be rendered by carrier; moreover, the record shows that terminal operators perform considered loading as agents of respondent. Proposed tariff provision for absorption of considered pier loading charges, in order to clarify services offered under present rates, will eliminate existing uncertainty regarding respondent's payment of loading charges to the terminal companies; approved.—Frozen Foods—Southern, Middle Atl. & New England States, 323 I.C.C. 143 (146-8).

Respondent's proposed rule providing that, unless otherwise specified, its intraterritorial line-haul rates on t.l. traffic in middle Atlantic territory include service of two men for loading and unloading conflicts with findings in 321 ICC 406 insofar as it would apply to traffic moving between points in that territory and Pittsburgh-Wheeling area and is to that extent unlawful; and respondent's cost data fail to show that rates including such free helper service on traffic moving intraterritorially between points outside the Pittsburgh-Wheeling area would be compensatory. Not approved.—Free Helper Service in Middle Atlantic Territory, 323 I.C.C. 709 (711).

415. Handling; terminal charges.—[Vol. 21].—Commission herein modified 49 CFR 1056.4 (formerly numbered 276.4) regarding charges for accessorial or terminal charges so that all such charges for terminal services on line-haul movements, including those by freight forwarders exempt under §402(b)(2) of the Act, must be charged for separately and on a per unit basis.—Amendment of Pt. 276.4 General Rules & Regulations, 335 I.C.C. 698 (704-5).

450. Routing; misrouting.—[Vols. 12-14, 16-19, 21].—Part I, §1(6), n. 574; §15(8), notes.—Although a haul between two points in same State, but over a route partially through another State, is an interstate movement, the principle underlying the charging of intrastate rates in such situations is that the character of commerce is determined by shipper's intention and latter's continuing intention is that it shall be intrastate. See 17 MCC 661. Charging of higher interstate rate on such movement subjects carrier to liability for misrouting as an unreasonable practice. See 302 ICC 173.—Applicable Rates on Intrastate Shipments, 332 I.C.C. 887 (890-91).

Any carrier who, for his own convenience, converts a less-than-truckload shipment from an intrastate to an interstate character by moving such shipments over an interstate route may be liable for misrouting. Shipments so converted in character must be charged by the applicable interstate rate.—Applicable Rates on Intrastate Shipments, 335 I.C.C. 472 (475)*.

460. Demurage.— [Vols. 13, 21].—See also Payment of Detention Charges, Eastern Central States case, §223, n. 25, infra.

District court upheld Commission's order prohibiting carriers from specifying in their tariffs that certain wharehousemen, steamship agencies, and others similarly situated, who were neither consignors nor consignees, are liable under certain circumstances for detention charges on trucks loaded or unloaded at their premises.—Middle Atlantic Conference v. United States, 353 F. Supp. 1109 (1122-23)*.

Proposed tariff provisions, requiring that liability for charges resulting from detention of motor common carrier equipment be placed solely on the person causing the delay, were found unlawful because such provisions attempt to place liability for detention charges upon a person not a party to the contract for transportation.—Payment for Detention Charges, Eastern Central Rates, 335 I.C.C. 537 (542)*.

Carriers to Provide and Furnish Transportation

550. Duty to furnish transportation.—[Vols. 12, 13, 16-19, 21].—See also Associated Truck Lines, Inc. v. United States case, §216(d), n. 35; Bilyeu Refrigerated Transp. Corp. Extension case, §220(a), n. 15; Feraco, Inc. v. Georgia Pacific Corp. case, §217(b), n. 40; Restrictions on service by Motor Common Carriers case, §217(a), n. 1, infra; Mt. Hood Stages, Inc.—Petition for Modification case, §216(a), n. 101, supra.

In "excluding service on the less profitable traffic", a carrier violates the duty of common carriers under §216(b) to accept and transport all shipments within the scope of their certificated authorities. [111 MCC 151].—Towne Services Household Goods Transp. Co. v. United States, 329 F. Supp. 815 (818, note)*.

Assailed tariff rule providing that defendant maintains no through routes, joint rates, or interchange on shipments of furniture found unlawful. Defendant has a duty, under its certificate, to provide adequate service to all shippers of general commodities, including furniture, and for defendants selectively to offer greater service to general commodities other than furniture is contrary to its duty under §216(b).—National Furniture Conf. v. Assoc. Truck, 332 I.C.C. 802 (811-12); and proposed tariff restriction under which respondent motor carrier will handle only traffic moving at joint rates in which it participates as intermediate or delivering carrier not shown just and reasonable as carrier's arbitrary refusal to accept shipments within the scope of its authority violates §216(b), except in extraordinary situations, not shown present herein, and is unlawful.—Restrictions on Interchange Arrangements, 335 I.C.C. 356 (359).

It is undisputed that the defendants are crucial carriers in transporting less-than-truckload shipments into a sparsely populated area. While recognizing the difficulties in providing such service, we have expressed our determination on a number of occasions that all communities be furnished reasonable service. We cannot insist on the one hand that carriers provide service to outlying areas, and on the other hand frustrate their managerial efforts to make such operations feasible, in the absence of any showing of injury to other carriers or to shippers.—Atchison, T. & S. F. Ry. v. Morris, 340 I.C.C. 51 (60)*.

Complete cessation of all physical operations, except for occasional movements of truckload traffic, is not consonant with service required under respondent's regular-route certificates. Although there is a paucity of traffic generated at considered points, and economies of the situation would not permit establishing three major competitive terminals at the same point, that is not the only choice. Holding out to perform a complete service, advertising in the area, entering into agency relations with local carriers to accept and deliver freight, including l.t.l. freight, the habitual use of certain routes, and a marked or constant regularity of service are all part of a certificated regular-route common carrier's duty to the shipping public.—Pacific Intermountain Exp. Co.—Investigation, 96 M.C.C. 604 (608).

Respondents' claim that amount of traffic does not warrant continuance of physical operations for l.t.l. shipments by one of them, much less by all three, is no more than pleading that operations have proved unprofitable, and that they have discontinued the unprofitable, while retaining the profitable, portions of such operations; however, as set forth in 91 MCC 513, if need for respondents' service no longer exists, it would logically follow that their pertinent authority should be revoked. Record as to its virtual cessation of operations in the past warrants an order requiring one respondent to continue to provide reasonably continuous and adequate service (though it presently maintains such service) pursuant to its certificate. And since evidence shows that the other two respondents have not been maintaining reasonably continuous and adequate service within terms and conditions of their certificates, order entered will require them to institute, within 60 days, such service at the named points on their authorized routes.—Id., pp. 608-10.

Defendant's discontinuance of l.t.l. service, and closing its terminal, at St. Joseph, Mo., an authorized intermediate point on its general-commodity regular route, constitutes a voluntary or willful cessation notwithstanding the substantial operating deficit it had incurred during preceding year at that point. The Commission does not say that defendant necessarily must continue to provide service of the type and to extent heretofore proved unprofitable; since quantum of service required and facilities needed therefor depend on the traffic involved and are matters within carrier's managerial discretion, a reduction therein might be justified in appropriate circumstances; however, total cessation of l.t.l. operations is neither within its discretion nor consistent with its common carrier responsibility. Defendant found not to be rendering reasonably adequate and continuous service at St. Joseph as requried by its certificate; ordered to institute and thereafter maintain such service.—Cham. of Com. of St. Joseph, Mo. v. Arkansas Best Frt., 98 M.C.C. 166 (167-9).

Although respondent carrier established a separate corporate division to transport steel, it has not failed to render reasonably continuous and adequate service to the public in violation of §216(b), since in light of the "substance" test it, and not the division, is in actuality performing considered steel transportation. Decentralization of operations is not unusual and Gateway's delegation to division manager of authority to implement his supervisory responsibilities has a sound economic basis. Also evidence is not convincing that Gateway would not, and could not under arrangements with the steel division, overrule the division manager; while the manager assumes most of the variable costs, the cost of leasing equipment and compensating the owner-operators is neither controlled nor assumed by manager, although they consume bulk of division's gross revenues. Furthermore, the record indicates neither shipper dissatisfaction nor violation of Commission rules and regulations.—Gateway Transp. Co., Inc., Investigation and Revocation, 106 M.C.C. 61 (66-69).

Common carrier authority to serve necessarily implies a corresponding duty to serve, but only a reasonable demand for service and only to extent of the carrier's reasonable ability; thus, objection that removal of "truckload lot" restrictions from existing certificates would impose on carriers, without their consent, an obligation to supply services wchich they may not wish to, or cannot, provide, is more theoretical than factual. So far as practicable, a common carrier is bound to hold itself out to the public generally and such availability is thwarted by carriers laboring under a truckload restriction because they can neither provide service on l.t.l. traffic, nor serve shippers who have only that type shipments. Hence, a norm has been established which in terms of common-carrier duty is irrational since, as commonly interpreted, it uses the size of truck or trailer to determine nature of the shipment and type of shipper that can be served. Removal of that onerous restriction—on a national scale—would enable the affected carriers to provide service in compliance with their statutory obligation and, also, would be in the public interest.—Removal of Truckload Lot Restrictions, 106 M.C.C. 455 (485, 491-3)*.

Commission's continued concern for maintenance of adequate service to points not located along superhighway routes resulted in affirmation of adoption of a stronger approach in revocation and abandonment proceedings where a carrier seeks to retain its service route over a superhighway, and affirmation of principles outlines in 107 MCC 95: "[I]t must be made absolutely clear that any authority emanating from these proceedings *** will be made not serverable from the carriers' underlying regular service routes, and will be subject to the further condition (1) that the carriers must continue to provide adequate and reasonable service over their present service routes, and (2) that upon establishment by interested persons that a motor carrier's service at a point on its underlying service route has been discontinued or curtailed, the carrier will have the burden of showing that the discontinuance or curtailment is reasonable".—Motor Service on Interstate Highways—Passengers, 110 M.C.C. 514 (542).

A motor common carrier is obliged to transport all goods offered for transportation and to serve all shippers without discrimination. When respondent, even though it was in dire financial condition, refused to interline and to accept small shipments, it acted clearly contrary to that obligation. Respondent ordered to cease and desist from these discriminatory practices.—A.C.E. Freight, Inc.—Investigation and Revocation, 115 M.C.C. 96 (103).

Motor common carriers of property are not now obligated but rather are permitted, under §216(c), to establish through routes and joint rates with each other covering the provision of interline service. However, once such interline arrangements or concurrences are established and published in tariffs pursuant to §217(a), the concurring carriers are under a legal duty to provide the interline service described in their tariffs. A motor common carrier has the obligation to accept and transport all freight (including interline freight) tendered in accordance with the provisions of its published tariffs. This obligation has been characterized as an almost absolute duty, and, for the adequate protection of the public, motor common carriers of property are held strictly accountable for its performance. The observance of this duty is excused only if performance is prevented by such intervening occurances as acts of God or the public enemy.—Braswell Motor Frt. Lines, Inc., Investigation, 118 M.C.C. 392 (411).

Carrier found to have committed 3 distinct violations: (1) refusal to accept a freight consignment at a point it is authorized to serve, (2) discontinuance of service at certain points it has authority to serve, and (3) refusal to accept for continuing transportation in interline operation shipments tendered to it by two other motor common carriers, despite the fact that it hold appropriate authority for such transportation and had appropriate published interline arrangements in its tariffs covering the involved joint-line service. Cease and desist order issued.—Id., p. 409.

Classification of property; rules, regulations

694. Purpose of classification, generally.—[Vols. 18, 21].—Generally, the purpose of freight classification is to make certain that all items moving in commerce bear their fair share of costs of transportation. This is accomplished by assigning each article to a class according to well-known classification principles or elements which recognize distinctions from a transportation standpoint, along fairly broad lines, in order to meet needs of commerce. A classification rate is used to ascertain proper revenue levels for carriers.—Dutton-Lainson Company v. United States, 371 F. Supp. 1352 (1354)*.

704. Density of commodity.—[Vols. 16, 18, 19, 21].—Relatively low density has long been an accepted basis for charging higher than normal class rates, and Commission has approved this factor as a justification for maintaining commodity or exception rates which were higher than the classification rating on the traffic in question. Therefore, in view of the importance in determining rate on certain traffic, there is nothing unreasonable in defendants' tariff provisions whereby the shipper has the alternative of stating the shipment density on the bill of lading or paying the rates higher than the classification basis when no such notation is made.—Glama Dress Co. v. Mid-South Transports, 335 I.C.C. 586 (594).

Proposed increased l.t.l. classification ratings on boxes or crates or materials for same shown just and reasonable as average density of such commodity compares favorably with that of commodities taking ratings even higher than that proposed herein; average value of commodity herein is lower than that of higher-rated commodities; and commodity herein sustains few loss or damage claims.—Classification Ratings, Boxes or Crates, 335 I.C.C. 754 (757-8)*; proposed increase in t.l. classification rating and minimum weight found just and reasonable as availability of such rating and minimum weights is amply justified by wide range in density of traffic herein considered and as proposed minimum weight gives shippers an incentive to ship in higher density range.—Id., p. 759.

Subdivision of an appropriate class rating for a particular commodity by density brackets is permissible but use of density regardless of other transportation characteristics to determine the classification of a commodity is clearly not warranted. Proposed increased ratings on blankets, whose dominant transportation characteristic is density, shown just and reasonable but schedules ordered canceled and proceeding held open until proponent adduces evidence that such increases are justified under regulations of the Economic Stabilization Program.—Increased Classification Ratings on Blankets, 341 I.C.C. 760 (764-69).

735. Household goods.—[Vols. 14-18, 21].—As more fully discussed in the prior report, 95 MCC 138, shippers of household goods expect an outstanding service free from trouble when moving their personal possessions to a new place of abode, and the motor carrier industry has, as it should, encouraged the public to entertain such confidence; however, complaints to the Commission against household goods carriers outnumber those against all other carriers combined. The Commission is the guardian of the public interest in the matter, and that interest encompasses not only the public shipper but also the industry. Therefore, new and amended rules adopted to govern practices of household goods carriers are intended to assist the public shipper in obtaining more efficient and expeditious movement of his possessions, while at the same time not imposing any punitive measures on the industry.—Practices of Motor Common Carriers of Household Goods, 96 M.C.C. 196 (197, 201)*.

Commission herein revised rules governing practices of motor common carriers of household goods and prescribed additional rules designed to improve mover-customer relations through full disclosure of their respective obligations. Involved rules were rearranged and renumbered, but are completely set forth in appendix to this report (pp. 525-50), including cross reference between former and revised rules.—Practices of Motor Common Carriers of Household Goods, 111 M.C.C. 427 (436-7)*; household goods carriers shall, prior to receipt of shipment, prepare an order for service containing the information required by 49 CFR 1056.9, herein prescribed, including amount of estimated charges and amount needed by shipper to require delivery of a C.O.D. shipment.—Id., pp. 450-3; carriers hereby required to furnish shippers an estimate, upon shipper's request, of cost of considered movement and amount carrier requires to relinquish a C.O.D. shipment without full payment of tariff charges. A standard form for estimates is herein prescribed. Carriers must also report all overestimates and underestimates to Commission at quarterly intervals.—Id., pp. 462-74; carriers shall give every prospective shipper the Summary of Information set forth in form BOp103 (as reproduced in appendix herein) and obtain a receipt therefor which is to be preserved as part of the record of any shipment subsequently accepted by carrier.—Id., pp. 477-8.

Term "reasonable dispatch" is defined as transportation performed on the dates or during the period of time agreed upon by carrier and shipper and shown on the order for service and recorded on the bill of lading.—Id., pp. 437-9.

Proposed new rule which would exclude from 49 CFR 1056 the application of the requirements of §§1056.1 and 1056.7 through 1056.13 on described shipments of equipment which because of its unusual nature or value requires special handling usually employed by household goods carriers, rejected because of absence of information concerning the prevailing practices in the movement of these commodities or the impact of current regulation upon those practices.—Modification of Pt. 1056 General Rules & Regulations, 113 M.C.C. 687 (704-6).

Commission modified its reweigh regulations for household goods carriers by making the publication of reweighing charge permissive rather than mandatory and stating conditions under which such charges are inapplicable inasmuch as previous regulations did not accomplish the purpose for which they were intended.—Practices of Motor Common Carriers of Household Goods, 114 M.C.C. 279 (292-4)*.

Estimates and charges based on space reservation for a portion of a vehicle prohibited. Carrier estimates and charges in compliance with regulations adopted shall not be based upon specific reservation by a shipper of a portion of the capacity of a vehicle. Quarterly reports of split loads weighing less than 10,000 pounds, required.—Practices of Motor Common Carriers of Household Goods, 115 M.C.C. 49 (66).

Commission herein prescribed regulations governing relationships between household goods carriers and their agents in regard to the filing of agency agreements and indicated reports with Commission; standards of selecting and retaining agents; the liability of carriers for acts and omissions of their agents; and carriers with independent operating authority which also operate as agents.—Household Goods-Agency Relationships, 115 M.C.C. 628 (649-55).

Due to conflicts arising in the implementation of the regulation requiring that the release value be entered by the shipper signing the bill of lading, in his own handwriting [49 CFR1307.201(c)], in relations between carriers and national account shippers of household goods, the regulation was amended to permit the shipper to instruct the carrier in writing regarding the released value of a shipment, and the carrier to incorporate the instructions by reference into the bill of lading.—Practices of Motor Common Carriers of Household Goods, 118 M.C.C. 35 (41).

In an interim report, the Commission proposed rules requiring household goods carriers to supply every prospective shipper with (1) the summary of information set forth in form BOp103, (2) a copy of the Commission's Public Advisory Number 4 (dealing with loss and damage claims), and (3) a summary of the carrier's last past quarterly performance report which contains information regarding underestimates, late deliveries, and settlement of claims. Interested persons were invited to comment on proposed rules.—Practices of Motor Carriers of Household Goods, 118 M.C.C. 178 (190-8).

Commission herein adopted a regulation (49 CFR1056.21) permitting the use of credit card systems by motor common carriers of household goods. The credit card has become an American economic institution, and Commission believes that use of credit card programs will benefit the American public. This regulation requires approval of credit card systems by this Commission, but purposely omits cumbersome filing requirements and formalized procedures which would, in our opinion, influence carriers not to seek such systems. No formal filing requirements are prescribed and notice only of approval of disapproval will be given in the Federal Register, but carriers participating in an approved plan must file a quarterly report. Because the Commission believes that credit card systems should be offered to all carriers on an equal basis, we will not approve plans offered by a financial institution to a single carrier or limited group of carriers except in unusual circumstances and on an experimental basis.—Practices of Motor Common Carriers of Household Goods, 118 M.C.C. 746 (751-54).

Receipts, Freight Bills, Bills of Lading

975. Bills of lading.—[Vols. 17, 18].—The density of a commodity is of such importance in making rates that tariff provisions requring notation of density on the bill of lading as a condition precedent to use of a rate are not unreasonable. Failure of a shipper to comply with such provisions is not sufficient basis for declaring a higher rate unreasonable.—Glama Dress Co. v. Mid-South Transports, 335 I.C.C. 586 (594-5).

Motor common carriers of household goods are hereby required to show on their bills of lading all information required by the regulations prescribed in 49 CFR 1056.10 including the agreed dates or time periods required for reasonable dispatch (as defined herein) of such shipments; an estimate of total charges; maximum amount required for delivery of C.O.D. shipments; and the tare weight of such shipments.—Practices of Motor Common Carriers of Household Goods, 111 M.C.C. 427 (454-6)*.

Regulations of the Commission

34 FR 18041, Nov. 7, 1969, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.3 Determination of weights. No exceptions having been filed, recommended new paragraph (d) became effective Oct. 13, 1969.

35 FR 4758, Mar. 19, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, entire Part, §1056.1 - §1056.18, revised, effective May 1, 1970.

35 FR 5551, Apr. 3, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, miscellaneous corrections of revised regulations (35 FR 4754).

35 FR 7123, May 6, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.6 Determination of weights, new subparagraph (e) *Exception*, added, effective June 1, 1970.

35 FR 8890, June 9, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.1(c) and §1056.12(a) modified, effective June 1, 1970.

35 FR 16935, Nov. 3, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.4 Accessorial or terminal services, etc., order of Dec. 5, 1969 (335 ICC 698) reinstated and modified so as to become effective Dec. 1, 1970.

35 FR 19077, Dec. 17, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.11 Vehicle-load manifest; information required, new paragraph (b)(13) added, effective November 1970 [sic].

36 FR 158, Jan. 6, 1971, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.4 Accessorial or terminal services, etc., order served Oct. 29, 1970 (35 FR 16935) modified so as to become effective on Feb. 1, 1971.

36 FR 21358, Nov. 6, 1971, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.6 Determinations of weights, paragraphs (b) and (e) modified, effective 30 days after date of publication in Federal Register.

36 FR 22579, Nov. 25, 1971, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.6(d) and §1056.7 amended, effective Jan. 1, 1972.

37 FR 7159, Apr. 11, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.3 amended by adding paragraph (d), §1056.7 summary amended, and §1056.12(b) amended by adding a new last sentence, effective April 28, 1972.

37 FR 12324, June 22, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.10 Receipt or bill of lading; information thereon, revised, and §1056.20 Responsibilities and liabilities of principal carriers, added, effective July 31, 1972.

37 FR 14589, July 21, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce; reservation of vehicle space by shippers. Proceeding reopened for further consideration of rule prohibiting carriers from making estimates and/or charges based on vehicle space reservation, but solely with respect to shipments of the particular type of articles defined in §1056.1(a)(2) and (3); orders of Feb. 28, 1971, and Apr. 27, 1971, remain in full force and effect as to other shipments. Effective on date of order.

37 FR 14308, July 19, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.19(a) corrected.

37 FR 17838, Sept. 1, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.9(c) *Waiver of order for service*, added, effective Oct. 5, 1972.

38 FR 6392, March 9, 1973, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.6(d) *Reweighing of shipment*, corrected by amending first sentence.

38 FR 18253, July 9, 1973, Part 1056: Transportation of Household Goods, §1056.9 amended to allow waiver of the required order of service on shipments requiring special handling because of unusual nature or value upon written request.

38 FR 26608, Sept 24, 1973, Part 1056: Transportation of Household Goods §1056.21 requires common carriers of household goods to use uniform rates for identical services, effective Jan. 1, 1974.

38 FR 26608, Sept. 24, 1973, Part 1056: Transportation of Household Goods, §1056.25 prescribes procedures for common carriers of household goods desiring to participate in credit card plans, including filing of quarterly reports, effective Nov. 2, 1973.

38 FR 31428, Nov. 14, 1973, Part 1056: Transportation of Household Goods (Participation in Rates at Different Levels; Correction) Correction of rule published at 38 FR 26608.

39 FR 11191, Mar. 26, 1974, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce. Correction of regulation published at 37 FR 12325.

39 FR 14596, April 25, 1974, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce. Amendments of 49 CFR 1056.3 and 1056.12(b) as to estimates.

Section 216.(c) [*§316(c) U.S.C.*] Through routes and joint rates.—[Unchanged. See vol. 21, p. 17572].

Historical note, see vol. 21, p. 17573.

Historical Note

The Commission recommends that §216 be amended to authorize the Commission to require joint rates and through routes between motor carriers and between motor carriers and rail and water carriers, in order to foster a more energy-efficient means of transportation at a lower overall cost.—Annual Report, 1975, p. 77.

Notes of Decisions

Volume 10—p. 8195; Volume 11—p. 9546; Volume 12—p. 10451; Volume 13—p. 11105; Volume 14—p. 11628; Volume 15—p. 12238; Volume 16—p. 12899; Volume 17—p. 13603; Volume 18—p. 14592; Volume 19—p. 15856; Volume 21—p. 17573.

3. Construction and interpretation.—[Vols. 10, 12-14, 16, 21].—See also Substitution of Motor for Rail Serv. case, §217(b), n. 20.

In amending §216(c) and §305(b), to authorize establishment of through routes and joint rates to and from Alaska or Hawaii between motor carriers regulated by the Commission and water carriers subject to jurisdiction of Federal Maritime Commission, Congress gave jurisdiction over such rates and routes to the Commission. Thus, while the Maritime Commission has regulatory jurisdiction over water carriage to and from Alaska, when such water transport is combined with motor carriage, in through-route and joint-rate arrangements, jurisdiction over rates lies with the Commission. While the Maritime Commission contends that "through route" (as used by Congress) should be interpreted as not encompassing motor carriage that can qualify as pickup and delivery, Congress did not apportion jurisdiction between the agencies on that basis. The jurisdictional line was not drawn between line haul and pickup, but at through routes which, historically, cover pickup and short-haul connections as well as connections between line-haul carriers.—Alaska Steamship Co. v. Federal Maritime Commission, 399 F. 2d 623 (624, 626).

In water carrier's action for review of report and order of Federal Maritime Commission asserting jurisdiction over through water and motor services and rates between Seattle, Wash., and Anchorage, Alaska, areas, the Commission (not FMC) has jurisdiction over through rates and routes in issue. Congress, by 1962 amendment of §216(c) and §305(b), gave the Commission jurisdiction over through routes and joint rates to and from Alaska or Hawaii established by interstate motor carriers and water carriers subject to Federal Maritime Commission regulation; and there is no mileage limitation on that authority vested in the Commission. The statute makes no distinction between motor carrier participation of line-haul dimensions and motor carrier pickup and delivery in port areas; no distinction between a thousand miles and a few blocks, so long as both motor and water carriers are performing a joint through service.—Sea-Land Service, Inc. v. Federal Maritime Commission, 404 F. 2d 824 (825-7).

Respondent FMC argues that, since motor portion of considered services is minimal, Congress intends it to be regulated as part of the dominant water transportation; however, motor carriers engaged in terminal area pickup and delivery services are not exempt under §202(c) where the dominant line-haul service is supplied by water carriers subject to Shipping Act of 1916, and legislative history of the 1962 amendment does not evidence an intent on the part of Congress, having given the Commission exclusive jurisdiction over motor-water through route service, to withdraw that jurisdiction because the water haul is dominant. Accordingly, since water-carrier petitioner and a motor carrier participate in a joint through route endeavor, regardless of extent of the motor carriage (and even if it is confined to pickup and delivery service within the port areas), appropriate jurisdiction rests in the Commission. Reversed and remanded with instructions that Federal Maritime Commission order be vacated.—Id., pp. 827-8.

Section 216 (c) does not denote the particular type of through routes and joint rates therein authorized to be established, and nowhere else in the Act are the terms "through routes" and "joint rates" specifically defined. The section must not be read in conjunction with the provisions of §217(a) in that a lawful through route and joint rate arrangement must represent a joint undertaking by two or more connecting carriers to transport property from a point on the line of the originating carrier to a point on the line of the delivery carrier.—Substituted Service—Piggyback, 322 I.C.C. 301 (344)*.

The only authority given to motor common carriers under §216(c) is to establish reasonable through routes and joint rates, charges, and classifications with other such carriers. No unfettered license is given to pick and choose the through service which will be provided, and nothing in the legislative history of leading cases supports such license. The assailed tariff rule prohibiting through route and joint rates on shipments of furniture is unlawful.—National Furniture Conf. v. Assoc. Truck, 332 I.C.C. 802 (812-13).

Commission concluded that §216(c) accords us authority over tariffs of joint international rates involving motor carriers subject to our jurisdiction. Under §216(c), we have power over joint rate itself and fact that Commission cannot regulate one of the participants—the ocean carrier—in the joint rate is inconclusive. Fact that Commission can issue orders affecting only motor carrier participants to such rates is immaterial.—International Joint Rates and Through Routes, 337 I.C.C. 625 (630-1).

4. Interchange and transfer.—[Vols. 11, 12, 14-18, 21].—See also Tex.- Ariz. Motor Frt. and Phelps Dodge—Investigation case, §217(b), n. 125.

Eastern railroads' contention that proposed rule 4(d) stating that "carriers participating in joint intermodal TOFC service shall interchange traffic only at a common point of service" is unnecessary, is without merit. Facts of record in instant proceeding do not warrant any departure from the long-established practice of the Commission prohibiting a motor carrier from interchanging traffic at points other than its authorized service points (citing 72 MCC 204).—Substituted Service—Piggyback, 332 I.C.C. 301 (355)*.

While connecting carriers have a right to establish joint rates for traffic movements over their lines and to interchange equipment under mutually satisfactory rental terms, in that event rates must be charged and divided, if necessary, and revenues must be collected and accounted for in precisely the same manner as if there had been no interchange. Furthermore, the carrier under whose rights the interchanged equipment is operated must assume full responsibility for the direction, control. condition, and operation of such equipment while in its possession; an agreement between them providing for such control is not enough. When operations are conducted in such a manner that responsibility for the equipment is retained by owner thereof even while it is being driven over another's routes, such operations are unlawful.—Caroline Scenic Stages—Investigation and Revocation, 96 M.C.C. 566 (569-70).

Operations of respondent bus lines, conducted under a lease of equipment agreement between them which established a mileage rate for the rental of buses of one carrier while passing over authorized routes of the others, do not conform to requirements of the Act or the Commission's rules and regulations. Admittedly, receipts were not divided according to mileage traveled over each carrier's routes; and when revenues are not divided, the effect is to create confusion as to responsibility of each carrier for equipment operated under its authority. Moreover, from the manner in which the drivers made their reports to respondents, it is evident that responsibility for the leased equipment has not been uniformly vested in the carrier over whose routes it was being operated. Effect of respondents' agreement is to give each permission to conduct operations in its own behalf over routes of the other, a permission which canot lawfully be given; cease and desist order entered.—Id., pp. 570-71.

10. Through routes and joint rates.—[Vols. 10-19, 21].—Existence of a through route depends not on length of the respective hauls of participating carriers but on the nature of the arrangements between them and their commitments to their shippers. An arrangement between carriers whereby one employs the other for terminal pickup and delivery service, paying that carrier the tariff rate for such terminal service, does not entail a joint rate; does not entail obligations to the shipper such as are found in through routes; nor does it present regulatory problems presented in through-route and joint-rate arrangements. However, when carriers enter into agreements that do in fact constitute through-route and joint-rate arrangements for motor-water service to and from Alaska, Congress has left their regulation with the Commission.—Alaska Steamship

Co. v. Federal Maritime Commission, 399 F. 2d 623 (625-7).

Interstate Commerce Commission lacks power to compel motor and rail carriers to provide coordinated service, and this is what justifies permitting railroads to provide motor carrier service incidental and supplemental to rail transportation.—Atchison, T. & S. F. Ry. Co. v. United States, 244 F. Supp. 955 (955)*.

It is well established that what is a through route is a matter of fact, and that a through route may be found to exist in the absence of a joint rate or any other express arrrangement between the carriers involved.—Substituted Service—Piggyback, 322 I.C.C. 301 (334)*.

Under a TOFC plan I arrangement, the motor carrier and railroad agree to transport at a single through rate any given shipment of freight falling within the scope of their tariff publication, and no rates are charged or tariffs published with respect to such plan I operations on any other basis. The arrangement between the railroad and the motor carriers, under which the railroad is to be compensated for its portion of the through service, is thus a division agreement specifically authorized by §216(c), and not a separate rate or charge.—Id., p. 345.

Freight forwarders' contention that plan I TOFC operations allow motor carriers to depart from their statutory role as highway carriers and to function in a manner reserved for freight forwarders is without merit. The equivalent of plan I service was first approved in 1936 in 219 ICC 245 and the directory form of tariff publication received Commission sanction in 1939 in 232 ICC 683, approximately 6 and 3 years, respectively, prior to the advent of Federal regulation of the freight forwarder industry. What the forwarders here seek to eliminate, then, is a coordinated service, the lawfulness of which had been confirmed prior to congressional recognition of their own activities. There is nothing in part IV or its legislative history which suggests that Congress intended to curtail existing coordinated transportation services.—Id., p. 347.

When a motor common carrier participates in plan I TOFC operations, paying the railroad compensation other than that set forth in the railroad's regularly published tariff, the motor carrier's status is that of a connecting carrier in a joint service provided voluntarily by the participating rail and motor common carriers; and that plan I TOFC operations thus constitute a valid through-route and joint-rate arrangement within the contemplation of §216(c). Plan I and plan V, however, share in common the important features of a through-route and joint-rate arrangement: both involve the payment by the shipper of a single through rate which is divided among the carrier participants on a negotiated basis; and both may involve the rendition of joint service between points the motor carrier is authorized to serve in all-highway service. The fundamental distinction between plan I and plan V operations is that rail and motor carriers serving different areas may combine their service in plan V operations to perform a through service between origin and destination. Another difference is that the tariff rules covering the rendition of plan I service specifically embrace a holding out by the motor carrier to perform an all-highway service at the election of the shipper, whereas the rates provided in plan V joint tariffs are applicable only over the joint intermodal route.—Id., p. 349.

Joint through rates between rail and motor common carriers may be established only by virtue of §216(c) and this section contains no provision for the participation in such rates by carriers not subject to the Commission's economic jurisdiction. To hold otherwise and to permit the publication of rates for the performance of exempt transportation would be to contravene the intent of Congress to exclude such transportation from the rate provisions of the Act.—Id., p. 354.

Commission will not disturb State policy insofar as it affects interstate commerce unless such policy is inconsistent with other provisions of the Act. Instant policy is against participation in joint rates by irregular-route carriers in intrastate commerce, and carriers operating in interstate commerce by virtue of registered Ohio authority cannot exceed scope of that authority. Therefore, respondents herein may not participate in joint rates but may interchange traffic under combination rates. Respondents, without participating in joint rates, could continue to handle interstate traffic as they do now, but the traffic would move at combination rates with the likely result being increased rates borne by the shippers since combination rates are ordinarily higher than through rates. Therefore, Commission found Ohio regulations an interference with carriers' managerial discretion and inconsistent with §216(c). Petition to strike or cancel tariffs naming joint rates for interstate motor common carriers and Ohio intrastate irregular-route carriers, whose certificates are registered under §206(a)(7) authorizing them to engage to interstate commerce, denied.—Braddock Motor Freight, Inc., Petition, 329 I.C.C. 342 (346).

Mere fact that authorization for establishment of joint rail-motor rates is found in part II of the Act, rather than in part I, does not exempt rail carriers that join in such rates from any provisions of part I which would otherwise apply; thus, regardless of obligations assumed by motor carriers voluntarily entering into joint rail-motor rates, the rail participants must continue to comply with provisions of §3(4) and §4. Even if §3(4) and §4 do not apply to motor-carrier participants, the Commission still has complete jurisdiction over rail participants in joint rail-motor rates established under §216(c); and since the statute merely permits establishment of such joint rates, the Commission would be remiss in its responsibilities if it permitted railroads to use §216(c) as an escape from provisions of §3(4) and §4.—Oil Country Iron or Steel Pipe, Midwest to Okla. & Tex., 332 I.C.C. 540 (541-2, 543-4)*.

Proposed joint through rail-motor commodity rates on agricultural implements, particularly farm tractors, were found unlawful inasmuch as respondent's authority to transport "machinery" does not cover transportation of farm tractors. Schedules ordered canceled.—Agricultural Implements, Midwest to Oreg. & Wash., 337 I.C.C. 611 (621-2).

12. Application of §4 of part I.—[Vols. 10-13, 17-19, 21].—The fact that rail carriers voluntarily establish joint rates with motor carriers under §216(c) does not relieve them from their duty to comply with §4; and when considered joint rail-motor rates result, in some instances, in higher charges for a shorter than a longer movement over the same route, in the same direction, and shorter movement is included in the longer, that is precisely what is prohibited under §4(1). Accordingly, even though the §4 departures occur on the motor segment of the service, rail carrier participants in joint rail-motor rates involved are in violation of §4 unless they make out a special case for relief therefrom; prior finding that such special case has been made out, affirmed.—Oil Country Iron or Steel Pipe, Midwest to Okla. & Tex., 332 I.C.C. 540 (540, 543-5)*.

Commission herein interpreted its 85 percent circuity limitations provision, 49 CFR 1090.5, on TOFC or piggyback service by defining the words "origin" and "destination" as the points on the authorized route of the motor carrier using TOFC service where a shipment begins or ends its journey. Similarly, phrases relating to "distance" between "origin" and "destination" as affected by circuity. Petitioner's request for relief from the circuity limitation dismissed.—Interpretation of Piggyback Service Regulations, 337 I.C.C. 813 (821-25).

Contrary to the finding of the review board, minimal circuity in applicant's operations would not preclude it from making timed deliveries.—Pre-Fab Transit Co. Ext.—Fencing, 118 M.C.C. 68 (71)*.

13. Alaska, Hawaii, to and from.—When plaintiff, a water carrier operating between Seattle, Wash., and points in Alaska under Federal Maritime Commission regulation, entered into arrangements with motor carriers regulated by the Commission for motor-water service between continental United States points and points in Alaska, whereby the motor carrier picks up shipper's cargo and delivers it to plaintiff's pier for movement to Alaska ports, issues its own through bill of lading covering the entire journey to final destination, and charges for the full journey (with similar arrangements for shipments from Alaska), such arrangements constitute through routes and joint rates which are subject to Commission jurisdiction. Though some movements in Alaska are performed by Alaska State Ferry (in typical "fishyback" operation), ferries do replace roads in that State and courts have recognized a ferry as a continuous part of a road or highway and that transport of a motor vehicle over a ferry is transportation by motor carrier; thus, movement of the trailers on the ferry constitutes motor transportation and, as such, can form part of the through motor-water route, and tariffs covering such service are properly filed with the Commission.—Alaska Steamship Co. v. Federal Maritime Commission, 339 F. 2d 623 (626-8).

When water carrier, that had been operating port-to-port service (including local motor pickup and delivery) between Seattle, Wash., and Anchorage, Alaska, under Federal Maritime Commission regulation, became a participant with motor common carrier in a joint effort to provide through water-motor service and rates on Seattle-Anchorage traffic, their joint endeavor constituted through routes and joint rates which are subject to exclusive jurisdiction of the Commission rather than FMC jurisdiction. By the 1962 amendment of §216(c) and §305(b), Congress vested jurisdictional authority over such through routes and joint rates with the Commission; and language of that law contains no mileage limitation upon the Commission's authority, nor does it make distinction between motor carrier participation of line-haul dimensions and motor carrier pickup and delivery in port areas, so long as both motor and water carriers are performing a joint through service.—Sea-Land Service, Inc. v. Federal Maritime Commission, 404 F. 2d 824 (825-7).

Though terminal area motor pickup and delivery may be incidental to the line-haul water transportation, as respondent FMC argues, extent of motor participation is not the determining factor as to existence of a valid through route; what is required is that both motor and water carriers hold themselves out as participants in a joint transportation endeavor and file appropriate tariffs reflecting the joint rates and through service. Therefore, in water carrier's action seeking review of Federal Maritime Commission report and order asserting jurisdiction over its activities in question, the court concludes that Congress did not intend the motor portion thereof to be regulated as part of the dominant water transportation. It follows that where petitioner and a motor carrier participate in a through route endeavor, regardless of extent of motor carrier's service, appropriate jurisdiction rests in the Commission. Reversed and remanded with instructions that FMC order in issue be vacated.—Id., pp. 827-8.

20. Divisions; reasonableness.—[Vols. 10-15, 19].—Hearing examiners properly rejected proposed rules B-4 and B-5 which attempted to achieve the end that TOFC service be made available to all at equal charges and took the approach which would have required that the divisions received by a rail carrier providing joint intermodal service could not exceed any all-rail TOFC rate maintained by the rail carrier for like service. Latter rule would have required any rail carrier providing joint intermodal TOFC service with any motor or water carrier to do so indiscriminately with other such carriers. It would not be practical to attempt to control by a rule of general applicability the level of compensation to be received under division agreements which are, by nature, private contracts negotiated by individual carriers.—Substituted Service—Piggyback, 322 I.C.C. 301 (328)*.

Section 216(c) requires only that the carriers, parties to the joint rates, establish "just, reasonable, and equitable divisions thereof as between the carriers participating therein which shall not unduly prefer or prejudice any of such participating carriers." The question of what constitutues just, reasonable, and equitable divisions necessarily involves many considerations, both factual and legal, but plainly the maintenance of divisions computed on exactly the same basis as is the overall joint rate, to the exclusion of all other factors and considerations, is not required by the statute and may, in fact, be in violation thereof. Freight forwarders' argument that "it is highly probable that in some instances the 'division' is greater than the whole", is not supported by the record.—Id., p. 345.

The Commission has the authority to require the filing by common carriers subject to parts I, II, and III of all contracts with other common carriers related to regulated traffic, and the filing of such contracts has been called in only a few special instances. Since the Commission has recently made efforts to reduce and condense the amount of necessary information which must be filed in an attempt to relieve the carriers, as well as the Commission's staff, of heavy administrative burdens and the fact that there has been no showing here that the division arrangements established by railroads and other common carriers engaging in joint intermodal TOFC service have been in any way unlawful or unduly prejudicial to any other carrier, no rule will be promulgated requiring such filing. However, should the Commission be informed in the future that the unpublished divisions are being used as a shield for improper activities by any carrier, it will then be time enough to make the determination whether a general rule is needed.—Id., p. 350.

Section 216. (d) [*§316(d) U.S.C.*] Undue preferences or prejudices prohibited.—[Unchanged. See vol. 11, p. 9548.]

Notes of Decisions

Volume 10—p. 8200; Volume 11—p. 9549; Volume 12—p. 10453; Volume 13—p. 11107; Volume 14—p. 11629; Volume 15—p. 12239; Volume 16—p. 12900; Volume 17-p. 13605; Volume 18—p. 14593; Volume 19—p. 15858; Volume 21—p. 17576.

1. Construction and interpretation.—[Vols. 10-13, 17, 19, 21].—See also Increased Rates and Minimum Charges, South case, §204(c), n. 27, supra.

Complainant has not proved that tariff provisions requiring a notation of density on the bill of lading as a condition precedent to use of a lower rate on shipments of dresses constitute a disadvantage in purchasing or marketing dresses. There is no basis for finding such higher rates to be an undue preference and prejudice.—Glama Dress Co. v. Mid-South Transports, 335 I.C.C. 586 (596).

Protestant shippers' contention that proposed increased l.t.l. and t.l. classification ratings and minimum weights on wirebound box materials are unjustly discriminatory and prejudicial to shippers of other box materials found not proven as no substantial evidence indicates that defendant carriers provide same service for these commodities or that substantially similar transportation circumstances exist.—Classification Ratings, Boxes or Crates, 335 I.C.C. 754 (758-9)*.

Applicant has failed to prove that protestant motor carrier's affiliation with a shipper creates such discrimination against shippers supporting applicant as would require the grant of authority sought herein. The power of common control must exist to create such discrimination and that power is not disclosed by evidence of record or by a showing that protestant has in fact favored its affiliated shipper over the supporting shippers.—Cobo, Inc., Common Carrier Application, 111 M.C.C. 200 (210-1)*

Although the possibility for discrimination between shippers exists due to common control of applicant and a supporting shipper, applicant's past performance, and support by nonaffiliated shippers, who have knowledge of the affiliation, demonstrate that this situation has not resulted in discrimination or favoritism prohibited by Commission. However, issuance of certificate is conditioned upon applicant's conformity with §5(2) of the Act as to the matter of common control.—Federal Transfer Co., Inc., Extension—Seattle, Wash., 111 M.C.C. 559 (565-8)*.

15. Differences in and comparisons of rates.—[Vols. 10, 12-14, 16, 18, 19, 21].—Although respondents' weekly rates on gasoline and fuel oils from Sparks, Nev., to points within 200 miles thereof are lower than their normal interstate rates, circumstances and conditions surrounding movement at the latter rates differ substantially from those at the weekly rates, and substantial reductions in costs experienced in operations at the weekly rates justify the difference in treatment.—Weekly Rates on Petroleum Products—from Sparks, Nev., 322 I.C.C. 541 (551); and though the weekly rates are on same level as comparable intrastate rates, which are not regulated by the State of Nevada, they are not fraught with potential discrimination because of possibility of changes in the intrastate rates should the State choose to regulate them.—Id., pp. 542, 546, 547.

The Commission found the assailed level of rates as applied to New Mexico to be unjust and unreasonable to the extent that it exceeded the general level of class rates applicable throughout the southwestern territory. Defendants' attempts to justify the disparity by reference to light volume of movement and sparce population were rejected, and the rates were found to be unduly prejudicial to points in New Mexico and unduly preferential to points in southwestern territory, excluding New Mexico.—State Corp. Comm. of N. Mex. v. Southwestern Motor Frt., 329 I.C.C. 803 (807-808).

Proposed reductions in l.t.l. and any-quantity class rates on commodities in specified density requirements when aggregated by shippers and tendered for pickup in lots of not less than 4,000 pounds are not shown to be lawful inasmuch as respondents have not established a reasonable relationship between the proposed discounts, which are based in part on distance, and the savings which, so far as appears, are the result only of reducing pickup costs through the aggregation of shipments. Such disparity in possible discounts are not justified by any facts and are inherently discriminatory. See 308 ICC 793, 794.—Aggregate Class Rates, 332 I.C.C. 524 (527-32).

20. Localities.—[Vols. 10-13, 16, 18, 19, 21].—Part I, §1(4), n. 106.—Assailed multiple minimum charges on single pickup of imported bulbs not shown unduly preferential or prejudicial although similar charges are not assessed at other ports. Complainant New York Port Authority has produced no evidence to show diversion of such traffic to indicated competing ports, and evidence also indicates operating conditions differ at the various ports.—Holland Bulb Exporters Assn. v. A.A.A. Trucking Corp., 329 I.C.C. 152 (158-9).

25. Shippers.—[Vols. 10-14, 16-19, 21].—See also Frozen Foods—Southern, Middle Atl. & New England States case, §216(g), n. 26, infra; National Trailer Convoy, Inc., Ext. case, §207(a), n. 25 *Fitness*, supra.

Provision in tariff and freight bill of carrier engaged in driveaway transportation of privately owned automobiles, which permits carrier to recover from shipper (owner) proceeds of owner's insurance in the event of loss or damage in transit, if it reimburses owner for that part of his premium attributed to carrier's custody of the car, does not violate §216(d). There is no showing that "benefit of insurance" clause in the bill of lading provides for unjust and unreasonable charges or undue preference in which car owners with insurance are charged more than owners without insurance. Wording of the clause grants no preference to car owners without insurance; the clause does not require that owners carry insurance; also, it presupposes the customary liability insurance that an owner would carry to cover his use, not shipping, of the car. Thus, since record does not show that that part of owner's insurance premium attributable to carrier's custody of the car amounts to an unlawful preference or charge, the trial court erred in ruling that tariff "benefit of insurance" clause violates the statute.—United States v. Auto Driveaway Co., 464 F. 2d 1380 (1383-5).

Mere possibilities of discrimination do not establish that carriers are demanding or receiving greater or less compensation for like and contemporaneous service under the same tariff provisions. Respondents' weekly rates on gasoline and fuel oils from Sparks, Nev., are supported by four petroleum companies, and neither those nor any other shipper has indicated fear of discriminatory treatment. As the interests most directly affected by the considered tariff provisions have not complained, a finding of discrimination would not be warranted on basis of the remote possibilities suggested.—Weekly Rates on Petroleum Products—from Sparks, Nev., 322 I.C.C. 541 (547).

Proposed rule providing that, under line-haul rates on oilfield commodities which include loading and unloading with winches, carrier may for its own convenience substitute vehicles not equipped with winches for the line-haul transportation, and at its expense obtain a winch for loading and unloading of shipments not requiring additional lift equipment, is not potentially discriminatory. Every shipper receives the service for the same price, whether the winch used is on the transporting vehicle or another; and many carriers now render the identical service covered by the clarifying amendment, without objection from shippers. Findings of unjust discrimination cannot be predicated on the remote possibility that violations may occur.—Loading, Unloading by Winch, Oil Field Haulers, U.S.A., 323 I.C.C. 359 (366).

Provisions of tariff publishing proposed assembling rates on l.t.l. shipments of textile products moving to freight consolidators for t.l. movement beyond in common or private carriage, defining "truckload", in case of common carriers, as a unit for which ordinarily a t.l. rate is provided in filed tariffs and which is subject to a truck minimum weight, and, in case of private carriers, as a consolidated shipment weighing 10,000 pounds or more, are unjustly discriminatory. Although respondent's operational handling of the traffic is identical whether subsequent reshipment is by common or private carrier, consolidated shipments moving beyond assembly points in units of 10,000 pounds in private carriage would be entitled to the assembling rates, while the same amount moving beyond by a motor common carrier might not qualify as a t.l. shipment. No justification is shown for according one consolidator or shipper the benefit of the lower assembling rates, while denying them to another for like and contemporaneous service; the subsequent "truckload" condition should apply equally to all traffic.—Assembling Rates to Atlanta, Charlotte, Greensboro, 323 I.C.C. 543 (544, 548-9).

Use of credit card plans by motor common carriers of household goods my resemble, from surface appearance, rebates or concessions; but it is the opinion of the Commission that unfair, discriminatory practices will not necessarily arise under such systems, since all shippers would be eligible to apply for use of the involved credit card.—Practices of Motor Common Carriers of Household Goods, 118 M.C.C. 97 (104).

35. Participation in through routes, joint rates.—[Vols. 12, 14, 15].—District court held that evidence shows that cancellation of all through routes and joint tariff arrangements on shipments of furniture between central and southern states would subject furniture shippers to complications and higher rates, would restrict movement of furniture to areas where single-line service was available and would prejudice such shippers relative to other general commodity shippers. Commission's finding that such cancellation was unlawful, though carrier had voluntarily entered the through route and joint rate agreements, was therefore affirmed.—Associated Truck Lines, Inc. v. United States, 304 F. Supp. 1094 (1095-6)*.

The assailed tariff rule by which defendant, a common carrier holding general commodity authority, provides that it maintains no through routes and joint rates on furniture shipments constitutes a selective holding out of service placing furniture in a disadvantaged position relative to other general commodities in violation of §216(d).—National Furniture Conf. v. Assoc. Truck, 332 I.C.C. 802 (812-14).

40. Preference within carrier's control.—[Vols. 19, 21].—The practice of furnishing mobile storage bins to some shippers and not to others, at the option of the carrier, was found to result in unjust discrimination and undue preference and prejudice, and is therefore unlawful. Cease and desist order issued.—Chemical Leaman, Matlack, and M. & M.—Investigation, 118 M.C.C. 238 (246).

Rules, Regulations, Practices

50. Transit; stopping to load or unload partially.—[Vols. 10-12].—Petitioner's contentions that the considered rules were unduly preferential and prejudicial and unjustly discriminatory were based in part on the fact that the considered rules differ in many respects. This fact standing alone does not warrant a finding of unlawfulness. More specifically, petitioner refers to the fact that the rules of certain respondents provide for partial loading and unloading of the same shipment. The record did not warrant a finding that the furnishing of such service is unlawful but that the potential for evasion of such rules is so apparent that the present rules should be revised. Previous decisions by the Commission do not warrant the finding that the furnishing of dual service on the same shipment is necessarily unlawful.—Stopping-in-Transit Rules & Charges Btw. Southern Terr., 329 I.C.C. 353 (361).

In 69 MCC 77, 309 ICC 437, a restriction against dual service on the same shipment was imposed, predicated on the conclusion that there was no commercial necessity for dual service. It was also concluded that to provide such service would open the door to potential discriminations and unfair competitive practices in rendering l.t.l. service at t.l. rates. In the instant proceeding, a commercial necessity was shown where the dual service is provided, but the potential for evasion of certain of the proposed rules is so apparent as to permit l.t.l. service at t.l. rates. Thus, they are unjustly discriminatory. This unlawfulness could be eliminated by providing that when dual service is performed partial unloading will be permitted only at the points beyond that at which the last stop for partial loading is made and further loading of a shipment will be prohibited after it has been partially unloaded.—Id., p. 362.

60. Moving household goods.—[Vols, 10, 14, 19].—Proposed amendment to 49 CFR §1056.4 which would make all charges for accessorial and terminal services on household goods be determined on basis of shipment's total weight not shown to be justified as weight is an arbitrary factor wholly unrelated to the services performed and would result in unreasonably higher or lower charges to shippers depending on amount of services required.—Amendment of Pt. 276.4 General Rules & Regulations, 335 I.C.C. 698 (702-3).

Respondent's tariff provision providing lower rates to apply in its "slack season" (Oct. 1 through May 31) conditioned upon shipper having tendered during slack season of prior year at least 60 percent of its traffic moved by respondents found unjustly discriminatory. Present shippers would tender peak season shipments to other carriers but obtain slack season discount by varying relative tender of traffic to respondent. Thus, there is no difference in service performed for off-season shipper who qualifies for lower rate and one who does not. Ordered canceled.—Reduced Seasonal Household Goods Rates, 337 I.C.C. 430 (433-4)*.

Section 216(e) [*§316(e) U.S.C.]* Complaints to and investigation by Commission; power of Commission to fix reasonable rates, regulations, etc.—[Unchanged. See vol. 10, p. 8204.]

Notes of Decisions

Volume 10—p. 8204; Volume 11—p. 9551; Volume 12—p. 10455; Volume 13—p. 11108; Volume 14—p. 11630; Volume 16—p. 12901; Volume 17—p. 13606; Volume 18—p. 14595; Volume 19—p. 15863; Volume 21—p. 17582.

2. Construction and interpretation.—[Vols. 10, 12, 13, 16, 17, 21].—See also Notice of Increases in Frt. Rates and Pass. Fares case, §204(c), n. 27, supra.

Commission's power to prescribe minimum rates is used sparingly and on evidence of record we are unable to conclude that rates on commodities formerly exempt under §203(b)(6) are so depressed or so unstable in structure as to justify issuance of a minimum rate order with the exception of specified rates on coffee beans for which a minimum reasonable rate is herein prescribed.—Rates on Formerly Exempt Commodities, 329 I.C.C. 61 (70-1).

3. Complaints to, and jurisdiction of Commission.—[Vols. 10-12, 14, 17-19, 21].—Under §216(e), plaintiffs could have filed a formal complaint with the Commission attacking the justness and reasonableness of the rates in issue when, after bureaus' schedules originally proposed and suspended had been cancelled and the suspension proceedings had been discontinued, the Commission decided not to suspend rate bureaus' new schedules proposing rate increases identical to those originally proposed. Instead they filed two court suits, each seeking enforcement of original suspension order, reestablishment of the lower rates effective prior to date of that order, and that the Commission be directed to strike from its files the schedules containing the republished rates. However, Commission decision not to suspend the new proposed rates was only a preliminary determination and, since plaintiffs did not challenge lawfulness of those rates, they failed to exhaust statutory remedies afforded them. Therefore, since plaintiffs obtained no final agency action subject to judicial review before filing the instant suits, the complaints are dismissed. —National Industrial Traffic League v. United States, 287 F. Supp. 129 (131-2)*.

Commission order in investigation proceeding disapproving increases in rates and charges and directing carriers to make refunds to shippers to extent that such increases are not approved, which order was issued incident to respondent carriers' request for an extension of time, held valid and not subject to a judgment of annulment when, though the refund provision was challenged, respondents (including plaintiffs) tacitly or impliedly accepted the order by withdrawal of their objection. In addition, applying the doctrine of equitable estoppel, the Commission relied on carriers' withdrawal of their jurisdictional objection to the refund provision; and such withdrawal was a positive act evidencing their willingness to go along with the condition imposed. The Commission granted the request for extension of time in good faith and, as plaintiffs accepted benefits of such extension order, their present posture appears grossly inequitable and not deserving of court intervention. Therefore, while the procedure is not commended, peculiar facts of instant case do not justify granting the relief sought and approval of carriers' conduct. Complaint dismissed.—Admiral-Merchants Motor Freight, Inc. v. United States, 321 F. Supp. 353 (356, 358-60)*.

In determining whether a freight classification is just and reasonable, Commission is required to act in a rational manner; its action cannot be arbitrary, capricious or an abuse of discretion or otherwise not in accordance with the law.—Dutton-Lainson Company v. United States, 371 F. Supp. 1352 (1355)*.

Rates on shipments of chemicals, drugs, and related articles from New Jersey and New York to Chicago were found not to cover respondents' out-of-pocket costs and were thus noncompensatory. The Commission prescribed lawful minimum rates for such service as empowered by §216(e) and found the assailed rates unlawful to the extent they violate the prescribed minimum rates.—Chemicals, Drugs, and Related Articles, 335 I.C.C. 601 (606-7).

Petition requesting investigation of practices in handling valuation of baggage transported on interstate buses denied as petitioner fails to set forth sufficient allegations, materials, or evidence upon which an adequate determination of the involved issue under §216(e) could be made.—Limitation of Free Baggage Allowance—Greyhound, 114 M.C.C. 56 (60).

Section 216. (f) [§*316(f) U.S.C.*] Commission empowered to establish just division of joint rates.—[Unchanged, See vol. 10, p. 8207.]

Notes of Decisions

Volume 12—p. 10457; Volume 13—p. 11109; Volume 15—p. 12240; Volume 19—p. 15864.

Section 216.(g) *[§316(g) U.S.C.]* New rates; determination of fairness by commission; suspension.—[Unchanged. See vol. 11, p. 9552.]

Amendments, see footnotes, vol. 10, p. 8208, vol. 11, p. 9552.

Notes of Decisions

Volume 10—p. 8208; Volume 11—p. 9553; Volume 12—p. 10457; Volume 13—p. 11109; Volume 14—p. 11630; Volume 15—p. 12240; Volume 16—p. 12901; Volume 17—p. 13607; Volume 18—p. 14596; Volume 19—p. 15864; Volume 21—p. 17582.

4. Reasonable rates required by statute.—[Vols. 10-15, 17, 21].—See Canned or Preserved Foodstuffs from Fla. to N.Y. & N.J. case, §307(g), n. 27, infra.

5. Burden of proof.—[Vols. 10-19, 21].—See also New Procedures in Motor Carrier Rev. Proc. case, §204(c), n. 27, supra; Stopping-in-Transit Rules & Charges Btw. Southern Terr. case, §216(g), n. 26, infra.

District court held that shipper challenging freight classification of its winches had the burden of proving reasonableness of classification which had been in existence with no change or challenge since 1952. Shipper was not required to present representative data for all winches shipped in the United States but could present evidence of all relevant transportation characteristics for its winches.—Dutton-Lainson Compny v. United States, 371 F. Supp. 1352 (1356-7)*.

Respondent motor carrier has not met the statutory burden of proving the proposed changed t.l. commodity rate on candy and related articles from Hackettstown, N.J., and New York, N.Y., to Chicago, Ill., to be just and reasonable as respondent's cost data has not met the minimum requirement of proving such assailed rate compensatory.—Candy & Confectionery, New Jersey & New York to Chicago, 332 I.C.C. 43 (46).

On reconsideration, the Commission found proposed commodity rates on animal food from middlewest to western destinations are changed rates, both increased and reduced, but not initial rates. Therefore, respondent bears the burden of proving that such changed rates to be just and reasonable.—Animal Food, Middlewest to Calif., Idaho, & Utah, 332 I.C.C. 87 (88)*.

On investigation, the burden of proving proposed reduced t.l. commodity rates on plastic material from 10 points in Texas to Palatine, Ill., to be just and reasonable is upon respondent motor carrier, but respondent has no burden to prove the reasonableness of effective rates introduced herein for comparison purposes.—Plastic Materials, Texas to Palatine, Ill., 332 I.C.C. 403 (404).

Under §216(g), the burden of proof is upon the proponents of a changed charge to show that such charge is just and reasonable.—Charges on LTL Shipments to Points in Florida, 332 I.C.C. 892 (895).

Respondent motor carriers have met their statutory burden of proving proposed increased rates and charges on l.t.l. and any-quantity shipments under 1000 pounds just and reasonable by expert testimony showing respondents' financial condition is precarious, that respondents have difficulty attracting investment capital, and that proposed rates would reduce respondents' operating ratios on such traffic.—Rate Increases and Charges, Southwestern States, 335 I.C.C. 361 (382-83).

Commission investigation orders, entered prior to the effective date of proposed tariff rules eliminating the unloading of loose and carcass meats by motor carriers and placing responsibility for such unloading on the consignee, place the burden of proof on respondents to show the proposed tariff rules to be just and reasonable.—Unloading Restrictions on Meats & PHP, 335 I.C.C. 391 (394)*.

Initial rates: There is no statutory burden upon respondent to show that proposed initial rates are just and reasonable.—Foodstuffs & Agricultural Com., Calif. & Ariz. to West, 329 I.C.C. 321 (322)*.

Justification for increases: Respondents failed to establish that study carriers were representative when financial condition study did not (1) distinguish between class I and II carriers, (2) indicate percentage of traffic handled by study carriers and non-study carriers, or (3) disclose percentage of operations relating to extra-territorial movements. In addition the Commission held that representativeness is not assured in the territorial cost study merely because that study includes the same carriers as used by Commission's Cost Finding Section in a territorial cost and traffic study.—Increased Rates, New England Territory, 329 I.C.C. 244 (248, 252).

Establishment of a need for increased revenues does not, ipso facto, justify an increased delivery charge.—Charges on LTL Shipments to Points in Florida, 332 I.C.C. 892 (895).

Although respondents have statutory burden of showing proposed rates to be just and reasonable, the sole justification they offer for proposed increased class and commodity rates and charges is their alleged need for additional revenues to meet increased expenses resulting from new higher wage rates. However, effect of such wage increases on carriers' total expenses and unit costs is not measurable without more information than the mere fact of the new wage rates; a reliable restatement of expenses is essential to any cost justification for increased rates, but such a restatement has not been presented. Respondents have failed to justify their proposals in whole or in part.—Increased Rates and Charges, Middlewest Territory, 335 I.C.C. 142 (144-5)*.

Upon protest, burden of proving increased rates on shipments weighing 201 to 499 pounds to be just and reasonable is upon the respondent motor carriers and has been met by evidence of costs-revenue relationships proving a revenue need exists for such increases.—Small Shipment Rate Revision—Eastern Central, 335 I.C.C. 547 (550-56).

Upon investigation, respondent has met the burden of proving proposed increased rates and minimum charges on shipments of less than 5000 pounds to be reasonable by introduction of data which fairly represent the motor common carriers involved, show a revenue need, and prove that such increases would not be excessive.—Increased Rates & Charges, C. & S. Territories, 335 I.C.C. 676 (679-89).

Justification for reductions: Respondents have the burden under the statute of showing that the changed rates are just and reasonable. As a minimum requirement, they should make a convincing showing that such rates would exceed the out-of-pocket costs of performing the service. Proponents' showing herein cannot be accepted for the benefit of the other respondents.—Carbon Blacks from the Southwest to Ind., Ohio & Mo., 325 I.C.C. 138 (143).

The Commission approved a rate for animal feed from Kansas City, Mo., to Chicago, despite respondent's failure to apply the joint cost burden equally over each unit of traffic in establishing the rate. Readjustments of the recognized, though not formally approved, "Highway Form B" must be made to meet the reasonable exigencies of carrier needs with respect to the particular operation.—Animal Feed from Kansas City, Mo., to Chicago, 325 I.C.C. 147 (154); the shipper here desires faster service than the railroads are providing, and to cease its private carriage. The proposed rate would accomplish these purposes, allowing the respondent to participate in the traffic, and increasing the amount of traffic available for common carriage. The proposed rate is the highest which will produce those results.—Id., p. 155.

Respondent's cost evidence, wherein empty capacity was charged against the traffic occasioning the need for a return movement, as utilized in the Highway B formula, was the best adapted to the particular circumstances. Furthermore, the revenue under the proposed rates compares favorably with that from other traffic, such as hides, insulating materials, and iron and steel articles, currently being handled from Kansas City to Chicago by Mid-American. The proposed rate was found to be reasonably compensatory for that carrier. However, in the absence of evidence introduced by the other respondents of the lawfulness of the proposal, or that their operations thereunder would be comparable to those of Mid American, they have not sustained their statutory burden of proving the lawfulness of the proposed rate, and it is therefore just and reasonable for Mid-American only.—Id., p. 155.

Although the Commission generally recognizes the jointness of line-haul expense in round trip movements, and requires compensativeness of a particular rate to be shown by considering the reverse movement, its position with respect to the treatment of costs is not absolutely inflexible, in disregard of the specific factual situation. Therefore, since respondent would continue to suffer a traffic imbalance if the rate considered in the instant proceeding were disapproved, the traffic sought would continue to move in private carriage, and the rate would not adversely affect any regulated carrier and would improve respondent's relative revenue position, the rate was approved for respondent.—Aluminum Extrusions from Miami to Chicago, 325 I.C.C. 188 (191-192).

Although the term "heavy and chronic imbalance of traffic" is not susceptible of precise definition or application, the Commission found that for the principles expressed in 325 ICC 138 to apply, a showing must be made that the proposed rate will alleviate an imbalance in operations which involves a substantial volume of traffic over a sufficient period of time to establish a definite pattern of unbalanced operations. Some traffic imbalance is inherent in all motor-carrier operations depending on seasonal variations and the needs of commerce at a particular time. Such a showing was not made in the instant proceeding. An average monthly imbalance of 13.4 percent does not, standing alone, establish a heavy operational imbalance.—Composition Roofing, Stroud, Okla, to St. Louis, Mo., 329 I.C.C. 612 (617)*.

Respondent's evidence failed to apportion the jointness of its round trip operation, resulting in decreased costs. However, restatement of costs reflecting empty movement on return resulted in out-of-pocket costs which permitted the proposed rate to be found adequately compensatory. Approved, for proponent only.—Id., p. 618-9.

Upon investigation, respondent motor carriers have the burden of proving proposed reduced t.l. commodity rate on gypsum and plaster from Southard, Okla., to Chicago, Ill., to be lawful by introduction of cost data sufficient to prove such rate compensatory.—Gypsum and Plaster, Southard, Okla., to Chicago, 332 I.C.C. 48 (52).

Upon protest, burden of proving reduced rates on small shipments weighing in excess of 1,000 pounds to be just and reasonable is upon the respondent motor carriers and has been met by evidence of cost revenue relationships proving need for such reductions to offset the upward adjustments on shipments weighing less than 500 pounds.—Small Shipment Rate Revision—Eastern Central. 335 I.C.C. 547 (551-6).

6. Issues in the investigation.—[Vols. 12-19, 21].—See also Admiral-Merchants Motor Freight, Inc. v. United States case, §216(e), n. 3. supra.

Approval of new rate for aluminum extrusions granted to respondent, in order to divert traffic from private carriage. The evidence was found to be convincing that the new rate would improve respondent's relative revenue position.—Aluminum Extrusions from Miami to Chicago, 325 I.C.C. 188 (189, 191).

10. Evidence, in general.—[Vols. 10-19, 21].—see also New Procedures in Motor Carrier Rev. Proc. case, §204(c), n. 27, supra.

Commission's approval of carriers' allocation of constant costs on a dollar basis was justified inasmuch as such a matter is peculiarly for the Commission to determine and since there is nothing in the nature of things or in economic or accounting principles which requires that such costs be distributed on basis of physical units rather than expenses directly attributable to handling them.—National Small Ship. Traf. Conf. v. United States, 321 F. Supp. 500 (500)*; however, an error in cost studies due to exclusion of nonstudy carriers' single-line traffic, while including interline traffic and attendant interchange costs, thus producing an upward bias in cost sample and distortion in respect to small shipments which are charged with a higher proportion on line-haul costs, required this court to vacate Commission's findings that rates under the tariffs considered were just and reasonable.—Id., p. 500.

For purposes of justifying proposed reduced rate on sheet steel respondent separated its cost and mileage figures of heavy hauling from transportation of iron and steel articles to reflect only the operations of its steel division. Such cost evidence is of little value, since respondent fails to explain how it selected the expense accounts used and how it apportioned them to reflect only steel traffic costs: furthermore, none of those accounts includes costs which vary with miles operated, yet its presentation of costs per vehicle-mile assumes that they do.—Sheet Steel, Sparrows Point to Scranton and Carbondale, 323 I.C.C. 554 (555).*

Motion to strike testimony on basis of "double hearsay", i.e., dubious qualifications of witness and refusal of same to identify the consumers to whom he referred, denied, since witness established his qualifications and movant is not entitled to the identity of the consumers.—Carbon Blacks from the Southwest to Ind., Ohio & Mo., 325 I.C.C. 138 (139).

Traffic and cost data are not representative where carriers are not selected by a random sample method, but merely on the willingness of 20 of the 106 carriers of the association to compile the necessary data.—LTL COR Rates—Between East and Territories West, 326 I.C.C. 174 (186, 197).

Where respondents, in view of the numerous changes which have taken place in the motor carrier industry, were requested to supply extra detailed substantiation of operating ratios in order to test their accuracy, cost study was found to lack representativeness since no reasonable sampling principles were followed to assure a group of carriers which would be truly representative of all respondents. Respondents presented certain evidence regarding the relationship of expenses to revenues developed for the 22 cost carriers drawn from the 29 carriers which conducted the traffic survey out of the entire group encompassing approximately 230 respondents. No specific tests or statistical analyses were made to determine whether the results of such a survey would by typical for a full year's operation.—Increased Rates, Southwest, Colorado, Wyoming, 326 I.C.C. 216 (232, 236-8).

Cost and revenue comparisons submitted by non-system motor carriers are inadequate to justify proposed increased rates and minimum charge as they represent total traffic, interstate and intrastate, instead of being restricted to traffic moving under the proposed rates and charge; contain other inadequacies as specified; and are not representative of all respondents.—Increased LTL Class & Commodity Rates, Pacific Northwest, 329 I.C.C. 1 (11-2); and respondent system motor carriers' evidence in support of increased rates and minimum charge on shipments of less than 1,000 pounds is inadequate. Cost studies submitted were for too small a sampling of respondents; studies were outdated; traffic studies were made at different times, none reasonably current; and statistical standards were not followed to show representativeness of selected carriers.—Id., p. 11.

Respondents failed to establish that the carriers used in a study offered in evidence are fairly representative of New England carriers as a whole and, therefore, the various comparisons purporting to show the conditions prevailing in the New England motor industry are of little probative value. Since the assumption that the carriers whose data were used in the studies were reasonably representative of New England carriers is basic to all of the respondents' cost studies of representative territorial costs and the impact of wage and other cost increases on those costs, unless this assumption is supported by evidence of record, the contention that these cost studies establish that the proposed increases are just and reasonable is untenable.—Increased Rates, New England Territory, 329 I.C.C. 244 (248-9).

On reconsideration, Commission held that judgment sampling of traffic and costs is probative evidence in a general increase case provided that such sampling is supported by objective tests and not mere opinion. However, the quantum of proof required to support judgment sampling has been changed and made heavier by procedural order issued August 3, 1964, herein cited, and subsequent orders and proceedings since then and including order notifying parties of such increased requirements in instant case.—Increased Class & Commodity Rates, Transcontinental, 329 I.C.C. 420 (427)*.

It may be that changed conditions, such as the packaging of commodities, presented the respondents with difficult problems concerning capacity loads. However, approval of minimum charges to correct such situations necessarily requires justification based upon convincing evidence such as the experience of representative carriers in moving such traffic. No such evidence was introduced. Therefore, the proposed minimum charges and provisions for the application thereof were not found to be just and reasonable.—Minimum Charges for Capacity Loads, Transcon. Terr., 329 I.C.C. 706 (711).

Respondent motor carrier's cost data in support of proposed changed t.l. commodity rate are of little value as there is no specific proof of their applicability herein and respondent's method of computing current cost levels by a 6-percent increase of previously accepted costs has not been shown to be a proper or correct method.—Candy & Confectionery, New Jersey & New York to Chicago, 332 I.C.C. 43 (45).

Respondent motor carrier's evidence in support of proposed changed commodity rates on animal food from Middlewest to western destinations are regional costs per vehicle mile from Commission's public statement No. 6506, which evidence incorrectly assumes that all expenses vary with the miles traveled and is not acceptable by itself.—Animal Food, Middlewest to Calif., Idaho, & Utah, 332 I.C.C. 87 (88-89)*.

Proposed increased delivery charge would be applicable on all shipments weighing 1,000 pounds and under destined for delivery in Florida, regardless of the length of haul. Thus, it has no relation to line-haul, interchange, or pickup costs and can be justified only on basis of increased delivery costs. See 306 ICC 539, 544. Respondents have not submitted such cost evidence but only evidence reflecting their overall transportation costs and thus have failed to carry their burden of proof; proposed charge not shown just and reasonable and schedules ordered canceled.—Charges on LTL Shipments to Points in Florida, 332 I.C.C. 892 (895).

Hearing examiners' refusal to exclude from the record certain exhibits of respondents which were served on the parties by fourth-class mail, instead of first-class mail as required by Rule 22 of the Rules of Practice, affirmed; Rule 22 is not necessarily exclusionary in purpose or effect; and furthermore, appropriate relief for any delay caused by use of fourth-class mail, such as a grant of time to prepare their cross-examination, was not requested by protestants. However, respondents are admonished that such evasion of the service requirements will not be tolerated in the future.—Increased Rates and Charges, Middlewest Territory, 335 I.C.C. 142 (143)*.

Respondents evidence for proposed tariff rules placing responsibility for unloading loose and carcass meats on the consignee relate mainly to respondents' motivation for such restrictions on unloading. Such restriction constitutes a reduction in service and proposed tariffs include no corresponding adjustment of carriers' line-haul rates. Proof of motivation, alone, without economic justification is insufficient evidence to show proposed tariffs just and reasonable.—Unloading Restrictions on Meats & PHP, 335 I.C.C. 391 (398-401)*.

Protestants' contention that traffic and cost studies introduced by respondent motor carriers in support of restructured rates on l.t.l. and any-quantity shipments are invalid found not proven. Traffic study followed standard statistical procedures, provided for control of errors, and is reasonably representative of the entire traffic under consideration. Cost study used the proper through traffic basis for cost computation and acceptably used quarterly reports to the Commission as basis for increased service-unit costs.—Small Shipment Rate Revision—Eastern Central, 335 I.C.C. 547 (565-70).

Respondent's data on cost, traffic, and revenue of selected carriers found representative evidence of all respondents operating between central and southern territories as it accurately reflects data ascertained by the Commission's cost finding section in preparation of statements No. 3-66 published as a guide for the formulation of rates. Protestant's evidence is not persuasive as it fails to consider the characteristics of central and southern territorial traffic.—Increased Rates & Charges, C & S. Territories, 335 I.C.C. 676 (681-92).

Commission found that respondent motor carriers' traffic and costs of service studies are reliable and relevant to the issues considered herein as they are consistent with Commission's order of April 10, 1969, dealing with these matters. Although all data are not as current as might be, Commission recognizes that continuous mergers and acquisitions within the motor carrier industry prohibit a static situation.—Small Shipment Rate Revision, Central & Southern, 337 I.C.C. 158 (163-9).

Commission has previously used the "carried basis" as the criterion for measuring revenue-cost relationships, and respondents have not convinced us that we should change that criterion. Use of that each-to-each basis provides a more accurate comparison of revenues and costs for carriers involved. The introduction of only a portion of nonstudy carriers' revenues for comparison with territorial costs applied for such carriers introduces a bias that has not been corrected. Suggestion to remove such bias by inclusion of the nonstudy carriers' costs would be difficult and would unduly broaden territorial scope being considered.—General Increase, East-South Territory, 341 I.C.C. 735 (755-58).

Commission found that all proof of commodity transportation characteristics need not be established through probability sampling. Whether such sampling is necessary depends on the complexity and magnitude of the data to be developed. Evidence of record shows that proponent's study was adequate and no probability sampling was required.—Increased Classification Ratings on Blankets, 341 I.C.C. 760 (762-64).

15. Order as to suspended rates.—[Vols. 10-14, 16-19, 21].—Although Commission order suspended motor carrier tariff bureaus' proposed rate increases of 3 percent on t.l., and 5 percent on l.t.l., shipments until a specified date, unless otherwise ordered by the Commission, those schedules were subsequently cancelled by proponents with the Commission's permission, and, following the cancellation, the suspension proceedings were ordered discontinued; therefore, plaintiffs' claim that the suspension order is outstanding and should be "enforced", in connection with tariff bureaus' new proposed schedules republishing identical percentage rate increases, is without merit. Furthermore, the Commission's action in a new proceeding, declining to suspend bureaus' proposed tariffs republishing the same rates on basis of a new and more comprehensive record, was within its discretion under the Act; thus, its refusal to suspend those rates is not judicially reviewable. Complaints seeking enforcement of the suspension order (and a court order that tariffs containing the republished rates be stricken) are dismissed.—National Industrial Traffic League v. United States, 287 F. Supp. 129 (131-2)*.

20. Comparisons of rates.—[Vols. 10, 12-19, 21].—While neither party submitted cost data adequate to measure reasonableness of proposed rate, such evidence is not the sole possible standard. Comparison with other rates in effect on similar traffic under similar transportation conditions may, where not rebutted by more specific evidence, establish reasonableness of a proposal. Based on comparison with 20 rates maintained by a number of other motor carriers on the same or similar traffic between similarly situated points, proposed rate is not a departure from the general level of rates on this kind of traffic for similar distances; and, because of higher minimum proposed, revenues apparently will exceed those earned at any of the compared rates. Such unrebutted evidence indicates that proposed rate is just and reasonable; approved.—Sheet Steel, Sparrows Point to Scranton and Carbondale, 323 I.C.C. 554 (556)*.

Proposed initial rates are only slightly below the adjustment approved by the Commission in the "38,000-pound" case (319 ICC 667), which retained the origin and distance relationship of the "Cudahy" scale but reduced the rates by 30 cents on fresh meats and packinghouse products other than hanging and by 20 cents on hanging meats. Accordingly, it does not appear that the proposed rates will result in the disruption of the existing rate structure, as feared by the protestants. Moreover, while the Commission has approved rates based on the "Cudahy" scale, it has not been prescribed as a minimum reasonable level. Proposed rates found not shown to be unjust or unreasonable.—Meats & Packinghouse Products, Midwest to Far West, 329 I.C.C. 604 (608).

On investigation, respondent motor carrier's comparison of proposed rates with effective rates on the same commodity from and to similar points is of greater value than protestant railroad's cost evidence based on system average truck-mile expenses as system average method assumes that all expenses are caused by miles operated, which is not true.—Plastic Materials, Texas to Palatine, Ill., 332 I.C.C. 403 (404-5).

25. Classifications; comparisons; exceptions.—[Vols, 10, 12-16, 18, 19, 21].—Respondent motor carriers sought to establish a class 100 rating in truck-loads and class 150 in less than truckloads on paper and plastic drinking straws. These ratings are higher than present rating on paper straws but lower than present ratings on plastic straws. Commission decided that both types of straws should have the same rating because their transportation characteristics are similar but the proposed ratings are too high inasmuch as the characteristics of straws differ from those of compared commodities shown on this record currently so rated. Schedules ordered canceled.—Classification Ratings, Drinking Straws, 335 I.C.C. 1 (5-6).

Suspended schedules restructuring rates on l.t.l. and any-quantity shipments found just and reasonable. The assailed departure from classification principles is justified as transportation characteristics generally have become irrelevant insofar as small shipments are concerned and such charges are not rates but shipment charges and need not be stated in rates per 100 pounds.—Small Shipment Rate Revision—Eastern Central, 335 I.C.C. 547 (563-4).

Proposed rate and minimum charge increases in flat amounts on shipments of less than 5000 pounds between the central and southern territories approved as respondent proved that flat amount increases correct disparities in cost-revenue relationships caused by previous percentage increases which did not consider the relative importance of classification to size of shipment and length of haul.—Increased Rates & Charges, C. & S. Territories, 335 I.C.C. 676 (692-3).

26. Reasonableness of regulations and practices.—[Vols. 10, 11, 16, 18, 19, 21].—In considering proposed tariff rule for absorption of pier loading charges under present rates on frozen meat shipments imported from foreign countries and loaded direct from piers or wharves, the first issue presented is whether respondent's current absorption of such charges under its rates and pickup and delivery rule is legal. Pickup service contemplated by respondent's tariff embraces both calling for and loading at point of origin (in accordance with generally accepted interpretation of motor carrier's tariffs where pickup service is provided) and, there being no provision in the tariff expressly providing for loading of vehicle by the shipper, the loading is an integral part of the transportation service offered by respondent. Fact that labor contracts require that loading of vehicles at the piers be done by a third party does not in any way change the nature of the carrier's service; moreover, terminal operators perform the loading as agents of respondent. Under its tariff rates and pickup and delivery rule, respondent is required to bear the costs for loading of vehicle.—Frozen Foods—Southern, Middle Atl. & New England States, 323 I.C.C. 143 (146-7).

Proposed tariff provision, intended to clarify the services respondent offers under considered rates, is reasonably necessary to eliminate shippers' existing uncertainty regarding respondent's practice of paying pier loading charges to the terminal companies, especially in view of provisions in governing terminal tariff which place contingent liability on shipper for pier loading charges and in view of fact that other carriers' tariffs specifically provide for payment of such charges either by shipper or carrier. Furthermore, proposed provision would be in conformity with the Commission's requirement that tariffs clearly set forth rules and regulations affecting measure of services performed in connection with published rates; also it would eliminate a possible source of discrimination between various shippers. There being no change in the level of respondent's rates, no cost showing need be made; proposed rule found just and reasonable.—Id., pp. 145-6, 147-8.

Proposed rule providing that carrier may for its convenience substitute vehicles not equipped with winches for line-haul transportation of oilfield commodities and at its expense obtain a winch for loading or unloading of shipments not requiring additional lift equipment, approved subject to indicated clarifying amendments. A winch truck is more expensive, costs more to operate, and wears out much sooner than one not so equipped; as weight of winches limits permissible weight of cargo under State laws, freight requiring two winch trucks may be loaded on one longer winchless vehicle; and, as less than 10 percent of respondent's oilfield traffic requires winches for loading and unloading and they are not normally used during over-the-road hauls, it has become impractical to maintain only winch equipment. Operating economies from proposed substitution are thus obvious, and it is reasonable to conclude that respondent will not use facilities of others when it would incur greater cost by so doing.—Loading, Unloading by Winch, Oil Field Haulers, U.S.A., 323 I.C.C. 359 (362, 363, 367).

As line-haul rates now include winch loading and unloading, charges incurred for obtaining winches at origin and destination will not be passed on to shippers; thus proposed rule will not affect the existing rate structure. Considered practice is widespread and of long standing, its practicality and economic soundness are demonstrated by experience, and the new rule will merely remove any uncertainty as to its propriety and allow use of equipment in a manner consonant with respondent's managerial discretion. Moreover, its enforcement presents no foreseeable difficulties; there is no more likelihood of additional service being performed without charge if a hired vehicle is used than if the transporting vehicle performs the unloading, since, if shipment cannot be unloaded by a winch truck and driver, loading and unloading are not included in the line-haul rate and accessorial charges apply.—Id., pp. 362, 366, 368.

Complaining petitioner's proposed rules cannot be adopted for they are not based on representative cost evidence, nor do they meet the needs or have the support of the majority of carriers and shippers. Thus they are shown not to be just and reasonable.—Stopping-In-Transit Rules & Charges Btw. Southern Terr., 329 I.C.C. 353 (363).

Proposed tariff rules eliminating the unloading of loose and carcass meats by motor carriers but not adjusting line-haul rates to reflect such elimination constitute reduced service without reduced rates and so have not been shown to be just and reasonable. Proposed tariffs permitting a carrier to arrange such unloading services without specifying a precise charge for such services ruled unlawful.—Unloading Restrictions on Meats & PHP, 335 I.C.C. 391 (398-401)*.

Respondent's proposed schedule cancelling joint rates, through routes, and interchange arrangements with another carrier at Philadelphia, Pa., on grounds that such cancellation would relieve congestion at respondent's terminal, is not supported by any evidence that such congestion exists. As this cancellation would cause a reduction in the quality and quantity of service offered shippers, it is the type of rate publication and practice condemned in 111 MCC 151, and is therefore not shown to be just and reasonable and is hereby ordered cancelled.—Interchange Between Daniels & Tri-State Trans. Co., 337 I.C.C. 295 (296-7).

65. Reasonableness of proposed rates.—[Vols. 14-19, 21].—Where proposed tariff was suspended for the full statutory period and the Commission found, on basis of an inadequate report, that carriers had shown the involved rates to be just and reasonable, the district court set aside the finding and directed the Commission to resume the investigation into the reasonableness of such rates.—National Small Ship. Traf. Conf. v. United States, 321 F. Supp. 500 (501)*.

Although respondent failed to follow the method set out in 318 ICC 567 for showing costs that may be used to show compensativeness of a rate when owner-operators are employed, since it did not separate payments to owner-operators and show that remaining costs would be covered by division of revenue it would retain, cost evidence is not determinative in instant proceeding; thus, there is no occasion to apply the criteria of the cited decision.—Sheet Steel, Sparrows Point to Scranton and Carbondale, 323 I.C.C. 554 (556-7)*.

Public interest precludes proposed increase in l.t.l. and any-quantity class and commodity rates, despite increased labor costs, where operating ratio on such shipments is less than 90 percent. This interest is not properly served when, automatically and without sufficient justification, carriers are permitted to pass on to shipper through higher rates, and eventually to consumer through higher prices, this rise in operating expenses, thus further increasing inflationary pressures affecting the national economy.—Increase Rates, Southwest, Colorado, Wyoming, 326 I.C.C. 216 (240-1).

When selected carriers are used as basis for showing revenue needs of all respondents, competent evidence must prove them typical of the entire group. Respondent motor carriers' evidence fails this requirement as respondents chose carriers previously presenting such evidence to state regulatory bodies which is not representative herein for reasons specified.—Increased LTL Class & Commodity Rates, Pacific Northwest, 329 I.C.C. 1 (12).

On reconsideration, a 3-percent general increase in transcontinental rates by respondent motor carriers not shown just and reasonable as respondents' judgment samples of traffic and costs did not comply with quantum of proof specifically required by order of August, 3, 1964, cited herein. Failure results from unrepresentativeness of selected carriers who do not participate in short-haul movements, also applicable herein, and the use of study periods not typical or statistically sound.—Increased Class & Commodity Rates, Transcontinental, 329 I.C.C. 420 (427)*.

Proposed changed t.l. commodity rate on candy and related articles from Hackettstown, N. J., and New York, N.Y., to Chicago, Ill., not shown just and reasonable to the extent respondent's cost evidence is insufficient to prove such rate is compensatory.—Candy & Confectionery, New Jersey & New York to Chicago., 332 I.C.C. 43 (46-47).

Respondent motor carriers' evidence to prove that proposed reduced t.l. commodity rate on gypsum and plaster from Southand, Okla., to Chicago, Ill., should be based on one-way costing found insufficient. One-way costing is applicable only where a heavy or chronic traffic imbalance exists. One month duration of respondents' cost study and comparison of tonnage in each direction standing alone are insufficient proof of such an imbalance.—Gypsum and Plaster, Southand, Okla., to Chicago, 332 I.C.C. 48 (52).

Proposed intercoastal containership rates on canned goods from Pacific coast to eastern destinations found unjust and unreasonable to extent they exceed protestant-respondent motor carrier's costs but just and reasonable in all other respects.—Canned Goods, Between Pacific Coast and the East, 332 I.C.C. 55 (67).

Proposed changed commodity rates by respondent motor carrier on animal food from the Middlewest to western destinations not shown just and reasonable because respondent's cost evidence is insufficient to prove such rates will return sufficient revenues to cover out-of-pocket costs.—Animal Food, Middlewest to Calif., Idaho, & Utah, 332 I.C.C. 87 (89)*.

On reconsideration, proposed reduced commodity rates on window glass from Charleston and Owens, W. Va., to indicated destinations found just and reasonable because such rates are compensatory with costs computed on regional averages set forth in a public statement issued by the Commission as an aid in ratemaking procedure.—Window Glass, W. Va. to Md., Pa., and Va., 332 I.C.C. 382 (386-87)*.

On investigation, proposed reduced t.l. commodity rates on plastic materials from 10 points in Texas to Palatine, Ill., shown to be just and reasonable as respondent-proponent motor carrier has shown that proposed rate compares favorably with similar rates and applies to a point intermediate on the route of compared rate and amounts to a prima facie showing of reasonableness which protestant railroad's cost evidence fails to rebut.—Plastic Materials, Texas to Palatine, Ill., 332 I.C.C. 403 (405).

Respondent motor carrier has failed to bear its burden of proving tariff provisions restricting its acceptance of interlined traffic to be just and reasonable. Respondent's contention that such provisions are needed to eliminate problems in their collection of local rates on such traffic is not supported by any specific evidence but rather protestant shippers indicate that they desired continuation of services at either joint or combination rates.—Restrictions on Interchange Arrangements, 335 I.C.C. 356 (358-59).

Respondent motor carriers' proposed increases of minimum charges and rates on l.t.l. and any-quantity shipments under 1000 pounds found just and reasonable as respondents' cost revenue comparisons show the precarious financial condition of the carriers and that proposed increases would not be excessive in comparison with substantially higher rate levels in adjacent territories and are required to maintain adequate service in this area.—Rate Increases and Charges, Southwestern States, 335 I.C.C. 361 (363-377).

Proposed new rates and charges on l.t.l. and any-quantity shipments, to apply between points in New England and Middle Atlantic territories, on the one hand, and, on the other points in Central, Northwest, Middle West and Southwestern territories found just and reasonable as such rates would bear their fair share of carriers' costs as applied to the respective weight brackets.—Small Shipment Rate Revision—Eastern Central, 335 I.C.C. 547 (575).

The Commision concludes that the data submitted by respondent in support of increased rates and minimum charges on shipments of less than 5000 pounds fairly represent the carriers operating between the central and southern territories, show a revenue need, and prove such increases are not excessive. The increased rates and charges are approved as just and reasonable.—Increased Rates & Charges, C. & S. Territories, 335 I.C.C. 676 (692).

Proposed reduced commodity rate not shown just and reasonable as proponent motor carrier's cost data fails to bear statutory burden of proving such rate compensatory. Protestant's cost study uses correct methods of computation and is probative evidence that proposed rate is below proponent's out-of-pocket costs and is not compensatory.—Copper and Lead Scrap, Denver to Kansas City, 335 I.C.C. 792 (796-7).

Proposed rate revisions on shipments weighing less than 500 pounds shown to be just and reasonable as such revision results in a more equitable revenue contribution among all weight brackets than at present. Such rates will guarantee that respondent motor carriers are able to continue to provide adequate service on small shipments, which have long been a transportation problem, and for which such carriers now provide the only transportation mode available.—Small Shipment Rate Revision, Central & Southern, 337 I.C.C. 158 (172-3).

Evidence shows that respondent had a substantial net operating loss in 1971, and that without any fare increase its net operating loss will exceed $304,000 in 1972, even without consideration of additional losses resulting from the recent employee strike. Commission concludes that respondent has clearly shown a need for additional revenues to continue its existing operations and that proposed increases are shown just and reasonable.—Passenger Fares Between New York & New Jersey, 341 I.C.C. 50 (53-54).

Commission found proposed increases in rates and minimum charges not shown just and reasonable because respondents did not use the "carried basis" criterion, established in 339 ICC 324 and 340 ICC 1, for measuring revenue-cost relationships and have not convinced us that we should change that criterion. Respondents' introduction of nonstudy carriers' revenues introduces a bias that has not been corrected. Therefore, we are unable to conclude the proposal is cost-justified or necessary to meet future needs or provide good service.—General Increase, East-South Territory, 341 I.C.C. 735 (755-8).

Cost evidence herein (appendixes D, E, and F) clearly shows that the 1971 annual report data for the involved Rocky Mountain region carriers demonstrates an insufficient revenue need on the carriers' part. Financial health of this group is better than any other sector in the country. Respondents' correct portrayal of the unfavorable declining economic trend for years 1965 to 1970 and their pessimistic conclusions are strongly counterbalanced or neutralized by sizable improvement in 1971 earnings. Record does not establish a revenue need for all proposed increases.—General Increase-Rocky Mountain Territories, 341 I.C.C. 821 (839-42); however, evidence is clear that a revenue need exists in shipments under 1,000 pounds as these shipments are not carrying their fair share of cost burden. Although granting an increase on the issue traffic cannot be made with mathematical certainty, the Commission is convinced that a 1 percent increase in charges on these shipments is reasonable. Proposed schedules not shown just and reasonable and ordered canceled without prejudice to the filing of new schedules in conformity with foregoing conclusions.—Id., p. 842.

66. Cost of service.—[Vols. 19, 21].—Since the purpose of the proposed rate change was to correct a traffic imbalance from the point of origin to the destination territory, proponents utilized the added traffic theory, by which line-haul costs were computed by assigning a one-way vehicle-mile cost equally to each hundred-weight transported in a single vehicle. Approved.—Carbon Blacks from the Southwest to Ind., Ohio & Mo., 325 I.C.C. 138 (140).

The Highway Form B cost formula assigns to each movement a cost for the return of a vehicle to point of origin. This theory of joint costs assumes a reasonably balanced operation between the termini involved. Where, as here, the record shows a heavy and chronic imbalance of traffic, it is obvious that traffic moving in the same direction as that of the empty vehicle movement does not in fact create empty vehicle miles and should not bear the cost responsibility for such miles which Highway Form B purports to assign.—Id., p. 142.

The average running costs resulting under Highway Form B reflect the average of both single-trip and double-trip pickup and delivery. Thus, the doubling of running costs would result in overstating such costs even if it were assumed that a round trip was required in every instance. Since it is common knowledge that carriers often drop off empties when making pickups, or vice versa, it is unreasonable to assume that this particular traffic will generate more deadheading of equipment than is already provided for by the formula.— Aluminum Ingots, Kansas City, Mo., to Fort Wayne, Ind., 326 I.C.C. 1 (4)*.

Operating ratio of 91.3 percent on total l.t.l. and any-quantity traffic is very favorable, and precludes finding of need for additional revenue in this category.— LTL COR Rates—Between East and Territories West 326 I.C.C. 174 (203).

Increase in labor costs must be weighed along with other circumstances in determining reasonableness of proposed increase in rates. Public interest precludes approval of proposed increase in l.t.l. and any-quantity class and commodity rates, despite increased labor costs, where operating ratio on such shipments is less than 90 percent. This interest is not properly served when, automatically and without sufficient justification, carriers are permitted to pass on to shippers, through higher rates—and, eventually, to consumers, through higher prices—this rise in operating expenses, thus further increasing inflationary pressures affecting the national economy.—Increased Rates, Southwest, Colorado, Wyoming, 326 I.C.C. 216 (240-1).

Respondents have the burden of proving that their proposed increased l.t.l. and t.l. class and commodity rates and minimum accessorial charges in the New England Territory would be just and reasonable. This burden is not met if the cost and revenue data offered does not fairly represent the New England carriers as a whole; and no evidence is offered to show that efforts have been made to offset cost increase by increasing efficiency.—Increased Rates, New England Territory, 329 I.C.C. 244 (252).

Regional average costs used by protestant railroads and set forth in a public statement by the Commission do provide an appropriate method for determining if proposed reduced commodity rates on window glass are compensatory on a cost basis. Respondent's cost computations based on Highway Form B are inappropriate because expenses reported by carriers using owner-operators when applied for a single carrier do not yield meaningful cost results.—Window Glass, W. Va. to Md., Pa., and Va., 332 I.C.C. 382 (386)*.

Proposed increases in rates and charges, 5 percent on shipments weighing less than 5,000 pounds and 3 percent on those weighing 5,000 pounds and more, found not justified by evidence purporting to show respondents' need for additional revenues to meet anticipated increased costs due to higher wage rates and to improve their general financial condition. Effect of the wage increases on carriers' total expenses and unit costs cannot be measured by the mere fact of new wage rates; and, since a reliable restatement of expenses (essential to any cost justification for rate increases) was not presented, it is impossible to say what effect the wage increases will have on carriers' profit margins. Moreover, the order setting the hearing called for certain information, and, clearly, respondents have not complied therewith to extent that "anticipated expense and revenue data to show the effect of proposed increase" was called for. Respondents' showing as to effect of the wage increases on their expenses and costs is not sufficient; and they failed to show increased costs sufficient to justify their proposal.—Increased Rates and Charges, Middlewest Territory, 335 I.C.C. 142 (144-5, 150-1)*.

Proponent motor carrier's cost evidence in support of a reduced commodity rate is inadequate as it is an improper mixture of proponent's own costs and regional average costs and as proponent's method of computing line-haul costs on a one-way basis, rather than generally accepted round-trip basis, is unacceptable absent proof that a chronic and heavy traffic imbalance exists..—Copper and Lead Scrap, Denver to Kansas City, 335 I.C.C. 792 (795-6).

Our general refusal to approve or permit rates which fail to cover the usual apportionment of joint line-haul costs is based on the recognition that any benefits that might accrue to the carrier proposing or maintaining such rates would be detrimental to other regulated carriers, and thus contrary to our responsibility for developing sound economic conditions in the national transportation system. Accordingly, where it has appeared that traffic would be attracted from private carriage as in 325 ICC 188, rates have been permitted under relaxed standards of proof.—Atchison, T. & S. F. Ry. v. Morris, 340 I.C.C. 51 (59)*.

Commission, following 239 F. Supp. 591 and 251 F. Supp. 483, found that cost evidence, in order to show that rates are compensatory, should show cost of service rather than compensation paid to owner-operators and that, to avoid discrimination among carriers, the same principle should apply to all carriers. Also, while actual cost data is available, regional cost (properly adjusted) should be accorded prima facie validity absent any effective rebuttal. However, specific cost formulae according prima facie validity to formula-based costs are not necessary or desirable.—Motor Carrier Rates—Owner-Operator, 341 I.C.C. 28 (35-38).

Regulations of the Commission

36 FR 7134, Apr. 15, 1971, Part 1104: Procedures to be Followed in Motor Carrier Revenue Proceedings, new part 1104 (§1104.1 - §1104.8) added, effective 30 days after publication in the Federal Register.

36 FR 9022, May 18, 1971, Part 1104: Procedures to be Followed in Motor Carrier Revenue Proceedings, tariff publishing bureaus' petitions for postponement of effective date of the new procedures prescribed in Ex Parte No. MC-82 (36 FR 7134) denied; extension of the compliance date is not shown to be justified.

36 FR 18309, Sept. 11, 1971, Part 1104: Procedures to be Followed in Motor Carrier Revenue Proceedings, §1104.1 - §1104.8 modified; and prescribed procedures, as modified, take effect 30 days after publication in Federal Register.

Section 216. (h) [§*316(h) U.S.C.*] Good Will, earning power or certificate inadmissible in proceedings to determine rates.—[Unchanged. See vol. 10, p. 8214]

Notes of Decisions

Volume 10—p. 8214; Volume 12—p. 10459.

Section 216. (i) [§*316(i) U.S.C.*] Transportation needs and fair return considered in determining rates, etc.—[Unchanged. See vol. 11, p. 9554.]

Historical notes, vol. 11, p. 9555, vol. 13, p. 11112, vol. 14, p. 11633.

Notes of Decisions

Volume 10—p. 8216; Volume 11—p. 9555; Volume 12—p. 10460; Volume 13—p. 11112; Volume 14—p. 11633; Volume 15—p. 12243; Volume 16—p. 12906; Volume 17—p. 13613; Volume 18—p. 14623; Volume 19—p. 15896.

5. Honest, economical, and efficient management.—[Vols. 15-17].—Record shows that respondents have made a substantial investment in new and improved equipment and business methods to improve efficiency of operations but record also shows, as required in 332 ICC 820, that despite such savings an increase in net expenses or unit costs will result from new wage rates and cost levels.—Increased Rates and Minimum Charges, South, 335 I.C.C. 77 (99-101).

15. Fair return.—[Vols. 10-12, 14-19].—Commission's duty under §216(i) would not be performed should we deny carriers the opportunity to attempt to earn adequate revenues. However, we are not persuaded that the amount of needed revenues should be based upon artificial net worth figures which represent arbitrary application of a turnover ratio to actual earnings especially when greater turnover ratios are being accomplished.—Increased Rates and Minimum Charges, South, 335 I.C.C. 77 (96-7).

Regulations of the Commission

36 FR 7134, Apr. 15, 1971, Part 1104: Procedures to be Followed in Motor Carrier Revenue Proceedings, new part 1104 (§1104.1 - §1104.8) added, effective 30 days after publication in the Federal Register.

36 R 9022, May 18, 1971, Part 1104: Procedures to be Followed in Motor Carrier Revenue Proceedings, tariff publishing bureaus' petitions for postponement of effective date of new procedures prescribed in Ex Parte No. MC-82 (36 FR 7134) denied; extension of compliance date is not shown to be justified.

36 FR 18309, Sept. 11, 1971, Part 1104: Procedures to be Followed in Motor Carrier Revenue Proceedings, §1104.1 - §1104.8 modified; and prescibed procedures, as modified, take effect 30 days after publication in Federal Register.

Historical notes, see vol. 11, p. 9558, vol. 13, p. 11105, vol. 14, p. 11634.

Notes of Decisions

Volume 10—p. 8218; Volume 11—p. 9558; Volume 12—p. 10461; Volume 13—p. 11112; Volume 14—p. 11634; Volume 15—p. 12244; Volume 16—p. 12908; Volume 17—p. 13615; Volume 18—p. 14624; Volume 19—p. 15896; Volume 21—p. 17631.

1. Construction and interpretation.—[Vols. 10-12, 14, 19].—See also Loss and Damage Claims case, §6(1), n. 84, supra.

Proposed tariff, insofar as it attempted to impose liability for demurrage charges upon an agent who was not a party to the contract of transportation, was unlawful. Before such assessments as detention charges can be imposed on a party on a prescribed basis there must be some legal foundation for such liability outside mere fact of handling the goods shipped.—Middle Atlantic Conference v. United States, 353 F. Supp. 1109 (1116-9)*; since persons liable for demurrage charges are to be determined by ordinary rules of common law, parties to a contract of carriage are free among themselves to contract with respect to payment of demurrage; but where they have not become contractually obligated to pay demurrage because common-law principles exonerate them from liability, and they are not liable by statute or custom, liability cannot be imposed through device of a tariff.—Id., pp. 1119-20; although warehousemen are free to assume liability for detention charges by contractual undertaking, absent any custom or statutory or contractual basis, it would be unlawful to impose such liability on a party outside transportation contract by means of a tariff as a tariff is an inappropriate instrument to legislate liability with respect to a nonconsenting party.—Id., pp. 1121-22.

Where tariff provisions require the making of a notation on the bill of lading stating the density of the commodity shipped as a condition precedent to the use of a rate, the shipper is bound by such provisions. Such notations must be made prior to movement of the shipment or they are not in compliance with the provision.—Glama Dress Co. v. Mid-South Transport, 335 I.C.C. 589 (593).

Due to absence of delegated congressional authority to regulate advertising by carriers and delegation thereof to Federal Trade Commission, the Interstate Commerce Commission is without jurisdiction to prohibit use of the "Good Housekeeping Consumer's Guaranty", as evidenced by a seal, in the advertising of regulated carriers. Use of said guarantee does not violate §217(b).—Wheaton Van Lines— Petition for Declaratory Order, 339 I.C.C. 1 (6-7); although it is unnecessary for Commission to determine whether use of the "Good Housekeeping" seal is "misleading" to the public, it is noted that said magazine's program is well accepted and understood by general public and any potential violation of law does not constitute probable cause to believe such exists.—Id., p. 7.

Section 217 of the Act provides that tariffs must be filed with the Commission and makes unlawful the transportation of property "unless the rates, fares, and charges upon which the same are transported by said carrier have been filed and published in accordance with the provisions of this part." A carrier may not lawfully perform transportation under a grant of temporary authority unless and until compliance has been made with the rate and other requirements of §217 of the Act in the case of common carriers. The fact that applicant never had rates in effect governing the transportaion of its commodities under its temporary authority indicates that applicant was conducting operations, in interstate commerce, without appropriate authority.—Ewen Brothers, Inc., Common Carrier Application, 108 M.C.C. 878 (880, 886).

In this rulemaking proceeding, Commission adopted a rule (49 CFR 1307.27(k)) prohibiting tariffs of motor common carriers filed pursuant to §217 from containing any provisions which result in restricting service to less than carrier's full operating authority or which exceeds such authority, as public convenience and necessity require all carriers to maintain service coextensive with full scope of their authorities in order to provide a safe and adequate transportation system for property.—Restrictions on Service by Motor Common Carriers, 111 M.C.C. 151 (167-73).

On reconsideration the Commission determined that a 40,000 pound minimum weight provision in applicant's current tariff, not being related either to its existing authority or to that proposed, constituted a "service embargo" within the meaning of 111 MCC 151, notwithstanding the fact that applicant indicated that it was willing to handle its shipper's individual l.t.l. shipments but had never been tendered any. Applicant's receipt of authority was conditioned upon its taking whatever steps might be necessary to bring about compliance with respect to both its present and new tariffs. Applicant was granted a three year term certificate and required to file performance reports.—Midwestern Express, Inc., Extension—Paper Products, 114 M.C.C. 834 (838). [See also dissent]

3. Purpose.—[Vols. 10, 18].—That part of §217(a) reading "between points on its own route and points on the route of any other such carrier, or on the route of any common carrier by railroad *** when a through route and joint rate shall have been established" was not intended to be, and is not, a limitation upon the general permission which §216(c) grants to motor common carriers to establish through routes and joint rates with rail carriers. Instead, such language is a necessary adjunct to the statutory requirement that motor common carriers shall file tariffs showing their rates and charges between points on own routes, and but for the inclusion of that language in the statute tariffs providing for joint rates and through routes would not be required to be filed. Because it is not lawful for a motor common carrier individually to publish rates to or from points it is not authorized to serve, tariffs containing such rates must be predicated upon previously established through routes and joint rates.—Substituted Service—Piggyback, 322 I.C.C. 301 (344)*.

5. Duplicating or conflicting rates.—[Vols. 10-13, 19, 21].—Proposed rule under which carrier may for its convenience substitute vehicles not equipped with winches for line-haul transportation of oilfield commodities, and at its expense obtain a winch for loading and unloading, does not conflict with item governing pickup and delivery services by providing that loading and unloading are included in the line-haul rate even though another vehicle is used. Item referred to includes loading and unloading in the line-haul rate unless the commodity cannot be handled by a winch-equipped truck and its driver, and legally obligates carrier to render the loading and unloading service; proposed clarifying rule merely permits it to do so by obtaining outside equipment and absorbing cost therefor when its own winch equipment is not available. Similar practice in performance of this limited loading and unloading service has been followed for years by numerous carriers.—Loading, Unloading by Winch, Oil Field Haulers, U.S.A., 323 I.C.C. 359 (365).

6. Territory, routes, joints, "between", direction of movement, commodities.—[Vols. 11-16, 18, 19, 21].—Mere fact that plaintiff held a certificate authorizing operations (1) between certain New Jersey counties and parts of New York, including Peekskill, and (2) between the same New Jersey counties and parts of Connecticut, including Bridgeport, did not automatically entitle it to take advantage of increased rate filed with the Commission (by its rate publishing bureau) on shipments which, admittedly, it transported directly from Peekskill to Bridgeport. Plaintiff's certificate did not authorize direct operation between the named points and, lacking necessary authority, it was not operating legally when it performed the transportation. Therefore, the lower court properly ruled that plaintiff could not recover undercharges based on the published rate, since it was operating illegally, and granted judgment in favor of defendant; affirmed.—Mars Express, Inc. v. David Masnik, Inc., 401 F. 2d 891 (892-3, 894).

New order of the Commission requiring plaintiff to cancel proposed rates on single-unit mobile homes, on ground that its operating rights did not authorize transportation of mobile homes, is founded on substantial evidence of record. After the decision in 262 F. Supp. 1009, which set aside its earlier order requiring cancellation of those rates, the Commission held extensive further hearings which produced voluminous additional testimony and exhibits; and the prior three-judge court having left to the Commission any appropriate further action, that procedure was proper. A new record is now presented for judicial review; and, while testimony of expert and industry witnesses disagrees as to proper classification of the single-unit mobile home, there is substantial evidence to support the Commission's finding that there is a valid distinction between the terms "mobile home" and "prefabricated building" as used in commodity description of the authority granted. Commission order under review, sustained.—Pre-Fab Transit Co. v. United States, 321 F. Supp. 1147 (1149-50, 1152)*.

If examination of carrier's operating authority on whose behalf proposed new rates are published does not reveal an ambiguity when interpreted by the ordinary rules of grammar, the Commission will not go behind the certificate in search of extrinsic matters. Since the modifying heavy-hauling restriction follows the last antecedent "boats", and is not preceded by a comma, it applies solely to "boats". Therefore, opposition to the rates based solely on the ground that respondent's entire authority is subject to the heavy-hauling restriction is without merit.—Road Paving Materials Between Points in New England, 329 I.C.C. 199 (203-4)*.

10. Plain and definite statement required.—[Vols. 10-19, 21].—See also Frozen Foods—Southern, Middle Atl. & New England States case, §216(g), n. 26, supra.

Tariff provisions publishing weekly rates on gasoline and fuel oils, applicable on stated minimum gallonages tendered for transportation in round-the-clock movements over a period of 7 days, which apply on a composite tender of numerous prospective individual shipments, do not violate §217 because the freight charges cannot be determined until all shipments in a given week have been tendered. There is substantial compliance with §217 where carriers file schedules open for public inspection, showing all rates and charges for transportation they are authorized to perform. Shipper using the weekly rates is in position to know with reasonable certainty the quantity intended to be transported, prior to actual movement thereof; considered tariff provisions are reasonably clear and definite in every material respect.—Weekly Rates on Petroleum Products—from Sparks, Nev., 322 I.C.C. 541 (549, 550).

Proposed rule providing that carrier may at its convenience substitute vehicles not equipped with winches for line-haul transportation of oilfield commodities, and obtain at its expense a winch for loading or unloading, is ambiguous in being restricted not to apply if additional lift equipment as defined in item governing special services is required, since latter item defines "additional lift equipment" as that operated by a vehicle or power unit other than the transporting vehicle, thus per se rendering the proposed rule inapplicable in the very circumstances for which it is designed. Proposed rule should be reworded so as not to apply to shipments which, due to size or shape, cannot be unloaded by a winch-equipped truck and its driver but require additional lift equipment; and the special-services item should be amended to define "additional lift equipment" as that operated by a vehicle or power unit other than the transporting vehicle or the substituted winch-equipped vehicle provided for by the new rule.—Loading, Unloading by Winch, Oil Field Haulers, U.S.A., 323 I.C.C. 359 (365).

Respondent motor carriers' schedules which fail to state separately charges for all accessorial services or provide for inclusion of such services in their line-haul rates on commodities formerly exempt from regulation under §203(b)(6) are in violation of rule 11(a) of Tariff Circular MF No. 3. Respondents are hereby ordered to eliminate such violations.—Rates on Formerly Exempt Commodities, 329 I.C.C. 61 (71-2).

While the Commission's Tariff Circular No. 20 requires that tariffs shall be clear and explicit, complexity of itself does not necessarily render the tariff unlawful. Although complexity may tend to give rise to ambiguity, the two terms are not synonymous.—Stopping-in-Transit Rules & Charges Btw. Southern Terr., 329 I.C.C. 353 (360).

Proposed tariff provisions, placing liability for payment of charges resulting from detention of motor common carrier equipment, are in violation of §217 of the Act to the extent that such provisions contain the phrase "party causing the delay", or similar wording, which phrases are indefinite and unclear.—Payment for Detention Charges, Eastern Central Rates, 335 I.C.C. 537 (542)*.

20. Joint rates.—[Vols. 12, 14, 17, 19, 21].—See International Joint Rates and Through Routes case, §6(1), n. 81, supra.

Rules and Regulations

36. Truckloads; equipment; weight.—[Vols. 10, 12, 19].—Tariff provisions publishing weekly rates on gasoline and fuel oils, applicable on stated minimum gallonages tendered by shipper for transportation by one carrier in one unit of equipment in round-the-clock movements over a period of 7 days, based on mileage scales stated in cents per gallon and subject to a weekly minimum charge, do not violate prohibition of rule 4(a) of Tariff Circular MF-No. 3 against publication of rates for other than terminal services based solely on units of time. Considered rates are based on a combination of time, mileage, and volume, with the weekly minimum charge (which is necessary to justify economically the dedication of particular equipment for 7 days) to be applied on any total volume less than the lowest stated minimum gallonage.—Weekly Rates on Petroleum Products—from Sparks, Nev., 322 I.C.C. 541 (550).

As respondent's present tariff rules governing line-haul rates on oilfield commodities provide that they will include loading and unloading which can be performed with a winch, and contemplate use of a winch equipped truck and one driver, there is nothing objectionable in placing proposed rule, allowing carrier at its convenience to substitute vehicles not equipped with winches for the line-haul transportation and at its own expense to obtain a winch for loading and unloading, under the heading "Substitution of Equipment". The pickup and delivery provisions, which include loading and unloading, contain a reference to the substitution provisions and are not misleading in any way. Proposed item, amended as indicated for clarification, does not violate Tariff Circular MF No. 3.—Loading, Unloading by Winch, Oil Field Haulers, U.S.A., 323 I.C.C. 359 (361, 366).

Respondent motor carrier's proposal to change excess weight rules providing a charge on the overflow portion of t.l. shipments of commodities between indicated points now shown just and reasonable. Respondent's cost evidence was based on overflow portions only but respondent has the burden of proving whether charges on the entire shipment are compensatory and so has not sustained his statutory burden.—Capacity Load Provisions, Mid. Atl. & New Eng. States, 332 I.C.C. 428 (431).

39. Transit.—[Vols. 12, 13, 15, 18].—See Railroad Comm. of Texas v. Oil Field Haulers Assn. case, §203(a)(10), n. 5 *Between*, supra.

40. Containers; returned containers.—[Vols. 16, 18].—Furnishing by carriers of mobile storage bins at jobsites without specific tariff rule or charge therefor, was found to be in violation of §217. Cease and desist order issued.—Chemical Leaman, Matlack, and M & M.—Investigation, 118 M.C.C. 238 (246).

Charges other than Rates and Fares

66. Special services.—[Vols. 10, 11, 14, 17, 21].—Respondents' practice of furnishing more than one man to load and unload shipments without specific tariff authority or charge therefor violates §217 inasmuch as the statute requires publication of all rates and charges. Respondents' contention that such practices are within their managerial discretion is invalid as statutory duty supersedes the right to use managerial discretion.—Tennessee Carolina Transp., Inc.—Investigation, 337 I.C.C. 542 (549).

Tariffs of common carriers of household goods are hereby required separately to state each terminal or accessorial service to be rendered and the charge therefor. Containerization, packing, and unpacking services are to be considered as separate services and subject to separate charges. All such charges are to be established in compliance with regulations prescribed in the instant case. Tariffs shall state rates for transportation of household goods in amounts per hundred pounds only. Rates stated on any other basis shall be canceled and superseded by rates stated in this manner.—Practices of Motor Common Carriers of Household Goods, 111 M.C.C. 427 (459-60, 526)*.

See also Household Goods cases, §216(b), n. 735, supra.

Regulations of the Commission

34 FR 12343, July 26, 1969, Part 1037: Freight Rate Tariffs, Schedules, and Classifications of Motor Carriers, §1037.22 Application of regulations, revised, effective upon publication in the Federal Register.

34 FR 12593, Aug. 1, 1969, Part 1037: Freight Rate Tariffs, Schedules and Classifications of Motor Carriers, §1037.22 Application of regulations, effectiveness of order of July 15, 1969 (34 FR 12343), stayed pending further order of the Commission.

35 FR 4261, March 7, 1970, Part 1307: Freight Rate Tariffs, Schedules, and Classifications of Motor Carriers, Subpart B—Common Carrier Freight Tariffs and Classifications, §1037.27 Contents of tariffs, amended by adding new paragraph (k) *Operating authority*, effective Apr. 17, 1970.

35 FR 4553, Mar. 14, 1970, Part 1307: Freight Rate Tariffs, Schedules, and Classifications of Motor Carriers, Subpart C—Special Permissions, §1307.100 Motor common carriers of property; establishment of rates, etc., covering emergency movements of property, revised, effective on date of order.

35 FR 4754, Mar. 19, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, entire Part, §1056.1 - §1056.18, revised, effective May 1, 1970.

35 FR 5551, Apr. 3, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, miscellaneous corrections of revised regulations (35 FR 4754).

35 FR 7123, May 6, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.6 Determination of weights, new subparagraph (e) *Exception*, added, effective June 1, 1970.

35 FR 8282, May 27, 1970, Part 1307: Freight Rate Tariffs, Schedules, and Classifications of Motor Carriers, Subpart C—Special Permission, §1307.90 Suspension supplements and postponement notices, paragraph (f) amended, for purpose of changing the expiration date, effective on date of order.

35 FR 8736, June 5, 1970, Part 1307: Freight Rate Tariffs, Schedules, and Classifications of Motor Carriers, Subpart B—Common Carrier Freight Tariffs and Classifications, §1307.27 Contents of tariffs, * * * (k) *Operating authority*, (2) modified by substituting the date Sept. 1, 1970, in lieu of June 1, 1970, where it appears therein, effective on date of order.

35 FR 8890, June 9, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.1(c) and §1056.12(a) modified, effective June 1, 1970.

35 FR 15444, Oct. 3, 1970, Part 1307: Freight Rate Tariffs, Schedules, and Classifications of Motor Carriers, Subpart B—Common Carrier Freight Tariffs and Classifications, §1307.22 Application of regulations, revised (Ex Parte No. 261; Special Permission No. 70-275), effective Oct. 26, 1970.

35 FR 16935, Nov. 3, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.4 Accessorial or terminal services, etc., order of Dec. 5, 1969 (335 ICC 698), reinstated and modified so as to become effective Dec. 1, 1970.

35 FR 19077, Dec. 17, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.11 Vehicle-load manifest; information required, amended by addition of new paragraph (b)(13), effective November 1970 [sic].

36 FR 158, Jan. 6, 1971, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.4 Accessorial or terminal services, etc., order served on Oct. 29, 1970 (35 FR 16935), modified so as to become effective on Feb. 1, 1971.

36 FR 16228, Aug. 20, 1971: Special Permission No. 72-810, Fares, Charges, Etc.; Postponement of Effectiveness of Increases, Reestablishment of Lower Rates. Effective Aug. 16, 1971, rules of various Commission tariff circulars are waived to extent necessary to permit carriers to publish and file tariff supplements mandated by the Executive Order of Aug. 15, 1971, entitled Providing for Stabilization of Prices, Rents, Wages, and Salaries.

36 FR 16228, Aug. 20 1971: Suspension Docket No. 8664, Stabilization of Rates and Charges, August 1971. Operation of schedules of new increased rates, fares and charges, etc., filed to become effective Aug. 17, 1971, and later, which would be in violation of the Executive Order of Aug. 15, 1971, entitled Providing for Stabilization of Prices, Rents Wages, and Salaries, is suspended, effective Aug. 16, 1971.

36 FR 16975, Aug. 26, 1971: Suspension Docket No . 8664, Sub. No. 1, Stabilization of Rates and Charges, August 1971. Operation of schedules of new increased rates, fares and charges, etc., filed to become effective Aug. 24, 1971, and later, is suspended, effective Aug. 23, 1971.

36 FR 21358, Nov. 6, 1971, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.6 Determinations of weights, paragraphs (b) and (e) modified, effective 30 days after date of publication in Federal Register.

36 FR 21857, Nov. 16, 1971: Suspension Docket No. 8688, Stabilization of Rates and Charges. Operation of schedules publishing new increased rates, fares and charges, etc., which, if permitted to become effective, would result in rates and charges that would violate Executive Order No. 11627, dated Oct. 15, 1971 (except those currently under suspension and investigation), ordered suspended, and use thereof deferred, for indefinite period pending further Commission order.

36 FR 22300, Nov. 24, 1971, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program, §1311.0 - §1311.5, new Part 1311 added, effective day after date of publication in Federal Register.

36 FR 22341, Nov. 24, 1971: Suspension Docket No. 8688, Sub-No. 2, vacates indefinite suspension of operation of certain schedules, subject to conditions set forth, effective on date of order.

36 FR 22579, Nov. 25, 1971, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.6(d) and §1056.7, amended, effective Jan. 1, 1972.

36 FR 23108, Dec. 3, 1971: Suspension Doc. No. 8688 (Sub No. 1) Stabilization of Rates and Charges, certain schedules of increased rates suspended by order of Nov. 19, 1971.

36 FR 23108, Dec. 3, 1971: Suspension Doc. No. 8688 (Sub No. 3) Stabilization of Rates and Charges, certain schedules of increased rates suspended by order of Nov. 24, 1971.

37 FR 1107, Jan. 26, 1972, Part 1311: Special Procedures for Tariff Findings Under the Wage and Price Stabilization Program, special procedures prescribed by order of Nov. 19, 1971 (36 FR 22300), revised in order to conform to, and implement, §300.16 of the regulations of the Price Commission (37 FR 652), effective on date of order.

37 FR 3354, Feb. 15, 1972, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program; Price Commission having deferred until March 10, 1972, public utility rate increases proposed to become effective on or after Feb. 10, 1972, carriers are directed to defer indefinitely the effective dates of all increased rates, fares, charges, etc., proposed to become effective during the Price Commission deferral period, effective on date of order.

37 FR 6149, March 24, 1972, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program. Carriers authorized to cancel indefinite postponement of effective dates of proposed increased rates, fares, charges, etc., required by the order of Feb. 11, 1972, effective on date of order.

37 FR 7159, Apr. 11, 1972, Part 1056: Transportation of Household Goods in Interstate of Foreign Commerce, §1056.3 amended by adding paragraph (d), §1056.7 summary amended, and §1056.12(b) amended by adding a new last sentence, effective April 28, 1972.

37 FR 9398, May 10, 1972, Part 1306: Passenger and Express Tariffs and Schedules of Motor Carriers, §1306.17 Transmission of publications to subscribers, added, effective June 21, 1972.

37 FR 9399, May 10, 1972, Part 1307: Freight Tariffs, Schedules, and Classifications of Motor Carriers, §1307.14 Transmission of publications to subscribers, added effective June 21, 1972.

37 FR 12239, June 21, 1972, Parts 1036 and 1037: Order of May 1, 1972 (37 FR 9398) requiring transmission of tariffs and schedules to subscribers and other interested parties, stayed pending disposition of timely filed petitions for reconsideration, effective on date of order.

37 FR 12324, June 22, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.10 Receipt or bill of lading; information thereon, revised, and §1056.20 Responsibilities and liabilities of principal carriers, added, effective July 31, 1972.

37 FR 14589, July 21, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce; reservation of vehicle space by shippers. Proceeding reopened for further consideration of regulation prohibiting carriers from making estimates and/or charges based on vehicle space reservation, but solely with respect to shipments of the particular

type of articles defined in §1056.1(a)(2) and (3); orders of Feb. 28, 1971, and Apr. 27, 1971, remain in full force and effect as to all other shipments. Effective on date of order.

37 FR 15867, Aug. 5, 1972, Part 1131: Temporary Authority Applications Under Section 210a(a) of the Interstate Commerce Act, §1131.5 Rates, fares, charges, and special permission applications, revised, effective on date of publication in Federal Register.

37 FR 15868, Aug. 5, 1972, Part 1306: Passenger and Express Tariffs and Schedules of Motor Carriers, §1306.100 Motor common carriers of property or passengers; establishment of rates, etc., covering emergency transportation, added, effective Aug. 7, 1972.

37 FR 15868, Aug. 5, 1972, Part 1307: Freight Rate Tariffs, Schedules, and Classifications of Motor Carriers, §1307.100 Motor common carriers of property or passengers; establishment of rates, etc., covering emergency transportation, revised, effective Aug. 7, 1972.

37 FR 14308, July 19, 1972, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program, entire Part 1311 revised, effective on day following publication in the Federal Register.

37 FR 14308, July 19, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.19(a) corrected.

37 FR 17838, Sept. 1, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.9(c) *Waiver of order for service*, added, effective Oct. 5, 1972.

37 FR 18551, Sept. 13, 1972, Part 1306: Passenger and Express Tariffs and Schedules of Motor Carriers, §1306.17 Transmission of publications to subscribers, amended, effective 60 days after publication in Federal Register.

37 FR 18552, Sept. 13, 1972, Part 1306: Passenger and Express Tariffs and Schedules of Motor Carriers, §1306.17 Transmission of publications to subscribers, amended, effective 60 days after publication in Federal Register.

37 FR 25399, Nov. 30, 1972, Parts 1306 and 1307: Order of Aug. 28, 1972 establishing regulations for the transmission of tariff and schedule publications to subscribers and other interested parties, which had been stayed, made effective 30 days after publication of order in the Federal Register (11/30/72).

38 FR 2177, Jan. 22, 1973, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program. Pursuant to end of Phase II and Beginning of Phase III, mandatory application of regulations is suspended, effective Jan. 11, 1973, until further notice; but such regulations shall be construed as voluntary guidelines.

38 FR 3389, Feb. 6, 1973, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program, §1311.5 Standards applicable during Phase III of the wage and price stabilization program, adopted Jan. 30, 1973.

38 FR 6392, March 9, 1973, Part 1506: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.6(d) *Reweighing of shipment*, corrected by amending first sentence.

38 FR 10154, Apr. 25, 1973, Part 1307: Freight Rate Tariffs, Schedules, and Classifications of Motor Carriers, §1307.201 *Released rates on household goods* subdivision (c) amended, effective June 1, 1973.

38 FR 16231, June 21, 1973, Part 1300: Freight Tariffs, §1300.0(a) amended so as more clearly to indicate those carriers subject to regulations promulgated under Part 1300 of the CFR.

Section 217. (b) [*§317(b) U.S.C.*] Deviation from rates and regulations enumerated in tariff forbidden; undue preferences.—[Unchanged. See vol. 10, p. 8224, vol. 11, p. 9561.]

Notes of Decisions

Volume 10—p. 8224; Volume 11—p.9561; Volume 12—p. 10464; Volume 13—p. 11113; Volume 14—p. 11636; Volume 15—p. 12245; Volume 16—p. 12909; Volume 17—p. 13616; Volume 18—p. 14626; Volume 19—p. 15901; Volume 21—p. 17638.

5. Effect of tariff in force.——[Vols. 16-18, 21].—In action against the United States to recover charges allegedly due on LTL shipments of explosives, made under government bills of lading from California and Arizona origins to various points in eastern States, "destination" in Note 1 to minimum-charge rule in governing bureau tariff means the place designated for ultimate unloading of shipments, rather than destination of rates named in the tariff as defendant argues. Thus, under tariff rule provision for LTL or AQ rate on a 7,500-pound minimum, applicable rate on movements from origin points to Memphis, Tenn., should be based on the minimum charge for 7,500 pounds and not, as the government claims, for the Note 1 minimum of 1,000 pounds. Though Note 1 provided a 1,000-pound minimum for shipments that moved from origin to destination via any of the carriers listed therein and line-haul carriers to Memphis were so listed, since the shipments were not transported from origin to place of delivery specified on each bill of lading by such designated carriers, minimum charge provisions of Note 1 are not applicable.—McLean Trucking Co. v. United States, 387 F. 2d 657 (660-2)*; T.I.M.E. Freight, Inc. v. United States, 302 F. Supp. 573 (574-5).

Similarly, in another suit to recover charges allegedly due on government l.t.l. shipments of explosives from Mare Island, Calif., to Earle, N.J., "destination" in Note 1 to minimum-charge rule in governing Rocky Mountain Freight Bureau tariff means Earle, N.J., the ultimate point of unloading. However, although all carriers participating in the movements from Mare Island to Earle were listed in Note 1 (providing 1,000-pound minimum via carriers listed), that tariff published rates from Mare Island to Colts Neck, N.J., but not to Earle. Thus, since governing tariff was not applicable over entire route of movement, i.e., did not apply from Colts Neck to Earle, the 1,000-pound minimum charge provisions of Note 1 did not apply to any portion of such movement. Under tariff minimum-charge rule, therefore, charges based on the 7,500-pound minimum rate were proper for considered movements from Mare Island to Colts Neck.—Id., 302 F. Supp. 575 (577-8).

Principles Governing Tariff Interpretation

10. In general.—[Vols. 13, 15-19, 21].—Whenever possible, terms used in a tariff must be taken in the sense in which they are generally understood and accepted commercially. See 310 ICC 207. Evidence adduced on further hearing establishes that the steel industry generally regards the word "gauge" in terms of precisely defined thickness ranges which are widely known and accepted within the industry. Accordingly, complainant's steel switch boxes fall within the range of 14 gauge steel and qualify for the lower class ratings as sought.—Roach Appleton Manufacturing Co. v. Clemans Truck Line, 332 I.C.C. 547 (551-52)*.

Commission held that railroads may file joint rates for end-to-end motor rail service in transportation of commodities exempted from our economic regulation by §203(b)(6) of the Act, without filing special permission applications. However, motor carriers providing such substitute service must be named in the tariff, and to facilitate this requirement blanket permission is granted to railroads to add or delete motor carriers' names on one day's notice.—Substitution of Motor for Rail Serv. & Publ. of Rates, 341 I.C.C. 88 (99-102).

16. Entire tariff to be considered.—[Vols. 10, 12, 14-16, 19, 21].—In construing freight tariffs, a question of law is presented; and, in carrier's suit to recover charges allegedly due on government LTL shipments of explosives, such interpretation of governing tariff must give effect to all the pertinent provisions, and every word, clause, and sentence must be given effect and construed together. Thus, since governing tariff did not apply over entire route of movement of considered shipments from Mare Island, Calif., to Earle, N.J., because, while rates were named from Mare Island to Colts Neck, N.J., no rates were published therein to Earle, provisions of Note 1 to tariff minimum-charge rule (under which 1,000-pound minimum applied on shipments moved via carriers listed) did not apply to any portion of the movements from Mare Island to Earle even though all participating carriers were listed in that note. Pursuant to the tariff rule, charges for movements from origin to Colts Neck should be based on the minimum charge for 7,500 pounds at applicable LTL or AQ rate.—T.I.M.E. Freight, Inc. v. United States, 302 F. Supp. 575 (577-8).

Observance of Published Tariffs

30. Rates applicable to articles as commercially described.—[Vols. 12, 14-18, 21].—See Roach Appleton Manufacturing Co. v. Clemans Truck Line case, §217(b), n. 10, supra.

40. Departure from tariff rates unlawful.—[Vols. 10-12, 14, 15, 18, 19, 21].—The Motor Carrier Act, applicable in carrier's suit against shipper for (1) breach of haulage contract between them and (2) under doctrine of promissory estoppel, prohibits any deviation from rates published in tariffs of common carriers subject thereto and bars agreements by carriers or shippers that might lead to any kind of discrimination. Moreover, considered contract by shipper agreeing to designate the common carrier as its sole freight carrier was wholly lacking in consideration and, thus, unenforceable because, in any event, the holder of a common-carrier certificate is obligated to provide service to the public in accordance with its holding out. Therefore, even though plaintiff carrier leased additional equipment (under 4-year leases requiring minimum annual payments of $192,000) in reliance on defendant shipper's promise to use plaintiff as its sole carrier for anticipated increased volume of freight from its new plant at Wilmington, Del., that fact did not estop defendant from subsequently terminating its use of plaintiff's motor freight service.—Feraco, Inc. v. Georgia Pacific Corp., 313 F. Supp. 660 (661-3).

Although respondent's transportation of imported iron and steel articles from Wilmington, N.C., to interior North Carolina destinations is found to be a continuation of the movement in foreign commerce, respondent admits that it has been charging intrastate rates on such shipments. As the intrastate rates are in some instances lower, or due to tariff provisions result in lower charges, than the applicable interstate rates, in such instances respondent is transporting traffic at rates and charges other than those specified in tariffs on file with the Commission, in violation of §217(b). Cease-and-desist order entered.—Iron and Steel Articles, Wilmington to Points in N.C., 323 I.C.C. 740 (741, 744)*.

43. Interlining.—Motor common carriers of property are not now obligated but rather are permitted, under §216(c) of the Act, to establish through routes and joint rates with each other covering the provision of interline service. However, once such interline arrangements or concurrences are established and published in their tariffs pursuant to §217(a) of the Act, the concurring carriers are under a legal duty to provide the interline service described in their tariffs. A motor common carrier has the obligation to accept and transport all freight (including interline freight) tendered in accordance with the provisions of its published tariffs.—Braswell Motor Frt. Lines, Inc., Investigation, 118 M.C.C. 392 (411); this obligation has been characterized as an almost absolute duty, and, for the adequate protection of the public, motor common carriers of property are held strictly accountable for its performance. The observance of this duty is excused only if performance is prevented by such intervening occurrences as acts of God or the public enemy.—Id., p. 411.

48. Strict compliance with tariff rules.—[Vols. 10, 11, 15-18, 21].—On reconsideration, "route" in motor carrier stopoff rule provides, as here concerned, for stops for partial unloading at stopoff points which "are directly intermediate to the point of final destination via the route over which the rate to such final destination applies". The term "route" as used in the rule does not mean any route, but can only mean the actual route of movement. Stopoff service, by its very nature, must occur at a point on the route of movement, whether direct or indirect, between origin and final destination.—Tex.-Ariz. Motor Frt. and Phelps Dodge—Investigation, 326 I.C.C. 567 (568-9)*.

125. Routing and misrouting.—[Vols. 13, 14, 16-18].—On reconsideration, no specific carrier or routing, other than respondent, was designated by the shipper. The ten shipments involved were tendered by the shipper with request, in each insta [illegible] off service for partial unloading of freight at points in Texas. While a carrier may transfer portions of a shipment from one vehicle to another for its own operating convenience in providing partial unloading at points off the direct route from origin to destination which are local to its lines, that is not the situation here. The services performed were not stopoffs, but were actually interchanges for subsequent line-haul movements by other carriers to points which the respondent could not serve directly. Respondent therefore found to have misrouted, since the shipments were not routed via a route over which the rate to the final destination applied.—Tex.-Ariz. Motor Frt. and Phelps Dodge—Investigation, 326 I.C.C. 567 (568, 570-1)*.

175. Undercharges.—[Vols. 13, 14, 17, 21].—Common carrier, authorized to operate (1) between certain New Jersey counties and parts of New York, including Peekskill, and (2) between same New Jersey counties and parts of Connecticut, including Bridgeport, could not recover undercharges on basis of increased tariff rate on 290 shipments of liquor transported by it directly from Peekskill to Bridgeport when, since it had no authority to operate directly between those points, such carrier operations were illegal. While plaintiff was a common carrier within the Act, mere holding of a certificate does not automatically entitle it to the rate filed with the Commission; before such carrier may take advantage of its published rate, it must follow its authorized route; therefore, plaintiff cannot recover undercharges for illegal carriage off route. Lower cout's judgement for defendant, affirmed.—Mars Express, Inc. v. David Masnik, Inc., 401 F. 2d 891 (892-4).

No determination as to the amount of undercharges due petitioning carrier could be made as record contained insufficient detail concerning the nature of the individual shipments. Commission therefore listed the 7 possible kinds of shipments and the applicable charges for each.—Arkansas-Best Freight System, Inc. v. Quartet, 332 I.C.C. 877 (881-2).

176. Refund of overcharges.—[Vols. 17, 18].—Upon remand by district court, complainant manufacturer awarded refund of overcharges inasmuch as respondent carrier had incorrectly applied higher class ratings on shipments of steel switch boxes.—Roach Appleton Manufacturing Co. v. Clemans Truck Line, 332 I.C.C. 547 (552)*.

222. Carrier's duty to collect tariff charges.—[Vols. 14-17, 21].—In carrier's suit to recover unpaid freight charges from consignee of "prepaid" shipments, intent and meaning of the statute (imposing on carrier the right and duty to collect its full, published tariff charges) does not sustain plaintiff's claim that, under the Act, it has an absolute right and duty to collect—and consignee has an absolute duty to pay—all lawful charges which cannot be defeated by equitable principles, although it results in double payment by consignee. As the district court concluded, plaintiff was estopped from proceeding on those shipments when the delivery receipts showed consignor as the party to be billed, shipping documents indicated that full tariff charges were prepaid, and consignee, relying thereon, took delivery and paid consignor's invoices for the charges. Moreover, plaintiff contributed materially to its inability to recover payment from consignor by its unlawful and lax credit extensions to him, which also increased amount of the loss resulting from consignor's financial failure; thus, to permit recovery from consignee would only reward carrier for its unlawful and inequitable conduct. Judgment for defendant, affirmed.—Consolidated Freightways Corp. of Del. v. Admiral Corp., 442 F. 2d 56 (59-63).

238. Tariff minimum weights.—]Vols. 17, 18, 21].—Respondent motor carriers have duty to establish minimum weights reasonably related to density of commodity involved. Proposed overflow rule change not shown just and reasonable as low-density articles would be subjected to an additional charge not justified by cost evidence of respondent.—Capacity Load Provisions, Mid. Atl & New Eng. States, 332 I.C.C. 428 (430).

Regulations of the Commission

36 FR 23068, Dec. 3, 1971, Part 1271: Motor Carrier Passes, §1271.25 Carriers' pass rules, revised, effective on date of publication in Federal Register.

Section 217. (c), (d). [§*317(c),(d) U.S.C.*].—[Unchanged. See vol. 10, p. 8227-8.]

Notes of Decisions

§217(d): Volume 10—p. 8228; Volume 11—p. 9562; Volume 12—p. 10466; Volume 15—p. 12248; Volume 16—p. 12913; Volume 21—p. 17646.

Section 218. [§*318(a) U.S.C.*] Schedules of contract carriers by motor vehicle—(a) Establishment, filing, and publication of schedules and rules affecting rates; notice of and hearing on proposed changes; undue preferences. [Unchanged. See vol. 18, p. 14631.]

Notes of Decisions

Volume 10—p. 8230; Volume 11—p. 9564; Volume 12—p. 10466; Volume 13—p. 11115; Volume 14—p. 11639; Volume 15—p. 12248; Volume 16—p. 12914; Volume 17—p. 13621; Volume 18—p. 14633; Volume 19—p. 15904; Volume 21—p. 17646.

25. Schedules; publication; content.—[Vols. 11, 12, 15-19, 21].—While the Commission's Tariff Circular No. 20 requires that tariffs shall be clear and explicit, complexity of itself does not necessarily render the tariff unlawful. Although complexity may tend to give rise to ambiguity, the two terms are not synonymous.—Stopping-in-Transit Rules & Charges Btw Southern Terr., 329 I.C.C. 353 (360).

Regulations of the Commission

35 FR 4052, Mar. 4, 1970, Part 1307: Freight Rate Tariffs, Schedules, and Classifications of Motor Carriers, Subpart C—Special Permission, §1307.101 Motor contract carriers of property; establishment of actual or minimum rates, etc., covering emergency movements of property, revised, effective on date of order.

35 FR 8282, May 27, 1970, Part 1307: Freight Rate Tariffs, Schedules, and Classifications of Motor Carriers, Subpart C—Special Permission, §1307.90 Suspension supplements and postponement notices, paragraph (f) amended, for purpose of changing the expiration date, effective on date of order.

36 FR 16228, Special Permission No. 72-810, Fares, Charges, Etc.; Postponement of Effectiveness of Increases, Reestablishment of Lower Rates. Effective Aug. 16, 1971, rules of various Commission tariff circulars are waived to extent necessary to permit carriers to publish and file tariff supplements mandated by the Executive Order of Aug. 15, 1971, entitled Providing for Stabilization of Prices, Rents, Wages, and Salaries.

36 FR 16228, Aug. 20, 1971: Suspension Docket No. 8664, Stabilization of Rates and Charges, August 1971. Operation of schedules of new increased rates, fares and charges, etc., filed to become effective Aug. 17, 1971, and later which would be in violation of the Executive Order of Aug. 15, 1971, entitled Providing for Stabilization of Prices, Rents, Wages, and Salaries, is suspended, effective Aug. 16, 1971.

36 FR 16975, Aug. 26, 1971: Suspension Docket No. 8664, Sub. No. 1, Stabilization of Rates and Charges, August 1971. Operation of schedules of new increased rates, fares and charges, etc., filed to become effective Aug. 24, 1971, and later, is suspended, effective Aug. 23, 1971.

36 FR 22300, Nov. 24, 1971, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program, §1311.0 - §1311.5, new Part 1311 added, effective day after publication in Federal Register.

36 FR 22341, Nov. 24, 1971: Suspension Docket No. 8688, Sub-No. 1, vacates indefinite suspension of operation of certain schedules, subject to conditions set forth, effective on date of order.

36 FR 23108, Dec. 3, 1971: Suspension Doc. No. 8688 (Sub No. 1) Stabilization of Rates and Charges, certain schedules of increased rates suspended by order of Nov. 19. 1971.

36 FR 23108, Dec. 3, 1971: Suspension Doc. No. 8688 (Sub No. 3) Stabilization of Rates and Charges, certain schedules of increased rates suspended by order of Nov. 24, 1971.

37 FR 1107, Jan. 26, 1972, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program, special procedures prescribed by order of Nov. 19, 1971 (36 FR 22300), revised in order to conform to, and implement, §300.16 of the regulations of the Price Commission (37 FR 652), effective on date of order.

37 FR 3354, Feb 15, 1972, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program; Price Commission having deferred until March 10, 1972, public utility rate increases proposed to become effective on or after Feb. 10, 1972, carriers are directed to defer indefinitely the effective dates of all increased rates, fares, charges, etc., proposed to become effective during the Price Commission deferral period, effective on date of order.

37 FR 6149, March 24, 1972, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program. Carriers authorized to cancel indefinite postponement of effective dates of proposed increased rates, fares, charges, etc., required by the order of Feb. 11, 1972, effective on date of order.

37 FR 9398, May 10, 1972, Part 1306: Passenger and Express Tariffs and Schedules of Motor Carriers, §1306.17 Transmission of publications to subscribers, added, effective June 21, 1972.

37 FR 9399, May 10, 1972, Part 1307: Freight Tariffs, Schedules and Classifications of Motor Carriers, §1307.14 Transmission of publications to subscribers, added, effective June 21, 1972.

37 FR 15867, Aug. 5, 1972, Part 1131: Temporary Authority Applications Under Section 210a(a) of the Interstate Commerce Act, §1131.5 Rates, fares, charges, and special permission applications, revised, effective on date of publication in Federal Register.

37 FR 15869, Aug. 5, 1972, Part 1306: Passenger and Express Tariffs and Schedules of Motor Carriers, §1306.101 Motor contract carriers of property or passengers; establishment or rates, etc., covering emergency transportation, added, effective Aug. 7, 1972.

37 FR 15869, Aug. 5, 1972, Part 1307: Freight Rate Tariffs, Schedules, and Classifications of Motor Carriers, §1307.101 Motor contract carriers of property or passengers; establishment of actual or minimum rates, etc., covering emergency transportation, revised, effective Aug. 7, 1972.

37 FR 14308, July 19, 1972, Part 1311: Special Procedures for Tariff Filings Under the Wage and Stabilization Program, entire Part 1311 revised, effective on day following publication in the Federal Register.

37 FR 14308, July 19, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.19(a) corrected.

38 FR 2177, Jan. 22, 1973, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program. Pursuant to end of Phase II and beginning of Phase III, mandatory application of regulations is suspended, effective Jan. 11, 1973, until further notice; but such regulations shall be construed as voluntary guidelines.

38 FR 3389, Feb. 6, 1973, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program, §1311.5 Standards applicable during Phase III of the wage and price stabilization program, adopted Jan. 30, 1973.

Section 218. (b) [§*318(b) U.S.C.*] Complaints and investigations; hearings and orders of Commission. [Unchanged. See vol. 11, p. 9565.]

Historical note, see vol. 21, p. 17648.

Notes of Decisions

Volume 10—p. 8233; Volume 11—p. 9566; Volume 12—p. 10468; Volume 13—p. 11116; Volume 15—p. 12249; Volume 16—p. 12915; Volume 17—p. 13623; Volume 18—p. 14635; Volume 19—p. 15904; Volume 21—p. 17648.

25. What considered in determining reasonableness.—[Vols. 10-13, 15-19, 21].—Defendant contract carrier being a specialized carrier of salt, its system average costs are an acceptable measure of cost of considered service; and as defendant common carrier's costs for handling salt parallel those of the contract carrier, latter's latest system average costs of record fairly represent the cost to both of handling involved salt traffic.—Midwest Emery Freight System, Inc. v. Lee Bros., Inc., 322 I.C.C. 701 (703)*; but Rates & Practices Review Board acted properly within its discretion in not taking official notice of data not of record; the Commission is not required to, nor would it normally, consider data filed subsequent to submission of the evidence in a proceeding on a complaint against rates. Contention that the board gave inadequate consideration to operating statistics subsequently filed by the contract carrier in its quarterly report, rejected.—Id., pp. 703-4; and comparison of the assailed rates with higher rates of other carriers does not establish that they are unreasonably low when circumstances surrounding establishment of the compared rates are not shown.—Id., p. 704.

30. Minimum rates and charges.—[Vols. 10-13, 15-19, 21].—Evidence supports finding that the lowest t.l. revenue consistent with cost of transporting salt between considered points would be about $120. On that basis defendant's rates of 40 cents, minimum 30,000 pounds, and 38 cents, minimum 40,000 pounds, which yield at least that minimum revenue, are not shown to be unreasonable; but its rate of 50 cents, minimum 20,000 pounds, earns less than cost of handling the traffic and is therefore unreasonably low. While finding that a reasonable minimum rate for the future must yield not less than $120 a truckload will require defendant to publish a rate of 60 cents, minimum 20,000 pounds, or 8 cents higher than present rates of complainant and other carriers, lawfulness of the compared rates is not in issue.—Midwest Emery Freight System, Inc. v. Lee Bros., Inc., 322 I.C.C. 701 (704)*.

50. Charge not to result in undue advantage or preference.—[Vols. 10, 11, 16].—Carrier's furnishing of mobile storage bins at jobsite without published schedule provisions or charge therefor, found to be in violation of §218 of the Act. Cease and desist order issued.—Chemcal Leaman, Matlack, and M. & M.—Investigation, 118 M.C.C. 238 (246).

Section 218. (c) [§*318(c) U.S.C.*] New or reduced charges; hearings and orders of Commission; suspension. [Unchanged. See vol. 11, p. 9568.]

Notes of Decisions

Volume 11—p. 9569; Volume 12—p. 10471; Volume 13—p. 11116; Volume 15—p. 12249; Volume 16—p. 12917; Volume 17—p. 13624; Volume 18—p. 14638; Volume 19—p. 15905; Volume 21—p. 17649.

5. Burden of proof.—[Vols. 12, 13, 16-19, 21].—The burden of proving the justness and reasonableness of tariff proposals, and the charges thereunder where applicable, rests upon the proponents thereof.—Segregation of Freight, New Eng. & Mid. Atl. States, 340 I.C.C. 306 (318)*.

Section 219. [§*319 U.S.C.*] Application of section 20 (11) and (12) of this title to common carriers by motor vehicle.—[Unchanged. See vol. 11, p. 9570, vol. 12, p. 10472.]

Historical Note

The Commission notes that its recommendations (340 ICC 515, 577) that the Commission be given jurisdiction to adjudicate loss and damage claims on their merits, have not been accorded favorable action in Congress.—Annual Report, 1975, p. 42.

Notes of Decisions

Volume 10—p. 8237; Volume 11—p. 9570; Volume 13—p. 11117; Volume 14—p. 11640; Volume 15—p. 12250; Volume 16—p. 12917; Volume 17—p. 13624; Volume 18—p. 14640; Volume 19—p. 15907; Volume 21—p. 17650.

10. In general.—[Vols. 10, 11, 13, 14, 16-19].—Due to conflicts arising in the implementation of the regulation requiring that the release value be entered by the shipper signing the bill of lading, in his own handwriting [49 CFR 1307.201(c)], in relations between carriers and national account shippers of household goods, the regulation was amended to permit the shipper to instruct the carrier in writing regarding the released value of a shipment, and the carrier to incorporate the instructions by reference into the bill of lading.—Practices of Motor Common Carriers of Household Goods, 118 M.C.C. 35 (41).

15. Bills of Lading Act; bills; nature and function.—[Vols. 10, 14, 16-19, 21].—See also Dublin Co. v. Ryder Truck Lines, Inc. case, §1(6), n. 65 *Action*, supra.

Bill of lading provision, stating that where a trailer is spotted for loading by consignor, or unloading by consignee, 48 hours' free time will be in effect, was designed and intended to set a tariff rate for containers for trailers that are delayed over a 48-hour period for loading and unloading while in custody of the consignor, or consignee. Thus, contrary to plaintiff consignee's contention, that provision did not continue carrier's liability as such for a 48-hour period after notice of arrival and placement for delivery at destination. Therefore, it was not applicable so as to make defendant carrier liable for value of stereo sets which were stolen following delivery, and acceptance, of considered shipment at consignee's warehouse.—General Electric Co. v. Acme Fast Freight, Inc., 324 F. Supp. 1079 (1081, 1083)*.

20. Interest.—[Vol. 10].—In federal courts the rule is that the trial court, in the exercise of sound discretion, may include interest on unliquidated damages as an element of damages; also, courts have held that interest may be allowed as compensation for delay in paying the damages, under the Carmack Amendment, whether technical form of the suit is in contract or tort recovery. Therefore, where carrier disallowed shipper's written claim for loss and damages to goods shipped, and evidence shows that value of plaintiff's household goods damaged or lost by defendant carriers during transportation from New York to california was $17,857, plaintiff is found entitled to recover prejudgment interest on that amount at 7 percent per annum—the legal rate of interest in California for detention of money—from date complaint was filed until entry of judgment for plaintiff plus $3.42 per day thereafter until the $17,857 with said interest shall be paid.—Cutten v. Allied Van Lines, Inc., 349 F. Supp. 907 (911, 912-13).

30. Limitation of liability.—[Vols. 10, 11, 13, 14, 16-18, 21].—In mandamus action to restrain carrier, engaged in driving of privately owned cars together with owner's baggage and personal effects from one point to another, from limiting its common-carrier liability for loss and damage to goods, lower court erred in ruling that tariff containing a "benefit of insurance" clause violated §20(11) which also applies to motor carriers. No express prohibition in §20(11) precludes a tariff "benefit of insurance" clause; such clause presupposes carrier's liablitiy for the full loss in conformity therewith, and is not an exemption from liability; however, carrier is permitted to recover from owner of the car the proceeds of insurance paid to him. There is no requirement that all shippers carry insurance protecting the carrier; and in event of a loss, carrier reimburses the owner for that part of his automobile insurance premium attributed to its custody of the car, and carrier bears the total loss. Therefore, there is no limitation of carrier's liability in violation of the statute.—United States v. Auto Driveaway Co., 464 F. 2d 1380 (1382-3).

32. Released rates and ratings, generally.—[Vols. 14, 16-19, 21].—See also Sun Insurance Office, Ltd. v. Greyhound Van Lines, Inc. case, §219, n. 115, infra.

Existing released-rates orders providing for a released valuation of 30 cents per pound do not afford reasonable protection in view of increased value of household goods since that figure was prescribed; present "full liability" released-rates order used by some carriers and provision of cargo insurance by others, resulting in carrier or insurer assuming liability only for that portion of actual loss or damage represented by the relation of the released value to the actual value of the goods, is inequitable, and resultant co-responsibility feature has caused many complaints by confused shippers who supposed they had protected themselves for any loss up to the amount of value for which they paid a valuation or insurance charge. One released-rates order should be substituted for the four present orders, so that every carrier will be on same basis, carrier representatives can more easily understand the order and explain its application to the public, and the public will not be confused by the different bases of liablitity offered by several carriers. —Practices of Motor Common Carriers of Household Goods, 96 M.C.C. 196 (196-7)*.

Any released-rates order designed for shippers dealing with the moving indurstry should be as fair and as simple as possible. Order proposed by one carrier, providing for basic minimum liability of 60 cents per pound per article, with full liability up to $10,000 per shipment at an additional charge of 50 cents per hundred pounds, or for higher valued shipments an additional charge of $5 per 1,000 of valuation in excess of the first $10,000, satisfies those requirements to a large extent. Use of weight as basis for the additional charge is clearly fair, and 50 cents per hundredweight is the best available estimate of carrier's risk, using weight in place of value. However, resulting double charge for any risk above $10,000 is unwarranted. To be fair to carriers, they should be apprised of valuable shipments, but there is no reason why their risk should be limited if they are willing to accept the revenue from transportation of a valuable shipment and the additional charge for full value protection. If shippers are required only to declare—and be held to—their estimated value of any shipment thought to be worth more than $10,000, carriers will be forewarned of unusual risks where sheer size of the shipment fails to account for the higher declared value.—Id., pp. 198-9.

To eliminate possibility of a double charge, carrier proposes that the 50-cent additional charge for full protection be subject to a maximum of $50, retaining the excess-value charge of $5 per $1,000. As thus modified, carrier's proposal contains the desired elements of simplicity, full liability when desired by shipper, and fair overall compensation to carriers for risks they are required to assume, and should be adopted. Full protection is automatically given the great majority of household goods shippers desiring it, whether or not they can accurately estimate the total weight and value of their belongings, and such protection will readily apply to goods worth both somewhat more and somewhat less than current average value of $1 per pound. Order adopted will continue to provide for shippers wanting only minimum protection at the lowest rate, as well as for those at the other extreme. Provision of a further charge based on values above $10,000 will in most instances reasonably compensate carriers for the additional risk, and while it will not compensate for risks on high-value shipments of extremely light weight, such shipments are comparatively rare; order adopted represents the best choice available.—Id., pp. 199-200.

If a carrier does not care to face the risk of transporting high-value, light-weight shipments at the released rates, it can operate without them under the centuries-old liability of common carriers, publishing rates which cover the risk, with additional insurance to protect itself from the consequences. Or it can operate under the new order and obtain additional released-rates orders for the specific types of light-weight shipments that it handles commercially.—Id., p. 200; and while it is possible that a small carrier might be ruined by large claims under the order adopted, such a carrier would be equally harmed by the same claim under any full liability provision. Responsibility for one's actions has long been a part of common carriage, and those who cannot afford a large claim will need to insure against it; but this is a carrier's, not a shipper's responsibility.—Id., p. 200.

Liability of Carriers

33. Liability, generally.—[Vols. 17-19, 21].—In forwarder's suit to recover from motor carrier the amount plaintiff was required to pay consignee for in-transit damage to one unit of printing press—that was turned over to it for shipment, transported by rail and motor carriers, and found to be damaged upon delivery by defendant—plaintiff's motion for a new trial on ground that jury's finding in favor of defendant was against weight of the evidence, denied. Testimony of defendant's officer that, while he saw torn canvas covers on some trailers, he did not note the damage on receipt, that he signed when he picked up the shipment (in six sealed "piggybacked" trailers) at railroad freight yard because he did not think that the contents were his responsibility, and that he did not hit or scrape the trailers against any object while delivering them to consignee, was for the jury to weigh along with all other evidence. Inasmuch as the jury may have believed that the damage occurred before shipment came into defendant's possession, and accepted officer's explanation of why the receipt contained no notation of damage, the court will not upset the jury's verdict for defendant.—International forwarding Co. v. Bison Freightways, Inc., 316 F. Supp. 464 (466-7).

In addition, plaintiff argues that jury's verdict resulted from an unauthorized visit by two jurors to highway underpass on route over which defendant moved the trailers to consignee, and was influenced by their report to the other jurors that the load could not have hit or scraped the underpass; however, while the allegations are supported by affidavit of its counsel that two jurors gave him such information after the trial, plaintiff's motion for an inquiry into misconduct of the jury is also denied. Testimony of jurors will not be received to impeach their own verdict unless it relates to extraneous influences brought to bear upon them; and an unauthorized visit is not an extraneous influence. Moreover, testimony of motor carrier's officer, alone, was sufficient to justify the jury's verdict that defendant was not liable for in-transit damage that was found upon delivery of the shipment.—Id., p. 467.

Defendant carrier has no liability, in consignee's suit to recover value of stereo sets which were stolen, where carrier's contract transfer company delivered its trailer (transported by rail piggyback service) to consignee's warehouse with cargo intact, transfer company and consignee's agents broke the seal and opened trailer doors, backed trailer up flush against a bay and overhead doors at the warehouse (barring access from outside) on Friday so that stereos could be unloaded by consignee on Monday, and arrangements were made for return of the trailer after unloading. Though the transfer company did not obtain a delivery receipt from consignee, stipulated facts of record clearly show that consignee accepted, and exercised dominion over, the trailer when it was delivered and left on its premises; therefore, the loss from theft which occurred over the weekend must be borne solely by consignee because it had accepted delivery of the shipment.—General Electric Co. v. Acme Fast Freight, Inc., 324 F. Supp. 1079 (1083-4)*.

Conduct of local agent for interstate household-goods carrier in holding itself out to the general public, including plaintiff, as being engaged in interstate transportation of property for compensation brought it within definition of an interstate common carrier by motor vehicle, and, as such carrier, it became liable for loss of or damage to an interstate motor carrier from the time it accepted plaintiff's order to ship her household goods, then stored in its New York warehouse, to her California residence. Also, issuance of the bill of lading by defendant carrier through its issuing local agent imposed on the carrier liability to plaintiff as lawful holder thereof for any loss of or damage to plaintiff's household goods while in interstate transit. Therefore, since interstate carrier and its local agent acted jointly for their mutual benefit in movement of plaintiff's household goods from New York to California, they both became jointly and severably liable to plaintiff for damages and losses during transportation.—Cutten v. Allied Van Lines, Inc., 349 F. Supp. 907 (911, 912).

In view of numerous instances of poor handling of loss and damage claims by common carriers of household goods, a new rule, §176.14, was added to the Commission's household goods regulations in the prior report, 95 MCC 138; that rule was intended to assure prompt acknowledgment, adequate record, and diligence in carriers' processing of such claims. On further consideration, and in view of concurrent revision of Released Rates Order No. MC-505, regulation pertaining to loss and damage claims is revised to require that the carrier, at expiration of 120 days and at expiration of each succeeding 30-day period while the claim remains pending, must advise claimant *in writing* of status of its claim and reasons for delay in disposition thereof, and send a copy of such letter to the Commission's District Supervisor for the area in which carrier has its principal place of business.—Practices of Motor Common Carriers of Household Goods, 96 M.C.C. 196 (201, 219)*.

No language releasing common carriers of household goods from liability for loss or damage of such shipments may be contained in the delivery receipt. Commission herein prescribed regulations for the handling of claims for loss or damage including a periodic report which notifies the Commission of the status of all such pending claims and the reasons for delays in processing such claims.—Practices of Motor Common Carriers of Household Goods, 111 M.C.C. 427 (478-9)*.

115. Actions to enforce liability.—[Vols. 14-19, 21].—See also General Electric Co. v. Acme Fast Freight, Inc. case, §219, n. 33, supra.

In light of factual findings in shipper's action against motor carrier, which sought damages for destruction by fire of plaintiff's household goods while being transported by defendant, that (1) shipper was not given a copy of the written cost estimate and the notice required by the Commission to be furnished all household goods shippers, (2) carrier's agent did not give her adequate advice concerning her opportunity to choose a valuation for the goods that would represent a limit of carrier's liability, and had assured her that suggested rate would afford sufficient insurance coverage, which she understood to be protection supplemental to carrier's liability for loss and damage, and (3) that carrier had typed in valuation figure on the bill of lading, the lower court properly held that shipper was not bound by the bill-of-lading valuation because the carrier had not complied with requirements of the statute and the applicable Commission regulations.—Brannon v. Smith Dray Line & Storage Co., 456 F. 2d 260 (261).

Furthermore, when record showed that agent of defendant's insurance company who obtained shipper's signature on the proof-of-loss form and release after the fire knew that shipper disputed the valuation he placed on the goods and told her that the release would not affect her claim against the carrier, shipper was not bound by the insurance company's release that she signed because of the agent's misrepresentation of its purpose and, also, because of shipper's lack of intent to surrender her claim against the carrier for entire value of the household goods shipped. Lower court's judgment in favor of plaintiff, affirmed.—Id., pp. 261-2.

In shipper's action against motor carrier for damages arising from loss of four shipments of clothing (which carrier accepted, issued covering bills of lading to plaintiff, and subsequently failed to deliver) plaintiff's motion for summary judgment, pursuant to Rule 56 of Federal Rules of Civil Procedure, is granted as to the issue of defendant's liability. Affidavits and other documents submitted by plaintiff, in support of its motion, substantiate the material facts underlying the complaint which defendant denied in its answer and defendant has neither presented any form of denial of those facts other than the general denials in its pleadings, nor shown by affidavit (authorized by Rule 56 (f)) that it is unable to present facts upon which it bases opposition to the motion; therefore, there being no dispute as to facts establishing carrier's liability, summary judgment on that issue is appropriate.—H. Daroff & Sons, Inc. v. Strickland Transportation Co., 284 F. Supp. 510 (511-13).

As to the proper measure of damages, however, the parties disagree; plaintiff claims the sum of the invoice values of the shipments, whereas defendant argues that plaintiff is not entitled to recover that part of invoice value representing its admitted profit. Courts have held generally that shipper is entitled to market value of the goods at destination at the time delivery should have been made; also, contract price may be used to determine the market price and, in instant circumstances, is the best standard for assessing plaintiff's damages. However, there is authority for limiting shipper's damages to costs of manufacture when he has replaced, or can replace, the lost goods and thus retain his profit on the shipment; and defendant has a right to establish the fact that replacement was feasible and, therefore, plaintiff's recovery should be limited to its costs of manufacture. In order to permit filing of affidavits indicating existence or absence of dispute as to facts material to the issue of damages, decision on plaintiff's motion for summary judgment on that issue is stayed for 30 days.—Id., pp. 513-4.

In shipper's action to recover for damages to shipment of electronic equipment which occurred in transit, defendant's liability is governed by provisions of standard household goods bill of lading limiting carrier's liability, where shipper declares a value on entire shipment less than full actual value thereof, to amount of actual loss or damage, not exceeding 30 cents per pound of gross weight for each shipping package or loose, unpackaged article. Shipper's agent declared in writing on the bill of lading a lump-sum value of $40,000 on entire 25,600-pound shipment which had an actual value of $160,000; and 16 of the 68 shipping packages and loose articles (combined gross weight of 8,920 pounds) were damaged and were returned to shipper by carrier. Therefore, carrier's liability is determined by multiplying total gross weight of the shipping packages and loose, unpackaged articles that were actually damaged by 30 cents, rather than by multiplying total weight of all packages and unpackaged articles in the shipment by 30 cents. Judgment accordingly. Sun Insurance Office, Ltd. v. Greyhound Van Lines, Inc., 289 F. Supp. 483 (485-7).

In suit against interstate carrier and its local agent for loss and damage to household goods shipment, plaintiff made a prima facie case by showing delivery of her household goods to carrier in good condition, arrival of some items in damaged condition and non-arrival of others, and the amount of damage including value of items not delivered; then, burden of proof was on each defendant to show both that it was not negli-

gent and that the damage was due to one of the excepted causes relieving carrier from liability. Carrier's issuance of the bill of lading without a note thereon of visible damages or defects in household goods items as to which loss or damage is claimed creates a presumption or prima facie case of good condition when received for shipment; carrier and its local agent acted jointly in interstate transportation of the shipment; thus, both are jointly and severally liable to shipper for damages and losses in transit. Plaintiff found entitled to recover from defendants, individually and jointly, amount of damages shown together with interest thereon at 7 percent from date complaint was filed until date of payment; plus court costs.—Cutten v. Allied Van Lines, Inc., 349 F. Supp. 907 (912-13).

Regulations of the Commission

34 FR 206, Jan. 7, 1969, Part 1307: Freight Rate Tariffs; Schedules and Classification of Motor Carriers, Subpart D—Released Rates, §1307.201 Released rates on household goods. Paragraph (a) Establishment authorized; rate bases, amended, effective Dec. 31, 1968.

35 FR 183, Jan. 6, 1970, Part 1307: Freight Rate Tariffs; Schedules, and Classification of Motor Carriers, Subpart D—Released Rates, §1307.201 Released rates on household goods. Paragraph (a) Establishment authorized; rate bases, further amended, effective Dec. 31, 1969.

35 FR 4754, Mar. 19, 1970 Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, entire Part, §1056.1-§1056.18, revised, effective May 1, 1970.

35 FR 5551, Apr. 3, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, miscellaneous corrections of revised regulations (35 FR 4754).

35 FR 7123, May 6, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.6 Determination of weights, new subparagraph (e) *Exception*, added, effective June 1, 1970.

35 FR 8890, June 9, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.1(c) and §1056.12 (a) modified, effective June 1, 1970.

35 FR 16935, Nov. 3, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.4 Accessorial or terminal services, etc., order of Dec. 5, 1969 (335 ICC 698), reinstated and modified so as to become effective Dec. 1, 1970.

35 FR 19077, Dec. 17, 1970, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.11 Vehicle-load manifest; information required, amended by addition of new paragraph (b)(13), effective November 1970 [sic].

36 FR 158, Jan. 6, 1971, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.4 Accessorial or terminal services, etc., order served Oct. 29, 1970 (35 FR 16935), modified so as to become effective on Feb. 1, 1971.

36 FR 21358, Nov. 6, 1971, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.6 Determinations of weights, paragraphs (b) and (e) modified, effective 30 days after date of publication in Federal Register.

36 FR 22579, Nov. 25 1971, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.6(d) and §1056.7 amended, effective Jan. 1, 1972.

37 FR 4257, March 1, 1972, Part 1005: Principles and Practices for the Investigation and Voluntary Disposition of Loss and Damage Claims and Processing Salvage, new Part 1005, §§1005.1-1005.6, added to become effective April 20, 1972.

37 FR 7159, Apr. 11, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.3 amended by adding paragraph (d), §1056.7 summary amended, and §1056.12(b) amended by adding a new last sentence, effective April 28, 1972.

37 FR 9027, May 4, 1972, Part 1005: Principles and Practices for the Investigation and Voluntary Disposition of Loss and Damage Claims and Processing Salvage, effective date of prescribed regulations postponed until July 1, 1972, effective on date of order.

37 FR 12324, June 22, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.10 Receipt or bill or lading; information thereon, revised, and §1056.20 Responsibilities and liabilities of principal carriers, added, effective July 31, 1972.

37 FR 14308, July 19, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.19(a) corrected.

37 FR 14589, July 21, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce; reservation of "hicle space by shippers. Proceeding reopened for further consideration against carriers' making estimates and/or charges based on vehicle space reservation, but solely with respect to shipments of the particular type of articles defined in §1056.1(a)(2) and (3); orders of Feb. 28, 1971, and Apr. 27, 1971, remain in full force and effect as to all other shipments. Effective on date of order.

37 FR 17712, Aug. 31, 1972, Part 1064: Notice of and Procedures for Baggage Excess Value Declaration, new Part 1064 added, effective Sept. 1, 1972.

37 FR 17712, Aug. 31, 1972, Part 1064: Effective date of order prescribing regulations in new Part 1064 postponed until Dec. 20, 1972.

37 FR 17838, Sept. 1, 1972, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.9(c) *Waiver of order for service*, added, effective Oct. 5, 1972.

37 FR 20943, Oct. 5, 1972, Part 1005: Principles and Practices for the Investigation and Voluntary Disposition of Loss and Damage Claims and Processing Salvage, §1005.3(b) and §1005.4(c) modified, effective Oct. 16, 1972.

37 FR 23908, Nov. 10, 1972, Part 1005: Principles and Practices for the Investigation and Voluntary Disposition of Loss and Damage Claims and Processing Salvage, second paragraph of §1005.3 and §1005.4(c) revised, effective Oct. 16, 1972.

37 FR 28425, Dec. 23, 1972, Part 1064: Notice of and Procedures for Baggage Excess Value Declaration, effective date of order of July 11, 1972 (115 MCC 566) promulgating regulations is postponed to a date to be subsequently fixed, effective on date of order.

38 FR 6392, March 9, 1973, Part 1056: Transportation of Household Goods in Interstate or Foreign Commerce, §1056.6(d) *Reweighing of shipment*, corrected by amending first sentence.

Section 220. [§*320(a) U.S.C.*] Accounts, records and reports.—(a) Reports to Commission; copies of contracts; publication of information.—[Unchanged. See vol. 11, p. 9571, vol. 15, p. 12250.]

Historical notes, vol. 12, p. 10330, vol. 13, p. 11032, vol. 14, p. 11543; vol. 19, p. 15909; vol. 21, p. 17656.

Notes of Decisions

Vol. 12—p. 10472; Vol. 14—p. 11641; Vol. 15—p. 12251; Vol. 16—p. 12919; Vol. 17—p. 13626; Vol. 18—p. 14644; Vol. 21—p. 17657.

5. In general.—[Vols. 12, 14-18, 21].—See also Loss and Damage Claims case, §6(5), n. 2; Refiners Transport & Term. Corp.—Purchase—Mitchell case, §5(3), n. 10; Transportation of Explosives—Private Motor Carriers case, §204(a)(3), n. 1, supra.

To dispense with reporting requrements prescribed in 329 ICC 376 relative to private carriage of explosives would defeat one of the basic reasons for the rule, i.e., to keep reasonably current a list of private carriers engaged in such transportation, as well as to provide the basic information that the rule requires as to accidents occurring among such carriers.—Transportation of Explosives—Private Motor Carriers, 329 ICC 411 (413).

Under §220, Commission may require any motor carrier to file a copy of any contract, agreement, or arrangement between such carrier and any other carrier or person relating to any traffic, except that the Commission may not make public any contract, agreement, or arrangement between a motor contract carrier and a shipper. Commission's authority sufficiently encompasses reporting requirements at issue herein.—Annual Reports of Motor Carriers of Property, 335 I.C.C. 707 (711); proposed revisions of class I and class II motor common carriers annual reports requiring additional information, specified herein, as to transactions between carriers and their affiliates are approved as modified. These data are essential to Commission's evaluation of revised rates, fares, and charges of such carriers pursuant to §§216(g) and 216(i)—Id., pp. 711-2.

Commission hereby required that common carriers of household goods make and keep a vehicle-load manifest reflecting the weights and the sequential relationship of the several shipments. Commission also stated the information required to be entered on such manifests in regulations prescribed in 49 CFR 1056.11—Practices of Motor Common Carriers of Household Goods, 111 M.C.C. 427 (446-7)*.

Regulations adopted prohibiting estimates and charges based on reservation of a portion of the space of a vehicle in the transportation of household goods. Quarterly reports required to be filed with the Commission of all the instances where a carrier has participated in the transportation of split shipments of household goods weighing less than 10,000 pounds because these regulations prescribed might be utilized by the carriers to justify an increase in the number of split shipments and, as a result, there might be some deterioration in the quality of service provided.—Practices of Motor Common Carriers of Household Goods, 115, M.C.C. 49 (66).

15. Performance report.—See also Carolina Freight Carriers Corp. v. United States case, §207(a), n. 9, supra.

There is a growing number of cases where shippers, who have satisfactory service to some but not all of the points to which they ship, in order to obtain a satisfactory service on all of their small-shipment traffic, have found it necessary to support an entirely new operation which covers not only the area that lacks adequate service but also the areas that are served satisfactorily. However, a shipper's expressed requirement for a "complete" service to several destination points should not be allowed to become a "gimmick" whereby a "preferred" applicant may obtain authority merely by naming some destination points which cannot be served adequately by existing carriers. Therefore, only if some procedure for obtaining data relative to actual operations following issuance of the certificate is established, can the Commission be satisfied that its established policy against imposition of administratively undersirable restrictions in certificates requires no change.—Bilyeu Refrigerated Transp. Corp. Extension, 106 M.C.C. 692 (694-5).

In this light, after considering various alternatives, including issuance of limited-term certificates, it is not unreasonable to require the applicant, who has been successful in obtaining authority on the basis of its proposal for a shipper-tailored pickup and delivery service, to report to the Commission in an annual "Performance Report" its success in meeting the shipper's requirements. Each "Performance Report" should include sufficient and pertinent information concerning applicant's multiple delivery shipments and its actual performance under each certificate granted in this proceeding; and to give applicant sufficient opportunity to establish and develop the service contemplated, a reasonable reporting period would be 3 years. Certificates granted accordingly.—Id., p. 695.

Applicant is hereby required to file an annual "Performance Report" with Commission's Bureau of Economics at the close of each full year of the three years to which the certificate issued herein is limited. Such report is to include all information as detailed herein.—Texas-Oklahoma Express, Inc., Ext.—Oklahoma Points, 110 M.C.C. 769 (784-5).

Since supporting shippers and receivers have shown a need for the proposed service to transport general commodities, with usual exceptions, between Pittsburgh, Pa., specified Ohio points, and Louisville, Ky., on the one hand, and, on the other, Columbus, Ga., and the fact that many carriers on receiving authority on the basis of a proposed "small shipments" problem have followed the example of existing carriers and concentrated their efforts on the most profitable volume traffic moving between principal points, a 3-year term certificate was issued conditioned upon carrier filing a performance report at the end of 2 full years.—Transamerican Freight Lines, Inc., Extension, 115 M.C.C. 416 (428).

Since shippers and receivers of general commodities, with exceptions, between Portland, Oreg., and Seattle, Wash., have shown that the existing joint-line service is not meeting their reasonalble transportation requirements such as consistent overnight service, scheduled pickup, available specific types of equipment and a carrier willing to handle the traffic. The Commission should be provided with sufficient and pertinent data to permit a determination as to the extent to which applicant's actual performance measures up to the operation proposed and shown to be needed by the shipping public. Applicant granted a 3-year term certificate with a condition that it file an annual Performance Report at the end of each of the first 2 years after the date of issuance of the certificate.—Trans West. Exp., Inc., Ext.—Seattle-Portland, 118 M.C.C. 1 (12).

Regulations of the Commission

34 FR 1442, Jan. 30, 1969, Part 1249: Reports of Motor Carriers, §1249.5, §1249.6, and §1249.11 amended, effective Jan. 30. 1969

35 FR 3900, Feb. 28, 1970, Part 1249: Reports of Motor Carriers, §1249.1 Annual reports of Class I carriers of property, and §1249.2 Annual reports of Class II carriers of property, revised, effective with reports for year ending Dec. 31, 1969.

36 FR 14384, Aug. 5, 1971, Part 1249: Reports of Motor Carriers, new §1249.15 Quarterly report of freight loss and damage claims, added, effective with reports for the quarter beginning Oct. 1, 1971.

37 FR 7328, Apr. 13, 1972, Part 1252: Piggyback Traffic Statistics, §1252.1 Rail carriers, Form PTR-R (Rev), and §1252.2 Motor carriers, Form PTR-M (Rev), prescribed for quarterly reports beginning with July 1, 1972.

37 FR 20944, Oct. 5, 1972, Part 1249: Reports of Motor Carriers, §1249.15 Quarterly reports of Freight loss and damage claims, revised, effective Nov. 13, 1972.

38 FR 3602, Feb. 8, 1973, Part 1249: Reports of Motor Carriers, §1249.3 Motor carrier holding companies, revised to read as set forth, effective on date of order.

Section 220. (b) [§*320(b) U.S.C.*] Period covered by report; time of filing; oath.—Said annual reports shall contain all the required information either (1) for the period of twelve months ending on the thirty-first day of December in each year, unless the Commission shall specify a different date; or (2) for a thirteen-period accounting year ending at the close of one of the last seven days of each calendar year, if the person making the report keeps his books on the basis of such an accounting year, and elects to make such report on the basis of such accounting year, subject to such rules and regulations as the Commission may prescribe. Any annual report shall be made out under oath and filed with the Commission at its office in Washington within three months after the close of the year for which the report is made, unless additional time be granted in any case by the commission. Such periodical or special reports as may be required by the Commission under subsection (a) hereof shall also be under oath,. whenever the Commission so requires. (Sept. 18, 1940, c. 722, §24, 54 Stat. 927; July 7, 1972, Public Law 92-338, 86 Stat. 423.) (See vol. 11, p. 9572.)

Historical note, vol. 21, p. 17658.

Section 220. (c) [*§320(c) U.S.C.*] Depreciation charges.—[Unchanged. See vol. 11, p. 9572.]

Notes of Decisions

Volume 15—p. 12251; Volume 19—p. 15910.

Section 220. (d) [§*320(d) U.S.C.*] Accounts, records, etc., form; period of preservation; access to by commission or agents.—[Unchanged. See vol. 11, p. 9573, vol. 15, p. 12251.]

Notes of Decisions

Volume 11—p. 9574; Volume 13—p. 11118; Volume 17—p. 13627; Volume 19—p. 15911; Volume 21—p. 17659.

1. Constitutionality.—[Vols. 11, 19, 21].—. It is well established that a person making an equipment inspection should not be in any material way connected with, or owe allegiance to, the owner of the equipment. In this regard, Administrative Ruling No.

106 (Jan. 22, 1958, Question 16), states that "the person making the inspection must make it as a representative of the carrier under whose rights the transportation will be performed, and the carrier may not employ as its representative a person who has an adverse interest, such as the driver or an employee of the owner." See also 74 MCC 167 (173), and 77 MCC 501 (508).—Diamond Transp. System, Ext.—Wis. and Okla. Origin, 117 M.C.C. 706 (712).

Regulations of the Commission

34 FR 1441, Jan. 30, 1969, Part 1206: Common and Contract Motor Carriers of Passengers, paragraph (a) of Instruction 2—1 Classifications of carriers, amended, effective Jan. 1, 1969.

34 FR 1442, Jan. 30 1969, Part 1240: Classes of Carriers, §1240.4 Classification of motor carriers of passengers, amended, effective Jan. 1, 1969.

34 FR 3568, Feb. 27, 1969: Record Retention Guide, XXIV Interstate Commerce Commission [Revised] 1.9 Motor Carriers and brokers, 49, CFR Part 1226.

35 FR 3620, Feb. 21, 1970: Record Retention Guide, XXIV Interstate Commerce Commission; 1.9 Motor carriers and brokers, 49 CFR Part 1226.

36 FR 3772, Feb. 26, 1971: Record Retention Guide, XXIV Interstate Commerce Commission; 1.9 Motor carriers and brokers, 49 CFR Part 1226.

37 FR 4671, March 3, 1972: Record Retention Guide, XXX Interstate Commerce Commission; 1.9 Motor carriers and brokers, 49 CFR Part 1226.

37 FR 20695, Oct. 3, 1972, Part 1207: Class I and Class II Common and Contract Motor Carriers of Property, accounting regulations, insofar as they apply to the investment tax credit, amended to bring them into compliance with the Revenue Act of 1971 (Pub. Law 92-178), effective on publication in the Federal Register.

37 FR 25845, Dec. 5, 1972, Part 1206: Common and Contract Motor Carriers of Passengers, Uniform System of Accounts, miscellaneous amendments of accounting regulations, effective Jan. 1, 1973.

37 FR 25919, Dec. 6, 1972, Part 1206—Common and Contract Motor Carriers of Passengers; and Part 1207—Class I and Class II Common and Contract Motor Carriers of Property, accounting regulations. Order of Sept. 12, 1972 (37 FR 20695) amending regulations to comply with Revenue Act of 1971, corrected, effective on date of order.

38 FR 1870, Jan. 18, 1973: Record Retention Guide, XXX Interstate Commerce Commission; 1.9 Motor carriers and brokers, 49 CFR Part 1226.

38 FR 3602, Feb. 8, 1973, Part 1206: Common and Contract Motor Carriers of Passengers, Uniform system of accounts instruction "2-3 Accounting period" revised to provide for a thirteen-period accounting year.

38 FR 3602, Feb. 8, 1973, Part 1207: Class I and Class II Common and Contract Motor Carriers of Property, Uniform system of accounts instruction " 3 Accounting period" is revised to provide for a thirteen-period accounting year.

38 FR 3602, Feb. 8, 1973, Part 1240: Classes of Carriers, §1240.4 Classification of motor carriers of passengers, paragraph (b) revoked, paragraphs (c) and (d) redesignated as (b) and (c), and redesignated paragraph (b) revised to read as set forth; and §1240.5 Classification of motor carriers of property is amended by revising paragraph (b) to read as set forth.

38 FR 12335, May 11, 1973, Part 1207: Class I and Class II Common and Contract Motor Carriers of Property, Uniform System of Accounts, accounting regulations revised to read as set forth, effective Jan. 1, 1974.

39 FR 5766, Feb. 15, 1974, Parts 1240 & 1249: Classes of Carriers; and Reports of Motor Carriers. Revisions of Parts 1240 & 1249 of 49 CFR, as regards Quarterly Financial Reports of Motor Carriers of Property.

39 FR 7301, Feb. 26, 1974, Part 1207: Class I and Class II Common and Contract Carriers of Property. Publication of the new Uniform System of Accounts for Motor Carriers of Property, effective Jan. 1, 1974.

39 FR 11424, Mar. 28, 1974, Part 1207: Uniform System of Accounts for Class I and Class II Common and Contract Motor Carriers of Property, Amendment of 49 CFR 1207, Instruction 2, Records of operating revenues and expenses, effective upon date of service.

Section 220. (e), (f) [§*320(e),(f) U.S.C.*]—Report of accident as evidence in damage suit.—[Unchanged. See vol. 15, p. 12252; vol. 11, p. 9575.]

5. In general.—Section 220(f) proscribing admission in evidence of any accident report, made by a motor carrier pursuant to any Commission requirement, in a suit for damages growing out of any matter mentioned therein does not extend the limited privilege against disclosure only to the carrier filing the report; such privilege may be invoked by others. Moreover, without evidence of Congressional intent to the contrary, §220(f) can only be read as a flat prohibition against the use of accident reports to the Commission, or any part of them, as evidence in a suit for damages growing out of

matter contained in such reports. Therefore, motor carrier employer's accident report to the Commission containing deceased truck driver's statement as to loading procedure followed, which was inconsistent with his testimony in later deposition, was inadmissible in wrongful death action by decedent's administratrix against automobile manufacturer, alleging negligence in manufacture of truck which, while decedent was loading it, rolled forward and pinned him against the automobile carrier on which it was being loaded. Remanded for new trial.—Blankenship v. General Motors Corp., 428 F. 2d 1006 (1009).

Section 221. [§*321(a) U.S.C.*] Orders, notices and service of process.—(a) Persons upon whom notice or orders served; manner and time of service.—[Unchanged. See vol. 10, p. 8241, vol. 11, p. 9475, vol. 15, p. 12252.]

Historical notes, vol. 12, p. 10473, vol. 14, note to § 16(5), p. 11533.

Notes of Decisions

Volume 10—p. 8241; Volume 17—p. 13628; Volume 19—p. 15912.

Section 221. (b) [§*321 (b) U.S.C.*] Effective date and duration of orders of Commission.—[Unchanged. See vol. 10, p. 8242, vol. 11, 9575.]

Amendment, see footnote, vol. 11, p. 9575.

Historical Note

Since §221(b) appeared to preclude the Commission from making its final order in Ex Parte MC-43 (Sub-No. 2) effective in fewer than thirty days, and in order to alleviate a serious and pressing transportation problem by requiring carriers to reimburse their owner-operators for all increases in the price of fuel over the base period May 15, 1973, P.L. 93-249 (88 Stat. 11) was approved Feb. 8, 1974, directing the Commission to issue a final order in the Ex Parte MC-43 (Sub-No. 2) as soon as possible, to become effective not later than Feb. 15, 1974.

Notes of Decision

Notes of Decisions

Volume 11—p. 9576; Volume 12—p. 10474; Volume 13—p. 11119; Volume 14—p. 11642; Volume 15—p. 12253; Volume 17—p. 13629; Volume 19—p. 15913.

Regulations of the Commission

33 FR 18626, Dec. 17, 1968, Part 1044: Designation of Process Agents by Motor Carriers and Brokers, §1044.1 Applicability, revised, effective upon publication in the Federal Register.

Section 221. (d) [§ *321(d) U.S.C.*] "Motor carriers" as including brokers.—[Unchanged. See vol. 10, p. 8242.]

Section 222. [§ *322(a) U.S.C.*] Unlawful operation—(a) Violation of chapter or rules or orders; penalty when none otherwise provided.—[Unchanged. See vol. 10, p. 8243, vol. 18, p. 14647.]

Historical Note

Historical notes, see vol. 11, p. 9577, vol. 12, p. 10474, vol. 13, p. 11119, vol. 14, p. 11643, See Historical Note to Safety Appliance Acts, 45 USC §6, infra.

Notes of Decisions

Volume 10—p. 8243; Volume 11—p. 9577; Volume 12—p. 10474; Volume 17—p 13629; Volume 18—p. 14648; Volume 19—p. 15914; Volume 21—p. 17662.

15. Violation of Act, orders or regulations.—[Vol. 21].—Reading §222(a) in conjunction with §223, a violation of §223 constitutes a crime whenever an offender willfully and knowingly does what that statute forbids. Section 222 applies equally to the entire spectrum of the Motor Carrier Act, not only is the penal section for purposes of criminal prosecution, but it also provides for civil action for fines, and sets the amounts; therefore, the willful and knowing extension of credit, in violation of §223 and rules and regulations promulgated thereunder, charged in each count of the information constitutes a crime within ambit of §222(a), and the indictment under attack includes the requisites necessary to criminal prosecution. Defendant's motion to dismiss the information, on ground that it failed to state sufficient facts to constitute an offence, denied.—United States v. Infinger Transportation Co., 316 F. Supp. 124 (127-9).

Section 222. (b) [§ *322(b) U.S.C.*] Jurisdiction of district courts to restrain violations and enforce orders.—[Unchanged. See vol. 21, p. 17665.]

Notes of Decisions

Volume 10—p. 8244; Volume 11—p. 9577; Volume 12—p. 10475; Volume 13—p. 11119; Volume 14—p. 11643; Volume 15—p. 12254; Volume 16—p. 12921; Volume 17—p. 13629; Volume 18—p. 14648; Volume 19—p. 15915; Volume 21—p. 17666.

2. Construction and interpretation.—[Vols. 19, 21].—Legislative history of 1965 amendment of §222(b) shows that its purpose was to permit any injured person to apply to the federal courts for enforcement of §§203(c), 206, 209 or 211; and §222(b)(2) is designed to afford injured parties a measure of self-protection against openly and obviously unlawful operations. Prior to the amendment, only the Commission could obtain an enforcement order from the courts; thus, by its passage, Congress obviously desired to expedite such remedy where "clear and patent" violations were shown. Not only is a remedy provided, the words "clear and patent" are used therein to indicate jurisdiction separate and apart from the Commission's primary jurisdiction. In order to regain primary jurisdiction and prevent the use of §222(b)(2) to harass legitimately operating carriers, the Commission may take jurisdiction of the matter under §222(b)(3) and stay further court action. District court had jurisdiction to entertain, and issue injunction in, appellee's private suit for enforcement and did not invade Commission jurisdiction when, though the Commission intervened therein, it did not seek a stay under §222(b)(3).—Baggett Transp. Co. v. Hughes Transp., Inc., 393 F. 2d 710 (714-6)*.

Private suits are authorized by §222(b)(2), but only in certain circumstances, i.e., by any person injured as a result of carrier operations in clear and patent violation of certain sections of the Act, or any rule, regulation, requirement, or order thereunder. However, motor carrier safety regulations are provided for and issued under §204, and that section is not designated in the statute as one whose violation may premise a private suit. Accordingly, appellant's suit (which did not allege violation of any particular safety regulation or claim any personal injury) to enjoin motor carrier from operating equipment allegedly in defective condition was not authorized by §222(b)(2); and, since jurisdiction is lacking under §222(b), district court decision, denying the request for injunction, is affirmed.—Hamper v. Transcon Lines, Corp., 425 F. 2d 1178 (1179).

When the Commission notified the court in which munitions carriers filed a §222(b)(2) "self-help" suit (to enjoin heavy hauler from carrying explosives) that it would consider the matter of scope of the heavy hauler's authority, thus requiring stay of the court suit, the issue thus raised was "referred" to the Commission for initial decision and order deciding it was one "arising from such referrals," within the exclusive jurisdiction and venue statutes. Notice and stay method embodied in §222(b)(3) is effectually the same as procedure for referring issues to the Commission prior to its enactment; only difference is procedural—rather than an issue being referred on the court's initiative, the Commission on its own initiative can take primary jurisdiction. Nothing peculiar to §222(b) "self-help" suits is persuasive that 28 USC §1336(b) and §1398(b), as amended, should not apply; motives that prompted 1964 amendments have no relation to procedural nicety of whether court or agency takes the initiative in having the Commission first resolve an issue; thus, those statutes apply insofar as instant action seeks to set aside Commission order on an issue raised in carriers' "self-help" suit in another district court.—Leonard Bros. Trucking Co. v. United States, 301 F. Supp. 893 (894, 897-8)*.

District court has jurisdiction to grant relief sought in munitions carriers' §222(b)(2) "self-help" action to enjoin defendant heavy-hauler from transporting palletized shipments of 500- and 750-pound bombs, and other ammunitions weighing less than 150 pounds per item, when verified complaint charged a clear and patent violation of the act or lawful rules and regulations issued thereunder; the Commission's *Dillner* decision, 79 MCC 335, clearly established that a heavy-hauler could not successfully base its right to transport on the size and weight of commodities in palletized form unless the inherent nature of the items required palletization; and, as early as the preliminary injunction hearing, supporting evidence disclosed a clear and patent violation in the defendant's hauling of palletized boxed shells, and other ammunition which was comparatively light in weight and none of which required palletization.—Tri-State Motor Transit Co. v. International Transport, Inc., 343 F. Supp. 588 (592-3).

And referral to the Commission of question as to whether defendant held authority to haul described bombs, and withholding decision on that issue pending the commission's ruling on it, did not deprive the court of jurisdiction to decide the clear and patent question as to those items. As stated in 301 F. Supp. 893, court jurisdiction is only postponed, not ousted, by the doctrine of primary jurisdiction; and while referrals under 28 USC §1336(b) are encouraged as part of the overall statutory scheme of regulation, the Commission is looked to for primary regulation of motor carriers. Under §222(b)(2), all that is required is that—at time of the decision—evidence before the district court support, and the court find, the statutorily required clear and patent violation charged in the complaint. Viewed in light of the three-judge decision in 337 F. Supp. 985, sustaining the Commission's ruling on referred question, evidence before the court fully supports its finding that defendant's hauling of the 500- and 750-pound bombs was and is clearly and patently outside the scope of its heavy-hauler authority and in violation of §§203(c) and 206 of the Act.—Id., pp. 594-5.

Also, as allowance of attorneys' fees is within the court's discretion under §222(b)(2), plaintiffs are allowed counsel fees in amount shown to be reasonable, if only services in the "self-help" case are considered, plus the amount shown for out-of-pocket necessary expenses. Plaintiffs also request attorneys' fees for legal services in connection with the case after referral to the Commission, and/or while it was before the Commission, but no authority is submitted to support that part of the request. Had Congress intended counsel fees to be paid on referred issues, it would have specifically provided such authority by statute; therefore, in the absence of any statutory provision for such fees, the court declines to award any attorneys' fees for work performed while the case was before the Commission.—Id., p. 599; Tri-State Motor Transit Co. v. Leonard Bros. Trucking Co., 347 F. Supp. 872 (875-6, 878-9); Tri-State Motor Transit Co. v. C & H Transp. Co., 347 F. Supp. 879 (882-3, 885-6); Tri-State Motor Transit Co. v. H. J. Jeffries Truck Lines, Inc., 347 F. Supp. 864 (867-9, 870-1).

Violations of the orders prescribed herein as to filing of reports and vehicle identification by private motor carriers of explosives and dangerous articles shall be prosecuted and penalized only under Interstate Commerce Act. Commission holds that penalties should be at least equalized between private and regulated carriers and as Transportation of Explosives Act is inapplicable to regulated carriers, prosecution of private carriers under such act would be unequal treatment.—Transportation of Explosives—Private Motor Carriers, 329 I.C.C. 411 (413)*.

10. Indictment and information in general.—[Vols. 10-16, 21].—Information charging that defendant motor carrier extended credit to shipper for payment of freight charges knowing that such charges would not be paid within the required period, and that in fact the charges were not paid within the time required, is sufficient to support a criminal prosecution; such a violation of §223 and the rules promulgated thereunder constitutes a crime within the ambit of §222(a). Thus, even though §222(a) requires proof of both knowledge and willfulness, and §223 is a statute of the malum prohibitum class, the indictment under attack correctly includes the requisites necessary to a criminal prosecution. Therefore, since the information will support a criminal prosecution, defendant's motion to dismiss it for failure to state sufficient facts to constitute an offense is denied.—United States v. Infinger Transportation Co., 316 F. Supp. 124 (127-9).

11. Interstate operation without certificate or permit.—[Vols. 10-19, 21].—On appeal from district court's grant of injunction sought by the Commission, activities of defendant cooperative's transportation division, i.e., extensive for-hire transportation of general commodities for nonmembers throughout the United States, violated the Motor Carrier Act when the Commission had issued no authority for such transportation and, contrary to defendant's contention, questioned activities are not within the agricultural cooperative association exemption in §203(b5). Transportation activities in issue are not incidental to the milk and dairy business operated by the cooperative in a relatively small area in Kansas and Missouri; and they are not shown to be necessary to effective performance of primary objective of a cooperative association, as defined in the Agricultural Marketing Act, when the only claim of necessity is that profitable interstate truck operations are needed to sustain money-losing primary activity of the cooperative. Lower court's decision, affirmed.—I.C.C. v. Milk Producers Marketing Co., 405 F. 2d 639 (641-2)*.

On appeal from district court judgments in two separate cases, activities of defendant cooperative association, i.e., for-hire transportation of government freight and Class A and B explosives on government bills of lading in interstate commerce, violated the Motor Carrier Act when such transportation had not been authorized by the Commission and, contrary to defendant's contention, the questioned activities are not within agricultural cooperative association exemption of §203(b5). Transportation activities in issue are not within the cooperative's primary activity, as set out in the Agricultural Marketing Act; and, although economically advantageous to its transportation business, they are not shown to be necessary to effective performance of its primary activity. Therefore, since the acts complained of were a clear and patent violation of the Act, the district court had jurisdiction of actions seeking to enjoin defendant and two of its employees from continuing the questioned activities and its judgments and findings are affirmed.—Munitions Carriers Conference, Inc. v. American Farm Lines, 415 F. 2d 747 (749-50)*.

In suit to enjoin defendant association from engaging in for-hire motor carrier operations, without appropriate authority, defendant cannot claim benefits of the §203(b5) "agricultural cooperative exemption" when the evidence shows that it is not a bona fide agricultural cooperative association as defined in the Agricultural Marketing Act. Record shows that the association was not substantially controlled by its members and, as advisory jury found, it has performed transportation for nonmembers that was not necessary and incidental to that performed for nonmembers and it consistently hauled nonmember tonnage in excess of 15 percent of its total interstate tonnage; such activities constitute a clear and patent violation of the Act and (contrary to jury's findings) common carrier plaintiffs have been injured thereby. Therefore, as a matter of law, association's transportation of nonexempt commodities for members, nonmembers, of the Government, for compensation, without authority from the Commission, violates §§203(c), 206(a), and 209(a); defendant association and its general manager are permanently enjoined from conducting such unauthorized motor carrier activities.—I.C.C. v. Southwest Marketing Association, 315 F. Supp. 805 (813-4).

So long as defendant agricultural cooperative holds no interstate motor carrier authority and performs interstate transportation for compensation, such transportation must be performed pursuant to the §203(b5) exemption. Therefore, cooperative's for-hire transportation of non-exempt products and commodities (including that performed for the government) beyond the scope of the §203(b5) exemption is unlawful and subject to permanent injunction and restraint until such time as appropriate authority therefor is obtained.—I.C.C. v. Big Sky Farmers & Ranch. Mkg. Coop. of Montana, 321 F. Supp. 79 (80, 82-3)*.

By agreement of the parties in proceedings to enjoin trucking company from interstate transportation of considered products without appropriate authority, and all the factual issues having been resolved by written stipulation, the question for the court's determination is whether lactose and Culturemate (produced from milk) are exempt agricultural commodities, within §203(b6), that may be transported by defendant company even though it does not hold interstate authority. Applying standards set forth in 351 US 49, to resolve the challenged exemption, therefore, the court concludes that lactose retains its substantial identity as milk sugar, notwithstanding the processing changes, and is an exempt commodity. However, since Culturemate has lost its original characteristics and has been manufactured into a different article with its own distinctive name, character and use, that commodity is a new, manufactured product which is not within the §203(b6) exemption. Order accordingly.—I.C.C. v. Schaetzel, 339 F. Supp. 1345 (1346-7).

In action to enjoin defendant carriers from conducting further line haul motor operations between nonairfield points in and around Benton Harbor and Kalamazoo, Mich., and O'Hare Field and Midway Airport at Chicago, Ill., comprised of local pickups in Michigan by carrier holding authority only between Benton Harbor and Kalamazoo airports, on one hand, and the named Chicago airports, such operations of defendants are line-haul interstate motor carriage which require authorization. Since specific authority to operate between named airports does not imply authority to serve any nonairfield points within "commercial zones" of cities where those airports are located, and since Michigan origin points are well outside "terminal areas" of the Chicago airports, challenged operations are not within either the commercial zone, or the incidential-to-air, exemption provisions of the Act.—I.C.C. v. Howard, 342 F. Supp. 1112 (1114-5).

All in all, defendants have the right, without authority, to collect goods in and around the Michigan airports and to deliver them to those airports, respectively, for subsequent air shipment and, in addition, the general-commodity authority granted by the Commission allows them to transport goods from those airports to O'Hare and Midway airports at Chicago. But transportation from nonairfield points in Michigan to any interstate destination is not authorized and such motor carrier operations must be authorized to be lawful. Accordingly, defendants are ordered to cease and desist from all interstate motor carriage, except that authorized between the named airports, unless and until appropriate authority therefor is obtained from the Commission.—Id., p. 1116.

14. Operation beyond scope of authority granted.—[Vols. 15-19, 21].—See Tri-State Motor Transit Co. v. International Transport, Inc., n. 2, above; and Interstate Commerce Comm. v. Howard, at n. 11 above.

25. Injunction.—[Vols. 10-12, 15-19, 21].—See also Hamper v. Transcon Lines Corp., n. 2, above.

Since a petition for temporary injunction is addressed to discretion of the trial court, the reviewing court will consider merits of the case only to extent necessary to determine whether lower court properly exercised its discretion. Under 1965 amendment of 222(b), which provided for private enforcement actions to afford injured parties some protection against openly and obviously unlawful carrier operations, Missouri district court had jurisdiction of appellee's action to enjoin appellant's operations in excess of its authority (though a Commission cease-and-desist order against appellant was then under review in an Alabama court); and issuance of considered preliminary injuction was not an abuse of judicial discretion when the trial court found that appellant's operations clearly exceeded its authority and that continuance of such operations while review of the Commission order was pending would deprive appellee of substantial revenue.—Baggett Transp. Co. v. Hughes Transp., Inc., 393 F. 2d 710 (713-5)*.

Appellee will lose considerable revenue if the preliminary injunction is dissolved and the Commission's order eventually upheld but, under current laws, it could not recover damages from appellant. As amended, §222(b) provides a remedy for parties injured by patently illegal operations and, also, jurisdiction (separate and apart from that of the Commission) for private enforcement actions to secure prompt and effective protection against such injury. Though, as appellant argues, historically a preliminary injunction could be used only to preserve the status quo, in the present circumstances a preliminary injunction was available to appellee. It is significant that the status quo changed was appellant's operations which the trial court found to be in clear violation of its authority; also, the change in status quo thus enjoined those illegal operations and that is the purpose of §222(b)(2). Moreover, applying the language used in 347 US 514 (antitrust case), private-injunction suits to restrain violations of the Act and public actions to prevent violations were designed to be cumulative, not mutually exclusive. Decision of the lower court is affirmed. Id., pp. 715-8.

In action to show cause why agricultural marketing cooperative and its officers should not be held in contempt of order permanently enjoining them from interstate for-hire transportation of nonmembers' freight when (1) proceeding to pickup and transport shipments for members and (2) returning from delivery of member shipments, except when necessary to prevent an incidental empty-vehicle movement, record clearly shows that defendants' hauling of all Government and nonmember traffic eastbound from the west coast and, also, described "long layover" operations and "sandwich" moves are not necessary to prevent such empty-vehicle movements. Nature of the operations and fact that the bulk of their revenue comes from Government traffic show that defendants engage in general trucking for the Government beyond the §203(b5) exemptions; therefore, defendants are in contemptuous violation of the injunction. And since plaintiff carriers, or some of them, would have obtained the traffic and revenues therefrom had not defendants done so, plaintiffs are entitled to damages in amount of net revenues diverted from them by defendants' wrongful and contemptuous acts.—Munitions Carriers Conference, Inc. v. American Farm Lines, 303 F. Supp. 1078 (1079-80, 1084-6)*.

Agricultural cooperative's interstate for-hire transportation of non-exempt products and commodities beyond scope of the

§203(b5) exemption, as applied to defendants, is unlawful and in violation of the Act; thus, plaintiff is entitled to permanent injunction restraining the cooperative, its officers, agents, directors, and members participating with it from engaging in such transportation until appropriate authority therefor is obtained. Also, while the cooperative has applied for authority, such permanent injunction will not be stayed pending Commission action on the application; final Commission determination will take many months, perhaps years, and it would be against the public interest to allow defendants to continue an operation found to be illegal for any such period of time. However, the cooperative should have a reasonably short time in which to change its method of operation so as to lessen economic impact on it of the permanent injunction; defendants granted a 2-month temporary stay of enforcement.—I.C.C. v. Big Sky Farmers & Ranch. Mkg. Coop. of Montana, 321 F. Supp. 79 (83-4)*.

In munitions carriers' §222(b) (2) "self-help" suit to enjoin heavy hauler from clear and patent unlawful transportation of palletized bombs and ammunition for cannon, decision as to whether an injunction should be issued rests to large extent in the court's sound discretion, and requires careful consideration of all salient facts and applicable principles of equity. While defendant ceased hauling the bombs when it became unprofitable, such economic reasons for cessation provide no assurance that future illegal hauling will not occur; also, cessation of violation, whether before or after initiation of the suit, does not bar issuance of an injunction, nor render the case moot. The court may act on the evidence before it when it decides the merits of the case; there is a reasonable likelihood that the illegal hauling may start again any time the economic benefits appeal to defendant as favorable; and practicalities of the situation are such that plaintiffs cannot be protected from future illegal hauling of the bombs absent a court order enjoining such transportation.—Tri-State Motor Transit Co. v. Internaitonal Transport, Inc., 343 F Supp. 588 (597-8).

Nor does cessation of the unlawful carriage of palletized shells and cannon ammunition, whether before or after initiation of the suit, bar issuance of a permanent injunction. While defendant professes its good faith belief that it was authorized to transport those class A and B explosives, and states that it no longer hauls them, record is convincing that an injunction is necessary to assure against future illegal hauling of such articles. Furthermore, where evidence demonstrates all the equitable consideration, including irreparable injury and no adequate remedy at law, the injunction should issue. Therefore, defendant heavy hauler is enjoined from transporting 500- and 750-pound bombs whether palletized or unpalletized, and cannon or other ammunition which individually or boxed weighs 150 pounds or less, until appropriate interstate authority therefor is obtained.—Id., pp. 598-9; TriState Motor Transit Co. v. H.J. Jeffries Truck Lines, Inc., 347 F. Supp. 864 (869-71); Tri-State Motor Transit Co. v. Leonard Bros. Trucking Co., 347 F. Supp. 872 (877-9); Tri-State Motor Transit Co. v. C & H Transp. Co., 347 F. Supp. 879 (885-6).

30. Evidence.—[Vols. 11-14, 17-19, 21].—See United States v. Webb, case, §222(c), n. 5.

35. Jury trial.—[Vol. 15].—In action to enjoin alleged agricultural cooperative association from unauthorized for-hire motor carrier operations (tried before a one-judge court and an advisory jury) the function of an advisory jury is to advise the trial court but the jury's verdict has no binding effect upon the court. If the court does not accept the jury's advice, it may proceed to make its own independent findings of fact and conclusions of law, and its rejection of the advisory verdict is not subject to appellate review; the review on appeal is from the trial court's judgment as though no jury had been present. Responsibility for the lower court's decision is upon the trial judge; therefore, disagreeing with the advisory jury's findings, the court reached its own findings and conclusions in the case after considering the pleadings, evidence, stipulations, counsel's arguments and briefs, and the advisory jury's verdict. Judgment for plaintiffs.—I.C.C. v. Southwest Marketing Association, 315 F. Supp. 805 (807, 813-4).

Section 222. (c) [§*322(c) U.S.C.*] Participation in unjust discrimination; evasion of regulations; penalty.—[Unchanged. See vol. 10, p. 8247, vol. 18, p. 14651.]

Notes of Decisions

Volume 10—p. 8247; Volume 11—p. 9581; Volume 13—p. 11121; Volume 14—p. 11644; Volume 15—p. 12256; Volume 17—p. 13631; Volume 19—p. 15919; Volume 21—p. 17671.

5. Defeating or evading regulation.—[Vols. 15, 19, 21].—Statements made by appellant carrier in first interview at his office with Commission investigator, documents and records (required to be kept by Commission regulations) which he voluntarily released to the investigator at that time and, also, the written statement signed by carrier during second interview in his office, were admissible in prosecution of carrier (under 18 USC §2) for aiding and abetting another trucker to engage in for-hire interstate hauling in violation of §203(c). Prosecution for statutory violation would be a misdemeanor and, though carrier was not warned of his constitutional rights to counsel and to remain silent, investigator did warn him that he did not have to sign the written statement; at time of first interview, no criminal action was contemplated, and carrier was never in custody. While appellant claims that failure to advise him fully of his constitutional rights renders all documents and statements gathered in the investigation inadmissible under doctrine of the *Miranda* case, 384 U.S 436, the mandate of that decision is not so broad as to include the non-custodial interrogation which was not actually or potentially coercive or intimidating.—United States v. Webb, 398 F. 2d 553 (555-7).

Furthermore, evidence of record clearly showed that leasing arrangement between defendant regulated carrier and uncertified trucker was a mere subterfuge whereby defendant illegally engaged in interstate hauling; and, since expectation of payment is sufficient to constitute "for hire" within the statute, it was unnecessary to prove that defendant, allegedly leasing trucks owned by uncertified trucker, had paid latter carrier for any hauls. Evidence sustained defendant's conviction for aiding and abetting another trucker to engage in unauthorized for-hire interstate hauling.—Id., pp. 557-8.

In prosecution of carrier for knowingly and willfully using false freight bills to evade or defeat Commission regulation in violation of §222(c), and charging individual defendant as an aider and abettor under 18 USC §2, the Government is not required to show common law prerequisites of a criminal fraud action, such as a specific intent to deceive or some scheme of "subterfuge". As a *malum prohibitum* offense, proof is required to show that defendants used false documents knowingly and willfully to evade or defeat Commission regulation; proof of specific intent to defraud the Commission is not a prerequisite to a finding of guilt. Evidence shows that, in performing unauthorized interstate service, defendant carrier used false freight bills (indicating intrastate service) to evade or defeat regulation, and that individual defendant aided and abetted the carrier, in violation of the Act; and neither defendants' failure to try to conceal carrier services being performed nor cooperation with Commission investigator raised a reasonable doubt as to guilt. Judgment upon a finding of guilty as charged, entered.—United States v. Indiana Trucking, Inc., 300 F. Supp. 765 (767, 768-70).

10. Prohibited devices.—[Vols. 15, 17].—Continued use by petitioner of "Good Housekeeping Consumer's Guaranty" in its advertising will not subject petitioner to penalties imposed by §222(c) because Commission had no jurisdiction to regulate advertising of regulated carrier.—Wheaton Van Lines—Petition for Declaratory Order, 339 I.C.C. 1(7).

Section 222. (d), (e) [§*322(d), (e) U.S.C.*]—[Unchanged. See vol. 11, p. 9582; vol. 10, p. 8248.]

Notes of Decisions

§222(e): Volume 10—p. 8248; Volume 17—p. 13632; Volume 21—p. 17673.

§222(e). 3. Disclosure of information without shipper's consent.—[Vols. 17, 21].—Additional information herein required to be filed in annual reports of class I and class II motor common carriers of property does not violate §222(e) as the proposed revisions provide the carriers with alternatives to such requirements by the filing of a proforma balance sheet and income statement or by application for special relief.—Annual Reports of Motor Carriers of Property, 335 I.C.C. 707 (713).

One supporting shipper, a data processing concern, is unwilling to tender traffic to protestant (who is commonly controlled through management with one of its competitors) for fear that information concerning the identity and location of its customers would be used to its disadvantage; and, as protestant is the only motor carrier offering the type of service proposed, shipper's alternatives are private carriage or less desirable transportation modes. Therefore, the Commission's policy against common control of a shipper and carrier is applicable, and outweighs those considerations which favor protection of a protestant's monopoly position; the public interest would best be served by a grant of authority to a carrier not encumbered with a conflict of interest.—American Courier Corp., Extension, 103 M.C.C. 298 (303-4)*.

Section 222. (f), (g), [§*322(f), (g), U.S.C.*]—[Unchanged. See vol. 10, p. 8249, vol. 11, p. 9583; vol. 15, p. 12256.]

Notes of Decisions

§222(g): Volume 16—p. 12924; Volume 18—p. 14651; Volume 21—p. 17674.

Section 222. (h) [§*322(h) U.S.C.*]—Civil action for fines; amount; service of process; payment of costs and expenses.—[Unchanged. See Vol. 21, p. 17675.]

Historical Note

See Vol. 21, p. 17675.

5. Failure or refusal to comply with Act.—Defendant bus line is subject to civil forfeiture provisions of §222(h) for failing and refusing to comply with §203(c) when, without having been issued required certificate or permit, it had transported college students through several states. While defendant contends all of that transportation was exempt under §203(b1), and research reveals no prior statutory construction of the term "school children" therein, the Commission interprets that term as not including, and not intended by Congress to include, students attending a college or university. Contemporaneous construction of provisions of the Act by the Commission is entitled to great weight and respect and should not be overturned by the courts unless it is arbitrary or plainly erroneous; therefore, since the Commission's construction of the §203(b1) as not including transportation of college students is not arbitrary or clearly erroneous, the bus company is subject to civil forfeiture proceeding. Commission motion for summary judgment, granted.—United States v. Chartered Bus Service, Inc., 329 F. Supp. 1073 (1076-7).

Section 223 [§*323 U.S.C.*] Collection of rates and charges; extension of credit; liability of agent of beneficial owner.—[Unchanged. See Vol. 10, p. 8250.]

Historical Note

By provision of §108 of the Truth in Lending Act, Public Law 90-321, 82 Stat. 146, responsibility for administrative enforcement of that act is assigned to the Commission with respect to any common carrier which it regulates and, for the purpose of enforcing compliance therewith, the Commission may exercise any other authority conferred on it by law. Also, while the Board of Governors of the Federal Reserve System is directed to prescribe regulations to carry out purposes of the Truth in Lending Act (12 CFR Part 226, 34 FR 2002, Feb. 11, 1969), the statute specifically provides that such Board authority does not impair the authority of any other agency responsible for administrative enforcement to make rules respecting its own enforcement and compliance procedures.

Notes of Decisions

Volume 10—p. 8251; Volume 11—p. 9584; Volume 12—p. 10476; Volume 14—p. 11645; Volume 15—p. 12257; Volume 16—p. 12924; Volume 17—p. 13632; Volume 21—p. 17675.

1 Construction and interpretation.—[Vols. 10, 17, 21].—See also United States v. Infinger Transportation Co., §222(a), n. 15.

Nothing in the language or policies of §223 suggests that Congress intended to impose absolute liability on a consignee for freight charges; nor does the court hold that the application of equitable estoppel against plaintiff's claim, in motor carrier's suit against consignee of the goods for unpaid freight charges, would circumvent policies of the section. When the statute was enacted, Congress was concerned with eliminating rate and credit discrimination in the collection of the lawful charges from the party liable, regardless of whether that person is consignor, consignee, or another shipper with a beneficial interest in the goods shipped. Moreover, the statute is not primarily directed to establishing or locating liability for payment of freight charges; nor does it attempt to specify from whom payment should be collected under ordinary circumstances.—Consolidated Freightways Corp. of Del. v. Admiral Corp., 442 F. 2d 56 (61-2).

Permitting the use of credit cards by shippers of household goods will in no way "liberalize" codified credit requirements [49 CFR 1056.8(b) and 1322 (1) (b)], for the carriers, following delivery, merely forward imprinted documents to the bank which credits the carrier's account immediately for the full amount of the tariff charges (less a $10 credit investigation fee). The shipper has from 30 to 50 days to pay the bank without additional charges and may extend its payments under the standard installment loan agreement. This credit relationship is between the bank and the shipper. The carrier, having been paid in full (less an amount directly attributable to the cost of a credit investigation), is not a part of this relationship and has not extended any credit in violation of the Commission's regulations.—Practices of Motor Common Carriers of Household Goods, 118 M.C.C. 97 (105).

The Commission will continue to require carriers to submit any proposed credit payment plan for review. The Commission will then be in a position to determine whether the plan complies with credit regulations and adequately protects the shipping public. A motor carrier submitting such a plan will avoid the possibility of entering into an unlawful contract as well as remedial action by the Commission. Such plans generally will be approved informally by letter from the Commission. Plans will be disapproved if (1) found not to be in compliance with credit regulations, or (2) found not to be in the best interest of the shipping public, the motor carrier, or the industry as a whole.—Id. (106).

2. Unfair practice; discrimination effected by extension of credit.—[Vols. 10, 11, 21].—In motor carrier's suit to recover unpaid freight charges from consignee of goods transported under shipping documents indicating that the charges were prepaid, evidence shows that carrier's transactions with consignor of the shipments often involved extension of credit well beyond the 7-day limit prescribed in the Commission's credit regulations; and that, through its unlawful and lax credit practices, plaintiff contributed substantially to its ultimate inability to recover payment of the charges from consignor and, also, to increase in the amount of loss which resulted from consignor's financial failure. As plaintiff thus created the risk of loss, and increased gravity thereof, by its credit transactions with consignor, it is estopped from recovering the unpaid freight charges. Permitting recovery in instant case would only serve to reward the carrier for its unlawful and inequitable conduct; lower court's judgment for defendant consignee affirmed.—Consolidated Freightways Corp. of Del. v. Admiral Corp., 442 F. 2d 56 (58-60, 63).

Proposed extension of the time (from 7 days to 15 days) in which oilfield carriers may extend credit to shippers to permit the latter to audit bills was found to be unjustified, since such an extension would entail unjust discrimination against other classes of shippers, and time to audit is a privilege rather than a right.—Payment of Rates and Charges of Motor Carriers, 118 M.C.C. 379 (387-389).

3. Prescription of regulations by Commission.—[Vols. 10, 14].—In view of evidence of such factors as (1) delay in the mail, (2) backlog in billing shippers caused by extreme seasonal fluctuations, and (3) impracticality of preparing the shipping papers in advance, because of the necessity of obtaining and incorporating in the customer's bill third party accessorial charges, record clearly shows that forces beyond household goods carriers control make it impossible for them to comply with the present credit regulations. Therefore, an extension from present 7-day period to a period of 15-days for presentation of freight bills is warranted. Regulations governing extension of credit by motor carriers of household goods modified accordingly.—Payment of Rates and Charges of Motor Carriers, 105 M.C.C. 460 (465-6).

Proposal to extend period of time during which motor carrier of household goods may extend credit not shown to be justified as these carriers were recently granted (in 105 MCC 460) an extension of the time period within which they must present their bill to shippers thus extending credit period in fact and any further extension of this specialized traffic would create too great a disadvantage over other carriers. Shippers have no right to such extension so as to expedite their auditing purposes when it would be detrimental to carriers' financial situation.—Payments of Rates and Charges of Motor Carriers, 110 M.C.C. 79 (88-9).

Commission herein reopened the proceeding in Ex Parte No. MC-1 (Sub-No.1) in order to amend 49 CFR §1322.1 thereby allowing common carriers of household goods to relinquish possession of such traffic in advance of payment of tariff charges thereon and to extend credit in the amount of such charges to those who undertake to pay them.—Practices of Motor Common Carriers of Household Goods, 111 M.C.C. 427 (552-3)*.

Commission herein adopted a regulation (49 CFR 1056.21) permitting and encouraging motor common carriers of household goods to use credit card systems inasmuch as the credit card has become an American economic institution and the use of credit cards in such transportation will benefit the American public. To facilitate the use of such systems, the Commission did not prescribe cumbersome filing requirements but will publish its approval or disapproval in the Federal Register and will require a quarterly report by carriers using such systems.—Practices of Motor Common Carriers of Household Goods, 118 M.C.C. 746 (751-54).

Since numerous shippers had not paid their freight bills within the current 7 day free period, the Commission modified the regulations (49 CFR 1322.1) to require household goods carriers to publish tariff provisions extending credit beyond the 7 days free credit period to 30 calendar days subject to the assessment of a 1 percent service charge, minimum $10, for the additional period of credit.—Payment of Rates and Charges of Motor Carriers, 118 M.C.C. 778 (798-800).

5. Practices, in general.—[Vols. 11, 12, 21].—Respondents' weekly rates on gasoline and fuel oils moving in one vehicle from one shipper over a 7-day period do not violate the Commission's regulations limiting extension of credit to shippers to a period of 7 days. Provision of the pertinent tariff item that freight charges must be prepaid in effect requires consignor to pay the charges within the period authorized by the credit regulations. Moreover, as the type of shipment contemplated covers all individual movements comprising the weekly aggregate tender, delivery of entire shipment would not be concluded until transportation of the last lot of the bulk tender is complete. Seven days is a reasonable period for respondents to aggregate and transport a bulk shipment within purview of the credit regulations, and they can comply therewith by billing within 7 days after delivery of the last lot in the bulk shipment and collecting the freight charges within 7 days thereafter.—Weekly Rates on Petroleum Products—from Sparks, Nev., 322 I.C.C. 541 (550).

Defendant's practice of denying credit to a complainant who refuses to pay the applicable charges within the 7-day period prescribed by Commission's credit regulation, 49 CFR 1322.1 is found to be just, reasonable, and otherwise lawful.—Glama Dress Co. v. Mid-South Transport, 335 I.C.C. 586 (596-7).

It was found that the complexities involved in the carriage of oilfield equipment justified an extension of the period carriers had to present their freight bills from 7 days to 15 days, excluding Saturdays, Sundays, and holidays, from the first 12 o'clock midnight following the delivery of freight. Regulation (49 CFR 1322.3) was amended to conform to this finding.—Payment of Rates and Charges of Motor Carriers, 118 M.C.C. 379 (386).

25. Third person's liability.—[Vol. 15].—Motor carrier is estopped from collecting upaid freight charges from consignee of the goods where the delivery receipts showed that customs-broker consignor was party to be billed, shipping documents indicated that charges were prepaid, and consignee took delivery of the shipments on those representations and promptly paid consignor's invoices for the charges. Principles of equity apply, also, since carrier's unlawful and lax credit extension practices contributed materially to its inability to recover payment from consignor, increased amount of the loss resulting from latter's financial failure, and effectively prevented consignee's protecting itself from consignor's conversion. Nothing in §223 suggests that Congress intended to impose absolute liability on a consignee for freight charges; and in instant case, no conflict is discerned between the application of equitable principles to bar carrier's recovery and the statute forbidding discriminatory treatment of shippers, since requiring double payment of freight charges by consignee would not further statutory policy of preventing unjust discrimination or undue prejudice. Judgment for defendant affirmed.—Consolidated Freightways Corp. of Del. v. Admiral Corp., 442 F. 2d 56 (59-61, 63).

Statute relating to collection of rates and charges and liability of agent of beneficial owner speaks only to "nonliability" in certain narrow situation of warehousemen and others similarly situated, who appear as consignees on a bill of lading, and does not impose liability on an agent not a party to the contract. To make shippers and others liable to carrier in connection with transportation of goods requires a stronger direct contractual base between the parties than maritime contracts, and land carriers in the United States must rely upon liabilities created according to common law principles.—Middle Atlantic Conference v. United States, 353 F. Supp. 1109 (1115, 1120)*.

Commission concluded that the tariff provisions here in question, which require that detention charges be paid by the party causing the delay, are unlawful as the Commission had found previously in 318 ICC 593, that agents and other persons, not parties to the transportation contract, cannot be subjected to liability for payment of detention charges resulting from delay in performance of loading or unloading freight. However, assessment of detention charges

against consignor in case of loading and against consignee in case of unloading is not improper and is consistent with the rationale of 318 ICC 593. By duly notifying the delivering carrier, the consignee-agent would not be liable for any charges.—Payment of Detention Charges, Eastern Central States, 332 ICC 585 (587-8).

A person, not a party to a contract for transportation, is not liable for charges resulting from detention of motor common carrier equipment. Established principles of law hold that a person acting as an agent and known as such assumes no personal liability for the debts of his principal.—Payment for Detention Charges, Eastern Central States, 335 I.C.C. 537 (543)*.

Regulations of the Commission

35 FR 4758, Mar. 19, 1970, Part 1322: Extension of Credit to Shippers by Motor Carriers, §1322.1 Carrier may extend credit to shipper, revised, effective May 1, 1970.

37 FR 5304, March 14, 1972, Part 1325: Extension of Credit to Candidates for Federal Office or Their Representatives, in implementation of the Federal Election Campaign Act of 1971 (Public Law 92-225), new Part 1325, as set forth, added effective May 5, 1972 unless modified or amended by further order of the Commission.

37 FR 10446, May 23, 1972, Part 1325: Extension of Credit to Candidates for Federal Office or Their Representatives. Credit regulations set forth in notice of proposed rule making and order (37 FR 5304) prescribed to become effective May 5, 1972.

38 FR 18253, July 9, 1973, Part 1322: Extension of Credit to Shippers by Motor Carriers, revises and modifies §1322.3 ordering all freight bills to be presented within 7 calendar days of delivery, except for oilfield equipment (15 days), effective Aug. 15, 1973.

38 FR 26726, Sept. 25, 1973, Part 1322: Extension of Credit to Shippers by Motor Carriers, amending §1322.1 by promulgating rules for common carriers of household goods, effective Nov. 5, 1973.

39 FR 29188, Aug 14, 1974, Part 1322: Extension of Credit to Shippers by Motor Carriers. §1322.1 is amended by adding paragraph (c) prescribing an exception governing extension of credit to shippers by household goods carriers, effective on date of service.

Section 224. [§*324 U.S.C.*] Identification plates for interstate motor carriers.—[Unchanged. See vol. 10, p. 8253.]

Amendments, see footnotes, vol. 10, p. 8253; historical notes, vol. 10, p. 8253, vol. 11, p. 9584, vol. 12, p. 10477, vol. 13, p. 11122, vol. 14, p. 11645.

Notes of Decisions

Volume 16—p. 12925.

Section 225. [§*324a U.S.C.*] Allowances to shippers for transportation services.—[Unchanged. See vol. 11, p. 9585.]

Amendments, see footnotes, vol 411, p. 9585.

Notes of Decisions

Volume 15—p. 12257; Volume 16—p. 12925; Volume 17—p. 13633; Volume 18—p. 14652; Volume 19—p. 15920; Volume 21—p. 17677.

Section 226. [§*325 U.S.C.*] Investigation of motor vehicle sizes and weights and qualifications and hours of service of employees.—[Unchanged. See vol. 11, p. 9585.]

Amendment, see footnote, p. 9585; historical notes, p. 9586, vol. 12, p. 10477; vol. 21, p. 17678.

Notes of Decisions

Volume 10—p. 8254; Volume 11—p. 9586; Volume 14—p. 11646; Volume 17—p. 13633; Volume 18—p. 14653.

25. Weight of vehicles.—[Vols. 10, 11, 14, 17, 18].—The only evidence of violations pertaining to safety relates to size and weight limitations; however, there was no evidence of accidents. The complaint did not allege reckless operation on Wisconsin highways and the weight violations were not so gross as to cause an accident, nor is there sufficient evidence to establish that the violations were willful. Out of 30 weight violations during 1961-1962, only 8 were not correctible at the scale house, and there were no weight violations in 1963 that could not be corrected by reloading. The record, therefore, does not show that defendant's violations were of sufficient gravity and extensiveness to warrant the revocation or suspension of its interstate authority.—Wisconsin Public Service Comm. v. Ace Doran, 96 M.C.C. 347 (355).

Section 226A. [§*325a U.S.C.*] State or subdivision income tax withholding on compensation paid to interstate motor carrier employees.—(a) No part of the compensation paid by any motor carrier subject to the provisions of this part, or by any private carrier of property by motor vehicle, to any employee who performs his regularly assigned duties as such an employee on a motor vehicle in more than one State, shall be withheld for income tax purposes pursuant to the laws of any State or subdivision thereof other than the State or subdivision wherein more than 50 per centum of the compensation paid by the carrier to such employee is earned: *Provided, however,* That if the empolyee did not earn more than 50 per centum of his compensation from said carrier in any one State or any subdivision thereof during the preceding calendar year, then withholding shall be required only for the State or subdivision of the employee's residence, as shown on the employment records of any such carrier; nor shall such carrier file any information return or other report for income tax purposes with respect to such compensation with any State or subdivision thereof other than such State or subdivision of residence, and the State or subdivision for which the withholding of such tax has been required under this subsection.

(b) For the purposes of subsection (a), an employee shall be deemed to have earned more than 50 per centum of his compensation in any State or subdivision in which the mileage traveled by him in such State or subdivision is more than 50 per centum of the total mileage traveled by him in the calendar year while so employed.

(c) For the purpose of this section the term 'State' also means any possession of the United States or the Commonwealth of Puerto Rico; and the term 'compensation' shall mean all moneys received for services rendered by an employee, as defined in subsection (a) in the performance of his duties and shall include wages and salary. (Act of Dec. 23, 1970, Public Law 91-569, §2, 84 Stat. 1500, 1501.)

Sections 227, 228. [§*326, 327 U.S.C.*]—[Unchanged. See vol. 11, p. 9586.]

PART III

INTERSTATE COMMERCE ACT; WATER CARRIERS

Chapter 12, Title 49, U.S. Code

Section 301. [§*901 U.S.C.*] **Short title.**—[Unchanged. See vol. 11, p. 9587.]

Section 302. (a), (b), (c), (d) [§*902 U.S.C.*] **Definitions; "water carrier," "common carrier by water."**—[Unchanged. See vol. 11, p. 9588.]

Notes of Decisions

§302(c): Volume 12—p. 10478; Volume 14—p. 11646; Volume 15—p. 12259; Volume 16—p. 12926; Volume 18—p. 14654.

§302(d): Volume 11—p. 9588; Volume 12—p. 10479; Volume 13—p. 11123; Volume 14—p. 11646; Volume 15—p. 12259; Volume 16—p. 12926; Volume 17—p. 13633; Volume 18—p. 14654; Volume 21—p. 17679.

5. Charter or special operations.—[Vols. 12, 19].—A "charter party" is a contract of affreightment whereby the owner of a ship lets the whole, or part of the ship, to a shipper for conveyance of goods in consideration for payment of freight.—Middle Atlantic Conference v. United States, 353 F. Supp. 1109 (1113)*.

Section 302 (e) [§*902(e) U.S.C.*] **"Contract carrier by water."**—[Unchanged. See vol. 11, p. 9589.]

Notes of Decisions

Volume 11—p. 9590; Volume 12—p. 10482; Volume 13—p. 11124; Volume 14—p. 11647; Volume 15—p. 12259; Volume 16—p. 12926; Volume 17—p. 13634; Volume 19—p. 15921; Volume 21—p. 17679.

Regulations of the Commission

38 FR 3389, Feb. 6, 1973, Part 1003: List of Forms, §1002.2 Water Carrier Application Forms; Form BWC 4 is vacated and set aside, to be superseded by Form OP-WC-10. 49 CFR §1003.2 is amended by adding thereto the heading OP-WC-10, effective Feb. 12, 1973.

Section 302 (f), (g), (h) [§*902(f),(g),(h) U.S.C.*]—[Unchanged. See vol. 11, p. 9592.]

Notes of Decisions

302(g): Volume 13—p. 11125; §302(h): Volume 11—p. 9592; Volume 12—p. 10483; Volume 15—p. 12261; Volume 18—p. 14655.

Section 302. (i) [§*902(i) U.S.C.*] "Interstate or foreign transportation"—[Unchanged. See vol. 11, p. 9592.]

Historical notes, see vol. 14, p. 11649.

Notes of Decisions

Volume 11—p. 9593; Volume 12—p. 10484; Volume 13—p. 11126; Volume 14—p. 11649; Volume 15—p. 12261; Volume 16—p. 12927; Volume 17—p. 13635; Volume 18—p. 14655; Volume 19—p. 15922; Volume 21—p. 17681.

5. Interstate transportation.—[Vols. 11-17].—Petitioner's water carrier operations between Port of Sacramento, Calif., and ports in San Francisco Bay area found to be in interstate or foreign commerce. Petitioner acts as a substitute for and in lieu of direct call at Sacramento by ocean common carriers and this Commission has consistently held that service substituted for common carriage is itself common carriage and requires the appropriate authority.—Sacramento—Yolo Port District, Petition, 341 I.C.C. 105 (112-13).

10 Transportation to or from a foreign country.—[Vols. 12, 14, 15, 17-19, 21].—The Commission has jurisdiction over tariffs of joint rates and through movements established by carriers subject to this section and vessels engaged in foreign commerce.—International Joint Rates and Through Routes, 337 I.C.C. 625 (631-32).

Commission has jurisdiction to the extent that there is a movement between two points in the United States and a "transshipment" of lading among vessels generally is sufficient to bring inland water movements within our jurisdiction except that transfer between commonly owned vessels and LASH (lighter-aboard-ship) movements do not constitute a transshipment.—Sacramento—Yolo Port District, Petition, 341 I.C.C. 105 (110-12).

Applicant subject to regulation as contract motor carrier for shipper (unregulated water carrier) engaged in foreign commerce, regardless of limited scope of proposed transportation service.—Service Transfer, Inc., Contract Carrier Application, 115 M.C.C. 29 (32-33).

Section 302 (j)—(m) [§*902 U.S.C.*] Definitions.—[Unchanged. See vol. 11, p. 9593, 9594.]

Section 303. (a) [§*903(a) U.S.C.*] Application of provisions; exemptions.—[Unchanged. See vol. 11, p. 9594.]

Section 303. (b) [§*903(b) U.S.C.*] Bulk cargo carriers; commodities.—Nothing in this part shall apply to the transportation by a water carrier of commodities in bulk. This subsection shall apply only in the case of commodities in bulk which are (in accordance with the existing custom of the trade in the handling and transportation of such commodities as of June 1, 1939) loaded and carried without wrappers or containers and received and delivered by the carrier without transportation mark or count. This subsection shall not apply to transportation subject, at the time this part takes effect, to the provisions of the Intercoastal Shipping Act, 1933, as amended. (Sept. 18, 1940, c. 722, 54 Stat. 931; December 27, 1973, Public Law 93-201, 87 Stat. 838. See vol. 11, p. 9594).

Historical notes, vol. 14, p. 11649; vol. 19, p. 15923; vol. 21, p. 17681.

Notes of Decisions

Volume 11—p. 9594; Volume 12—p. 10486; Volume 13—p. 11127; Volume 14—p. 11650; Volume 15—p. 12262; Volume 16—p. 12928; Volume 17—p. 13635; Volume 18—p. 14656; Volume 19—p. 15923; Volume 21—p. 17681.

1. In general.—[Vols. 11-19, 21].—See Behnken Truck Service, Inc., Ext.—Ex-barge Traffic, at §203(a)(10), n. 5, and Bulk Food Carriers, Inc.—Exemption Application, at §303(e)(2), n. 10.

Section 303. (c) [§*903(c) U.S.C.*]—[Unchanged. See vol. 11, p. 9595.]

Section 303. (d) [§*903(d) U.S.C.*] Liquid cargoes in bulk in tank vessels, exempt.—[Unchanged. See vol. 11, p. 9595.]

Notes of Decisions

Volume 11—p. 9596; Volume 12—p. 10487; Volume 13—p. 11127; Volume 14—p. 11650; Volume 19—p. 15924.

Section 303. (e) [§*903(e) U.S.C.*] Passenger transportation via foreign ports; Noncompetitive contract carriers.—[Unchanged. See vol. 19, p. 15924.]

See vol. 19, p. 15924.]

Notes of Decisions

Volume 11—p. 9597; Volume 12—p. 10488; Volume 13—p. 11128; Volume 14—p. 11651; Volume 15—p. 12262; Volume 17—p. 13637; Volume 18—p. 14656; Volume 19—p. 15925.

10. Noncompetitive contract carrier operation.—[Vols. 11-15, 17, 18].—Proposed transportation by applicant as a contract carrier by water, of phosphate rock, in bulk, from ports on the west coast of Florida to ports in California by way of the Panama Canal is not actually and substantially competitive with common carriers by rail, motor, or water, and an exemption therefor should be granted. Application for permit consequently denied. Legislative history shows that the absolute exemptions in subsection 303(b), from which phosphate rock was excluded because intercoastal transportation was subject to the provisions of the Intercoastal Shipping Act of 1933 at the time part III of the Interstate Commerce Act was enacted, were given on the premise that the transportation by water carriers of bulk commodities under certain conditions can be performed at such low cost as not to be competitive with transportation by other water carriers or land carriers.—Bulk Food Carriers, Inc.—Exemption Application, 326 I.C.C. 106 (107, 109-10, 112).

Where, as here, no realistic rail rate on the same or a similar movement exists from and to the same points, the conclusion is warranted that at least the bulk nature of this commodity, and the volume of the commodity which must move at one time, coupled with other transportation characteristics has made rail movements impractical or unattractive.—Id., p. 112.

There is little support for the alternative claim of the railroads that by virtue of the fact that they now participate in the movement of substantially the same commodity from points in Wyoming to the same destinations as are here concerned they are in actual competition for the traffic. If market competition were to be the determinative consideration there would be few or no situations wherein an absence of such competition could be found. Moreover, proceedings of a similar nature in the past have given no consideration to market competition. There is nothing in the plain wording of §303 or the legislative history thereof to demonstrate that the requested exemption should be denied in order to enable or help a land carrier which serves markets other than those from which water transportation is available to negate the advantages of low-cost water transportation.—Id., p. 111.

Section 303. (f) [§*903(f) U.S.C.*] Incidental water transportation, terminal services, subject to Part I or Part II, exempt.—[Unchanged. See vol. 11, p. 9599.]

Amendments, see footnotes, p. 9599.

Section 303. (h) [§*903(h) U.S.C.*] Property transported that of the carrier; certificate of exemption; revocation. [Unchanged. See vol. 11, p. 9602.]

Notes of Decisions

Volume 11—p. 9602; Volume 12—p. 10493; Volume 13—p. 11130; Volume 17—p. 13638; Volume 19—p. 15925.

Regulations of the Commission

38 FR 3389, Feb. 6, 1973, Part 1003: List of Forms, §1003.2 Water Carrier Application Forms; Form BWC 4 is vacated and set aside, to be superceded by Form OP-WC-10. 49 CFR §1003.2 amended by adding thereto the heading OP-WC-10, effective Feb. 12, 1973.

Section 303. (i), (j), (k), (l) [§*903(i)—(l) U.S.C.*]—[Unchanged. See vol. 11, p. 9603.]

Notes of Decisions

§303(j): Volume 12—p. 10493; Volume 14—p. 11652.

Section 304. (a)—(d) [§*904(a)—(d) U.S.C.*]—[Unchanged. See vol. 11, p. 9604.]

Historical Note

On August 9, 1973, the Commission recommended to Congress legislation to amend §§12(1), 204(a)(6), 304(a), and 403(a) of the Interstate Commerce Act to enable the Commission to exempt certain transportation from regulation upon a finding that the regulation is not necessary in order to effectuate the National Transportation Policy and that regulation would serve no public purpose. (S. 2458). Annual Report, 1974, p. 84.

See also vol. 21, p. 17683.

Notes of Decisions

§304(c): Volume 11—p. 9604; Volume 12—p. 10493; Volume 13—p. 11130, Volume 14—p. 11652; Volume 15—p. 12264; Volume 16—p. 12928; Volume 21—p. 17683.

Section 304. (e) [§*904(e) U.S.C.*] Investigation of complaints; orders.—[Unchanged. See vol. 11, p. 9605.]

Notes of Decisions

Volume 16—p. 12929; Volume 17—p. 13638; Volume 21—p. 17684.

Section 305. (a) [§*905(a) U.S.C.*] Reasonable rates, fares, charges; classifications, regulations, practices.—[Unchanged. See vol. 11, p. 9605.]

Notes of Decisions

Volume 11—p. 9606; Volume 12—p. 10494; Volume 13—p. 11131; Volume 14—p. 11653; Volume 15—p. 12264; Volume 16—p. 12929; Volume 17—p. 13639; Volume 18—p. 14658; Volume 19—p. 15926; Volume 21—p. 17685.

1. Charges required to be just and reasonable.—[Vols. 15, 19].—Respondent's reduced rate for deferred service found just and reasonable, as well as compensatory.—Safety Matches from Atlantic Ports to Pacific Ports, 325 I.C.C. 212 (219)*.

Rates, by Commodities

125. Commodities; characteristics; rates prescribed or approved.—[Vols. 11-19, 21].—Part I, §1(5), n. 350; Part II, §216(b), n. 125; Part IV, §404(a), n. 125.

Miscellaneous: [Vols. 11, 21].—Proposed rates for deferred service, whereby shippers request transportation when the carrier would have otherwise unutilized capacity available, approved at $36.80 per ton for safety matches, and $28.00 per ton for piling casings.—Safety Matches from Atlantic Ports to Pacific Ports, 325 I.C.C. 212 (219)*.

Rules, Regulations, Practices

550. Duty to provide transportation.—See also John J. Mulqueen Revocation of Certificate, at §312a, notes 27 and 30.

Under "deferred service", whereby shippers request transportation when the carrier would have otherwise unutilized capacity, and under which they would pay a special rate, the carrier nonetheless has an obligation which cannot be avoided and does not have the option to refuse to accept merchandise. Deferred service therefore is not in violation of §305(a).—Safety Matches from Atlantic Ports to Pacific Ports, 325 I.C.C. 212 (215)*.

Section 305. (b) [§*905(b) U.S.C.*] Duty to establish through routes, joint rates; divisions.—[Unchanged. See vol. 11, p. 9612; vol. 21, p. 17689.]

Notes of Decisions

Volume 11—p. 9612; Volume 12—p. 10495; Volume 13—p. 11131; Volume 15—p. 12267; Volume 16—p. 12931; Volume 21—p. 17690.

Section 305. (c) [§*905(c) U.S.C.*] Undue preferences or prejudices prohibited.—[Unchanged. See vol. 11, p. 9612.]

Notes of Decisions

Volume 12—p. 10495; Volume 14—p. 11655; Volume 15—p. 12267; Volume 16—p. 12932; Volume 18—p. 14660; Volume 19—p. 15928; Volume 21—p. 17690.

15. Differences in and comparisons of rates.—[Vols. 15, 18].—Respondent's proposal to offer a special rate for "deferred service", whereby shippers request transportation when the carrier would have otherwise unutilized capacity available, is not unjustly discriminatory, since all shippers alike could avail themselves of the proposed rate. Approved.—Safety Matches from Atlantic Ports to Pacific Ports, 325 I.C.C. 212 (215, 218)*.

Proposed rates for deferred service were not predicated on the "added-traffic" theory, which assumes that equipment would move empty or partially empty and that the running costs should be omitted except for the minor incremental costs incurred over and above that of running loaded rather than empty. The full amount of vessel steaming costs, based on an average cost per weight-ton, was used by respondent in computing the costs of moving the traffic on its deferred service basis.—Id., p. 218.

Section 305. (d) [§*905(d) U.S.C.*] Interchange of traffic.—[Unchanged. See vol. 11, p. 9613.]

Regulations of the Commission

36 FR 16228, Aug. 20, 1971: Special Permission No. 72-810, Fares, Charges, Etc.; Postponement of Effectiveness of Increases, Reestablishment of Lower Rates. Effective Aug. 16, 1971, rules of various Commission tariff circulars are waived to extent necessary to permit carriers to publish and file tariff supplements mandated by the Executive Order of Aug. 15, 1971 entitled Providing for Stabilization of Prices, Rents, Wages, and Salaries.

36 FR 16228, Aug. 20, 1971: Suspension Docket No. 8664, Stabilization of Rates and Charges, August 1971. Operation of schedules of new increased rates, fares and charges, etc., filed to become effective Aug. 17, 1971, and later, which would be in violation of the Executive Order of Aug. 15, 1971 entitled Providing for Stabilization of Prices, Rents, Wages, and Salaries, is suspended, effective Aug. 16, 1971.

36 FR 16975, Aug. 26, 1971: Suspension Docket No. 8664, Sub. No. 1, Stabilization of Rates and Charges, August 1971. Operation of schedules of new increased rates, fares and charges, etc., filed to become effective Aug. 24, 1971, and later, is suspended, effective Aug. 23, 1971.

36 FR 21857, Nov. 16, 1971: Suspension Docket No. 8688, Stabilization of Rates and Charges. Operation of schedules publishing new increased rates, fares and charges, etc., which, if permitted to become effective, would result in rates and charges that would violate Executive Order No. 11627, dated Oct. 15, 1971 (except those currently under suspension and investigation), ordered suspended, and use thereof deferred, for indefinite period pending further Commission order.

36 FR 22300, Nov. 24, 1971, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program, §1311.0 - §1311.5, new Part 1311 added, effective day after publication in Federal Register.

36 FR 22341, Nov. 24, 1971: Suspension Docket No. 8688, Sub-No. 2, vacates indefinite suspension of operation of certain schedules, subject to conditions set forth, effective on date of order.

36 FR 23108, Dec. 3, 1971: Suspension Doc. No. 8688 (Sub No. 1) Stabilization of Rates and Charges, certain schedules of increased rates suspended by order of Nov. 19, 1971.

36 FR 23108, Dec. 3, 1971: Suspension Doc. No. 8688 (Sub No. 3) Stabilization of Rates and Charges, certain schedules of increased rates suspended by order of Nov. 24, 1971.

37 FR 1107, Jan 26, 1972, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program, special procedures prescribed by order of Nov. 19, 1971 (36 FR 22300) revised in order to conform to, and implement, §300.16 of the regulations of the Price Commission (37 FR 652), effective on date of order.

37 FR 3354, Feb. 15, 1972, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program; Price Commission having deferred until March 10, 1972 public utility rate increases proposed to become effective on or after Feb. 10, 1972, carriers are directed to defer indefinitely the effective dates of all increased rates, fares, charges, etc., proposed to become effective during the Price Commission deferral period, effective on date of order.

37 FR 6149, March 24, 1972, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program. Carriers authorized to cancel indefinite postponement of effective dates of proposed increased rates, fares, charges, etc., required by the order of Feb. 11, 1972, effective on date of order.

37 FR 9398, May 10, 1972, Part 1303: Passenger Service Schedules—Rail and Water Carriers, §1303.36 Transmission of publications to subscribers, added, effective June 21, 1972.

37 FR 9399, May 10, 1972, Part 1308: Freight Tariffs and Schedules of Water Carriers, §1308.12 Transmission of publications to subscribers, added, effective June 21, 1972.

37 FR 12239, June 21, 1972, Parts 1303 and 1308: Order of May 1, 1972 (37 FR 9398) requiring transmission of tariffs and schedules to subscribers and other interested parties, stayed pending disposition of timely filed petitions for reconsideration, effective on date of order.

37 FR 14308, July 19, 1972, Part 1311: Special Procedures for Tariff Filings Under the Wage and Stabilization Program, entire Part 1311 revised, effective on day following publication in the Federal Register.

37 FR 18550, Sept. 13, 1972, Part 1303: Passenger Service Schedules—Rail and Water Carriers, §1303.36 Transmission of publications to subscribers, amended, effective 60 days after publication in Federal Register.

37 FR 18553, Sept. 13, 1972, Part 1308: Freight Tariffs and Schedules of Water Carriers, §1308.12 Transmission of publications to subscribers, amended, effective 60 days after publication in Federal Register.

37 FR 25399, Nov. 30, 1972, Parts 1303 and 1308: Order of Aug. 28, 1972 establishing regulations for the transmission of tariff and schedule publications to subscribers and other interested parties, which had been stayed, made effective 30 days after publication of order in the Federal Register.

38 FR 2177, Jan. 22, 1973, Part 1311: Special Procedures for Tariff Filings under the Wage and Price Stabilization Program. Pursuant to end of Phase II and beginning of Phase III, mandatory application of regulations is suspended, effective Jan. 11, 1973, until further notice; but such regulations shall be construed as voluntary guidelines.

38 FR 3389, Feb. 6, 1973, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program, §1311.5 Standards applicable during Phase III of the wage and price stabilization program, adopted Jan. 30, 1973.

37 FR 4257, March 1, 1972, Part 1005: Principles and Practices for the Investigation and Voluntary Disposition of Loss and Damage Claims and Processing Salvage, new Part 1005, §§1005.1 - 1005.6, added to become effective April 20, 1972.

37 FR 9027, May 4, 1972, Part 1005: Principles and Practices for the Investigation and Voluntary Disposition of Loss and Damage Claims and Processing Salvage, effective date of prescribed regulations postponed until July 1, 1972, effective on date of order.

37 FR 20943, Oct. 5, 1972, Part 1005: Principles and Practices for the Investigation and Voluntary Disposition of Loss and Damage Claims and Processing Salvage, §§1005.3(b) and 1005.4(c) modified, effective Oct. 16, 1972.

37 FR 23908, Nov. 10, 1972, Part 1005: Principles and Practices for the Investigation and Voluntary Disposition of Loss and Damage Claims and Processing Salvage, second paragraph of §1005.3 and §1005.4(c) revised, effective Oct. 16, 1972.

38 FR 16231, June 21, 1973, Part 1300: Freight Tariffs, §1300.0(a) amended so as to more clearly indicate those carriers subject to regulations promulgated under Part 1300 of the CFR.

39 FR 30145, Aug. 21, 1975, Part 1308: Freight tariffs and schedules of water carriers. Rules promulgating general provisions; definitions, effective Sept. 30, 1974.

40 FR 6503, Feb. 12, 1975, Part 1308: Freight tariffs and schedules of water carriers. Miscellaneous amendments, effective 90 days from date of service.

40 FR 7653, Feb. 21, 1975, Part 1308: Freight tariffs and schedules of water carriers. Correction of 40 FR 6503.

40 FR 25677, June 18, 1975, Part 1308: Freight tariffs and schedules of water carriers. Miscellaneous amendments, effective 30 days from date of service.

Section 306. (b) [§*906(b) U.S.C.*] Form and manner of publishing, filing, posting schedules; unlawful use.—[Unchanged. See vol. 11, p. 9614.]

Section 306. (c) [§*906(c) U.S.C.*] Deviation from tariff rates forbidden.—[Unchanged. See vol. 11, p. 9615.]

Notes of Decisions

Volume 12—p. 10499.

Section 307. (f) [§*907(f) U.S.C.*] Transportation needs and fair return considered in determining rates, etc.—[Unchanged. See vol. 11, p. 9620.]

Historical notes, see vol. 11, p. 9620, vol. 12, p. 10499.

Notes of Decisions

Volume 11—p. 9620; Volume 13—p. 11133; Volume 14—p. 11658; Volume 15—p. 12271; Volume 16—p. 12937; Volume 17—p. 13643.

10. Inherent advantages of water transportation.—[Vols. 14, 16].—Applicant's ability to provide direct deliveries to the jobsite and cost of the transportation are factors to be considered in determining the inherent advantages possessed by the several modes of transportation. See 355 US 83.—McAllister Bros., Inc., Ext.,—Steel, 332 I.C.C. 505 (510).

Section 307. (g) [§*907(g) U.S.C.*] New rates; determination of lawfulness by commission.—[Unchanged. See vol. 11, p. 9621.]

Notes of Decisions

Volume 11—p. 9622; Volume 12—p. 10499; Volume 16—p. 12937; Volume 19—p. 15932; Volume 21—p. 17693.

27. Particular issues; reasonableness.—[Vols. 16, 21].—Sea-Land's proposed reduced rate on canned goods of 78 cents, minimum 80,000 pounds, from Florida origins to New York City and New Jersey and New York points taking New York City rates, designed to maintain slight differential under reduced rail TOFC level, found to be no lower than necessary to enable it to participate in the traffic and to be just and reasonable. While proposed motor-water-motor rate is not shown to cover out-of-pocket costs, it will return more revenue than could be obtained under present rates and will enable water carrier to avoid further diversion of traffic to rail movement; moreover, shippers benefit from having available competing modes of service and, considering service advantages of rail movement, survival of Sea-Land's service requires a lower rate level than the railroads; approved.—Canned or Preserved Foodstuffs from Fla. to N.Y. & N.J., 326 I.C.C. 776 (782-4)*.

Historical note, see vol. 21, p. 17698.

Notes of Decisions

Volume 11—p. 9632; Volume 12—p. 10506; Volume 13—p. 11137; Volume 14—p. 11661; Volume 15—p. 12275; Volume 16—p. 12939; Volume 17—p. 13645; Volume 18—p. 14666; Volume 19—p. 15934; Volume 21—p. 17698.

5. Competition.—[Vols. 12-19, 21].—Although traffic now moving to or from points on waterways over which applicant seeks extension authority is handled chiefly by rail or motor carriers, and no shipper dissatisfaction with their services is shown, adequate rail and motor service, standing alone, does not warrant denial of authority for a water-carrier operation. The shipping public is entitled to benefit from advantages of water-carrier service, including low-cost transportation, even though rail and motor transportation is available. And though protestant water carrier holds authority over waterways involved, its service through interchange has proved unsatisfactory to public supporting extension application, especially through failure to provide suitable equipment and its disinterest in shippers' needs, as demonstrated by its failure to reply to inquiries concerning service and rates. Extension authority granted.—Coyle Lines, Inc., Extension, 323 I.C.C. 386 (392-3).

Commission did not consider competitive effect of granting of authority to additional applicants as no existing service is now available on the Waterway and a conclusion of destructive competition would be based on highly speculative inferences not supported by the record.—Igert Extension—Arkansas River, 332 I.C.C. 696 (703-704).

7. Restriction of operation.—[Vols. 13-15, 17-19].—Imposition of a tacking restriction on authority granted applicant Sioux City & New Orleans Barge Lines, Inc., is not warranted as protestant applicant Mississippi Valley Barge Line Co. has not shown that it will be adversely affected by the tacking of authorities which will permit another carrier to perform similar operations.—Igert Extension—Arkansas River, 332 I.C.C. 696 (707).

25. Necessity, demand for service, in general.—[Vols. 11-19, 21].—In action to suspend, annul, set aside and reverse decision and order of the Commission denying application of barge line (plaintiff) for extension of its common carrier authority, judicial review is limited to consideration of whether the order has a rational basis and is supported by substantial evidence. A reviewing court may not substitute its own judgment, with reference to competitive considerations or others, for that of the Commission upon matters committed to its determination, if the Commission's judgment has support in the record and the applicable law. The court cannot say that record fails to support the Commission's conclusion that, all circumstances considered, applicant had not sustained its burden of proof to show that public convenience and necessity require its proposed service, or that Commission order denying the application lacks a rational basis; complaint dismissed.—James Hughes, Inc. v. United States, 292 F. Supp. 372 (373)*.

In determining whether a proposed service is required by present or future public convenience and necessity, it is essential to consider service available from existing carriers. While most of traffic of supporting shippers to and from points in considered territory now moves by rail, a substantial portion thereof has characteristics inherently suited to low-cost water transportation. Supporting shippers seek low-cost transportation on a competitive basis, without interchange among carriers, as barge service available through interchange has proved generally unsatisfactory. While shippers and receivers of freight are not necessarily entitled to single-line barge service, they are entitled to adequate water service upon proof of need therefor. Extension authority granted.—Coyle Lines, Inc., Extension, 323 I.C.C. 386 (392-3).

Commission found that applicant's transportation of passengers is not interstate commerce, regardless of the passenger's intention to continue or complete an interstate journey, inasmuch as applicant has no joint fares with motor carriers, sells no through tickets, and operates within a single state. Similarly, the bulk of applicant's freight transportation within the State of Massachusetts cannot be considered interstate commerce in the absence of a showing of continuity of transportation from out of state origins, or where the original movement into the state was within vehicle of a private carrier. Shippers' support of applicant is inadequate to establish a need for the proposed service. Application denied.—Nantucket Exp. Lines, Inc., Common Carrier Application, 332 I.C.C. 80 (82-83).

The record is clear that supporting public requires low-cost transportation suitable for the considered traffic volume, and applicant has undertaken to supply the need therefor. No water carriers oppose the application. The shipping public is entitled to the inherent advantages of water as well as rail service where a need for water carrier service is shown. See 285 ICC 472. Application approved.—McAllister Bros., Inc., Ext.—Steel, 332 I.C.C. 505 (510).

Under part II of the Act, specific authority is not required for the return transportation of shipments rejected by consignee prior to delivery, see 74 MCC 659, and we see no reason why this policy may not be extended to this question under part III. However, applicant may not tow vessels containing "rejected" shipments accepted initially by consignee and subsequently rejected as no need for this service has been shown.—Id., pp. 510-511.

Commission has consistently held that public is entitled to certain inherent advantages in water transportation including advantage of low rates, if such be the case. Shipper desire for lower rates does not justify a grant of authority but is a factor to be considered. Cost data proving lower rate will result from applicant's service is desirable but not essential; its absence does not require denial of application. Similarly, availability of rail service does not preclude grant of authority. Application approved.—McAllister Brothers, Inc., Extension—Steel, 335 I.C.C. 52 (54-6)*.

Commission, following the principle of 83 MCC 123, held that return of empty shipper-owned or shipper-furnished vessels or barges used in connection with an authorized movement is merely incidental to that movement and is an integral part of the authorized movement, requiring no additional grant of authority. Essential element is that shipper have a preconceived plan whereby one portion of the total movement involves delivery or return of empty vessel.—Id., p. 56.

Multiple applications for certification to operate non-self-propelled vessels and separate towing vessels over indicated routes granted, with restrictions indicated herein, as great public expense has recently made the proposed routes navigable; substantial industrial development is anticipated; and numerous shippers and public officials support the applications.—Igert Extension—Arkansas River, 335 I.C.C. 225 (230-31)*.

26. Fitness; financial ability.—[Vols. 11-19, 21].—Commission found that applicant's failure to prove proposed extension of water carrier operations between indicated ports to be economically sound is not sufficient ground to deny such application. Management should have the prerogative of having the determinant role in this respect provided the other requirements of the act are met.—Sea-Land Service, Inc., Extension—Pacific Coastwise, 329 I.C.C. 447 (455)*.

A specific finding as to applicant's fitness is not required herein as application to operate as water common carrier between points in Massachusetts was denied for failure to establish that a need exists for such proposed service.—Nantucket Exp. Lines, Inc., Common Carrier Application, 332 I.C.C. 80 (84).

65. Extension of operations.—[Vols. 12-19].—Extension authority granted applicant for freighting and towage operations over Chattahoochee and Flint River tributaries of Appalachicola River, over which it already operates. A substantial portion of traffic now moving to and from points thereon, and of that which will be generated upon completion of plants now under construction in the area, particularly inbound raw materials and products of industries on Mississippi River and Gulf Intracoastal Waterway, over which applicant also operates, is inherently suited to low-cost water transportation; and though protestant can provide through water service by interchange with other carriers, most of supporting shippers' traffic now requires negotiation of interline arrangements for each movement, and service thus available has proved generally unsatisfactory. Applicant should be permitted to provide the single-line service for which shippers have expressed need.—Coyle Lines, Inc., Extension, 323 I.C.C. 386 (392-3).

Proposed extension of operations as water common carrier of general commodities between specified Pacific coast ports approved upon compliance with certain conditions and restrictions indicated herein. No water carrier containership service is now available for such movements and testimony by shipping public has shown a need exists therefor. Presence of adequate motor and rail services is no reason to deny shippers the inherent advantages of water transportation.—Sea-Land Service, Inc., Extension—Pacific Coastwise, 329 I.C.C. 447 (456)*.

Commission authorized 10 applicants to conduct towing and freighting operations along the recently opened Arkansas—Verdegris Waterway from Catoosa, Okla., to the Waterway's confluence with the Mississippi River in view of their extensive past operations on the Mississippi River, the anticipated traffic growth on the Waterway, and needs of shippers for carriers with nearby bases. However, 4 applicants were denied authority sought for failure to show any substantial past operations on the pertinent portion of the Mississippi River and the substantial distances between their bases of operations and the Waterway. Also, one applicant was denied authority for failure to show a public need for its service.—Igert Extension—Arkansas River, 332 I.C.C. 696 (704-05).

Section 309. (d) [§*909(d) U.S.C.*] Specifications of routes, ports; extension of routes; restriction on additions to equipment.—[Unchanged. See vol. 11, p. 9633.]

Volume 12—p. 10510; Volume 13—p. 11139; Volume 14—p. 11663; Volume 15—p. 12276; Volume 16—p. 12942; Volume 17—p. 13650; Volume 18—p. 14670; Volume 19—p. 15937; Volume 21—p. 17699.

30. Ports, points, routes, waterways to be served.—[Vols. 14, 15, 19].—Defendant's authority to serve the port of Los Angeles Harbor includes service at port facilities of Long Beach, Calif., as well as those of Los Angeles, Calif., because related port and industrial development at Long Beach is within limits of terminal area of the port of LosiAngeles and because these ports are in fact one continuous and extensive harbor area, although governed by separate municipal organizations.—Atchison, T. & S. F. Ry. Co. v. Sea-Land Service, Inc., 103 M.C.C. 184 (191-92).

Section 309. (e) [§*909(e) U.S.C.*] Certificate not to confer proprietary or exclusive rights in waterways.—[Unchanged. See vol. 11, p. 9634.]

Section 309. (f) [§*909(f) U.S.C.*] Permit essential to operation; carriers in bonafide operation on January 1, 1940.—[Unchanged. See vol. 19, p. 15938.]

Notes of Decisions

Section 309. (g) [§*909(g) U.S.C.*] Application for permit; form and contents; issuance of permit; terms and conditions.—[Unchanged. See vol. 11, p. 9636.]

Historical note, see vol. 21, p. 17700.

Notes of Decisions

Volume 11—p. 9636; Volume 12—p. 10512; Volume 13—p. 11141; Volume 14—p. 11666; Volume 15—p. 12278; Volume 16—p. 12942; Volume 17—p. 13651; Volume 18—p. 14670; Volume 19—p. 15939; Volume 21—p. 17700.

2. Construction and interpretation.—[Vols. 11, 15].—See also Bulk Food Carriers, Inc.—Exemption Application, at §303(e)(2), n. 10.

Application of §309(g) is not limited to carriers engaged in actual contract carriage, but also to the furnishing or chartering of vessels, since §302(e) specifies that chartering activities shall be considered engaging in transportation. However, the proviso of §309(g) forbidding any restriction on a contract carrier's right to add to its equipment and services within scope of its permit does not bar the imposition in a §5 proceeding of a restriction on the chartering rights transferred limiting vendee to the chartering of vessels owned by it; such a restriction is a part of the terms and conditions of approval of the transaction and is unlike one imposed on authority granted in a permit which will continue to be held by the carrier to which it was initially issued.—Ingram Corp.—Purchase—Barrett Line, Inc., 324 I.C.C. 263 (267,270).

25. Necessity, demand for service, in general.—[Vols. 11-19, 21].—Commission approved application as contract carrier of newsprint inasmuch as supporting shipper has shown a need for proposed service and protestant water carriers have not solicited this traffic and have not shown that their available joint-line service would be as economical as proposed operations. Protestant railroad also offers service but shippers are entitled to inherent advantages of water as well as rail service as was stated in 285 ICC 472. Criteria for approval of contract carrier applications by water carriers rest upon same statutory findings as those for motor carriers. However, the Congress spelled out certain criteria of public interest in its 1957 amendment of §209(b) but the provisions of this section have remained unchanged since 1940 and are stated in 285 ICC 107 and 311 ICC 609.—American Coastal Lines, Inc., Ext.—Houston, Tex., 337 I.C.C. 849 (855-56).

Regulations of the Commission

38 FR 26205, Part 1003: List of Forms. Setting forth Form OP—WC—20 to be used for applications for water carrier certificate or permit and revoking previous forms B.W.C. 3 and B.W.C. 7, effective Sept. 23, 1973.

Section 310. [§*910 U.S.C.*] Dual operations under certificates and permits.—[Unchanged. See vol. 11, p. 9638.]

Amendment, see footnote, vol. 11, p. 9638.

Notes of Decisions

Volume 11—p. 9638; Volume 12—p. 10512; Volume 13—p. 11142; Volume 14—p. 11666; Volume 18—p. 14671; Volume 21—p. 17701.

1. In general.—[Vols. 11-14, 18, 21].—Subject to cancellation of that part of vendor's permit authorizing towage operations duplicating common-carrier towage rights of one of vendee's subsidiaries, vendee's holding or control of operating rights both as a common and a contract carrier will be unobjectionable, since operations under the certificates and the permit will be conducted entirely separately.—Ingram Corp.—Purchase—Barrett Line, Inc., 324 I.C.C. 263 (267, 269).

Section 311. (a), (b) [§*911 U.S.C.*] Temporary operations.—[Unchanged. See vol. 11, p. 9638, vol. 15, p. 12279, vol. 16, pp. 12943-4.]

Notes of Decisions

Volume 12—p. 10513; Volume 13—p. 11142; Volume 14—p. 11667; Volume 15—p. 12280; Volume 16—p. 12944; Volume 18—p. 14671.

Regulations of the Commission

39 FR 6711, Feb. 22, 1974, Part 1131a: Temporary Authority Applications under §311(a) of the Interstate Commerce Act. Promulgation of regulations regarding Water Carrier Temporary Authority by addition of Part 1131a to 49 CFR, effective Mar. 17, 1974.

Section 312. [§*912 U.S.C.*] Transfer of certificates and permits.—[Unchanged. See vol. 11, p. 9639.]

Historical Notes, see vol. 15, p. 12280, vol. 16, p. 12945, vol. 17, p. 13652, vol. 19, p. 15940.

Notes of Decisions

Volume 13—p. 11143; Volume 14—p. 11667; Volume 16—p. 12945; Volume 17—p. 13632; Volume 18—p. 14671; Volume 19—p. 15940; Volume 21—p. 17701.

5. Transfers, in general.—[Vols. 14, 16-18, 21].—Evidence of record establishes that operations under certificate W-195 had ceased in 1955 on the extinguishment of respondent's corporate charter and said certificate constituted only assets of the corporation. Then holders of respondent's capital stock failed to give notice and seek approval of a transfer of certificate to successors-in-interest, failing which present holders of respondent's capital stock have no authority to conduct operations under the certificate.—River Transp. Co. of St. Louis Cancellation, 337 I.C.C. 487 (490-91).

10 Transactions under §5.—[Vols. 13, 14, 19, 21].—Sale of vendor's permit and physical properties to a corporation already controlling water carriers is properly for consideration only under §5; transfer of the permit itself is merely an incident flowing from approval of the §5 transaction, and it has been the practice before and since effective date of the transfer regulations to handle transfers of type involved under §5.—Ingram Corp.—Purchase—Barrett Line, Inc., 324 I.C.C. 263 (268).

Section 312a. [§*912a U.S.C.*] Revocation of certificates and permits.—[Unchanged. See vol. 21, p. 17702.]

2. Construction and interpretation.—Complainant Mechling's argument that defendant's failure to exercise its certificate authority is a self-executing forfeiture of the certificate is not valid. Supreme Court held in 329 US 424 that a "certificate when finally granted and time fixed for rehearing has passed is not subject to revocation in whole or in part except as specifically authorized by Congress". Complainant having failed to bear burden of proof required by Congress in §312a of the act for revocation, complaint is hereby dismissed.—Mechling Barge Lines, Inc. v. N.O. & Vicksburg Packet, 337 I.C.C. 257 (262).

Although dormant, certificate authority may be revived at any time by holder. Defendant's conduct is not shown to violate §305(a) which prescribes duties of water common carriers. Applicant's failure to attract sufficient traffic so as to render continuous service is not determinative of compliance with §305(a) as applicant cannot be penalized for shippers' failure to tender traffic. Record shows defendant intends to serve general public and complainant fails to establish any material allegations to the contrary.—Id., p. 263-64.

Commission found that respondent holding certificate W-195 as a water common carrier has ceased all operations authorized by such certificate in willful violation of §305(a). Obligation to provide service still rests upon respondent corporation and any successor-in-interest entitled to corporation assets under governing State laws. The respondent is ordered to resume authorized operations and inform this Commission of such resumption, failing which said certificate will be revoked.—River Transp. Co. of St. Louis Cancellation, 337 I.C.C. 487 (491-2).

20. Abandonment generally.—Evidence of record, herein specified, shows that operations by certificate holder Mulqueen have been completely dormant for 14 years. Such evidence constitutes a voluntary and willful cessation of operations on a permanent basis and is sufficient by itself to show abandonment and it is unnecessary to prove that a recent request for service has been unmet as such request would not logically be made.—John J. Mulqueen Revocation of Certificate, 332 I.C.C. 390 (393-94).

27. Suspension of authority.—Section 312a provides that a water carrier certificate may be revoked after reasonable notice and opportunity for hearing but such power is limited solely to carriers which willfully fail to perform, provide, or furnish transportation upon reasonable request therefor as provided in §305(a).—John J. Mulqueen Revocation of Certificate, 332 I.C.C. 390 (393)..

30. Orders of Commission.—The Commission finds certificate holder Mulqueen has ceased authorized operations and we hereby order respondent, Mulqueen's successor-in-interest, to provide such authorized operations and to notify this Commission of its compliance within the time periods specified herein, failing which the operating authority will be revoked for non-compliance with provisions of §305(a).—John J. Mulqueen Revocation of Certificate, 332 I.C.C. 390 (395).

Section 313. (a) [§*913(a) U.S.C.*] Accounts, records and reports.—[Unchanged. See vol. 11, p. 9639, vol. 15, p. 12280.]

Amendments, see footnotes, vol. 15, p. 12281; historical notes, see vol. 12, p. 10330, vol. 13, p. 11032, vol. 14, note to §20(1), p. 11543; vol. 19, p. 15940; Volume 21—p. 17703.

Regulations of the Commission

§317(f): Volume 12—p. 10515; Volume 21—p. 17706.

Section 318. [§*918 U.S.C.*]—[Unchanged. See vol. 11, p. 9650.]

Historical Note

By provision of §108 of the Truth in Lending Act, Public Law 90-321, 82 Stat. 146, responsibility for administrative enforcement of that act is assigned to the Commission with respect to any common carrier which it regulates and, for the purpose of enforcing compliance therewith, the Commission may exercise any other authority conferred on it by law. Also, while the Board of Governors of the Federal Reserve System is directed to prescribe regulations to carry out purposes of the Truth in Lending Act (12 CFR Part 226, 34 FR 2002, Feb. 11, 1969), the statute specifically provides that such Board authority does not impair the authority of any other agency responsible for administrative enforcement to make rules respecting its own enforcement and compliance procedures.

Regulations of the Commission

37 FR 5304, March 14, 1972, Part 1325: Extension of Credit to Candidates for Federal Office of Their Representatives, in implementation of the Federal Election Campaign Act of 1971 (Public Law 92-225), new Part 1325, as set forth, added effective May 5, 1972 unless modified or amended by further order of the Commission.

37 FR 10446, May 23, 1972, Part 1325: Extension of Credit to Candidates for Federal Office or Their Representatives. Credit regulations set forth in notice of proposed rule making and order (37 FR 5304) prescribed to become effective May 5, 1972.

Notes of Decisions

Volume 12—p. 10516; Volume 14—p. 11669; Volume 19—p. 15942; Volume 21—p. 17706.

Sections 321, 322. [§§*921,922 U.S.C.*]—[Unchanged. See vol. 11, pp. 9653, 9654.]

Section 323. [§*922a U.S.C.*] **Recording of evidences of equipment indebtedness.**—[Unchanged. See vol. 21, p. 17706.]

Regulations of the Commission

33 FR 17688, Nov. 27, 1968, Part 1116: Recordation of Documents, §§1116.1(a), 1116.4(c) and (d), and 1116.5 are amended to provide for filing and recordation of documents by water carriers, effective Dec. 23, 1968.

Section 324. [§*922b U.S.C.*] **Filing of information return or other report for income tax purposes with State or subdivision by water carrier on compensation paid to interstate employees.**—(a) No water carrier subject to the provisions of this part nor any water carrier or class of water carriers operating on inland or coastal waters under an exemption provided therein shall file any information return or other report for income tax purposes with respect to the compensation paid to any employee who performs his regularly assigned duties as an employee of such carrier in more than one State with any State or subdivision thereof other than the State or subdivision of such employee's residence, as shown on the employment records of such carrier, and the State or subdivision in which such employee earned more than 50 per centum of the compensation paid him by such carrier during the preceding calendar year. The provisions of this section shall also apply with respect to the compensation paid to any master, officer, or seaman who is a member of the crew on a vessel engaged in foreign, coastwise, intercoastal or noncontiguous trade or in the fisheries of the United States.

(b) For the purposes of subsection (a), an employee shall be deemed to have earned more than 50 per centum of his compensation in any State or subdivision in which the time worked by him in such State or subdivision is more than 50 per centum of the total time worked by him in the calendar year while so employed.

(c) For the purpose of this section the term 'compensation' shall mean all moneys received for services rendered by an employee, as defined in subsection (a) in the performance of his duties and shall include wages and salary. (Act of Dec. 23, 1970, Public Law 91-569, §3, 84 Stat. 1501.)

Section 325. [§*923 U.S.C.*] **Separability of provisions.**—[By act of Dec. 23, 1970, Public Law 91-569, §3, 84 Stat. 1501, former section 324 is redesignated as section 325. See vol. 11, p. 9656.]

PART IV

INTERSTATE COMMERCE ACT, FREIGHT FORWARDERS

Chapter 13, Title 49, U.S. Code

Section 401. ***[§1001 U.S.C.]*** **Short title.**—[Unchanged. See vol. 11, p. 9656.]

Section 402. (a) (1)-(4) ***[§1002(a) (1)-(4) U.S.C.]*** **Definitions and exemptions.**—[Unchanged. See vol. 11, p. 9656.]

Section 402. (a) (5) ***[§1002(a) (5) U.S.C.]*** **Freight forwarder defined.**—[Unchanged. See vol. 15, p. 12284.]

Notes of Decisions

Volume 12—p.10516; Vol. 13—p. 11147; Volume 14—p. 11670; Volume 15—p. 12285; Volume 16—p. 12947; Volume 17—p. 13654; Volume 18—p. 14674; Volume 19—p. 15943; Volume 21—p. 17708.

1. Freight forwarder defined.—[Vols. 12-19, 21].—Since §402 (a)(5) requires, among other things, that a freight forwarder perform or provide for break-bulk and distribution of consolidated loads and assume common-carrier responsibility for transporting freight from origin to destination for the general public, failure of an organization to provide those specific services can only mean that it is not providing a complete forwarder service and thus is not subject to regulation. Therefore, there being no evidence to show that either the exempt shippers' association or the corporate consolidator or shippers' agent, which—because it is owned by person hired as association's general agent—the Commission found to be controlled by the association, provides any break-bulk or distribution services to the public or assumes any carrier responsibility, the record does not support the Commission's conclusion that combined operations of the association and the shippers' agent constituted an unauthorized freight forwarder service.—Columbia Shippers and Receivers Ass'n, Inc. v. United States, 301 F. Supp. 310 (323-4)*.

Accordingly, as the Commission has no basis upon which to regulate either the exempt association or the shippers' agent, the record affords no support for its decision that the association's practice of utilizing services of the corporate agent to co-load its members' truckload freight with that of independent, for-profit, non-member shippers constituted a complete freight forwarder service which, being performed without a forwarder permit, violated the statute. The Commission's cease and desist order, requiring plaintiff shippers' association to terminate the specified unlawful co-loading practice, therefore, must be set aside.—Id., pp. 314, 321-2, 324.

To be within the statutory definition of "freight forwarder," one need not actually perform all the functions specified in §402(a)(5); as long as a party *proffers* all the services described in the statute, whether or not performed, it will qualify as a freight forwarder. Therefore, though plaintiff claims its operations were those of an exempt "shippers' agent," if it performs or proffers to the general public—and for compensation—the services enumerated in §402(a)(5), then provisions of §410(a) would require that it terminate operations until such time as it receives appropriate freight forwarder authorization therefor. The Commission's cease-and-desist order, sustained.—Metropolitan Shipping Agents of Ill., Inc. v. United States, 342 F. Supp. 1266 (1268-9, 1271)*.

One carrier may make use of the service which another carrier holds out to the public generally. So long as the first carrier is operating *qua* carrier and gives the public proper notice through its tariff, it can substitute another's service for its own in this way. However, should the first carrier hold out to perform what may amount only to assembly and distribution services at points, and should it use the underlying transportation of the second carrier between points, which it cannot itself serve in a practicable manner, it would no doubt be found to be operating not a carrier but as a freight forwarder. Where it does have the requisite authority, it may perform such service not as a forwarder but as a carrier because §402(a)(5) defines a freight forwarder as any person performing forwarding services other than as a carrier subject to parts I, II, or II of the Act.—Substituted Service—Piggyback, 322 I.C.C. 301 (335)*.

Record as a whole is convincing that petitioner, though ostensibly offering a consolidation service to shippers as their agent, actually provides a complete freight forwarder service, for compensation, within meaning of §402(a)(5). It holds out to serve the public, being willing to serve any shipper that will sign its agreement and agency designation and pay its bills; it solicits new accounts and has not refused to serve anyone seeking to use its services. Consignors look to it to provide a complete transportation service, and in doing so it uses its own service for pickup and consolidation, rail TOFC service for the line-haul to Chicago (generally in trailers leased from the railroad's subsidiary), and a single common distributor (a certificated motor carrier) at Chicago for all else. Whether it actually requires shippers to use the one Chicago distributor is unimportant, since the plan III service cannot be used otherwise, and, having chosen to use petitioner's service, no other choice is possible to them. Petitioner's activities satisfy all requirements of the forwarder definition, and its petition for a declaratory order to the contrary must be denied.—Bab Transfer, Inc., Petition for Declaratory Order, 323 I.C.C. 574 (597-8).

At the suggestion of the president of a freight consolidator which then employed him, respondent Bentin organized respondent Cooperative and became its general manager, and Cooperative employed the consolidator as its exclusive consolidating agent; and distribution service at New Orleans was performed by a local cartage company owned by Bentin's son. The purported membership of Cooperative, obtained by

Bentin's solicitation of New Orleans receivers of goods from the East and Midwest, had no voice in management of the business, the profit of which went almost entirely to Bentin, who termed himself Cooperative's "sole owner," and at all times controlled and managed its affairs. As it is abundantly clear that the physical service received by Cooperative's individual shipper members was identical to that ordinarily provided by a regulated forwarder, it is beyond dispute that the combined operations of Cooperative and its consolidating and distributing agents were conducted as an unauthorized forwarder service.—New Orleans Shippers Assn., Inc., Investigation, 323 I.C.C. 619 (621, 636, 637).

The total situation remained essentially the same in all substantive respects after Bentin incorporated respondent Association and became its salaried general manager. Association occupied the same premises and performed the same functions with the same personnel; the consolidating agent's identity and services remained unchanged; though Bentin and his son formed a partnership to supplant the son's sole proprietorship, the distribution service was performed with the same trucks and drivers under essentially the same management; Cooperative's members were automatically treated as those of Association; and respondent consolidator continued to finance the operation by prepaying rail freight charges and advancing inbound motor carrier charges. Conclusively, the operations conducted in Association's name were for all practical purposes identical to those of Cooperative, albeit under a new cloak. And though, following Bentin's illness and incapacity, there was some minor shifting of responsibility, there were no material changes. Association has thus continued Cooperative's unlawful operations; cease-and-desist order entered.—Id., pp. 637-8.

One of the essential elements of a freight forwarder service as defined in §402(a)(5) is that the forwarder use, "for the whole or any part of the transportation of such shipments, the services of a carrier or carriers subject to part I, II, or III of this Act." While shipments handled by applicant or its predecessor between points in Hawaii were interstate in character because they originated outside of Hawaii, the underlying carriers operated between Hawaiian ports by ship or barge, and such water carriers, operating on the high seas between ports in Hawaii, are not subject to part III. No service by any carrier subject to part I is snown to have been used, and, to the extent that incidental motor carrier services may be used, such transportation has been exempted from regulation under part II. Therefore, any transportation service provided by applicant between points wholly within Hawaii is not a freight forwarder service subject to the permit requirements of part IV.—Star Forwarders, Inc., 323 I.C.C. 721 (726).

The evidence adduced concerning defendant's piggyback service for individual or non-association groups of shippers persuasively establishes that such operations are in fact those of a freight forwarder as defined in §402(a)(5) of the Act. Two letters, one to a shipper, and one to consignees, sent by defendant, and an advertisement placed by defendant show that defendant holds itself out to perform a complete freight forwarding service including the essential requisites of performing consolidation and either performing or providing for the performance of break-bulk and distribution service. Nothing more is required of the shipper other than the mere tender of traffic to defendant at New York in order to obtain delivery to the ultimate consignee. It is further apparent that such service is held out to the general public since no more is required to avail oneself of defendants comprehensive service than execution of an "agency" agreement, and the tender of shipments of a class consolidated by defendants and destined to points to which its service is offered. Cease and desist order entered.—Natl. Motor Frt. Traf. Assn., Inc., v. Vendors Consolidating, 326 I.C.C. 262 (274-75).

On reconsideration, prior finding that in order to retain the status of freight forwarder, it is not necessary for applicant to assemble and consolidate and break bulk and distribute as to every shipment handled, is affirmed. To hold otherwise would disregard §402(a)(5), which defines a freight forwarder as "any person which *** in the ordinary and usual course of its undertaking assembles and consolidates***." The very essence of applicant's proposal is to pair truckload shipments to obtain the advantages of TOFC plan III service. If in certain instances he is unable to pair two shipments destined to the same point at the same time, he does not destroy his forwarder status by handling a single unconsolidated shipment. —Brinke Freight Forwarder Application, 326 I.C.C. 322 (324-25)*.

On reconsideration, definitional provisions of this section are satisfied where applicant's proposed operations between states of Washington and Alaska contemplate utilization of the services of a carrier subject to part I of the Act for switching at Seattle, despite fact that remainder of transportation is to be performed by carriers not subject to part I, II, or III of the act.— North Star Forwarding Co. Freight Forwarder Applic., 326 I.C.C. 734 (735)*.

On question of whether a forwarding service is offered, statutory requirement that assembling, consolidating, and break-bulk operations be performed "in the ordinary and usual course of [forwarder] undertaking" does not require that they be performed on all shipments. Also, while applicant may perform some consolidation and break-bulk operations at ports, airports, or outside of the United States, the performance thereof is what is important in determining whether the nature of its service is that of a freight forwarder, not that geographical location of the performance was within the Commission's jurisdiction. Evidence shows that applicant, in fact, performs consolidation and break-bulk operations "in the normal course of its business" as an exempt forwarder of used household goods, and on part of the unaccompanied baggage it handles; therefore, its operations do meet criteria specified in §402(a)(5) definition of a freight forwarder despite fact that, because economy or dispatch may warrant individual handling, such operations are not performed on all shipments.—Routed Thru-Pac, Inc., Freight Forwarder Application, 332 I.C.C. 352 (367-9)*.

Commission found that operations of defendant Intermountain between points in California and Hawaii are those of a freight forwarder as evidence shows defendant advertises and offers the public a "door to door" service on such movements utilizing motor and water common carriers as its agents and defendant assumes responsibility for the disposition of loss and damage claims.—Star Forwarders, Inc. v. Intermountain Fast Frt., 337 I.C.C. 265 (268-73).

Any person which offers a service involving the consolidation of c.o.d. traffic, moving from multiple consignors to multiple consignees, and which undertakes to effect the transportation arrangements, will find it extremely difficult to avoid freight forwarder status. To the shipping public, such an undertaking constitutes the essence of freight forwarding, for it proclaims to the shipper essentially that his traffic will move to destination at volume rates, without further effort on his part. Consequently, in a determination of the status of such an operation under §402(a)(5), the form of the arrangements among the participants in the process is of secondary concern; it makes no essential difference whether the through transportation process is coordinated under formal agreements or is conducted by means of implied understandings or working arrangements between the consolidator and its distributing agents.—Haley Transfer & Storage—Investigation of Operations, 340 I.C.C. 350 (356).

Commission notes that our regulatory jurisdiction in connection with the performance of an intermodal land-water-land service extends only to that part of the through movement conducted by underlying carriers subject to our jurisdiction under parts I, II, or III of the Interstate Commerce Act. A nonvessel-operating common carrier, such as applicant, remains subject to jurisdiction of the Federal Maritime Commission while utilizing services of a vessel-operating (ocean) common carrier by water. This situation is analogous to that of air freight forwarders stated in 339 ICC 17. Applicant's questioned inland operations are those of a freight forwarder.—C T I— Container Transport, Internat., Frt. Forwarder Applic., 341 I.C.C. 169 (184-88).

Although applicant explicitly conceded that its questioned operations are those of a freight forwarder thus rendering that issue uncontroverted and moot, the Commission's conclusion is in no way altered. All elements delineated in §402(a)(5) as definitive of a freight forwarder's operations are profferred by either applicant or its proposed agent.—Id., pp. 188-91.

Since §402(a)(5) excludes motor carriers subject to part II from "freight forwarder" as defined therein, once applicant becomes a certificated motor carrier subject to part II, whether or not it performs operations engaged in by freight forwarders becomes moot, because its certificated authority permits such operations subject only to appropriate tariffs. Applicant's proposed transportation of cash letters between country banks and correspondent banks, using service of buslines for part of the haul under interline arrangement but under its responsibility to shipper for the entire movement, is therefore not a forwarder operation.—Continental Dispatch, Inc., 95 M.C.C. 483 (486, 488).

Operations of persons engaged in forwarding containerized shipments of used household goods (both independent forwarders and those controlled by regulated motor carriers), purportedly conducted under §402(b)(2) exemption, found to be those of a freight forwarder as defined in §402(a)(5), including requirement therein that forwarders consolidate and breakbulk or provide therefor. The statute does not require that consolidation occur at one place, and the Commission has recognized that consolidation may be performed in various ways; thus, considered joint loading by independent forwarders, if properly effected, constitutes the assembly and consolidation required of a forwarder; and, in circumstances presented, such consolidations are effected in the ordinary and usual course of exempt forwarders' undertakings when the joint loading is properly effected.—Kingpak, Inc., Investigation of Operations, 103 M.C.C. 318 (327-32)*.

Furthermore, inasmuch as the independent forwarders and the motor carriers render substantially the same type of service in the same manner to the shipper (i.e., a bona fide freight forwarding service, albeit exempted from regulation under part IV), insofar as authorized motor carriers render considered containerized services, they are, in fact, operating as forwarders; and conclusions stated with regard to the forwarder operations apply equally in all respects to such motor carriers. Criteria to assist exempt forwarders, and practices to be observed by regulated motor carriers performing the same service, are set forth merely as guidelines for their future performance of considered services.—Id., pp. 332, 333-6.

In enacting part IV of the Act, it was contemplated by Congress that the Interstate Commerce Commission was to have jurisdiction over that part of the activities of air freight forwarders which constitute surface forwarding not within the scope of the §203(b)(7a) exemption. Thus, those activities of air freight forwarders conducted beyond recognized air terminal areas and bearing the indicia of surface forwarding as set forth in §402(a)(5) of the Act are subject to the Commission's economic regulation under part IV of the Interstate Commerce Act.—Theodore Savage Contract Carrier Application, 108 M.C.C. 205, (215-6)*.

2. Construction and interpretation.—[Vol. 19]—See also Trans-American World Transit, Inc., Frt. Fwd. Applic., at §402(b), n. 30.

In suit to set aside Commission finding that the forwarding of unaccompanied baggage which moves independently from householder's other goods is not within §402 (b)(2) "used household goods" exemption, the court is not concerned with accuracy of the Commission's reasoning, but only with whether there is warrant in the law and facts for its decision. The legislative history, and the absence of a statutory definition of "used household goods," make it clear that Congress left to the Commission the responsibility for delineating the scope of that exemption; and the determination thereof is clearly within its competence. The Commission's interpretation of the exemption is consistent with practice in the freight forwarding industry and is within the congressional intent to exempt only used household goods; its determination is one within Commission expertise, and is amply supported by the record. Therefore, on the record, the Commission correctly concluded that where an exempt forwarder of used household goods handles any commodity not within that description, its operation is subject to Commission jurisdiction.—American Movers Conference v. United States, 307 F. Supp. 74 (79-80)*.

Proposal by applicant, operating as an exempt freight forwarder, to forward "used household goods," one of the commodities listed in the statute as exempt, as well as "used automobiles and unaccompanied baggage," which are not so listed, raises questions concerning §402(b)(2) which require proper interpretation, in light of legislative history and past precedents, of the used household goods exemption. The Commission has taken the view, since first required to interpret the section, that when one is engaged in forwarding commodities other than one of the classes specified in §402(b)(2), its entire operation is subject to the provisions of part IV; and the legislative history gives support to prior Commission interpretation. On review of all pertinent legislative history, the only conclusion to be drawn is that §402(b)(2) was intended to exempt only a forwarding service which is confined exclusively to one of the commodities enumerated as exempt. Therefore, absent any convincing reason for reversal of that interpretation, conclusions reached in the cited proceedings, which have stood as the Commission's decision since shortly after enactment of part IV, are affirmed.—Routed Thru-Pac, Inc., Freight Forwarder Application, 332 I.C.C. 352 (355-61)*.

30. Household goods.—[Vols. 12, 14, 18, 19, 21].—Although "used household goods" includes used automobiles when forwarded in connection with the personal effects and furniture of a householder, and such operations are exempt from economic regulation under Part IV, (since it engages in service with respect to more than one of the classifications of property specified in §402(b)), applicant is entitled to "grandfather" authority for continuance of those operations under §410(a)(2),(3).—Bekins Household Shipping Co., 323 I.C.C. 382 (384). [But see dissent.]

Proposal by applicant, operating as an exempt forwarder, to forward commodities for which authority is otherwise required (used automobiles and unaccompanied baggage) in addition to used household goods, forwarding of which is exempt by §402(b)(2), would remove the exemption as to latter commodity so as to require authority for its entire operation. It is recognized that used automobiles when a part of the householder's property are "used household goods" and that, as a practical matter, automobiles do not move in the same manner nor together with such other goods, nevertheless they must be forwarded as part of, or in connection with, other household goods to fall within that category; and that requires their tender as part of the same shipment at approximately the same time. Therefore, since automobiles handled by applicant generally move with the shipper and not with other household goods, they cannot be considered as part of, or moved in connection with, a household goods shipment for which applicant, as a forwarder, is required to assume responsibility from origin to destination.—Routed Thru-Pac, Inc., Freight Forwarder Application, 332 I.C.C. 352 (355-8, 361-2)*.

On the other hand, the unaccompanied baggage applicant proposed to handle is shipped through from origin to destination, but often separately and by a different mode of conveyance. Though a householder's clothing and other personal belongings constitute household goods, unaccompanied baggage when shipped independently and in a separate movement may not be so classified and has traditionally required authority.

Also, while baggage need not move together with other used household goods in order to constitute a part thereof, it must be moved as a part of the same shipment, tendered about the same time, and handled under the same contract; if it is tendered at a different time, or if baggage is all that is moving, authority is required because the commodity has acquired a specific description and can no longer be considered within the generic description "used household goods." Thus, appropriate authority is required to handle unaccompanied baggage when (whether as only part of householder's total shipment, or as the only goods moving for a shipper) it moves independently at shipper's option and request.—Id., pp. 362-3.

Commission concluded that applicants' proposed operations in the forwarding of used household goods, unaccompanied baggage, and used automobiles are not exempt from Commission's regulation under §402(b) (2). Commission briefly stated scope of §402 (b) (2) exemption as regards traffic at issue and our jurisdiction over such traffic. Commission also noted that there is a much fuller discussion of the scope of the exemption and our jurisdiction in 332 ICC 352.—Smyth Worldwide Movers, Inc., F. F. Application, 337 I.C.C. 721 (734-6)*.

The term "used household goods" clearly does not comprehend such terms as fall within the second and third parts of Commission's definition of "household goods" at 49 CFR 1056, and "new" furniture or other "new " commodities obviously cannot be considered as "used" within the meaning of the exemption. Commission, citing 337 ICC 721 and 332 ICC 352, distinguished "household goods as defined by the Commission" and other items not embraced in §402(b) exemption from "used household goods".—International Sea Van, Inc., Frt. Forwarder Applic., 339 I.C.C. 408 (412-17).

"Used household goods" reflects only a portion of the commodity description "household goods as defined by the Commission", and does not encompass those services performed in relation to unaccompanied baggage and the other two categories of goods included within the phrase "household goods as defined by the Commission", nor does it include "new" articles.—Home-Pack Transport, Applic. for Forwarder Permit, 340 I.C.C. 98 (102-103)*.

Prior decision granting applicant domestic forwarding authority to transport used household goods, used automobiles, and unaccompanied baggage seems to be principally predicated on the examiner's mistaken belief that since the decision in 332 ICC 352, it is necessary for certificated motor carriers of household goods to be licensed under part IV in order lawfully to continue the household goods services performed in the past. That conclusion not only runs counter to express language in the cited case, but it also is inconsistent with other Commission and court decisions wherein it has been found that the cited decision relates solely to the interpretation of an exemption under part IV (in terms of commodities that may be forwarded) and not to operating authorities issued under part II (which describe services that carrier may provide), and that it may not be applied to construe motor carrier operating rights. See 307 F. Supp. 74.—Trans-American World Transit, Inc., Frt Fwd. Applic., 340 I.C.C. 196 (197, 203)*.

Statements of supporting shippers that they are forwarders of used household goods, exempt from regulation under §402(b), are accepted at face value; record contains no probative evidence to support a finding that they are unlawfully operating as unlicensed brokers, as protestant contends. Moreover, record does not indicate that that issue was raised at the hearing; nor does it indicate any distinguishing characteristics between protestant's "Maypack" service and the services of supporting shippers.—Nilson Extension, 95 M.C.C. 326 (328-9).

Forwarders of containerized shipments of used household goods, operating under the §402(b)(2) exemption, are freight forwarders within the definition in §402(a)(5); however, while there is no impropriety in their using agents for performance of certain functions, a true principal-agent relationship must be maintained, with the forwarder exercising substantial supervision and control over its traffic. Therefore, in view of prior uncertainty as to status of forwarders using such agents, criteria are set forth merly as guidelines to assist exempt forwarders in their future efforts to guard against practices which would cast doubt upon their entitlement to exemption under the statute. Also, regulated motor carriers rendering the same type of containerized services can operate as exempt forwarders, provided they conduct such exempt operations in a manner that will not affect service rendered under their motor carrier authority. Therefore, to eliminate possible undue or unreasonable preferences or advantages and to assure adequate public service, practices set forth must be observed when regulated and unregulated operations are conducted by the same carrier.—Kingpak, Inc., Investigation of Operations, 103 M.C.C. 318 (327-32, 334-6)*.

Freight forwarders exempt from regulation under §402(b)(2) are proper parties to support motor carriers' applications for authority to transport used household goods for such forwarders; protestants' contention that the Department of Defense is the "real shipper in interest" since it accounts for the greatest percentage of goods handled by exempt forwarders, misconceives the nature of the freight forwarder, who is the actual shipper as far as the carrier is concerned. Also, regulated forwarders have traditionally and appropriately supported the applications of those motor carriers necessary to provide service to them, and there is no logical reason why exempt forwarders should be treated differently.—Central Forwarding, Inc., Extension, 107 M.C.C. 706 (714).

Regulations of the Commission

39 FR 3270, Jan. 25, 1974, Part 1085: Freight Forwarders of Household Goods. Amending 49 CFR by addition of Part 1085 concerning certain consumer problems including form to be given to prospective shippers. Effective March 4, 1974.

39 FR 8920, March 7, 1974, Part 1085: Freight Forwarders of Household Goods. Effective date of order published at 39 FR 3270 postponed and fixed at June 3, 1974.

39 FR 18656, May 29, 1974, Part 1085: Freight Forwarders of Household Goods. Effective date of order of Jan. 3, 1974 postponed and fixed as July 1, 1974; and order of Feb. 28, 1974 vacated and set aside.

39 FR 27805, Aug. 1, 1974, Part 1085: Freight Forwarders of Household Goods. Effective date of order of Jan. 3, 1974, postponed and fixed as Aug. 1. 1974; and order of May 22, 1974 is vacated and set aside.

Section 402.(c) [*§1002(c) U.S.C.*] Exemptions.—[Unchanged. See vol. 11, p. 9658.]

Historical notes, vol. 16, p. 12948; vol. 17, p. 13655; vol. 18 p. 14676; vol. 19, p. 15945; vol. 21, p. 17713.

Notes of Decisions

Volume 12—p. 10518; Volume 13—p. 11148; Volume 14—p. 11672; Volume 15—p. 12286; Volume 17—p. 13655; Volume 18—p. 14676; Volume 21—p. 17713;

2. Construction and interpretation.—[Vols. 15, 21].—Respondent offers a service involving consolidation of c.o.d. traffic, moving from multiple consignors to multiple consignees, and undertakes to effect the transportation arrangements and is thus not found to warrant an exemption as its operations are those of a freight forwarder.—Haley Transfer & Storage—Investigation of Operations, 340 I.C.C. 350 (357).

15. Associations of shippers.—[Vols. 12-15, 17, 21].—It is now settled that the mere incorporation of a shippers' association whose consolidating and distributing activities would not otherwise subject it to economic regulation under Part IV does not in and of itself bring the association within the statute's licensing provisions.—New Orleans Shippers Assn., Inc., Investigation, 323 I.C.C. 619 (634).

Since Part IV prohibits the purchase and sale of unlicensed freight forwarding services generally, a lawful shippers' association may act neither as seller of such services, as it would in serving nonmember shippers, nor as a device through which its ostensible members purchase from others a complete forwarding service, as where the service is provided, not by the members themselves acting through their association, but by some independent entrepreneur. And where the freight consolidating and distributing operations are such that persons other than legitimate shipper members of the association either (a) have any right or ability to control, direct, or dominate such operations, or (b) bear the essential risks and burdens thereof, the purported members of the shipper group or association are in reality purchasing transportation from a person or persons unlawfully engaged in operation as an unauthorized freight forwarder.—Id., pp. 634-5.

An essential attribute of a legitimate shippers' association is the quality of subordination. In all its operations in connection with the consolidation, transportation, and distribution of freight it must act solely at the request, under the direction, and for the account and benefit of its members, and, as between the members and their association, the former must always act as principal and the latter as agent. As a corollary, where the association members, though enjoying benefits of a complete transportation service at volume rates, are shown not to have retained effective control over movement of their freight, but instead to have delegated all responsibility therefor to purported agents or employees, they have for all practical purposes invested the latter with the fundamental characteristics of an independent entrepreneur whose operations, if otherwise within the definition of a freight forwarder, are subject to licensing requirements of the Act.—Id., p. 635.

It is abundantly clear that, at least in its physical aspects, the service received by individual shipper members of respondent Association and its predecessor Cooperative is identical with that ordinarily performed by a regulated forwarder; without intervention on their part and merely by directing their suppliers to tender their shipments to respondents' consolidating agents at New York, Philadelphia, and Chicago, the New Orleans members of Cooperative and later of Association have obtained benefit of a complete door-to-door transportation service, the distribution service at New Orleans being performed by one of two successive distributing agents created by respondents. Evidence is equally convincing that the element of subordination has at all times been wholly lacking in respondents' operations; that their consignee members have never exercised any greater control or influence over their successive operations than if they had employed a regulated common-carrier agency; and that such consignees regarded their membership, not in terms of responsibilities assumed, but as a mere formality qualifying them to receive benefit, at an agreed rate, of a pre-existing and self-operating transportation service.—Id., p. 636.

And though there was some shifting of responsibilities following illness and incapacity of individual respondent who organized both Cooperative and Association, the purported members have assumed no greater dominion and control over operations of Association and its agents than existed at inception of those activities. Evidence conclusively demonstrates a total absence of good faith participation by members in Association's conduct and affairs and leaves no doubt that the reason for its existence was to enable respondents to operate unlawfully as freight forwarders. The members have never shared the burdens as well as the benefits of Association's operations and were not consulted in any way respecting its functioning; only a select few attended member meetings, and none possessed the knowledge and interest required to direct activities of the organization to which they merely lent their names. Respondents' combined operations have been unlawful from their inception; cease-and-desist order entered.—Id., p. 638.

While the evidence presented does raise strong inferences tending to show that the shippers' associations in question lack bona fides due to control and direction of their activities by defendants, such inferences are insufficient to support a definitive finding of unlawful operations on the part of these associations, and so far as this record shows, such associations alone perform or provide for the performance of break-bulk and distribution services at destination. It follows therefore, that operations performed by defendants as agent performing only consolidation services within the terminal areas of the involved origin points must be assumed to be performed in lawful compliance with §402(c)(2) of the act. However, defendant's consignment of traffic to itself for however limited a period of time, regardless of the attendant circumstances, was not performed under any reasonable interpretation of the §402(c) provisions, and plainly constituted the performance by defendants of freight forwarding service without appropriate authority.—Natl. Motor Frt. Assn., Inc., v. Vendors Consolidating, 326 I.C.C. 262 (272-73).

Defendant is a bona fide shippers' association. All its services are limited to operations conducted on behalf of members; these services are accomplished under the direction and control of shipper-member representatives, elected by defendant's membership to its board of directors; and the total charges for defendant's services are predicated closely to the actual cost thereof. Notwithstanding this, however, defendant should cease objectionable practices which tend to place defendant in violation of §410(a) of the Act.—Natl. Motor Frt. Traf. Assn. v. Industrial Shippers Assn., 103 M.C.C. 545 (552-3).

In view of pertinent criteria applicable to shippers' associations, discussed in 322 ICC 273, defendant association is found to be a bona fide shippers' association within the meaning of §402(c)(1); record shows that the idea and formation of defendant was shipper motivated, that only shippers are members, and that member-shippers have exercised effective control over the association and the individual who operates as their general agent and, also, have assumed essential risks and burdens incident to operating the association. Additionally, as there is no specific bar thereto, the practice of coloading by separate shippers' associations is consistent with the statute as long as the coloading benefits the members of each association and there is no holding out of service to the general public; however, coloading practiced by shippers' associations must stand or fall according to substantive provisions of §402(c) and is unaffected by "joint loading" provisions of §404(d) which apply only to regulated for-hire forwarders.—Natl. M. Frt. Traffic Assn. v. Columbia Shippers, 105 M.C.C. 846 (849-50, 851-2, 854, 856-7)*.

18. Operations as shipper's agent.—[Vols. 13, 15, 21].—See also Metropolitan Shipping Agents of Ill., Inc. v. United States, §402(a)(5), n. 1.

Applicant's operations are essentially those of a shipper's agent which are exempt from regulation, rather than of a freight forwarder. He is employed by Alaskan firms to schedule delivery of shipments to Seattle and arrange for their movement to Alaska by ocean water carriers, which are selected and paid for by consignees; his services include auditing of freight bills and arranging for assembly and consolidation of traffic at dockside, but no break-bulk and distribution of shipments; and he is paid for his services either on the basis of a retainer or about one half of the savings in the utilization of volume rates. Applicant does not publish tariffs or issue its own bill of lading; on all documents he designates himself as an "agent" for the shipper whose name appears thereon. Nor does he hold himself out to the general public to provide for transportation of property.—Stanley, 323 I.C.C. 499 (500-1).

Record as a whole makes clear that, while petitioner's considered activities may have commenced as result of a shipper's suggestion that a consolidation service be performed for mutual benefit of shippers attending the organizational meeting, the method of accomplishing that end has been performance of a freight forwarder service, although labeled in terms designed to preserve for petitioner the status of a consolidator only, as shippers' agent. The cloak of agency does not conceal the fact that petitioner, though using its own service for pickup and consolidation, uses rail plan III TOFC service for the line-haul to Chicago, and effectually requires all participants to use a single common distributor at Chicago in order that the plan III service can be used at all. Having thus held out and performed for compensation a service having all the elements of freight forwarding, petitioner may not disclaim its forwarder status by labeling itself an agent or consolidator within the terminal area of its operations.—Bab Transfer, Inc., Petition for Declaratory Order, 323 I.C.C. 574 (597, 598).

Although petitioner has identified itself as shippers' agent in its dealings with carriers and shippers, and has obtained from shippers signed agreements and designations of agency, to come within the exclusion of §402(c) its services must be confined to the terminal area in which the operations are conducted. Petitioner, however, has solicited throughout much of New England, leases trailers to provide movement from Springfield, Mass., to Chicago, and is the only moving party in providing for distribution at

Chicago. That the "designation of agent" specifies that its acceptance of shipments is subject to §402(c), or that its physical services are confined to its terminal area, do not exclude it as a mere consolidator from provisions of Part IV. Nor does shippers' device of furnishing two bills of lading have legal effect of separating the entire movement into two parts, one in Springfield and one in Chicago; shippers know from the very beginning that after shipments are turned over to petitioner in Springfield they will be delivered to consignees in Chicago.—Id., p. 599.

Upon further consideration, the Commission found respondent association's practice of coloading freight of its member carriers with freight of another shipper association on a non-profit basis to obtain the benefits of volume rates to be lawful. However, such coloading with nonmembers by for-profit shippers is not within the regulatory exemption of §402(c).—Piggy-Back Shippers Assn. of Florida-Investigation, 332 I.C.C. 349 (350-1)*.

Section 403. (a), (b) [*§1003(a), (b) U.S.C.*]—[Unchanged. See vol. 11, pp. 9658, 9659.]

Historical Note

On August 9, 1973, the Commission recommended to Congress legislation to amend §§12(1), 204(a)(6), 304(a), and 403(a) of the Interstate Commerce Act to enable the Commission to exempt certain transportation from regulation upon a finding that the regulation is not necessary in order to effectuate the National Transportation Policy and that regulation would serve no public purpose. (S. 2458). Annual Report, 1974, p. 84. See also vol. 21, p. 17723.

Section 403. (c), (d) [*§1002(c), (d) U.S.C.*] Security for protection of public.—[Unchanged. See vol. 11, p. 9659.]

Notes of Decisions

Volume 12—p. 10518; Volume 13—p. 11149; Volume 15—p. 12287; Volume 16—p. 12948.

Regulations of the Commission

33 FR 10572, July 25, 1968, Part 1084: Surety Bonds and Policies of Insurance, §1084.3 Limits of liability (a) Cargo, amended effective Jan. 1, 1969.

33 FR 14413, Sept. 25, 1968, Part 1003: List of Forms, §1003.3 Freight Forwarder Forms—(b) Insurance and surety bond forms. FF 43 Freight Forwarder Cargo Liability Surety Bond, revised, effective Jan. 1, 1969.

35 FR 2829, Feb. 11, 1970, Part 1084: Surety Bonds and Policies of Insurance, §1084.8 Forms and procedure*** (f) *Termination by replacement*, effective upon publication in the Federal Register.

39 FR 10254, Mar. 19, 1974, Part 1084: Surety Bonds and Policies of Insurance. Amendment of 49 CFR §1084.3(b) regarding limits of liability, effective July 1, 1974.

39 FR 11891, April 1, 1974, Part 1003: List of Forms. Regulations promulgated as to freight forwarder liability forms, effective July 1, 1974.

39 FR 13159, April 11, 1974, Part 1084: Surety Bonds and Policies of Insurance. Correction of order of Mar. 27, 1974 (39 FR 11891).

Section 403.(e) [*§1003(e) U.S.C.*]—[Unchanged. See vol. 11, pp. 9659.]

Section 403. (f) [*§1003(f) U.S.C.*] Investigation; hearing; enforcement.—[Unchanged. See vol. 11, pp 9660.]

Notes of Decisions

Volume 21—p. 17723.

12. Burden of proof.—In proceedings involving the operations of shippers' associations, a complainant who alleges that such association is conducting unlawful operations has met its initial burden of proof when it shows that association's operations, when viewed in light of the criteria of 322 ICC 273, appear to be subject to regulation. When evidence shows an association is holding out to serve the public or make a profit, that someone other than members direct and control the association, or that the membership has failed to assume the necessary risks and burdens, the association must come forward with rebuttal evidence; defendants or respondents, as the case may be, must negate a complainant's factual showing. In short, while ultimate risk of nonpersuasion remains on complainant throughout the proceeding, burden of proof shifts to defendant once complainant has established a prima facie case. On the record, complainants found to have met their initial burden of proof; esential facts are not disputed; and the record provides an adequate basis for a decision as to defendants' alleged unlawful operations.—Natl. M. Frt. Traffic Assn. v. Columbia Shippers, 105 M.C.C. 846 (847. 850)*.

15. Hearing.—[Vol. 21].—Respondents' petition for further hearing for receipt of additional evidence, on ground that lapse of time since hearings and changes of fact during that time have rendered the record deficient for purpose of determining status of respondents' operations in light of principles of 322 ICC 273, denied. Further hearing for introduction of evidence bearing on changed circumstances is neither necessary nor desirable: as administrative consideration of evidence presented in investigative proceedings must be fair and equitable to all parties, it is necessarily a difficult and time-consuming process, and it is therefore not unusual that a lengthy time passes before a final order is promulgated. If upon issuance of such order or at any time prior thereto litigants could demand rehearings as a matter of right on ground of some new circumstance or newly discovered fact, the administrative process could never achieve a just and effective conclusion.—New Orleans Shippers Assn., Inc., Investigation, 323 I.C.C. 619 (639-40).

20. Evidence.—[Vol. 21].—It is highly significant that petitioner, in seeking a declaratory order that its operations are not those of a freight forwarder as defined in §402(a)(5), refrained from offering as a witness its president, who, in soliciting shippers, offered them a through service to Chicago. It is undisputed that such person was in the city and available when hearing was held, and could have appeared himself to deny doing so if he had not solicited through transportation. Interveners' evidence is convincing in the matter, and therefore exhibit consisting of a document showing petitioner's charges for various services, which might be used in soliciting prospective shippers, is proper and credible evidence in view of other corroborative evidence of record.—Bab Transfer, Inc., Petition for Declaratory Order, 323 I.C.C. 574 (576, 592, 593, 599).

In an effort to refute similar exhibits listing rate information, petitioner offered to furnish as late-filed exhibits the plan II TOFC rates applicable on traffic of shipper intervener, together with an affidavit from that company's traffic manager indicating the proper commodity descriptions of its shipments; but as no such affidavit was received, the late-filed exhibits cannot be considered.—Id., p. 582.

Although examiner, over objection of petitioner's counsel, permitted examination of person who served a subpena on the traffic manager of one shipper concerning their conversation, at conclusion of such testimony he granted petitioner's motion to strike all testimony of that witness except that pertaining to service of the subpena. There is nothing in the examiner's conclusions (which the Commission adopts) that lends any support to petitioner's contentions of bias or of consideration of the testimony objected to, and examiner's denial of request to physically strike such testimony was within his discretionary authority.—Id., pp. 575, 576, 593.

Motion to strike as immaterial, impertinent, and improper all that portion of intervening forwarders' reply referring to evidence adduced in pending complaint against certain respondents to instant investigation, granted. The evidence taken from the other proceeding is prejudicial and was never properly introduced in instant proceeding, and movants have had no opportunity for cross-examination or rebuttal.—New Orleans Shippers Assn., Inc., Investigation, 323 I.C.C. 619 (633).

30. Orders of Commission.—[Vol. 21].—Since petition for a declaratory order that petitioner's operations and services are not those of a freight forwarder as defined in §402(a)(5) does not bring into issue any unlawful operations, entry of an order requiring it to cease and desist from unlawful operations is not within scope of the proceeding. However, deletion of examiner's recommended cease-and-desist order from proposed report otherwise adopted by the Commission as its own does not imply condonation of the operations and practices found by the examiner to be unauthorized freight forwarder operations, and petitioner is admonished to discontinue such operations immediately.—Bab Transfer, Inc., Petition for Declaratory Order, 323 I.C.C. 574 (575-6).

As combined operations of purported shippers' association and its consolidating and distributing agents constituted a single, jointly conducted, common-carrier forwarder service in violation of §410(a), each participant is individually responsible for the unauthorized performance of such service. Therefore, although principal individual respondent, who died before conclusions of the proceeding, and respondent partnership composed of him and his son, which under State law terminated upon his death, are excluded from cease-and-desist order, the son remains subject to the Commission's jurisdiction, and also, in view of his participation in the unlawful operations of the association and the partnership, to the cease-and-desist order entered against all respondents still in existence.—New Orleans Shippers Assn., Inc., Investigation, 323 I.C.C. 619 (639).

Section 404. (a) [*§1004(a) U.S.C.*] Rates, charges, and practices. Duty to establish reasonable rates, etc.; service; classifications, regulations and practices.—[Unchanged. See vol. 11, p. 9660.]

Historical note, vol. 14, p. 11673.

Notes of Decisions

Volume 12—p. 10519; Volume 13—p. 11151; Volume 15—p. 12288; Volume 16—p. 12949; Volume 17—p. 13656; Volume 18—p. 14676; Volume 19—p. 15945; Volume 21—p. 17727.

Rates by Commodities

125. Rates prescribed or approved.—[Vols. 17-19].—Part I, §1(5), n. 350; Part II, §216(b), n. 125; Part III, §305(a), n. 125.

Furniture: Proposed reduced commodity rate on wooden furniture of 225 cents, minimum 30,000 pounds, from El Segundo, Calif., to Chicago, Ill., found compensatory and lawful for the two indicated freight forwarder members of respondent tariff bureau but not lawful for those respondents not submitting cost evidence.—Wooden Furniture, El Segundo, Calif., to Chicago, Ill., 332 I.C.C. 37 (41-42).

Classifications, Class Rates

130. Class rates, ratings, exceptions.—[Vols. 18, 19, 21].—Proposed l.c.l. exceptions ratings on numerous commodities, 2.5 percent lower than corresponding classification ratings, to apply only when the commodities, as packed for shipment, weigh 40 pounds or more per cubic foot and certification to that effect is shown on shipping order and bill of lading, approved as compensatory and not competitively destructive or unfair. Respondent has lost considerable tonnage to private, pool-car, and other unregulated transportation, and in meeting competition common carriers are not required to withhold counteraction until total diversion occurs. Shippers support the proposal as conducive to better packaging, with decreased loss and damage, better use of space, and improved service at lower costs. While revenue effect of the proposal cannot be determined because additional volume that may be attracted is not known, the Commission does not sit in judgment on wisdom of carriers' proposals, but only on their lawfulness in terms of the regulatory statute.—Reduced Exceptions Ratings Based on Density, 323 I.C.C. 341 (342, 345-6).

Section 404. (b) [*§1004(b) U.S.C.*] Undue preferences or prejudices prohibited.—[Unchanged. See vol. 11, p. 9660.]

Notes of Decisions

Section 404. (c) [*§1004(c) U.S.C.*] Preference or advantage by common carrier.—[Unchanged. See vol. 11, p. 9661.]

Notes of Decisions

Volume 17—p. 13657.

Section 404. (d) [*§1004(d) U.S.C.*] Agreements for joint loading of traffic.—[Unchanged. See vol. 11, p. 9661.]

Notes of Decisions

Volume 13—p. 11152; Volume 14—p. 11673.

10. Joint loading, generally.—[Vols. 13, 14].—While the statute specifically allows regulated forwarders to joint load subject to Commission approval of joint-loading agreements, such joint loading is not restricted to forwarders subject to regulation. Section 404(d) does not preclude those forwarders not subject to the Act from joint loading, and §402(b)(2) specifically exempts forwarders of used household goods from "the provisions of this part" (part IV of the Act) not just the service subject to the part; thus, there is no proper ground for considering joint loading operations of independent forwarders of used household goods in the context of substantive provisions of an act from which they are specifically and totally exempted. However, since joint loading requires a participation by all concerned, whether the manner in which an independent forwarder engages in the practice constitutes such participation is considered and discussed.—Kingpak, Inc., Investigation of Operations, 103 M.C.C. 318 (328-9)*.

Inasmuch as provisions of §404(d) apply only to regulated for-hire forwarders, they do not affect coloading, as practiced by exempt shippers' associations; and whether or not such coloading practice is proper must stand or fall according to substantive provisions of §402(c) since, while §404(d) authorizes forwarders to enter into agreements for "joint loading" of traffic, there is no parallel provision applicable to shippers' associations. Section 404(d) allows a freight forwarder to use the employees and facilities of another forwarder and to engage in other mutual practices under certain conditions; however, provisions thereof apply only to regulated forwarders and neither enlarge nor diminish lawful scope of the operations of persons not subject to regulation.—Natl. M. Frt. Traffic Assn. v. Columbia Shippers, 105 M.C.C. 846 (856-7)*.

Section 405. (a) [*§1005(a) U.S.C.*] Tariffs of freight forwarders; filing, posting.—[Unchanged. See vol 11, p. 9661.]

Rules and Regulations

84. Liability provisions.—[Vols. 14, 15].—See Loss and Damage Claims, at §6(1), n. 84.

Regulations of the Commission

36 FR 16228, Aug. 20, 1971: Special Permission No. 72-810, Fares, Charges, Etc.; Postponement of Effectiveness of Increases, Reestablishment of Lower Rates. Effective Aug. 16, 1971, rules of various Commission tariff circulars are waived to extent necessary to permit carriers to publish and file tariff supplements mandated by the Executive Order of Aug. 15, 1971 entitled Providing for Stabilization of Prices, Rents, Wages, and Salaries.

36 FR 16228, Aug. 20, 1971: Suspension Docket No. 8664, Stabilization of Rates and Charges, August 1971. Operation of schedules of new increased rates, fares and charges, etc., filed to become effective Aug. 17, 1971, and later, which would be in violation of the Executive Order of Aug. 15, 1971 entitled Providing for Stabilization of Prices, Rents, Wages, and Salaries, is suspended, effective Aug. 16, 1971.

36 FR 16975, Aug. 26, 1971: Suspension docket No. 8664, Sub. No. 1, Stabilization of Rates and Charges, August 1971. Operation of schedules of new increased rates, fares and charges, etc., filed to become effective Aug. 24, 1971, and later, is suspended, effective Aug. 23, 1971.

36 FR 21857, Nov. 16, 1971: Suspension Docket No. 8688, Stabilization of Rates and Charges. Operation of schedules publishing new increased rates, fares and charges, etc., which, if permitted to become effective, would result in rates and charges that would violate Executive Order No. 11627, dated Oct. 15, 1971 (except those currently under suspension and investigation), ordered suspended, and use thereof deferred, for indefinite period pending further Commission order.

36 FR 22300, Nov. 24, 1971, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program, §1311.0 - §1311.5, new Part 1311 added, effective day after date of publication in Federal Register.

36 FR 22341, Nov. 24, 1971: Suspension Docket No. 8688, Sub-No. 2, vacates indefinite suspension of operation of certain schedules, subject to conditions set forth, effective on date of order.

36 FR 23108, Dec. 3, 1971: Suspension Doc. No. 8688 (Sub No. 1) Stabilization of Rates and Charges, certain schedules of increased rates suspended by order of Nov. 19, 1971.

36 FR 23108, Dec. 3, 1971: Suspension Doc. No. 8688 (Sub No. 3) Stabilization of Rates and Charges, certain schedules of increased rates suspended by order of Nov. 24, 1971.

37 FR 1107, Jan. 26, 1972, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program, special procedures prescribed by order of Nov. 19, 1971 (36 FR 22300) revised in order to conform to, and implement, §300.16 of the regulations of the Price Commission (37 FR 652), effective on date of order.

37 FR 3354, Feb. 15, 1972, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program; Price Commission having deferred until March 10, 1972 public utility rate increases proposed to become effective on or after Feb. 10, 1972, carriers are directed to defer indefinitely the effective dates of all increased rates, fares, charges, etc., proposed to become effective during the Price Commission deferral period, effective on date of order.

37 FR 6149, March 24, 1972, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization program. Carriers authorized to cancel indefinite postponement of effective dates of proposed increased rates, fares, charges, etc., required by the order of Feb. 11, 1972, effective on date of order.

37 FR 9399, May 10, 1972, Part 1309: Tariffs and Classifications of Freight Forwarders, §1309.5 Transmission of publications to subscribers, added, effective June 21, 1972.

37 FR 12239, June 21, 1972, Part 1309: Order of May 1, 1972 (37 FR 9398) requiring transmission of tariffs and schedules to subscribers and other interested parties, stayed pending disposition of timely filed petitions for reconsideration, effective on date of order.

37 FR 14308, July 19, 1972, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program, entire Part 1311 revised, effective on day following publication in the Federal Register.

37 FR 18554, Sept. 13, 1972, Part 1309: Tariffs and Classifications of Freight Forwarders, §1309.5 Transmission of publications to subscribers, amended, effective 60 days after publication in Federal Register.

37 FR 25399, Nov. 30, 1972, Part 1309: Tariffs and Classifications of Freight Forwarders, order of Aug. 28, 1972 establishing regulations for transmission of tariff and schedule publications to subscribers and other interested parties, which had been stayed, made effective 30 days after publication of order in Federal Register (11/30/72).

38 FR 2177, Jan. 22, 1973, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program. Pursuant to end of Phase II and beginning of Phase III, mandatory application of regulations is suspended, effective Jan. 11, 1973, until further notice; but such regulations shall be construed as voluntary guidelines.

38 FR 3389, Feb. 6, 1973, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program, §1311.5 Standards applicable during Phase III of the wage and price stabilization Program, adopted Jan. 30, 1973.

Section 405. (b) [*§1005(b) U.S.C.*] Form of tariffs prescribed by Commission; rejection of tariffs.—[Unchanged. See vol. 11, p. 9662.]

Section 405 (c) [*§1005(c) U.S.C.*] Deviation from rates and regulations enumerated in tariff forbidden; rebates; privileges.—[Unchanged. See vol. 11, p. 9662.]

Section 406. (e) [*§1006(e) U.S.C.*] New rates; determination of fairness by commission; suspension.—[Unchanged. See vol. 11, p. 9665.]

Notes of Decisions

Volume 12—p. 10522; Volume 16—p. 12953; Volume 17—p. 13659; Volume 18—p. 14684; Volume 19—p. 15954; Volume 21—p. 17730.

20. Evidence.—[Vols. 19, 21].—Increase in rates on transcontinental traffic, which accounts for somewhat more than half of respondents' total traffic, is sought to be justified on the basis of data relating to the respondents' total operating costs. Even assuming that the hearing examiner's adjustments have removed the distortions in the respondents' cost and revenue comparisons, such evidence is of little probative value. There is no showing, nor is it contended, that the transportation conditions surrounding the respondents' transcontinental traffic are similar to those associated with their other traffic. The increase in costs for line-haul motor service cannot reasonably be attributed to the respondents' transcontinental traffic, which is almost exclusively by rail TOFC service. Thus, lacking any showing of the extent that these costs have increased on transcontinental traffic, as distinguished from the respondents' other operations, we have no basis for concluding that these increases result from the respondents' transcontinental movements.—Freight Forwarder Increase, Transcontinental Terr., 326 I.C.C. 437 (447).

25. Burden of proof.—[Vols. 12, 16-19, 21].—Respondent freight forwarder tariff bureau has met the burden of proving reduced rate on wooden furniture from El Segundo, Calif., to Chicago, Ill., just and reasonable by introduction of adequate cost evidence showing reduced rate in excess of respondents' cost by a substantial margin.—Wooden Furniture, El Segundo, Calif., to Chicago, Ill., 332 I.C.C. 37 (39-41).

65. Reasonableness of proposed rates.—[Vols. 17-19, 21].—Proposed reduced rate on wooden furniture from El Segundo, Cal-

if., to Chicago, Ill., found just and reasonable for two indicated respondent members of tariff bureau as such rate has been shown to be compensatory, will not divert traffic from any regulated carrier, and will help to correct an existing traffic imbalance. Such rate is not shown just and reasonable for other respondents.—Wooden Furniture, El Segundo, Calif., to Chicago, Ill., 332 I.C.C. 37 (41).

66. Cost of service.—[Vols. 19, 21].—Respondent's purpose in establishing exceptions ratings on numerous commodity descriptions, based on increased density of packages, is to give fuller recognition to density as an element of cost; increase in density will result in increase of space available for light and bulky freight, and, as total cost varies with density, respondent's costs per trailerload become more economical as weight load increases. Respondent has submitted cost data to show that handling of traffic under increased-density packing would be less expensive than for normal density shipments, and, as class rates under exceptions ratings are involved and no serious contention of noncompensativeness is made, they are found to be compensatory; approved.—Reduced Exceptions Ratings Based on Density, 323 I.C.C. 341 (343, 344, 345).

Commission found it proper for respondent freight forwarders to charge one-half of the one-way charge as the cost of line-haul for each of two trailers loaded on a flatcar. This exception to round-trip basis for costing is justified as respondents pay rail charges based on available cubic feet per flatcar and not on a weight basis.—Wooden Furniture, El Segundo, Calif., to Chicago, Ill., 332 I.C.C. 37 (40-41).

Section 406. (f) [*§1006(f) U.S.C.*] Investigation involving State regulations; conference of State and interstate commissions; prescription of rates, regulations.—[Unchanged. See vol. 11, p. 9665.]

Section 406a. [*§1006a U.S.C.*] Actions for recovery of charges; limitation of actions; definition; effective date.—[Unchanged. See vol. 18, p. 14687, vol. 21, p. 17733.]

Notes of Decisions

Volume 14—p. 11674; Volume 15—p. 12292; Volume 16—p. 12953; Volume 17—p. 13660; Volume 18—p. 14688; Volume 21—p. 17734.

2. Construction and interpretation.—By amendment of §406a in Public Law 89-170, this Commission is specifically denied the jurisdiction to award reparations in contested proceedings. In view of this denial in relation to contested cases the Commission cannot assume jurisdiction in uncontested proceedings for reparations and cannot establish informal procedure for handling such cases. The willingness of a carrier to pay reparations is no substitute for the legislative delegation of authority.—Informal Procedure for Determining Reparation, 335 I.C.C. 403 (412-13).

Section 407. [*§1007 U.S.C.*] Motor carrier rates applicable to small parcel forwarding.—[Unchanged. See vol. 11, p. 9666.]

Section 408. [*§1008 U.S.C.*] Authority for assembling and distribution rates.—[Unchanged. See vol. 11, p. 9667.]

Notes of Decisions

Volume 12—p. 10523; Volume 13—p. 11155; Volume 14—p. 11675; Volume 15—p. 12293; Volume 17—p. 13660; Volume 18—p. 14688; Volume 19—p. 15958; Volume 21—p. 17734.

2. Construction and interpretation.—[Vols. 12-15, 21].—Assembling rates may not be restricted solely to traffic of freight forwarders, but must be made available to others using common carriers' services under like conditions; though the term "freight consolidators" is not used in §408, the physical similarity in carriers' handling of l.t.l. freight for forwarders and consolidators satisfies the requirement of "like conditions." Moreover, except for the carload or truckload requirement, the Act is silent concerning nature of movements beyond the assembly point; the legislative history discloses no intent of Congress to prohibit application of assembling rates on l.t.l. freight transported for a freight consolidator when reshipped by the consolidator in private carriage. Congress apparently intended a liberal interpretation of the class of persons who may utilize assembling rates, and the words "and others" in §408 have been found to include individual shippers and groups or associations. The Act does not prohibit consolidators' use of private carriage, and there is no basis for excluding shippers from benefit of assembling rates solely because they elect to use private carriage beyond the assembly point.—Assembling Rates to Atlanta, Charlotte, Greensboro, 323 I.C.C. 543 (547-8).

However, the movement beyond the assembly point must be as part of a c.l. or t.l. shipment. But though historically a t.l. shipment is one that substantially fills the carrying capacity of a vehicle, the term "truckload" does not lend itself to a definition that would be applicable in all instances; t.l. minima have been established at varying levels, and the circumstances surrounding the movement must be considered. Involved textile products will not move at high minima due to prevalence of any-quantity commodity rates, and suggested 12,000-pound minimum for shipments moving beyond assembly points in private carriage is in line with needs of supporting shipper, whose volume is determined by requirements of its branch stores. In the particular circumstances a minimum of 12,000 pounds is not so low as to constitute a less-than-truckload. Proposed assembling rates on textile products, when moved beyond assembly points by common or private carriage in truckloads of not less than 12,000 pounds, would be lawful under provisions of §408; however, such rates should be limited to traffic of freight consolidators, since §418 precludes use of private carriage by forwarders.—Id., pp. 548, 549. [But see dissent.]

5. Assembling and distribution rates.—[Vols. 13-15, 17-19, 21].—Proposed assembling commodity rates, on level approximating 80 percent of corresponding l.t.l. rates, on l.t.l. shipments of textile products from points in Georgia, the Carolinas, and Virginia to assembly points at Atlanta, Ga., and Charlotte, Greensboro, and Statesville, N.C., for movement beyond in consolidated truckloads by common or private carriers, would be lawful under §408 and otherwise just and reasonable if restricted to traffic moving to freight consolidators, and if made subject to the same t.l. minimum weight for the movement beyond the assembly point by either common or private carrier; suggested 12,000-pound minimum is not too low for the traffic involved and is in line with supporting shipper's requirements. Traffic destined for subsequent movement by both private and common carriers is handled in same manner by respondent, frequently in mixed shipments on one bill of lading, and proposed tariff provisions, amended as indicated, would alleviate rate errors and billing problems.—Assembling Rates to Atlanta, Charlotte, Greensboro, 323 I.C.C. 543 (545, 549).

Section 409. [*§1009 U.S.C.*] Utilization by freight forwarders of services of common carriers by motor vehicle.—[Unchanged. See vol. 15, p. 12294.]

Amendments, see footnotes, vol. 13, p. 11158 (former §409); see also vol. 15, p. 12294, Historical note, vol. 17, p. 13661; vol. 18, p. 14689.

Historical Note

On August 9, 1973, the Commission recommended to Congress legislation to amend §409(a) of the Interstate Commerce Act to authorize freight forwarders to negotiate special contracts with railroads. (S. 2461).—Annual Report, 1974, p. 84.

The Commission recommends that §409 be amended to authorized contracts between freight forwarders and railroads covering rates and services, for an experimental period, to determine the extent to which such contracts will encourage l.c.l. shippers to utilize energy-saving rail service.—Annual Report, 1975, p. 77.

Notes of Decisions

Volume 12—p. 10524; Volume 13—p. 11158; Volume 14—p. 11676; Volume 15—p. 12295; Volume 17—p. 13661; Volume 18—p. 14689; Volume 19—p. 15959; Volume 21—p. 17736.

2. Construction and interpretation.—[Vols. 12-15, 17-19, 21].—To assume the type of responsibility required of it, the forwarder must be closely involved in the details of the movement of goods and not act simply as a conduit for the receipt and placement of orders with other carriers who perform most, if not all, of the transportation independently, and usually without rendition of the traditional and statutory functions of a forwarder.—Services of Forwarders of Household Goods, 117 M.C.C. 523 (531-532).

While a freight forwarder may enter into §409 contracts with household goods motor carriers in appropriate circumstances, it is not free, under the terms of its permit and §404 of the statute, to abrogate its functions and regularly act as little more than a sales agent for another mode even if that mode may be preferred or required by shippers in certain instances. This conclusion is in no manner contrary to the principle recognized in a number of proceedings holding that occasional shipments may be handled by a freight forwarder without the performance of its recognized functions.—Id., pp. 533-34.

5. Agreements.—[Vols. 15, 17-19, 21].—Provisions of §409(a) are permissive and do not require motor carriers to enter into contracts with forwarders for transportation of latter's traffic at less than tariff rates.—All-transport, Inc., 325 I.C.C. 183 (186).

Section 410. (a) [*§1010(a) U.S.C.*] Permit essential to operation; carriers in operation on effective date of section; service to, from, and within Alaska; Hawaii; "grandfather" provisions.—[Unchanged. See vol. 11, p. 9669; vol. 19, p. 15959].

Historical notes, vol. 16, p. 12954, vol. 17, p. 13661, vol. 18, p. 14690.

Notes of Decisions

Volume 21—p. 17736.

2. Construction and interpretation.—[Vol. 21].—Purpose and effect of the "grandfather" amendments to §410(a) were to authorize the extension to Alaska and Hawaii of forwarder service from or to points in the 48 contiguous States; that purpose would be defeated if only service rendered by applicant were to be considered and not those services performed "in conjunction" with those of other carriers. Where applicant accepted goods destined to Alaska and Hawaii in its capacity as a freight forwarder, issued a through bill of lading, selected the ocean carriers, made arrangements for the goods to be delivered to them, and acted as shipper vis-a-vis the ocean carriers, its services and those of the underlying ocean carriers were not separate and distinct from the total service rendered from point of origin to point of destination, but were performed "in conjunction" with each other.—Clipper Carloading Co., 323 I.C.C. 682 (685).

And in view of omission in the "grandfather" amendments to §410(a) of the customary requirement that operations conducted on and after the critical date be "bona fide" in the sense of being substantial, it is not necessary for applicant to demonstrate that operations conducted to points in Alaska and Hawaii were as frequent as those required by previous legislation to support a grant of "grandfather" authority.—Id., p. 685.

While a freight forwarder, as defined in §402(a)(5), is required to transport shipments from point of receipt to ultimate destination, prior to the Alaska Statehood Act forwarders subject to part IV were not regulated insofar as transportation beyond Seattle was concerned. As to such operations, the "grandfather" amendment of §410(a) does not require an applicant to satisfy precisely all elements of the statutory definition, but provides for continuance of operations conducted in conjunction with other carriers; and though water carriers subject to Federal Maritime Commission were specifically mentioned in legislative history of that amendment, the amendment is clearly not so limited, and §418, in designating the carriers a forwarder may use, includes air carriers. Operations of applicant and its predecessors, in handling consolidated shipments from Hawaii and other States to Seattle, where they broke bulk and made arrangements with steamship companies or air carriers for delivery to ultimate consignees in Alaska, billing shippers for the through charges, were such as to entitle them to "grandfather" rights to continue serving Alaska.—Star Forwarders, Inc., 323 I.C.C. 721 (727-8).

Application for permit to operate as a freight forwarder between points in Hawaii and California approved as applicant's past operations and testimony of public witnesses reveal a continuing demand and acceptance of applicant's highly specialized service. Protestants' evidence fails to support contentions that such approval is detrimental to the competitive situation, their operations, or the public interest.—D.C. Andrews & Co. of Illinois, Inc., Ext.—Calif. to Hawaii, 329 I.C.C. 205 (210).

Although the Hawaiian Statehood Act vested jurisdiction over water carriage between ports of that State and other States in the Federal Maritime Commission, the operations of defendant Intermountain were proven to be those of a freight forwarder and as such are within the jurisdiction of this Commission as provided by §33 of the Shipping Act (46 USC 832).—Star Forwarders, Inc. v. Intermountain Fast Frt., 337 I.C.C. 265 (267-8).

10. Cessation of unlawful operations.—[Vol. 21].—See also Natl. Motor Frt. Traf. Ass'n., v. Vendors Consolidating, at §402(a)(5), n.1.

Duty of the court in suit to enjoin and set aside Commission decision and order, ordering plaintiff to cease and desist freight forwarder operations in violation of §410(a), is to decide whether substantial evidence supports the Commission's conclusion that plaintiff is a "freight forwarder," as defined in the Act; that the reviewing court might have reached a different conclusion is irrelevant if the Commission's order is based on adequate findings which are warranted in law and fact. A freight forwarder need not actually perform all functions specified in §402(a)(5); as long as a party proffers all the services described, whether or not performed, it comes within that statutory definition. It is not disputed that plaintiff's operations meet the requirements of assembly and consolidation and the utilization of a regulated carrier; and on the record as a whole, substantial evidence supports the Commission's findings that there is (1) a proffering, or performance, of break-bulk and distribution and (2) an assumption of transportation responsibility. Commission cease-and-desist order, sustained.—Metropolitan Shipping Agents of Ill., Inc. v. United States, 342 F. Supp. 1266 (1268-71)*.

Evidence indicates that applicant's present operations as a shippers' association which shippers utilize as a freight forwarder in order to obtain a volume rate fixed by applicant and by which applicant assumes responsibility for complete transportation service appear to parallel those found unlawful in previous cases herein cited. Commission admonishes applicant to discontinue such operations.—Shippers Consolidating, Inc., Freight Forwarder Applic., 329 I.C.C. 161 (165).

Respondent found to have been engaged in operations as a freight forwarder without appropriate authority. Cease and desist order issued.—Haley Transfer & Storage—Investigation of Operations, 340 I.C.C. 350 (357).

Notwithstanding finding that defendant is a bona fide shippers' association, it must discontinue its objectionable practices which tend to place it in violation of §410(a) of the Act. It should change its telephone listing from that of a freight forwarder to reflect its true status; cease the salary arrangement whereby an affiliate pays the salaries of defendant's executive secretary and assistant treasurer; and furnish the names of the beneficial owners in the bills of lading or, at least, incorporate by reference a document containing such names. Finally in view of fact that considered affiliate serves other shippers and shipper associations and is a motor common carrier, defendant should establish and maintain a complete separation of its working facilities from those of the affiliate in order to insure that the day-to-day control of its operations are not delegated to affiliate. In view of these conclusions complaint dismissed, subject, however, to right of the Commission to reopen this proceeding in order to assure correction of these objectionable items.—Natl. Motor Frt. Traf. Assn. v. Industrial Shippers Assn., 103 M.C.C. 545 (553-4).

50. "Grandfather" clause; past operations.—Inasmuch as record shows that applicant has engaged in forwarding operations of used household goods and used automobiles between points in Hawaii, and between Hawaii and points in continental United States during and since the critical period, and this transportation was not within the §402(b) exemption, it is entitled to a "grandfather" permit authorizing continuance of those operations, but not the transportation of household goods. That applicant held itself out as a forwarder of household goods makes no difference, because the sole criteria for determining "grandfather" rights is the actual operations performed during the critical period.—Bekins Household Shipping Co., 323 I.C.C. 382 (382-384).

Since applicant's past operations have been essentially those of a shipper's agent, which are exempt from regulation by §402(c)(2), he has not been engaged in service on and since the critical date which either would have been subject to part IV or would, in conjunction with services of other carriers, have resulted in transportation of property subject to part IV; "grandfather" application dismissed.—Stanley, 323 I.C.C. 499 (501-2).

In determining territorial scope of authority to be granted a "grandfather" applicant for service between Alaska or Hawaii and the remaining 48 States, it is necessary to establish reasonable parity between applicant's past operations in the forwarding of goods and those authorized for the future, but since operations conducted on and after the critical date need not be "bona fide" in the sense of being substantial, applicant need not demonstrate such frequency of past service as is required under previously enacted "grandfather" provisions. Moreover, because of the nature of freight forwarding, points in States intermediate or adjacent to, or wholly or partially surrounded by, States in the geographical area in which applicant has established that it conducted operations during the critical period will likewise be included in the grant of authority.—Clipper Carloading Co., 323 I.C.C. 682 (685-6).

However, authority will not be granted to serve States for which there is no showing of operations both before and after the critical date and which are not geographically related to those in which such operations were conducted. The 1958 "grandfather" amendments are not comparable to the Freight Forwarder Act as originally enacted, which contained no true "grandfather" provisions, and the criteria enunciated in 323 ICC 195 are controlling. While it is apparent that applicant has engaged on and since the applicable critical dates in transportation of a substantial quantity and wide variety of commodities from points in certain eastern States to points in Alaska and Hawaii, and authority will likewise be granted for certain other States in that general area, there is no justification for authorizing service from points in other States where none was rendered during the critical period, or from certain western States where no shipments were handled both before and after the critical dates and which are not geographically related to the area in which appropriate service was rendered. Granted in part.—Id., p. 686.

Evidence establishes that applicant and its predecessors were, during the critical period, collectively holding out a service between Hawaii and the 48 contiguous States, including the District of Columbia, and that continuance of such service should be authorized. While they were admittedly unable to show that any one of them handled any shipments on and since the critical date between Hawaii and Wyoming or from Delaware, Montana, Nevada, New Mexico, or the Dakotas to Hawaii, those States are intermediate and adjacent to the States from which such operations are shown.—Star Forwarders, Inc., 323 I.C.C. 721 (726-7).

It is likewise clear that both before and since the "grandfather" date applicant and its predecessors accepted shipments destined to Alaska and held out to perform a forwarder service on such shipments, but, except from Hawaii, the only actual service to Alaska was confined to handling of shipments originating in a 7-State area based on St. Louis, and admittedly no operations were performed from Alaska to any other State. "Grandfather" authority to serve Alaska is therefore limited to one-way operations from Hawaii and the 7-State area.—Id., pp. 727,728.

As the Hawaiian Statehood Act contained no provision for "grandfather" or interim operating rights, a state of uncertainty existed as to lawfulness of freight forwarder operations. Under these circumstances of uncertainty, applicant's past operations to and from Hawaii, commencing in October, 1959, without specific authority should not be considered a hindrance or a support as to whether the proposed operations are consistent with public interest.—D.C. Andrews & Co. of Illinois, Inc., Ext.—Calif. to Hawaii, 329 I.C.C. 205 (210).

Section 410. (b) [*§1010(b) U.S.C.*] Application for permit; form and content.—[Unchanged. See vol. 11, p. 9669.]

Historical note, see vol. 21, p. 17737.

Notes of Decisions

Volume 12—p.10525; Volume 13—p. 11158; Volume 14—p. 11676; Volume 15—p. 12296; Volume 16—p. 12954; Volume 17—p. 13661; Volume 18—p. 14690; Volume 19—p.15961; Volume 21—p. 17737.

5. Applications; amendments; parties.—[Vols. 12-15, 17, 19].—Although notice of application incorrectly indicated that applicant proposed to operate as a forwarder of import traffic from Chicago to points in five States, because customs clearance and break-bulk will take place in Chicago on commodities moving by rail from Halifax, N.S., Canada, rather than at points on international boundary, authority is required for all regulated freight forwarding service taking place within United States; therefore, since applicant requires a permit for all operations within United States necessary to perform the service proposed, application is considered in form originally filed, i.e., for authority to perform a forwarding service from Halifax to the five States, insofar as such transportation takes place within United States.—Alltransport Inc., 325 I.C.C. 183 (183-4).

18. Burden of proof.—[Vols. 13, 15, 16, 18, 19, 21].—Although the "public interest" test admits of other factors, adequacy of existing service is still a vital factor and frequently of controlling significance in forwarder application cases; however, this does not mean that part of applicant's basic burden of proof is to establish that existing service cannot adequately meet reasonable transportation needs of the public. Applicant is required to make initial showing of prima facie need for its proposed service; it is then incumbent on protestants to refute such showing by establishing, subject to applicant's rebuttal, their qualifications and willingness to provide the required service.—D.C. Andrews & Co. of Illinois, Inc., Ext. —Baltimore, Md., 326 I.C.C. 743 (755).

Burden of proving the proposed service will be consistent with public interest and the national tranportation policy is upon applicant and substantial evidence showing nature of ommodities to be transported and territory to be served is required to justify a grant of authority. Protestants bear burden of proving such grants will have adverse effect on their operations. Findings of Commission must be supported by very substantial evidence before they will be upheld by the courts.—Brinke Freight Forwarder Application, 335 I.C.C. 861 (867).

Commission, citing 322 ICC 103 and 326 ICC 743, stated that each applicant for freight forwarder authority must establish by substantial evidence a need for the essence of the proposed operation, i.e., nature of commodities to be transported and scope of territory to be served, to justify a grant of authority. Proposed operations must be shown consistent with the public interest and national transportation policy. The public interest criterion is not equivalent to a finding of public convenience and necessity. Protestants must rebut applicant by showing their own qualifications and willingness to provide the required service.—Smyth Worldwide Movers, Inc., F. F. Application, 337 I.C.C. 721 (736-7)*.

The burden of proof is upon an applicant seeking a freight forwarder permit to show that the proposed service is, or will be, consistent with the public interest and the national transportation policy. The "public interest" test is not the equivalent of the more stringent "public convenience and necessity" test which must be met by applicants seeking motor common carrier authority. A forwarder applicant bears the burden of proving by substantial evidence a need for the essence of the operation, i.e., the nature of the commodities to be transported, and the scope of the territory to be served, in order to justify a grant of the authority sought.—Home-Pack Transport, Applic. for Forwarder Permit, 340 I.C.C. 98 (102)*.

Applicant seeking a freight forwarder permit has the burden of showing that proposed service is, or will be, consistent with the public interest and the national transportation policy. Although the "public interest" test is not the more stringent "public convenience and necessity" standard which must be met by applicants for motor common carrier authority, a forwarder applicant bears the burden of proving by substantial evidence a need for the essence of the operation, i.e., nature of the commodities to be transported and scope of the territory to be served, in order to justify grant of the authority sought.—Trans-American World Transit, Inc., Frt. Fwd. Applic., 340 I.C.C. 196 (201)*.

Burden of proof is upon applicant seeking a forwarder permit to show that the proposed service, to extent authorized by permit, is or will be consistent with the public interest and national transportation policy. Applicant must also establish by substantial evidence a need for the essence of the operation, i.e., the nature of commodities to be transported and the scope of the territory to be served. See 326 ICC 743.—KYFI, Inc., Freight Forwarder Application, 341 I.C.C. 725 (729).

22. Evidence.—[Vols. 14, 15, 17-19, 21].—Commission noted that where it has been established either by exhibits or applicant's testimony, that an applicant has transported in the past new articles or those which fall within parts 2 or 3 of "household goods" definition (49 CFR 1056), such evidence is entitled to no weight since such operations could not have been conducted under color of right. Additionally, forwarder applications cannot be granted in those instances where the only support is that of an affiliated company. There must be persuasive evidence presented by public witnesses who demonstrate a genuine need for the proposed service.—International Sea Van Inc., Frt. Forwarder Applic., 339 I.C.C. 408 (417-18).

25. Hearing, generally.—[Vol. 21].—Commission reopened this proceeding in light of the district court's mandate in remanding the instant case, and the lack of a current record. Parties hereto are warned that any further failure to meet their statutory burden will not be tolerated.—Brinke Freight Forwarder Application, 335 I.C.C. 861 (872).

Regulations of the Commission

38 FR 3389, Feb. 6, 1973, Part 1033; List of Forms, §1003.3 Freight Forwarder Forms, amended by revocation of subheads FF 1 and FF 2, and by addition of new subhead OP-FF-10 Application for a freight forwarder permit under §410 of the Act, effective Feb. 12, 1973.

38 FR 3389, Feb. 6, 1973, Part 1150: Applications for Permits, entire Part 1150 revoked in view of prescription of new application Form OP-FF-10, effective Feb. 12, 1973.

Section 410. (c) [*§1010(c) U.S.C.*] Issuance of permit; carriers excluded; applicant controlled by or with common carrier.—[Unchanged. See vol. 11, p. 9669.]

Notes of Decisions

Volume 12—p. 10525; Volume 13—p. 11159; Volume 14—p.11677; Volume 15—p. 12296; Volume 16—p. 12954; Volume 17—p. 13662; Volume 18—p.14691; Volume 19—p. 15962; Volume 21—p. 17738.

2.Construction and interpretation.—[Vols. 12-19, 21].—Review of legislative background and judicial history of §410(d), as amended, supports the conclusion that the "public interest" criterion in §410(c) is not the equivalent of the "public convenience and necessity" test; rather, it is a somewhat less stringent standard which admits of factors other than that relating to adequacy of existing service. Since the 1957 amendment of §410(d), the Commission is no longer precluded from denying new or additional forwarder authority where the sole objection to a grant of authority is that existing service is able adequately to meet shippers' needs; the Commission may, with one exception, look to see whether such a grant would be supported by proof of a public interest factor of equal or dominant importance.—D.C. Andrews & Co. of Illinois, Inc., Ext.—Baltimore, Md., 326 I.C.C. 743 (151-55).

5. Jurisdiction of Commission.—[Vol. 14].—Operations of defendant Intermountain between points in Hawaii and California found to be those of a freight forwarder as defined by §402(a)(5) and subject to regulation by this Commission. Defendant's claim that its operations are those of a non-vessel operating common carrier subject to the jurisdiction of the Federal Maritime Commission has no basis in fact and does not place it outside this Commission's jurisdiction.—Star Forwarders, Inc. v. Intermountain Fast Frt., 337 I.C.C. 265 (268).

7. Competition.—[Vols. 13-19, 21].—Despite the fact that the "public interest" test admits of other factors, adequacy of existing service is still a vital factor, and frequently of controlling significance. This does not mean that a forwarder applicant must establish the negative conclusion that existing service cannot adequately meet the reasonable transportation needs of the shipping public. This would be an onus virtually impossible of accomplishment. Instead, an applicant for forwarder authority is required to make an initial showing of prima facie need for its proposed service, and it is then incumbent upon protestants to refute this showing by establishing, subject to applicant's rebuttal, their qualifications and willingness to provide the required service.—D.C. Andrews & Co., of Illinois, Inc., Ext.—Baltimore, Md., 326 I.C.C. 743 (755).

Protestant's failure to provide the lower rates required by the shippers, whether or not it does establish an embargo of traffic in fact, at least indicates their disinterest in the export traffic here under consideration.—Id., pp. 757-8.

25. Necessity, demand for service.—[Vols. 12-19, 21].—Although applicant's Chicago office handles foreign shipments arriving via St. Lawrence Seaway and the Great Lakes and destined to midwestern points, during the closed season of navigation on the Great Lakes the bulk of such traffic is received at the port of New York, and because of delays and extra expenses entailed in use of New York port facilities applicant seeks to institute a direct freight forwarding service from Halifax, N.S., Canada, including consolidation of shipments at dockside in Halifax, line-haul by bonded rail car to Chicago, and distribution from Chicago to points in a 5-State destination territory. No comparable forwarder service is available, and, as it is Canadian railroads' practice to handle unconsolidated l.c.l. freight from Halifax to Chicago over circuitous routes, whereas shipments consolidated into carloads are routed over the shortest and most expeditious routes available, the proposed service would be beneficial to supporting shippers, who collectively ship a substantial amount of freight, through more expeditious and economical handling of their traffic.—Alltransport Inc., 325 I.C.C. 183 (184-6).

While the bulk of the traffic involved is destined to Chicago and other Illinois points, the majority of supporting shippers also make shipments directly to points in the other four States, and, as a forwarder is required by Part IV to assume responsibility from origin to destination on all shipments it handles and cannot act as a connecting carrier for movement of traffic beyond points it is authorized to serve, to grant authority to serve only Chicago or Illinois points would confront shippers with two undesirable alternatives: either applicant would be precluded from handling their traffic from Halifax to the other States, or they must arrange to receive their shipments at Chicago and provide for any subsequent movement themselves. Therefore, even though the volume that will move to the other States is small compared to the total tonnage anticipated, there will undoubtedly be such traffic, and, in absence of a forwarder service capable of handling it, applicant should be granted territorial authority to do so.—Id., p. 186.

That the bulk of the traffic moving through Chicago to other points may not generally be sufficient to aggregate t.l. lots is immaterial, because the operations to be conducted from the Chicago break-bulk point constitute only a distribution service. Protestant motor carriers clearly cannot provide a service of the character proposed, and their fears that traffic they may handle for applicant will move at contract rates lower than their published tariff rates are not impressive, particularly since the applicable §409 is merely permissive and does not require protestants to enter into such contract rates with applicant. Granted, insofar as proposed transportation takes place within United States.—Id., p. 186.

Evidence of record shows need for applicants' proposed specialized, and materially different, forwarder services devoted exclusively to movement of export traffic from the Midwest to named Atlantic coast ports at rates based on use of rail export rates, which are substantially lower than rates of existing forwarders for domestic rail or motor shipments. The opposing forwarders failed to show their ability and willingness adequately to provide such export services or to demonstrate that grant of permits sought would adversely affect their operations or services; moreover, regardless of whether or not protestants' failure to provide lower rates on export shipments between considered points establishes an embargo of traffic in fact, it indicates their disinterest in considered export traffic. Authority granted both applicants.—D. C. Andrews & Co. of Illinois, Inc., Ext.—Baltimore, Md., 326 I.C.C. 743 (755-59).

Applicant has failed to establish that its proposed service is consistent with public interest as protestant freight forwarders have proven their service ample between the considered points; shippers now utilize protestants' service without substantive complaint; applicant's proof of sufficient resources is his own self-serving statement; and shippers supporting applicant express a mere preference which is no basis for approving a grant of authority in view of the existing, responsive service. Denied.—Shippers Consolidating, Inc., Freight Forwarder Applic., 329 I.C.C. 161 (164-5).

Record warrants grant of authority to applicant (engaged in forwarder service under the §402(b) "used household goods" exemption) to forward used household goods and unaccompanied baggage between United States points. In view of substantial volume of such traffic applicant has handled under color of right, and additional shipper support for the type of forwarder service proposed, it is evident that sufficient freight will be available to ensure stability of proposed operation. Opposing forwarders deal with carriers who do not provide containerized service of the type applicant conducts and for which need is shown; nor do they hold out the needed single-responsibility service to many foreign points applicant will serve. Opposing motor carriers of household goods provide an entirely different type of service; they do not offer the needed containerized-type service and cannot meet the need for separate movement of the baggage; moreover, where motor carriers cannot provide service of the nature proposed, available motor service merits little weight in consideration of a forwarding proposal.—Routed Thru-Pac, Inc., Freight Forwarder Application, 332 I.C.C. 352 (361-2, 363-4)*.

However, pattern of applicant's past operations with respect to handling used automobiles and the other evidence introduced as to shippers' desire for such proposed service fails to establish any need for movement of used automobiles within the United States. Some customers may require applicant to handle their cars at shipside within the port area, but such operations do not involve an interstate movement subject to Commission regulation; thus, as no need is shown for domestic movement of used automobiles, when moving separately from used household goods, authority requested for such forwarding is not granted. Therefore, in accordance with criteria set forth in 326 ICC 743, grant of authority sufficient to allow applicant to continue to forward used household goods and unaccompanied baggage in independent movements would be consistent with the public interest and the national transportation policy; granted in part.—Id., pp. 362, 363-5.

Evidence establishes that many shippers need a forwarder service capable of handling their shipments in a way to alleviate "wear and tear" in long distance driveway movements. Shippers also need a single transportation agency to undertake transportation of their vehicles from shipping point to ultimate destination. In this regard, it is axiomatic that viable freight forwarder service requires broad operating authority. See 285 ICC 641. Sole protestant has failed to rebut applicant's evidence with showing of material adverse effect to itself or proof of its willingness and ability to perform proposed operations. Applications approved.—Auto Trip USA, Inc., Frt. Forwarder Applic., 337 I.C.C. 570 (579-81).

Commission also approved motor carrier authority sought herein because such authority will enable applicant to facilitate and coordinate its service with its forwarder affiliate to and from assembly and break-bulk points. Need has been shown for such coordinated freight forwarder service and protestant has shown neither willingness nor ability to perform it. However, the grant is restricted against traffic moving on Governmental bills of lading and to automobile dealers as no need has been shown.—Id., p. 581.

Commission approved applications, with certain restrictions, herein inasmuch as applicants have established by substantial evidence, especially by supporting testimony of shipping public, a need for the essence of proposed operations. No adequate forwarder service is now available and applicants' past operations under color of right are demonstrative of broad operations of the kind needed.—Smyth Worldwide Movers, Inc., F. F. Application, 337 I.C.C. 721 (737-9)*.

Commission approved 7 of 9 applications as freight forwarders of used household goods, unaccompanied baggage, and used automobiles inasmuch as, in large measure, the proposed services have been performed for substantial time under color of right; supporting shippers' evidence established a need for freight forwarder service and the inherent advantages of such service; and the absence of adequate forwarder service to satisfy shippers' needs. However, the Commission denied the other 2 applications as the essential character of the shipper's needs shown is limited to transportation of used household goods for which no authority is required because of the §402(b) exemption.—International Sea Van, Inc., Frt. Forwarder Applic., 339 I.C.C. 408 (422-26).

Although applicant and its parent company, a certificated motor carrier of household goods, submitted evidence of substantial past service in transportation of household goods, householder's automobiles, and unaccompanied baggage, record in forwarder application proceeding must be analyzed not in terms of what applicant has done as a motor carrier, but in light of what it proposes to do as a part IV forwarder. In this regard, while applicant failed to justify grant of authority to forward used household goods, used automobiles, and unaccompanied baggage in domestic service, the evidence is sufficient to warrant a grant of authority to forward those commodities when moving in import-export traffic. Granted in part.—Trans-American World Transit, Inc., Frt. Fwd. Applic., 340 I.C.C. 196 (200-1, 203)*.

As was pointed out in 337 ICC 721, Department of Defense (DoD) support is not essential to a grant of authority where, as here, there is adequate shipper support for the grant of domestic authority. Nevertheless, we are aware that DoD is a major shipper with wideranging transportation requirements, which often has traffic moving in the same traffic pattern as overseas traffic, and that this domestic traffic could be offered only to a forwarder holding both domestic and import-export authority. A grant of domestic authority is supported by 23 shipper witnesses in this instance and such grant is approved.—Jet Forwarding, Inc., Freight Forwarding Application, 340 I.C.C. 337 (347-48)*.

Considered in light of basic criteria of §410(c), the evidence of record, coupled with evidence of past operations, established a need for applicant's proposed coordinated intermodal service, restricted to forwarding of import shipments having an immediately prior movement by water in applicant's nonvessel-operating (NVO) service.—CTI—Container Transport Internat., Frt. Forwarder Applic., 341 I.C.C. 169 (193-99).

Commission approved sought authority as evidence of record reveals that no refrigerated forwarder service is shown to be available to meet needs of the supporting shippers.—Honolulu Freight Service Ext.—California, 341 I.C.C. 657 (666)*.

Upon reconsideration, the record, updated as required in prior report, 335 ICC 861, demonstrates a clear need for proposed service and applicant's ability and willingness to properly perform the service. Applicant has made substantial investment to provide service and proposes further addition to its facilities and supporting witnesses (appendix A) demonstrated their desire to deal with applicant who meets their requirements and provides flexibility in scope and directional flow of traffic.—Brinke Freight Forwarder Application, 341 I.C.C. 670 (683)*.

Commission's review of evidence herein persuades us that supporting shippers have a need for containerization of small shipments and single-carrier responsibility at Louisville, Ky., a service not presently available from protestants. Evidence convincingly demonstrates that the three supporting shippers would use proposed service. Application approved.—KYFI, Inc., Freight Forwarder Application, 341 I.C.C. 725 (728-29).

26.—Fitness, generally.—[Vols. 12-19, 21].

—Commission found that criteria set forth in §209(b) governing disposition of motor contract-carrier applications for operating authority found too narrow for application for freight forwarder rights as this contention was previously considered by the entire Commission in two separate cases cited herein and was found without merit.—Shippers Consolidating, Inc., Freight Forwarder Applic., 329 I.C.C. 161 (164).

Commission found that applicant has shown ability to perform proposed service as a substantial portion of the shipping public has expressed a need for applicant's improved transportation methods. The applicant, like other forwarders, relies on transportation facilities of its underlying carriers and is not required to show the extent of financial effort required of such carriers.—New England Forwarding Co., Extension, 335 I.C.C. 58 (73)*.

Application for freight forwarder authority denied as approximately six years have elapsed since the initial hearing in this proceeding and the staleness of record herein convinces us that applicant is not shown to be ready, able, or willing to perform proposed service or that such service is consistent with the public interest and the national transportation policy.—Brinke Freight Forwarder Application, 335 I.C.C. 861 (871).

Applicants' limited transportation of commodities not exempted from Commission regulation under §402(b), even though not done in good faith, does not require denial of applications on the basis of unfitness.—International Sea Van, Inc., Frt. Forwarder Applic., 339 I.C.C. 408 (418).

Authority sought granted in part, on a restricted and limited term basis, since applicant failed to persuasively demonstrate its ability to render the nationwide, nonradial service it sought to institute. In addition, the Commission was unable to conclude that applicant had sufficient funds available for an operation as extensive as that sought. See also, §410(e), n.30.—American Delivery Systems, Inc., Frt. Forwarder Applic., 340 I.C.C. 776 (786,787).

Applicant's past operations were conducted before clearly resolved guidelines as to whether and when activities of a Federal Maritime Commission classified nonvessel-operator (NVO) may be those of a part IV freight forwarder subject to our jurisdiction and were not patently unlawful. Although applicant would have demonstrated good faith had it sought authority from this Commission, there is no basis to find that applicant is not ready, able, or willing properly to conduct proposed operations.—CTI—Container Transport Internat., Frt. Forwarder Applic., 341 I.C.C. 169 (192-3).

Applicant's past operations involving rail transportation of trailers in TOFC Plan III conducted under its broker's license were in fact operations as a freight forwarder. However, it was determined that applicant's operations were conducted under a color of right resulting from a misconstruction of its broker's license in part due to error by the Commission and that applicant had not acted in bad faith and no finding of unfitness is warranted but issuance of sought permit will be conditioned upon cancellation of applicant's broker license.—Brinke Freight Forwarder Application, 341 I.C.C. 670 (682-83)*.

30. Extension of operations.—[Vols. 12-19].—On reconsideration, application for extension of authority to operate containerized service on export and import traffic granted. Proposed service offers many improvements over existing services and no comparable service is offered by protestant freight forwarders as proven by testimony of shipper witnesses. Protestants fail to rebut respondent's prima facie by showing no evidence of ability and willingness to provide such service.—New England Forwarding Co., Inc., Extension, 335 I.C.C. 58 (71-2)*.

35. Duplicate operating rights.—[Vol. 14].—The holding by applicant of both a broker's license and a forwarder's permit, where supporting evidence in broker application described operations very similar to those proposed in the instant forwarder application, would tend to raise difficult interpretive problems in the future and be a source of potential confusion and discrimination among shippers; a request by applicant for concurrent cancellation of his broker license will be a condition to the grant of forwarder authority.—Brinke Freight Forwarder Application, 326 I.C.C. 322 (325-26)*

Section 410. (d) [*§1010(d) U.S.C.*] Competition.—[Unchanged. See vol. 18, p. 14693.]

Section 410 (e) [*§1010(e) U.S.C.*] Terms and conditions; territories, restrictions.—[Unchanged. See vol. 11, p. 9670.]

Notes of Decisions

Volume 12—p. 10527; Volume 13—p. 11160; Volume 14—p. 11679; Volume 15—p. 12298; Volume 16—p.12955; Volume 17—p. 13664; Volume 19—p. 15963; Volume 21—p. 17740.

30. Restrictions.—[Vol. 19].—Commission, prior to issuance of a certificate or permit, may impose any restriction on grants of authority which will serve some statutory or useful purpose. The courts have accorded wide discretionary latitude to the Commission when propriety of restriction imposition is questioned even in absence of substantial evidence. Plant site restrictions are imposed only where the exact plant location is unknown or to protect existing carriers from unwarranted competition. Restrictions agreed to by both applicant and protestants will be accepted only if they are necessary for the public interest and also are consistent with practical and effective transportation regulation.—Brinke Freight Forwarder Application, 335 I.C.C. 861 (868-70).

Proposed operations will not be restricted unless protestant shows that lack of considered restriction will materially and adversely affect them and provided that such restriction is required in the public interest and is consistent with practical and effective transportation regulation.—Id., p. 870.

Commission generally reiterated its conclusions in 46 MCC 147, wherein it was recognized that when vehicles being transported are moved with motive power furnished by one or more of such vehicles, the service is driveway. The driveaway limitation thus defines the type of service which common carriers may provide; i.e., the motive power must come from a vehicle being shipped. Accordingly, rail service, in which the motive power is provided by the carrier, may not be utilized by a motor carrier holding only driveaway authority. Further restriction against transportation of traffic having prior movement by rail or water prohibits participation by applicant in a joint service performed under joint rates in connection with either rail (including plan I or V TOFC service) or water.—Auto Trip USA, Inc., Frt. Forwarder Applic., 337 I.C.C. 570, (577-9).

Commission, applying the criteria stated in 335 ICC 861, restricted authorities approved herein so as to exclude movements between points in the United States and Alaska as no need was shown for such movements. Also, Commission found that with respect to domestic traffic the needs shown were not uniform, and, accordingly, authorities granted were not uniform. No need was shown for a restriction on containerized movements.—Smvth Worldwide Movers, Inc., F. F. Application, 337 I.C.C. 721 (739-45)*.

Due to questions concerning applicant's fitness, the Commission imposed a limitation to a term of 3 years to its grant of authority, in addition to the following conditions: applicant was required to enter in a written contract with each agent it appoints and immediately to file with the Commission a verified copy of each such contract (and of each subsequent change therein); and to file a detailed "Performance Report" with the Commission at the end of each of the first 2 years after receipt of the permit, containing information as specified. The permit will expire at the end of the 3-year term unless, within 3 months of the expiration, applicant files a petition, with copies to be served upon the protestants in this proceeding, accompanied by a summary of the material in its two "Performance Reports". See also, §410(c), n.26.—American Delivery System, Inc., Frt. Forwarder Applic., 340 I.C.C. 776 (788).

Commission rejected imposition of a restriction limiting applicant's authority to "commodities requiring refrigeration". Commission affirmed the principles stated in 106 MCC 1, that such a limitation is not proper for use in any type of operating authority issued by this Commission. The term "refrigeration" is susceptible to many varied meanings and the term "requiring" has consistently presented substantial interpretation problems.—Honolulu Freight Service Ext.—California, 341 I.C.C. 657 (667-68)*.

Section 410. (h), (i) [*§1010(h), (i) U.S.C.*]—[Unchanged. See vol. 11, pp. 9671, 9672.]

Notes of Decisions

§410(i): Volume 14—p. 11680.

20. Abandonment, generally.—[Vol. 14].—Where there is no opposition, there is no indication that petitioner, as a carrier-controlled forwarder, has been or is being used to discourage legitimate and normal competition of other forwarders, and the public interest will be served by consolidation of operations of two commonly controlled forwarders into one, a certificate of abandonment of freight forwarding permit granted.—International Forwarding Co. Abandonment of Permit, 339 I.C.C. 462 (463-64).

Section 411. [*§1011 U.S.C.*] Acquisition of control; injunction; supplemental orders.—[Unchanged. See vol. 11, p. 9672.]

Historical notes, see vol. 12, p. 10527, vol. 13, p. 11161, vol. 14, p. 11680, vol. 15, p. 12299, vol. 16, p. 12956, vol. 17, p. 13666, vol. 21, p. 17742.

Notes of Decisions

Volume 12—p. 10528; Volume 13—p. 11161; Volume 14—p. 11680; Volume 15—p. 12299; Volume 16—p. 12956; Volume 17—p. 13666; Volume 18—p. 14694; Volume 19—p. 15965; Volume 21—p. 17742.

2. Construction and interpretation.—[Vols. 12-19, 21].—Though applicant's majority stockholder is also the majority stockholder of a motor carrier holding temporary authority to transport household goods and the three corporations have interlocking boards of directors, such common control does not preclude grant of a freight forwarder permit in the circumstances presented. Where both a motor carrier and a forwarder are directly controlled by another person so that each carrier constitutes the *alter ego* of that person, §411(g) is not violated notwithstanding the prohibitions in §411(c) which are intended to guard against forwarder control of a motor carrier which would be adverse to latter's interest; also, the two individuals holding minority interest in the motor carrier do not hold any stock in the forwarder so as to constitute a violation of §411(c). Therefore, applicant's present ownership and fact that it is under common control do not bar granting it a permit.—Routed Thru-Pac, Inc., Freight Forwarder Application, 332 I.C.C. 352 (369-70)*.

Intervenors' arguments that §§411(c) and (g) are inconsistent with each other and that Congress' intent was to preclude control of freight forwarders by motor carriers is not well taken. These statutory prohibitions are intended only to guard against freight forwarder control of a motor carrier which would be adverse to latter's interest. The affiliation with or subsidiary status to a regulated motor common carrier is not fatal to freight forwarder applications herein.—International Sea Van, Inc., Frt. Forwarder Applic., 339 I.C.C. 408 (414-15).

Although no operations are being conducted under vendee's majority stockholder's outstanding permit as a freight forwarder, and the proposed transaction involves purchase by vendee, a motor carrier subject to Part II, of operating rights of another motor carrier, the proposal would result in acquisition of control of vendors' operations by a forwarder and may not lawfully be accomplished under the exception to the prohibition of §411(a)(1).—Glendenning Motorways, Inc.—Purchase—Moland Bros. Trucking, 93 M.C.C. 194 (196, 199).

Since applicant and Republic Carloading (a freight forwarder) are separate entities controlled by yet a third entity, RIC, and RIC controlled the motor carrier (applicant) prior to obtaining control of the forwarder, the common control is permissible pursuant to §411(g) provisions.—Sullivan Lines, Inc., Extension—Far West, 118 M.C.C. 801 (811-12).

Section 412. [*§1012 U.S.C.*] Accounts, records and reports.—[Unchanged. See vol. 11, p. 9674, vol. 15, p. 12300.]

Amendments, see footnotes, vol. 15, p. 12300; historical notes, see vol. 12, p. 10330, vol. 13, p. 11032, vol. 14, 11543, vol. 21, p. 17742.

Section 413. [*§1013 U.S.C.*]. Receipts or bills of lading; delivery; application of §20(11), (12).—[Unchanged. See vol. 11, p. 9676.]

Notes of Decisions

Volume 12—p. 10528; Volume 13—p. 11162; Volume 14—p. 11681; Volume 15—p. 12301; Volume 16—p. 12957; Column 18—p. 14694; Volume 21—p. 17743.

10. Issuance of bills of lading.—[Vols. 13, 14, 16, 18, 21].—See International Forwarding Co. v. Bison Freightways, Inc., at §219, n. 33.

115. Actions to enforce liability; in general.—[Vols. 14, 15, 21].—In shipper's suit to recover for damages which occurred during rail piggyback movement of its shipment of electric fans and stands, caused by water leaking through plastic-lined canvas top of trailer furnished by defendant forwarder when a hard-top trailer was not available, record does not support defendant's claim that, when shipper accepted and loaded the trailer and let the shipment move under straight bill of lading which contained a "shippers load and count" notation, its liability as a forwarder was thereby modified. Evidence shows the shipment left shipper's loading platform in good condition and arrived at consignee's warehouse in damaged condition; moreover, fact that bill of lading contained "shippers load and count" notation did not modify defendant's liability because its driver assisted in loading the shipment and receipted for it and, also, because its manager personally inserted the plastic lining after assuring plaintiff that shipment would arrive in good condition. Since all damage to the cargo is attributable to defendant, plaintiff is entitled to recover damages in amount of $7,129.47.—Federated Department Stores, Inc. v. Brinke, 316 F. Supp. 1402 (1405).

Regulations of the Commission

37 FR 4257, March 1, 1972, Part 1005; Principles and Practices for the Investigation and Voluntary Disposition of Loss and Damage Claims and Processing Salvage, new Part 1005, §§1005.1-1005.6, added to become effective April 20, 1972.

37 FR 9027, May 4, 1972, Part 1005: Principles and Practices for the Investigation and Voluntary Disposition of Loss and Damage Claims and Processing Salvage, effective date of prescribed regulations postponed until July 1, 1972, effective on date of order.

37 FR 20943, Oct. 5, 1972, Part 1005: Principles and Practices for the Investigation and Voluntary Disposition of Loss and Damage Claims and Processing Salvage, §§1005.3(b) and 1005.4(c) modified, effective Oct. 16, 1972.

37 FR 23908, Nov. 10, 1972, Part 1005: Principles and Practices for the Investigation and Voluntary Disposition of Loss and Damage Claims and Processing Salvage, second paragraph of §1005.3 and §1005.4(c) revised, effective Oct. 16, 1972.

39 FR 11891, April 1, 1974, Part 1003: List of Forms, Regulations promulgated for Freight Forwarder Liability Forms, effective July 1, 1974.

Section 414. [*§1014 U.S.C.*]. Collection of rates and charges.—[Unchanged. See vol. 11, p. 9677.]

Historical Note

By provision of §108 of the Truth in Lending Act, Public Law 90-321, 82 Stat. 146, responsibility for administrative enforcement of that act is assigned to the Commission with respect to any common carrier which it regulates and, for the purpose of enforcing compliance therewith, the Commission may exercise any other authority conferred on it by law. Also, while the Board of Governors of the Federal Reserve System is directed to prescribe regulations to carry out purposes of the Truth in Lending Act (12 CFR Part 226, 34 FR 2002, Feb. 11, 1969), the statute specifically provides that such Board authority does not impair the authority of any other agency responsible for administrative enforcement to make rules respecting its own enforcement and compliance procedures.

Section 502. [*§1232 U.S.C.*] Definitions.—[Unchanged. See vol. 18, p. 14696.]

Section 503. [*§1233 U.S.C.*] Loan guaranties.—[Unchanged. See vol. 18, p. 14696.]

Section 504. [*§1234 U.S.C.*] Limitations.—[Unchanged except that "twenty-five years" was substituted for "fifteen years" in subsection (a)(3) thereof by act of July 13, 1972, Public Law 92-348, §5, 86 Stat. 463. See vol. 18, p. 14697.]

Notes of Decisions

Volume 18—p. 14698; Volume 19—p. 15970; Volume 21—p. 17748.

Section 505. [*§1235 U.S.C.*] Modifications.—The Commission may consent to the modification of the provisions as to rate of interest, time of payment of interest or principal, security, if any, or other terms and conditions of any guaranty which it shall have entered into pursuant to this part, or the renewal or extension of any such guaranty for any period of time not exceeding twenty-five years from the date of the original guaranty, whenever the Commission shall determine it to be equitable to do so. (Aug. 12, 1958, Public Law 85-625, §2, 72 Stat. 569; July 13, 1972, Public Law 92-348, §5, 86 Stat. 463.)

Section 506. [*§1236 U.S.C.*] Payment of guaranties; action to recover payments made.—[Unchanged. See vol. 18, p. 14697.]

Section 507. [*§1237 U.S.C.*] Guaranty fees.—[Unchanged. See vol. 18, p. 14697.]

Notes of Decisions

Volume 19—p. 15976.

Section 508. [*§1238 U.S.C.*] Assistance of Departments or other agencies.—[Unchanged. See vol. 18, p. 14698.]

Section 509. [*§1239 U.S.C.*] Administrative expenses.—[Unchanged. See vol. 18, p. 14698.]

Section 510. [*§1239a U.S.C.*] Audit by Comptroller General.—(a) In any case in which—

(1) there is outstanding any guaranty by the Commission made under this part; or

(2) the Secretary of the Treasury is required to make any payment as a consequence of any guaranty by the Commission made under this part;

the financial transactions of the common carrier by railroad subject to this Act with respect to which such guaranty was made may be audited by the Comptroler General of the United States under such rules and regulations as he may prescribe. The representatives of the Comptroller General shall have access to all books, accounts, records, reports, files, and other papers, things, or property belonging to or in use by such common carrier by railroad pertaining to its financial transactions and necessary to facilitate the audit, and such representatives shall be afforded full facilities for verifying transactions with the balances or securities held by depositories, fiscal agents, and custodians.

(b) A report of each such audit shall be made by the Comptroller General to the Congress. The report to the Congress shall contain such comments and information as the Comptroller General may deem necessary to inform the Congress of the financial operations and condition of the common carrier by railroad involved in such audit, together with such recommendations with respect thereto as he may deem advisable. The report shall also show specifically any program, expenditure, or other financial transaction or undertaking observed in the course of the audit, which, in the opinion of the Comptroller General, adversely affects the financial operations or condition of the common carrier by railroad involved in such audit or lessens the protection afforded the United States at the time the original guaranty was made. A copy of each report shall be furnished to the Commission at the time it is submitted to the Congress. (July 13, 1972, Public Law 92-348, §6, 86 Stat. 463.)

Section 511. [*§1240 U.S.C.*] Termination of authority.—[Unchanged except that former §510 was renumbered as §511 by act of July 13, 1972, Public Law 92-348, §6, 86 Stat. 463. See vol. 18, p. 14698, vol. 19, p. 15977.]

SUPPLEMENTAL LEGISLATION

Chapter 2.—ELKINS ACT

Section 41.(1)-(3). Liability, offenses, penalties, jurisdiction; Acts of agents, departures from published rates; receiving rebates.—[Unchanged. See vol. 4, pp. 2748, 2788, 2791.]

Historical note, see vol. 4, p. 2749, vol. 18, p. 14699.

Notes of Decisions

Volume 4—pp. 2751-2788; Volume 7—p. 5891; Volume 10—p. 8257; Volume 11—p. 9686; Volume 12—p. 10530; Volume 13—p. 11164; Volume 14—p. 11683; Volume 15—p. 12303; Volume 16—p. 12958; Volume 17—p. 13668; Volume 18—p. 14699; Volume 19—p. 15977; Volume 21—p. 17749.

Rebates, Concessions, and Discriminations

71. Discrimination; defined.—[Vols. 4, 21].—Proposed tranpsportation of cash letters by a Transcontinental Bus System subsidiary will not violate the Elkins Act merely because it will permit the Transcontinental complex to offer transportation at three different rates, i.e. the passenger carrier's rate, applicant's, and the U.S. mail (which the busline transports under contract). Maintenance of different levels of rates by affiliated companies is not unlawful per se, absent evidence of discriminatory tactics detrimental to the shipping public (318 ICC 157); moreover, service provided by the affiliated carriers under each rate level is so materially different, it cannot be said that one type duplicates either of the others.—Continental Dispatch, Inc., 95 M.C.C. 483 (488).

Departure from Schedules; Devices

87. "Knowingly" as an element of the offense.—(Vols. 4, 10, 17].—Requirement that a shipper must knowingly receive a concession from carrier in order to violate the Elkins Act does not mean that the parties must have intended to violate the act. Thus, when record showed that railroad-vendor had made an interest-free loan to shipper, in connection with latter's acquisition of a construction site, evidence supported district court decision that defendant shipper had knowingly received a concession from carrier in the form of an interest-free, purchase money mortgage loan on construction site so as to violate statute prohibiting a rebate from carrier. Judgment in favor of the government, in civil action for monetary penalties, affirmed.—United States v. Food Fair Stores, Inc., 417 F. 2d 62 (64-5).

98.—Bonus for locating plant adjacent to carrier's line.—[Vols. 4, 10, 11, 18].—The Elkins Act prohibits a carrier from contributing to cost of a construction site for shipper as an inducement for construction of shipper facilities near carrier's right of way; and carrier's assumption of financing costs (by making shipper an interest-free, purchase-money loan) in shipper's acquisition of a construction site is a type of contribution which the statute prohibits. Moreover, in government's civil action to recover monetary penalties for shipper's alleged receipt of a rebate from carrier, the fact that railroad-vendor realized a profit on sale of the land to defendant shipper did not preclude finding that shipper violated the statute by receiving a rebate from carrier in the form of an interest-free, purchase money mortgage loan. District court's judgement in favor of the government affirmed.—United States v. Food Fair Stores, Inc., 417 F. 2d 62 (64-5).

101.—Loan to shipper.—[Vols. 4, 10].—On appeal from district court decision, in government's civil action for penalties, that defendant shipper had violated the Elkins Act by knowingly receiving interest-free loan (for purchase of site for shipper facility) as rebate from carrier, the carrier's assumption of such financing costs is the type of contributing to costs of a construction site for shipper which the act prohibits; and fact that carrier-vendor realized a profit on sale of the land to shipper did not prevent finding that shipper receivied a rebate from carrier. Record showed that carrier was not compensated for shipper's delay in paying balance of purchase price for the construction site; also, requirement that shipper must knowingly receive a concession from carrier does not mean that the parties must have intended to violate the act; thus, evidence supported trial court's finding that shipper had knowingly received a concession from carrier, in form of interest-free, purchase money mortgage loan on construction site, and thereby had violated the act prohibiting rebate from carrier. Judgment in favor of the government, affirmed.—United States v. Food Fair Stores, Inc., 417 F. 2d 62 (64-5).

Section 42. Parties included in proceedings to enforce law.—[Unchanged. See vol. 4, p. 2792.]

Historical note, see vol. 4, p. 2792.

Notes of Decisions

Volume 4—p. 2792; Volume 7—p. 5896; Volume 11—p. 9688; Volume 14—p. 11683; Volume 19—p. 15979; Volume 21—p. 17753.

1. Parties interested in the traffic.—[Vols. 4, 7, 11, 14, 19, 21].—See also Uxbridge Motor Lines, Inc.—Investigation of Operations, §212(a), n. 35.

Since respondent shippers, except two, have been shown to have participated in, and, as stated in §2 of the Elkins Act "are interested in or affected by" the operations of respondent carriers, here found unlawful, they are ordered to cease and desist from participating with respondent carriers in such operation in the future.—Empire Truck U-Drive-It, Inc., Investigation, 96 M.C.C. 29 (45).

Section 43. Proceedings in equity to enforce tariffs, etc.; district attorneys; damages; witnesses; precedence.—[Unchanged except as amended by the act of Dec. 21, 1974, Public Law 93-528, 88 Stat. 1709.] Whenever the Interstate Commerce Commission shall have reasonable ground for belief that any common carrier is engaged in the carriage of passengers or freight traffic between given points at less than the published rates on file, or is committing any discriminations forbidden by law, a petition may be presented alleging such facts to the district court of the United States sitting in equity having jurisdiction; and when the act complained of is alleged to have been committed or as being committed in part in more than one judicial district or State, it may be dealt with, inquired of, tried, and determined in either such judicial district or state, whereupon it shall be the duty of the court summarily to inquire into the circumstances, upon such notice and in such manner as the court shall direct and without the formal pleadings and proceedings applicable to ordinary suits in equity, and to make such other persons or corporations parties thereto as the court may deem necessary, and upon being satisfied of the truth of the allegations of said petition said court shall enforce an observance of the published tariffs or direct and require a discontinuance of such discrimination by proper orders, writs, and process, which said orders, writs and process may be enforceable as well against the parties interested in the traffic as against the carrier, subject to the right of appeal as now provided by law. It shall be the duty of the several United States attorneys, whenever the Attorney General shall direct, either of his own motion or upon the request of the Interstate Commerce Commission, to institute and prosecute such proceedings, and the proceedings provided for by sections 41, 42, or 43 of this title shall not preclude the bringing of suit for the recovery of damages by any party injured, or any other action provided by said Act approved February 4, 1887, entitled An Act to regulate commerce and the Acts amendatory thereof. And in proceedings under sections 41, 42, or 43 of this title and the Acts to regulate commerce the said courts shall have the power to compel the attendance of witnesses, both upon the part of the carrier and the shipper, who shall be required to answer on all subjects relating directly or indirectly to the matter in controversy, and to compel the production of all books and papers, both of the carrier and the shipper, which relate directly or indirectly to such transaction.

Historical note, see vol. 4, p. 2794.

Notes of Decisions

EXPEDITING ACT

Section 44. [*§44 U.S.C.*] Expedition of actions by United States involving general public importance. [Sec. 1 of the Act of Feb. 11, 1903 (32 Stat. 823) was amended by P. L. 93-528, 88 Stat. 1708 to read as follows:] In any civil action brought in any district court of the United States under the Act entitled 'An Act to protect trade and commerce against unlawful restraints and monopolies', approved July 2, 1890, or any other Acts having like purpose that have been or hereafter may be enacted, wherein the United States is plaintiff and equitable relief is sought, the Attorney General may file with the court, prior to the entry of final judgment, a certificate that, in his opinion, the case is of a general public importance. Upon filing of such certificate, it shall be the duty of the judge designated to hear and determine the case, or the chief judge of the district court if no judge has as yet been designated, to assign the case for hearing at the earliest practicable date and to cause the case to be in every way expedited. (See vol. 11, p. 9688, vol. 13, p. 11165; and vol. 15, p. 12304.)

Section 45. [*§45 U.S.C.*] Appeals to Supreme Court. [Sec. 2 of the Act of Feb. 11, 1903 (32 Stat. 823) was amended by P. L. 93-528, 88 Stat.1709 to read as follows:] (a) Except as otherwise expressly provided by this section, in every civil action brought in any district court of the United States under the Act entitled 'An Act to protect trade and commerce against unlawful restraints and monopolies', approved July 2, 1890, or any other Acts having like purpose that have been or hereafter may be enacted, in which the United States is the complainant and equitable relief is sought, any appeal from a final judgment entered in any such action shall be taken to the court of appeals pursuant to sections 1291 and 2107 of title 28 of the United States Code. Any appeal from an interlocutory order entered in any such action shall be taken to the court of appeals pursuant to sections 1292(a)(1) and 2107 of title 28 of the United States Code but not otherwise. Any judgment entered by the court of appeals in any such action shall be subject to review by the Supreme Court upon a writ of certiorari as provided in section 1254(1) of title 28 of the United States Code.

(b) An appeal from a final judgment pursuant to subsection (a) shall lie directly to the Supreme Court if, upon application of a party filed within fifteen days of the filing of a notice of appeal, the district judge who adjudicated the case enters an order stating that immediate consideration of the appeal by the Supreme Court is of general public importance in the administration of justice. Such order shall be filed within thirty days after the filing of a notice of appeal. When such an order is filed. the appeal and any cross appeal shall be docketed in the time and manner prescribed by the rules of the Supreme Court. The Supreme Court shall thereupon either (1) dispose of the appeal and any cross appeal in the same manner as any other direct appeal authorized by law, or (2) in its discretion, deny the direct appeal and remand the case to the court of appeals, which shall then have jurisdiction to hear and determine the same as if the appeal and any cross appeal therein had been docketed in the court of appeals in the first instance pursuant to subsection (a). (See vol. 11, p. 9688, vol. 13, p. 11165; and vol. 15, p. 12304).

Notes of Decisions

§44: Volume 4—p. 2802; §45: Volume 4—p. 2804; Volume 19—p. 15980; Volume 21—p. 17756.

Historical Note

Paragraphs (a) and (b) [49 U.S.C. §45], as amended, shall not apply to an action in which a notice of appeal to the Supreme Court has been filed on or before the fifteenth day following the date of enactment of P. L. 93-528, December 21, 1974. Appeal in any such action shall be taken pursuant to the provisions of §2 of the Act of February 11, 1903 (32 Stat. 823), as amended (15 U.S.C. 20; 49 U.S.C. 45) which were in effect on the day preceeding the date of enactment of P. L. 93-528.

COMPULSORY TESTIMONY—IMMUNITY OF WITNESSES

Section[1] 46. Self-incriminating testimony; perjury; refusal to testify.—Any person who shall neglect or refuse to attend and testify, or to answer any lawful inquiry, or to produce books, papers, tariffs, contracts, agreements and documents, if in his power to do so, in obedience to the subpoena or lawful requirement of the Commission shall be guilty of an offense and upon conviction thereof by a court of competent jurisdiction shall be punished by fine not less than one hundred dollars nor more than five thousand dollars, or by imprisonment for not more than one year or by both such fine and imprisonment. (Feb. 11, 1893, ch. 83, 27 Stat. 443; Oct. 15, 1970, Public Law 91-452, title II, §245, 84 Stat. 931.)

---

[1] By §245 of the act of Oct. 15, 1970, the first paragraph of this section was repealed.

Cross Reference

Pursuant to §260 of Public Law 91-452, Oct. 15, 1970, 84 Stat. 931-2, the provisions of Part V—Immunity of Witnesses of Title 18, United States Code, added by title II of that act, and the amendments and repeals made thereby, take effect on the sixtieth day following enactment; also, no amendment to or repeal of any law under title II affects any immunity to which any individual is entitled under such law by reason of any testimony or other information given before that day.

Section 47, 48. Repealed by act of Oct. 15, 1970, Public Law 91-452, title II, §§209, 210, 84 Stat. 929.

Amendments, see footnotes, vol. 13, p. 11168.

Notes of Decisions

Volume 14—p. 11688.

Section 66. [*§322 as enacted.*] Government traffic; payment for transportation; deduction of overpayments.—(a) Payment for transportation of persons or property for or on behalf of the United States by any carrier or forwarder shall be made upon presentation of bills therefor prior to audit by the General Services Administration, or his designee. The right is reserved to the United States Government to deduct the amount of any overcharge by any carrier or forwarder from any amount subsequently found to be due such carrier or forwarder. This does not affect the authority of the General Accounting Office to make audits in accordance with the Budget and Accounting Act, 1921, as amended (31 U.S.C. 41), and the Accounting and Auditing Act of 1950, as amended (31 U.S.C. 65). The term 'overcharges' shall be deemed to mean charges for transportation services in excess of those applicable thereto under tariffs lawfully on file with the Interstate Commerce Commission, the Civil Aeronautics Board, the Federal Maritime Commission, and any State transportation regulatory agency, and charges in excess of those applicable thereto under rates, fares, and charges established pursuant to section 22 of the Interstate Commerce Act, as amended, or other equivalent contract, arrangement, or exemption from regulation: *Provided, however*, That such deductions shall be made within three years (not including any time of war) from the time of payment of bills: *Provided further*, That every claim for charges for transportation within the purview of this section shall be forever barred unless such claim shall be received in the General Services Administration, or by his designee within three years (not including any time of war) from the date of (1) accrual of the cause of action thereon, or (2) payment of charges for the transportation involved, or (3) subsequent refund for overpayment of such charges, or (4) deduction made pursuant to this section, whichever is later.

(b) Nothing in subsection (a) hereof shall be deemed to prevent any carrier of forwarder from requesting the Comptroller General to review the action on his claim by the General Services Administration, or his designee. Such request shall be forever barred unless received in the General Accounting Office within six months (not including in time of war) from the date the action was taken or within the periods of limitation specified in the second proviso in subsection (a) of this section, whichever is later.

(c) Pursuant to regulations prescribed by the head of a Government agency or his designee and in conformity with such standards as shall be promulgated jointly by the Secretary of the Treasury and the Comptroller General of the United States, bills for passenger or freight transportation services to be furnished the United States by any carrier or forwarder may be paid in advance of completion of the services, without regard to section 3648 of the Revised Statutes, as amended (31 U.S.C. 529): *Provided*, That such carrier or forwarder has issued the usual ticket, receipt, bill of lading, or equivalent document covering the service involved, subject to later recovery by deduction or otherwise of any payments made for any services not received as ordered by the United States.

(d) The term "head of a Government agency" means any individual or group of individuals having final decisionmaking responsibility for any department, commission, board, service, Government corporation, instrumentality, or other establishment or body in the United States Government. (Sept. 18, 1940, c. 722, §322, 54 Stat. 955; Aug. 26, 1958, Public Law 85-762, 72 Stat. 860, 861; Oct. 25, 1972, Public Law 92-550, 86 Stat. 1163, 1164; Jan. 2, 1975, Public Law 93-604, 88 Stat. 1960.)

Notes of Decisions

Volume 18—p. 14703; Volume 19—p. 15984; Volume 21—p. 17759.

1. In general.—[Vols. 18, 19, 21].—See also T.I.M.E. Freight, Inc. v. United States, §204a, n. 10.

In railroad's action to recover amount of overcharges claimed by the Government, and deducted after post-audit from other bills due plaintiff, on shipments of generator sets mounted on a trailer or a wheel base, the issue as to which tariff is applicable to the shipments, in turn, raises the question of identity or nature of the articles. Government bills of lading describe articles shipped as generator sets mounted on trailers of some sort; pertinent government technical manuals describe the shipments as various types of generator sets mounted on trailers of various types; and primary function of the sets is to provide a mobile source of electrical power where such power is needed but otherwise unavailable. On that basis, shipments in question are found to be, in reality, trailer-mounted generator sets.—Southern Pac. Transp. Co. v. United States, 454 F. 2d 740 (741, 744-5).

Having determined identity of the articles shipped, the proper tariff classification must be ascertained in order to decide on the applicable rate. Since classification Item 34760, a catchall NOIBN item, refers to generator sets but makes no reference to such sets being either mounted or unmounted, whereas Item 73720 expressly refers to generator sets mounted on trailers and is not an NOIBN item, latter item is the more specific and more closely fits the shipments in question. Therefore, applying the classification analogy rule, plaintiff's charges for considered shipments should be computed pursuant to Item 73720; railroad found entitled to recover amount of alleged overcharges on all items at issue.—Id., pp. 743-4, 745-6.

While the statute authorizes deduction of overcharges by any carrier from other amounts due that carrier, an overcharge on government shipments occurs only when carrier submits a bill for services that exceeds the amount properly due it; and as defendant admits, that is quite different from a claim for damages. But contrary to plaintiff's argument, the IC Act did not extinguish the Government's common law right of offset. Thus, in railroad's suit for transportation charges, the Court of Claims can decide the issue of the lawfulness of government deduction of amount set off against moneys owing to plaintiff and claimed as a charge for unauthorized use of government-owned flatcar that was delivered to carrier under straight bill of lading for shipment to an army depot; also, such inherently sound procedure contributes to efficient settling of opposing claims. In instant case, defendant is entitled to payment for reasonable value of the use of its flatcar or similar cars; and since the proper measure of damages is in dispute, case is referred to a trial commissioner to determine the amount of such damages.—Burlington Northern, Inc. v. United States, 462 F. 2d 526 (528-30).

Chapter 5—INLAND WATERWAYS TRANSPORTATION

Section 141-3, 151-2, 153, 154-7.—[Unchanged, except §141, 151-157.—Repealed. Pub. Law 88-67, July 19, 1963, 77 Stat. 81. See vol. 4, pp. 2948-2961; vol. 7, p. 5947; vol. 10, p. 8278; vol. 11, p. 9695; vol. 19, p. 15985.]

Title 49 Chapter 17

Historical Note

The functions, powers, and duties assigned to the Commission by this Act, formerly codified at 45 U.S.C. §§44-46, have been transferred to the Secretary of Transportation, by P.L. 89-670, the Department of Transportation Act [49 U.S.C. §1651] dated Oct. 14, 1966.

Section 1201. Awards for acts of heroism involving railroads or motor vehicles.—[See vol. 18, p. 14772.]

Historical notes, see vol. 4, p. 3315, vol. 11, p. 9775, vol. 12, p. 10589, vol. 13, p. 11229, vol. 14, p. 11751, vol. 15, p. 12371, vol. 16, p. 13015, vol. 17, p. 13736, vol. 18, p. 14773, vol. 21, p. 17818.

Section 1202. Rosettes and ribbons.—[See vol. 4, p. 3318.]

Section 1203. Appropriation.—[See vol. 21, p. 17918.]

Chapter 20.—FEDERAL AVIATION ACT OF 1958

Section 1003 (a)-(e) [§1483 U.S.C.] Joint Boards; through service; jurisdiction.—[Unchanged. See vol. 10, p. 8285, vol. 14, p. 11689.]

Historical note, vol. 10, p. 8286.

DEPARTMENT OF TRANSPORTATION ACT

49 U.S.C. Chapter 23

Sec. 2. *[49 U.S.C. §1651.]* (a) The Congress hereby declares that the general welfare, the economic growth and stability of the Nation and its security require the development of national transportation policies and programs conducive to the provision of fast, safe, efficient, and convenient transportation at the lowest cost consistent therewith and with other national objectives, including the efficient utilization and conservation of the Nation's resources.

(b)(1) The Congress therefore finds that the establishment of a Department of Transportation is necessary in the public interest and to assure the coordinated, effective administration of the transportation programs of the Federal Government; to facilitate the development and improvement of coordinated transportation service, to be provided by private enterprise to the maximum extent feasible; to encourage cooperation of Federal, State, and local governments, carriers, labor, and other interested parties toward the achievement of national transportation objectives; to stimulate technological advances in transportation; to provide general leadership in the identification and solution of transportation problems; and to develop and recommend to the President and the Congress for approval national transportation policies and programs to accomplish these objectives with full and appropriate consideration of the needs of the public, users, carriers, industry, labor, and the national defense.

(2) It is hereby declared to be the national policy that special effort should be made to preserve the natural beauty of the countryside and public park and recreation lands, wildlife and waterfowl refuges, and historic sites.

ESTABLISHMENT OF DEPARTMENT

Sec. 3. *[49 U.S.C. §1652.]* (a) There is hereby established at the seat of government an executive department to be known as the Department of Transportation. (hereafter referred to in this Act as the "Department"). There shall be at the head of the Department a Secretary of Transportation (hereafter referred to in this Act as the "Secretary" who shall be appointed by the President, by and with the advice and consent of the Senate.

(b) There shall be in the Department a Deputy Secretary, who shall be appointed by the President, by and with the advice and consent of the Senate. The Deputy Secretary (or, during the absence or disability of the

Deputy Secretary, or in the event of a vacancy in the office of Deputy Secretary, an Assistant Secretary or the General Counsel, determined according to such order as the Secretary shall prescribe) shall act for, and exercise the powers of the Secretary, during the absence or disability of the Secretary or in the event of a vacancy in the office of Secretary. The Deputy secretary shall perform such functions, powers, and duties as the Secretary shall prescribe from time to time.

(c) There shall be in the Department four Assistant Secretaries and a General Counsel, who shall be appointed by the President, by and with the advice and consent of the Senate, and who shall perform such functions, powers, and duties as the Secretary shall prescribe from time to time.

(d) There shall be in the Department an Assistant Secretary for Administration, who shall be appointed, with the approval of the President, by the Secretary under the classified civil service who shall perform such functions, powers, and duties as the Secretary shall prescribe from time to time.

(e)(1) There is hereby established within the Department a Federal Highway Administration; a Federal Railroad Administration; and a Federal Aviation Administration. Each of these components shall be headed by an Administrator, and in the case of the Federal Aviation Administration there shall also be a Deputy Administrator. The Administrators and the Deputy Federal Aviation Administrator shall be appointed by the President, by and with the advice and consent of the Senate.

(2) The qualifications of the Administrator of the Federal Aviation Agency specified in section 301(b) of the Federal Aviation Act of 1958, as amended (72 Stat. 744; 49 U.S.C. 1341), and the qualifications and status of the Deputy Administrator specified in section 302(b) of the Federal Aviation Act of 1958, as amended (72 Stat. 744; 49 U.S.C. 1342), shall apply, respectively, to the Administrator and Deputy Administrator of the Federal Aviation Administration. However, nothing in this Act shall be construed to preclude the appointment of the present Administrator of the Federal Aviation Agency as Administrator of the Federal Aviation Administration in accordance with the provisions of the Act of June 22, 1965, as amended (79 Stat. 171).

(3) In addition to such functions, powers, and duties as are specified in this Act to be carried out by the Administrators, the Administrators and the Commandant of the Coast Guard shall carry out such additional functions, powers, and duties as the Secretary may prescribe. The Administrators and the Commandant of the Coast Guard shall report directly to the Secretary.

(4) The functions, powers, and duties specified in this Act to be carried out by each Administrator shall not be transferred elsewhere in the Department unless specifically provided for by reorganization plan

submitted pursuant to provisions of chapter 9 of title 5, United States Code, or by statute.

(f)(1) The Secretary shall carry out the provisions of the National Traffic and Motor Vehicle Safety Act of 1966 (80 Stat. 718) through a National Traffic Safety Bureau (hereafter referred to in this paragraph as "Bureau"), which he shall establish in the Department of Transportation. The Bureau shall be headed by a Director who shall be appointed by the President, by and with the advice and consent of the Senate. All other provisions of the National Traffic and Motor Vehicle Safety Act of 1966 shall apply.

(2) The Secretary shall carry out the provisions of the Highway Safety Act of 1966 (80 Stat. 731) (including chapter 4 of title 23 of the United States Code) through a National Highway Safety Bureau (hereafter referred to in this paragraph as "Bureau"), which he shall establish in the Department of Transportation. The Bureau shall be headed by a Director who shall be appointed by the President, by and with the advice and consent of the Senate. All other provisions of the Highway Safety Act of 1966 shall apply.

(3) The President is authorized, as provided in section 201 of the Highway Safety Act of 1966, to carry out the provisions of the National Traffic and Motor Vehicle Safety Act of 1966 through the Bureau and Director authorized by section 201 of the Highway Safety Act of 1966.

(4) The office of Federal Highway Administrator, created by section 303 of title 23, United States Code, is hereby transferred to and continued within the Department under the title Director of Public Roads. The Director shall be the operating head of the Bureau of Public Roads, or any other agency created within the Department to carry out the primary functions carried out immediately before the effective date of this Act by the Bureau of Public Roads.

GENERAL PROVISIONS

SEC. 4. *[49 U.S.C. §1653]* (a) The Secretary in carrying out the purposes of this Act shall, among his responsibilities, exercise leadership under the direction of the President in transportation matters, including those effecting the national defense and those involving national or regional emergencies; provide leadership in the development of national transportation policies and programs, and make recommendations to the President and the Congress for their consideration and implementation; promote and undertake development, collection, and dissemination of technological, statistical, economic and other information relevant to domestic and international transportation; consult and cooperate with the Secretary of Labor in gathering information regarding the status of labor-management contracts and other labor-management problems and in promoting industrial harmony and stable employment conditions in all modes of transportation; promote and undertake research and development relating to transportation, including noise abatement, with particular attention to aircraft noise; consult with the heads of other Federal departments and agencies on the transportation requirements of the Government, including the procurement of transportation or the operation of their own transport services in order to encourage them to establish and observe policies consistent with the maintenance of a coordinated transportation system; and consult and cooperate with State and local governments, carriers, labor, and other interested parties, including, when appropriate, holding informal public hearings.

(b)(1) In carrying out his duties and responsibilities under this Act, the Secretary shall be governed by all applicable statutes including the policy standards set forth in the Federal Aviation Act of 1958, as amended (49 U.S.C. 1301 et seq.); the national transportation policy of the Interstate Commerce Act, as amended (49 U.S.C., preceding §§1, 301, 901, and 1001); title 23, United States Code, relating to Federal-aid highways; and title 14 U.S.C., titles LII and LIII of the Revised Statutes (46 U.S.C., chs. 2A, 7, 11, 14, 15, and 18), the Act of April 25, 1940, as amended (54 Stat. 163; 46 U.S.C. 526-526u), and the Act of September 2, 1958, as amended (72 Stat. 1754; 46 U.S.C. 527-527h), relating to the United States Coast Guard.

(2) Nothing in this Act shall be construed to authorize, without appropriate action by Congress, the adoption, revision, or implementation of—

(A) any transportation policy, or

(B) any investment standards or criteria.

(3) In exercising the functions, powers, and duties conferred on and transferred to the Secretary by this Act, the Secretary shall give full consideration to the need for operational continuity of the functions transferred, to the need for effectiveness and safety in transportation systems, and to the needs of the national defense.

(c) Orders and actions of the Secretary in the exercise of functions, powers, and duties transferred under this Act, and orders and actions of the Administrators pursuant to the functions, powers, and duties specifically assigned to them by this Act, shall be subject to judicial review to the same extent and in the same manner as if such orders and actions had been by the department or agency exercising such functions, powers, and duties immediately preceding their transfer. Any statutory requirements relating to notice, hearings, action upon the record, or administrative review that apply to any functions transferred by this Act shall apply to the exercise of such functions by the Secretary and the Administrators. This subsection shall not apply to functions, powers, and duties transferred to the Secretary from the Interstate Commerce Commission under sections 6 (e)(1) through (4) and section 6(e)(6)(A) of this Act.

(d) In the exercise of the functions, powers, and duties transferred under this Act, the Secretary and the Administrators shall have the same authority as that vested in the department or agency exercising such functions, powers and duties immediately preceding their transfer, and their actions in exercising such functions, powers, and duties shall have the same force and effect as when exercised by such department or agency.

(e) It shall be the duty of the Secretary—

(1) to promptly investigate the safety compliance records in the Department of each applicant seeking operating authority from the Interstate Commerce Commission (referred to in this subsection as the "Commission") and to report his findings to the Commission;

(2) when the safety record of an applicant for permanent operating authority, or for approval of a proposed transaction involving transfer of operating authority, fails to satisfy the Secretary, to intervene and present evidence of such applicant's fitness in Commission proceedings;

(3) to furnish promptly upon request of the Commission a statement regarding the safety record of any applicant seeking temporary operating authority from the Commission; and

(4)(A) to furnish upon request of the Commission a complete report of the safety compliance of any carrier, (B) to have made such additional inspections or safety compliance surveys which the Commission deems necessary or desirable in order to process an application or to determine the fitness of a carrier, and (C) if the Commission so requests, to intervene and present evidence in any proceeding in which a determination of fitness is required.

(f) The Secretary of Transportation shall cooperate and consult with the Secretaries of the Interior, Housing and Urban Development, and Agriculture, after the effective date of the Federal-Aid Highway Act of 1968.

(g) The Secretary and the Secretary of Housing and Urban Development shall consult and exchange information regarding their respective transportation policies and activities; carry on joint planning, research and other activities; and coordinate assistance for local transportation projects. They shall jointly study how Federal policies and programs can assure that urban transportation systems most effectively serve both national transportation needs and the comprehensively planned development of urban areas. They shall, within one year after the effective date of this Act, and annually thereafter, report to the President, for submission to the Congress, on their studies and other activities under this subsection, including any legislative recommendations which they determine to be desirable. The Secretary and the Secretary of Housing and Urban Development shall study and report within one year after the effective date of this Act to the President and the Congress on the logical and efficient organization and location of urban mass transportation functions in the Executive Branch.

(h)(1) The Secretary is authorized, in consultation with the Secretary of the Interior, to design, plan, and coordinate the construction of a model intermodal transportation terminal at Union Station in the District of Columbia. Such terminal may combine the new railroad passenger station described in paragraph (4) of section 102(a) of Public Law 90-264, as amended, and accommodations for such other modes of transportation as the Secretary deems appropriate. To the extent practicable, the Secretary shall incorporate into the design and plans for such intermodal transportation terminal features which will make such facility a model facility and which will attract private investors willing to undertake the development and construction of the terminal.

(2) Notwithstanding any provision of Public Law 90-264, as amended, in order to facilitate construction of such model intermodal transportation terminal, the Secretary of the Interior shall lease or transfer such space (including air space), which is not required for purposes of the National Visitor Center, as the Secretary of the Interior holds or may acquire north of the Union Station Building to such party or parties and upon such terms and conditions as the Secretary deems appropriate, notwithstanding section 321 of the Act of June 30, 1932 (40 U.S.C. 303(b)). The Secretary and the Secretary of the Interior may, to the extent required to complete a visitor center, agree to joint use of the concourse.

(3) The design and plans for the intermodal terminal shall be completed within 2 years following enactment of this subsection. The construction of the intermodal terminal shall be completed within 5 years following enactment of this subsection.

(4) There is authorized to be appropriated to the Secretary, for the purposes of carrying out this subsection, such sums as are necessary, not to exceed $5,000,000.

(5) Nothing in this subsection (h) shall be construed as relieving the Washington Terminal Company, its successors or assigns, from the obligation to finance and construct a new railroad passenger station in compliance with the terms of paragraph (4) of section 102(a) of Public Law 90-264 (82 Stat. 43).

(i)(1) The Secretary shall provide financial, technical, and advisory assistance in accordance with this subsection for the purpose of (A) promoting on a feasibility demonstration basis the conversion of not less than three railroad passenger terminals into intermodal transportation terminals; (B) preserving railroad passenger terminals that have a reasonable likelihood of being converted or otherwise maintained pending the formulation of plans for reuse; (C) acquiring and utilizing space in suitable buildings of historic or architectural significance, unless the use of such space would not prove feasible and prudent compared with available alternatives; (D) stimulating State and local governments, local and regional transportation authorities, common carriers, philanthropic organizations, and other responsible persons to develop plans for the conversion of railroad passenger terminals into intermodal transportation terminals and civic and cultural activity centers.

(2) Financial assistance for the purpose set forth in paragraph (1)(A) of this subsection shall be granted in accordance with the following criteria: (A) the railroad terminal can be converted to accommodate such other modes of transportation as the Secretary deems appropriate, including motorbus transportation, mass transit (rail or rubber tire), and airline ticket offices and passenger terminal providing direct transportation to area airports; (B) the railroad passenger terminal is listed on the National Register of Historic Places maintained by the Secretary of the Interior; (C) the architectural integrity of the railroad passenger terminal will be preserved and such judgment is concurred in by consultants recommended by the Chairman of the National Endowment of the Arts and the Advisory Council on Historic Preservation and retained for this purpose by the Secretary; (D) to the extent practicable, the use of station facilities for transportation purposes may be combined with use for other civic and cultural activities, especially when such use is recommended by the Advisory Council on Historic Preservation or the Chairman of the National Endowment for the Arts, or the consultants retained by the Secretary upon their recommendation; and (E) the railroad passenger terminal and the conversion project meet such other criteria as the Secretary shall develop and promulgate in consultation with the Chairman of the National Endowment of the Arts and the Advisory Council on Historic Preservation. Any grant made by the Secretary under this paragraph shall not exceed 60 per centum of the total cost of conversion of a railroad passenger terminal into an intermodal transportation terminal.

(3) Financial assistance for the purpose set forth in paragraph (1)(B) of this subsection may be granted in accordance with regulations, to any responsible person (including a governmental entity) who is empowered by applicable law, qualified, prepared, and committed, on an interim basis pending the formulation of plans for reuse, to maintain (and prevent the demolition, dismantling, or further deterioration of) a railroad passenger terminal; *Provided,* That (A) such terminal has, in the opinion of the Secretary, a reasonable likelihood of being converted to or conditioned for reuse as an intermodal transportation terminal, a civic or cultural activities center, or both; and (B) planning activity aimed at conversion or reuse has commenced and is proceeding in a competent manner. Funds appropriated for the purpose of this paragraph and paragraph (1)(B) of this subsection shall be expended in the manner most likely to maximize the preservation of railroad passenger terminals capable reasonably of conversion to intermodal transportation terminals or which are listed in the National Register of Historic Places maintained by the Secretary of the Interior or which are recommended (on the basis of architectural integrity and quality) by the Chairman of

the National Endowment for the Arts or the Advisory Council on Historic Preservation. The amount of the Federal share of any grant under this paragraph shall not exceed 60 per centum of the total cost of such interim maintenance for a period not to exceed five years.

(4) Acquisitions made for the purpose set forth in paragraph (1)(C) of this subsection shall be made only after consultation with the chairman of the National Endowment for the Arts and the Advisory Council on Historic Preservation.

(5) Financial assistance for the purpose set forth in paragraph (1)(D) of this subsection may be granted, in accordance with regulations, to a qualified person (including a governmental entity) who is prepared to develop practicable plans meeting the zoning, land use, and other requirements of the applicable State and local jurisdictions in which the rail passenger terminal is located as well as requirements under this subsection; who shall incorporate into the designs and plans proposed for the conversion of such terminal into an intermodal transportation terminal, a civic or cultural center, or both, features which reasonably appear likely to attract private investors willing to undertake the implementation of such planned conversion and its subsequent maintenance and operation; and who shall complete the designs and plans for such conversion within two years following the approval of the application for Federal financial assistance under this subsection. In making grants under this paragraph, the Secretary shall give preferential consideration to applicants whose completed designs and plans will be implemented and effectuated within three years after the date of completion. Funds appropriated for the purpose of this paragraph and paragraph (1)(C) of this subsection shall be expended in the manner most likely to maximize the conversion and continued public use of railroad passenger terminals which are listed in the National Register of Historic Places maintained by the Secretary of the Interior or which are recommended (on the basis of architectural integrity and quality) by the Advisory Council on Historic Preservation or the Chairman of the National Endowment for the Arts. The amount of the Federal share of any grant under this paragraph shall not exceed 60 per centum of the total cost of the project or undertaking for which the financial assistance is provided.

(6) Within ninety days after the date of enactment of this subsection, the Secretary shall issue, and may from time to time amend, regulations with respect to financial assistance under this subsection and procedures for the award of such assistance. Each application for assistance under this subsection shall be made in writing in such form and with such content and other submissions as the Secretary shall require.

(7) The National Railroad Passenger Corporation shall give preference to using station facilities that would preserve buildings of historical and architectural significance.

(8) Each recipient of financial assistance under this subsection shall keep such records as the Secretary shall prescribe, including records which fully disclose the amount and disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance was given or used, the amount of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit. Until the expiration of three years after completion of such project or undertaking, the Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of such receipts which, in the opinion of the Secretary or the Comptroller General, may be related or pertinent to such financial assistance.

(9)(A) There is authorized to be appropriated for the purpose set forth—

(i) in paragraphs (1)(A) and (1)(C) of this subsection not to exceed $15,000,000;

(ii) in paragraphs (1)(A) and (1)(C) of this subsection not to exceed $5,000.000; and

(iii) in paragraph (1)(D) of this subsection, not to exceed $5,000,000.

(B) There shall be available to the National Endowment for the Arts, from the sums available under subparagraphs (A)(6) and (A)(iii) of this paragraph, not to exceed $2,500,000 for planning pursuant to paragraph (1)(D) of this subsection, and not to exceed $2,500,000 for interim maintenance pursuant to paragraph (1)(B) of this subsection.

(C) Sums appropriated for the purposes of this subsection are authorized to remain available until expended.

(10) As used in this subsection, 'civic and cultural activities' include, but are not limited to, libraries, musical and dramatic presentations, art exhibitions, adult education programs, public meeting place for community groups, convention visitors and others, and facilities for carrying on activities supported in whole or in part under Federal law.

(11) Nothing in this subsection shall be construed to invalidate the eligibility of any station for funds designed to assist in its preservation or reuse under any other Federal program or statute.

Historical Note

By the act of Feb. 5, 1976, Pub. L. 94-210, §810 [49 U.S.C. §1653a], 90 Stat. 146, the Secretary of Transportation is required to establish a rail bank consisting of rail trackage and other rail properties "for purposes of preserving existing service in certain areas of the United States in which fossil fuel, natural resources or agricultural production is located."

RAIL SERVICES

Sec. 5. (a) *[49 U.S.C. §1654]* The Secretary may develop and make available to interested persons feasible plans, proposals, and recommendations for mergers, consolidations, reorganizations, and other unification or coordination projects for rail services (including, but not limited to, arrangements for joint use of tracks or other facilities and any acquisition or sale of assets) which the Secretary believes would result in a rail system which is more efficient, consistent with the public interest.

(b) In order to achieve a more efficient, economical, and viable rail system in the private sector, the Secretary may, upon the request of any railroad and in accordance with subsections (a) through (e) of this section, assist in planning, negotiating, and effecting a unification or coordination of operations and facilities with respect to two or more railroads.

(c) The Secretary may conduct such studies as are deemed advisable to determine the potential cost savings and possible improvements in the quality of rail services which are likely to result from unification or coordination with respect to two or more railroads, through the elimination of duplicative or overlapping operations and facilities; the reduction of switching operations; utilization of the shortest, or the most efficient, and economical routes; the exchange of trackage rights; the combining of trackage and of terminal or other facilities; the upgrading of tracks and other facilities used by two or more railroads; reduction of administrative and other expenses; and any other measures likely to reduce costs and improve rail service. For purposes of studies conducted under this section and the study described in section 901 of the Railroad Revitalization and Regulatory Reform Act of 1976, each railroad shall provide such information as may be requested by the Secretary in connection with the performance of functions under this section and such section 901. In furtherance of any of the functions or responsibilities of the Secretary under this section or such section 901, any officer or employee duly designated by the Secretary may obtain, from any railroad, information regarding the nature, kind, quality, origin, destination, consignor, consignee, and routing of property, without the consent of the congisnor or consignee involved, notwithstanding the provisions of section 15(13) of the Interstate Commerce Act (49 U.S.C. 15(13)) and may, to the extent necessary or appropriate, exercise, with respect to any railroad, any of the powers described in section 203(c) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 713(c)), as provided therein, except that subpoenas shall be issued under the signature of the Secretary.

(d) When requested by one or more railroads, the Secretary may also hold conferences with respect to any proposed unification or coordination project. The Secretary may invite officers and directors of all affected railroads; representatives of employees of such railroads who may be affected; the Interstate Commerce Commission; appropriate State and local government officials, shippers, and consumer representatives; and representatives of the Federal Trade Commission and of the Attorney General to one or more such conferences with respect to such a proposal. The Secretary may mediate any dispute which may arise in connection with any proposed unification or coordination project. Persons attending or represented at any such conference shall not be liable under the antitrust laws of the United States with respect to any discussion at such conference and as to any agreements reached at such conference, which are entered into with the approval of the Secretary in order to achieve or determine a plan of action to implement any such unification or coordination project.

(e) Whenever any railroad submits a proposal for a merger or other action the approval of which is subject to the jurisdiction of the Interstate Commerce Commission under section 5(2) of the Interstate Commerce Act (49 U.S.C. 5(2)), the Secretary may, if he has not already done so, conduct a study of such proposal in order to determine whether or not, in his judgment, such proposal is in accordance with the standards set forth in section 5(2)(c) of such Act (49 U.S.C. 5(2)(c)). Whenever such proposal is the subject of an application and a proceeding before such Commission, the Secretary is authorized to appear before the Commission in any proceeding held with respect to such application.

LOCAL RAIL SERVICE ASSISTANCE

(f) The Secretary shall, in accordance with this section, provide financial assistance to States for rail freight assistance programs that are designed to cover—

(1) the cost of rail service continuation payments;

(2) the cost of purchasing a line of railroad or other rail properties to maintain existing or provide for future rail service;

(3) the cost of rehabilitating and improving rail properties on a line of railroad to the extent necessary to permit adequate and efficient rail freight service on such line; and

(4) the cost of reducing the costs of lost rail service in a manner less expensive than continuing rail service.

(g) The Federal share of the costs of any rail service assistance program shall be as follows: (1) 100 percent for the period from July 1, 1976 to June 30, 1977; (2) 90 percent for the period from July 1, 1977 to June 30, 1978; (3) 80 percent for the period from July 1, 1978 to June 30, 1979; and (4) 70 percent for the period from July 1, 1979 to June 30, 1981. For the period from July 1, 1979 to June 30, 1981, the Secretary may make such adjustments in the percentage level of the Federal share as may be necessary and appropriate so as not to exceed the maximum amount of funds authorized under subsection (o) of this section. The Secretary shall, within 1 year after the date of enactment of this subsection, promulgate standards and procedures under which the State share of such cost may be provided through in-kind benefits such as forgiveness of taxes, trackage rights, and facilities which would not otherwise be provided.

(h) Each State which is, pursuant to subsection (j) of this section, eligible to receive rail service assistance is entitled to an amount equal to the total amount authorized and appropriated for such purpose, multiplied by a fraction whose numerator is the rail mileage in such State which is eligible for rail service assistance under this section and whose denominator is the rail mileage in all of the States which are eligible for rail service assistance under this section. Notwithstanding the provisions of the preceding sentence, the entitlement of each State shall not be less than 1 percent of the funds appropriated. For purposes of this subsection, rail mileage shall be measured by the Secretary, in consultation with the Interstate Commerce Commission. Any portion of the entitlement of any State which is withheld, in accordance with this section, and any such sums which are not used or committed by a State shall be reallocated immediately, to the extent practicable, among the other States, in accordance with the formula set forth in the first sentence of this subsection.

(i) Rail service assistance to which a State is entitled under this section may be allocated by such State to meet the cost of establishing and implementing the State rail plan required by subsection (j) of this section or by section 402(c)(1) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 762(c)(1)). Such grants shall be made available by the Secretary during the course of the State rail planning process, and shall be distributed by the Secretary as needed by the States. The amount of State rail planning grants to which each State (including each State referred to in subsection (n)(1) of this section) is entitled shall be proportionate to the amount of rail service assistance to which such State is entitled under this Act.

(j) A State is eligible to receive rail service assistance from the Secretary if—

(1) such State has established an adequate plan for rail services in such State as part of an overall planning process for all transportation services in such State, including a suitable process for updating, revising, and amending such plan;

(2) such State plan is administered or coordinated by a designated State agency and provides for the equitable distribution of resources;

(3) such State agency (A) has authority and administrative jurisdiction to develop, promote, supervise, and support safe, adequate and efficient rail transportation services, (B) employs or will employ, directly or indirectly, sufficient trained and qualified personnel, (C) maintains or will maintain adequate programs of investigation, research, promotion, and development, with provisions for public participation, and (D)

is designated and directly solely, or in cooperation with other State agencies to take all practicable steps to improve transportation safety and to reduce transportation-related energy utilization and pollution;

(4) such State provides satisfactory assurance that it has or will adopt and maintain adequate procedures for financial control, accounting, and performance evaluation in order to assure proper use of Federal funds; and

(5) such State complies with regulations of the Secretary issued under this section and the Secretary determines that such State meets or exceeds the requirements of paragraphs (1) through (4) of this subsection.

(k) A project is eligible in any year for financial assistance from the applicable rail service assistance program only if—

(1)(A) the Commission has found that the public convenience and necessity permit the abandonment of, or the discontinuance of rail service on, the line of railroad which is related to such project, or (B) the line of railroad or related project was eligible for assistance under title IV of the Regional Rail Reorganization Act of 1973; and

(2) such line, or related projects, has not previously been the subject of Federal rail service assistance under this section for more than 5 fiscal years.

(l) The Secretary shall pay to each eligible State an amount equal to its entitlement under subsection (h) of this section, to be expended or committed to one or more projects which are eligible, pursuant to subsection (k) of this section.

(m)(1) Each recipient of financial assistance under subsections (e) through (o) of this section, whether in the form of grants, subgrants, contracts, subcontracts, or other arrangements, shall keep such records as the Secretary shall prescribe including records which fully disclose the amount and disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance was given or used, the amount of that portion of the cost of the project which was supplied by other sources, and such other records as will facilitate an effective audit. Such records shall be maintained for 3 years after the completion of such a project or undertaking.

(2) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access, for the purpose of audit and examination, to any books, documents, papers, and records of receipts which, in the opinion of the Secretary or of the Comptroller General may be related or pertinent to the grants, contracts, or other arrangements referred to in paragraph (1) of this subsection.

(3) The Secretary and the Comptroller General shall regularly conduct, or cause to be conducted—

(A) a financial audit, in accordance with generally accepted auditing standards; and

(B) a performance audit of the activities and transactions assisted under this section, in accordance with generally accepted management principles.

Such audits may be conducted by independent certified or licensed public accountants and management consultants approved by the Secretary and the Comptroller General, and they shall be conducted in accordance with such rules and regulations as may be prescribed by the Comptroller General.

(n) As used in this section, the term 'State' means—

(1) during the period from the date of enactment of this subsection through the second anniversary of the date on which rail properties are conveyed pursuant to section 303(b)(1) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 743(b)(1)), any State in which a carrier by railroad subject to part I of the Interstate Commerce Act maintains any line of railroad, except that the term shall not include the States of Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, Ohio, Indiana, Michigan, and Illinois, and the District of Columbia; and

(2) during the period following the second anniversary of the date on which rail properties are conveyed pursuant to such section 303(b)(1), any State in which a carrier by railroad subject to part I of the Interstate Commerce Act maintains any line of railroad.

(o) There are authorized to be appropriated to the Secretary for the purposes of subsections (f) through (o) of this section not to exceed $360,000,000, without fiscal year limitation. Of the foregoing sums, not to exceed $5,000,000 shall be made available for planning grants during each of the 3 fiscal years ending June 30, 1976; September 30, 1977; and September 30, 1978. In addition, any appropriated sums remaining after the repeal of section 402 of the Regional Rail Reorganization Act of 1973 are authorized to remain available to the Secretary for purposes of subsections (f) through (o) of this section. Such sums as are appropriated are authorized to remain available until expended.

Historical Notes

By §901 of Pub. L. 94-210, 90 Stat. 147, the Secretary of Transportation is required to conduct a comprehensive study of the American railway system and to submit to Congress a report setting forth the results of the study.

By §902 of the same act, 90 Stat. 147, the Secretary of Transportation is required to conduct a study of aid to rail transportation and to submit to Congress a report setting forth the results of the study.

TRANSFERS TO DEPARTMENT

Sec. 6. *[49 U.S.C. §1655]* (a) There are hereby transferred to and vested in the Secretary all functions, powers, and duties of the Secretary of Commerce and other offices and officers of the Department of Commerce under—

(1) the following laws and provisions of law relating generally to highways:

(A) Title 23, United States Code, as amended.

(B) The Federal-Aid Highway Act of 1966 (80 Stat. 766).

(C) The Federal-Aid Highway Act of 1962, as amended (76 Stat. 1145; 23 U.S.C. 307 note).

(D) The Act of July 14, 1960, as amended (74 Stat. 526; 23 U.S.C. 313 note).

(E) The Federal-Aid Highway Act of 1954, as amended (68 Stat. 70).

(F) The Act of September 26, 1961, as amended (75 Stat. 670).

(G) The Highway Revenue Act of 1956, as amended (70 Stat. 387; 23 U.S.C. 120 note).

(H) The Highway Beautification Act of 1965, as amended (79 Stat. 1028; 23 U.S.C. 131 et seq. notes).

(I) The Alaska Omnibus Act, as amended (73 Stat. 141; 48 U.S.C. 21 note prec.).

(J) The Joint Resolution of August 28, 1965, as amended (79 Stat. 578; 23 U.S.C. 101 et seq. notes).

(K) Section 502(c) of the General Bridge Act of 1946, as amended (60 Stat. 847; 33 U.S.C. 525(c)).

(L) The Act of April 27, 1962, as amended (76 Stat. 59).

(M) Reorganization Plan No. 7 of 1949 (63 Stat. 1070; 5 U.S.C. 133z-15 note).

(2) the following laws and provisions of law relating generally to ground transportation:

(A) The Act of September 30, 1965, as amended (79 Stat. 893; 49 U.S.C. 1631 et seq.).

(B) The Urban Mass Transportation Act of 1964, as amended (78 Stat. 306, 49 U.S.C. 1607).

(3) the following laws and provisions of law relating generally to aircraft;

(A) The Act of September 7, 1957, as amended (71 Stat. 629; 49 U.S.C. 1324 note).

(B) Section 410 of the Federal Aviation Act of 1958, as amended (72 Stat. 769; 49 U.S.C. 1380).

(C) Title XIII of the Federal Aviation Act of 1958, as amended (72 Stat. 800; 49 U.S.C. 1531 et seq.).

(4) the following law relating generally to pilotage: The Great Lakes Pilotage Act of 1960, as amended (74 Stat. 259; 46 U.S.C. 216 et seq.).

(5) the following law to the extent it authorizes scientific and professional positions which relate primarily to functions transferred by this subsection: The Act of August 1, 1947, as amended (61 Stat. 715; 5 U.S.C. 1161).

(6) the following laws relating generally to traffic and highway safety:

(A) The National Traffic and Motor Vehicle Safety Act of 1966 (80 Stat. 718).

(B) The Highway Safety Act of 1966 (80 Stat. 731).

(b)(1) The Coast Guard is hereby transferred to the Department, and there are hereby transferred to and vested in the Secretary all functions, powers, and duties, relating to the Coast Guard, of the Secretary of the Treasury and of officers and offices of the Department of the Treasury.

(2) Notwithstanding the transfer of the Coast Guard to the Department and the transfer to the Secretary of the functions, powers, and duties, relating to the Coast Guard, of the Secretary of the Treasury and of other officers and offices of the Department of the Treasury, effected by the provisions of paragraph (1) of this subsection, the Coast Guard, together with the functions, powers, and duties relating thereto, shall operate as a part of the Navy, subject to the orders of the Secretary of the Navy, in time of war or when the President shall so direct, as provided in section 3 of title 14, United States Code, as amended.

(3) Notwithstanding any other provision of this Act, the functions, powers, and duties of the General Counsel of the Department of the Treasury set out in chapter 47 of title 10, United States Code, as amended (Uniform Code of Military Justice), are hereby transferred to and vested in the General Counsel of the Department.

(c)(1) There are hereby transferred to and vested in the Secretary all functions, powers, and duties of the Federal Aviation Agency, and of the Administrator and other officers and offices thereof, including the development and construction of a civil supersonic aircraft: *Provided, however,* That there are hereby transferred to the Federal Aviation Administrator, and it shall be his duty to exercise the functions, powers, and duties of the Secretary pertaining to aviation safety (other than those relating to the transportation, packing, marking, or description of hazardous materials) as set forth in sections 306, 307, 308, 309, 312, 313, 314, 1101, 1105, and 1111, and titles VI, VII, IX, and XII of the Federal Aviation Act of 1958, as amended. In exercising these enumerated functions, powers, and duties, the Administrator shall be guided by the declaration of policy in section 103 of the Federal Aviation Act of 1958, as amended. Decisions of the Federal Aviation Administrator made pursuant to the exercise of the functions, powers, and duties enumerated in this subsection to be exercised by the Administrator shall be administratively final, and appeals as authorized by law or this Act shall be taken directly to the National Transportation Safety Board or to the courts, as appropriate.

(2) Nothing in this Act shall affect the power of the President under section 302(c) of the Federal Aviation Act of 1958 (72 Stat. 746, 49 U.S.C. 1343(c)) to transfer, to the Department of Defense in the event of war, any functions transferred by this Act from the Federal Aviation Agency.

(d) There are hereby transferred to and vested in the Secretary all functions, powers, and duties of the Civil Aeronautics Board, and of the Chairman, members, officers, and offices thereof under titles VI (72 Stat. 775; 5 U.S.C. 1421 et seq.) and VII (72 Stat. 781; 49 U.S.C. 1441 et seq.) of the Federal Aviation Act of 1958, as amended: *Provided, however,* That these functions powers, and duties are hereby transferred to and shall be exercised by the National Transportation Safety Board. Decisions of the National Transportation Safety Board made pursuant to the exercise of the functions, powers, and duties enumerated in this subsection shall be administratively final, and appeals as authorized by law or this Act shall be taken directly to the courts.

(e) There are hereby transferred to and vested in the Secretary all functions, powers, and duties of the Interstate Commerce Commission, and of the Chairman, members, officers, and offices thereof, under—

(1) the following laws relating generally to safety appliances and equipment on railroad engines and cars, and protection of employees and travelers:

(A) The Act of March 2, 1893, as amended (27 Stat. 531; 45 U.S.C. 1 et seq.).

(B) The Act of March 2, 1903, as amended (32 Stat. 943; 45 U.S.C. 8 et seq.).

(C) The Act of April 14, 1910, as amended (36 Stat. 298; 45 U.S.C. 11 et seq.).

(D) The Act of May 30, 1908, as amended (35 Stat. 476; 45 U.S.C. 17 et seq.).

(E) The Act of February 17, 1911, as amended (36 Stat. 913; 45 U.S.C. 22 et seq.).

(F) The Act of March 4, 1915, as amended (38 Stat. 1192; 45 U.S.C. 30).

(G) Reorganization Plan No. 3 of 1965 (79 Stat. 1320).

(H) Joint Resolution of June 30, 1906, as amended (34 Stat. 838; 45 U.S.C. 35).

(I) The Act of May 27, 1908, as amended (35 Stat. 325; 45 U.S.C. 36 et seq.).

(J) The Act of March 4, 1909, as amended (35 Stat. 965; 45 U.S.C. 37).

(K) The Act of May 6, 1910, as amended (36 Stat. 350; 45 U.S.C. 38 et seq.).

(2) the following law relating generally to hours of service of employees: The Act of March 4, 1907, as amended (34 Stat. 1415; 45 U.S.C. 61 et seq.).

(3) the following law relating generally to medals for heroism: The Act of February 23, 1905, as amended (33 Stat. 743; 49 U.S.C. 1201 et seq.).

(4) the following provisions of law relating generally to explosives and other dangerous articles: Sections 831-835 of title 18. United States Code, as amended.

(5) the following laws relating generally to standard time zones and daylight saving time:

(A) The Act of March 19, 1918, as amended (40 Stat. 450: 15 U.S.C. 261 et seq.).

(B) The Act of March 4, 1921, as amended (41 Stat. 1446: 15 U.S.C. 265).

(C) The uniform Time Act of 1966, as amended (80 Stat. 107).

(6) the following provisions of the Interstate Commerce Act, as amended—

(A) relating generally to safety appliances methods and systems: Section 25 (49 U.S.C. 26).

(B) relating generally to investigation of motor vehicle sizes, weights, and service of employees: Section 226 (49 U.S.C. 325).

(C) relating generally to qualifications and maximum hours of service of employees and safety of operation and equipment: Sections 204(a)(1) and (2), to the extent that they relate to qualifications and maximum hours of service of employees and safety of operation and equipment; and sections 204(a)(3), (3a), and (5) (49 U.S.C. 304).

(D) to the extent they relate to private carriers of property by motor vehicle and carriers of migrant workers by motor vehicle other than contract carriers: Sections 221(a), 221(c), and 224 (49 U.S.C. 321 et seq.).

(f)(1) Nothing in subsection (e) shall diminish the functions, powers, and duties of the Interstate Commerce Commission under sections 1(6), 206, 207, 209, 210a, 212, and 216 of the Interstate Commerce Act, as amended (49 U.S.C. 1(6), 306 et seq.), or under any other section of that Act not specifically referred to in subsection (e).

(2)(A) With respect to any function which is transferred to the Secretary by subsection (e) and which was vested in the Interstate Commerce Commission preceding such transfer, the Secretary shall have the same administrative powers under the Interstate Commerce Act as the Commission had before such transfer with respect to such transferred function. After such transfer, the Commission may exercise its administrative powers under the Interstate Commerce Act only with respect to those of its functions not transferred by subsection (e).

(B) For purposes of this paragraph—

(i) the term "function" includes power and duty, and

(ii) the term "administrative powers under the Interstate Commerce Act" means any functions under the following provisions of the Interstate Commerce Act, as amended: Sections 12, 13(1), 13(2), 14, 16(12), the last sentence of 18(1), sections 20 (except clauses (3), (4), (11), and (12) thereof), 204(a)(6) and (7), 204(c), 204(d), 205(d), 205(f), 220 (except subsection (c) and the proviso of subsection (a) thereof), 222 (except subsections (b)(2) and (b)(3) thereof), and 417(b)(1) (49 U.S.C. 12 et seq., 304 et seq., and 1017).

(3)(A) The Federal Railroad Administrator shall carry out the functions, powers, and duties of the Secretary pertaining to railroad safety as set forth in the statutes transferred to the Secretary by subsection (e) of this section (other than subsection (e)(4)).

(B) The Federal Highway Administrator shall carry out the functions, powers, and duties of the Secretary pertaining to motor carrier safety as set forth in the statutes transferred to the Secretary by subsection (e) of this section (other than subsection (e)(4)).

(C) Decisions of the Federal Railroad Administrator and the Federal Highway Administrator (i) which are made pursuant to the exercise of the functions, powers, and duties enumerated in subparagraphs (A) and (B) of this paragraph to be carried out by the Administrators, and (ii) which involve notice and hearing required by law, shall be administratively final, and appeals as authorized by law or this Act shall be taken directly to the National Transportation Safety Board or the courts, as appropriate.

(g) There are hereby transferred to and vested in the Secretary all functions, powers, and duties of the Secretary of the Army and other officers and offices of the Department of the Army under—

(1) the following law and provisions of law relating generally to water vessel anchorages:

(A) Section 7 of the Act of March 4, 1915, as amended (38 Stat. 1053; 33 U.S.C. 471).

(B) Article 11 of section 1 of the Act of June 7, 1897, as amended (30 Stat. 98; 33 U.S.C. 180)).

(C) Rule 9 of section 1 of the Act of February 8, 1895, as amended (28 Stat. 647; 33 U.S.C. 258).

(D) Rule numbered 13 of section 4233 of the Revised Statutes, as amended (33 U.S.C. 322).

(2) the following provision of law relating generally to drawbridge operating regulations: Section 5 of the Act of August 18, 1894, as amended (28 Stat. 362; 33 U.S.C. 499).

(3) the following law relating generally to obstructive bridges: The Act of June 21, 1940, as amended (54 Stat. 497; 33 U.S.C. 511 et seq.).

(4) the following laws and provisions of law relating generally to the reasonableness of tolls:

(A) Section 4 of the Act of March 23, 1906, as amended (34 Stat. 85; 33 U.S.C. 494).

(B) Section 503 of the General Bridge Act of 1946, as amended (60 Stat. 847: 33 U.S.C. 526).

(C) Section 17 of the Act of June 10, 1930, as amended (46 Stat. 552: 33 U.S.C. 498a).

(D) The Act of June 27, 1930, as amended (46 Stat. 821; 33 U.S.C. 498b).

(E) The Act of August 21, 1935, as amended (49 Stat. 670; 33 U.S.C. 503 et seq.).

(5) the following law relating to prevention of pollution of the sea by oil: The Oil Pollution Act, 1961, as amended (75 Stat. 402; 33 U.S.C. 1001 et seq.).

(6) the following laws and provisions of law to the extent that they relate generally to the location and clearances of bridges and causeways in the navigable waters of the United States:

(A) Section 9 of the Act of March 3, 1899, as amended, (30 Stat. 1151; 33 U.S.C. 401).

(B) The Act of March 23, 1906, as amended (34 Stat. 84; 33 U.S.C. 491 et seq.).

(C) The General Bridge Act of 1946; as amended (60 Stat. 847; 33 U.S.C. 525 et. seq.).

(h) The provisions of subchapter II of chapter 5 and of chapter 7 of title 5, United States Code, shall be applicable to proceedings by the Department and any of the administrations or boards within the Department established by this Act except that notwithstanding this or any other provision of this Act, the transfer of functions, powers, and duties to the Secretary or any other officer in the Department shall not include functions vested by subchapter II of chapter 5 of title 5, United States Code, in hearing exqminers employed by any department, agency, or component thereof whose functions are transferred under the provisions of this Act.

(i) The administration of the Alaska Railroad, established pursuant to the Act of March 12, 1914, as amended (38 Stat. 308), and all of the functions authorized to be carried out by the Secretary of the Interior pursuant to Executive Order Numbered 11107, April 25, 1963 (28 F.R. 4225), relative to the operation of said Railroad, are hereby transferred to and vested in the Secretary of Transportation who shall exercise the same authority with respect thereto as is now exercised by the Secretary of the Interior pursuant to said Executive order.

TRANSPORTATION INVESTMENT STANDARDS

Sec. 7. [*49 U.S.C. §1656*] (a) The Secretary, subject to the provisions of section 4 of this Act, shall develop and from time to time in the light of experience revise standards and criteria consistent with national transportation policies, for the formulation and economic evaluation of all proposals for the investment of Federal funds in transportation facilities or equipment, except such proposals as are concerned with (1) the acquisition of transportation facilities or equipment by Federal agencies in providing transportation services for their own use; (2) an interoceanic canal located outside the contiguous United States; (3) defense features included at the direction of the Department of Defense in the design and construction of civil air, sea, and land transportation; (4) programs of foreign assistance; (5) water resource projects; or (6) grant-in-aid programs authorized by law. The standards and criteria developed or revised pursuant to this subsection shall be promulgated by the Secretary upon their approval by the Congress.

The standards and criteria for economic evaluation of water resource projects shall be developed by the Water Resources Council established by Public Law 89-80. For the purpose of such standards and criteria, the primary direct navigation benefits of a water resource project are defined as the product of the savings to shippers using the waterway and the estimated traffic that would use the waterway; where the savings to shippers shall be construed to mean the difference between (a) the freight rates or charges prevailing at the time of the study for the movement by the alternative means and (b) those which would be charged on the proposed waterway; and where the estimate of traffic that would use the waterway will be based on such freight rates, taking into account projections of the economic growth of the area.

The Water Resources Council established under section 101 of Public Law 89-80 is hereby expanded to include the Secretary of Transportation on matters pertaining to navigation features of water resource projects.

(b) Every survey, plan, or report formulated by a Federal agency which includes a proposal as to which the Secretary has promulgated standards and criteria pursuant to subsection (a) shall be (1) prepared in accord with such standards and criteria and upon the basis of information furnished by the Secretary with respect to projected growth of transportation needs and traffic in the affected area, the relative efficiency of various modes of transport, the available transportation services in the area, and the general effect of the proposed investment on existing modes, and on the regional and national economy; (2) coordinated by the proposing agency with the Secretary and, as appropriate, with other Federal agencies, States, and local units of government for inclusion of his and their views and comments; and (3) transmitted thereafter by the proposing agency to the President for disposition in accord with law and procedures established by him.

ADMINISTRATIVE PROVISIONS

Sec. 9 *[49 U.S.C. §1657]* (a) In addition to the authority contained in any other Act which is transferred to and vested in Secretary, the National Transportation Safety Board, or any other officer in the Department, the Secretary is authorized, subject to the civil service and classification laws, to select, appoint, employ, and fix the compensation of such officers and employees, including investigators, attorneys, and hearing examiners, as are necessary to carry out the provisions of this Act and to prescribe their authority and duties.

(b) The Secretary may obtain services as authorized by section 3109 of title 5 of the United States Code, but at rates not to exceed $100 per diem for individuals unless otherwise specified in an appropriation Act.

(c) The Secretary is authorized to provide for participation of military personnel in carrying out the functions of the Department. Members of the Army, the Navy, the Air Force, or the Marine Corps may be detailed for service in the Department by the appropriate Secretary, pursuant to cooperative agreements with the Secretary of Transportation.

(d)(1) Appointment, detail, or assignment to, acceptance of, and service in any appointive or other position in the Department under the authority of section 9(c) and section 9(p) shall in no way affect status, office, rank, or grade which officers or enlisted men may occupy or hold or any emolument, perquisite, right, privilege, or benefit incident to or arising out of any such status, office, rank, or grade, nor shall any member so appointed, detailed, or assigned be charged against any statutory limitation on grades or strengths applicable to the Armed Forces. A person so appointed, detailed, or assigned shall not be subject to direction by or control by his armed force or any officer thereof directly or indirectly with respect to the responsibilities exercised in the position to which appointed, detailed, or assigned.

(2) The Secretary shall report annually in writing to the appropriate committees of the Congress on personnel appointed and agreements entered into under subsection (c) of this section, including the number, rank, and positions of members of the armed services detailed pursuant thereto.

(e)(1) Except where this Act vests in any administration, agency or board, specific functions, powers, and duties, the Secretary may, in addition to the authority to delegate and redelegate contained in any other Act in the exercise of the functions transferred to or vested in the Secretary in this Act, delegate any of his residual functions, powers and duties to such officers and employees of the Department as he may designate, may authorize such successive redelegations of such functions, powers, and duties as he may deem desirable, and may make such rules and regulations as may be necessary to carry out his functions, powers, and duties.

(2) In addition to the authority to delegate and redelegate contained in any other Act, in the exercise of the functions transferred to or specified by this Act to be carried out by any officer in the Department, such officer may delegate any of such functions, powers, and duties to such other officers and employees of the Department as he may designate; may authorize such successive redelegations of such functions, powers, and duties as he may deem desirable; and may make such rules and regulationsas may be necessary to carry out such functions, powers, and duties.

(3) The Administrators established by section 3(e) of this Act may not delegate any of the statutory duties and responsibilities specifically assigned to them by this Act outside of their respective administrations.

(f) The personnel, assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds employed, held, used, arising from, available or to be made available, of the Federal Aviation Agency, and of the head and other officers and offices thereof, are hereby transferred to the Secretary: *Provided, however,* That the personnel, assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds employed, held, used, arising from, available, or to be made available in carrying out the duties and functions transferred by this Act to the Secretary which are specified by this Act to be carried out by the Federal Aviation Administrator shall be assigned by the Secretary to the Federal Aviation Administrator for these purposes.

(g) So much of the positions, personnel, assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds employed, held, used, arising from, available or to be made available in connection with the functions, powers, and duties transferred by sections 6 (except section 6(c)) and 8(d) and (e) of this Act as the Director of the Bureau of the Budget shall determine shall be transferred to the Secretary: *Provided, however,* That the positions, personnel, assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds employed, held, used, arising from, available, or to be made available, by the Civil Aeronautics Board in carrying out the duties transferred by this Act to be exercised by the National Transportation Safety

Board shall be transferred to the National Transportation Safety Board. Except as provided in subsection (h), personnel engaged in functions, powers, and duties transferred under this Act shall be transferred in accordance with applicable laws and regulations relating to transfer of functions.

(h) The transfer of personnel pursuant to subsections (f) and (g) of this section shall be without reduction in classification or compensation for one year after such transfer.

(i) In any case where all of the functions, powers, and duties of any office or agency, other than the Coast Guard, are transferred pursuant to this Act, such office or agency shall lapse. Any person who, on the effective date of this Act, held a position compensated in accordance with the Executive Schedule, and who, without a break in service, is appointed in the Department to a position having duties comparable to those performed immediately preceding his appointment shall continue to be compensated in his new position at not less than the rate provided for his previous position, for the duration of his service in his new position.

(j) The Secretary is authorized to establish a working capital fund, to be available without fiscal year limitation, for expenses necessary for the maintenance and operation of such common administrative services as he shall find to be desirable in the interest of economy and efficiency in the Department, including such services as a central supply service for stationery and other supplies and equipment for which adequate stocks may be maintained to meet in whole or in part the requirements of the Department and its agencies; central messenger, mail, telephone, and other communications services; office space, central services for document reproduction, and for graphics and visual aids; and a central library service. The capital of the fund shall consist of any appropriations made for the purpose of providing capital (which appropriations are hereby authorized) and the fair and reasonable value of such stocks of supplies, equipment, and other assets and inventories on order as the Secretary may transfer to the fund, less the related liabilities and unpaid obligations. Such funds shall be reimbursed in advance from available funds of agencies and offices in the Department, or from other sources, for supplies and services at rates which will approximate the expense of operation, including the accrual of annual leave and the depreciation of equipment. The fund shall also be credited with receipts from sale or exchange of property and receipts in payment for loss or damage to property owned by the fund. There shall be covered into the United States Treasury as miscellaneous receipts any surplus found in the fund (all assets, liabilities, and prior losses considered) above the amounts transferred or appropriated to establish and maintain said fund.

(k) The Secretary shall cause a seal of office to be made for the Department of such device as he shall approve, and judicial notice shall be taken of such seal.

(l) In addition to the authority contained in any other Act which is transferred to and vested in the Secretary, the National Transportation Safety Board, or other officer in the Department, as necessary, and when not otherwise available, the Secretary is authorized to provide for, construct, or maintain the following for employees and their dependents stationed at remote localities:

(1) Emergency medical services and supplies;

(2) Food and other subsistence supplies;

(3) Messing facilities;

(4) Motion picture equipment and film for recreation and training;

(5) Reimbursement for food, clothing, medicine, and other supplies furnished by such employees in emergencies for the temporary relief of distressed persons; and

(6) Living and working quarters and facilities.

The furnishing of medical treatment under paragraph (1) and the furnishing of services and supplies under paragraphs (2) and (3) of this subsection shall be at prices reflecting reasonable value as determined by the Secretary, and the proceeds therefrom shall be credited to the appropriation from which the expenditure was made.

(m)(1) The Secretary is authorized to accept, hold, administer, and utilize gifts and bequests of property, both real and personal, for the purpose of aiding or facilitating the work of the Department. Gifts and bequests of money and the proceeds from sales of other property received as gifts or bequests shall be deposited in the Treasury in a separate fund and shall be disbursed upon order of the Secretary. Property accepted pursuant to this paragraph, and the proceeds thereof, shall be used as nearly as possible in accordance with the terms of the gift or bequest.

(2) For the purpose of Federal income, estate, and gift taxes, property accepted under paragraph (1) shall be considered as a gift or bequest to or for use of the United States.

(3) Upon the request of the Secretary, the Secretary of the Treasury may invest and reinvest in securities of the United States or in securities guaranteed as to principal and interest by the United States any moneys contained in the fund provided for in paragraph (1). Income accruing from such securities, and from any other property held by the Secretary pursuant to paragraph (1) shall be deposited to the credit of the fund, and shall be disbursed upon order of the Secretary.

(n)(1) The Secretary is authorized, upon the written request of any person, or any State, territory, possession, or political subdivision thereof, to make special statistical studies relating to foreign and domestic transportation, and special studies relating to foreign and domestic transportation, and special studies relating to other matters falling within the province of the Department, to prepare from its records special statistical compilations, and to furnish transcripts of its studies, tables, and other records upon the payment of the actual cost of such work by the person or body requesting it.

(2) All moneys received by the Department in payment of the cost of work under paragraph (1) shall be deposited in a separate account to be administered under the direction of the Secretary. These moneys may be used, in the discretion of the Secretary, for the ordinary expenses incidental to the work and/or to secure in connection therewith the special services of persons who are neither officers nor employees of the United States.

(o) The Secretary is authorized to appoint, without regard to the civil service laws, such advisory committees as shall be appropriate for the purpose of consultation with and advice to the Department in performance of its functions. Members of such committees, other than those regularly employed by the Federal Government, while attending meetings of such committees or otherwise serving at the request of the Secretary, may be paid compensation at rates not exceeding those authorized for individuals under subsection (b) of this section, and while so serving away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons in the Government service employed intermittently.

(p)(1) Notwithstanding any provision of this Act or other law, a member of the Coast Guard on active duty may be appointed, detailed, or assigned to any position in the Department other than Secretary, Deputy Secretary, and Assistant Secretary for Administration.

(2) Subject to the provisions of title 5, United States Code, a retired member of the Coast Guard may be appointed to any position in the Department.

(q)(1) The Secretary is authorized to enter into contracts with educational institutions, public or private agencies or organizations, or persons for the conduct of scientific or technological research into any aspect of the problems related to the programs of the Department which are authorized by statute.

(2) The Secretary shall require a showing that the institutions, agencies, organizations, or persons with which he expects to enter into contracts pursuant to this subsection have the capability of doing effective work. He shall furnish such advice and assistance as he believes will best carry out the mission of the Department, participate in coordinating all research initiated under this subsection, indicate the lines of inquiry which seem to him most important, and encourage and assist in the establishment and maintenance of cooperation by and between the institutions, agencies, organizations, or persons and between them and other research organizations, the Department, and other Federal agencies.

(3) The Secretary may from time to time disseminate in the form of reports or publications to public or private agencies or organizations, or individuals such information as he deems pertinent on the research carried out pursuant to this section.

(4) Nothing contained in this subsection is intended to amend, modify, or repeal any provisions of law administered by the Department which authorize the making of contracts for research.

MINORITY RESOURCE CENTER

Sec. 11. *[49 U.S.C. §1647a]* (a) The Secretary shall, within 180 days after the date of enactment of this section, establish a Minority Resource Center (hereafter in this section referred to as the 'Center').

(b) The Center shall have an Advisory Committee, which shall consist of 5 individuals appointed by the Secretary from lists of 3 qualified individuals recommended by minority-dominated trade associations in the minority business community.

(c) The Center is authorized to—

(1) establish and maintain, and disseminate information from, a national information clearinghouse for minority entrepreneurs and businesses, for purposes of furnishing, to such entrepreneurs and businesses, information with respect to business opportunities involving the maintenance, rehabilitation, restructuring, improvement, and revitalization of the Nation's railroads;

(2) assist minority entrepreneurs and businesses in obtaining investment capital and debt financing;

(3) conduct market research, planning, economic and business analyses, and feasibility studies to identify such opportunities;

(4) design and conduct programs to encourage, promote, and assist minority entrepreneurs and businesses to secure contracts, subcontracts, and projects related to the maintenance, rehabilitation, restructuring, improvement, and revitalization of the Nation's railroads;

(5) enter into such contracts, cooperative agreements, or other transactions as may be necessary in the conduct of its functions and duties;

(6) develop support mechanisms, including venture capital, surety and bonding organizations, and management and technical services, which will enable minority entrepreneurs and businesses to take advantage of business opportunities related to the maintenance, rehabilitation, restructuring, improvement, and revitalization of the Nation's railroads; and

(7) participate in, and cooperate with, all Federal programs and other programs designed to provide financial, management, and other forms of support and assistance to minority entrepreneurs and businesses.

(d) The United States Railway Association, the Consolidated Rail Corporation, and the Secretary shall provide the Center with such relevant information, including procurement schedules, bids, and specifications with respect to particular maintenance, rehabilitation, restructuring, improvement, and revitalization projects, as may be requested by the Center in connection with the performance of its functions.

(e) As used in this section, the term 'minority' includes women.

ANNUAL REPORT

Sec. 12. *[49 U.S.C. §1658]* The Secretary shall, as soon as practicable after the end of each fiscal year, make a report in writing to the President for submission to the Congress on the activities of the Department during the preceding fiscal year.

SAVINGS PROVISIONS

Sec. 13. *[49 U.S.C. §1651 note]* (a) All orders, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges—

(1) which have been issued, made, granted, or allowed to become effective—

(A) under any provision of law amended by this Act, or

(B) in the exercise of duties, powers, or functions which are transferred under this Act,

by (i) any department or agency, any functions of which are transferred by this Act, or (ii) any court of competent jurisdiction, and

(2) which are in effect at the time this Act takes effect, shall continue in effect according to their terms until modified, terminated, superseded, set aside, or repealed by the Secretary, Administrators, Board, or General Counsel (in the exercise of any authority respectively vested in them by this Act), by any court of competent jurisdiction, or by operation of law.

(b) The provisions of this Act shall not affect any proceedings pending at the time this section takes effect before any department or agency (or component thereof), functions of which are transferred by this Act; but such proceedings, to the extent that they relate to functions so transferred, shall be continued before the Department. Such proceedings, to the extent they do not relate to functions so transferred, shall be continued before the department or agency before which they were pending at the time of such transfer. In either case orders shall be issued in such proceedings, appeals shall be taken therefrom, and payments shall be made pursuant to such orders, as if this Act had not been enacted; and orders issued in any such proceedings shall continue in effect until modified, terminated, superseded, or repealed by the Secretary, Administrators, Board, or General Counsel (in the exercise of any authority respectively vested in them by this Act), by a court of competent jurisdiction, or by operation of law.

(c)(1) Except as provided in paragraph (2)—

(A) the provisions of this Act shall not affect suits commenced prior to the date this section takes effect, and

(B) in all such suits proceeding shall be had, appeals taken, and judgments rendered, in the same manner and effect as if this Act had not been enacted.

No suit, action, or other proceeding commenced by or against any officer in his official capacity as an officer of any department or agency, functions of which are transferred by this Act, shall abate by reason of the enactment of this Act. No cause of action by or against any department or agency, functions of which are transferred by this Act, or by or against any officer thereof in his official capacity shall abate by reason of the enactment of this Act. Causes of actions, suits, actions, or other proceedings may be asserted by or against the United States or such official of the Department as may be appropriate and, in any litigation pending when this section takes effect, the court may at any time on its own motion or that of any party, enter an order which will give effect to the provisions of this subsection.

(2) If before the date on which this Act takes effect, any department or agency, or officer thereof in his official capacity, is a party to a suit, and under this Act—

(A) such department or agency is transferred to the Secretary, or

(B) any function of such department, agency, or officer is transferred to the Secretary,

then such suit shall be continued by the Secretary (except in the case of a suit not involving functions transferred to the Secretary, in which case the suit shall be continued by the department, agency, or officer which was a party to the suit prior to the effective date of this Act).

(d) With respect to any function, power, or duty transferred by this Act and exercised after the effective date of this Act, reference in any other Federal law to any department or agency, officer or office so transferred or functions of which are so transferred shall be deemed to mean the officer or agency in which this Act vests such function after such transfer.

SEPARABILITY

Sec. 14. *[49 U.S.C. §1659]* If any provision of this Act or the application thereof to any person or circumstances is held invalid, the remainder of this Act, and the application of such provision to other persons or circumstances shall not be affected thereby.

CODIFICATION

Sec. 15. *[49 U.S.C. §1651 note]* The Secretary is directed to submit to the Congress within two years from the effective date of this Act, a proposed codification of all laws that contain the powers, duties, and functions transferred to or vested in the Secretary or the Department by this Act.

EFFECTIVE DATE; INITIAL APPOINTMENT OF OFFICERS

Sec. 16. *[49 U.S.C. §1651 note]* (a) This Act shall take effect ninety days after the Secretary first takes office, or on such prior date after enactment of this Act as the President shall prescribe and publish in the Federal Register.

(b) Any of the officers provided for in this Act may (notwithstanding subsection (a)) be appointed in the manner provided for in this Act, at any time after the date of enactment of this Act. Such officers shall be compensated from the date they first take office, at the rates provided for in this Act. Such compensation and related expenses of their offices shall be paid from funds available for the functions to be transferred to the Department pursuant to this Act. (The act of Oct. 15, 1966, 80 Stat. 931, as amended by the acts of Sept. 11, 1967, 81 Stat. 224; Aug. 23, 1968, 82 Stat. 824; Aug. 22, 1972, 86 Stat. 617; Oct. 28, 1974, 88 Stat. 1526; Jan. 3, 1975, 88 Stat. 2156; May 26, 1975, 89 Stat. 90; Feb. 5, 1976, 90 Stat. 31; July 8, 1976, 90 Stat. 821)

RULES OF CONSTRUCTION

Title 1 Chapter 1

Section 1-5.—[Unchanged. See vol. 15, p. 12309, vol. 16, p. 12961.]

ADMINISTRATIVE PROCEDURE ACT

[5 USC §§551-559 and *§§701-706]*

CHAPTER 5—ADMINISTRATIVE PROCEDURE

SUBCHAPTER II—ADMINISTRATIVE PROCEDURE

[See vol. 13, p. 11171; vol. 21, p. 17764]

Section 551. Definitions. [Unchanged, except that P. L. 94-409, 90 Stat. 1247, September 13, 1976, amended paragraph (12) by striking out "and"; and paragraph (13) by striking out "act" at the end and inserting in lieu thereof "act; and"; and by adding at the end thereof the following new paragraph (14): [See vol. 21, p. 17764.]

> (14) 'ex parte communication' means an oral or written communication not on the public record with respect to which reasonable prior notice to all parties is not given, but it shall not include requests for status reports on any matter or proceeding covered by this subchapter.

Section 552. *[5 U.S.C. §552].* **PUBLIC INFORMATION; AGENCY RULES; OPINIONS, ORDERS, RECORDS, AND PROCEEDINGS.** [See vol. 21, p. 17765]. [Public Law 93-502, 88 Stat. 1561, Nov. 21, 1974, amended or added the following subsections].

(a)(2): The fourth sentence beginning with "Each agency" was amended to read as follows: Each agency shall also maintain and make available for public inspection and copying current indexes providing identifying information for the public as to any matter issued, adopted, or promulgated after July 4, 1967, and required by this paragraph to be made available or published. Each agency shall promptly publish, quarterly or more frequently, and distribute (by sale or otherwise) copies of each index or supplements thereto unless it determines by order published in the Federal Register that the publication would be unnecessary and impracticable, in which case the agency shall nonetheless provide copies of such index on request at a cost not to exceed the direct cost of duplication.* * *

(a)(3): Except with respect to the records made available under paragraphs (1) and (2) of this subsection, each agency, upon request for records which (A) reasonably describes such records and (B) is made in accordance with published rules stating the time, place, fees (if any), and procedures to be followed, shall make the records promptly available to any person.

(a)(4): This paragraph has been redesignated as paragraph (5). A new paragraph (4) has been added by Public Law 93-502, Nov. 21, 1974, 88 Stat. 1561.

(a)(4): (A) In order to carry out the provisions of this section, each agency shall promulgate regulations, pursuant to notice and receipt of public comment, specifying a uniform schedule of fees applicable to all constituent units of such agency. Such fees shall be limited to reasonable standard charges for document search and duplication and provide for recovery of only the direct costs of such search and duplication. Documents shall be furnished without charge or at a reduced charge where the agency determines that waiver or reduction of the fee is in the public interest because furnishing the information can be considered as primarily benefiting the general public.

(B) On complaint, the district court of the United States in the district in which the complainant resides, or has his principal place of business, or in which the agency records are situated, or in the District of Columbia, has jurisdiction to enjoin the agency from withholding agency records and to order the production of any agency records improperly withheld from the complainant. In such a case the court shall determine the matter do novo, and may examine the contents of such agency records in camera to determine whether such records or any part thereof shall be withheld under any of the exemptions set forth in subsection (b) of this section, and the burden is on the agency to sustain its action.

(C) Notwithstanding any other provision of law, the defendant shall serve an answer or otherwise plead to any complaint made under this subsection within thirty days after service upon the defendant of the pleading in which such complaint is made, unless the court otherwise directs for good cause shown.

(D) Except as to cases the court considers of greater importance, proceedings before the district court, as authorized by this subsection, and appeals therefrom, take precedence on the docket over all cases and shall be assigned for hearing and trial or for argument at the earliest practicable date and expedited in every way.

(E) The court may assess against the United States reasonable attorney fees and other litigation costs reasonably incurred in any case under this section in which the complainant has substantially prevailed.

(F) Whenever the court orders the production of any agency records improperly withheld from the complainant and assesses against the United States reasonable attorney fees and other litigation costs, and the court additionally issues a written finding that the circumstances surrounding the withholding raise questions whether agency personnel acted arbitrarily or capriciously with respect to the withholding, the

Civil Service Commission shall promptly initiate a proceeding to determine whether disciplinary action is warranted against the officer or employee who was primarily responsible for the withholding. The Commission, after investigation and consideration of the evidence submitted, shall submit its findings and recommendations to the administrative authority of the agency concerned and shall send copies of the findings and recommendations to the officer or employee or his representative. The administrative authority shall take the corrective action that the Commission recommends.

(G) In the event of noncompliance with the order of the court, the district court may punish for contempt the responsible employee, and in the case of a uniformed service, the responsible member. (New paragraph (a)(4) was added by Public Law 93-502, November 21, 1974, 88 Stat. 1561)

(a)(6): (A) Each agency, upon any request for records made under paragraph (1), (2), or (3) of this subsection, shall—

(i) determine within ten days (excepting Saturdays, Sundays, and legal public holidays) after the receipt of any such request whether to comply with such request and shall immediately notify the person making such request of such determination and the reasons therefor, and of the right of such person to appeal to the head of the agency any adverse determination; and

(ii) make a determination with respect to any appeal within twenty days (excepting Saturdays, Sundays, and legal public holidays) after the receipt of such appeal. If on appeal the denial of the request for records is in whole or in part upheld, the agency shall notify the person making such request of the provisions for judicial review of that determination under paragraph (4) of this subsection.

(B) In unusual circumstances as specified in this subparagraph, the time limits prescribed in either clause (i) or clause (ii) of subparagraph (A) may be extended by written notice to the person making such request setting forth the reasons for such extension and the date on which a determination is expected to be dispatched. No such notice shall specify a date that would result in an extension for more than ten working days. As used in this subparagraph, 'unusual circumstances' means, but only to the extent reasonably necessary to the proper processing of the particular request—

(i) the need to search for and collect the requested records from field facilities or other establishments that are separate from the office processing the request;

(ii) the need to search for, collect, and appropriately examine a voluminous amount of separate and distinct records which are demanded in a single request; or

(iii) the need for consultation, which shall be conducted with all practicable speed, with another agency having a substantial interest in the determination of the request or among two or more components of the agency having substantial subject-matter interest therein.

(C) Any person making a request to any agency for records under paragraph (1), (2), or (3) of this subsection shall be deemed to have exhausted his administrative remedies with respect to such request if the agency fails to comply with the applicable time limit provisions of this paragraph. If the Government can show exceptional circumstances exist and that the agency is exercising due diligence in responding to the request, the court may retain jurisdiction and allow the agency additional time to complete its review of the records. Upon any determination by an agency to comply with a request for records, the records shall be made promptly available to such person making such request. Any notification of denial of any request for records under this subsection shall set forth the names and titles or positions of each person responsible for the denial of such request. (New paragraph (a)(6) was added by Public Law 93-502, November 21, 1974, 88 Stat. 1562)

(b)(1): (A) specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense or foreign policy and (B) are in fact properly classified pursuant to such Executive order. (Section 552(b)(1) was amended by Public Law 93-502, Nov. 21, 1974, 88 Stat. 1563)

(b)(3): specifically exempted from disclosure by statute (other than section 552b of this title), provided that such statute (A) requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or (B) establishes particular criteria for withholding or refers to particular types of matters to be withheld; (amended by P.L. 94-409, 90 Stat. 1247, September 13, 1976). [See vol. 21, p. 17766.]

(7) investigatory records compiled for law enforcement purposes, but only to the extent that the production of such records would (A) interfere with enforcement proceedings, (B) deprive a person of a right to a fair trial or an impartial adjudication, (C) constitute an unwarranted invasion of personal privacy, (D) disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source, (E) disclose investigative techniques and procedures, or (F) endanger the life or physical safety of law enforcement personnel; (Paragraph (b)(7) was amended by Public Law 93-502, November 21, 1974, 88 Stat. 1563)

Any reasonably segregable portion of a record shall be provided to any person requesting such record after deletion of the portions which are exempt under this subsection. (Section 552(b) was amended by adding at the end, the above, by Public Law 93-502, Nov. 21, 1974, 88 Stat. 1564).

(d) and (e): (d) On or before March 1 of each calendar year, each agency shall submit a report covering the preceding calendar year to the Speaker of the House of Representatives and President of the Senate for referral to the appropriate committees of the Congress. The report shall include—

(1) the number of determinations made by such agency not to comply with requests for records made to such agency under subsection (a) and the reasons for each such determination;

(2) the number of appeals made by persons under subsection (a)(6), the result of such appeals, and the reason for the action upon each appeal that results in a denial of information;

(3) the names and titles or positions of each person responsible for the denial of records requested under this section, and the number of instances of participation for each;

(4) the results of each proceeding conducted pursuant to subsection (a)(4)(F), including a report of the disciplinary action taken against the officer or employee who was primarily responsible for improperly withholding records or an explanation of why disciplinary action was not taken;

(5) a copy of every rule made by such agency regarding this section;

(6) a copy of the fee schedule and the total amount of fees collected by the agency for making records available under this section; and

(7) such other information as indicates efforts to administer fully this section.

The Attorney General shall submit an annual report on or before March 1 of each calendar year which shall include for the prior calendar year a listing of the number of cases arising under this section, the exemption involved in each case, the disposition of such case, and the cost, fees, and penalties assessed under subsections (a)(4)(E), (F), and (G). Such report shall also include a description of the efforts undertaken by the Department of Justice to encourage agency compliance with this section.

(e) For purposes of this section, the term 'agency' as defined in section 551(1) of this title includes any executive department, military department, Government corporation, Government controlled corporation, or other establishment in the executive branch of the Government (including the Executive Office of the President), or any independent regulatory agency. (Paragraph (d) and (e) were added by Public Law 93-502, November 21, 1974, 88 Stat. 1564)

Section 552a. Records maintained on individuals

(a) DEFINITIONS.—For purposes of this section—

(1) the term 'agency' means agency as defined in section 552(e) of this title;

(2) the term 'individual' means a citizen of the United States or an alien lawfully admitted for permament residence;

(3) the term 'maintain' includes maintain, collect, use, or disseminate;

(4) the term 'record' means any item, collection, or grouping of information about an individual that is maintained by an agency, including, but not limited to, his education, financial transactions, medical history, and criminal or employment history and that contains his name, or the identifying number, symbol, or other identifying particular assigned to the individual, such as a finger or voice print or a photograph;

(5) the term 'system of records' means a group of any records under the control of any agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual;

(6) the term 'statistical record' means a record in a system of records maintained for statistical research or reporting purposes only and not used in whole or in part in making any determination about an identifiable individual, except as provided by section 8 of title 13; and

(7) the term 'routine use' means, with respect to the disclosure of a record, the use of such record for a purpose which is compatible with the purpose for which it was collected.

(b) CONDITIONS OF DISCLOSURE.—No agency shall disclose any record which is contained in a system of records by any means of communication to any person, or to another agency, except pursuant to a written request by, or with the prior written consent of, the individual to whom the record pertains, unless disclosure of the record would be—

(1) to those officers and employees of the agency which maintains the record who have a need for the record in the performance of their duties;

(2) required under section 552 of this title;

(3) for a routine use as defined in subsection (a)(7) of this section and described under subsection (e)(4)(D) of this section;

(4) to the Bureau of the Census for purposes of planning or carrying out a census or survey or related activity pursuant to the provisions of title 13;

(5) to a recipient who has provided the agency with advance adequate written assurance that the record will be used solely as a statistical research or reporting record, and the record is to be transferred in a form that is not individually identifiable;

(6) to the National Archives of the United States as a record which has sufficient historical or other value to warrant its continued preservation by the United States Government, or for evaluation by the Admin-

istrator of General Services or his designee to determine whether the record has such value;

(7) to another agency or to an instrumentality of any governmental jurisdiction within or under the control of the United States for a civil or criminal law enforcement activity if the activity is authorized by law, and if the head of the agency or instrumentality has made a written request to the agency which maintains the record specifying the particular portion desired and the law enforcement activity for which the record is sought;

(8) to a person pursuant to a showing of compelling circumstances affecting the health or safety of an individual if upon such disclosure notification is transmitted to the last known address of such individual;

(9) to either House of Congress, or, to the extent of matter within its jurisdiction, any committee or subcommittee thereof, any joint committee of Congress or subcommittee of any such joint committee;

(10) to the Comptroller General, or any of his authorized representatives, in the course of the performance of the duties of the General Accounting Office; or

(11) pursuant to the order of a court of competent jurisdiction.

(c) ACCOUNTING OF CERTAIN DISCLOSURES.—Each agency, with respect to each system of records under its control, shall—

(1) except for disclosures made under subsections (b)(1) or (b)(2) of this section, keep an accurate accounting of—

(A) the date, nature, and purpose of each disclosure of a record to any person or to another agency made under subsection (b) of this section; and

(B) the name and address of the person or agency to whom the disclosure is made;

(2) retain the accounting made under paragraph (1) of this subsection for at least five years or the life of the record, whichever is longer, after the disclosure for which the accounting is made;

(3) except for disclosures made under subsection (b)(7) of this section, make the accounting made under paragraph (1) of this subsection available to the individual named in the record at his request; and

(4) inform any person or other agency about any correction or notation of dispute made by the agency in accordance with subsection (d) of this section of any record that has been disclosed to the person or agency if an accounting of the disclosure was made.

(d) ACCESS TO RECORDS.—Each agency that maintains a system of records shall—

(1) upon request by any individual to gain access to his record or to any information pertaining to him which is contained in the system, permit him and upon his request, a person of his own choosing to accompany him, to review the record and have a copy made of all or any portion thereof in a form comprehensible to him, except that the agen-

cy may require the individual to furnish a written statement authorizing discussion of that individual's record in the accompanying person's presence;

(2) permit the individual to request amendment of a record pertaining to him and—

(A) not later than 10 days (excluding Saturdays, Sundays, and legal public holidays) after the date of receipt of such request, acknowledge in writing such receipt; and

(B) promptly, either—

(i) make any correction of any portion thereof which the individual believes is not accurate, relevant, timely, or complete; or

(ii) inform the individual of its refusal to amend the record in accordance with his request, the reason for the refusal, the procedures established by the agency for the individual to request a review of that refusal by the head of the agency or an officer designated by the head of the agency, and the name and business address of that official;

(3) permit the individual who disagrees with the refusal of the agency to amend his record to request a review of such refusal, and not later than 30 days (excluding Saturdays, Sundays, and legal public holidays) from the date on which the individual requests such review, complete such review and make a final determination unless, for good cause shown, the head of the agency extends such 30-day period; and if, after his review, the reviewing official also refuses to amend the record in accordance with the request, permit the individual to file with the agency a concise statement setting forth the reasons for his disagreement with the refusal of the agency, and notify the individual of the provisions for judicial review of the reviewing official's determination under subsection (g)(1)(A) of this section;

(4) in any disclosure, containing information about which the individual has filed a statement of disagreement, occurring after the filing of the statement under paragraph (3) of this subsection, clearly note any portion of the record which is disputed and provide copies of the statement and, if the agency deems it appropriate, copies of a concise statement of the reasons of the agency for not making the amendments requested, to persons or other agencies to whom the disputed record has been disclosed; and

(5) nothing in this section shall allow an individual access to any information compiled in reasonable anticipation of a civil action or proceeding.

(e) AGENCY REQUIREMENTS.—Each agency that maintains a system of records shall—

(1) maintain in its records only such information about an individual as is relevant and necessary to accomplish a purpose of the agency

required to be accomplished by statute or by executive order of the President;

(2) collect information to the greatest extent practicable directly from the subject individual when the information may result in adverse determinations about an individual's rights, benefits, and privileges under Federal programs;

(3) inform each individual whom it asks to supply information, on the form which it uses to collect the information or on a separate form that can be retained by the individual—

(A) the authority (whether granted by statute, or by executive order of the President) which authorizes the solicitation of the information and whether disclosure of such information is mandatory or voluntary;

(B) the principal purpose or purposes for which the information is intended to be used;

(C) the routine uses which may be made of the information, as published pursuant to paragraph (4)(D) of this subsection; and

(D) the effects on him, if any, of not providing all or any part of the requested information;

(4) subject to the provisions of paragraph (11) of this subsection, publish in the Federal Register at least annually a notice of the existence and character of the system of records, which notice shall include—

(A) the name and location of the system;

(B) the categories of individuals on whom records are maintained in the system;

(C) the categories of records maintained in the system;

(D) each routine use of the records contained in the system, including the categories of users and the purpose of such use;

(E) the policies and practices of the agency regarding storage, retrievability, access controls, retention, and disposal of the records;

(F) the title and business address of the agency official who is responsible for the system of records;

(G) the agency procedures whereby an individual can be notified at his request if the system of records contains a record pertaining to him;

(H) the agency procedures whereby an individual can be notified at his request how he can gain access to any record pertaining to him contained in the system of records, and how he can contest its content; and

(I) the categories of sources of records in the system;

(5) maintain all records which are used by the agency in making any determination about any individual with such accuracy, relevance, timeliness, and completeness as is reasonably necessary to assure fairness to the individual in the determination;

(6) prior to disseminating any record about an individual to any person other than an agency, unless the dissemination is made pursuant to subsection (b)(2) of this section, make reasonable efforts to assure that such records are accurate, complete, timely, and relevant for agency purposes;

(7) maintain no record describing how any individual exercises rights guaranteed by the First Amendment unless expressly authorized by statute or by the individual about whom the record is maintained or unless pertinent to and within the scope of an authorized law enforcement activity;

(8) make reasonable efforts to serve notice on an individual when any record on such individual is made available to any person under compulsory legal process when such process becomes a matter of public record;

(9) establish rules of conduct for persons involved in the design, development, operation, or maintenance of any system of records, or in maintaining any record, and instruct each such person with respect to such rules and the requirements of this section, including any other rules and procedures adopted pursuant to this section and the penalties for noncompliance;

(10) establish appropriate administrative, technical, and physical safeguards to insure the security and confidentiality of records and to protect against any anticipated threats or hazards to their security or integrity which could result in substantial harm, embarrassment, inconvenience, or unfairness to any individual on whom information is maintained; and

(11) at least 30 days prior to publication of information under paragraph (4)(D) of this subsection, publish in the Federal Register notice of any new use or intended use of the information in the system, and provide an opportunity for interested persons to submit written data, views, or arguments to the agency.

(f) AGENCY RULES.—In order to carry out the provisions of this section, each agency that maintains a system of records shall promulgate rules, in accordance with the requirements (including general notice) of section 553 of this title, which shall—

(1) establish procedures whereby an individual can be notified in response to his request if any system of records named by the individual contains a record pertaining to him;

(2) define reasonable times, places, and requirements for identifying an individual who requests his record or information pertaining to him before the agency shall make the record or information available to the individual;

(3) establish procedures for the disclosure to an individual upon his request of his record or information pertaining to him, including special

procedure, if deemed necessary, for the disclosure to an individual of medical records, including psychological records, pertaining to him;

(4) establish procedures for reviewing a request from an individual concerning the amendment of any record or information pertaining to the individual, for making a determination on the request, for an appeal within the agency of an initial adverse agency determination, and for whatever additional means may be necessary for each individual to be able to exercise fully his rights under this section; and

(5) establish fees to be charged, if any, to any individual for making copies of his record, excluding the cost of any search for and review of the record.

The Office of the Federal Register shall annually compile and publish the rules promulgated under this subsection and agency notices published under subsection (e)(4) of this section in a form available to the public at low cost.

(g)(1) CIVIL REMEDIES.—Whenever any agency

(A) makes a determination under subsection (d)(3) of this section not to amend an individual's record in accordance with his request, or fails to make such review in conformity with that subsection:

(B) refuses to comply with an individual request under subsection (d)(1) of this section;

(C) fails to maintain any record concerning any individual with such accuracy, relevance, timeliness, and completeness as is necessary to assure fairness in any determination relating to the qualifications, character, rights, or opportunities of, or benefits to the individual that may be made on the basis of such record, and consequently a determination is made which is adverse to the individual; or

(D) fails to comply with any other provision of this section, or any rule promulgated thereunder, in such a way as to have an adverse effect on an individual,

the individual may bring a civil action against the agency, and the district courts of the United States shall have jurisdiction in the matters under the provisions of this subsection.

(2)(A) In any suit brought under the provisions of subsection (g)(1)(A) of this section, the court may order the agency to amend the individual's record in accordance with his request or in such other way as the court may direct. In such a case the court shall determine the matter de novo.

(B) The court may assess against the United States reasonable attorney fees and other litigation costs reasonably incurred in any case under this paragraph in which the complainant has substantially prevailed.

(3)(A) In any suit brought under the provisions of subsection (g)(1)(B) of this section, the court may enjoin the agency from withholding the records and order the production to the complainant of any agency records improperly withheld from him. In such a case the court shall determine the matter de novo, and may examine the contents of any agency records in camera to determine whether the records or any portion thereof may be withheld under any of the exemptions set forth in subsection (k) of this section, and the burden is on the agency to sustain its action.

(B) The court may assess against the United States reasonable attorney fees and other litigation costs reasonably incurred in any case under this paragraph in which the complainant has substantially prevailed.

(4) In any suit brought under the provisions of subsection (g)(1)(C) or (D) of this section in which the court determines that the agency acted in a manner which was intentional or willful, the United States shall be liable to the individual in an amount equal to the sum of—

(A) actual damages sustained by the individual as a result of the refusal or failure, but in no case shall a person entitled to recovery receive less than the sum of $1,000; and

(B) the costs of the action together with reasonable attorney fees as determined by the court.

(5) An action to enforce any liability created under this section may be brought in the district court of the United States in the district in which the complainant resides, or has his principal place of business, or in which the agency records are situated, or in the District of Columbia, without regard to the amount in controversy, within two years from the date on which the cause of action arises, except that where an agency has materially and willfully misrepresented any information required under this section to be disclosed to an individual and the information so misrepresented is material to establishment of the liability of the agency to the individual under this section, the action may be brought at any time within two years after discovery by the individual of the misrepresentation. Nothing in this section shall be construed to authorize any civil action by reason of any injury sustained as the result of a disclosure of a record prior to September 27, 1975.

(h) RIGHTS OF LEGAL GUARDIANS.—For the purposes of this section, the parent of any minor, or the legal guardian of any individual who has been declared to be incompetent due to physical or mental incapacity or age by a court of competent jurisdiction, may act on behalf of the individual.

(i)(1) CRIMINAL PENALTIES.—Any officer or employee of an agency, who by virtue of his employment or official position, has possession of, or access to, agency records which contain individually identifiable information the disclosure of which is prohibited by this section or by rules or regulations established thereunder, and who knowing that disclosure of the specific material is so prohibited, willfully discloses the material in any manner to any person or agency not entitled to receive it, shall be guilty of a misdemeanor and fined not more than $5,000.

(2) Any officer or employee of any agency who willfully maintains a system of records without meeting the notice requirements ofsubsection (e)(4) of this section shall be guilty of a misdemeanor and fined not more than $5,000.

(3) Any person who knowingly and willfully requests or obtains any record concerning an individual from an agency under false pretenses shall be guilty of a misdemeanor and fined not more than $5,000.

(j) GENERAL EXEMPTIONS.—The head of any agency may promulgate rules, in accordance with the requirements (including general notice) of sections 553(b)(1), (2), and (3), (c), and (e) of this title, to exempt any system of records within the agency from any part of this section except subsections (b), (c)(1) and (2), (e)(4)(A) through (F), (e)(6), (7), (9), (10), and (11), and if the system of records is—

(1) maintained by the Central Intelligence Agency; or

(2) maintained by an agency or component thereof which performs as its principal function any activity pertaining to the enforcement of criminal laws, including police efforts to prevent, control, or reduce crime or to apprehend criminals, and the activities of prosecutors, courts, correctional, probation, pardon, or parole authorities and which consists of (A) information compiled for the purpose of identifying individual criminal offenders and alleged offenders and consisting only of identifying data and notations of arrests, the nature and disposition of criminal charges, sentencing, confinement, release, and parole and probation status; (B) information compiled for the purpose of a criminal investigation, including reports of informants and investigators, and associated with an identifiable individual; or (C) reports identifiable to an individual compiled at any stage of the process of enforcement of the criminal laws from arrest or indictment through release from supervision.

At the time rules are adopted under this subsection, the agency shall include in the statement required under section 553(c) of this title, the reasons why the system of records is to be exempted from a provision of this section.

(k) SPECIFIC EXEMPTIONS.—The head of any agency may promulgate rules, in accordance with the requirements (including general notice) of sections 553(b)(1), (2), and (3), (c), and (e) of this title, to exempt any system of records within the agency from subsections (c)(3), (d), (e)(1), (e)(4) (G), (H), and (I) and (f) of this section if the system of records is—

(1) subject to the provisions of section 552(b)(1) of this title;

(2) investigatory material compiled for law enforcement purposes, other than material within the scope of subsection (j)(2) of this section: *Provided, however,* That if any individual is denied any right, privilege, or benefit that he would otherwise be entitled by Federal law, or for which he would otherwise be eligible, as a result of the maintenance of

such material, such material shall be provided to such individual, except to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to the effective date of this section, under an implied promise that the identify of the source would be held in confidence:

(3) maintained in connection with providing protective services to the President of the United States or other individuals pursuant to section 3056 of title 18;

(4) required by statute to be maintained and used solely as statistical records;

(5) investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, Federal contracts, or access to classified information, but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence;

(6) testing or examination material used solely to determine individual qualifications for appointment or promotion in the Federal service the disclosure of which would compromise the objectivity or fairness of the testing or examination process; or

(7) evaluation material used to determine potential for promotion in the armed services, but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence.

At the time rules are adopted under this subsection, the agency shall include in the statement required under section 553(c) of this title, the reasons why the system of records is to be exempted from a provision of this section.

(l)(1) ARCHIVAL RECORDS.—Each agency record which is accepted by the Administrator of General Services for storage, processing, and servicing in accordance with section 3103 of title 44 shall, for the purposes of this section, be considered to be maintained by the agency which deposited the record and shall be subject to the provisions of this section. The Administrator of General Services shall not disclose the record except to the agency which maintains the record, or under rules established by that agency which are not inconsistent with the provisions of this section.

(2) Each agency record pertaining to an identifiable individual which was transferred to the National Archives of the United States as a record which has sufficient historical or other value to warrant its continued preservation by the United States Government, prior to the effective date of this section, shall, for the purposes of this section, be considered to be maintained by the National Archives and shall not be subject to the provisions of this section, except that a statement generally describing such records (modeled after the requirements relating to records subject to subsections (e)(4)(A) through (G) of this section) shall be published in the Federal Register.

(3) Each agency record pertaining to an identifiable individual which is transferred to the National Archives of the United States as a record which has sufficient historical or other value to warrant its continued preservation by the United States Government, on or after the effective date of this section, shall, for the purposes of this section, be considered to be maintained by the National Archives and shall be exempt from the requirements of this section except subsections (e)(4)(A) through (G) and (e)(9) of this section.

(m) GOVERNMENT CONTRACTORS.—When an agency provides by a contract for the operation by or on behalf of the agency of a system of records to accomplish an agency function, the agency shall, consistent with its authority, cause the requirements of this section to be applied to such system. For purposes of subsection (i) of this section any such contractor and any employee of such contractor, if such contract is agreed to on or after the effective date of this section, shall be considered to be an employee of an agency.

(n) MAILING LISTS.—An individual's name and address may not be sold or rented by an agency unless such action is specifically authorized by law. This provision shall not be construed to require the withholding of names and addresses otherwise permitted to be made public.

(o) REPORT ON NEW SYSTEMS.—Each agency shall provide adequate advance notice to Congress and the Office of Management and Budget of any proposal to establish or alter any system of records in order to permit an evaluation of the probable or potential effect of such proposal on the privacy and other personal or property rights of individuals or the disclosure of information relating to such individuals, and its effect on the preservation of the constitutional principles of federalism and separation of powers.

(p) ANNUAL REPORT.—The President shall submit to the Speaker of the House and the President of the Senate, by June 30 of each calendar year, a consolidated report, separately listing for each Federal agency the number of records contained in any system of records which were exempted from the application of this section under the provisions of subsections (j) and (k) of this section during the preceding calendar year, and the reasons for the exemptions, and such other information as indicates efforts to administer fully this section.

(q) EFFECT OF OTHER LAWS.—No agency shall rely on any exemption contained in section 552 of this title to withhold from an individual any record which is otherwise accessible to such individual under the provisions of this section. (Sec. 552a was added to Title 5 by P.L. 93-579, 88 Stat. 1897, Dec. 31, 1974)

§552b. Open meetings

(a) For purposes of this section—

(1) the term 'agency' means any agency, as defined in section 552(e) of this title, headed by a collegial body composed of two or more individual members, a majority of whom are appointed to such position by the President with the advice and consent of the Senate, and any subdivision thereof authorized to act on behalf of the agency;

(2) the term 'meeting' means the deliberations of at least the number of individual agency members required to take action on behalf of the agency where such deliberations determine or result in the joint conduct or disposition of official agency business, but does not include deliberations required or permitted by subsection (d) or (e); and

(3) the term 'member' means an individual who belongs to a collegial body heading an agency.

(b) Members shall not jointly conduct or dispose of agency business other than in accordance with this section. Except as provided in subsection (c), every portion of every meeting of an agency shall be open to public observation.

(c) Except in a case where the agency finds that the public interest requires otherwise, the second sentence of subsection (b) shall not apply to any portion of an agency meeting, and the requirements of subsections (d) and (e) shall not apply to any information pertaining to such meeting otherwise required by this section to be disclosed to the public, where the agency properly determines that such portion or portions of its meeting or the disclosure of such information is likely to—

(1) disclose matters that are (A) specifically authorized under criteria established by an Executive order to be kept secret in the interests of national defense or foreign policy and (B) in fact properly classified pursuant to such Executive order;

(2) relate solely to the internal personnel rules and practices of an agency;

(3) disclose matters specifically exempted from disclosure by statute (other than section 552 of this title), provided that such statute (A) requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or (B) establishes particular criteria for withholding or refers to particular types of matters to be withheld;

(4) disclose trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(5) involve accusing any person of a crime, or formally censuring any person:

(6) disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy;

(7) disclose investigatory records compiled for law, enforcement purposes, or information which if written would be contained in such records, but only to the extent that the production of such records or information would (A) interfere with enforcement proceedings, (B) deprive a person of a right to a fair trial or an impartial adjudication, (C) constitute an unwarranted invasion of personal privacy, (D) disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source, (E) disclose investigative techniques and procedures, or (F) endanger the life or physical safety of law enforcement personnel;

(8) disclose information contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions;

(9) disclose information the premature disclosure of which would—

(A) in the case of an agency which regulates currencies, securities, commodities, or financial institutions, be likely to (i) lead to significant financial speculation in currencies, securities, or commodities, or (ii) significantly endanger the stability of any financial institution; or

(B) in the case of any agency, be likely to significantly frustrate implementation of a proposed agency action,

except that subparagraph (B) shall not apply in any instance where the agency has already disclosed to the public the content or nature of its proposed action, or where the agency is required by law to make such disclosure on its own initiative prior to taking final agency action on such proposal; or

(10) specifically concern the agency's issuance of a subpena, or the agency's participation in a civil action or proceeding, an action in a foreign court or international tribunal, or an arbitration, or the initiation, conduct, or disposition by the agency of a particular case of formal agency adjudication pursuant to the procedures in section 554 of this title or otherwise involving a determination on the record after opportunity for a hearing.

(d)(1) Action under subsection (c) shall be taken only when a majority of the entire membership of the agency (as defined in subsection (a)(1)) votes to take such action. A separate vote of the agency members shall be taken with respect to each agency meeting a portion or portions of which are proposed to be closed to the public pursuant to subsection (c), or with respect to any information which is proposed to be withheld under subsection (c). A single vote may be taken with respect to a series of meetings, a portion or portions of which are proposed to be closed to the public, or with respect to any information concerning such series of meetings, so long as each meeting in such series involves the same particular matters and is scheduled to be held no more than thirty days after the initial meeting in such series. The vote of each agency member participating in such vote shall be recorded and no proxies shall be allowed.

(2) Whenever any person whose interests may be directly affected by a portion of a meeting requests that the agency close such portion to the public for any of the reasons referred to in paragraph (5), (6), or (7) of subsection (c), the agency, upon request of any one of its members, shall vote by recorded vote whether to close such meeting.

(3) Within one day of any vote taken pursuant to paragraph (1) or (2), the agency shall make publicly available a written copy of such vote reflecting the vote of each member on the question. If a portion of a meeting is to be closed to the public, the agency shall, within one day of the vote taken pursuant to paragraph (1) or (2) of this subsection, make publicly available a full written explanation of its action closing the portion together with a list of all persons expected to attend the meeting and their affiliation.

(4) Any agency, a majority of whose meetings may properly be closed to the public pursuant to paragraph (4), (8), (9)(A), or (10) of subsection (c), or any combination thereof, may provide by regulation for the closing of such meetings or portions thereof in the event that a majority of the members of the agency votes by recorded vote at the beginning of such meeting, or portion thereof, to close the exempt portion or portions of the meeting, and a copy of such vote, reflecting the vote of each member on the question, is made available to the public. The provisions of paragraphs (1), (2), and (3) of this subsection and subsection (e) shall not apply to any portion of a meeting to which such regulations apply: *Provided,* That the agency shall, except to the extent that such information is exempt from disclosure under the provisions of subsection (c), provide the public with public announcement of the time, place, and subject matter of the meeting and of each portion thereof at the earliest practicable time.

(e)(1) In the case of each meeting, the agency shall make public announcement, at least one week before the meeting, of the time, place, and subject matter of the meeting, whether it is to be open or closed to the public, and the name and phone number of the official designated by the agency to respond to requests for information about the meeting. Such announcement shall be made unless a majority of the members of the agency determines by a recorded vote that agency business requires that such meeting be called at an earlier date, in which case the agency shall make public announcement of the time, place, and subject matter of such meeting, and whether open or closed to the public, at the earliest practicable time.

(2) The time or place of a meeting may be changed following the public announcement required by paragraph (1) only if the agency publicly announces such change at the earliest practicable time. The subject matter of a meeting, or the determination of the agency to open or close a meeting, or portion of a meeting, to the public, may be changed following the public announcement required by this subsection only if (A) a majority of the entire membership of the agency determines by a recorded vote that agency business so requires and that no earlier announcement of the change was possible, and (B) the agency publicly announces such change and the vote of each member upon such change at the earliest practicable time.

(3) Immediately following each public announcement required by this subsection, notice of the time, place, and subject matter of a meeting, whether the meeting is open or closed, any change in one of the preceding, and the name and phone number of the official designated by the agency to respond to requests for information about the meeting, shall also be submitted for publication in the Federal Register.

(f)(1) For every meeting closed pursuant to paragraphs (1) through (10) of subsection (c), the General Counsel or chief legal officer of the agency shall publicly certify that, in his or her opinion, the meeting may be closed to the public and shall state each relevant exemptive provision. A copy of such certification, together with a statement from the presiding officer of the meeting setting forth the time and place of the meeting, and the persons present, shall be retained by the agency. The agency shall maintain a complete transcript or electronic recording adequate to record fully the proceedings of each meeting, or portion of a meeting, closed to the public, except that in the case of a meeting, or portion of a meeting, closed to the public pursuant to paragraph (8), (9)(A), or (10) of subsection (c), the agency shall maintain either such a transcript or recording, or a set of minutes. Such minutes shall fully and clearly describe all matters discussed and shall provide a full and accurate summary of any actions taken, and the reasons therefor, including a description of each of the views expressed on any item and the record of any rollcall vote (reflecting the vote of each member on the question). All documents considered in connection with any action shall be identified in such minutes.

(2) The agency shall make promptly available to the public, in a place easily accessible to the public, the transcript, electronic recording, or minutes (as required by paragraph (1)) of the discussion of any item on the agenda, or of any item of the testimony of any witness received at the meeting, except for such item or items of such discussion, or testi-

mony as the agency determines to contain information which may be withheld under subsection (c). Copies of such transcript, or minutes, or a transcription of such recording disclosing the identity of each speaker, shall be furnished to any person at the actual cost of duplication or transcription. The agency shall maintain a complete verbatim copy of the transcript, a complete copy of the minutes, or a complete electronic recording of each meeting, or portion of a meeting, closed to the public, for a period of at least two years after such meeting, or until one year after the conclusion of any agency proceeding with respect to which the meeting or portion was held, whichever occurs later.

(g) Each agency subject to the requirements of this section shall, within 180 days after the date of enactment of this section, following consultation with the Office of the Chairman of the Administrative Conference of the United States and published notice in the Federal Register of at least thirty days and opportunity for written comment by any person, promulgate regulations to implement the requirements of subsections (b) through (f) of this section. Any person may bring a proceeding in the United States District Court for the District of Columbia to require an agency to promulgate such regulations if such agency has not promulgated such regulations within the time period specified herein. Subject to any limitations of time provided by law, any person may bring a proceeding in the United States Court of Appeals for the District of Columbia to set aside agency regulations issued pursuant to this subsection that are not in accord with the requirements of subsections (b) through (f) of this section and to require the promulgation of regulations that are in accord with such subsections.

(h)(1) The district courts of the United States shall have jurisdiction to enforce the requirements of subsections (b) through (f) of this section by declaratory judgment, injunctive relief, or other relief as may be appropriate. Such actions may be brought by any person against an agency prior to, or within sixty days after, the meeting out of which the violation of this section arises, except that if public announcement of such meeting is not initially provided by the agency in accordance with the requirements of this section, such action may be instituted pursuant to this section at any time prior to sixty days after any public announcement of such meeting. Such actions may be brought in the district court of the United States for the district in which the agency meeting is held or in which the agency in question has its headquarters, or in the District Court for the District of Columbia. In such actions a defendant shall serve his answer within thirty days after the service of the complaint. The burden is on the defendant to sustain his action. In deciding such cases the court may examine in camera any portion of the transcript, electronic recording, or minutes of a meeting closed to the public, and may take such additional evidence as it deems necessary. The court, having due regard for orderly administration and the public interest, as well as the interests of the parties, may grant such equitable relief as it deems appropriate, including granting an injunction against future violations of this section or ordering the agency to make available to the public such portion of the transcript, recording, or minutes of a meeting as is not authorized to be withheld under subsection (c) of this section.

(2) Any Federal court otherwise authorized by law to review agency action may, at the application of any person properly participating in the proceeding pursuant to other applicable law, inquire into violations by the agency of the requirements of this section and afford such relief as it deems appropriate. Nothing in this section authorizes any Federal court having jurisdiction solely on the basis of paragraph (1) to set aside, enjoin, or invalidate any agency action (other than an action to close a meeting or to withhold information under this section) taken or discussed at any agency meeting out of which the violation of this section arose.

(i) The court may assess against any party reasonable attorney fees and other litigation costs reasonably incurred by any other party who substantially prevails in any action brought in accordance with the provisions of subsection (g) or (h) of this section, except that costs may be assessed against the plaintiff only where the court finds that the suit was initiated by the plaintiff primarily for frivolous or dilatory purposes. In the case of assessment of costs against an agency, the costs may be assessed by the court against the United States.

(j) Each agency subject to the requirements of this section shall annually report to Congress regarding its compliance with such requirements, including a tabulation of the total number of agency meetings open to the public, the total number of meetings closed to the public, the reasons for closing such meetings, and a description of any litigation brought against the agency under this section, including any costs assessed against the agency in such litigation (whether or not paid by the agency).

(k) Nothing herein expands or limits the present rights of any person under section 552 of this title, except that the exemptions set forth in subsection (c) of this section shall govern in the case of any request made pursuant to section 552 to copy or inspect the transcripts, recordings, or minutes described in subsection (f) of this section. The requirements of chapter 33 of title 44, United States Code, shall not apply to the transcripts, recordings, and minutes described in subsection (f) of this section.

(l) This section does not constitute authority to withhold any information from Congress, and does not authorize the closing of any agency meeting or portion thereof required by any other provision of law to be open.

(m) Nothing in this section authorizes any agency to withhold from any individual any record, including transcripts, recordings, or minutes required by this section, which is otherwise accessible to such individual under section 552a of this title. (Section 552b was added by Pub. L. 94-409, Sept. 13, 1976, 90 Stat. 1241.)

SECTION 556. HEARINGS: PRESIDING EMPLOYEES: POWERS AND DUTIES: BURDEN OF PROOF: EVIDENCE: RECORD BASIS OF DECISION. [Unchanged, except that P.L. 94-409, 90 Stat. 1247, was amended by inserting between the third and fourth sentences thereof the following new sentence in paragraph (d): [See vol. 21, p. 17771.]

The agency may, to the extent consistent with the interests of justice and the policy of the underlying statutes administered by the agency, consider a violation of section 557(d) of this title sufficient grounds for a decision adverse to a party who has knowingly committed such violation or knowingly caused such violation to occur.

SECTION 557. INITIAL DECISIONS: CONCLUSIVENESS: REVIEW BY AGENCY: SUBMISSIONS BY PARTIES: CONTENTS OF DECISIONS: RECORD. [Unchanged, except paragraph (d) as follows was added by P.L. 94-209, 90 Stat. 1246, September 13, 1976.] [See vol. 21, p. 17773.]

(d)(1) In any agency proceeding which is subject to subsection (a) of this section, except to the extent required for the disposition of ex parte matters as authorized by law—

(A) no interested person outside the agency shall make or knowingly cause to be made to any member of the body comprising the agency, administrative law judge, or other employee who is or may reasonably be expected to be involved in the decisional process of the proceeding, an ex parte communication relevant to the merits of the proceeding;

(B) no member of the body comprising the agency, administrative law judge, or other employee who is or may reasonably be expected to be involved in the decisional process of the proceeding, shall make or knowingly cause to be made to any interested person outside the agency an ex parte communication relevant to the merits of the proceeding;

(C) a member of the body comprising the agency, administrative law judge, or other employee who is or may reasonably be expected to be involved in the decisional process of such proceeding who receives, or who makes or knowingly causes to be made, a communication prohibited by this subsection shall place on the public record of the proceeding:

(i) all such written communications;

(ii) memoranda stating the substance of all such oral communications; and

(iii) all written responses, and memoranda stating the substance of all oral responses, to the materials described in clauses (i) and (ii) of this subparagraph;

(D) upon receipt of a communication knowingly made or knowingly caused to be made by a party in violation of this subsection, the agency, administrative law judge, or other employee presiding at the hearing may, to the extent consistent with the interests of justice and the policy of the underlying statutes, require the party to show cause why his claim or interest in the proceeding should not be dismissed, denied, disregarded, or otherwise adversely affected on account of such violation-and

(E) the prohibitions of this subsection shall apply beginning at such time as the agency may designate, but in no case shall they begin to apply later than the time at which a proceeding is noticed for hearing unless the person responsible for the communication has knowledge that it will be noticed, in which case the prohibitions shall apply beginning at the time of his acquisition of such knowledge.

(2) This subsection does not constitute authority to withhold information from Congress.

Historical note, vol. 21, p. 17777.

Notes of Decisions

Volume 14—p. 11691; Volume 15—p. 12310; Volume 16—p. 12962; Volume 17—p. 13672; Volume 18—p. 14706; Volume 19—p. 15986; Volume 21—p. 17777.

Burden of Proof

On review of Interstate Commerce Commission decision that plaintiff's heavy-hauling certificate did not authorize it to transport 500- and 750-pound bombs, there is no merit in contention that the "Dillner presumption" that class A and B explosives are outside the commodity authority of heavy haulers, as used in the agency proceeding, improperly changed the burden of proof to respondent heavy haulers in violation of the APA and of constitutional due process. Where the facts shown give rise to a presumption, usual function of the presumption is to constitute prima facie proof on issue involved and shift to the other party the burden of going forward with the evidence as to that issue. In instant case, the history, facts, and data before the Commission provided a sound basis for it, in exercising its expertise, to recognize and apply the general rule or rebuttable presumption in question and, thus, place burden on the heavy hauler to produce evidence to overcome hat presumption. The challenged presumption was not created out of thin air; nor did it shift the ultimate burden of proof in the case. Commission decision sustained.—International Transport, Inc. v. United States, 337 F. Supp. 985 (997, 1000-1, 1002)*

Declaratory Orders

Upon application for declaratory order, the Commission determined that undercharges were due to petitioner carrier but as the record contained insufficient detail concerning the nature of individual shipments no determination as to the amount of under charges outstanding could be made. The Commission therefore listed the 7 possible kinds of shipments which could be made and stated the applicable charges for each. In ascertaining such charges, consideration was given to both mixed-package rule of classification and mixed-shipment provisions of governing tariff. There is no statutory authority for any carrier to file a complaint with the Commission against any shipper. Commission therefore considered instant case as a petition for a declaratory order inasmuch as the district court, having jurisdiction over carrier's suit against shipper for undercharges held such suit in abeyance pending determination by the Commission as to the applicable charges.—Arkansas—Best Freight System, Inc. v. Quartet, 332 I.C.C. 877 (880-82).

Where a motor common carrier, possessing both intrastate and interstate authorities, routed l.t.l. shipments originating at and destined to points in the same State through another State, with no attempt to avoid any State regulations and solely for the operating convenience of the carrier whose continuing intention is that such shipment shall be intrastate in nature, the shipper is entitled to whichever is the lower of the two rates, the interstate or intrastate, or the carrier is guilty of misrouting.—Applicable Rates on Intrastate Shipments, 332 I.C.C. 887 (890-91).

Examiners

The statute does not relegate Interstate Commerce Commission to the role of a reviewing court, for it expressly confers on it the right to make its own determinations from the evidence; thus, Commission finding that plaintiff (applicant) failed to sustain its burden of proof as to need for proposed service is not inconsistent with its adoption of the examiner's findings. Commission acceptance of evidence found by the examiner as fact (as to lack of available service to Florida) in no way bound it to accept examiner's conclusions drawn from those facts that requisite "need" had been shown. While the reviewing court's particularly close inspection of evidence in the case may be warranted, there is no requirement that the commission furnish an analysis of each item of evidence before the examiner, nor disclose the mental processes through which its decision was reached. Since the Commission's findings are stated with sufficient particularity to clearly show the basis of its decision, they have fulfilled their purpose and are adequate; complaint dismissed.—Caravelle Express, Inc. v. United States, 287 F. Supp. 585 (587-8)*.

While the statute provides that agency employee who heard the evidence "shall make the recommended or initial decision required * * *," it excepts the case where "he becomes unavailable to the Agency." Thus, when the Hearing Examiner retired after close of the hearing in rail abandonment case, the Commission did not err in permitting an examiner who had not heard the evidence to make the findings and recommended decision. It being undisputed that retirement made the Hearing Examiner unavailable to the Commission, substitution of a new examiner was warranted.—Brooklyn Eastern District Terminal v. United States, 302 F. Supp. 1095 (1105)*.

The Interstate Commerce Commission may reject all or part of its Hearing Examiner's recommended opinion and order, if it does so on consistent grounds, supported by substantial evidence in the record. In instant case, it is not shown to have acted inconsistently when, after adopting the examiner's findings and affirming the recommended limited grant of authority to serve Florida, it reversed his recommendation by granting the applicant authority to serve points in Louisiana. The Commission's statements clearly show that modification of the examiner's recommendations was based on its recognition that (1) some shipments from New Orleans to other Louisiana points would be interstate in nature because of their out-of-state or foreign origin, which the record bears out, and (2) the evidence regarding Florida points was not the same; thus, plaintiffs have shown no fatal inconsistency in the record.—Superior Trucking Co. v. United States, 306 F. Supp. 872 (874, 878)*.

It is a rule of administrative procedure that the hearing officer shall make the initial or recommended decision, unless he becomes unavailable to the agency; and when examiner who conducted the oral hearing on plaintiff's motor carrier application retired before rendering a report, the hearing officer had become unavailable. Therefore, it was proper for the Commission to assign a substitute examiner to furnish an initial report. No questions of credibility were resolved by the substitute examiner—his was a report of uncontroverted fact. Moreover, it is well settled that a substitute examiner may prepare a recommendation for a Commission when the hearing officer dies or retires before preparing his report. Action to set aside Commission order denying a certificate, which was based on substitute examiner's recommendation, dismissed.—Consolidated Carriers Corp. v. United States, 321 F. Supp. 1098 (1099, 1100)*.

In motor carrier's suit to enjoin and invalidate Interstate Commerce Commission orders which subjected household goods authority granted plaintiff to a so-called

"Kingpak" restriction, fact that the Commission did not affirm hearing examiner's findings that an unrestricted certificate should be granted is not important since, under the law, the Commission and not an examiner or employee board has the duty to render a final decision based on the evidence of record. The Commission is charged with responsibility of evaluating public convenience and necessity; also, as pointed out in 275 F. Supp. 98, it is the Commission's duty and obligation to make its decisions, in the final analysis, and in so doing it is free to accept or reject the recommendations of its examiners. Relief sought by plaintiff is denied.—Towne Services Household Goods Transp. Co. v. United States, 329 F. Supp. 815 (820, 822)*.

Participation by the examiner who presided at the continued hearing in making the supplemental report and recommended order, which was prepared by the hearing examiner who received the evidence at the initial hearing and the examiner who conducted the continued hearing, did not violate the Administrative Procedure Act. Although no oral testimony was adduced at the continued hearing, "evidence" is not so limited but may also include pleadings, written stipulation, records, and other documents and exhibits; amendment to the application and telegram withdrawing a protestants' opposition, received by the examiner at the continued hearing, constitute "evidence" within the Commission's Rules of Practice and the APA. Protestant's rights were not prejudiced by the procedure followed, and provisions of APA were in no way infringed.—Skinner Motor Exp., Inc., Extension, 96 M.C.C. 135 (136-37, 140-41).

The hearing, having been adjourned "to another place to be determined by the Commission" was assigned to a different hearing examiner who presided at the reconvened hearing and wrote and submitted the report and recommended order. Objection was taken to this report and order on the basis that the second examiner did not preside at the initial hearing. Objection overruled because the second examiner was a duly qualified officer of the Commission, validly appointed, and can issue, in an initial licensing proceedings such as here, a report and recommended order which evaluates evidence received by another duly qualified officer. Section 5(c) APA allows for this if the proceeding involves an initial license or is a proceeding involving the validity or application of rates, facilities, or practices of public utilities or carriers.—Western Lines, Inc., Extension, 96 M.C.C. 657 (658-9, 664-5).

Examiner's statement of fact is substantially correct and the Commission affirms his recommended partial denial of authority on basis that existing service is "reasonably adequate." However, the Commission disagrees with examiner's recommended partial grant of authority on basis that services of two single-line heavy-hauling carriers are not required; in support of this conclusion the Commission points out that, among other things, interline service between two or even among three carriers cannot be said to be *per se* inadequate particularly where, as here, some very long hauls are involved. In addition, there is no showing of materially unsatisfactory service. Denied.—Leonard Bros. Transfer, Inc., Ext.—California-Texas, 103 M.C.C. 263 (265, 67).

Hearing

Statutory requirements for a trial-type hearing—in other words a hearing "on the record"—were applicable in Interstate Commerce Commission rulemaking proceeding which proposed rules and regulations establishing additional "incentive" per diem charges for freight cars, since the 1917 law to which Congress added the new Commission authority to include an incentive element in the compensation to be paid by railroads for the use of cars not owned by them was a statute which required a "hearing." However, the statute also provides that in rulemaking, when a party will not be prejudiced thereby, an agency may adopt procedures for submission of the evidence in written form; thus, even when rulemaking requires a hearing "on the record," record does not always have to be made in traditional manner. No prejudice to Long Island R., caused by the order prescribing incentive per diem charges for unequipped boxcars, is established; and considering all the circumstances, the Commission's denial of plaintiff's request for oral hearing did not significantly prevent it from fairly presenting its case; complaint dismissed.—Long Island R. Co. v. United States, 318 F. Supp. 490 (495-500)*.

On the other hand, facts in action by the Seaboard and the Florida East Coast, seeking to set aside the same order because the Commission did not afford them an oral hearing, show that those railroads were prejudiced by the summary procedures utilized. Assertions in plaintiffs' statements, which set forth the grounds there urged as requiring oral hearing, demonstrate the prejudice to them arising from the Commission's failure to provide hearings. The court finds in instant case, therefore, that the Commission acted illegally in denying plaintiff railroads a hearing before imposing the incentive per diem charges in issue. Accordingly, enforcement of the Commission's order as to those railroads is enjoined, annulled and set aside, without prejudice to further Commission proceedings, findings, and orders not inconsistent with the court's opinion.—Florida East Coast Ry. Co. v. United States, 322 F. Supp. 725 (728-9, 732-3)*.

Although §7(c) of APA states that "Every party shall have the right * * * to conduct such cross-examination as may be required for a full and true disclosure of the facts," that right—which entails an oral hearing—is dependent on the Commission's determination that cross-examination is necessary, and is based on substantial compliance with rule 53 of the Commission's Rules of Practice. The question of whether a sufficient showing of need for oral hearing has been made is a matter for urgency discretion, and the courts will interfere only if there has been an abuse of discretion; likewise, the right of cross-examination may be subject to reasonable administrative control.—Steel, Inc. v. Chicago, B. & Q. R. Co., 323 I.C.C. 509 (516).

The Administrative Procedure Act contains no requirements that hearings be held upon application for licenses; the statute confines itself to a prescription of the type of hearing to be held where some other statute or due process of law requires a hearing. There is no statutory provision under §208(a) of the Interstate Commerce Act which would demand a hearing in order to impose upon outstanding certificates such terms, conditions or limitations as public convenience and necessity may now require; furthermore, as to due process, the Commission is aware of no constitutional right to an oral hearing in a rulemaking proceeding. In addition, the impact of proposed restriction elimination is future in effect and generally applies to an entire class rather than to particular members of the class; hence there is no need to utilize adjudicative procedures. In this light the procedures followed more than satisfy the requirements for rulemaking established in §4 of the APA.—Removal of Truckload Lot Restrictions, 106 M.C.C. 455 (478-80)*.

Judicial Review

See also Monumental Motor Tours, Inc. v. United States case, §212(b), n. 10; Navajo Freight Lines, Inc. v. United States case, §210a, n. 1, supra; American Movers Conference v. United States case, 28 USC §2325, n. 14; T. J. Claveau Transp., Inc. v. I.C.C. case, 28 USC §2325, n. 7, infra.

Notwithstanding the Commission's broad discretion under 49 USC §5, the absence of required findings is fatal to validity of its order in motor carrier purchase proceeding regardless of whether there may be evidence of record to support proper findings. Though findings on collateral issues need not be made, reviewing courts are not required to speculate as to the basis for administrative agency's conclusions; nor may they accept counsel's *post hoc* rationalization for agency action. Thus, while a Commission decision may be upheld without explaining inconsistency thereof with prior decisions (when findings are adequate to explain the basis), if the court can uphold considered order at all it must be upon the same basis articulated therein by the Commission itself. The court recognizes the Commission's experience and its wide authority to make §5 decisions with a minimum of judicial interference but, in view of the purpose and requirements of the APA, judicial deference to Commission expertise is not boundless and expertise itself is not sufficient to sustain a decision.—Bell Lines, Inc. v. United States, 263 F. Supp. 40 (44-6)*.

Though the Commission found, in proceeding under review, that vendee had the burden of establishing that its service to certain off-route points had remained alive, or, if not, that need existed therefor, it approved proposed purchase without making a positive finding as to dormancy or a need for service at Pittsburgh, Pa., as an off-route point, and restricted vendee's service at that point to traffic to and from four southern States. Since purpose of the APA is to offer a degree of protection from unrestrained and unwarranted bureaucratic action, and since requirements thereof are fundamental to due process, the Commission's denial of competing carrier's (plaintiff) petition for reconsideration, with no affirmative findings on the questions of dormancy or need for service, was prejudicial error. Accordingly, case is remanded to the Commission with directions to make, in accordance with its own standard and the requirements of the APA, clear and precise findings and conclusions on dormancy and need for service at Pittsburgh, as an off-route point.—Id., pp. 43, 46-7.

Applicable standards of judicial review are limited in scope by settled principles of administrative law, both general and statutory, and the standards are to be vigorously enforced. In reviewing an administrative agency's decision, the court must judge its action solely on the basis invoked by the agency and, if the basis is inadequate, the court is powerless to affirm the action. Commission order prescribing new divisions of Official-Southern joint rail rates, on finding that northern lines' higher costs justified a larger share of the revenues, is not based on substantial evidence or supported by reasoned findings within meaning of §8(b) and §10(e) of the statute when, having stated that its standard for new divisions was relevant costs of handling north-south traffic involved, the Commission's use of Rail Form A territorial averages as reflecting northern lines' higher costs is not supported with findings or evidence relating such higher costs to the specific north-south traffic. Order set aside and cause remanded for further proceedings consistent with the court's opinion.—Aberdeen & R. R. Co. v. United States, 270 F. Supp. 695 (700-701, 707-10, 713)*.

The court, in action to set aside Commission order, must uphold the Commission's findings if they are neither arbitrary, capricious nor an abuse of discretion, and are not otherwise unlawful. However, propriety of Commission action must be judged solely by the grounds invoked by it, and if those grounds are inadequate or improper, the court is powerless to affirm its decision. In consolidated proceeding, involving related investigation and tariff dockets, the Commission's finding that plaintiff railroad's holding practice (in connection with c.l. shipments of potatoes from California to Kansas City, Mo., routed over its internal circuitous routes by shippers seeking increased transit time and a more favorable market) constituted a service of delay not provided for in the tariff, rests on a reasonable basis and is not legally erroneous; therefore, the court may not disturb it. Order in the investigation proceeding is affirmed and, as to that order, complaint dismissed.—Atchison, T. & S.F. Ry. Co. v. United States, 282 F. Supp. 430 (431, 433-4, 437)*.

However, in the tariff proceeding, the Commission's ruling that railroad's two proposed tariff rules (one making through rates applicable over its internal circuitous routes and the other authorizing, under its diversion and reconsignment tariff, holding schedules commensurate with those routes) were not shown to be just and reasonable, is not supported by the record; the Commission report does not reflect that consideration was given to any competitive disadvantage of plaintiff railroad, or to any unjust or unreasonable advantage accruing to other carriers with longer rail routes. Furthermore, on the record before the court, the grounds stated by the Commission for disapproving proposed tariff rules do not afford a legally adequate basis for its decision. Accordingly, Commission order in the tariff proceeding is remanded for further proceedings.—Id., pp. 434-7.

In action seeking to set aside and enjoin the Commission's denial of motor carrier plaintiffs' proposed purchase transaction, it is not the function of the reviewing court to act as a fact-finding body, but rather to determine whether the Commission's findings are supported by substantial evidence. Decision of the Commission will not be disturbed, if a rational basis for its conclusions exists. Substantial evidence of record supports the Commission's findings that applicants (plaintiffs) had failed to show that vendor's past service under the purchase rights had been substantial, both as to territory and commodities, and that the purchase transaction as presented was not shown to be consistent with the public interest. There being no error in the Commission's report and orders, plaintiffs' action is dismissed.—Cooper Motor Lines, Inc. v. United States, 284 F. Supp. 754 (756-8)*.

Scope of court review of Commission order, which granted intervenor authority to conduct motor-carrier special and charter party operations, is limited to determining only whether the Commission's findings are supported by substantial evidence on the entire record and whether its conclusion as to convenience and necessity has a rational basis in the facts. Neither is the court concerned with consistency or inconsistency of the Commission's decisions, since its judgment must be exercised in light of the facts in each case. Furthermore, questions of admissibility, probative weight, and credibility of evidence are not within the scope of statutory review; thus, since the Commission is not required to adhere to strict rules of evidence, its admission of evidence which the court would deem incompetent does not invalidate its orders as long as the findings are sustained by competent substantial evidence in the entire record. Thus, the absence of testimony of potential riders, or direct users of the service authorized, does not render considered order of the Commission erroneous as a matter of law; sustained.—Greyhound Lines, Inc. v. United States, 285 F. Supp. 318 (320-21)*.

Since there is no rational foundation of record for the Commission's conclusion, in its investigation proceeding, that terms of the motor carrier certificate in issue were not patently ambiguous (on which finding it decided that it was prohibited from going behind the certificate to determine scope of the authority granted), that finding of no patent ambiguity was arbitrary, capricious, and constituted an abuse of agency discretion. In addition, the Commission's actions in regard to the investigation, and its discontinuance thereof, were procedurally deficient and not in conformity with requirements of the relevant statues; the order under review is set aside and the cause remanded. And the court, exercising its discretion to compel agency action unreasonably withheld, instructs the Commission on remand to (1) examine administrative history of considered certificate to determine scope of authority actually conferred therein, and (2) to consider and decide whether inadvertent issuance of the certificate illegally enlarged the scope of defendant carrier's authority.—Akers Motor Lines, Inc. v. United States, 286 F. Supp. 213 (220-1, 222-6)*.

In action seeking another review of Commission decision and order granting a motor carrier certificate (following the Supreme Court's reversal of reviewing court's former order remanding the case), it is significant that, in spite of everything that has occurred throughout the lengthy proceedings, plaintiffs did not seek an opportunity to produce, or present to the court any other or additional facts which would convince it that the Commission's decision bore any infirmities within the scope of proper court review. Furthermore, when the case was remanded to the Commission, it was not required by that order to take additional evidence of to make its decision anew otherwise than upon the existing record. Defendants' motion to dismiss pursuant to the reversal and remand in United States v. Dixie Highway Exp., Inc., 389 US 409, is sustained.—Dixie Highway Exp., Inc. v. United States, 287 F. Supp. 473 (474-5)*.

In action to set aside portion of the Commission's order denying plaintiff (applicant) authority for proposed operations to certain destination States, particularly Florida, the Commission's conclusion that record did not warrant a grant of authority to the more distant States, without distinguishing between Florida and the others, may rationally be drawn from the evidence; thus, even though evidence that two Florida sales were lost because of lack of suitable shipping facilities was presented to the examiner, the court is not prepared to substitute its own judgment to decide that the Commission's finding is arbitrary and without substantial basis in fact. Also, there is no obligation on the Commission to review and comment upon each item of evidence.—Caravelle Express, Inc. v. United States, 287 F. Supp. 585 (587)*.

Furthermore, the function of the reviewing court is limited to ascertaining whether there is warrant in the law and the facts for the Commission's action. The Commission's conclusion that plaintiff failed to show that public convenience and necessity existed for its proposed Florida operations was a rational conclusion which finds substantial support in the evidence; accordingly, relief sought by plaintiff is denied and the complaint is dismissed.—Id., pp. 588-9.

Scope of judicial review of Commission orders is limited and well defined; judicial function of the reviewing court is fully met when it finds a rational basis for the Commission's conclusions. The agency's action cannot be set aside unless it can be found to be arbitrary, capricious, or an abuse of discretion or not supported by substantial evidence. Record in Commission proceeding on motor carrier application for passenger authority is vast, and a reading of it as a whole does not show show it to be devoid of substantial evidence supporting its conclusions. Though occasionally the record may well support two conflicting points of view, the court cannot determine which is the correct one. Accordingly, the Commission's order granting the authority is sustained.—The Short Line, Inc. v. United States, 290 F. Supp. 939 (941-2)*.

Judicial review of Commission orders is limited to inquiries into issues of constitutional limitations, statutory authority, and sufficiency of evidence to support the agency's findings of fact. The Commission is charged with administration of the Motor Carrier Act, and the delineation of what are transportation services thereunder is particularly within its competence and expertise. Plaintiffs' argument that the Commission lacked substantial evidence on which to base its conclusion and, therefore, its finding that three services (in addition to over-the-road transportation) offered by contract-carrier applicant were "transportation services" should be set aside, overlooks the fact that the finding involves interpretation of critical language in a statutory scheme by the agency charged with its administration. As such the court is bound to accord it great weight; and if agency construction is not wholly incompatible with purpose of the Act, the court must accept it even though it would have reached a different result had the question arisen before it in the first instance. Commission decision sustained.—National Trailer Convoy, Inc. v. United States, 293 F. Supp. 630 (632-4)*.

In action to review, and seeking to enjoin certain aspects of, Commission's report and order disposing of 53 common carrier applications, the court's ambit of review is narrow; determination of public convenience and necessity is for the Commission and a court may not substitute its judgment for that of the administrative tribunal on matters within the agency's discretion. The Commission's determination that public convenience and necessity would be served by grant of authority to 36 of the carriers seeking to provide service to meat-packing houses in vicinity of Sioux City, Iowa, its selection of the carriers to meet the need shown, and its denial of the remaining 17 applications, was rational, based on adequate findings supported by substantial evidence, and in accord with the applicable law. Accordingly, even though the reviewing court might not necessarily reach the same result in every instance at issue, the relief requested is denied; complaints dismissed at plaintiff's cost.—Iowa Beef Packers, Inc. v. United States, 297 F. Supp. 1156 (1157-9)*.

In action seeking review of Commission's decision and order requiring plaintiff to cease and desist from certain unlawful motor carrier operations, overwhelming evidence supports the Commission's conclusion that plaintiff's movement of freight from Pittsburgh to Philadelphia, Pa., areas over highly circuitous routes via New Jersey (by tacking its interstate rights from western Pennsylvania to New Jersey to its rights between New Jersey points and Philadelphia) was essentially intrastate in character, subject to Pennsylvania laws, and, thus, such operations are not authorized by its interstate certificates. Therefore, Commission was warranted in concluding that plaintiff, who holds no intrastate authority, had improperly and illegally used such tacked-on routes as a deliberate expedient to avoid the rightful jurisdiction of the Pennsylvania commission over intrastate commerce; where there is no interstate commerce, there can be no legitimate use of interstate operating rights. The Commission's cease-and-desist order sustained; complaint dismissed.—Leonard Express, Inc. v. United States, 298 F. Supp. 556 (558-60)*.

Scope of judicial review in action to set aside Commission order is governed by the statute, and, in addition, the court must be guided by the well established principles applicable to the review of an administrative agency order. A Commission order is presumed valid; the party attacking it has the burden of showing invalidity; the Commission is authorized to make findings of fact, to draw legitimate inferences therefrom, and to evaluate and determine the weight to be given evidence; and the court's judgment may not be substituted for that of the Commission. The court need only determine whether or not Commission findings are supported by substantial evidence and are arrived at by proper application of relevant legal standards. Therefore, since the Commission's decision is supported by the record, as a whole, the order is sustained.—Alter Trucking and Terminal Corp. v. United States, 299 F. Supp. 819 (822-3, 824)*.

Scope of the court's review of Commission order denying plaintiff's application for a motor carrier certificate is limited to determining, on the record as a whole, whether the Commission's findings are supported by substantial evidence, or whether its findings and conclusions were induced by misapplication of the law; and if the findings are supported by substantial evidence and are in accordance with the law, they must be upheld. Therefore, since full consideration of the record as a whole shows that the Commission's decision is in conformance with the law and supported by substantial evidence on the whole record, plaintiff's complaint is dismissed at its costs.—Jerry Lipps, Inc. v. Interstate Commerce Commission, 299 F. Supp. 942 (944-5, 946)*.

In suit to set aside orders in motor carrier application proceeding and to remand the matter to the Commission for further consideration, scope of the court's review of the orders is limited to determination, on the record as a whole, of whether the Commission's findings are supported by substantial evidence, or whether its findings and conclusions were induced by misapplication of the law; if the findings are supported by substantial evidence and are in accordance with the law, they must be upheld. Therefore, since there is substantial evidence of record to support the Commission's decision granting the authority sought and since the decision is rational and in accordance with the law, the relief prayed for is denied; complaint dismissed, with costs taxed against plaintiff.—Truck Transport, Incorporated v. United States, 300 F. Supp. 159 (161, 162)*.

Judicial review provisions of the statute specifically apply to review of administrative action "except to the extent that * * * agency action is committed to agency discretion by law." Obviously, therefore, the requirements therein that orders contain a statement of findings and conclusions, and the reason or basis therefor, do not apply to Commission's temporary authority orders because, pursuant to 49 USC §310a, the Commission acts in its discretion and largely without hearings or other proceedings in temporary authority cases. Moreover, in its orders granting temporary authority to intervening defendant carrier, the Commission found an immediate and urgent need for the temporary service authorized and, also, that there was no carrier service available capable of meeting such need; thus, the Commission's action is not found "inadequate, incomplete, inconsistent, and erroneous" because of failure to comply with requirements of the APA, as asserted by plaintiffs. —Bell Lines, Inc. v. United States, 306 F. Supp. 209 (212, 214, 217)*.

In suit to set aside and annul Commission's grant of motor carrier authority, the court must be guided by the statutory standards of judicial review requiring "substantial evidence" on the record as a whole. Substantial evidence is something less than the weight of the evidence and has been defined as such relevant evidence as a reasonable mind might accept as adequate to support a conclusion; it must do more than create a suspicion of existence of a fact to be established; and must be enough to justify, if the trial were to a jury, refusal to direct a verdict when the factual conclusion to be drawn is for the jury. The possibility of drawing two inconsistent conclusions from the evidence does not prevent the Commission's findings from being supported by required substantiality. Therefore, since careful examination of supporting shippers' testimony shows substantial evidence on the record as a whole to support the Commission's finding of need for proposed service, grant of the authority in question is sustained.—Superior Trucking Co. v. United States, 306 F. Supp. 872 (875-6, 879)*.

Court review of a rulemaking proceeding usually is limited to question of whether the agency abused its discretion, acted in excess of delegated powers or failed to comply with procedural requirements; however, in review of Commission's initial choice of the type of proceeding, not the result thereof, such a decision is one within discretion of the agency, reviewable only as an abuse of such discretion. As in judicial review of substantive agency decisions, the court should be reluctant to substitute its own judgment for a procedural decision, within agency expertise, as to most appropriate manner of implementing underlying policy of the statute administered by the agency; and only where an agency has abused its discretion by its choice of rulemaking as the procedure to be followed should the reviewing court order the holding of individual adjudicatory hearings. The Commission did not abuse its discretion by employing rulemaking in its proceeding removing, on a national scale, "truckload lot" restrictions from all existing certificates; sustained.—Regular Common Carrier Conference v. United States, 307 F. Supp. 941 (943-4, 946)*.

In suit to enjoin and set aside Commission decision, ordering plaintiff to cease interstate hauling of sugar on buy-and-sell arrangements that were found to be unlawful for-hire carriage, function of the court is to determine on the "whole record" whether agency's action was arbitrary, capricious, abusive of discretion, or otherwise unlawful; was contrary to law, in excess of agency power, unsupported by substantial evidence, or "unwarranted by the facts to the extent that the facts are subject to trial de novo by the reviewing court." A close scrutiny of the whole record in instant case shows that (1) hearing procedures were fair and lawful; (2) evidence was received on material issues of fact; (3) findings of fact are supported by substantial evidence; (4) factual findings are adequate to resolve the crucial issues; (5) correct legal standards were applied to determine ultimate issues; and (6) all Commission regulations used were lawful and valid as applied in the case. Therefore, Commission decision and action can lawfully be affirmed; relief prayed for denied, with costs taxed against plaintiff.—Clearfield Cheese Company v. United States, 308 F. Supp. 1072 (1074-80)*.

The reviewing court, in suit to set aside Commission decision denying motor carrier extension applications, should not disturb the Commission's action where there has been an exercise of its valid statutory authority. Moreover, the court may not usurp the Commission's function and substitute its judgment for that of the examiner; nor is the court's function to determine the validity of the examiner's conclusions are based on, and supported by, substantial evidence. The reviewing court will give full effect to the Commission's findings unless it can be shown that such findings are based on an abuse of discretion which is arbitrary, capricious or manifestly prejudicial to the rights of the parties. Upon review of the record and files submitted to the examiner, the court finds that the Commission's decision is in conformity with the evidence submitted; therefore, plaintiffs having failed to sustain their burden of proof to show the contrary, the Commission order is sustained.—Lake Shore Motor Freight Co. v. United States, 310 F. Supp. 957 (959-60, 961)*.

Scope of the reviewing court's function is limited to determining the initial question of whether decision of the Commission is supported by substantial on the record considered as a whole, free from errors of law, and not so arbitrary, capricious or unreasonable as to constitute an abuse of discretion; and the test on judicial review of the Commission's order which granted operating authority to defendant carrier is whether its action is supported by substantial evidence on the record as a whole, and whether its procedures denied plaintiff carriers any substantive rights. There is abundant evidence in the record to support the Commission findings as to applicant's fitness, industrial growth and development in the area it seeks to serve, and the need for proposed single-line service which existing carriers are not able to meet; and upon examination, the record reveals plaintiffs' contentions of denial of due process to be without merit. The court finds no abuse of administrative discretion and, since the Commission's decision is based on adequate facts which are supported by substantial evidence, the order is sustained.—Carolina Freight Carriers Corp. v. United States, 323 F. Supp. 1290 (1293-5, 1297)*.

Judicial review of Commission order is limited in scope by settled principles of administrative law. The Commission is presumed to have properly performed its official duties, and that presumption (which stem from deference due the ICC's expertise in the industry it regulates) supports its actions in absence of clear evidence to the contrary. Unless there is some specific prejudicial departure from the law or an abuse of Commission discretion, the reviewing court may not intervene. The Commission's order may not be set aside on review, if it lies within scope of the applicable statute and is based on adequate findings which are supported by substantial evidence, even though the court may disagree with the Commission's conclusions. Also, as review of the evidence is governed by the "substantial evidence rule," the court is limited to determining whether there is substantial evidence to support the Commission's findings and orders. Findings and orders so supported are conclusive and binding on the court and, absent some error in procedure or in applying the rules of law, may not be set aside.—Feature Film Service, Inc. v. United States, 349 F. Supp. 191 (193-4)*.

In complaint proceeding under review, Commission properly found defendant's (plaintiff) transportation of motion picture film between points in Indiana to be transportation in interstate commerce for which appropriate authority is required, when evidence clearly showed that the film was shipped from outside that State to distributor's exchange at Indianapolis with the understanding and intent that it would not remain there, but would be sent on to individual exhibitors "in a movement as continuous as practicable." Principle to be applied in determining whether a shipment is one in interstate commerce was stated in 195 F. 2d 252; and applying that principle to the facts in instant case, it is clear that notwithstanding the temporary stops in Indianapolis the producer intends its film prints to move beyond that point to the contracting exhibitors and that the transportation from the exchange to exhibitors, and thereafter between exhibitors, is part of a continuous movement in interstate commerce. Therefore, Commission decision in the complaint case is affirmed.—Id., pp. 195-7.

Evidence in Commission's proceeding on plaintiff's application for certificate to transport motion picture film, etc., between points in Indiana, adequately supports the findings that applicant's fitness was "extremely doubtful," and that the record did not show a public need for proposed service. Record shows the Commission considered the various relevant factors in determining the public need, including elements of importance noted in 230 F. Supp. 646; thus, even if it erred in finding plaintiff had not been operating under color of right, that would not vitiate the decision that no public need was shown. The Commission has broad discretionary power to determine, on the facts, whether or not a certificate should be issued. It is not the reviewing court's function to substitute its judgment for that of the Commission on points of fact or mixed questions of fact and law that have been committed by law to agency discretion; nor are agency findings of fact to be disturbed if based on substantial evidence. The Commission applied the correct law, its order is based on adequate findings supported by substantial evidence, and its action was not arbitrary or capricious. Decision denying plaintiff's application, affirmed.—Id., pp. 199-202.

Scope of judicial review of Commission's interpretation of its own certificates is very narrow. Interpretations of such certificates should be made in the first instance by the Commission and, on review, its determination is entitled to be upheld if supported by substantial evidence. Possibility of drawing two inconsistent conclusions from the evidence does not prevent an administrative agency's finding from being supported by substantial evidence. Substantial evidence of record supports the Commission's conclusions that plaintiff's authority to serve "points in . . . North Carolina" as off-route points is territorially limited and that it does not authorize any service at Chesapeake, Va., although Chesapeake is within Moyock, N.C., commercial zone. Therefore, Commission cease-and-desist order is upheld, previously entered temporary restraining order is dissolved, and the suit is dismissed with prejudice.—R.C. Motor Lines, Inc. v. United States, 350 F. Supp. 1169 (1170-2, 1174)*.

Governing test for judicial review of Commission's orders granting intervening carrier temporary authority to transport trailers designed to be drawn by passenger vehicles, in initial movements, is the "some evidence" test as set forth in 302 F. Supp. 257, and not, as plaintiff contends, reviewing tests of whether the orders set forth a rational explanation for the grant, whether they departed from established Commission policy, and whether they were based on considerations that Congress could not have intended to make relevant, which have been established by cases construing provisions of the APA. Accordingly, it being abundantly clear on the record that the Commission's orders were entered upon some evidence as shown by the numerous affidavits of shippers, they are sustained; complaint dismissed.—National Trailer Convoy, Inc. v. I.C.C., 352 F. Supp. 945 (946)*.

In reviewing freight classification determinations, the district court determines whether the Commission acted rationally and whether its findings are supported by substantial evidence. Reviewing freight classifications is a fact-finding process and the court will not upset Commission decision because it evaluates evidence differently. In instant case Commission's general statement that shipper seeking classification change has failed to meet its burden of proof without indicating the basis of facts for such findings, is insufficient. Case remanded to Commission for further proceeding.—Dutton-Lainson Company v. United States, 371 F. Supp. 1352 (1355)*.

Notice

Findings that redefinition of Detroit commercial zone is not warranted, and that removal of exemption of §203(b8) as to transportation in foreign commerce between Detroit and the contiguous municipality of Windsor, Ontario, is not necessary to carry out the national transportation policy, make it unnecessary to determine whether notice published in the Federal Register of petition for redefinition of the zone complied sufficiently with §4 of APA; however, such notice made reference to §203(b8) and to the inclusion or exclusion of Windsor, and the Commission's power to remove the exemption in whole or in part has often been considered in proceedings involving §203(b8), which both confers the exemption and provides for its removal.—Commercial Zones and Terminal Areas—Detroit, 96 M.C.C. 709 (714)*.

While the statute guarantees respondents reasonable opportunity to learn the claims made against them and to meet them, a complete and precise bill of particulars is not required where a party is aware of the issues to be tried. There is sufficient notice if a respondent is generally apprised of the issues and investigation into respondent's motor carrier operations and practices; it is not necessary to inform it of every specific instance of unauthorized transportation to be presented [110 F. Supp. 876.] Respondents were given ample and fair notice prior to the hearing by informal communication from the Bureau of Inquiry and Compliance trial attorney; and there are no matters of substance raised at the hearing concerning which they can complain of surprise. Notice given respondents, therefore, was fully in accordance with the law.—Empire Truck U-Drive-It, Inc., Investigation, 96 M.C.C. 29 (37).

The fact that some communications from the Bureau to the respondents advised them of matters to be introduced through a witness as exhibits, which were ruled inadmissible, does not alter the adequacy of notice given. The described communications, together with the order instituting the investigation, fully advised the respondents of matters of fact and law to be introduced at the hearing, and correspond with the matters of fact and law which the Bureau has attempted to prove through the remaining evidence. No justification, therefore, is shown for further hearing for presentation of additional rebuttal testimony.—Id., p. 37.

While failure to give adequate notice of motor carrier application as amended at initial Commission hearing was error, it does not constitute inadvertence (within meaning of Interstate Commerce Act and appropriate decisions) which would permit the certificate issued therein to be revoked or modified because improperly issued. Once duly granted consistent with the Commission's intent, authority should not be revoked, particularly in absence of any certainty that, but for an apparent mistake, a different certificate would have been issued.—Carl Subler Trucking, Inc., Modification of Certificate, 99 M.C.C. 193 (197-8)*; however, the Commission's power to correct an obvious injustice is not so limited. The amendment accepted at initial hearing, though apparently restrictive, greatly broadened scope of the application and resulted in a failure of due process of law, depriving those relying on Federal Register publication of their statutory right to notice and the opportunity to participate in proceedings leading to issuance of questioned certificate. Thus, such certificate, while not void *ab initio*, is voidable by the Commission after appropriate proceedings in which the holder is given due notice of the issues and an opportunity to be heard.—Id., 103 M.C.C. 307 (311-13)*.

Change of form rather than substance in the nature of transaction was not material insofar as notice to public in Federal Register was concerned, particularly as such notice did not even purport to give all details of proposed transaction. Moreover, even if notice were to be considered defective, it was cured by subsequent republication giving notice of amendment after which ample time remained for interested persons to file for intervention. Technical objection held to be de minimum and not warranting further delay or postponement of proceedings.—Chemical Leaman Tank Lines, Inc.—Pur.—Ryder, 104 M.C.C. 686 (697-8).

Titling of an action is purely administrative and is not determinative of the nature of a transaction which may ultimately be approved. Although this application was docketed as a purchase (portion) based on the opening statement, no difference has been shown between this transaction and a true statutory merger, which is what it has been found to be, notwithstanding its title.—Id. p. 708-9.

Procedure

See also Akers Motor Lines, Inc. v. United States case, §204(c), n. 250; Blue Bird Coach Lines, Inc. v. United States case, §207(a), n. 7 *Existing motor carriers;* Kingpak, Inc., Investigation of Operations case, §206(b), n. 15; Removal of Truckload Lot Restrictions case, *Hearing,* supra.

Commission proceedings, prescribing car service rules after notice of proposed rulemaking was published and interested parties had submitted verified statements and legal arguments, satisfied procedure requirements of the APA. Appellees claim the Commission failed to comply with §§556 and 557 of the act but, under §553, those sections govern rulemaking procedure only when rules are required by statute to be made on the record after agency hearing. Proceedings under review were an exercise of legislative rulemaking power rather than adjudicatory hearings and, since the Esch Act which gives the Commission authority to establish reasonable car service rules does not require that such rules "be made on the record," §§556 and 557 were inapplicable. Therefore, procedure in the instant case was governed by §553 of APA; and since the findings and conclusions in the Commission's report fully comply with requirements of that section, nothing more was required by the statute.—United States v. Allegheny-Ludlum Steel Corp., 406 U.S. 742 (746-7, 755-8)*.

In Commission proceeding involving prescription of new divisions of Official-Southern joint rail rates, the Commission's use of its Cost Finding Section to give technical aid in analysis and evaluation of the cost evidence of record was an integral part of the administrative proceeding and violated the rights of no one. Also, issuance of a supplemental report by the Commission (which only changed its outstanding order as to divisions of one railroad, not here challenged) was lawful and proper and constituted sound administrative practice.—Aberdeen & R.R. Co. v. United States, 270 F. Supp. 695 (705)*.

Mandate of the APA for reasoned finding and conclusions on all material issues should not be read as requiring Commission to deal in detailed way with every possibility no matter how unlikely, or as directing a reviewing court to close its eyes to reality in pursuit of academic perfection.—Erie-Lackawanna R. Co. v. United States, 279 F. Supp. 316 (321)*.

Inasmuch as the court's opinion, which remands Commission decision and order in application cases for further proceedings, renders moot plaintiffs' contention that the Commission's procedure denied them due process, no ruling is made thereon. However, that issue was first raised by allegations in the complaint of procedural error because one Commissioner had presided at the hearing and, subsequently, had participated as a member of the Division which affirmed and adopted his recommended report and order; and, since plaintiffs knew that the Commissioner was chairman of the Division which normally would handle the proceedings, but failed timely to file their objections, their cry of prejudice comes too late.—HC&D Moving & Storage Co., Inc. v. United States, 298 F. Supp. 746 (747, 752)*.

There is no merit in plaintiff's argument (in suit to enjoin Commission orders denying rail abandonment application) that, under APA, the Commission erred in allowing the findings and recommended decision to be made by an examiner who had not heard the evidence when, after the hearing closed, the Hearing Examiner retired. While the statute provides that employee who heard the evidence must make required recommended or initial decision, it excepts the case where such employee "becomes unavailable to the Agency"; it is undisputed that retirement made the Hearing Examiner unavailable to the Commission. Also, the cases hold that substitution of hearing officers is permissible where demeanor of witnesses is of little or no consequence; in instant case, there was no material issue of credibility and the only disputed matters were collateral and largely immaterial. Hence, it being responsibility of the agency, not the examiner, to find facts, the Commission's task was to draw inferences from undisputed facts and it can draw whatever inferences the facts permit. The Commission's decision and orders comply with statutory requirements.—Brooklyn Eastern District Terminal v. United States, 302 F. Supp. 1095 (1105-6)*.

In action to review Commission decision removing "truckload lot" restrictions from all existing carrier certificates, the Commission properly used a rulemaking proceeding for that purpose under authority of the APA and 49 USC §308(a). In dealing with the outmoded, confusing restriction enacted in the past and currently serving no public interest, Commission choice of rulemaking procedure to review its past policy of removing truckload restrictions on a case-by-case basis was discretionary. An adjudicatory hearing is required for individual license applications, but it does not follow that an agency must pursue individual *ad hoc* adjudications in an area better suited to broad policy determination through rulemaking; a rulemaking proceeding which affects uniformly the interests of a class of licensees or certificate holders is valid. Commission is the best judge of its policies and has skill and resources to deal with them; it should be allowed broad discretion in choosing the proper method and course of action for that purpose. Rulemaking procedure was carefully observed, regulatory rule issued was reasonable and within the Commission's delegated powers; order sustained.—Regular Common Carrier Conference v. United States, 307 F. Supp. 941 (942-3, 945-6)*.

In application proceedings before Commission, consolidation is permissible when in the discretion of the agency a large part of the evidence adduced applies equally to all applications. The practice of consolidation for the purpose of expeditiously rendering an equitable solution to the problems in multiple and similar applications has been an accepted procedure; moreover, such consolidation serves to accommodate the convenience of all parties and to make available a great deal of relevant testimony, thus leading to a more rational decision based on as much evidence as it is feasible to obtain. In considered proceedings, claims of all the applicants were identical in nature and the evidence adduced had sufficient application to all parties to warrant consolidating the proceedings; such procedure was necessary and correct in assisting the Commission in weighing all the evidence and arriving at an intelligent decision; further, procedures exercised at the hearing by the examiner were in accordance with established administrative practice. Commission order sustained. —Lake Shore Motor Freight Co. v. United States, 310 F. Supp. 957 (961)*.

In considered decision, holding that applicant (plaintiff) failed to show need for proposed truck transportation from Indiana points within the Owensboro, Ky., commercial zone, the Commission considered for the first time whether public convenience and necessity required a grant of such authority. Thus, as that decision as to propriety of granting plaintiff authority to conduct operations under invalid portion of its certificate (which authority it did not seek in its original application) was a determination of an initial-license application, the Commission properly omitted the hearing examiner's recommended report and order pursuant to §8(a) of the statute. Also, in its prior decision, the Commission properly held that plaintiff's authority to originate traffic at Indiana points was invalid for want of proper notice to competing carriers but afforded it the opportunity to apply for such authority, and ordered publication of, and further hearing on question of need for, such proposed operations. The Commission did not abuse its discretion in omitting the hearing examiner's report and plaintiff, who declined to offer further supporting evidence, failed to show it was prejudiced thereby; Commission decisions sustained.—Carl Subler Trucking, Inc. v. United States, 313 F. Supp. 971 (977-8, 979)*.

In action by the Seaboard and the Florida East Coast to set aside I.C.C. order prescribing additional "incentive" per diem charges for unequipped boxcars, because no oral hearings were provided before the order was issued, the Commission's argument that the statute allows the procedure used finds no support in recent decision in 318 F. Supp. 490, when facts in instant case fall within exception expressed therein, as they show that plaintiffs were prejudiced by the Commission's summary procedures. Also, the commission's argument that the order can be sustained, even if plaintiffs prove all they seek an opportunity to prove, is wide of the mark; statutory and constitutional procedural due process does not go into what decision should be made in a given case, but rather deals with the process of decision making. While many unsupported decisions are eventually sustained after being supplemented by further hearings, that does not negate the right of the parties to be heard; and strict adherence to time-honored procedural rights is necessary to insure that informed decisions are made.—Florida East Coast Ry. Co. v. United States, 322 F. Supp. 725 (728-9)*.

Rulemaking proceedings of general public interest, being quasi-legislative, require full notice to the public and full and complete opportunity to participate by all interested persons, whether as active participant or merely as a viewer. Alternative procedure suggested in Association's petition for informal changes in the Commission's handling of certain rulemaking proceedings, under which statements would be served only on persons who filed initial statements instead of on all those filing notice of intent to participate, would discourage public interest and participation and would improperly limit the rights of persons desiring to participate; therefore, the petition is denied. However, in view of valid questions concerning the unnecessary expense that may be incurred by persons desiring to become parties to general rulemaking proceedings wherein, in lieu of oral hearing, written statements are to be filed, the procedure described will be informally instituted within the Commission to facilitate the early specification of a person's particular interest and, thus, to reduce the list of parties upon whom statements need be served.—Petition to Amend Commission's Procedure for Rulemaking, 340 I.C.C. 190 (191-3).

Protestant's rights were in no way prejudiced when, after their motion to strike recommended order of hearing officer who presided at continued (but not at the initial) hearing, on ground that it was not prepared by examiner who presided at reception of the evidence, was denied without prejudice to issuance of a supplemental report and recommended order; both hearing officers were appointed under §11 of APA; evidence was received at both hearings, although oral testimony was not adduced at the continued hearing; provisions of APA have in no way been infringed.—Skinner Motor Exp., Inc., Extension, 96 M.C.C. 135 (136-7, 140-1).

Citing a ruling by the Federal Communications Commission (Muncie, 15 Ad. L. 2d 329, 331-2), (F.C.C. 1964), it was decided that the better view of §8(b) of the APA requires that at every level where a report, either initial, recommended or final, is to be released, the parties be given an opportunity to submit proposed findings, or, if an earlier report has been issued, exceptions to that report. However, failure to comply with this requirement does not ipso facto suggest prejudicial error.—Sofield Transfer Co., Inc., Extension—Containers, 115 M.C.C. 280 (284-285).

Record

Examiner's statement during course of hearing and before protestants offered evidence, to effect that application appeared appropriate to grant without conditions based on evidence thus far adduced, were it not for the qualifying words, would indicate bias and prejudice requiring a rehearing. However, after a complete review of the entire record, Commission concluded that all parties received a fair hearing.—Howard's Exp., Inc.—Purchase—Exchange Trucking Corp., 97 M.C.C. 341 (342).

Records

In suit under the Freedom of Information Act seeking access to government information, where appellee administrative agency [Maritime Subsidy Board] took affirmative action against appellant ship operators by means of a decision which stated that the only basis for the action was a specified 31-page memorandum prepared by the agency's staff, and which set forth the last five pages of that memorandum as agency finding and determination in the matter, the agency could not subsequently refuse to disclose the entire memorandum to parties affected by its action. If the agency did not want to expose the staff memorandum to public scrutiny, it should not have publicly stated in the ruling that its action was based thereon, giving no other reasons or basis therefor; when it chose that method of stating the basis for its action, the memorandum lost its intra-agency status and became a public record, one which must be disclosed to appellants. Since the memorandum is clearly an identifiable record and does not fall within any statutory exemption from discovery, it is being improperly withheld by the Government, and the district court must order that it be produced for public inspection.—American Mail Line, Ltd. v. Gulick, 411 F. 2d 696 (698-703).

Reports of Commission

Plaintiff's objection to the Commission's "DANDO" report and order, whereby it adopted the examiner's findings and conclusions without further hearing or further findings or conclusions of its own, is without merit. The DANDO device has been approved in numerous cases, and its use in instant control and merger proceeding met the APA requirement that an agency decision reflect the reasons and basis for its findings and conclusions, especially in view of the Commission examiner's careful and thorough report. As stated in 238 F. Supp. 859, the Commission, as well as other adjudicatory tribunals, court or administrative, has the right, if not the duty, to exercise imaginative resourcefulness and judicial inventiveness in developing procedures which enable it to stem the tide of ever increasing backlogs. The Commission's DANDO device is certainly permissible; when pursued, of course, the Commission's action must stand or fall with the examiner's report and, from that viewpoint, there is nothing to plaintiff's criticism. Commission order, affirming and adopting the examiner's report and recommended order, sustained.—Tose, Inc. v. United States, 304 F. Supp. 894 (897-8, 900)*.

Provision of the statute that decisions must contain adequate findings and conclusions does not require Commission to furnish an analysis of each item of evidence nor to disclose mental processes by which its decision was reached; Commission findings are adequate when they contain sufficient particulars to inform the parties of purport thereof and the reasons and, also, to enable the court to discern the conclusions and reasons so it can judge whether the agency acted within its statutory authority. In carrier's suit to set aside Commission denial of its extension application, the hearing examiner's decision that plaintiff failed to meet its burden of showing need for proposed operation, which was adopted by the Commission and became its final decision, contains adequate findings on the basic issues; and since the decision is supported by sufficient basic findings of fact to show a rational basis therefor, it provides an adequate basis for exercise of the court's function of judicial review; sustained.—Carl Subler Trucking, Inc. v. United States, 313 F. Supp. 971 (978-9, 980)*.

Use of the "Short Form Decisional Process"—referred to as "DANDO"—is discretionary with Commission and has been held by many courts to be permissible. Thus, when the Commission finds no material error in a hearing examiner's statement of facts and conclusions thereon, it need not prepare a detailed report but may affirm and adopt the examiner's report as its own; however, when such procedure is used, the Commission's action stands or falls upon the examiner's report. Also, while the APA does not require the Commission or the examiner to make full, complete, and precise findings on every issue raised by the parties, the findings must be sufficiently complete to enable the reviewing court to examine with confidence the Commission's conclusions, and underlying reasons, and then to judge whether it acted within its statutory powers. Considered Commission decision is based on adequate facts which are supported by substantial evidence; sustained.—Carolina Freight Carriers Corp. v. United States, 323 F. Supp. 1290 (1296, 1297)*.

In addition to its statutory duty to make basic findings of (1) fitness and (2) public convenience and necessity in an application proceeding, the Commission is also bound by provisions of APA that administrative decisions must include a statement of findings and conclusions, and reasons or basis therefor, on all material issues presented on the record. However, the agency is not required to make the detailed findings of fact required by the Civil Procedure rules; moreover, it is not compelled to annotate to each finding the evidence supporting it, so long as required statutory findings are made. And once such required findings are made the reviewing court must sustain the Commission when its findings are supported by substantial evidence on the record as a whole. Complaint dismissed.—St. Johnsbury Trucking Co. v. United States, 326 F. Supp. 938 (940-1, 943)*.

Hearing examiner's report herein is not violative of APA by failure to "set forth with particularity findings of fact to support conclusions" therein and a failure to make "a specific enumeration of findings" at one place rather than spread throughout the report inasmuch as the report is adequately organized and indexed and is not unwieldy even though it is unusually large and covers a wide range of issues.—Pennsylvania R. Co.—Merger—New York Central R. Co., 327 I.C.C. 475 (482).

FEDERAL ADVISORY COMMITTEE ACT

Appendix—Title 5, U.S.C.

FINDINGS AND PURPOSES

SEC. 2. (a) The Congress finds that there are numerous committees, boards, commissions, councils, and similar groups which have been established to advise officers and agencies in the executive branch of the Federal Government and that they are frequently a useful and beneficial means of furnishing expert advice, ideas, and diverse opinions to the Federal Government.

(b) The Congress further finds and declares that—

(1) the need for many existing advisory committees has not been adequately reviewed;

(2) new advisory committees should be established only when they are determined to be essential and their number should be kept to the minimum necessary;

(3) advisory committees should be terminated when they are no longer carrying out the purposes for which they were established;

(4) standards and uniform procedures should govern the establishment, operation, administration, and duration of advisory committees;

(5) the Congress and the public should be kept informed with respect to the number, purpose, membership, activities, and cost of advisory committees; and

(6) the function of advisory committees should be advisory only, and that all matters under their consideration should be determined, in accordance with law, by the official, agency, or officer involved.

DEFINITIONS

SEC. 3. For the purpose of this Act—

(1) The term "Director" means the Director of the Office of Management and Budget.

(2) The term "advisory committee" means any committee, board, commission, council, conference, panel, task force, or other similar group, or any subcommittee or other subgroup thereof (hereafter in this paragraph referred to as "committee"), which is—

(A) established by statute or reorganization plan, or

(B) established or utilized by the President, or

(C) established or utilized by one or more agencies,

in the interest of obtaining advice or recommendations for the President or one or more agencies or officers of the Fderal Government, except that such term excludes (i) the Advisory Commission on Intergovernmental Relations, (ii) the Commission on Government Procurement, and (iii) any committee which is composed wholly of full-time officers or employees of the Federal Government.

(3) The term "agency" has the same meaning as in section 551(1) of title 5, United States Code.

(4) The term "Presidential advisory committee" means an advisory committee which advises the President.

APPLICABILITY

SEC. 4. (a) The provisions of this Act or of any rule, order, or regulation promulgated under this Act shall apply to each advisory committee except to the extent that any Act of Congress establishing any such advisory committee specifically provides otherwise.

(b) Nothing in this Act shall be construed to apply to any advisory committee established or utilized by—

(1) the Central Intelligence Agency; or

(2) the Federal Reserve System.

(c) Nothing in this Act shall be construed to apply to any local civic group whose primary function is that of rendering a public service with respect to a Federal program, or any State or local committee, council, board, commission, or similar group established to advise or make recommendations to State or local officials or agencies.

RESPONSIBILITIES OF CONGRESSIONAL COMMITTEES

SEC. 5. (a) In the exercise of its legislative review function, each standing committee of the Senate and the House of Representatives shall make a continuing review of the activities of each advisory committee under its jurisdiction to determine whether such advisory committee should be abolished or merged with any other advisory committee, whether the responsibilities of such advisory committee should be revised, and whether such advisory committee performs a necessary function not already being performed. Each such standing committee shall take appropriate action to obtain the enactment of legislation necessary to carry out the purpose of this subsection.

(b) In considering legislation establishing, or authorizing the establishment of any advisory committee, each standing committee of the Senate and of the House of Representatives shall determine, and report such determination to the Senate or to the House of Representatives, as the case may be, whether the functions of the proposed advisory committee are being or could be performed by one or more agencies or by an advisory committee already in existence, or by enlarging the mandate of an existing advisory committee. Any such legislation shall—

(1) contain a clearly defined purpose for the advisory committee;

(2) require the membership of the advisory committee to be fairly balanced in terms of the points of view represented and the functions to be performed by the advisory committee;

(3) contain appropriate provisions to assure that the advice and recommendations of the advisory committee will not be inappropriately

influenced by the appointing authority or by any special interest, but will instead be the result of the advisory committee's independent judgment;

(4) contain provisions dealing with authorization of appropriations, the date for submission of reports (if any), the duration of the advisory committee, and the publication of reports and other materials, to the extent that the standing committee determines the provisions of section 10 of this Act to be inadequate; and

(5) contain provisions which will assure that the advisory committee will have adequate staff (either supplied by an agency or employed by it), will be provided adequate quarters, and will have funds available to meet its other necessary expenses.

(c) To the extent they are applicable, the guidelines set out in subsection (b) of this section shall be followed by the President, agency heads, or other Federal officials in creating an advisory committee.

RESPONSIBILITIES OF THE PRESIDENT

SEC. 6. (a) The President may delegate responsibility for evaluating and taking action, where appropriate, with respect to all public recommendations made to him by Presidential advisory committees.

(b) Within one year after a Presidential advisory committee has submitted a public report to the President, the President or his delegate shall make a report to the Congress stating either his proposals for action or his reasons for inaction, with respect to the recommendations contained in the public report.

(c) The President shall, not later than March 31 of each calendar year (after the year in which this Act is enacted), make an annual report to the Congress on the activities, status, and changes in the composition of advisory committees in existence during the preceding calendar year. The report shall contain the name of every advisory committee, the date of and authority for its creation, its termination date or the date it is to make a report, its functions, a reference to the reports it has submitted, a statement of whether it is an ad hoc or continuing body, the dates of its meetings, the names and occupations of its current members, and the total estimated annual cost to the United States to fund, service, supply, and maintain such committee. Such report shall include a list of those advisory committees abolished by the President, and in the case of advisory committees established by statute, a list of those advisory committees which the President recommends be abolished together with his reasons therefor. The President shall exclude from this report any information which, in his judgment, should be withheld for reasons of national security, and he shall include in such report a statement that such information is excluded.

RESPONSIBILITIES OF THE DIRECTOR, OFFICE OF MANAGEMENT AND BUDGET

SEC. 7. (a) The Director shall establish and maintain within the Office of Management and Budget a Committee Management Secretariat, which shall be responsible for all matters relating to advisory committees.

(b) The Director shall, immediately after the enactment of this Act, institute a comprehensive review of the activities and responsibilities of each advisory committee to determine—

(1) whether such committee is carrying out its purpose;

(2) whether, consistent with the provisions of applicable statutes, the responsibilities assigned to it should be revised;

(3) whether it should be merged with other advisory committees; or

(4) whether it should be abolished.

The Director may from time to time request such information as he deems necessary to carry out his functions under this subsection. Upon the completion of the Director's review he shall make recommendations to the President and to either the agency head or the Congress with respect to action he believes should be taken. Thereafter, the Director shall carry out a similar review annually. Agency heads shall cooperate with the Director in making the reviews required by this subsection.

(c) The Director shall prescribe administrative guidelines and management controls applicable to advisory committees, and, to the maximum extent feasible, provide advice, assistance, and guidance to advisory committees to improve their performance. In carrying out his functions under this subsection, the Director shall consider the recommendations of each agency head with respect to means of improving the performance of advisory committees whose duties are related to such agency.

(d)(1) The Director, after study and consultation with the Civil Service Commission, shall establish guidelines with respect to uniform fair rates of pay for comparable services of members, staffs, and consultants of advisory committees in a manner which gives appropriate recognition to the responsibilities and qualifications required and other relevant factors. Such regulations shall provide that—

(A) no member of any advisory committee or of the staff of any advisory committee shall receive compensation at a rate in excess of the rate specified for GS-18 of the General Schedule under section 5332 of title 5, United States Code; and

(B) such members, while engaged in the performance of their duties away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for persons employed intermittently in the Government service.

(2) Nothing in this subsection shall prevent—

(A) an individual who (without regard to his service with an advisory committee) is a full-time employee of the United States, or

(B) an individual who immediately before his service with an advisory committee was such an employee,

from receiving compensation at the rate at which he otherwise would be compensated (or was compensated) as a full-time employee of the United States.

(e) The Director shall include in budget recommendations a summary of the amounts he deems necessary for the expenses of advisory committees, including the expenses for publication of reports where appropriate.

RESPONSIBILITIES OF AGENCY HEADS

SEC. 8. (a) Each agency head shall establish uniform administrative guidelines and management controls for advisory committees established by that agency, which shall be consistent with directives of the Director under section 7 and section 10. Each agency shall maintain systematic information on the nature, functions, and operations of each advisory committee within its jurisdiction.

(b) The head of each agency which has an advisory committee shall designate an Advisory Committee Management Officer who shall—

(1) exercise control and supervision over the establishment, procedures, and accomplishments of advisory committees established by that agency;

(2) assemble and maintain the reports, records, and other papers of any such committee during its existence; and

(3) carry out, on behalf of that agency, the provisions of section 552 of title 5, United States Code, with respect to such reports, records, and other papers.

ESTABLISHMENT AND PURPOSE OF ADVISORY COMMITTEES

SEC. 9. (a) No advisory committee shall be established unless such establishment is—

(1) specifically authorized by statute or by the President; or

(2) determined as a matter of formal record, by the head of the agency involved after consultation with the Director, with timely notice published in the Federal Register, to be in the public interest in connection with the performance of duties imposed on that agency by law.

(b) Unless otherwise specifically provided by statute or Presidential directive, advisory committees shall be utilized solely for advisory functions. Determinations of action to be taken and policy to be expressed with respect to matters upon which an advisory committee reports or makes recommendations shall be made solely by the President or an officer of the Federal Government.

(c) No advisory committee shall meet or take any action until an advisory committee charter has been filed with (1) the Director, in the case of Presidential advisory committees, or (2) with the head of the agency to whom any advisory committee reports and with the standing committees of the Senate and of the House of Representatives having legislative jurisdiction of such agency. Such charter shall contain the following information:

(A) the committee's official designation;

(B) the committee's objectives and the scope of its activity;

(C) the period of time necessary for the committee to carry out its purposes;

(D) the agency or official to whom the committee reports;

(E) the agency responsible for providing the necessary support for the committee;

(F) a description of the duties for which the committee is responsible, and, if such duties are not solely advisory, a specification of the authority for such functions;

(G) the estimated annual operating costs in dollars and manyears for such committee;

(H) the estimated number and frequency of committee meetings;

(I) the committee's termination date, if less than two years from the date of the committee's establishment; and

(J) the date the charter is filed.

A copy of any such charter shall also be furnished to the Library of Congress.

ADVISORY COMMITTEE PROCEDURES

SEC. 10. (a)(1) Each advisory committee meeting shall be open to the public.

(2) Except when the President determines otherwise for reasons of national security, timely notice of each such meeting shall be published in the Federal Register, and the Director shall prescribe regulations to provide for other types of public notice to insure that all interested persons are notified of such meeting prior thereto.

(3) Interested persons shall be permitted to attend, appear before, or file statements with any advisory committee, subject to such reasonable rules or regulations as the Director may prescribe.

(b) Subject to section 552 of title 5. United States Code, the records. reports, transcripts, minutes, appendixes, working papers, drafts, studies, agenda, or other documents which were made available to or prepared for or by each advisory committee shall be available for public inspection and copying at a single location in the offices of the advisory committee or the agency to which the advisory committee reports until the advisory committee ceases to exist.

(c) Detailed minutes of each meeting of each advisory committee shall be kept and shall contain a record of the persons present, a complete and accurate description of matters discussed and conclusions reached, and copies of all reports received, issued, or approved by the advisory committee. The accuracy of all minutes shall be certified to by the chairman of the advisory committee.

(d): Subsections (a)(1) and (a)(3) of this section shall not apply to any portion of an advisory committee meeting where the President, or the head of the agency to which the advisory committee reports, determines that such portion of such meeting may be closed to the public in accordance with subsection (e) of section 552b of title 5, United States Code. Any such determination shall be in writing and shall contain the reasons for such determination. If such a determination is made, the advisory committee shall issue a report at least annually setting forth a summary of its activities and such related matters as would be informative to the public consistent with the policy of section 552(b) of title 5, United States Code.

(e) There shall be designated an officer or employee of the Federal Government to chair or attend each meeting of each advisory committee. The officer or employee so designated is authorized, whenever he determines it to be in the public interest, to adjourn any such meeting. No advisory committee shall conduct any meeting in the absence of that officer or employee.

(f) Advisory committees shall not hold any meetings except at the call of, or with the advance approval of, a designated officer or employee of the Federal Government, and in the case of advisory committees (other than Presidential advisory committees), with an agenda approved by such officer or employee.

AVAILABILITY OF TRANSCRIPTS

SEC. 11. (a) Except where prohibited by contractual agreements entered into prior to the effective date of this Act, agencies and advisory committees shall make available to any person, at actual cost of duplication, copies of transcripts of agency proceedings or advisory committee meetings.

(b) As used in this section "agency proceeding" means any proceeding as defined in section 551(12) of title 5, United States Code.

FISCAL AND ADMINISTRATIVE PROVISIONS

SEC. 12. (a) Each agency shall keep records as will fully disclose the disposition of any funds which may be at the disposal of its advisory committees and the nature and extent of their activities. The General Services Administration, or such other agency as the President may designate, shall maintain financial records with respect to Presidential advisory committees. The Comptroller General of the United States, or any of his authorized representatives, shall have access, for the purpose of audit and examination to any such records.

(b) Each agency shall be responsible for providing support services for each advisory committee established by or reporting to it unless the establishing authority provides otherwise. Where any such advisory committee reports to more than one agency, only one agency shall be responsible for support services at any one time. In the case of Presidential advisory committees, such services may be provided by the General Services Administration.

RESPONSIBILITIES OF LIBRARY OF CONGRESS

SEC. 13. Subject to section 552 of title 5, United States Code, the Director shall provide for the filing with the Library of Congress of at least eight copies of each report made by every advisory committee and, where appropriate, background papers prepared by consultants. The Librarian of Congress shall establish a depository for such reports and papers where they shall be available to public inspection and use.

TERMINATION OF ADVISORY COMMITTEES

SEC. 14. (a)(1) Each advisory committee which is in existence on the effective date of this Act shall terminate not later than the expiration of the two-year period following such effective date unless—

(A) in the case of an advisory committee established by the President or an officer of the Federal Government, such advisory committee is renewed by the President or that officer by appropriate action prior to the expiration of such two-year period; or

(B) in the case of an advisory committee established by an Act of Congress, its duration is otherwise provided for by law.

(2) Each advisory committee established after such effective date shall terminate not later than the expiration of the two-year period beginning on the date of its establishment unless—

(A) in the case of an advisory committee established by the President or an officer of the Federal Government such advisory committee is renewed by the President or such officer by appropriate action prior to the end of such period; or

(B) in the case of an advisory committee established by an Act of Congress, its duration is otherwise provided for by law.

(b)(1) Upon the renewal of any advisory committee, such advisory committee shall file a charter in accordance with section 9(c).

(2) Any advisory committee established by an Act of Congress shall file a charter in accordance with such section upon the expiration of each successive two-year period following the date of enactment of the Act establishing such advisory committee.

(3) No advisory committee required under this subsection to file a charter shall take any action (other than preparation and filing of such charter) prior to the date on which such charter is filed.

(c) Any advisory committee which is renewed by the President or any officer of the Federal Government may be continued only for successive two-year periods by appropriate action taken by the President or such officer prior to the date on which such advisory committee would otherwise terminate.

EFFECTIVE DATE

SEC. 15. Except as provided in section 7(b), this Act shall become effective upon the expiration of ninety days following the date of enactment. (Pub. Law 92-463, Oct. 6, 1972, 86 Stat. 770.)

Title 7—AGRICULTURE

Chapter 9.—PACKERS AND STOCKYARDS

Sections 225, 226. Powers of Interstate Commerce Commission unaffected.—[Unchanged. See vol. 4, p. 2973.]

FEDERAL POSSESSION AND CONTROL ACT

Section 1361. Control of transportation systems in time of war.— [Unchanged. See vol. 4, p. 2978; provision for extension, see Historical Notes, vol. 16, p. 12966.]

Amendment, see footnote, vol. 16, p. 12966; historical notes, vol. 16, p. 12966.

BANKRUPTCY

Chapter 8.—Title 11 U.S.C.

Section 205. [*§77 as enacted*] Reorganization of railroads engaged in interstate commerce.—[Unchanged. See vol. 18, p. 14710, vol. 21, p. 17804.]

Amendments, see footnotes, vol. 10, p. 8310; historical notes, vol. 7, p.6015, vol. 10, p. 8311, vol. 11, p. 9696, vol 12, p. 10536, vol. 14, p. 11692, vol. 15, p. 12313, vol. 16, p. 12967, vol. 17, p. 13678; vol. 18, p. 14710, vol. 21, p. 17806.

Historical Notes

The Regional Rail Reorganization Act of 1973 [Pub. L. 93-236, 87 Stat. 1021, 45 U.S.C. §791] states: "The provisions of the Interstate Commerce Act (49 U.S.C. 1 et. seq.) and the Bankruptcy Act (11 U.S.C. et seq.) are inapplicable to transactions under this Act to the extent necessary to formulate and implement the final system plan whenever a provision of any such Act is inconsistent with this Act."

By §3 of the Emergency Rail Services Act of 1970, Jan. 8, 1971, Public Law 91-663, 84 Stat. 1974, 1975, it is provided: on court-approved application by trustees of any railroad undergoing reorganization, the Secretary of Transportation, after consultation with the Interstate Commerce Commission, is authorized to guarantee trustees' certificates issued pursuant to §77(c)(3) of the Bankruptcy Act upon the required findings in writing, after published notice of intention to make such findings and opportunity for interested persons to submit views, if not waived; that such guarantee shall be conditioned as specified; and that any guaranteed certificate shall be treated as an administration expense and receive the highest lien on debtor's property and priority in payment, except that rights referred to in last sentence of §77(j) of the Bankruptcy Act shall in no way be affected.

Notes of Decisions

Volume 7—p. 6016; Volume 10—p. 8312; Volume 11—p. 9697; Volume 12—p. 10537; Volume 13—p. 11180; Volume 14—p. 11693; Volume 15—p. 12313; Volume 16—p. 12968; Volume 17—p. 13678; Volume 18—p. 14712; Volume 19—15994; Volume 21—p. 17806.

2. Construction and interpretation.—[Vols. 10-17, 19, 21].—Supreme Court held that a reorganization court in a railroad bankruptcy is empowered to reach an "informed, independent judgment of its own" in valuation matters which differs from Commission's valuation findings. Such valuations by reorganization court were also held to be reversible by a higher court only if such decision is clearly erroneous.—New Haven Inclusion Cases, 399 U.S. 392 (431-5)*.

Congressional purpose in enactment of §77, particularly the "exclusive jurisdiction" provision of §77(a), was to eliminate the need for ancillary receivership proceedings in federal courts in every state in which the railroad operated. Overlapping jurisdiction of numerous courts was not conducive to speedy and efficient reorganization of a financially unsound railroad; and, by providing for exclusive jurisdiction in one federal court with nationwide service of process, Congress intended to vest subject matter jurisdiction over the debtor and its property in one federal court which would have absolute power over that property and over administration of the railroad pending submission of a reorganization plan by the Commission and approval of that plan by the court.—In re New York, N.H. & H.R. Co., 457 F. 2d 683 (688)*.

District court held that "fair liquidation value" of a railroad undergoing reorganization would be the property's highest and best use and that, therefore, Commission's order setting sales price for the New York, N. H. & H. R. Co. by reducing predetermined liquidation value due to delay in start of liquidation proceedings and for bulk sales discount violated the statute.—In re New York, New Haven and Hartford Railroad Co., 304 F. Supp. 793 (798-9)*.

There is no language prohibiting Commission's evaluation of a debtor's properties and approval of their sale before approving the restructuring of the debtor. Moreover, "two-step" plans of reorganization have had judicial sanction (see 141 F. 2d. 747) in situations in which debtor's assets were wasting away, either physically or financially.—Pennsylvania R. Co.—Merger—New York Central R. Co., 331 I.C.C. 643 (721-725)*.

Results of ultimate decision of substantive issues raised before first railroad reorganization court must appear to second reorganization court, which was dealing with a railroad that had merged with railroad involved in proceedings before first court, to be consistent with fair and equitable plan for latter railroad. Second court's equitable lien in favor of former railroad is not legally binding determination as to latter railroad.—In re Penn Central Transportation Company, 337 F. Supp. 779 (789-90)*.

In ordinary course of railroad reorganization, a federal court is required to determine amount of an unliquidated debt, decide whether claim is secured or unsecured, and classify various claimants according to the nature of their respective claims and interests for purpose of reorganization plan.— Id., p. 786.

6. Jurisdiction.—[Vols. 10-18, 21].—See also Commonwealth of Pennsylvania v. Penn Central Transp. Co. case, §1(20), n. 19; In re Penn Central Transp. Co. case, 28 USC §1336, n. 2.

Supreme Court held that in this railroad proceeding the three-judge district court should have deferred to the jurisdiction of the reorganization court in reviewing valuation findings of the Commission. Given a conflict between two coordinate courts of concurrent, overlapping jurisdiction, the court which first acquired jurisdiction through possession of the property should hear all controversies relating thereto (see 262 US 77).—New Haven Inclusion Cases, 399 U.S. 392 (423-8)*.

District court had jurisdiction to grant petition of debtor railroad's trustee for authority to appoint an officer of another railroad as operating officer of debtor's estate. Although petition was filed and the court's order was entered prior to the officer's obtaining Interstate Commerce Commission authority to hold such position, trustee's petition was not premature merely because Commission approval had not been obtained when the order was conditioned upon the Commission's approval; under the circumstances, to require that request to the Commission precede petition to the court would be to exalt form over substance. Furthermore, since reorganization has jurisdiction to authorize a trustee for a debtor railroad to employ executive personnel, it necessarily has a right to determine that its authorization is proper; the court's action is justified as an exercise of its sound discretion.—In re Central R. Co. of New Jersey, 411 F. 2d 1178 (1180-81).

Reorganization court did not err in retaining jurisdiction of suit involving discontinuance of debtor railroad's passenger trains between New York City and Chatham, N.Y., when debtor had entered into a contract authorized by the "Amtrack statute" with the National Rail Passenger Corp. and thereafter, pursuant to Order No. 232, the Trustees petitioned that court for leave to discontinue all intercity passenger train service. The Court has previously decided, in 446 F. 2d 1109, that it was proper for the Reorganization Court to retain control of litigation involving such matters and specifically Order No. 232; and appellants have failed to present sound reasoning for transferring instant litigation to another district judge.—In re Penn Central Transp. Co., 457 F. 2d 381 (382, 387)*.

Under §77(a), Connecticut reorganization court lacked subject matter jurisdiction to issue its order asserting an equitable lien on, and a constructive trust on income from, certain property of the New York, N.H. & H.R. because, since debtor's assets had been transferred to Penn Central Transp. Co. when it was included in the Penn-Central rail merger, the property affected is within exclusive jurisdiction of the Pennsylvania court in which Penn Central later filed a petition for reorganization. Because Penn Central had legal title to and actual possession of former New Haven assets when its petition was approved; it was, and trustees are, using those assets and income therefrom to operate its lines and former New Haven lines; and Connecticut court's order could seriously impair the formulation of a workable plan for reorganizing Penn Central and the reorganization court's ability to administer that entire system, of which the New Haven is but a division, only the Pennsylvania reorganization court had subject matter jurisdiction under §77(a) over property in question.—In re New Haven, N.H. & H.R.Co., 457 F. 2d 683 (688-90)*.

Since assets of first railroad, which was included in merger at a time it was in reorganization, were conveyed to debtor free and clear of all liens, including all claims of first estate, and they remained in possession of debtor on date of bankruptcy, filing of debtor's reorganization plan vested jurisdication over such assets in federal district court, making liens upon them jurisdictionally impossible by other courts without approval of the district court.—In re Penn Central Transportation Company, 337 F. Supp. 779 (786-7)*.

Validity of debentures is not a matter under Commission's jurisdiction; but for purposes of considering proposed plan of reorganization, the considered debentures as valid obligations of debtor will be assumed. —Boston & P. R. Corp. Reorganization, 327 I.C.C. 10 (15)*.

The only statutory basis for paying counsel fees by an estate in reorganization is §77 (c)(2), and under that provision, Commission must set reasonable maximum limits for such payment. The nature of the legal work performed does not invalidate Commission's jurisdiction to set such limits.—New York, N.H. and H.R. Co. Reorganization, 342 I.C.C. 632 (637-8).

10. Proceedings, in general.—[Vols. 10-17, 19, 21].—When plan of reorganization of debtor railroad had been approved by the Commission and the district court, and appeal from order of approval by Boston & P. Stockholders Development Group (instant appellant), representing about 10 percent of debtor's stock in the public class, had been dismissed for want of prosecution, the Group could not, under guise of appeal from subsequent court order of confirmation, relitigate issues concerning fairness and equity of the underlying plan that were decided against it by dismissal of its appeal from district court order approving the reorganization. Essence of the statute is that judicial review of both the approval and confirmation be available, not that they both be available after confirmation. Dismissal of an appeal always involves prejudice in the ordinary case and the result should not be different in a railroad reorganization case merely because of the subsequent confirmation; thus, having unsuccessfully appealed from district court order of approval, appellant must be bound by that action.—In re Boston & P. R. Corp., 413 F. 2d 137 (138-40)*.

Pursuant to reorganization procedure established in §77, case involving a jurisdictional conflict between two reorganization courts each claiming jurisdiction to affect interests in certain railroad property over which, under §77(a), only one court has exclusive jurisdiction, must be remanded to the Commission so that a reorganization plan, fair and equitable to all parties, can be formulated. As both the Penn Central and New Haven (included in Penn-Central rail merger) are in reorganization, at least nominally, before different federal courts, the Commission is the common denominator between those courts so far as formulating a plan, or two interrelated plans, is concerned; also, any necessary protection ot the New Haven estate must first be proposed by the Commission in the context of a Penn Central reorganization plan. Upon remand, the Commission can consider terms of the New Haven inclusion as a part of the Penn Central reorganization; and that procedure is a proper method by which the interests of all parties can best be advanced. Reversed and remanded to the Commission. —In re New York, N. H. & H. R. Co., 457 F. 2d 683 (691)*.

Inasmuch as divergence exists in a number of important respects between railroad owning approximately 49 per cent of debtor's outstanding common stock and debtor; and, hence, railroad's interests as a stockholder differ from those of nonrailroad stockholders, it would be beneficial in proceedings before the Commission or in the courts concerning debtor's reorganization to have representation of stockholders whose interests lie with debtor as opposed to its railroad stockholder. Authority granted to applicants, as a protective committee, to solicit authorizations to represent nonrailroad stockholders, subject to certain conditions. —Central R. Co. of New Jersey Reorganization, 330 I.C.C. 769 (773, 776, 778).

18. Injunction.—[Vols. 10-13. 15, 16, 18]. —In appeal from reorganization court order refusing further to extend as a preliminary injunction its temporary restraining order, which required operation of debtor's New York City-Chatham, N. Y., passenger trains pending Commission's decision and report as to "intercity" or "commuter" nature of those trains, the critical question is whether the court abused its discretion in denying a preliminary injunction when it had not actually ruled on validity of the Commission finding that service of trains involved was intercity not commuter service. The parties briefed the validity of agency reports in "intercity-commuter" matters which the court had referred to the Commission, but those cases were never finally disposed of in the reorganization court. However, the issue on appeal from an order denying a preliminary injunction is whether the court abused its discretion; appellants have the burden of showing an abuse of discretion by the court, and any direct attack on merits of the Commission report is clearly improper and beyond the legitimate scope of instant appeal.—In re Penn Central Transp. Co., 457 F. 2d 381 (382, 384)*.

Measured against the standards governing issuance of a preliminary injunction in a public utility case, enumerated in 259 F. 2d 921 and 326 F. Supp. 68, evidence presented by appellants is insufficient to show an abuse of discretion by the reorganization court in refusing to grant the preliminary injunction. Although direct attack on the agency report is premature and improper, the main thrust of appellants' argument is against weight of the evidence in support of the Commission's finding; furthermore, appellants' arguments afford no basis for a showing of likelihood of success in the district court. In addition, appellants failed to show that without requested injunction they will be irreparably injured, and that other interested parties will not be substantially harmed by issuance thereof. Accordingly, in light of the amount of traffic on considered trains, degree of affected communities' dependence thereon, and the other attendant circumstances, record is convincing that the district judge did not abuse his discretion, and that the public interest supports denial of the preliminary injunction. Order affirmed.—Id., pp. 385-7.

30. Plan of reorganization.—[Vols. 10-19, 21].—Plan of reorganization of debtor railroad, approved in the Commission's seventh supplemental report, provides for transfer of substantially all debtor's assets, properties and franchises to the New Haven and ultimate liquidation of debtor, mutual cancellation by the railroads and trustees of each of their claims against each other (except for debtor's debentures), and for compensation of creditors and stockholders; for amendment of debtor's charter to relieve it from obligations as to use of Boston South Station; and for appointment of four reorganization managers to carry out the plan, one each by the Government, the B&P Stockholders Committee, the New Haven Trustees, and debtor's trustee. No reorganization plan can satisfy completely all the interested parties, but plan before the court is a result of years of litigation, negotiation and compromise and presents a solution which all interested parties, except small dissident minority, are willing to accept as fair and reasonable. The plan is fair and equitable, affords due recognition to rights of bond and stock holders, and otherwise fully complies with the statute; approved.—In re Boston & P. R. Corp., 260 F. Supp. 415 (417-9, 422-3)*.

Railroad reorganization plan considered herein was approved in part, modified in part, and remanded to the Commission pending a determination of the price to be paid by the railroad that was to receive the assets of debtor railroad.—In re New York, New Haven and Hartford Railroad Co., 304 F. Supp. 1136 (1137)*.

See also Boston & P. R. Corp. Reorganization case, n. 61 below.

Commission authorized a reorganization plan for the New York, N. H. & H. R. Co., a railroad included in this merger, which provides for the creation of an investment company and issuance of securities by it in exchange for debtor's securities. Such method is most feasible means for effectuating reorganization and is consistent with congressional intent as well as language of §77. —Pennsylvania R. Co.—Merger—New York Central R. Co., 334 I.C.C. 25 (103)*.

35. Classification of claims and interests, creditors.—[Vols. 10-16, 18, 21].—See Boston & P. R. Corp. Reorganization case, n. 90, infra.

55. Accounts; separation by parts of a system; severance studies.—[Vols. 10, 11, 13, 14, 16, 17]—Commission found that applicant is no longer under common control and management of Penn Central since that railroad is now involved in its own reorganization and cannot control applicant in any practical sense. Therefore, applicant is no longer required to include "off branch" revenues accruing to Penn Central in computing branch revenues for abandonment purposes. —Lehigh Valley Railroad Company Abandonment, 338 I.C.C. 793 (800-802).

61. Valuation; earnings.—[Vols. 11-18, 21].—Valuation of property of debtor railroad in reorganization is a function of the Commission; and review of its determination by the court is limited to question of whether conclusions of the Commission are in accordance with legal standards and supported by substantial evidence. From the Commission's decision, and the examiner's report on valuation, it is clear that careful consideration was given to all the relevant elements of value and, in particular, to the earning power of the property. Uncontradicted evidence adequately supports Commission conclusions that debtor lines' unprofitable operation has contributed a material share of operating losses of the New Haven system of which it is operated as an integral part (under lease) and that, after re-examining the plan in light of 49 USC§15(6), there was no justification for requiring the New Haven to make greater contributions to debtor's revenues. Projections of objector to the plan as to debtor's potential earnings are optimistic speculations and, in view of its experience and specialized knowledge, the Commission did not err in giving them no more weight than it did.—In re Boston & P. R. Corp., 260 F. Supp. 415 (419-20)*.

Also, because of challenge as to debenture's validity, the Commission did not err in approving reorganization plan on the assumption that debentures issued by debtor under provisions of its lease to the New Haven (which lessee later purchased from the holder and pledged to the United States as collateral) were valid; litigation of validity of the debentures undoubtedly would be protracted, and New Haven's current financial condition is such that unduly long litigation might defeat the whole plan. Approval of a plan does not require that validity of every disputed claim be litigated; certainly in instant case, it is best for interests of all the parties to compromise their differences; and Commission approval of a compromise treatment of the debentures was proper. The commission fixed a compromise value for all unadjucated claims which, being supported by the evidence and not contrary to law, is binding on the court. Procedure of treating the debentures as valid, as they appear on their face to be, but of paying the United States (pledgee) only part of face value of its claim, was proper; and, in light of plan's overall provisions, such treatment is equitable; approved.—Id., pp. 420-2.

Under §77(e), determination of value is a function of the Commission without necessity of court approval. Since valuation for reorganization purposes is made up of many imponderable factors which cannot be reduced to a fixed formula, precise findings as to value are not necessary. In addition to debtor's earning capacity, other relevant but less important factors of valuation include evidence of original cost of debtor's properties, cost of reproduction new and depreciated, present fair market value of debtor's real estate, potential liquidating value of debtor's non-operating property, debtor's strategic value to the New Haven system, and the agreement between New Haven and the stockholder's committee relating to price to be paid for stock.—Boston & P. R. Corp. Reorganization, 327 I.C.C. 10 (18, 20)*.

§77(c)(6), as amended, affords to a former lessor (such as debtor) the right to receive a just division of revenues accruing from operations over its line in accordance with criteria prescribed by §15(6) of the Interstate Commerce Act. Among other things, §15(6) requires that consideration be given to: (1) efficiency of operations of carriers concerned, (2) revenue requirements necessary to pay operating expenses, (3) taxes and fair return on transportation property of respective carriers, (4) importance of transportation service to public, and (5) whether any participating carrier is an originating, intermediate, or delivering carrier. After giving full effect to the prescribed criteria and applying them in light most favorable to debtor, record is convincing that debtor's present earnings result in substantial loss and that debtor has little or no earning power independent of the New Haven system.—Id., pp. 19-20.

66. Consolidation; acquisition; operation; construction; sale.—[Vols. 10-19, 21].—See Industrial Corp. of S. Hackensack, N. J. case, 49 USC §13(1), n. 3, supra.

68. Taxes.—[Vols. 10-19].—Prebankruptcy tax penalties are not favored, and the doctrine that such penalties, although liened, are not allowable in ordinary bankruptcy should be applicable in railroad reorganization. Also, the principle that bankrupt estate is subject to postbankruptcy penalties where trustee does not discharge postbankruptcy taxes is not applicable in railroad reorganization where trustees do not have ability to pay taxes and keep railroad operational.—In re New York, New Haven and Hartford Railroad Co., 304 F. Supp. 1121 (1134-5)*; district court remanded plan of reorganization of this railroad to the Commission for the purpose of modifying the plan's provisions for unilateral extension of certificate maturity; rate of interest; sinking fund; payment of counsel fees by installment notes; and the claims of mortgage holders.—Id., p. 1121.

90. Stock and stockholders.—[Vols. 10-17, 19, 21].—It is unnecessary to decide the exact nature of New Haven's relationship to debtor's public stockholders, since the New Haven and its trustees have been operating debtor's property, not as a fiduciary but pursuant to court order issued under the Bankruptcy Act. As operator, it has a duty to debtor to conduct such operations in a fair and impartial manner. Regardless whether New Haven is a fiduciary in relation to debtor's public stockholders, record does not indicate it will realize a profit out of considered transaction. Moreover, such a relationship, even if it exists, would not preclude New Haven from purchasing debtor's assets, subject to Commission's approval and confirmation by the court.—Boston & P. R. Corp. Reorganization, 327 I.C.C. 10 (22)*.

In addition to cash payment of $110 a share, all holders of debtor's stock will receive Certificates of Contingent Beneficial Interest (one CCBI for each share of stock), which enable stockholders to participate in net proceeds of the sale or other disposition of debtor's property in transactions of $500,000 or more. And, inasmuch as issuance of CCBI's to New Haven on the basis of 3,272 sinking fund shares and 40 treasury shares should help to expedite retirement of the new bonds, which was obviously a factor in the Government's decision to accept an amount less than that to which it was otherwise entitled as senior creditor, the plan is fair and equitable and in accordance with law.—Id., pp. 14, 16.

See also Central R. Co. of New Jersey Reorganization case, n. 135, below.

115. Counsel; compensation.—[Vols. 10-18, 21].—Counsel for indenture trustees and other creditor interests involved in the reorganization plan herein would not be required to accept installment notes rather than cash in payment of their fees.—In re New York, New Haven and Hartford Railroad Co., 304 F. Supp. 1121 (1126-27)*.

In fixing the maximum limits of compensation, Commission reviews time spent by counsel, nature and complexity of the work, need and relative importance in relation to other estate needs, benefit to estate, availability of estate funds, individuals performing the service, and fixed and variable expenses involved in rendering service.—New York, N.H. and H.R. Co. Reorganization, 342 I.C.C. 632 (639).

Maximum limits for compensation of petitioner herein set at $627, 017.90. Petitioning counsel and his associates rendered 8,756 hours of service in arbitration proceedings designed to determine the fair market value of a subsidiary railroad to be sold by debtor-railroad's estate which service resulted in a distinct and extraordinary benefit to said estate in that the final award exceeded the original offer for the subsidiary line by $14,038,896.—Boston & Maine Corp., Reorganization, 342 I.C.C. 760 (762-4).

Commission herein modified maximum limits of compensation and reimbursement for services rendered in connection with debtor railroad's reorganization previously set by the Administrative Law Judge. In basing counsel's compensation upon the standard of "wages of federal government attorneys" the Judge did not consider other factors, set forth in 228 ICC 499 (504), nor did he consider the economic risks facing private attorneys or the fringe benefits a government attorney receives.—Boston & P. R. Corp. Reorganization, 342 I.C.C. 859 (868-69).

However, the Commission affirmed the Judge's finding that activities of Mr. Herring to be legislative in nature, and as such, not compensable. We have previously found that such activities have insufficient connection with the proceedings and plan to warrant recompense from debtor's estate (see 295 ICC 169). Not only is the service itself remote to the proceeding and plan, but the value of such service, if any, would be nearly impossible to determine.—Id., p. 869-70.

Also, efforts by Mr. Rood for which compensation is sought have failed to produce any definable benefit to debtor's estate. Only where services have conferred measurable benefits to estate, and to success of reorganization, should estate bear the cost (see 434 F. 2d 804). Unsuccessful challenges to approval plan do not constitute a compensable benefit and are undertaken at challenger's risk. Efforts on behalf of a limited group of stockholders cannot be construed as increasing benefits to all parties of estate.—Id., p. 871-72.

The Commission takes the position that under §77 it is required to set the maximum limit of compensation for all outside counsel employed by railroads in reorganization. While recognizing inflationary pressures, the Commission has in general set maximum limits of compensation well below that requested by the parties, but sufficient to permit their retention.—Annual Report, 1975, pp. 14-15.

120. Reimbursement, expenses in general.—[Vols. 10-15, 17].—In determining maximum limits of allowance for compensation for services of, and expenses incurred by, interested parties in reorganization proceeding, value of services received by debtor's estate must be measured by the length of time taken to resolve bankrupt railroad's reorganization plan in addition to the final award itself. Moreover, the primary importance of individual parties is their contribution to the ultimate plan rather than their degree of opposition, which while justified, may have hampered the reaching of an equitable early solution. Thus, advantages achieved through prolonged proceedings should be counterbalanced by loss to the estate resulting from such prolongation.—Boston & P. R. Corp. Reorganization, 333 I.C.C. 614 (621-2)*.

135. Reorganization managers; proxies; protective committees.—[Vols. 10-18, 21].—An analysis of the Bankruptcy Act confirms conclusion expressed by the chief judge in the district court that Commission orders under §77(p) are reviewable only in the bankruptcy proceedings by the presiding judge. The Commission's determination respecting which committee or committees shall be allowed to participate in railraod reorganization proceedings in a representative capacity bears substantially, albeit indirectly, on the reorganization court's jurisdiction over debtor's property; and this suggests the propriety of review of such orders by that court. Commission order under §77(p) concerning who should have permission to represent and act for a particular class of bondholders in railroad reorganization proceeding is reviewable only by the bankruptcy court judge and not by a three-judge court; therefore, the district court's dismissal of plaintiff-appellant's suit for want of jurisdiction over the subject matter is affirmed.—Bondholders Protective Committee v. I.C.C., 432 F. 2d 268 (270, 271-2).

In view of divergence of interest existing in a number of important respects between railroad owning approximately 49 per cent of debtor's outstanding common stock and debtor; and, thus, railroad's interests as a stockholder differ from those of nonrailroad stockholders, it would be beneficial for nonrailroad stockholders to have representation in proceedings before the Commission or in courts in connection with reorganization of debtor. All circumstances considered, however, authority granted to applicants, as a protective committee, to solicit authorizations to represent nonrailroad stockholders, is made subject to certain conditions.—Central R. Co. of New Jersey Reorganization, 330 I.C.C. 769 (773, 776, 778).

Since the three members comprising applicant protective committee and the immediate interests they represent have substantial holdings in stockholder railroad and hold only 1 per cent of debtor's outstanding nonrailroad-owned stock, approval of authority is conditioned on: (1) enlargement of committee membership from three to at least five in order to permit a majority thereof to be members individually representing holdings in debtor which exceed in value similarly represented holdings in stockholder railroad; (2) modification of Protective Agreement to provide that committee membership shall be on application by any nonrailroad stockholder and approval thereof by the Commission alone; and (3) that the provision in proposed agreement authorizing a committee member to designate any other person—whether or not a stockholder or committee member—to act as his proxy be eliminated, since public interest required that committee action proceed from proposals approved by a majority of the committee members themselves, all of whom have had Commission approval.—Id., pp. 776-8.

In proceeding to determine maximum limits of allowance for compensation for services of, and expenses incurred by, interested parties in connection with bankrupt railroad's estate, since the Bankruptcy Act allows individual stockholders or other groups to act in their own interests and to be compensated for reasonable services of value, a protective committee (which, in order to be authorized by the Commission to represent creditors or security holders, must subject itself to limitations as to compensation and expenses) should have assurance that its itemized and necessary expenses will be substantially allowed along with fair compensation for its services of value; however, in the interest of avoiding excessive cost to debtor's estate, independent individuals or groups should not expect compensation or reimbursement for services which duplicate those of a protective committee representing the bulk of stockholders or creditors.—Boston & P. R. Corp. Reorganization, 333 I.C.C. 614 (622)*.

Section 208. (a), (b). Petition subsequent to certification of reorganization plan; Duty of Commission to report changes, etc., to court; Supplemental report and order, etc.—[Unchanged. See vol. 14, p. 11712, vol. 16, p. 12979.]

ANTITRUST ACTS

Chapter 1.—Title 15

SHERMAN ACT

Section 1. Trusts, etc., in restraint of trade illegal; exception of resale agreements; penalty.—[Amended by striking out the colon preceding the first proviso in the first sentence and all that follows down through the end of such sentence and inserting in lieu thereof a period. Public Law 94-145, 89 Stat. 801, Dec. 12, 1975. See vol. 4, p. 3032, vol. 11, p. 9756, vol. 17, p. 13696.]

Historical note, see vol. 4, p. 3032.

Notes of Decisions

Volume 4—p. 3033; Volume 7—p. 6024; Volume 10—p. 8395: Volume 11—p. 9756; Volume 12—p. 10568; Volume 13—p. 11206; Volume 14—p. 11715; Volume 15—p. 12332; Volume 16—p. 12983; Volume 17—p. 13696; Volume 18—p. 14772; Volume 19—p. 15999; Volume 21—p. 17817.

11. Purpose; interpretation generally.—[Vols. 4, 12, 13, 18, 19, 21].—As a part of the right to petition protected by the First Amendment, any carrrier has the right of access to administrative agencies and courts to defeat a competitor's application for motor carrier operating authority, and its purpose to eliminate applicant as a competitor may be implicit in such opposition; however, its First Amendment rights are not immunized from regulation when they are used as an integral part of conduct which violates the antitrust laws. Complaint alleges that petitioners combined to harass and deter respondents from having "free and unlimited" access to agencies and the courts, and to defeat that right by massive, concerted, and purposeful activities of the group; if those alleged facts are proved, a violation of the antitrust laws has been established; and if the end result is unlawful, it matters not that the means used in violation may be lawful. Case remanded for trial.—California Motor Transport Co. v. Trucking Unlimited, 404 U.S. 508 (511-16)*.

Sections 13-15. [Unchanged. Editorial comment, vol. 4, p. 3059.]

Section 16. Judgment in favor of Government as evidence; suspension of limitations.—[Section 16 was amended by P. L. 93-528, 88 Stat. 1706, December 21, 1974, by redesignating subsection (b) as (i) and inserting new subsections (b) through (h) immediately after subsection (a). Editorial comment, vol. 4. page 3059.]

(a) A final judgment or decree heretofore or hereafter rendered in any civil or criminal proceeding brought by or in behalf of the United States under the antitrust laws to the effect that a defendant has violated said laws shall be prima facie evidence against such defendant in any action or proceeding brought by any other party against such defendant under said laws or by the United States under section 15a of this title, as to all matters respecting which said judgment or decree would be an estoppel as between the parties thereto: *Provided*, That this section shall not apply to consent judgments or decrees entered before any testimony has been taken or to judgments or decrees entered in actions under section 15a of this title.

(b) Any proposal for a consent judgment submitted by the United States for entry in any civil proceeding brought by or on behalf of the United States under the antitrust laws shall be filed with the district court before which such proceeding is pending and published by the United States in the Federal Register at least 60 days prior to the effective date of such judgment. Any written comments relating to such proposal and any responses by the United States thereto, shall also be filed with such district court and published by the United States in the Federal Register within such sixty-day period. Copies of such proposal and any other materials and documents which the United States considered determinative in formulating such proposal, shall also be made available to the public at the district court and in such other districts as the court may subsequently direct. Simultaneously with the filing of such proposal, unless otherwise instructed by the court, the United States shall file with the district court, publish in the Federal Register, and thereafter furnish to any person upon request, a competitive impact statement which shall recite—

(1) the nature and purpose of the proceeding;

(2) a description of the practices or events giving rise to the alleged violation of the antitrust laws;

(3) an explanation of the proposal for a consent judgment, including an explanation of any unusual circumstances giving rise to such proposal or any provision contained therein, relief to be obtained thereby, and the anticipated effects on competition of such relief;

(4) the remedies available to potential private plaintiffs damaged by the alleged violation in the event that such proposal for the consent judgment is entered in such proceeding;

(5) a description of the procedures available for modification of such proposal; and

(6) a description and evaluation of alternatives to such proposal actually considered by the United States.

(c) The United States shall also cause to be published, commencing at least 60 days prior to the effective date of the judgment described in subsection (b) of this section, for 7 days over a period of 2 weeks in newspapers of general circulation of the district in which the case has been filed, in the District of Columbia, and in such other districts as the court may direct—

(i) a summary of the terms of the proposal for the consent judgment,

(ii) a summary of the competitive impact statement filed under subsection (b),

(iii) and a list of the materials and documents under subsection (b) which the United States shall make available for purposes of meaningful public comment, and the place where such materials and documents are available for public inspection.

(d) During the 60-day period as specified in subsection (b) of this section, and such additional time as the United States may request and the court may grant, the United States shall receive and consider any written comments relating to the proposal for the consent judgment submitted under subsection (b). The Attorney General or his designee shall establish procedures to carry out the provisions of this subsection, but such 60-day time period shall not be shortened except by order of the district court upon a showing that (1) extraordinary circumstances require such shortening and (2) such shortening is not adverse to the public interest. At the close of the period during which such comments may be received, the United States shall file with the district court and cause to be published in the Federal Register a response to such comments.

(e) Before entering any consent judgment proposed by the United States under this section, the court shall determine that the entry of such judgment is in the public interest. For the purpose of such determination, the court may consider—

(1) the competitive impact of such judgment, including termination of alleged violations, provisions for enforcement and modification, duration or relief sought, anticipated effects of alternative remedies actually considered, and any other considerations bearing upon the adequacy of such judgment;

(2) the impact of entry of such judgment upon the public generally and individuals alleging specific injury from the violations set forth in the complaint including consideration of the public benefit, if any, to be derived from a determination of the issues at trial.

(f) In making its determination under subsection (e), the court may—

(1) take testimony of Government officials or experts or such other expert witnesses, upon motion of any party or participant or upon its own motion, as the court may deem appropriate;

(2) appoint a special master and such outside consultants or expert witnesses as the court may deem appropriate; and request and obtain the views, evaluations, or advice of any individual, group or agency of government with respect to any aspects of the proposed judgment or the effect of such judgment, in such manner as the court deems appropriate;

(3) authorize full or limited participation in proceedings before the court by interested persons or agencies, including appearance amicus curiae, intervention as a party pursuant to the Federal Rules of Civil Procedure, examination of witnesses or documentary materials, or participation in any other manner and extent which serves the public interest as the court may deem appropriate.

(4) review any comments including any objections filed with the United States under subsection (d) concerning the proposed judgment and the responses of the United States to such comments and objections; and

(5) take such other action in the public interest as the court may deem appropriate.

(g) Not later than 10 days following the date of the filing of any proposal for a consent judgment under subsection (b), each defendant shall file with the district court a description of any and all written or oral communications by or on behalf of such defendant, including any and all written or oral communications on behalf of such defendant, or other person, with any officer or employee of the United States concerning or relevant to such proposal, except that any such communications made by counsel of record alone with the Attorney General or the employees of the Department of Justice alone shall be excluded from the requirements of this subsection. Prior to the entry of any consent judgment pursuant to the antitrust laws, each defendant shall certify to the district court that the requirements of this subsection have been complied with and that such filing is a true and complete description of such communications known to the defendant or which the defendant reasonably should have known.

(h) Proceedings before the district court under subsections (e) and (f) of this section, and the competitive impact statement filed under subsection (b) of this section, shall not be admissible against any defendant in any action or proceeding brought by any other party against such defendant under the antitrust laws or by the United States under section 4A of this Act nor constitute a basis for the introduction of the consent judgement as prima facie evidence against such defendant in any such action of proceeding.

(i) Whenever any civil or criminal proceeding is instituted by the United States to prevent, restrain, or punish violations of any of the antitrust laws, but not including an action under section 15a of this title, the running of the statute of limitations in respect of every private right of action arising under said laws and based in whole or in part on any matter complained of in said proceeding shall be suspended during the pendency thereof and for one year thereafter: *Provided, however,* That whenever the running of the statute of limitations in respect of a cause of action arising under section 15 of this title is suspended hereunder, any action to enforce such cause of action shall be forever barred unless commenced either within the period of suspension or within four years after the cause of action accrued.

Section 17.—[Unchanged, Editorial comment, vol. 4, p. 3059.]

Section 18. Acquisition by one corporation of stock of another.—[Unchanged. See vol. 15, p. 12334.]

See historical note to §21, vol. 21, p. 17822.

Section 20. Purchases by common carriers in the case of interlocking directors, etc.—[Unchanged. See vol. 4, p. 3067.]

Historical note, see vol. 4, p. 3068, vol. 18, p. 14727.

Notes of Decisions

Volume 4—p. 3068; Volume 7—p. 6033; Volume 10—p. 8398; Volume 12—p. 10571; Volume 16—p. 12984; Volume 17—p. 13698; Volume 19—p. 16007; Volume 21—p. 17821.

1. In general.—[Vols. 4, 7, 10, 12, 19, 21]. —Defendants' motion for summary judgment, in derivative action by Reading Co. stockholders seeking treble damages from Baltimore & O. R. Co. in connection with Reading's sale to B&O (whose directorates were interlocking) of notes and stock in joint terminal facility without competitive bidding, denied. Notwithstanding the claim that the Clayton Act would not have applied if transaction had been accomplished by some other method, defendant railroad's sale of the notes and stock to codefendant constituted "dealing in securities" within meaning of the statute. While "securities" is nowhere defined for Clayton Act purposes, notes and stock in question fall within any normal meaning of that word; moreover, they are "articles of commerce" in the sense of their transferability to third parties. The Clayton Act prescribes public bidding on certain dealings in securities, supplies, or other articles of commerce and, for purposes of §10 thereof, considered transaction is not different merely because the notes and stock were sold to owner of the other half of the terminal facility.—Klinger v. Rose, 291 F. Supp. 456 (458-9)*.

Provisions of the statute relating to purchases by common carriers having interlocking directorates are applicable to an interlock between two railroads; and competitive bidding requirements thereof can be complied with by railroads where, as in instant case, one dominates the other to extent of holding 42 percent of its common stock, if the dominated carrier alone obtains public bids. Also, though defendants argue that the statute is applicable only to securities issued by the carrier itself, legislative history is not convincing that word "securities" therein means only the carrier's own securities. Furthermore, since §4 of the Clayton Act provides a cause of action where a person has been injured by a violation of antitrust laws and the Supreme Court has held that

§10 is an "antitrust law" (361 US 173), §10 of that act may be enforced by a private suit under §4 thereof.—Id., pp. 459-61.

While Commission does not condone any unauthorized interlocking directorates, the mere possibility of a violation of the Clayton Act on that score does not warrant denial of merger application herein in view of the remedies available under the law (see 361 US 173).—Pennsylvania R. Co.—Merger—New York Central R. Co., 328 I. C. C. 304 (310)*.

Section 21. [*§11 as enacted.*] Enforcement provisions; procedure.—[Unchanged. See vol. 18, p. 14727.]

Historical notes, see vol. 18, p. 14732; vol. 21, p. 17822.

Notes of Decisions

Volume 4—p. 3072; Volume 7—p. 6034; Volume 10—p. 8399; Volume 18—p. 14732; Volume 19—p. 16008; Volume 21—p. 17822.

3. Jurisdiction of Federal Trade and Interstate Commerce Commissions.—[Vols. 4, 7, 19, 21].—Interstate Commerce Commission's dismissal of anti-trust complaint, filed by plaintiff during pendency of control proceedings under §5 of Interstate Commerce Act, was not an abdication of its responsibility under the Clayton Act, as plaintiff claims. The Commission's duties under the Clayton Act cannot be viewed apart from provisions of §5; and it could examine the transaction on carrier's application for authority to issue stock in connection with proposed control, and at that time discharge its duties under the Clayton Act. Moreover, principles of the National Transportation Policy are the dominant yardstick for measuring consolidations in the transportation industry; also, §5 of the Interstate Commerce Act authorizes the Commission to approve a transaction even though it might otherwise be contrary to goals of the anti-trust laws. Giving proper effect to necessary interaction between the Clayton and Interstate Commerce Acts, the Commission acted well within its discretion in dismissing the anti-trust complaint since matters raised were fully considered under correct legal standards in the control proceedings; an agency is not required to cover the same ground twice.—Interstate Investors, Inc. v. United States, 287 F. Supp. 374 (377, 389-90)*.

The doctrine of primary jurisdiction is properly applied in action alleging violations of the Clayton Act, due to one motor carrier's acquisition of stock of another, where there is a clear possibility that the regulatory agency may immunize the precise conduct on which the complaint is based, or where the agency is empowered to remedy anti-competitive practices under its own statute while immunizing some others (even though its powers do not extend precisely to the conduct in question), and is entrusted with enforcement of the antitrust laws themselves. Since, in addition to its regulatory powers over motor carriers, the Interstate Commerce Commission has been entrusted with enforcement of, and is required to enforce, the antitrust laws, that agency has primary jurisdiction of civil action alleging Clayton Act violations resulting from defendants' acquisition of stock in another motor carrier. Defendants' motion to dismiss for lack of jurisdiction, on ground that ICC has primary jurisdiction with respect to all questions involved, granted.—United States v. Navajo Freight Lines, Inc., 339 F. Supp. 554 (555, 565-6)*.

Chapter 6.—STANDARD TIME ACT

Section 261. Zones for standard time.—[Unchanged. See vol. 4, p. 3085.]

Historical notes, see vol. 4, p. 3085; vol. 11, p. 9758; vol 12, p. 10571; vol. 13, p. 11210; vol. 14, p. 11717; vol. 15, p. 12340; vol. 19, p. 16008; vol. 21, p. 17823.

Historical Note

Functions, powers, and duties under the Standard Time Act, 15 USC 261 and 265 were transferred from the Commission to the Department of Transportation by P.L. 89-670.

Notes of Decisions

Volume 4—p. 3086; Volume 7—p. 6040; Volume 10—p. 8402; Volume 11—p. 9758; Volume 12—p. 10572; Volume 14—p. 11718; Volume 15—p. 12340; Volume 17—p. 13699; Volume 19—p. 16009; Volume 21—p. 17824.

Section 262. Duty to observe standard time zones.—[Unchanged. See vol. 4, p. 3088, vol. 11, p. 9758.]

Notes of Decisions

Volume 4—p. 3088; Volume 10—p. 8404; Volume 14—p. 11718; Volume 15—p. 12341; Volume 19—p. 16013.

Sections 263-265.—[Unchanged. See vol. 4, p. 3088, vol. 14, p. 11719; vol. 4, p. 3090.]

Notes of Decisions

§264: Volume 4—p. 3089.

CRIMES AND CRIMINAL PROCEDURE

EMBEZZLEMENT AND THEFT

Chapter 31.—Title 18

Section 660. Carrier's funds derived from commerce; State prosecutions.—[Unchanged. See vol. 14, p. 11721.]

Cross reference, vol. 14, p. 11721, vol. 15, p. 12342, vol. 18, p. 14733.

EXPLOSIVES AND OTHER DANGEROUS ARTICLES

Chapter 39.—Title 18

Section 831. Definitions.—[Unchanged. See vol. 19, 16014.]

Section 832. Transportation of explosives, radioactive materials, etiologic agents, and other dangerous articles.—[Unchanged. See Vol. 19, p. 16015.]

Notes of Decisions

Former §382: Volume 4—p. 3096.

Section 833. Marking packages containing explosives and other dangerous articles.—[Unchanged. See vol. 19, p. 16016.]

Section 834. Regulations by Interstate Commerce Commission.—[Unchanged. See vol. 19, p. 16016.]

Historical Note

Powers, functions, and duties under 18 USC 831-835 were transferred from the Commission to the Department of Transportation by P. L. 89-670, October 15, 1966. [See also vol. 14, p. 11724; vol. 15, p. 12343; vol. 16, p. 12986; vol. 17, p. 13700; vol. 18, p. 14734; vol. 21, p. 17825.

Notes of Decisions

(Former §383): Volume 4—p. 3099; Volume 7—p. 6072; Volume 10—p. 8419; Volume 11—p. 9763; Volume 13—p. 11212; (Former §835); Volume 14—p. 11724; Volume 15—p. 12843; Volume 16—p. 12987; Volume 17—p. 13701; Volume 18—p. 14734; Volume 19—p. 16017; Volume 21—p. 17825.

12. Violations; penalties.—[Vols. 17, 19, 21].—Violations of safety regulations prescribed in 329 ICC 376 in respect to transportation of explosives and other dangerous articles by private carriers shall be prosecuted as violations of the Interstate Commerce Act only, although statutory authority to promulgate such rules is conferred by both the Transportation of Explosives Act and the Interstate Commerce Act. This modification will equalize the treatment as between private and regulated. carriers since the regulated carriers are not parties to this proceeding and consequently the Commission has no basis herein for imposing against them the heavier penalties provided under the Transportation of Explosives Act.—Transportation of Explosives—Private Motor Carriers, 329 I.C.C. 411 (413).

15. Motor-vehicle transportation.—[Vols. 10, 11, 14-17, 19, 21].—Provisions of the Explosives Transportation Act apply to all carriers engaged in interstate commerce, including private carriers, and their employees; hence the Commission's regulations governing transportation of explosives are binding on such carriers and their employees. When private carrier's agent and driver left a trailer laden with a cargo of nitro-carbo-nitrate, dynamite, and blasting caps totally unattended and without explosives placards adjacent to a public highway, upon discovering that a trailer tire had become heated, both failure to maintain the signs on the vehicle and leaving it unattended were clear violations of those regulations. The circumstances and severe consequences of the ensuing fire and explosion demonstrate the extreme importance of adopting measures, in the public interest, designed as fully as possible to avoid the circumstances, conditions, and practices present in the instant case.—Accident Near Marshalls Creek, Pa., 96 M.C.C. 783 (794-5).

Testimony of explosive experts justifies conclusion that nitro-carbo- nitrate should be reclassified as an explosive for purposes of transportation; it is used as a blasting agent and when transported is necessarily accumulated in considerable volume in a vehicle which provides confinement. Commercial vehicles are frequently involved in fires, some of which are extremely hard to combat, and conclusion is inescapable that N-C-N should no longer be classified merely as an oxidizing material, but should be clearly designated an explosive and subjected to those regulatory requirements which now are or may in future be prescribed for transportation of explosives. Moreover, it is clear that transportation of any explosive or blasting agent by motor vehicle is constantly subject to fire hazards from several potential sources, including the tires of the vehicle itself. These facts amply justify implementation, after consultation with interested parties, of the requirements relative to vehicles and drivers recommended by the Chief of the Section of Motor Carrier Safety.—Id., p. 795.

See also Explosives Supply Co., Inc., Exemption Application case, §204(a)(4a), n. 1, supra.

Section 835. Administration.—[Unchanged except that, by act of Oct. 15, 1970, Public Law 91-452, title II, §222, subsection (b) was amended by striking the third sentence thereof. See vol. 19, p. 16019.]

Part V.—IMMUNITY OF WITNESSES

Sec.
6001. Definitions.
6002. Immunity generally
6003. Court and grand jury proceedings.
6004. Certain administrative proceedings.
6005. Congressional proceedings.

Historical Note

By act of Oct. 15, 1970, Public Law 91-452, §260, the provisions of Title 18 U.S.C., Part V, added by title II of the act, and amendments and repeals made by title II, take effect on the sixtieth day following date of enactment; however, no amendment to or repeal of any provision of law under title II affects any immunity to which any individual is entitled under such provision by reason of any testimony or information given before that day. Also, §259 of the act provides that, in addition to statutes specifically amended or repealed by title II, any other provision of law inconsistent with the provisions of Part V is to that extent amended or repealed.

Section 6001. Definitions.—As used in this part—(a) "agency of the United States" means any executive department as defined in section 101 of title 5, United States Code, a military department as defined in section 102 of title 5, United States Code, the Atomic Energy Commission, the China Trade Act registrar appointed under 53 Stat. 1432 (15 U.S.C. sec. 143), the Civil Aeronautics Board, the Federal Communications Commissions, the Federal Deposit Insurance Corporation, the Federal Maritime

Commission, the Federal Power Commission, the Federal Trade Commission, the Interstate Commerce Commission, the National Labor Relations Board, the National Transportation Safety Board, the Railroad Retirement Board, an arbitration board established under 48 Stat. 1193 (45 U.S.C. sec. 157), the Securities and Exchange Commission, the Subversive Activities Control Board, or a board established under 49 Stat. 31 (15 U.S.C. sec. 715d);

(2) "other information" includes any book, paper, document, record, recording, or other material;

(3) "proceeding before an agency of the United States" means any proceeding before such an agency with respect to which it is authorized to issue subpenas and to take testimony or receive other information from witnesses under oath; and

(4) "court of the United States" means any of the following courts: the Supreme Court of the United States, a United States court of appeals, a United States district court established under chapter 5, title 28, United States Code, the District of Columbia Court of Appeals, the Superior Court of the District of Columbia, the District Court of Guam, the District Court of the Virgin Islands, the United States Court of Claims, the United States Court of Customs and Patent Appeals, the Tax Court of the United States, the Customs Court, and the Court of Military Appeals.

Section 6002. Immunity generally.—Whenever a witness refuses, on the basis of his privilege against self-incrimination, to testify or provide other information in a proceeding before or ancillary to—

(1) a court or grand jury of the United States,

(2) an agency of the United States, or

(3) either House of Congress, a joint committee of the two Houses, or a committee or a subcommittee of either House, and the person presiding over the proceeding communicates to the witness an order issued under this part, the witness may not refuse to comply with the order on the basis of his privilege against self-incrimination; but no testimony or other information compelled under the order (or any information directly or indirectly derived from such testimony or other information) may be used against the witness in any criminal case, except a prosecution for perjury, giving a false statement or otherwise failing to comply with the order.

Section 6003. Court and grand jury proceedings.—(a) In the case of any individual who has been or may be called to testify or provide other information at any proceeding before or ancillary to a court of the United

States or a grand jury of the United States, the United States district court for the judicial district in which the proceeding is or may be held shall issue, in accordance with subsection (b) of this section, upon the request of the United States attorney for such district, an order requiring such individual to give testimony or provide other information which he refuses to give or provide on the basis of his privilege against self-incrimination, such order to become effective as provided in section 6002 of this part.

(b) A United States attorney may, with the approval of the Attorney General, the Deputy Attorney General, or any designated Assistant Attorney General, request an order under subsection (a) of this section when in his judgment—

(1) the testimony or other information from such individual may be necessary to the public interest; and

(2) such individual has refused or is likely to refuse to testify or provide other information on the basis of his privilege against self-incrimination.

Section 6004. Certain Administrative proceedings.—(a) In the case of any individual who has been or who may be called to testify or provide other information at any proceeding before an agency of the United States, the agency may, with the approval of the Attorney General, issue, in accordance with subsection (b) of this section, an order requiring the individual to give testimony or provide other information which he refuses to give or provide on the basis of his privilege against self-incrimination, such order to become effective as provided in section 6002 of this part.

(b) An agency of the United States may issue an order under subsection (a) of this section only if in its judgment—

(1) the testimony or other information from such individual may be necessary to the public interest; and

(2) such individual has refused or is likely to refuse to testify or provide other information on the basis of his privilege against self-incrimination.

Section 6005. Congressional proceedings.—(a) In the case of any individual who has been or may be called to testify or provide other information at any proceeding before either House of Congress, or any committee, or any subcommittee of either House, or any joint committee of the two Houses, a United States district court shall issue, in accordance with subsection (b) of this section, upon the request of a duly authorized representative of the House of Congress or the committee concerned, an order requiring such individual to give testimony or provide other information which he refuses to give or provide on the basis of his privilege against self-incrimination, such order to become effective as provided in section 6002 of this part.

(b) Before issuing an order under subsection (a) of this section, a United States district court shall find that—

(1) in the case of a proceeding before either House of Congress, the request for such an order has been approved by an affirmative vote of a majority of the Members present of that House;

(2) in the case of a proceeding before a committee or a sub-committee of either House of Congress or a joint committee of both Houses, the request for such an order has been approved by an affirmative vote of two-thirds of the members of the full committee; and

(3) ten days or more prior to the day on which the request for such an order was made, the Attorney General was served with notice of an intention to request tne order

(c) Upon application of the Attorney General, the United States district court shall defer the issuance of any order under subsection (a) of this section for such period, not longer than twenty days from the date of the request for such order, as the Attorney General may specify. (Oct. 15, 1970, Public Law 91-452, title II, 84 Stat. 926-932.)

Historical notes; see vol. 14, p. 11726; vol. 15, p. 12344.

THE SUPREME COURT

Chapter 81.—Title 28

Section 1253. Direct appeals from decisions of three-judge courts.—[Unchanged. See vol. 14, p. 11727.]

Notes of Decisions

Volume 15—p. 12345; Volume 19—p. 16020; Volume 21—p. 17828.

2. Maintenance of status quo pending appeal.—[Vols. 4, 7, 11, 15, 19.] The three-judge district court having denied a stay pending appeal of its preliminary injunction against implementation of Commission orders approving interim 2.5 percent surcharge on nearly all rail freight charges, to extent the surcharge relates to goods shipped for recycling purposes, the criteria for granting a stay of that court's judgment are stringent —at least when the necessity for a stay turns upon a refined evaluation of its effect. The district court's action cannot be equated with an abuse of discretion because it decided that there was a danger to the environment (if railroads were allowed to collect the surcharge on recyclable goods) outweighing the loss of income and consequent financial threat to the railroads. Therefore, notwithstanding doubts as to correctness of that court action, the circuit justice, acting alone on requested stay of the preliminary injunction, defers to the three-judge court's collective evaluation and balancing of the equities. Applications for stay pending appeal, denied.—Aberdeen & R.R. Co. v. Students Challenging Regulatory Agency Procedures (SCRAP), 409 U.S. 1207 (1217-8)*.

Section 1254. Courts of appeals; certiorari; appeal; certified questions.—[Unchanged. See Vol. 14, p. 11727.]

Notes of Decisions

Volume 15—p. 12345; Volume 16—p. 12989; Volume 17—p. 13704; Volume 18—p. 14735; Volume 19—p. 16021.

COURTS OF APPEALS

Chapter 83.—Title 28

Section 1291. Final decisions of district courts.—[Unchanged. See vol. 18, p. 14736.]

Section 1292. Interlocutory decisions.—[Unchanged. See vol. 18, p. 14736.]

Notes of Decisions

Volume 14—p. 11728; Volume 15—p.12345; Volume 16—p. 12889; Volume 17—p. 13704; Volume 18—p. 14737; Volume 19—p. 16021; Volume 21—p. 17829.

1. Appeals to Court of Appeals.—[Vols. 7, 10, 13-19, 21].—In appeal, by creditor of railroad currently undergoing reorganization, from district court order granting petition of debtor's trustee for authority to appoint officer of another railroad as operating officer of debtor's estate, the court of appeals does not have jurisdiction to review the order of Commission granting appellant-creditor permission to intervene in proceeding seeking its authority to hold the position as debtor's officer, but denying its petition for reconsideration of Commission order granting that authority.—In re Central R. Co. of New Jersey, 411 F. 2d 1178 (1180).

DISTRICT COURTS; JURISDICTION

Chapter 85.—Title 28

Section 1331. Federal question; amount in controversy; costs.—[Unchanged. See vol. 18, p. 14737.]

Notes of Decisions

Volume 16—p. 12990; Volume 17—p. 13704; Volume 18—p. 14738; Volume 19—p. 16022; Volume 21—p. 17830.

Section 1332. Diversity of citizenship; amount in controversy; costs.—[Unchanged. See vol. 18, p. 14738; vol. 21, p. 17833.]

Notes of Decisions

Volume 4—p. 3121; Volume 11—p. 9767; Volume 12—p. 10576; Volume 13—p. 11214; Volume 14—p. 11729; Volume 15—p. 12346; Volume 16—p. 12991; Volume 17—p. 13705; Volume 18—p. 14379; Volume 19—p. 16023; Volume 21—p. 17833.

3. Citizenship of parties and amount in controversy.—[Vols. 4, 11-19, 21].—See also Land O'Lakes, Inc. v. United-Buckingham Frgt. Lines, Inc. case, 28 USC §1336, n. 2.

Inasmuch as, in shipper's diversity action against a railroad and a motor carrier, liability is asserted against both defendants in all four claims for damages to fresh meat shipments (though no one claim exceeds $10,000), aggregate value of the claims against defendants jointly is the proper measure for determining whether the amount in controversy requirement of the statute is met. In instant case, therefore, since aggregate amount of plaintiff's claims is more than $16,000, the district court had subject matter jurisdiction.—Litvak Meat Co. v. Baker, 446 F. 2d 329 (333-4).

There being diversity of citizenship of the parties, the district court has jurisdiction in local cab company's action to enjoin operation of interstate carrier's limousine service on the grounds of Moisant airport at New Orleans, following removal thereof from State court where suit was filed. While defendant urges that a three-judge court should be convened, pursuant to 28 USC §§2123-2325, the Commission order granting him passenger authority has not been attacked directly by any party, nor has the United States been sued or made a party to the action. Also, collateral attacks cannot be permitted; and until held invalid, after proper attack, the Commission's order must be respected by the court. Therefore, in the present state of the record, the case is not one for a statutory court.—Toye Bros. Yellow Cab Co. v. Irby, 305 F. Supp. 905 (907)*.

Section 1334. Bankruptcy matters and proceedings.—[Unchanged. See vol. 16, p. 12991.]

Section 1336. Interstate Commerce Commission's orders.—(a) Except as provided by Act of Congress, the district courts shall have jurisdiction of any civil action to enforce, in whole or in part, any order of the Interstate Commerce Commission, and to enjoin or suspend, in whole or in part, any order of the Interstate Commerce Commission for the payment of money or the collection of fines, penalties, and forfeitures. (Paragraph (a) was amended by P.L. 93-584, 88 Stat. 1917, Jan. 2, 1975.) [See vol. 14, p. 11730; vol. 21, p. 17835.]

Notes of Decisions

Volume 15—p. 12346; Volume 16—p. 12991; Volume 17—p. 13706; Volume 18—p. 14739; Volume 19—p. 16023; Volume 21—p. 17835.

2. Construction and interpretation.—[Vols. 15-19, 21.]

District court holding that Commission decisions terminating investigations of passenger train discontinuances under 49 USC §13a are not "orders" within meaning of the statute, on the theory that since "the statute is self-implementing," only an "order" requiring action is reviewable, reversed. Whether the Commission should investigate a §13a(1) discontinuance is a matter within its discretion, which is not reviewable; but once it undertakes to investigate, it is required by law to make a written report therein and, since decision to investigate indicates existence of a substantial question under the legal standards, the Commission's report deals with the merits. Technical form of the order is irrelevant when, in each case, the Commission is deciding the merits. Therefore, in accordance with 307 US 125, Commission orders discontinuing its investigations in two §13a(1) proceedings are judicially reviewable on the complaint of aggrieved persons.—City of Chicago v. United States, 396 U.S. 162 (163-7)*.

Amendment to the statute, which provides that when a district court or the court of claims refers a question to the Commission for determination, the referring court shall have exclusive jurisdiction of a civil action to enforce, enjoin, set aside, or annul Commission order arising from the referral, has resulted in more modern procedure for judicial review of questions involving primary jurisdiction of the Commission and referred to it for preliminary determination. Since no changes were made in substantive law except to fix jurisdiction and venue in the referring court, the prerequisites for judicial review remain the same; when a mat-

ter has been referred to the Commission, it must be prosecuted there until a final order is issued; and only after administrative remedies have been exhausted may the case proceed to judgment in the court.—McLean Trucking Co. v. United States, 387 F. 2d 657 (659-60)*.

After motor carrier's action for recovery of freight charges allegedly due on government shipments was commenced in the court of claims, an issue requiring interpretation of items in the governing tariff was referred to the Commission for determination; the Commission decided the question in carrier's favor and denied the Government's subsequent petition for reconsideration; thus, prerequisites for judicial review having been met, matter is properly before the court of claims on the Government's motion to enjoin, set aside and suspend the Commission order. Words "civil action" in the amended statute do not require that party challenging the order institute a new action against the Commission in the referring court, and pursue it to conclusion, before reopening the original case; Congress used the term "civil action" simply to distinguish it from a "criminal action" and nothing more should be inferred therefrom; thus, challenging party need only file in the court a pleading setting forth the requested action and specifically stating the grounds therefor.—Id., pp. 659, 660.

Prior to amendment of the statute, however, a suit to set aside a Commission order in judicial reference cases was ordinarily filed against the United States and the Commission and, when the United States brought suit to set aside a Commission order, the agency was customarily named as defendant. Instant case is the first one brought under the new statutory pattern and, although the Commission was invited to (and did) file a brief, it is the court's opinion that the Commission is a necessary party whenever its decision on a referred case is attacked. Therefore, the court of claims will not entertain a motion or other action to set aside an order of the Commission unless it is made a party, duly served, and thus given an opportunity to defend its decision; in all such cases, challenging party should follow the procedure in the court's Rule 23 and as provided therein, a motion to make the Commission a party may be filed with the pleading attacking its decision.—Id., p. 660.

The Commission's primary jurisdiction having been invoked on the question of the meaning of "destination" in Note 1 to minimum-charge rule in carrier's tariff, the scope of the court of claims' review is narrow. As the courts have often held, unless the Commission's findings are contrary to law, arbitrary, capricious, or unsupported by substantial evidence, they may not be set aside; also, the judicial function is exhausted when a rational basis for the Commission's conclusions is found. After reviewing the record and weighing defendant's contentions in light of those well established precepts, the court finds a rational basis for the Commission's conclusions and findings on the question referred; accordingly, carrier is entitled to recover freight charges on considered government shipments in accordance with the decision of the Commission.—Id., pp. 660-2.

Legislative history of the Urgent Deficiencies Act, which abolished the Commerce Court and transferred its jurisdiction to three-judge district courts, makes clear that purpose thereof was to provide a forum for expeditious review of Commission orders of national or general public importance. Thus, since Commission order under §77(p) of the Bankruptcy Act denying plaintiff-appellant (and granting rival committee) permission to solicit authorizations to represent and act for a class of bondholders in railroad reorganization proceeding was not one possessing national or general public significance, it was reviewable only by the single judge presiding in the bankruptcy court and not by a three-judge court under the Urgent Deficiencies Act. Accordingly, contrary to appellant's argument that, under express terms of 28 USC §§1336(a), 2321 and 2325, the order should be reviewed by a three-judge court, the district court's dismissal of the action for want of jurisdiction over the subject matter is affirmed.—Bondholders Protective Committee v. I.C.C., 432 F. 2d 268 (269, 270-1).

The statute explicitly gives district courts jurisdiction to enforce orders of the Commission and, since rights of plaintiffs, if any, are founded on such an order, the court has jurisdiction of subject matter of suit by members of railroad-employee union to recover damages allegedly resulting from defendant railroad's alleged violation of employee-protective conditions imposed by the Commission in order approving defendant's purchase of "Sandusky Line" of Connecting Ry. Co., and to enjoin further violations of the Commission's order. Since union members had attempted in vain to invoke arbitration clause of agreement between the railroad and the union, plaintiffs were not required to exhaust any other remedies before bringing the court action; the doctrine of exhaustion of administrative remedies presupposes the existence of adequate efficient remedies. However, allegations concerning whether plaintiffs intended to accept amounts already received as settlement of (or as partial payment of) their claims under the employee-protective conditions raised substantial issues of fact which preclude issuance of summary judgment.—Nemitz v. Norfolk & W. Ry. Co., 287 F. Supp. 221 (229-31)*.

District courts are not courts of general jurisdiction, and have only such powers as Congress has prescribed; moreover, jurisdiction of district courts is never presumed but must appear affirmatively on the record. Congress has entrusted interstate transportation matters to the Commission, and district courts' role is limited to enforcing, suspending, enjoining, annulling, or setting aside the Commission's orders. Thus, when State court common-law action for breach of contract between two carriers had been removed to the district court, and defendant's removal petition showed it apparently would raise invalidity of the contract under Commission regulations as a defense, but there was no existing Commission order on the contract in question, federal district court had no jurisdiction in the matter. Action remanded to State court.—Robertson Motor Freight, Inc. v. Brady Motorfrate, Inc. (Pa.), 287 F. Supp. 449 (451-2).

The court's task in reviewing actions of the Commission is limited and well-defined. If assailed orders are within scope of statutes which the Commission is empowered to administer and enforce, the court may not set aside or modify them, even though it might have decided differently originally and even though the orders may be against weight of the evidence. More than substantial evidence of record supports the Commission's conclusion that considered "cast iron buttons" (having average iron content of 82 percent) are iron bearing slag, properly classified as "iron or steel scrap, having value for remelting purposes only" under governing rail tariffs, and not slag bearing recoverable iron classifiable as "slag" as plaintiff contended. Courts should pay great deference to such findings since they involve not only the exercise of Commission expertise but include questions of judgment governing the interpretation of classification. The Commission's findings are supported by the record and its conclusions have a rational basis and are in accord with applicable law; orders complained of, sustained.—Price-Watson Company v. I.C.C., 287 F. Supp. 872 (874-6)*.

Language of exclusive jurisdiction and venue statutes is broad enough to apply to suits to set aside Commission orders entered following notice and stay mechanism embodied in 49 USC §322(b)(3), and nothing peculiar to §322(b)(2) "self-help" suits is persuasive that those statutes should not apply. And when the Commission notified the court, in which munitions carriers filed a "self-help" suit to enjoin heavy hauler's carriage of explosives, that it would consider question of the scope of heavy hauler's authority, thus requiring a stay of the court suit, the issue so raised was "referred" to the Commission and the order deciding it was one "arising from such referrals," within meaning of the statutes. Only difference in methods of referring issues to the Commission prior to, and after, 1965 amendment to §322(b) is procedural; and considerations which prompted 1964 enactment of the exclusive jurisdiction and venue statutes have no relation to procedural nicety of whether the court or Commission takes the initiative in having an issue first decided by the Commission.—Leonard Bros. Trucking Co. v. United States, 301 F. Supp. 893 (896-8)*.

Therefore, since one of the two Commission orders under consideration in instant action was its decision on an issue "referred" to the Commission by the Missouri district court, and jurisdiction and venue are proper only in that district, plaintiff's suit will be transferred to that court to the extent it seeks to set that order aside; but the Florida court retains jurisdiction and venue in the action insofar as it seeks to set aside Commission order in another, but interrelated, proceeding which does not appear to fall within the policies underlying exclusiveness of jurisdiction and venue under governing statutes. However, because of interrelationships of the two orders and the questions to be determined by the Missouri court upon the partial transfer of instant action, a stay of the proceedings remaining in the Florida court pending final outcome of parallel litigation in the court to which action is transferred, in part, is deemed proper.—Id., pp. 898-9.

Though the Commission has wide statutory discretion in granting motor carrier temporary authority, and the Administrative Procedure Act precludes judicial review of action committed to agency discretion, in view of the district courts' jurisdiction over actions involving "any order" of the Commission, judicial review may be exercised in suit to enjoin and set aside Commission orders granting temporary authority to defendant carrier. However, scope of the court's review is limited; and, as the record is sufficient if there is any evidence to support the order, the court need find only some evidence in the record, so it cannot be said the Commission acted arbitrarily and capriciously or abused its discretion; substantial evidence is simply not required to uphold grant of temporary authority. Some evidence in the record supports the Commission's findings of an "immediate and urgent need" for defendant carrier's service "within a territory having no carrier service capable of meeting such need," and its decision was not arbitrary, capricious, or contrary to law; sustained.—Superior Trucking Co. v. United States, 302 F. Supp. 257 (259-62,266)*.

The 1964 amendment to §§1336 and 1398, giving the referring court exclusive jurisdiction to review Commission order resulting from the referral, was designed to overcome "cumbersome and inefficient" procedure under prior statutory provisions for judicial review of Commission orders by a three-judge court or, as stated in 387 F. 2d 651, to provide a more streamlined procedure for judicial review of questions that involve primary jurisdiction of the Commission and are referred to it for preliminary determination; thus, since the amendment was enacted, the court of claims or a district court referring an issue to the Commission for resolution, rather than a three-judge court, has reviewed the Commission's order resulting from the referral because of its exclusive jurisdiction. Therefore, plaintiff's action for review by the three-judge court of Commission reports and orders, deciding issues referred to it for initial determination by a one-judge district court, is remanded to the referring court for disposition.—Keller Industries, Inc. v. United States, 304 F. Supp. 852 (854-5).

Where motor carriers filed detailed schedule of proposed new small shipment rates to which shippers made extremely specific objections, where Commission suspended such tariff for the full statutory period and conducted a detailed investigation which found that such rates were just and reasonable, and where such findings were not subject to further challenge before Commission in a reparation proceeding, such report and order were subject to judicial review.—National Small Shipments Traf. Conf. v. United States, 321 F. Supp. 500 (500)*.

It is reasonably clear from provisions of the Amtrack Statute (P.L. 91-518) that neither a court nor the Commission has jurisdiction to review the basic system of intercity passenger trains to be operated by the Corporation which, presumably. includes designation of specific "intercity" trains within the basic system; but whether the Commission or a court has jurisdiction to review a Corporation determination that "new service" trains are intercity is difficult to determine from language of that statute. However, it is certainly essential that uniform standards be applied in determining whether a given train is an intercity, or a commuter train; and the Commission has already made such determinations in at least one decision. Moreover, it is important that standards to be applied for jurisdictional purposes should be consistent with those applied in "avoidable loss" determinations under that statute, a matter that is expressly within the Commission's jurisdiction in event of a dispute; and categorization of train service in this context is obviously within the Commission's expertise.—In re Penn Central Transp. Co., 329 F. Supp. 572 (576-7).

Furthermore, in litigation involving discontinuance of intercity passenger service by railroad undergoing reorganization and bankruptcy which, in accordance with orders of the court, entered into an Amtrack contract and has petitioned for leave to discontinue operation of all its intercity passenger trains, the parties indicate no objection to the court's referring jurisdictional issues now before it to the Commission for initial study and determination; and §1336(b) clearly contemplates such references. Accordingly, the question of whether debtor's passenger trains between Philadelphia and Harrisburg, Pa., and between Philadelphia and New York City (all of which are included in the Amtrack contract) would be operated as intercity trains by the Corporation, or as commuter trains by debtor railroad, will be referred to the Commission for initial determination. No deadline for such initial determination is fixed; however, since debtor will be required to operate some lines at a loss in the interim, a prompt decision should be made.—Id., pp. 577-8.

Despite defendants' contentions to the contrary, the court has jurisdiction of shipper's suits against 19 motor carriers seeking a refund of freight charges ordered by the Commission by virtue of 49 USC §§16(2), 304a, and 305(g) and 28 USC §§1336 and 1398. While there is no diversity of citizenship in at least some of the cases and the prayers for relief in none of the suits reaches the jurisdictional amount of $10,000, a suit to enforce or recover on the basis of a Commission order or statute needs no jurisdictional amount.—Land O'Lakes, Inc. v. United-Buckingham Frgt. Lines, Inc., 351 F. Supp. 103 (108-9).

The scope of judicial review does not extend to matters within primary jurisdiction of the Commission. In suit to enforce Commission order authorizing abandonment of 18-mile segment of debtor railroad's line, conditioned on sale of the properties involved within 60 days "to any responsible person for the purpose of continued operation," the court is not reviewing question of whether the Commission abused its discretion in permitting the abandonment; the only question presented for review is construction of the meaning of the condition imposed by the Commission. The sole issue involved—whether plaintiff comes within the purview and ambit of that condition—is not beyond the court's understanding unassisted by expert guidance; and resolution thereof does not depend upon expert knowledge in the transportation industry. Thus, construction of the condition present a purely legal issue for the court's determination.—Reed v. Meserve, 353 F. Supp. 141 (144-5).

Clear purpose of the Commission, in imposing the condition, was to preserve the line as an operating railroad and to prevent its dismantlement; and nowhere in the proceedings is it suggested that a sale to plaintiff of northern 8.5-mile segment of the line for planned operation of a scenic excursion railroad providing passenger service would not be "for the purpose of continued operation." Also, plain meaning of the words "continued operation" is to continue operation of a railroad over the abandoned line; if the Commission had intended that phrase to mean both a freight and passenger operation, it could have used those words to signify such intention. Therefore, since plaintiff would be a "responsible person" acquiring a segment of the abandoned rail line "for the purpose of continued operation." within meaning of the condition attached to the Commission order permitting abandonment, it is entitled to preferential consideration for a 60-day period from date of the court's decision before defendant trustees may proceed with free transfer of title to the segment of line in question.—Id., pp. 147-8.

Under its duty to prevent unlawful discrimination, power of Commission would extend to any person used by any common carrier, subject to Commission jurisdiction, to implement a pattern of unlawful discrimination prohibited by the Act, but such authority would not extend to authorizing Commission to regulate persons or transactions which are not shown to involve unlaw-

ful discrimination.—Middle Atlantic Conference v. United States, 353 F. Supp. 1109 (1125)*.

Section 1337. Commerce and anti-trust regulations.—[Unchanged. See vol. 15, p. 12347.]

Notes of Decisions

Volume 4—p. 3121; Volume 7—p. 6080; Volume 10—p. 8425; Volume 11—p. 9767; Volume 12—p. 10576; Volume 13—p. 11214; Volume 14—p. 11729; Volume 15—p. 12347; Volume 16—p. 12991; Volume 17—p. 13706; Volume 18—p. 14740; Volume 19—p. 16026; Volume 21—p. 17836.

1. Suits arising under laws regulating commerce.—[Vols. 4, 7, 10, 12, 13, 15-19, 21].—See also Nemitz v. Norfolk & W. Ry. Co. case, §1336, n. 2, supra.

Federal courts have only the jurisdiction conferred on them by Congress; subject matter jurisdiction cannot be conferred by consent. Thus, while jurisdiction is not challenged, the trial court lacked subject matter jurisdiction of railroad's suit against motor carrier for storage and detention charges incurred in joint transportation of freight (in plan I TOFC service at motor carrier's tariff rates for entire movement) as provided in an agreement between the carriers for division of joint transportation charges. Such division agreements are not tariffs and are not treated as such by the Commission, and the railroad has not tariff on file which authorizes collection of storage and detention charges claimed; therefore, plaintiff's cause of action rests solely on the divisional agreement, not upon interpretation of a statute regulating commerce or any Commission tariff or regulation. Contract agreement of the parties resulted from negotiations and determines the basis of divisions between them; §1337 confers no jurisdiction of private contract actions such as instant suit. Case remanded to lower court with direction to dismiss for want of jurisdiction.—Baker v. Riss & Co., 444 F. 2d 257 (258-60)*.

Plaintiffs' argument, that unique provisions of rail "rent-a-train" tariff in issue render it "not a tariff" and thus, *per se*, illegal, is obviously an ingenious but invalid attempt to circumvent provisions of Interstate Commerce Act which give that Commission primary jurisdiction to determine legality of any rate tariff. Even accepting the idea that, since the complaint presents a controversy arising under a law regulating commerce, there might be theoretical concurrent jurisdiction because of §1337, the court should not take jurisdiction over action seeking a court decree holding the tariff to be illegal, *per se*, and compelling the Commission to strike it from Commission files. To do so would by-pass the administrative plan established by Congress, which gives the Commission first consideration of rate-making matters, subject thereafter to judicial review; therefore, though a scholarly argument can be made that such power exists, the court is unwilling to assert the power to take jurisdiction. Complaints dismissed.—Rardin Grain Co. v. Illinois Central R. Co., 288 F. Supp. 813 (815-6)*.

A federal court must be assured of its jurisdiction over subject matter involved before it may decide a case brought before it; and though plaintiff challenges neither the removal of its suit from state to federal court, nor the supporting jurisdiction, the court has a duty on its own to examine its authority to decide the case. Since the amount in controversy is less than $10,000 and there is no diversity of citizenship, jurisdiction, if any, must be under §1337 which provides for original jurisdiction of any civil action arising under laws regulating commerce and requires no jurisdictional amount. In determining whether the action is one arising under a law regulating commerce, and thereby within the district court's original jurisdiction, it may be significant whether dominant aspect thereof is state or federal; therefore, consideration should be given to the question of whether social area which the litigation most closely touches is one in which federal interest and concomitant need of uniformity predominates, and artificial division of jurisdiction should be avoided where practicable.—Eickhof Construction Co. v. Great Northern R. Co., 291 F. Supp. 44 (45-7).

For a federal district court to have original jurisdiction of a civil action arising under laws regulating commerce, mere existence of a question of federal law somewhere within the controversy is not enough; the basis for jurisdiction must appear from well pleaded facts complained of, standing alone and unaided by expected defenses, the answer to the complaint, or a petition for removal. Accordingly, the court has no jurisdiction under this statute of action (originally brought in a state court) for loss arising out of defendant carrier's misquotation of freight rates when (1) federal jurisdiction is not alleged in the complaint, (2) such jurisdiction is not established, and (3) though federal law established the applicable rate and compelled plaintiff to pay full rate, notwithstanding its good faith reliance on defendant's lower quotation, plaintiff's payment of the full lawful rate fulfilled immediate demands of the federal law. Case remanded to state court from which it had been removed.—Id., pp. 47-9.

General rule is that a plaintiff must include all amounts due and owing on the date it files suit; but that rule relates to amounts due and owing on a single obligation such as a lease or contract. Further, it is clearly the law that each shipment order and waybill constitutes a distinct and separate order to ship; thus, prima facie, railroad has a separate and distinct cause of action on each order and waybill for movement of defendant's 67 shipments of furniture. Therefore, railroad's suit to collect additional freight charges on those shipments, in amount of the difference between charges at published tariff rate (properly charged and billed) and charges at lower rate paid by defendant (claiming tariff rate was unlawful), is not barred by res judicata in that, since shipments moved before third amendment of railroad's complaint in a prior suit to recover other freight charges, they should have been included therein. Railroad is entitled to sue on instant shipments without splitting its cause of action; shipper's defenses of res judicata and unlawfulness of rate charged are without merit; plaintiff is entitled to recover amount claimed, with interest and costs.—Chicago, R.I. & P.R. Co. v. Furniture Forwarders of St. Louis, Inc., 294 F. Supp. 417 (418-9)*.

However, under doctrine of primary jurisdiction which is deeply embedded in law, and which seeks an accommodation of the role of the courts and administrative agencies, the issue of reasonableness of the rail rate involved is a subject for initial determination by the Commission. Therefore, the Commission having reopened it complaint proceeding involving reasonableness of the rate charged on considered shipments (several months after its original order of dismissal and, also, after entry of the lower court's opinion and judgment), the court should stay its hand until there is a final Commission determination on that issue. Although the district judge's opinion was undoubtedly correct based on the record before him at the time, and the delay is unfortunate, under the plain teachings of the Supreme Court in numerous decisions the case must be remanded to the district court with instructions to retain jurisdiction and withhold final decision on issue of reasonableness pending final Commission determination of the litigation before it. Affirmed in part and remanded in part.—Id., 420 F. 2d 385 (386-9, 390)*.

District court is without jurisdiction over subject matter of suit by company that owns and controls a motor carrier alleging that it would be unlawful for defendant (owning and controlling a railroad) to acquire control of plaintiff and, through it, of its motor carrier without first obtaining Commission approval and, also, seeking an injunction (preliminary and permanent) prohibiting acquisition of control until Commission authority is secured. Key word in 49 USC §5(2) and(4), on which the case is based, is "control" and, unless defendant controls the railroad and obtains control of the motor carrier by purchasing a majority of complainant's voting stock, Commission approval is not required. Furthermore, the statutory scheme makes it abundantly clear that, because of expertise of the regulatory agency, Congress intended to create exclusive primary jurisdiction in the Commission in such "control" matters. Accordingly, since merits of the case are not pending before the Commission, and the court lacks subject matter jurisdiction, plaintiff's action is dismissed.—B. F. Goodrich Co. v. Northwest Industries, Inc., 303 F. Supp. 53 (55-7,60)*.

District court does not have jurisdiction over railroad's suit against consignee for demurrage charges of $2,160 on freight cars, since amount in controversy is not sufficient to create jurisdiction based on diversity of citizenship and the only link that considered intrastate shipments had with interstate commerce was that they were moved by a carrier engaged in interstate, as well as intrastate, commerce. The mere fact that plaintiff was engaged in both interstate and intrastate commerce does not, of itself, give the court jurisdiction over subject matter of the suit under §1337. Accordingly, since all parties agree that shipments involved were entirely intrastate in nature, and since concededly diversity jurisdiction is not present, the court lacks necessary jurisdiction to hear plaintiff's case; suit dismissed.—Louisiana & A. Ry. Co. v. Shells, Inc., 348 F. Supp. 751 (752).

Section 1339. Postal matters.—[Unchanged. See vol. 15, p. 12348.]

Notes of Decision

Volume 17—p. 13707; Volume 21—p. 17839.

Section 1398. Interstate Commerce Commission's orders.—(a) Except as otherwise provided by law, a civil action brought under section 1336(a) of this title shall be brought only in a judicial district in which any of the parties bringing the action resides or has its principal office. (Paragraph (a) was amended by P. L. 93-584, 88 Stat. 1917, Jan. 2, 1975) [See vol. 14, p. 11730; vol. 21, p. 17839.]

Notes of Decisions

Volume 4—p. 3126; Volume 7—p. 6081; Volume 10—p. 8427; Volume 12—p. 10577; Volume 14—p. 11731; Volume 15—p. 12348; Volume 16—p. 12993; Volume 18—p. 14740; Volume 21—p. 17839.

2.Suits to enforce, suspend, or set aside orders of Commission.—[Vols. 4, 12, 18, 21]. —See also Keller Industries, Inc. v. United States case, and Leonard Bros. Trucking Co. v. United States case, §1336, n. 2, supra.

Amendment to the statute, providing that when a district court of the court of claims refers a matter to Commission for determination, the referring court shall have exclusive jurisdiction of a civil action to enforce, enjoin, set aside, or annul Commission order arising from the referral, has resulted in more streamlined procedure for judicial review of questions involving the Commission's primary jurisdiction and referred to it for preliminary determination. Since no changes were made in substantive law except to fix venue and jurisdiction in the referring court, prerequisites of judicial review remain the same; a matter, once referred to the Commission, must be prosecuted there until a final order is issued; only after administrative remedies have been exhausted may the case proceed in the court. However, use of words "civil action" in the amendment does not create a requirment that party challenging the order institute an entirely new action against the Commission in the referring court, and pursue it to conclusion, before the original case may proceed.—McLean Trucking Co. v. United States. 387 F. 2d 657 (659-60)*.

In action by Illinois corporation having its principal place of business at Chicago and licensed to do business in Missouri, where suit to enforce a Commission order for refund of motor carrier rates was brought, defendants' objection to venue appears well-taken. Under provisions of §1398, such action must be brought in the judicial district where plaintiff resides; and it was held in 209 F. Supp. 597 that a corporation "resides" only the judicial district of state of its incorporation, and that venue is not proper in a district where neither the plaintiff is incorporated nor its principal place of business located. The general venue statute, providing for venue against a corporate defendant in any district in which it is incorporated, licensed, or doing business, does not apply to plaintiffs. Moreover, in light of 321 F. Supp. 353 (aff'd 404 US 802), holding that the Commission had power to make the refund order relied on, plaintiff's action can only be judged as one to enforce a Commission order within meaning of §1398, even if brought as a suit for "reparations" under the reparations statutes.—Montgomery Ward & Co. v. Anderson Motor Service, Inc., 339 F. Supp. 713 (716-8).

Furthermore, in its brief, plaintiff states that it has no particular objection to transfer of the litigation to the Illinois court, and that if defendants press their venue contention, and the court agrees, the case should be transferred. Therefore, even assuming that venue is proper in Missouri district where complaint was filed, the cause should be transferred to the Northern District of Illinois under provisions of §1404(a) for a change of venue for the convenience of parties and witnesses in the interest of justice, and, alternatively, under the statute permitting transfer to a district of proper venue in instances in which venue is improper where the case is filed, in the discretion of the court. Cause transferred.—Id., p. 718.

4. District of residence of party upon whose petition order was made.—[Vols. 4, 14-16, 21].—See Montgomery Ward & Co. v. Anderson Motor Service, Inc. case, n. 2, above.

Section 1404. Change of venue.—[Unchanged. See vol. 16, p. 12993.]

Notes of Decisions

Volume 16—p. 12993; Volume 17—p. 13707; Volume 18—p. 14740; Volume 19—p. 16028; Volume 21—p. 17840.

1. Transfer of actions.—[Vols. 16-19, 21]. —Action to enforce a Commission order for refund of motor carrier rates, brought in Missouri court by an Illinois corporation having its principal place of business at Chicago, should be transferred to the Illinois court since plaintiff states that it does not object to transfer of the litigation, and defendants move to dismiss for lack of jurisdiction and for improper venue. Plaintiff's statement that either the Missouri or the Illinois district is "equally convenient" for it, and defendants' preference for another forum professed in their venue objection, establish a sufficient "balance of convenience" to enable the court to transfer the cause, under §1404(a), for the convenience of the parties and witnesses in the interest of justice, even though venue may be proper where the case is filed, as well as under the statute permitting transfer to a district of proper venue in cases in which venue is improper where action is brought, in the court's discretion. Cause transferred. —Montgomery Ward & Co. v. Anderson Motor Service, Inc., 339 F. Supp. 713 (716,718).

REMOVAL OF CASES FROM STATE COURTS

Chapter 89.—Title 28

Section 1445. Nonremovable actions.—[Unchanged. See vol. 14741.]

Notes of Decisions

Volume 12—p. 10582; Volume 13—p. 11220; Volume 14—p. 11731; Volume 15—p. 12349; Volume 16—p. 12994; Volume 17—p. 13708; Volume 19—p. 16030; Volume 21—p. 17842.

1. In general.—[Vols. 14-17, 19, 21].—See also Eickhof Construction Co. v. Great Northern Ry. Co. case, 28 USC §1337, n. 1.

In order to be removable from State court to district court, a case must be one of which the federal courts have original jurisdiction; and, if several claims are joined in such action, at least one claim subject to the district court's original jurisdiction must be found in the complaint, and not in defendant's answer or petition for removal, in order to justify removal. Therefore, where common-law suit for breach of contract between two carriers was brought in State court and removed to the district court, and defendant's petition for removal showed that apparently it would raise as a defense invalidity of the contract under Commission regulations, but there was no existing Commission order concerning that contract, the federal court does not have jurisdiction in the matter. Plaintiff's motion to remand granted and action remanded to the State court.—Robertson Motor Freight, Inc. v. Brady Motorfrate, Inc. (Pa.), 287 F. Supp. 449 (451-2).

Although plaintiff shipper's State court suit to recover for damages to shipment while in transit was removed to Federal court by defendant motor carrier as a diversity action allegedly involving more than $10,000, and damages of only $7,500 are now sought, plaintiff's specification of the lower amount occurred after removal; therefore, to remand the case at this point would controvert the ruling in 303 US 283. Alternatively, the complaint states a cause of action which, though not designated as such, falls under the Carmack Amendment, 49 USC §20(11), which is specifically applicable to interstate motor carriers under 49 USC §319; and such an action may be removed to a district court if the matter in controversy exceeds $3,000.—Sun Insurance Office, Ltd. v. Greyhound Van Lines, Inc., 289 F Supp. 483 (484, Note).

The general rule is that removability of an action against interstate carrier in a state court is determined by plaintiff's pleadings. However, fact that complaint seeking to recover, in action which originated in the state court and which defendant railroad removed to federal court, in no way purported to rely on any federal law is not determinative of jurisdiction of federal court (on motion to remand to the state court) when facts stated in the complaint clearly show that gravamen of the action is governed by federal law. Considered action must be governed by terms of the Carmack Amendment (49 USC §20(11)) since it is one for breach of a bill of lading contract, and the matter in controversy exceeds $3,000; thus, on petition to reconsider, prior order denying motion to remand is reaffirmed.—American Synthetic Rubber Corp. v. Louisville & N. R. Co., 291 F. Supp. 723 (725-6)*.

DECLARATORY JUDGMENTS

Chapter 151.—Title 28

Section 2201. Creation of remedy.—[Unchanged. See vol. 18, p. 14742.]

Notes of Decisions

Volume 15—p. 12351; Volume 16—p. 12996; Volume 17—p. 13709; Volume 18—p. 14743; Volume 19—p. 16032; Volume 21—p. 17845.

2. Construction and interpretation.—[Vols. 15-19, 21].—Reference to an "interested party" in §2201, which creates the remedy of declaratory judgment, is to one seeking a declaration of rights, and not to those who may be joined as defendants to such action. Thus, language of the statute provides no basis for joinder of the Commission as an "interested party" defendant to declaratory judgment suit by railroad employees who seek declaration and establishment of their rights and protections by virtue of, and in accordance with, employee-protection provisions of the Commission's order relating to the Penn-Central merger. Also, while it is generally held that persons who have an interest in the "actual controversy" in a suit for declaratory judgment may be joined as parties defendant, the complaint does not reflect such a controversy involving the Commission. Plaintiffs complain of their employer's failure to complay with the Commission order; that is the "actual controversy" giving rise to their action; and the Commission disclaims any justiciable interest therein. Therefore, the Commission's motion to dismiss the complaint as to it is granted.—Reardon v. *Pennsylvania-New York Cent. Transp. Co., 323 F. Supp. 598 (599, 600).

Section 2202. Further relief.—[Unchanged. See vol. 15, p. 12351.]

INJUNCTIONS: THREE-JUDGE COURTS

Chapter 155.—Title 28

Section 2284. Three-judge court; when required; composition; procedure.—[Amended to read as follows by the act of Aug. 12, 1976, Pub. L. 94-381, 90 Stat. 1119. See vol. 14, p. 11733; vol. 19, p. 16034.]

(a) A district court of three judges shall be convened when otherwise required by Act of Congress, or when an action is filed challenging the constitutionality of the apportionment of congressional districts or the apportionment of any statewide legislative body.

(b) In any action required to be heard and determined by a district court of three judges under subsection (a) of this section, the composition and procedure of the court shall be as follows:

(1) Upon the filing of a request for three judges, the judge to whom the request is presented shall, unless he determines that three judges are not required, immediately notify the chief judge of the circuit, who shall designate two other judges, at least one of whom shall be a circuit judge. The judges so designated, and the judge to whom the request was presented, shall serve as members of the court to hear and determine the action or proceeding.

(2) If the action is against a State, or officer or agency thereof, at least five days' notice of hearing of the action shall be given by registered or certified mail to the Governor and attorney general of the State. The hearing shall be given precedence and held at the earliest practicable day.

(3) A single judge may conduct all proceedings except the trial, and enter all orders permitted by the rules of civil procedure except as provided in this subsection. He may grant a temporary restraining order on a specific finding, based on evidence submitted, that specified irreparable damage will result if the order is not granted, which order, unless previously revoked by the district judge, shall remain in force only until the hearing and determination by the district court of three judges of an application for a preliminary injunction. A single judge shall not appoint a master, or order a reference, or hear and determine any application for a preliminary or permanent injunction or motion to vacate such an injunction, or enter judgment on the merits. Any action of a single judge may be reviewed by the full court at any time before final judgment.

Historical Note

P.L. 93-584 eliminates the right to District Court review of Commission orders (except as to orders arising out of referrals or orders relating to the payment of money or the collection of fines, penalties, or forfeitures) and places review of Commission orders under jurisdiction of the Court of Appeals pursuant to 28 USC §2341, et seq.—Annual Report, 1975, p. 71.

Notes of Decisions

Volume 15—p. 12351; Volume 16—p. 12997; Volume 17—p. 13711; Volume 21—p. 17848.

1. In general.—Issuance of temporary restraining order is justified if plaintiff raises questions going to merits which are so serious, substantial, difficult, and doubtful as to make them fair ground for litigation and thus for more deliberate investigation. Carrier herein is entitled to stay of Commission order to prevent irreparable damage supported by elements of damage and loss suggested by carrier's president but where Commission arrived at a diametrically opposed conclusion on basis of same evidence. —G.B.C., Inc. v. United States, 302 F. Supp. 1283 (1283).

INTERSTATE COMMERCE COMMISSION ORDER: ENFORCEMENT AND REVIEW

Chapter 157.—Title 28

Section 2321. Judicial Review of Commission's Orders and Decisions; Procedure Generally; Process.—[Amended by Pub. L. 93-584, 88 Stat. 1917, Jan. 2, 1975. See vol. 14, p. 11734, vol. 15, p. 12352, vol. 19, p. 16034.]

(a) Except as otherwise provided by an Act of Congress, a proceeding to enjoin or suspend, in whole or in part, a rule, regulation, or order of the Interstate Commerce Commission shall be brought in the court of appeals as provided by and in the manner prescribed in chapter 158 of this title.

(b) The procedure in the district courts in actions to enforce, in whole or in part, any order of the Interstate Commerce Commission other than for payment of money or the collection of fines, penalties, and forfeitures, shall be as provided in this chapter.

(c) The orders, writs, and process of the district courts may, in the cases specified in subsection (b) and in the cases and proceedings under section 20 of the Act of February 4, 1887, as amended (24 Stat. 386; 49 U.S.C. 20), section 23 of the Act of May 16, 1942, as amended (56 Stat. 301; 49 U.S.C. 23), and section 3 of the Act of February 19, 1903, as amended (32 Stat. 848; 49 U.S.C. 43), run, be served and be returnable anywhere in the United States.

Historical note, see vol 21, p. 17849.

Section 2322. United States as party.—[Unchanged. See vol. 14, p. 11734; vol. 15, p. 12352.]

See historical note to §2321, vol. 21, p. 17849.

Notes of Decisions

Volume 17—p. 13711; Volume 21—p. 17850.

1. In general.—[Vols. 17, 21].—Although a statutory defendant in three-judge district court suit to set aside and enjoin Commission order disapproving proposed reduced rail rates, the United States supported the railroads; position in the suit and participated in support of the railroads in proceedings before the Supreme Court on appeal taken by the Commission and competing carriers from the district court's decision.—American Commercial Lines, Inc. v. Louisville & N. R. Co., 392 U.S. 571 (575, note)*.

Section 2323. Duties of Attorney General; Intervenors.—The Attorney General shall represent the Government in the actions specified in section 2321 of this title and in actions under section 20 of the Act of February 4, 1887, as amended (24 Stat. 386; 49 U.S.C. 20), section 23 of the Act of May 16, 1942, as amended (56 Stat. 301; 49 U.S.C. 23), and section 3 of the Act of February 19, 1903, as amended (32 Stat. 848; 49 U.S.C. 43).

(Amended by P. L. 93-584, 88 Stat. 1917, Jan. 2, 1975). [See vol. 14, p. 11735; vol. 15, p. 12352]

See historical note to §2321, vol. 21, p. 17849.

Section 2324. Stay of Commission's Order.—[Repealed by P. L. 93-584, 88 Stat. 1918, Jan. 2, 1975. See vol. 14, p. 11735.]

Notes of Decisions

Volume 16—p. 12998; Volume 19—p. 16034; Volume 21—p. 17851.

10. Stay of operation of Commission's order.—[Vols. 16, 19, 21].—Although the district court had power to suspend the operation of the Commission's order pending the final determination of shipper's suit [28 USC §2324], entering an injunction forbidding the railroads to implement proposed change in rates is not an injunction suspending the order, and was in error. The power conferred on the district court by §2324 does not in itself include a power to enjoin the railroads from implementing a new charge. Rather, that power must be considered as at best ancillary to the general equitable powers of the reviewing court, and protective of its jurisdiction. Such a power must be inferred from Congress's decision to permit judicial review of agency action, and judicial review would be an idle ceremony if the situation were irreparably changed before correction could be made.—Atchison, T. & S.F. Ry. Co. v. Wichita Bd. of Trade, 412 U.S. 800 (818-819)*.

The reviewing court may grant a stay of a Commission order, pending its determination of action to enjoin or set aside the order, when petitioner clearly shows that (1) it is likely to prevail on the merits of its appeal, (2) without such relief, petitioner will be irreparably injured, (3) issuance of a stay would not substantially harm other interested parties, and (4) shows where the public interest lies. Such test is obviously different from that involved in determining whether a district court should issue an injuction (in carrier's action to enjoin competing carrier's unlawful operation) pursuant to 49 USC §322(b) (2) which requires only a clear and patent violation of the Interstate Commerce Act and injury thereby to petitioner.—Baggett Transp. Co. v. Hughes Transp., Inc., 393 F. 2d 710 (716-7)*.

Comity and the orderly administration of justice did not require that Missouri district court refuse to entertain, and exercise its jurisdiction in, appellee carrier's private action to enjoin appellant's unlawful operations, although the Alabama court had stayed effectiveness of Commission's cease-and-desist order against appellant which it had under review; the orders are different and are based on separate statutory provisions; and the grant of a stay under one statute does not necessarily prohibit the exercise of jurisdiction under the other. Furthermore, if the waters of comity between courts have been muddied, appellant did the muddying by requesting the stay order when it was aware that the Missouri court, in an earlier private enforcement action brought by appellee's parent carrier, had declined to enjoin appellant's illegal operations in the apparent belief that the Commission order would not be restrained and would soon become effective.—Id., p. 717.

In reaching decision on plaintiffs' (protestants) motion for temporary restraining order, suspending, in whole or in part, Commission order granting motor carrier certificate to intervenor, case law holds that the Commission is presumed to have properly performed its duties and that presumption supports its actions in absence of clear evidence to the contrary; however, its order must be supported by substantial evidence and must be within its statutory powers. The court must review the record and conclusions reached with full realization it is not deciding the case on the merits but is determining whether plaintiffs are entitled to a *pendente lite* temporary restraining order. Plaintiffs failed to show they would suffer irreparable damage if relief sought is not granted; and record shows intervenor would be irreparably damaged if such relief were granted. Motion for stay, denied.—Braswell Motor Freight, Inc. v. United States, 297 F. Supp. 215 (218-19, 221)*.

Section 2325. Injunction; Three-Judge Court Required.—[Repealed by P. L. 93-584, 88 Stat. 1918, Jan. 2, 1975. See vol. 14, p. 11735.]

Jurisdiction of Courts to Restrain Enforcement of Commission's Orders

7. Jurisdiction of district court.—[Vols. 4, 7, 10, 12, 14, 16, 18, 19, 21].—See also Baggett Transp. Co. v. Hughes Transp., Inc. case, §222(b), n. 2; Bondholders Protective Committee v. I.C.C. case, 28 USC §1336, n. 2; Students Challenging Regulatory Agency Procedures (S.C.R.A.P.) v. United States case, §15 (7), n. 1, supra.

District court erred in holding that pendency of suit for judicial review of Commission order granting temporary authority to appellant, which had been temporarily stayed by a single judge, deprived the Commission of jurisdiction to grant petitions for rehearing and to reopen the administrative record and receive additional evidence, before the case was argued to the three-judge court and the record was filed with it. Unlike statutes concerning some regulatory systems, the Interstate Commerce Act contains no provisions that the agency may modify any findings up until the record is filed with a court, and any subsequent changes in the record will be made only at the court's direction. By that Act the Commission never lost jurisdiction to pass on rehearing petitions and, since the stay order did not forbid its acting on the pending petitions, it was not necessary that the agency seek the court's permission to rule thereon. The Commission reopened its record merely to remedy a deficiency in it before any judicial review of the merits had begun and fully honored the stay order; thus, it acted in full harmony with the court's jurisdiction. Reversed.—American Farm Lines v. Black Ball Freight Service, 397 U.S. 532 (540-2)*.

Defendants' motion to dismiss suit for judicial review of Commission order under §210a of the Act, on grounds that the grant of temporary authority to 25 household-goods carriers was merely preliminary to disposition of their permanent authority applications and, thus, is not reviewable, denied. The court has jurisdiction to review the temporary orders with scope of its review limited to the issue of whether the Commission's determination of "urgent and immediate need" was arbitrary or capricious or whether it acted without authority or committed an error of law. In its limited review of temporary orders in issue, the court is confined to the record made before the Commission; and its function is simply to determine whether evidence of record supports the agency finding of "urgent and immediate need." Review of the administrative record shows a finding of immediate and urgent need for service in each case and that, in granting authority on basis of applications supported by shippers' statements, the Commission did not act arbitrarily or capriciously; judgment for the Commission.—Hussey v. United States, 271 F. Supp. 650 (652, 653-4)*.

Plaintiff's motion for order modifying and amending decision of this court in 293 F. Supp. 879, which upheld the Commission's restrictive interpretation of its certificate, and continuing and extending previously entered temporary restraining order until final Commission determination of its pending application, denied. The Commission has full power over regulation of interstate motor carriers; and a forum for review of its exercise of such power is provided by 28 USC §2284. The court upheld the Commission's findings as to the transportation authorized by plaintiff's certificate, and dissolved the temporary restraining order; thus, for it now to continue its initial restraining order would in effect reverse its recent decision and invade the authority of the Commission. Also, absent an appeal from the court order, if there is such immediate and urgent need for transportation service as plaintiff claims, an avenue of relief is provided in 49 USC §310a. Moreover, even if this proceeding were an appeal, the court is guided by discussion in 272 US 658 and, in light thereof, plaintiff has not shown additional facts as would justify a stay by the court at this time.—Heavy Duty Haulers, Inc. v. United States, 293 F. Supp. 887 (889-92)*.

The district court has jurisdiction over the parties and subject matter in action to enjoin, set aside, or remand Commission order permitting discontinuance of passenger trains; therefore, defendant railroad's motion for dismissal on the ground that a Commission order discontinuing a §13a investigation, after completion of its full investigation, is not a reviewable order within meaning of 28 USC §1336, is denied. That argument has been advanced to other three-judge courts in similar proceedings and was rejected in two cases, 269 F. Supp. 80 and 273 F. Supp. 899, aff'd. (per curiam) 392 US 642; and the court agrees with reasoning in those cases, rather than with contrary conclusions reached in two other decisions. Moreover, as indicated by the hearings, general opinion of the members of the Senate subcommittee considering the legislation was that §13a was not intended to prohibit court review of a Commission order terminating a train discontinuance investigation. —State of New York v. United States, 299 F. Supp. 989 (993-4)*.

While not seriously questioned, the court has jurisdiction to review Commission order granting temporary authority to defendant carrier. Language of §2325 does not define scope of judicial review, nor do other pertinent laws clearly define the rights, extent and scope thereof, but statutes *in pari materia* must be construed together. Statute under which temporary authority is granted entrusts such action to the Commission's discretion and, while judicial review provisions of Administrative Procedure Act do not apply to actions committed to agency discretion, that act defines scope of review including review of agency action that is arbitrary, capricious, an abuse of discretion, or otherwise unlawful. And, applying principles developed by the courts, action committed to agency discretion contemplates and implies a lawful exercise of discretion, and agency action which is arbitrary and capricious abuses discretion and constitutes unlawful exercise thereof; therefore, the court does have jurisdiction to review commission temporary authority orders on complaint fairly alleging that the agency acted arbitrarily, capriciously, and in abuse of its discretion.—Bell Lines, Inc. v. United States, 306 F. Supp. 209 (212-13)*.

Plaintiffs having already filed a notice of appeal to the Supreme Court, it is doubtful that the three-judge court may entertain their motion to reconsider its prior dismissal of their action (asking the court to declare null and void the Commission's "Notice" of its decision not to investigate defendant railroad's proposed discontinuance of passenger trains, and to enjoin such discontinuance) for failure to state a claim on which relief could be granted and lack of subject matter jurisdiction. It has been held that, where an appeal is taken from a court's order, the court thereby loses any jurisdiction it might have to vacate, alter, or amend its earlier findings. In instant case, however, it is clear that the court's earlier findings are consistent with the language used in 396 US 162, which decision plaintiffs refer to as supporting the position they previously urged; accordingly, the court's prior decision is sustained and plaintiffs' motion to reconsider is denied.—Anderson v. United States, 309 F. Supp. 494 (496-7)*.

District court lacks jurisdiction to review Commission orders which permitted class I railroads to effect a general increase in their freight rates and charges to offset increased expenses; thus, it is unnecessary to determine issues raised by plaintiffs' argument that the Commission's conclusions as to railroads' need for additional revenue were not based on adequate findings supported by substantial evidence. The rates which became effective under considered orders are permissive, not mandatory, and the Commission's ultimate findings and conclusions assure any aggrieved party (such as plaintiff shippers) the opportunity to challenge any particular rates which affect them under procedures provided in 49 USC §13; therefore, since factual and legal questions considered in 11 F. Supp. 487 are identical with those raised in instant proceeding, that decision represents the applicable law. Accordingly, the complaint is dismissed.—Alabama Power Company v. United States, 316 F. Supp. 337 (338-9)*; Atlantic City Electric Co. v. United States, 306 F. Supp. 338 (342-3)*.

Three-judge court has jurisdiction over subject matter of motor carriers' action to enjoin or set aside order of the Commission, in proceeding on investigation of increases in freight rates and charges, which plaintiffs assert is beyond the Commission's statutory authority and jurisdiction insofar as it requires carriers to make refunds to shippers to the extent that those increases were not approved. Althought somewhat different review procedure is called for in suits to enforce the payment of money, instant action is not regarded as one for the payment of money; its primary concern is the Commission's effort to uphold and protect its jurisdiction. And while the court's decision may have some effect on shippers' efforts to obtain refunds, its judicial review of the Commission's order is not to be classified as an action to enforce the payment of money or the collection of fines, penalties and forfeitures. Therefore, preliminary questions as to the court's jurisdiction are rejected.—Admiral-Merchants Motor Freight, Inc. v. United States, 321 F. Supp. 353 (357-8)*.

The court lacks jurisdiction in suit to enjoin, vacate and set aside Commission orders assigning motor carrier application for handling under its modified procedure rules, and denying plaintiff's request for oral hearing by a joint board, as those orders are not final. The Commission has made no final decision on opposed three-state application itself; nor has it decided whether or not there will be an oral hearing. Clearly, considered orders are preliminary and procedural and, not being directly reviewable, they are subject to review only on review of the final agency action; thus, doctrine of exhaustion of administrative remedies makes plaintiff's action a premature resort to the court. While 321 F. Supp. 821, stressed by plaintiff, casts doubt on validity of the Commission's use of modified procedure rules in the type of situation presented, that case does not stand for the proposition that plaintiff is entitled to review of the proceedings at this time. The court has no jurisdiction to interfere now with the Commission's procedure; request to convene a three-judge court, denied.—T. J. Claveau Transp., Inc. v. I. C. C., 329 F. Supp. 931 (932-3)*.

As stated in 263 F. Supp. 157, a district court is deemed to retain the power to curb an abuse of discretion by the Commission in granting motor carrier temporary authority. Accordingly, in competing carriers' suit to set aside and annul Commission temporary authority order because, in granting such authority to defendant carrier, the Commission acted arbitrarily and unlawfully and in abuse of its discretion, the challenged order is reviewable by the three-judge court.—Braswell Motor Freight, Inc. v. United States, 336 F. Supp. 709 (712)*.

9. Three-judge court.—[Vols. 4, 7, 10, 14-19, 21].—Under statutes providing for direct review of Commission orders by a three-judge district court, a statutory court is the sole forum for review of all issues ruled on by the Commission in denying appellant company's application for authority to construct new 30-mile railroad between Florida points. The rule (relied on in 380 F. 2d 49) concerning exclusiveness of administrative and judicial review procedures prescribed by Congress, being an application of the exhaustion of administrative remedies doctrine, is not limited only to matters of agency expertise; and all issues essential to the Commission's decision, including those relating to its jurisdiction, should be challenged only in a statutory three-judge court. When no appeal was taken from order denying its application, the company could not defend the railroad's §1(20) suit to enjoin its alleged unlawful construction on grounds that are reviewable only by a three-judge court. Consideration of such issues in a §1(20) suit amounts to collateral attack on validity of the Commission's order and, to preserve statutory mode of review, jurisdictional issues should have been foreclosed in district court injunction proceeding.—Tampa Phosphate R. Co. v. Seaboard Coast Line R. Co., 418 F. 2d 387 (390, 396-400).

In its action to set aside Commission order approving motor carrier control applications, plaintiff joined a civil suit against controlling carrier based on deceit and anti-trust violations; however, three-judge procedure should be used sparingly in view of heavy demands it makes on judicial manpower, and the burden that direct appeal imposes on the Supreme Court. Thus, a rule has evolved that private claims should not be joined with petitions to review a Commission order unless they are ancillary to or dependent upon the court's judgment as to the order; and where the factual basis of private claims is related to the review petition, decision whether to permit joinder before the three-judge court is largely discretionary. The two branches of instant complaint are not closely related; issued presented by the review petition are so different from those in the private case that joinder is unnecessary to effective review of the Commission order; therefore, portions of complaint seeking civil relief are dismissed without prejudice to filing amended complaint, stating the private claims only, to be heard by a single district judge.—Interstate Investors, Inc. v. United States, 287 F. Supp. 374 (378, 384-5)*.

In action seeking review of Commission decisions by the three-judge court, the Commission's orders, though declaratory in nature, are reviewable because they determined rights or obligations from which legal consequences will flow. However, the complaint raises basically the same issues as those encompassed by plaintiff's two earlier civil actions in Florida district court, wherein jurisdiction of the State of Florida was questioned; that court stayed the actions and, while retaining jurisdiction, referred the issues to the Commission for initial determination; and the Commission made its decision and has forwarded a certified copy of its reports and orders to the referring court. Accordingly, pursuant to provisions of 28 USC §1336(b) and 1398(b), the referring one-judge court, rather than a statutory three judge court, has exclusive jurisdiction to review the Commission's reports and orders in question. Case remanded to the Florida district court for disposition.—Keller Industries, Inc. v. United States, 304 F. Supp. 852 (854, 855).

A lawsuit may fall within requirements of the Urgent Deficiencies Act even though there is no request that a Commission order be set aside and no specific order is mentioned on the face of the pleadings. If it can be established extrinsically that the practical effect of plaintiff's success on the merits would be to invalidate or countermand a Commission order, that act applies and its requirements must be met. Also, plaintiff cannot avoid dictates of that act merely by confining the relief sought to money damages since, although §2325 speaks in terms of "injunctions," the cases have held that the act applies to damage actions as well.—REA Express, Inc. v. Alabama G. S. R. Co., 343 F. Supp. 851 (856-7).

In REA's suit against owning railroads seeking damages for alleged breaches of antitrust laws and fiduciary relationships, violations of the Interstate Commerce Act, and also a declaratory judgment that promissory notes issued by it are void, plaintiff's challenge of transactions involving the 1959 notes attacks a valid and subsisting Commission order approving issuance of those notes; therefore, as to such claims, REA's remedy is before a three-judge court pursuant to the Urgent Deficiencies Act. However, since there was no Commission order specifically approving REA's "Non-Negotiable Debt" to the railroads, any attack on transactions involving that debt does not constitute an attack on a Commission order which must be brought before a three-judge court. Defendants' motion to dismiss, on ground that the court lacks subject-matter jurisdiction, granted in part and denied in part.—Id., pp. 853, 857-60.

11. Suits to restrain, set aside, annul, or suspend orders.—[Vols. 4, 7, 10, 12-17, 19, 21].—See also McLean Trucking Co. v. United States case, 28 USC §1336, n. 2, supra.

In motor carrier's action for review of Commission order which required plaintiff to cancel its proposed tariffs publishing rates on single-unit mobile homes because transportation thereof was not authorized in its certificates, there is no merit in plaintiff's argument that considered order contravenes prior three-judge court's decision, 262 F. Supp. 1009, which held that uncontradicted evidence before it required a finding that a single-unit mobile home is a "complete building" within the commodity descriptions in plaintiff's operating authority. The prior court further found that the order then under review (cancelling plaintiff's rates on mobile homes) was based on the Commission's interpretation and application of its own prior orders, to the exclusion of the record before it; and it was in that context that prior Commission order was set aside, "leaving to the Commission any further action which it may deem appropriate."—Pre-Fab Transit Co. v. United States, 321 F. Supp. 1147 (1149)*.

Subsequent to that decision, the Commission held further extensive hearings in the proceeding, productive of voluminous additional testimony and documentary exhibits, which culminated in a new order requiring cancellation of plaintiff's tariffs insofar as they named rates on single-unit mobile homes. That procedure being proper, a new record is not presented for review; and the court must determine whether that record, as now constituted, supports the findings and new order of the Commission. The only issue before the reviewing court is whether substantial evidence supports the Commission's findings and, in turn, whether those findings support its new order. The Commission's finding that commodity descriptions "buildings" or "prefabricated buildings" in plaintiff's certificates does not embrace single-unit mobile homes is supported by substantial evidence of record; and since the new Commission order is founded upon substantial evidence, it is sustained. Complaint dismissed.—Id., pp. 1149-50, 1152.

The scope of judicial review of Commission order, that denied motor carrier plaintiff's application for operating authority, is limited to determining whether the Commission's findings are supported by substantial evidence. The Commission was justified in finding that plaintiff failed to show a public need for additional service when only one shipper filed a verified statement in support of the application, other carriers were shown to be ready and willing to provide that shipper with suitable transportation, and plaintiff did not show with particularity any inadequacy in service of existing carriers. Also, in view of the necessity for efficient administration and the Commisssion's finding that new evidence in plaintiff's petition for reconsideration would not produce a different result, denial of the petition for reconsideration was not an abuse of the Commission's discretion. Accordingly, plaintiff's action seeking to annul the order denying it authority is dismissed.—Popelka Trucking Co. v. United States, 327 F. Supp. 1312 (1312-3)*.

In protesting carrier's suit to annul and vacate Commission order converting outstanding permit of defendant carrier (applicant) into a certificate, neither plaintiff's claim that the conversion proceeding was "artificially inspired" by the Commission's decision in applicant's prior common-carrier extension proceeding, nor defendants' reference to instant action as being a collateral attack on the order therein, is cogent as an absolute defense to plaintiff's suit or as a basis for vacating the Commission order in issue. As plaintiff is a competing common carrier, it has sufficient interest to maintain an action against the conversion proceeding order without considering order in the extension proceeding. Also, while effect of the extension order is relevant and material in the conversion proceeding, the challenged conversion order cannot be vacated merely because order in the prior extension case invited or suggested the conversion proceeding. Commission report and order under review is supported by substantial evidence and accords with the applicable law; sustained.—Perkins Furniture Transport, Inc. v. United States, 333 F. Supp. 879 (882-3, 885)*.

12. Collateral attack.—[Vols. 4, 7, 10, 11, 13, 16-19, 21].—See Tampa Phosphate R. Co. v. Seaboard Coast Line R. Co. case, n. 9, supra; Toye Bros. Yellow Cab Co. v. Irby case, 28 USC §1332, n. 3.

13. Orders of the Commission.—[Vols. 4, 7, 10, 12-14, 16-19, 21].—See also Aberdeen & R. R. Co. v. United States case, §15(6), n. 34; Travel & Tour Service, Inc. v. United States, §212(a), n. 35.

The Commission's conclusion not to suspend proposed increased rates, filed by motor carrier rate bureaus after previous proposed schedules containing indentical rate increases (which were suspended) had been cancelled by them, was discretionary with the Commission under the Interstate Commerce Act; and its refusal to suspend such rates is not reviewable. Moreover, decision of the Commission not to suspend the rates was necessarily only a preliminary determination; and since plaintiffs might have challenged lawfulness of those rates by filing a complaint with the Commission, they have not exhausted statutory remedies available to them. Accordingly, inasmuch as plaintiffs obtained no final agency action subject to judicial review before they sought to invoke the court's jurisdiction, the complaints are dismissed.—National Industrial Traffic League v. United States, 287 F. Supp. 129 (131, 132)*.

In action to set aside Commission report and order which authorized construction of a new line of railroad in Permian Basin area of west Texas, the Commission's findings as to (1) estimated income for the new railroad, (2) need for rail service over proposed route and further development in the area which the service would stimulate, and (3) effect of granting the application on protesting rail carriers, are each supported by substantial evidence. Also, the Commission's findings regarding profitability are sufficient when, while it did not precisely estimate revenues and cost for each commodity, it made an estimate of total revenues and costs and, further, it named the commodities on which it focused in revising the examier's estimate. Moreover, profitability is only one factor, albeit a major one, to be considered; the ultimate question is public convenience and necessity. Presence of need in the area for proposed railroad balance against only a minimal threat of hardship to other carriers provides an adequate basis for the Commission's order; sustained.—Atchison, T. & S.F. Ry. Co. v. United States, 287 F. Supp. 354 (356)*.

14. Parties entitled to restrain enforcement of Commission's orders.—[Vols. 4, 7, 10, 12-19, 21].—None of the plaintiffs have standing to challenge the Commission's report and order in freight forwarder application proceeding inasmuch as they have not suffered a legal wrong because of it, nor have they been adversely affected or aggrieved by grant of authority therein. Motor carriers of household goods are not affected by decision that applicant must have forwarder authority to handle unaccompanied baggage which, when shipped separately from householder's other goods, is not within "used household goods" the forwarding of which is exempt by statute; as that decision does not pertain to motor household-goods carriers, it would have no effect on their authority to transport unaccompanied baggage. Nor does such decision affect regulated forwarder plaintiffs because their permits authorize them to forward commodities generally, including baggage moving independently. Also, forwarders' claim that competitive injury would result to the household goods carriers does not give rise to a standing to sue, since an increase in competition is not a reason for denying the Commission's authority to issue a certificate.—American Movers Conference v. United States, 307 F. Supp. 74 (78-9)*.

Plaintiff carrier (protestant before the Commission) can maintain a suit to annul and vacate Commission order granting application of defendant carrier (applicant) for conversion of its contract—carrier permit into a common—carrier certificate, which emanated from the Commission's conclusion in prior common-carrier extension proceeding to withhold issuance of a certificate to applicant pending its eliminating the possibility of unlawful dual operations, although Commission action in the extension proceeding is not challenged. A large portion of plaintiff's authority conflicts with that accorded applicant in the extension proceeding, and final outcome of the conversion application carries with it the final outcome of the extension application; therefore, plaintiff has sufficient interest to maintain instant action against the conversion proceeding order without considering the extension-case order, since grant of a certificate to defendant carrier and its operation thereunder could presently and in the future affect plaintiff's operation under its authority.—Perkins Furniture Transport, Inc. v. United States, 333 F. Supp. 879 (881-2)*.

Association concerned with enhancing quality of the environment for its members has standing to bring suit for injunctive relief against Commission orders which permitted railroads to attach an interim 2.5 percent sucharge to normal tariff rates on all freight, with certain exceptions, because of the Commission's failure to issue an environmental impact statement, pursuant to the National Environmental Policy Act, on the effect of the surcharge on shipment and use of recyclable materials. Plaintiff organization clearly has standing to raise the rights of its members [citing 371 US 415], and it alleges the kind of "injury in fact" to those members which would give them standing to sue. Moreover, unlike pleadings in 405 US 727, plaintiff's amended complaint alleges that its members actually use the environmental resources adversely affected by the Commission action. And mere fact that plaintiff's allegations make no distinction between its members and a great many others who use the natural resources does not disqualify it as a party.—Students Challenging Regulatory Agency Procedures (S.C.R.A.P.) v. United States, 346 F. Supp. 189 (195-6)*.

15. Parties defendant.—[Vols. 4, 7].—See McLean Trucking Co. v. United States case 28 USC §1336, n. 2.

Equitable Relief

21. Other remedies available upon application to Commission.—[Vols. 4, 7, 10, 12, 14-17, 19, 21].—See Heavy Duty Haulers, Inc. v. United States case, n. 7, supra.

26. Temporary restraining orders.—[Vols. 4, 7, 17, 18, 21].—Granting of a temporary injunction is addressed to the discretion of the trial court, not the appellate court; and merits of the case will not be considered by the reviewing court excepting only as may be necessary to determine whether the trial court improvidently exercised its judicial discretion. In light of obvious purposes and objectives of 1965 law amending 49 USC §322(b), the Missouri court had jurisdiction to entertain appellee carrier's action under that statute (contrary to appellant's contention) and issue complained-of injunction against appellant restraining it from operating in clear and patent violation of 49 USC §§303(c) and 306, even though review (and injunction against enforcement) of a Commission cease-and-desist order against appellant was then pending in an Alabama court. The two orders are different and are based on separate statutory provisions; the granting of injunction by one court does not necessarily prohibit the exercise of its jurisdiction by the other. Order of trial court affirmed.—Baggett Transp. Co. v. Hughes Transp., Inc., 393 F. 2d 710 (714, 717-8)*.

Before granting a temporary restraining order, the court is required by statute to find that without such order there will be "irreparable damage" to movant; and several cases have added to that irreparable-harm requirement a mandate that movant show it has a "reasonable possibility" of prevailing on the merits. However, no matter how reasonable the possibility of prevailing on the merits, a temporary restraining order should not issue without a showing of irreparable harm. Therefore, even assuming they have met the light burden of proving reasonable possibility of prevailing on the merits, plaintiffs' motion for a temporary restraining order is denied because they failed to show how and in what manner they will suffer "specified irreparable damage," as required by statute, if forced to comply with Commission order that through-bus service, pursuant to their agreement to use route of defendant bus line, be reinstituted. However, any action plaintiffs take in complying with the Commission order, pending a three-judge court review thereof, shall not be deemed prejudicial to their right of judicial review.—Greyhound Lines, Inc. v. United States, 301 F. Supp. 356 (358-60)*.

Pending the court's decision on merits of motor carriers' suit to enjoin the Commission from issuing certificates implementing its orders granting extension authority to intervening carriers, a district judge may issue a temporary restraining order suspending effectiveness and operation of the Commission orders upon a specific finding, based on evidence submitted to him, that irreparable damage will result if the order is not granted. Nevertheless, in ruling on question of whether or not plaintiffs are entitled to temporary restraining order sought, the Commission's orders are entitled to initial respect and the agency is presumed to have properly performed its duties; that presumption supports its action in absence of clear evidence to the contrary. However, the order must be supported by substantial evidence and must be made within statutory limits of the Commission's powers. Also, as stated in 433 F. 2d 212, the standards for grant of a temporary stay of a Commission order are the criteria set out in 259 F. 2d 921 for the entry of such an order.—Arkansas-Best Freight System, Inc. v. United States, 350 F. Supp. 539 (541-2).

Purpose of a temporary restraining order is to maintain the status quo, the last status preceding pending controversy, until the issues can be decided after a full hearing. While the Commission is not bound by the hearing officers' findings and is free to reach conclusions that are contrary to those of its examiners, it must evaluate the evidence in accordance with mandate of the National Transportation Policy and within its statutory powers; it must disregard any testimony that would produce unjust discriminations, undue preferences or advantages, or unfair or destructive competitive practices. Even though intervenors had expended large sums of money in preparing to meet their new obligations, implementation of challenged orders by issuance of the certificates would, in effect, permit those carriers to institute direct, single-line service between their currently authorized points in various states where plaintiffs and other protestants hold substantially duplicating authority.—Id., pp. 542-5.

After consideration of all the evidence, record is convincing that all the established criteria necessary for issuance of requested temporary restraining order have been met. Plaintiffs established that they are likely to prevail on the merits and that, without a stay, they will suffer irreparable injury because, if certificates in question are issued, intervenors' new single-line service will result in substantial diversion of traffic and revenues which they now enjoy; also, there is no proof that grant of a stay will cause substantial harm to any other interested persons; and the public interest will not be harmed. Therefore, the Commission is temporarily restrained from implementing the challenged orders pending final hearing and decision in the case on the merits.—Id., pp. 545-7.

27. Preliminary or pendente lite injunction. —[Vols. 4, 7, 14, 19, 21].—A temporary restraining order against enforcement of a government agency's order is a drastic remedy and will not be granted except on a strong showing of necessity and desirability. Plaintiffs (protestants), who seek temporary restraining order pending final determination of their action to set aside the Commission's order granting motor carrier certificate to intervenor (applicant), have the burden of proving that specific, probable and irreparable damage will result if a stay is not granted. In determining whether to grant such relief, the court also takes into account all of the circumstances, including possible injury to opposing persons if a stay is granted. Careful review and consideration of all the testimony offered by all parties, and careful reading of the Commission's findings and order, establishes that plaintiffs failed to meet their burden of proof; on the other hand, record shows that irreparable damage would be caused to intervenor if temporary restraining order were issued. Plaintiffs' motion for restraining order, *pendente lite*, denied.—Braswell Motor Freight, Inc. v. United States, 297 F. Supp. 215 (217, 219-21)*.

A preliminary injunction will issue only upon plaintiff's showing it has a reasonable chance of prevailing on final hearing, and that it will suffer irreparable injury unless temporary relief is granted: and unless the act sought to be enjoined is about to occur, issuance of such injunction to prevent its occurrance would be futile. Plaintiff seeking to enjoin defendant from acquiring "control" of its motor carrier, alleging that defendant's buying plaintiff's voting stock without prior Commission approval would violate 49 USC §5(2) and (4), has made the same claim before the Commission; and, in denying plaintiff's request that it investigate legality thereof, the Commission implicitely found no reason to enjoin the transaction. Congress has left it to the Commission to determine whether "control" exists in a given case; thus, in view of the primary jurisdiction principle, it is doubtful that on final hearing the court would enjoin defendant from obtaining "control" of the motor carrier when the Commission found no need for such relief. Plaintiff failed to show it has a reasonable chance of prevailing on final hearing, and record shows no immediate danger that purchase of the stock will give defendant control over the motor carrier; preliminary injunction denied.—B. F. Goodrich Co. v. Northwest Industries, Inc., 303 F. Supp. 53 (57-61)*.

On plaintiff's motion for preliminary injunction against implementation of Commission orders allowing railroads to add a 2.5 percent surcharge to their normal tariff rates, the traditional balancing of the equities weighs in favor preliminary relief insofar as the surcharge affects shipment of recyclable materials. There is strong likelihood that plaintiff will prevail on the merits of its allegation that increased shipping costs will discourage environmentally desirable use of recyclable goods and, hence, considered orders are "major Federal actions" which, under the National Environment Protection Act, cannot take effect before an agency impact statement is prepared. Moreover, record is convincing that damage done to the environment is likely to be irreparable if relief is denied, whereas damage done the railroads by granting the injunction, while nonfrivolous, is not overwhelming. Therefore, to the extent that the surcharge relates to goods transported for purposes of recycling, preliminary relief requested is granted.—Students Challenging Regulatory Agency Procedures (S.C.R.A.P.) v. United States, 346 F. Supp. 189 (191-2, 201-2)*.

However, on plaintiff's request for preliminary relief against subsequent Commission order approving selective permanent percentage rate increases, issuance of further equitable relief would be inappropriate. The Commission suspended those rates as they applied to goods being shipped for recycling purposes; railroads are not collecting either the interim surcharge or permanent increase on such shipments; and, as no harm to plaintiff could be remedied thereby, further equitable relief with respect to such goods is not necessary. Furthermore, with regard to approved rate increases on all other goods, preliminary relief will not be issued in view of (1) the dubious likelihood of success on the merits of plaintiff's claim that an increase in rail rates causes diversion of shipments to other modes of transport which cause more pollution and consume more scarce energy resourses than railroads, (2) the substantial harm to the railroads that such relief would cause, and (3) plaintiff's failure to attack those rate increases before they were approved and went into effect. Therefore, present motion for preliminary injunction is denied.—Id., 353 F. Supp. 317 (322-4)*.

29. —Review on appeal from order granting or denying.—[Vols. 4, 7, 19, 21].—See Aberdeen & R. R. Co. v. Students Challenging Regulatory Agency Procedures (SCRAP) case 28 USC §1253, n. 2.

Scope of Judicial Review of Commission's Orders

40. In general.—[Vols. 4, 7, 12-15, 17-19, 21].—See also Brooklyn Eastern District Terminal v. United States case, §1(22), n. 1; Hudson Transit Lines, Inc. v. United States case, §207(a), n. 25.

In suit to set aside Commission order requiring plaintiff to cease certain operations found to exceed its territorial authority, the court will not disturb Commission orders that are within scope of its statutory authority, based on adequate findings supported by substantial evidence of record, and are not completely unreasonable. Also, if the law and the facts warrant agency's action, the court may not set it aside merely because it might have reached a different decision on same record; it must give due credit to the Commission's expertness in the field Congress confided to it. However, unlike cases involving Commission expertise in interpreting certificate commodity descriptions, the normal reasons for deferring to its expertise in trade parlance do not apply in action challenging, on the grounds of grammar and punctuation, Commission interpretation of description of plaintiff's authorized base territory; no questions of construction befitting its experience in drafting and construing industry language are involved and record reveals no reasons to support its avoiding the normal grammatical reading of the certificate. Matter remanded for further Commission proceedings.—T. I. McCormack Trucking Co. v. United States, 251 F. Supp. 526 (534-6, 540-1)*.

The function of the reviewing court is limited to ascertaining whether there is warrant in both the law and facts for what the Commission has done. And unless there has been prejudicial departure from requirements of law or abuse of Commission discretion the reviewing court is without authority to intervene; it cannot substitute its own view concerning what should be done for the Commission's judgment upon matters committed to its determination, if that judgment has support in the record and applicable law.—Dunkley Refrigerated Transport, Inc. v. United States, 253 F. Supp. 891 (894)*.

However, considering entire record in proceeding on plaintiff's application for authority to transport frozen foods and potato products, the Commission's finding that commodity description in its certificate should be limited to frozen fruits, berries, and vegetables and potato products is not based on adequate subsidiary findings and its ultimate conclusion is not supported by substantial evidence. While the Commission recognized evidentiary factors which would support a finding that a broad commodity description such as "frozen foods" was required by plaintiff's supporters, it made no such finding; nor were any findings made to support its grant of the lesser commodity description. Moreover, no evidence supported the Commission's "scheme" for determining commodity description in certificate granted each applicant in the consolidated proceeding; and no consideration was given to copious evidence of shippers' requirements and the necessity for authority to transport frozen foods other than potatoes, vegetables, fruits, and berries. Order set aside and case remanded for further proceedings in conformity with the court's opinion.—Id., pp. 895-6.

Despite assertion of plaintiffs (protestants in Commission proceeding) to the contrary, the Commission's conclusion that vendor's substantial service justified proposed purchase of its operating rights by intervening defendant is neither without factual foundation nor is it unsound in law. What constitutes substantial service in a given case is a question of fact; and the function of weighing evidence on such a question is one peculiarly for the Commission not the courts. Record shows that the Commission properly considered all evidence presented and that, obviously, the evidence did not require it to find the purchase rights to be dormant. Therefore, since substantial evidence in the record, considered in its entirety, supports the Commission's finding that proposed purchase of vendee's rights would be in the public interest, plaintiffs' action must be dismissed.—Blue Ridge Transfer Company, Inc. v. United States, 283 F. Supp. 858 (860-61)*.

Since §207(a) gives the Commission authority to determine whether public convenience and necessity require issuance of a motor carrier certificate, the court's consideration and review of the order granting certificate to intervening defendant is limited to determining whether there was a "rational basis . . . supported by substantial evidence" for the Commission's action. Upon finding that such a basis exists, the Commission's order is sustained.—National Bus Traffic Association, Inc. v. United States, 284 F. Supp. 270 (272)*.

In reviewing a Commission order, the court considers only the record as made before the Commission, and cannot accept evidence *de novo*, except in cases falling within the jurisdictional facts doctrine or challenging a rate order as confiscatory; thus, since instant case is not within either of those exceptions, the court may consider only evidence contained in the record made before the Commission. Moreover, while rules of procedure relating to discovery of admissible evidence should not be narrowly read, the discovery rule plainly precludes depositions in those instances where no evidence could be admitted in any event; nor has plaintiff shown the requisite good cause to entitle it to discovery and inspection of documents and memoranda. Accordingly, plaintiff's motions for pretrial discovery on the merits are denied.—Interstate Investors, Inc. v. United States, 287 F. Supp. 374 (378, 385-6)*.

In action to set aside Commission orders in complaint proceeding, handled under modified procedure, requiring cancellation of motor carrier rates found unjust and unreasonable because noncompensatory, the court recognizes that the Commission's judgment is entitled to great weight and that neither the wisdom nor consistency of its decisions is within the court's field of inquiry. However, while the scope of review is limited, record in instant case shows agency action that is not in accord with the law and not in observance of procedure required by law. Moreover, it would be unjust to affirm complained of order on the basis of the Commission's modified procedure rules when a liberal administration of those rules would have permitted reception of evidence on the basic issue of compensativeness of the assailed rates. Commission report and orders vacated and annulled; case returned to the Commission for a full hearing as to whether rates at issue are noncompensatory and thus unjust and unreasonable.—United Buckingham Freight Lines v. United States, 288 F. Supp. 883 (885-6, 887)*.

In action to set aside Commission orders denying purchase and related extension applications of two motor carriers, the test of court review of Commission decisions is the same in both a §5 and a §207 proceeding. In reviewing a §207 case, the court cannot substitute its own view as to what should be done (whether regarding competitive considerations or others) for the Commission's judgment on matters committed to its discretion, if that judgment has support in the record and the applicable law. In a §5 proceeding, wisdom and experience of the Commission, not of the courts, must determine whether proposed transaction is consistent with the public interest; and if the Commission did not exceed its statutory discretion, and its findings are adequate and supported by evidence, it is not the court's function to upset its order.—Consolidated Copperstate Lines v. United States, 293 F. Supp. 858 (861)*.

Plaintiffs bolster their challenge of the Commission's decision by the fact that the examiner and four of the commissioners were of the opinion that their applications should be granted; however, that circumstance does not permit the court to vary from established rules of judicial review. Record shows that challenged orders are based on substantial evidence and in accord with applicable law; thus, plaintiffs in effect are asking that the court direct the Commission to be more lenient in its disposition, a position advanced by the four dissenting commissioners. The case does not permit such action by the court even if it were so disposed. Decision and orders of the Commission sustained.—Id., pp. 861-2.

In action to set aside Commission orders granting certificates authorizing interstate motor carrier operations, the court may not disturb the Commission's findings as to whether or not public convenience and necessity warrant issuance of a certificate if such findings are supported by substantial evidence. Even though the record contains substantial evidence supporting a contrary conclusion or, as a matter of first impression, the court might arrive at such contrary conclusion, the reviewing court is bound to affirm the Commission's findings if there is also substantial evidence of record to support them. In light of the Commission's findings and conclusions with respect to the volume of traffic and supporting shippers' potential future markets, and with respect to the need for the various services in question and the applicants' ability to provide them, and the substantial evidence of record in support of those findings and conclusions, the commission's orders in issue are sustained.—Midwest Emery Freight System, Inc. v. United States, 295 F. Supp. 112 (118-9)*.

When, upon further hearing and deliberate and searching reconsideration, the Commission determined that proposed railroad merger and related transactions, subject to the conditions imposed, would be consistent with the public interest and should be approved, the reviewing court does not inquire whether the merger satisfies its conception of public interest. The judicial task is to determine whether the Commission acted in accordance with the law and whether its findings and conclusions accord with statutory standards and are supported by substantial evidence. Accordingly, since the Commission was guided by applicable legal principles and made findings, supported by substantial evidence, requisite to the validity of its action, considered orders approving the merger and related transactions are sustained.—United States v. United States, 296 F. Supp. 853 (855, 856, 862)*.

Judicial review of the Commission's certificate and order, which authorized applicant railroad to abandon certain of its branch lines, is very limited in scope. When, after examining the whole record before it, the reviewing court finds no basis for holding that the Commission's findings are not amply supported by the evidence, that those findings are not adequate to sustain its order, or that the Commission exceeded its statutory authority or abused its discretion, the court may not set aside the order in question. Previously issued temporary restraining order is dissolved and the complaint dismissed.—Cobb v. United States, 297 F. Supp. 169 (170)*.

In Hawaiian truckers' appeal from Commission decision and order an applications for household goods authority between points in Hawaii and points in mainland United States, insofar as it grants authority to 19 mainland carriers, the court's duties are limited to ascertaining whether there is warrant in the law and facts for the Commission's action. Unless there is some specific prejudicial departure from the law, or abuse of the Commission's discretion, a reviewing court may not intervene; however, the Commission has a duty to set forth facts from which its findings and conclusions rationally ensue and to apply the relevant law thereto. While the court is not concerned with consistency or inconsistency of the Commission's decisions, consistency of administrative rulings is essential, for to adopt different standards for similar situations is to act arbitrarily; the law does not permit an agency's grant to one person the authority it denies to another similarly situated. In light of the relevant law, the Commission's evidentiary findings are not sufficient for the court to support its ultimate decision; remanded for further proceedings consistent with the court's ruling.—HC&D Moving & Storage Co., Inc. v. United States, 298 F. Supp. 746 (747, 749-52)*.

In action to enjoin Commission decision and order (which was adverse to plaintiffs) in motor carriers purchase proceeding, and embraced application and complaint proceedings, the reviewing court is limited to the record presented to the Commission. Examination of that record in the light of the authorities cited shows that the Commission followed the law and, also, that its findings of unlawful control of an intrastate carrier by an interstate carrier are supported by substantial evidence, including inferences reasonably drawn therefrom. Accordingly, since the court is not warranted in overturning the Commission's order simply because there is also substantial evidence in the record which would have supported findings favorable to plaintiffs, the complaint is dismissed and previously entered temporary restraining order is vacated.—Washum v. United States, 299 F. Supp. 712 (713)*.

In suit to enjoin, set aside, or remand Commission order permitting discontinuance of passenger trains, there can be little doubt of rationale of the Commission's decision, if the facts are as it found them; thus, petitioners have the burden of proving existence and prejudicial effect of alleged errors and, to establish an assigned error, their evidence must be strong and convincing. Therefore, as there is substantial evidence of record and ample authority in the statute to support the Commission's determinations, and since petitioners failed to carry the burden of showing those determinations to be erroneous, unreasonable or arbitrary, the Commission's order is sustained.—State of New York v. United States, 299 F. Supp. 989 (994, 997-9, 1001)*.

In suit to set aside and annul Commission orders granting intervening motor carrier authority that would enable it to relocate its interchange point, and denying plaintiffs' (protestants) request for rehearing, the scope of court review is extremely limited. The court cannot retry the facts; it may only determine whether the Commission's findings and conclusions are supported by substantial evidence and are arrived at by proper application of relevant legal standards; and in reviewing the denial of rehearing, the court is limited to determining whether or not the Commission abused its discretion. The Commission's finding that applicant (intervenor) showed sufficient public convenience and necessity to justify the grant of authority to relocate its interchange point is based on substantial and largely undisputed evidence and the conclusions drawn are in accord with the proper legal standards; furthermore, record does not show that the Commission's denial of rehearing was a clear abuse of its discretion; therefore, considered decision and orders must be sustained.—Garrett Freightlines, Inc. v. United States, 305 F. Supp. 149 (151-2, 153)*.

Scope of judicial review of administrative action with regard to questions of fact is whether on the record as a whole the agency could reasonably make the finding it did, i.e., the "substantial evidence" test; and, as regards questions of law, whether the expert agency's judgment has warrant in the record and a rational basis in the law. Courts recognize the comparative qualifications of court and agency to decide a particular issue; and, as Congress has delegated power and authority to various agencies to discharge their respective duties and reach practical results, agency expertness in a specialized field often follows. Thus, the court is inclined to give great weight to Commission's latest interpretation of plaintiff's motor carrier certificate, although, to some degree, it appears to represent a change of mind by the experts. Moreover, the Commission may change its mind on certificate interpretation if the final determination is sound; the Commission properly and reasonably decided the issues presented; sustained.—PreFab Transit Co. v. United States. 306 F. Supp. 1247 (1250, 1252)*.

In action seeking review of Commission order granting Oregon Short Line and Union Pacific authority to construct and operate a 13-mile rail line from their main line to newly developing Little Mountain industrial area in Utah, the court's function is to determine whether the Commission's action is supported by substantial evidence on the record as a whole. Though plaintiffs contend the certificate should have been denied, since Southern Pacific is a carrier in the area and, thus, has a preemptive right to all traffic it can economically and efficiently handle, that question is one of fact properly determinable by the Commission. Whether a carrier is "in the area" is a factual issue to be determined from the evidence; and there is substantial evidence to support the commission's conclusion that SP is not a carrier already in the area. While there may be evidence in the record from which the opposite conclusion could be drawn, the possibility of drawing two inconsistent conclusions from the evidence does not prevent the Commission's finding from being supported by substantial evidence.—Denver &R. G. W. R. Co. v. United States, 312 F. Supp. 329 (331-2)*.

Furthermore, even if SP is or will be a carrier in the general area, that fact is not determinative of whether there is need for services of another carrier. Evidence in the record with respect to such factors as inadequacy of present or future rail service, the desirability of competition, and of different kinds of, and improved, service, clearly supports the Commission's finding that public convenience and necessity would best be served by granting defendant railroads' application. The Commission, with its expertise and special knowledge, is allowed broad discretion in determining the "necessity" for a proposed service and the scope of judicial review is exceedingly narrow. Accordingly, after reviewing the record, the Commission's action is found not to constitute an abuse of discretion and to be based on substantial evidence on the record as a whole. Plaintiffs' claim for relief denied, and judgment entered for defendants.—Id., pp. 332-3.

In suit to enjoin and set aside Commission order, which dismissed plaintiff's complaint alleging defendant carrier was operating in violation of its authority, the court's power is limited to ascertaining whether there is warrant in the law and facts for the agency's action. Commission finding that defendant carrier's certificate authorizing regular-route limousine service between Philadelphia airport and Atlantic City, N.J., but not specifying any route or terminal to be used in Atlantic City, did not preclude it from picking up and discharging passengers at other points within corporate limits thereof, was clearly a permissive administrative determination. Such decision being within the Commission's statutory powers, and neither inconsistent with its prior rulings nor made in abuse of its discretion, the reviewing court has no authority to intervene. Further, viability of the challenged service, which depends on continuance of the pickup and discharge service, is in the public interest; and plaintiff's certificate for irregular-route, special non-scheduled limousine service between same points does not entitle it to be free from competition. Complaint dismissed.—Salem Transp. Co. v. United States, 314 F. Supp. 693 (694-6)*.

There is no error of law in the Commission report and order approving varying allowances paid by railroads to shippers for motor carriage of baled cotton from gins to the compress (transit point) based on distances between rail origin points and the transit points, even though the gin is not located at the rail origin point and the baled cotton is not actually tendered at the on-rail origin; therefore, since the Commission's decision is supported by substantial evidence, its order approving considered freight allowance system should be sustained. Complaint dismissed with prejudice.—Federal Compress & Warehouse Co. v. United States, 319 F. Supp. 917 (918)*.

In suit to set aside Commission decision that permitted discontinuance of two passenger trains between St Louis, Mo., and Carbondale, Ill., the court's function is limited to ascertaining whether there is warrant in law and in fact for the agency's action; unless there was prejudicial departure from requirements of the law or abuse of the Commission's discretion, the reviewing court has no authority to intervene. Once the agency conclusions are found to be supported by substantial evidence on the whole record, that ends the matter; but the order must be reversed if the law was not followed or if the Commission's findings are found to be arbitrary or capricious and to have no basis on the record. In instant case, the Commission's ultimate findings are supported by substantial evidence and do not involve any legal error; the Commission followed applicable rules of law in conducting the hearings and reaching its final decision; and there is warrant in the law and the facts for its action. The court finds no prejudicial departure from the law, nor any abuse of the Commission's discretion; considered decision and order, sustained. Temporary restraining order dissolved.—Illinois Commerce Commission v. United States, 320 F. Supp. 205 (209, 211)*.

The doctrine of primary jurisdiction is flexible, not rigid, and the court is not without discretion in its application; where rights may be saved thereby, the court should retain a cause, but should stay its hand pending administrative determination of matters particularly within the agency's jurisdiction. Thus, while only questions of law which the court could decide (doctrine of primary jurisdiction having no application in such cases) are involved in petition to modify order enjoining agricultural cooperative from engaging in unlawful for-hire carrier operations, since the matter is now before the Commission, the court will stay its hand pending determination by the agency of whether an agricultural cooperative may hold temporary authority to lease motor carrier certificate which it has contracted to purchase from the owner and, conversely, whether the Commission can issue, or authorize transfer of, a certificate to a qualified cooperative, either on a temporary or permanent basis. Proceedings stayed pending Commission decision or further court order.—I. C. C. v. Milk Producers Marketing Co., 320 F. Supp. 738 (742)*.

Judicial review of a Commission order is very limited. The court's function is to determine whether ultimate findings of the Commission are supported by substantial evidence on the whole record and do not involve an error of law; and once it finds that substantial evidence supports the findings and that, in arriving at its determination, the Commission did not depart from applicable rules of law, that ends the matter. While a Commission order must be reversed if it fails to follow the applicable law or if its findings are arbitrary and capricious and have no basis on the record as a whole, substantial evidence need not necessarily be a preponderance of evidence; it is enough if it is that degree of evidence which would justify, if the trial were to a jury, refusal to direct a verdict when the conclusion to be drawn is one of fact for a jury. Therefore, since plaintiffs failed to prove that, on the record as a whole, considered Commission decision and orders are arbitrary or capricious or not in accord with applicable statutes, the complaint is dismissed.—Beaufort Transfer Co. v. United States, 324 F. Supp. 649 (651-2, 653)*.

The scope of judicial review of Commission orders, that granted authority to defendant motor carriers, is such that if the Commission's actions are supported by substantial evidence on the record as a whole, then incorrect, misleading and prejudicial statements of fact by the hearing examiner, *which are insubstantial* or which do not negate the substantiality of the agency actions will not afford grounds for the court's setting aside the orders and enjoining issuance of the certificates. However, there is no merit in plaintiff's argument that considered orders erroneously affirmed and adopted incorrect, misleading and prejudicial statements of fact in the examiner's report, since examination of the record reveals that many of those statements, when read in full context, are not inaccurate and are supported by substantial evidence. On the record as a whole, the Commission's orders appear generally reasonable and well founded; sustained.—Curtis, Inc. v. United States, 327 F. Supp. 291 (293, 295)*.

In suits by two motor carriers to set aside Commission order granting heavy-hauling authority to defendant carriers, the court's task is to review the record to determine whether it contains substantial evidence to support the order, not to weigh the evidence or to substitute its own judgment for that of the Commission. Sole function of the reviewing court is to protect the parties against arbitrary administrative action unfounded in law or fact. While the extent of proof of shipper needs appears to differ on each disputed area, there is substantial evidence of need for single-line heavy-hauler service in each of the respective geographic regions; and that evidence supports the Commission's authorization of new heavy haulers in each area. Therefore, since possibility of economic loss to existing carriers does not preclude issuance of new certificates that will improve service to the public, and the Commission's decision is based on material facts which are supported by substantial evidence, the challenged order is sustained.—Mitchell Bros. Truck Lines v. United States, 327 F. Supp. 796 (798)*.

Courts are not empowered to weigh the evidence *de novo* and reach an independent conclusion. Although the court reviewing administrative action is confined to the record made before the agency, it may review the entire record and is not limited to those portions cited by the parties. On review of the entire record in western railroads' suit to enjoin and set aside the Commission's decision, insofar as it concludes that proposed increase in the waterborne charge at western ports is not shown to be just and reasonable, the court concludes that challenged Commission order is based upon adequate findings and that those findings are supported by substantial evidence. Therefore, carriers' complaint is dismissed.—Atchison, T. & S.F. Ry. v. United States, 334 F. Supp. 651 (654-5)*.

Commission's order is a product of expert judgment which is presumed to be valid. Thus, in suit to set aside, enjoin and annul order of the Commission ordering plaintiff to cease and desist its unlawful operations as a freight forwarder, it is the court's duty to decide whether the Commission's conclusion that plaintiff is a "freight forwarder," as defined in the Act, is based on "substantial evidence." That the reviewing court might have reached a different conclusion is irrelevant if the Commission order is based on adequate findings which are warranted in the law and facts. When viewed as a whole, the record contains sufficient "substantial evidence" to support the Commission's findings; Commission order, sustained.—Metropolitan Shipping Agents of Ill., Inc. v. United States, 342 F. Supp. 1266 (1268, 1269-71)*.

In motor carrier's suit to enjoin Commission order imposing a "single plantsite"—in lieu of the "mixed load"—restriction in its certificate, it is not the court's function to judge the paramount public interest; by statute, that is the business of the Commission. The reviewing court's function is limited to ascertaining whether there is warrant in the law and facts for the Commission's action. Absent a specific prejudicial departure from the law or abuse of the Commission's discretion, the court cannot intervene; nor can it substitute its own opinion, whether respecting competitive considerations or others, for the Commission's judgment on matters committed to its determination, if supported by the record and applicable law. Reviewing the record as a whole, substantial evidence supports the critical Commission finding that a more meaningful restriction in plaintiff's certificate was required to protect competing carriers; also, in substituting the "single plantsite" for the "mixed load" restriction, the Commission did not abuse its discretion. Therefore, injunctive relief sought is denied.—Greenstein Trucking Co. v. United States, 343 F. Supp. 194 (198-200)*.

Commission is expert in the field of transportation and its judgment is entitled to great deference because of its knowledge of conditions in that industry; nevertheless, it must make findings that support its decision which, in turn, must be supported by substantial evidence. In reaching its conclusion that aluminum billets and ingots in question could be loaded individually and manually, or in small packages without use of special equipment, the Commission ignored substantial evidence to the contrary and made a finding that has no evidentiary basis other than a presumption; therefore, its determination that those commodities are not within the scope of plaintiff motor carrier's existing heavy-hauling authority is not based on the substantial evidence required to support its findings. Commission order is set aside and annulled.—Aero Trucking, Inc. v. United States, 346 F. Supp. 826 (828-30)*.

Once court finds substantial evidence in support of Commission's findings, it cannot go further and inquire into the soundness of Commission's reasoning or the wisdom of the result (272 US 658). Nonetheless, we have a recognized obligation under 5 USC §706 (2) (A) to set aside agency conclusions found "otherwise not in accordance with the law". The Commission's conclusion, without adequate basis, in 341 ICC 57 that charges for switch movements to and from repair facilities may be assessed against carrier-owned cars but not against privately owned cars precipitates discrimination in violation of §2 of the Interstate Commerce Act. Commission's order is hereby set aside.—Indiana Harbor Belt R. Co. v. General Amer. Transp. Co., 368 F. Supp. 904 (908)*.

45. [Review]—Orders within scope of delegated authority.—[Vols. 4, 7, 10, 12-19, 21]. —See Land-Air Delivery, Inc. v. United States case, §207(a), n. 9, supra.

48. Soundness of Commission's reasoning. —[Vols. 4, 7, 11-19, 21].—In suit to annul and set aside Commission order granting intervening irregular-route common carrier authority to relocate its interchange point, plaintiffs' contention that the order is arbitrary and capricious because of purported inconsistency with previous Commission order (denying same carrier's application for identical authority), must fail for two reasons: (1) principles of res judicata do not apply to Commission rulings, and (2) factual situation as presented at the two hearings differed in that road conditions had changed, connecting carrier testified at second hearing, and the effect of increased use of new interchange under temporary authority could be evaluated. As the court must judge the appealed proceeding and judge it by the applicable standards, it cannot hold the Commission was right in its first proceeding and wrong in the second, especially since respective records considered at the two agency hearings are not identical. Thus, the alleged inconsistency does not vitiate Commission order under review; sustained.—Garrett Freightlines, Inc. v. United States, 305 F. Supp. 149 (150, 152)*.

In motor carrier's action to enjoin and invalidate Commission orders granting it a "Kingpak," rather than an unrestricted, household goods certificate, it is neither the duty nor the right of the court to inquire into the soundness of the Commission's reasoning, wisdom of its decisions, or the consistency of its conclusion with those reached in similar cases. Fact that an administrative tribunal's new decision departs from the rule of an earlier one does not require corrective action by a reviewing court; the court must decide whether the Commission correctly applied the laws, not whether it followed its own precedents. The Commission's action, sustained.—Towne Services Household Goods Transp. Co. v. United States, 329 F. Supp. 815 (821, 822)*.

49. Expediency or wisdom of order, substitution of judgment.—[Vols. 4, 7, 10-19, 21]. —See also James Hughes, Inc. v. United States case, §309(c), n. 25.

In action to enjoin and set aside Commission order granting a motor carrier certificate, scope of the court's review is limited; and reviewing court will not substitute its independent judgment for that of the Commission's expert determination in considering a matter of appeal.—Howard Hall Co. v. United States, 332 F. Supp. 1076 (1079)*.

54. Review of Commission's findings of fact.—[Vols. 4, 7, 10-19, 21].—In action to set aside the Commission's order denying plaintiff's application for motor carrier authority, the court does not sit as a court of first impression when reviewing factual findings based upon evidence produced before the Commission; only if such findings are not supported by substantial evidence on the record as a whole can they be disturbed.—

Neptune World-Wide Moving, Inc. v. United States, 284 F. Supp. 135 (138)*.

In suit to set aside Commission reports and orders approving considered rail rates, scope of the court's power to review Commission decisions is limited; where it makes adequate findings supported by substantial evidence on the record as a whole, the court must affirm. However, on instant record, substantial evidence does not support the Commission's finding that highly disparate export rates on soybeans to Chicago are neither unreasonable nor unduly prejudicial to Chicago and preferential of Gulf ports, so long as the rate to Chicago never exceeds that to New Orleans, regardless of other factors (including other cost factors, quantities shipped from various origins, distances to destinations, etc.); there is no evidence as to basis for such finding and, absent some information as to other relevant factors, nothing of record substantiates the Commission's conclusions except its expertise. Also, if there is a sound economic basis for the rate structure approved, it does not appear in the findings and reports. As the Commission failed to make adequate fingings to justify its conclusions, the case must be returned to it for further proceedings consistent with the court's opinion.—City of Chicago v. United States, 291 F. Supp. 858 (861-3)*.

55. —Weight of evidence.—[Vols. 4, 7, 10, 12, 13, 15-19, 21].—In action to set aside, enjoin and annul Commission order directing that plaintiff cease and desist from operations found to be unlawful "freight forwarder" operations, many of plaintiff's contentions go to the weight and credibility of the evidence adduced before the Commission. However, it is the exclusive function of the Commission to appraise conflicting testimony or other evidence, to judge the credibility of witnesses and evidence adduced by the parties, and to determine the weight of the evidence.—Metropolitan Shipping Agents of Ill., Inc. v. United States, 342 F. Supp. 1266 (1271)*.

56. —Substantial evidence to sustain order. —[Vols. 4, 7, 10-19, 21].—Upon consideration of the record, briefs, and oral argument in action seeking judicial review of Commission action granting operating authority to three motor carriers (intervening defendants), brought by protestant in the administrative proceeding, it is apparent that the Commission's findings, conclusions, and orders are supported by substantial evidence; that it followed the standards prescribed in the applicable law; and that it did not act arbitrarily or capriciously in making its findings and reaching its conclusions. Therefore, the Commission's decision and orders granting considered certificates are sustained.—Southern Trucking Corporation v. United States, 293 F. Supp. 297 (298)*.

In action to set aside the Commission's grant of authority to intervening defendant to provide motor bus passenger service over roughly the same routes as plaintiff's limousine service, function of the reviewing court is quite restricted; if there is warrant in the facts and the law for the Commission's action, that is all that is necessary, for its judgment is then controlling. Testimony of public witnesses in the Commission proceeding afforded, in content and volume, substantial support for the examimers' conclusions which the Commission adopted; moreover, while plaintiff belittles some of that testimony, credibility of the witnesses is primarily for the examiners who observed them and the court finds no reason to question their determination with regard thereto. Grant of the certificate at issue, sustained; complaint dismissed.—Connecticut Limousine Service, Inc. v. United States, 295 F. Supp. 1335 (1336-7, 1338)*.

Substantial evidence to support a Commission finding means "enough to justify, if the trial were to a jury, a refusal to direct a verdict when the conclusions sought to be drawn from it is one of fact for the jury"; moreover, possibility of drawing two inconsistent conclusions from evidence does not prevent an agency finding from being supported by substantial evidence. [Citing 385 US 49.] Review of the extensive record in the case shows that the Commission had before it substantial evidence upon which to predicate its actions in granting authority to defendant carriers; and plaintiff, in attempting to refute the agency findings of public need for proposed service, cannot equate controverted or disputed evidence with insubstantial evidence. Evidence in the record, which is substantial in terms of the applicable standard, supports the Commission's conclusion that the kind of service needed was not available to shippers; sustained.—Curtis, Inc. v. United States, 327 F. Supp. 291 (294-5)*.

In resolving question whether Commission determination is supported by substantial evidence, general test is used to determine whether agency considered "such relevant evidence as a reasonable man might accept as adequate to support a conclusion." Record before Commission indicates that western railroads were unable to furnish adequate statistical data concerning their current port terminal costs and that, for some time, they had been sharing costs with water carriers. Though plaintiffs' single witness attempted to show reasonableness of overall rate structure on waterborne traffic, he could only offer partial information as to volume of such traffic. Substantial evidence of record supports Commission's finding that carriers had failed to prove that proposed increase in waterborne additive charge at western ports was just and reasonable. Complaint dismissed.—Atchison, T. & S.F. Ry. v. United States, 334 F. Supp. 651 (654-5)*.

61. Burden of proof.—[Vols. 4, 7, 10, 14, 16, 19, 21].—Petitioners, in action seeking to overturn Commission decision permitting discontinuance of passenger-train service, have the burden of proving existence of alleged errors in the findings and of proving prejudicial effect of such errors upon the Commission's conclusions; and, in order to establish the assigned errors, their evidence must be strong and convincing. Therefore, since petitioners failed to carry the heavy burden of showing that the Commission's conclusions (as to need for, and undue burden on interstate commerce of, requiring continuation of the service) were erroneous, arbitrary, or unreasonable, the order of the Commission must be sustained; complaint dismissed.—State of New York v. United States, 299 F. Supp. 989 (997-1001)*.

Evidence in terminal railroad's action to enjoin and annul Commission orders (denying plaintiff leave to abandon portion of its track) is insufficient to support its claim that, in light of its long continued overall losses, denial of its abandonment application was confiscatory. While plaintiff has had long-continued, over-all corporate book-losses, evidence does not indicate that its total railway operation is conducted at a loss; on the contrary, it has continued to operate as a railroad with a low net operating income, not with a net operating loss. Compulsion to continue a public service rendered at a loss is not necessarily an unconstitutional taking of property, since there is no general principle that every component of a whole utility service must show a profit; however, the fact of a loss is an important criterion to be considered in determining reasonableness of an order requiring continuance of such service.—Brooklyn Eastern District Terminal v. United States, 302 F. Supp. 1095 (1099-1100)*.

While compelled continuance of a particular service can amount to a forbidden taking of property without due process of law, whether a carrier facility or service can be abandoned involves broader analysis than a simple showing of segmental loss; decision whether order to continue service is unreasonable requires consideration of the loss factor and, also, the relation of the service or facility to carrier's whole service, public-service value of required continuance, and any other factors conducive to determining whether such service and its losses may be considered in isolation from the rest of the public service involved. The questions, then, would be (1) whether traffic over considered track actually produces losses, so that abandonment would improve plaintiff's railway economics, (2) whether the track sought to be abandoned is in fact an isolable and severable portion of the line of railroad, and (3) whether the economic case for abandonment outweighs the resulting disadvantages, if any, to shippers and the public.—Id., pp. 1100-01.

Evidence fails to support plaintiff's argument that traffic of the three shippers on considered track is handled at differentially heavy loss. Proof of inadequate revenue on traffic of one shipper (which plaintiff would continue serving at other tracks) has no relation to abandonment but rather implies need for fairer rate divisions with line-haul carriers; but plaintiff stated the division was fair and, if overall division is fair in aggregate result, it cannot complain that one isolated rate is confiscatory as between it and one shipper. Moreover, evidence does not show that the portion of plaintiff's line sought to be abandoned is in fact severable segment of rail property or service from an abandonment point of view; on the contrary, the "abandonment" is, in effect, a discriminatory attempt to discontinue service. Conclusion compelled by the evidence is not that a portion of railroad is sought to be abandoned, but that two shippers' traffic is to be jettisoned in the hope of gaining increased traffic of another shipper. An economic case for abandonment is not made out; plaintiff is not entitled to any relief; action dismissed on the merits.—Id., pp. 1101-5, 1107.

A presumption of validity accompanies orders of the Commission, and a party attacking an order has the burden of showing its invalidity. In suit to enjoin and annul Commission order granting temporary authority to defendant carrier, carrier's application and supporting shipper statements, considered along with other record information including the several motor carrier protests, are presumed to have constituted sufficient showing for the grant. Record is convincing that temporary authority was granted after considerable sifting of supporting letter statements and checking them with requirements of Commission rules relating to content of shipper statements; and in view of the Commission's statutory discretion, the nature and application of its rules, and the record information before it, the court cannot say that the grant was arbitrary or capricious or action in abuse of discretion. Presumption of validity not rebutted by plaintiffs; Commission order sustained.—Bell Lines, Inc. v. United States, 306 F. Supp. 209 (215-6, 218)*.

The burden of showing the invalidity of a Commission order rests on the plaintiff suing to enjoin and set aside that order.—Atchison, T. & S.F. Ry. v. United States, 334 F. Supp. 651 (654)*.

63. Contentions not raised before the Commission.—[Vols. 4, 13-19, 21].—In action for review of Commission order granting operating rights to intervenor, it is argued that plaintiff (protestant) did not question before the Commission the variance between the certificate granted and the findings of fact and, therefore, it cannot raise the issue in court; however, objection on that ground was unnecessary where the certificate permitted the same service as plaintiff offers and a timely objection was made to the Commission that there was no evidence to support a finding of inadequacy of existing service, which is a necessary legal basis for considered order. Moreover, in light of the National Transportation Policy, the court cannot approve a certificate which is inconsistent with the findings and the inconsistency is such that existing carriers might be endangered.—Drum Transport, Inc. v. United States, 298 F. Supp. 667 (672-3)*.

In action to enjoin Commission order requiring plaintiffs (defendants in Commission proceeding) to cease and desist from operations found to be in violation of the Interstate Commerce Act, plaintiffs' motion for leave to amend the complaint and to adduce additional evidence is denied; the issue plaintiffs seek to present, which was not submitted to the Commission, may not be raised for the first time in the district court. Furthermore, the court's review of considered order is limited to the record presented to the Commission. Upon examination, that record satisfactorily shows that the Commission followed the law and that its findings are supported by substantial evidence. Complaint dismissed, and temporary restraining order previously entered is vacated.—Washum v. United States, 299 F. Supp. 712 (713)*.

Section 2341. Definitions.—As used in this chapter—* * * * * * * (3) "agency" means—(A) The Commission, when the order sought to be reviewed was entered by the Federal Communications Commission, the Federal Maritime Commission, the Interstate Commerce Commission, or the Atomic Energy Commission, as the case may be; * * * * * * * * * * [Paragraph (3) (A) was amended by adding "the Interstate Commerce Commission" by P. L. 93-584, 88 Stat. 1917, Jan. 2, 1975.]

Section 2342. Jurisdiction of Court of Appeals.—The court of appeals has exclusive jurisdiction to enjoin, set aside, suspend (in whole or in part), or to determine the validity of—* * * * * * * * * * (4) all final orders of the Atomic Energy Commission made reviewable by section 2239 of title 42; and (5) all rules, regulations, or final orders of the Interstate Commerce Commission made reviewable by section 2321 of this title. [Paragraph (5) was added by P. L. 93-584, 88 Stat. 1917, Jan. 2, 1975.]

Historical Note

P. L. 93-584 eliminates the right to District Court review of Commission orders (except as to orders arising out of referrals or orders relating to the payment of money or the collection of fines, penalties, or forfeitures) and places review of Commission orders under jurisdiction of the Court of Appeals pursuant to 28 USC §2341, et seq. Under the new law all suits to review Commission orders must be brought within 60 days of the service of the Commission's administratively final order.—Annual Report, 1975, p. 71.

Section 2403. Intervention by United States; constitutional question.—[Unchanged. See vol. 16, p. 13004.]

FAIR LABOR STANDARDS

Chapter 8—Title 29

Sections 213, 215. Exemptions; Prohibited acts, prima facie evidence.— (b) The provisions of section 7 shall not apply with respect to (1) any employee with respect to whom the Secretary of Transportation has power to establish qualifications and maximum hours of service pursuant to the provisions of section 204 of the Motor Carrier Act, 1935; or (2) any employee of an employer engaged in the operation of a common carrier by rail and subject to the provisions of Part I of the Interstate Commerce Act. * * * (7) any driver, operator, or conductor employed by an employer engaged in the business of operating a street, suburban or interurban electric railway, or local trolley or motorbus carrier, (regardless of whether or not such railway or carrier is public or private or operated for profit or not for profit, if such employee receives compensation for employment in excess of *forty-eight* hours in any workweek at a rate not less than one and one-half times the regular rate at which he is employed. [Former §213 (a)(9) was repealed by Pub. L. 89-601; §213(b)(2) was amended by Pub. L. 93-259, April 8, 1974, 88 Stat. 69; §213(b)(7) was amended by Pub. L. 89-601, September 23, 1966, 80 Stat. 830, and Pub. L. 93-259, April 8, 1974, 88 Stat. 69. §215 unchanged. See vol. 10, p. 8449; vol. 19, p. 16054; vol. 21—p. 17892.]

Notes of Decisions

Volume 10—p. 8449; Volume 11—p. 9770; Volume 12—p. 10583; Volume 13—p. 11221; Volume 14—p. 11739; Volume 15—p. 12358; Volume 17—p. 13721; Volume 19—p. 16054; Volume 21—p. 17892.

1. In general.—[Vols. 10-15, 17, 19, 21].—Employees of noncarrier transportation company that leases and maintains motor carrier equipment, principally to its wholly owned corporate subsidiary which holds interstate carrier authority, are not employees of a motor common carrier and, therefore, they do not come within the motor-carrier exemption from the overtime provisions of the Fair Labor Standards Act. Furthermore, while some aspects of supervising mechanic's work for defendant company indicate that he might be an independent contractor, he works exclusively for that company as an essential, integral part of its every-day operation; therefore, in light of the decision in 331 US 722, the district court correctly classified him as an employee of the company. Judgment of the district court, affirmed.—Hodgson v. Ellis Transportation Co., 456 F. 2d 937 (938-40).

Chapter 50.—GENERAL

Section

5001. Provisions for carrying mail.
5002. Transportation of mail of adjoining countries through the United States.
5003. Establishment of post roads.
5004. Discontinuance of service on post roads.
5005. Mail transportation.
5006. Lien on compensation of contractor.
5007. Free transportation of postal employees.

Section 5001. Provisions for carrying mail—The Postal Service shall provide for the transportation of mail in accordance with the policies established under section 101 (e) and (f) of this title and the provisions of this chapter. Notwithstanding any other provision of this title, the Postal Service may make arrangements on a temporary basis for the transportation of mail when, as determined by the Postal Service, an emergency arises. Such arrangements shall terminate when the emergency ceases and the Postal Service is promptly able to secure transportation services under other provisions of this title.

Section 5002. Transportation of mail of adjoining countries through the United States.—The Postal Service, with the consent of the President, may make arrangements to allow the mail of countries adjoining the United States to be transported over the territory of the United States from one point in that country to any other point therein, at the expense of the country to which the mail belongs, upon obtaining a like privilege for the transportation of United States mail through the country to which the privilege is granted.

Section 5003. Establishment of post roads.—The following are post roads:

(1) the waters of the United States, during the time the mail is carried thereon;

(2) railroads or parts of railroads and air routes in operation;

(3) canals, during the time the mail is carried thereon;

(4) public roads, highways, and toll roads during the time the mail is carried thereon; and

(5) letter-carrier routes established for the collection and delivery of mail.

Section 5004. Discontinuance of service on post roads.—The Postal Service may discontinue service on a post road or part thereof when, in its opinion, the public interest so requires.

Section 5005. Mail transportation.—(a) The Postal Service may obtain mail transportation service—

(1) from common carriers by rail and motor vehicle or persons as provided in chapter 52 of this title;

(2) from air carriers as provided in chapter 54 of this title;

(3) from water carriers as provided in chapter 56 of this title; and

(4) by contract from any person (as defined in section 5201 (7) of this title) or carrier for surface and water transportation under such terms and conditions as it deems appropriate, subject to the provisions of this section.

(b)(1) Contracts for the transportation of mail procured under subsection (a)(4) of this section shall be for periods not in excess of 4 years (or where the Postal Service determines that special conditions or the use of special equipment warrants, not in excess of 6 years) and shall be entered into only after advertising a sufficient time previously for proposals. The Postal Service, with the consent of the holder of any such contract, may adjust the compensation allowed under that contract for increased or decreased costs resulting from changed conditions occurring during the term of the contract.

(2) A contract under subsection (a)(4) of this section may be renewed at the existing rate by mutual agreement between the contractor or subcontractor and the Postal Service.

(3) Any contract between the Postal Service and any carrier or person for the transportation of mail shall be available for inspection in the office of the Postal Service and either the Interstate Commerce Commission or the Civil Aeronautics Board, as appropriate, and in post offices on the post roads involved, as determined by the Postal Service, at least 15 days prior to the effective date of the contract.

(c) The Postal Service, in determining whether to obtain transportation of mail by carrier or person under subsection (a)(1) of this section, by contract under subsection (a)(4) of this section, or by Government motor vehicle, shall use the mode of transportation which best serves the public interest, due consideration being given to the cost of the transportation service under each mode.

Section 5006. Lien on compensation of contractor.—(a) A person who—

(1) performs service for a contractor or subcontractor in the transportation of mail;

(2) files his contract for service with the Postal Service; and

(3) files satisfactory evidence of performance with the Postal Service; shall have a lien on money due the contractor or subcontractor for the service.

(b) The Postal Service may pay the person establishing a lien under subsection (a) of this section the sum due him, when the contractor or subcontractor fails to pay the person the smount of his lien within 2 months after the expiration of the month in which the service was performed. It shall charge the amount so paid to the contract. The payments may not exceed the annual rate of pay of the contractor or subcontractor.

Section 5007. Free transportation of postal employees.—Each person or carrier engaged in the transportation of mail shall carry on any vessel, train, motor vehicle, or aircraft he operates, upon exhibiting their credentials and without extra charge therefor, persons on duty in charge of the mails or when traveling to and from such duty.

Chapter 52.—TRANSPORTATION OF MAIL BY SURFACE CARRIER

Section

5201. Definitions.
5202. Applicability.
5203. Authorization of service by carrier.
5204. Changes in service; placement of equipment.
5205. Evidence of service.

5213. Carrier operations: receipts: expenditures.
5214. Agreements with passenger common carriers by motor vehicle.
5215. Star route certification.

Section 5201. Definitions.—For purposes of this chapter—

(1) "Commission" means the Interstate Commerce Commission:

(2) "carrier" and "regulated surface carrier" mean a railroad, a freight forwarder, a motor carrier, or an express company:

(3) "railroad" means a railway common carrier, including an electric urban and interurban railway common carrier:

(4) "freight forwarder" means any regulated freight forwarder which holds itself out to the general public as a common carrier to transport or provide transportation of property as authorized by a permit issued by the Commission:

(5) "motor carrier" means any common carrier by motor vehicle, except a passenger carrying motor vehicle, within the meaning of section 303 (a) (14) of title 49, which holds a certificate of public convenience and necessity issued by the Commission;

(6) "express company" means any express company engaged in transportation as a common carrier for hire under section 1(3) of title 49;

(7) "person" includes any person other than a carrier holding a certificate of public convenience and necessity issued by the Commission; and

(8) "mail" includes equipment and supplies of the Postal Service.

Section 5202. Applicability.—This chapter applies to mail transportation performed by any person or carrier or carrier combination regardless of the mode of transportation actually used to provide the service.

Section 5203. Authorization of service by carrier.—(a) The Postal Service may establish mail routes and authorize mail transportation service thereon.

(b) A carrier shall transport mail offered for transportation by the Postal Service in the manner, under the conditions, and with the service prescribed by the Postal Service. A carrier is entitled to receive fair and reasonable compensation for the transportation and service connected therewith.

(c) The Postal Service shall determine the trains or motor vehicles upon which mail shall be transported, except that no carrier shall be compelled to transport mail on any train or vehicle which is operated exclusively for the transportation of passengers and their baggage.

(d) A carrier shall transport with due speed such mail as the Postal Service directs under this section.

(e) No carrier shall be required to serve territory it is not otherwise authorized to serve, to provide service for the Postal Service at a rate which is less than compensatory cost, or to provide service at a detriment to the carrier or its other customers.

(f) Any order or determination of the Postal Service providing for the transportation of mail by a motor carrier shall be filed with the Commission. If the Commission finds, within 90 days after the filing, that the order or determination will be detrimental to the motor carrier or its other customers, or that such carrier does not operate equipment suitable for the transportation of mail, the order or determination sahll be terminated.

(g) An order or determination of the Postal Service under this section shall be consistent with the orders of the Commission under sections 5207 and 5208 of this title.

Section 5204. Changes in service; placement of equipment.—(a) The Postal Service may authorize, according to the need therefor, new or additional mail transportation service by carriers at the rate or compensation fixed under this chapter. It may reduce or discontinue service with pro rata reductions in compensation and indemnity for the loss of reasonable investment in equipment used exclusively for mail.

(b) A railroad shall place cars used for full or apartment post office service in position at such times before departure as the Postal Service directs.

Section 5205. Evidence of service.—A carrier shall submit evidence of its performance of mail transportation service, signed by an authorized official, in such form and at such times as the Postal Service requires. Mail transportation service is considered that of the carrier performing it regardless of the ownership of the property used by the carrier.

Section 5206. Fines and deductions.—(a) The Postal Service may fine any carrier an amount not to exceed $500 for each day the carrier refuses to perform mail transportation services required by it at rates or compensation established under this chapter.

(b) The Postal Service shall fine a carrier an amount it deems reasonable for failure or refusal by that carrier to transport mail as required by the Postal Service under section 5203 of this title.

(c) The Board may make deductions from the compensation of a carrier for failure to perform mail transportation service as required under section 5203 of this title. If the failure to perform is due to the fault of the carrier, it may deduct a sum not exceeding twice the compensation applying to such service. Such deductions shall not be made prior to the expiration of 60 days following service upon the carrier by the Board of notice of intention to assess a fine or make a deduction and of the basis therefor.

Section 5207. Interstate Commerce Commission to fix rates.—(a) The Commission shall determine and fix the fair and reasonable rates or compensation for the transportation of mail by carrier and the service connected therewith, and shall prescribe the method of computing such rates or compensation. The Commission shall publish its orders stating its determination under this section which shall remain in force until changed by it after notice and hearing.

(b) For the purpose of determining and fixing rates or compensation under this section, the Commission may make just and reasonable classifications of carriers and, where just and equitable, fix general rates applicable to carriers in the same classification.

(c) In determining and fixing fair and reasonable rates or compensation under this section, the Commission shall consider the relation between the Government and carriers as public service corporations, and the nature of public service as distinguished, if there is a distinction, from the ordinary transportation business of the carriers.

(d) Initial rates or compensation for mail transportation service by any carrier or carriers shall be those agreed to by the Postal Service and the carrier or carriers, and such rates or compensation shall continue in effect until such time as the Commission fixes the rates or compensation under subsection (a) of this section.

Section 5208. Procedures.—(a) At any time after 6 months from the entry of an order stating the Commission's determination under section 5207 of this title, the Postal Service or an interested carrier may apply for a reexamination and substantially similar proceedings as have theretofore been had shall be followed with respect to the rates of compensation for services covered by the application. At the conclusion of the hearing the Commission shall enter an order stating its determination.

(b) Except as authorized by sections 5207 (d), 5209, 5210, and 5212 of this title, the Postal Service shall pay a carrier the rates or compensation so determined and fixed for application at such stated times as named in the order.

(c) The Postal Service may file with the Commission a comprehensive plan stating—

(1) its requirements for the transportation of mail by carrier;

(2) the character and speed of the trains or motor vehicles which are to carry the various kinds of mail;

(3) the service, both terminal and en route, which carriers are to render;

(4) what it believes to be the fair and reasonable rates or compensation for the services required; and

(5) all other information which may be material to the inquiry, but such other information may be filed at any time in the discretion of the Commission.

(d) When a comprehensive plan is filed, the Commission shall give notice of not less than 30 days to each carrier required by the Postal Service to transport mail pursuant to such plan. A carrier may file its answer at the time fixed by the Commission, but not later than 30 days after the expiration date fixed by the Commission in the notice, and the Commission shall proceed with the hearing.

Section 5209. Special rates.—Upon petition by the Postal Service, the Commission shall determine and fix carload or truckload, or less than carload or truckload, rates for the transportation of mail not entitled to high priority in transportation. A carrier shall perform the service at the rates so determined when requested to do so and under the conditions prescribed by the Postal Service.

Section 5210. Intermodal transportation.—The Postal Service may permit a carrier to perform mail transportation by any form of transportation it deems appropriate at rates or compensation not exceeding those allowable for similar service by the designated form of transportation.

Section 5211. Statistical studies.—The Postal Service may arrange for weighing and measuring mail transported on carrier mail routes and make other computations for statistical and administrative purposes to carry out the purposes of this chapter.

Section 5212. Special contracts.—The Postal Service may enter into special contracts with any carrier or person, without advertising, for bids and for periods not in excess of 4 years. It may contract to pay lower rates or compensation or, where in its judgment conditions warrant, higher rates or compensation than those determined or fixed by the Commission. The fact that the Commission has not prescribed rates or compensation for the carrier involved, under section 5207 of this title, shall not preclude execution of a contract under this section. Such contracts may be negotiated only after reasonable notice has been posted in advance in post offices on the post roads to be served, and other carriers or persons have been given an opportunity to offer to negotiate for the transportation of mail.

Section 5213. Carrier operations; receipts; expenditures.—The Postal Service shall request any carrier transporting the mails to furnish, under seal, such data relating to the operations, receipts and expenditures of such carrier as may, in its judgment, be deemed necessary to enable it to ascertain the cost of mail transportation and the proper compensation to be paid for such service.

Section 5214. Agreements with passenger common carriers by motor vehicle.—The Postal Service may enter into contracts under such terms and conditions as it shall prescribe and without advertising for bids for the transportation of mail, in passenger-carrying motor vehicles, by passenger common carriers, or by motor vehicles over the regular routes on which the carrier is permitted by law to transport passengers.

Section 5215. Star route certification.—(a) Any person who was a contractor under a star route, mail messenger, or contract motor vehicle service contract on the effective date of this section (or successor in interest to any such person), shall, upon application to the Commission for the territory within which such contractor operated on or before the effective date of this section be issued a certificate of public convenience and necessity as a motor carrier for the transportation of mail by the Commission without the Commission's requiring further proof that the public convenience and necessity will be served by such operation and without further proceedings.

(b) Applications of persons who were not contractors on the effective date of this section shall be decided in accordance with applicable Commission procedure.

(c) For purposes of this section, the term 'person' has the same meaning given that term under section 1 of title 1. [Public Law 91-375, Part V, Aug. 12, 1970, 84 Stat. 766. See vol. 21, p. 17898.]

Regulations of the Commission

36 FR 6426, April 3, 1971, Part 1332: Filing Contracts for Surface Mail Transportation (new part), regulations governing the filing with the Commission of motor carrier mail transportation orders or determinations of the Postal Service, added, effective on date specified and published by the Board of Governors, U.S. Postal Service, or on date of publication, whichever occurs later, but not later than Aug. 12, 1971.

36 FR 13032, July 13, 1971, Part 1332: Filing Contracts for Surface Mail Transportation, §1332.3(b), (d), and (e) amended, effective July 1, 1971, or on date of publication in Federal Register, whichever occurs later.

TITLE 42—THE PUBLIC HEALTH AND WELFARE

CHAPTER 55—NATIONAL ENVIRONMENTAL POLICY

Section 4331. [§*101 as enacted*] Congressional declaration of national environmental policy.—(a) The Congress, recognizing the profound impact of man's activity on the interrelations of all components of the natural environment, particularly the profound influences of population growth, high-density urbanization, industrial expansion, resource exploitation, and new and expanding technological advances and recognizing further the critical importance of restoring and maintaining environmental quality to the overall welfare and development of man, declares that it is the continuing policy of the Federal Government, in cooperation with State and local governments, and other concerned public and private organizations, to use all practicable means and measures, including financial and technical assistance, in a manner calculated to foster and promote the general welfare, to create and maintain conditions under which man and nature can exist in productive harmony, and fulfill the social, economic, and other requirements of present and future generations of Americans.

(b) In order to carry out the policy set forth in this Act, it is the continuing responsibility of the Federal Government to use all practicable means, consistent with other essential considerations of national policy, to improve and corrdinate Federal plans, functions, programs, and resources to the end that the Nation may—

(1) fulfill the responsibilities of each generation as trustee of the environment for succeeding generations;

(2) assure for all Americans safe, healthful, productive, and esthetically and culturally pleasing surroundings;

(3) attain the widest range of beneficial uses of the environment without degradation, risk to health or safety, or other undesirable and unintended consequences;

(4) preserve important historic, cultural, and natural aspects of our national heritage, and maintain, wherever possible, an environment which supports diversity and variety of individual choice;

(5) achieve a balance between population and resource use which will permit high standards of living and a wide sharing of life's amenities; and

(6) enhance the quality of renewable resources and approach the maximum attainable recycling of depletable resources.

(c) The Congress recognizes that each person should enjoy a healthful environment and that each person has a reponsibility to contribute to the preservation and enhancement of the environment.

Section 4332. [§ *102 as enacted*] Cooperation of agencies; reports; availability of information; recommendations; international and national coordination of efforts.—The Congress authorizes and directs that, to the fullest extent possible: (1) the policies, regulations, and public laws of the United States shall be interpreted and administered in accordance with the policies set forth in this Act, and (2) all agencies of the Federal Government shall—

(A) utilize a systematic, interdisciplinary approach which will insure the integrated use of the natural and social sciences and the environmental design arts in planning and in decisionmaking which may have an impact on man's environment;

(B) identify and develop methods and procedures, in consultation with the Council on Environmental Quality established by title II of this Act, which will insure that presently unquantified environmental amenities and values may be given appropriate consideration in decisionmaking along with economic and technical considerations;

(C) include in every recommendation or report on proposals for legislation and other major Federal actions significantly affecting the quality of the human environment, a detailed statement by the responsible official on—

(i) the environmental impact of the proposed action,

(ii) any adverse environmental effects which cannot be avoided should the proposal be implemented,

(iii) alternatives to the proposed action,

(iv) the relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity, and

(v) any irreversible and irretrievable commitments of resources which would be involved in the proposed action should it be implemented.

Prior to making any detailed statement, the responsible Federal official shall consult with and obtain the comments of any Federal agency which has jurisdiction by law or special expertise with respect to any environmental impact involved. Copies of such statement and the comments and views of the appropriate Federal, State, and local agencies, which are authorized to develop and enforce environmental standards, shall be made available to the President, the Council on Environmental Quality and to the public as provided by section 552 of title 5. United States Code, and shall accompany the proposal through the existing agency review processes;

(D) Any detailed statement required under subparagraph (C) after January 1, 1970, for any major Federal action funded under a program of grants to States shall not be deemed to be legally insufficient solely by reason of having been prepared by a State agency or official, if:

(i) the State agency or official has statewide jurisdiction and has the responsibility for such action,

(ii) the responsible Federal official furnishes guidance and participates in such preparation,

(iii) the responsible Federal official independently evaluates such statement prior to its approval and adoption, and

(iv) after January 1, 1976, the responsible Federal official provides early notification to, and solicits the views of, any other State or any Federal land management entity of any action or any alternative thereto which may have significant impacts upon such State or affected Federal land management entity and, if there is any disagreement on such impacts, prepares a written assessment of such impacts and views for incorporation into such detailed statement.

The procedures in this subparagraph shall not relieve the Federal official of his responsibilities for the scope, objectivity, and content of the entire statement or of any other responsibility under this Act; and further, this subparagraph does not affect the legal sufficiency of statements prepared by State agencies with less than statewide jurisdiction.

(E) study, develop, and describe appropriate alternatives to recommended courses of action in any proposal which involves unresolved conflicts concerning alternative uses of available resources;

(F) recognize the worldwide and long-range character of environmental problems and, where consistent with the foreign policy of the United States, lend appropriate support to initiatives, resolutions, and programs designed to maximize international cooperation in anticipating and preventing a decline in the quality of mankind's world environment;

(G) make available to States, counties, municipalities, institutions, and individuals, advice and information useful in restoring, maintaining, and enhancing the quality of the environment;

(H) initiate and utilize ecological information in the planning and development of resource-oriented projects; and

(I) assist the Council on Environmental Quality established by title II of this Act.

2. Construction and interpretation.—See also Jones, Inc., Ext.—Antipollution Control Commodities case, §207(a), n. 25 *Environment.*

Commission in considering petition for abandonment had duty to consider provisions of NEPA in reaching decision which could lead to increased use of alternative modes of transportation with greater polluting effects. Failure to consider environmental effects requires remand of proceedings for such consideration but does not compel court to vacate abandonment order.—City of New York v. United States, 337 F. Supp. 150 (151-2)*; phrase "to fullest extent possible" in this act imposing duties on all federal agencies with respect to consideration and exploration of environmental effects of their decisions and plan obliges agencies to comply to fullest extent possible, and is not intended to relax obligations of administrative authorities to perform duties set forth in section.—Id., p. 151.

NEPA does not indicate an intent to authorize federal agency to compel a parent or sister company to finance losing subsidiary or affiliate simply because latter's demise will have unfortunate environmental effects. —Id., p. 151.

Under NEPA responsibility for evaluation and consideration of environmental consequences of abandonment of railroad line resides in first instance with Commission.—City of New York v. United States, 344 F. Supp. 929 (939)*; court has serious doubt whether substantial evidence test or abuse of discretion test applies to judicial review of merits of agency decision under NEPA. —Id., p. 940.

Commission's environmental impact statement in connection with abandonment of railroad line was adequate although it was couched in terms of alternatives and evidenced some uncertainty as to precise environmental consequences of abandonment. Report evidences no uncertainty as to its ultimate conclusion that, in light of all relevant factors, the decision will not have a significant environmental impact.—Id., p. 939.

Act does not require that agency hold hearings to investigate environmental consequences of a proposed action, does not specify that findings are necessarily to be made, and does not require formal record.—Id., p. 940.

The statute explicitly requires preparation of an agency impact statement in conjunction with "major Federal actions significantly affecting the quality of the human environment"; thus, since it is conceded that no impact statement accompanied Commission orders which approved railroads' addition of an interim 2.5 percent surcharge to certain tariff rates on freight, the Commission has failed to comply with NEPA unless it can show that its orders either (a) are not a "major Federal action" or (b) do not "significantly [affect] the quality of the human environment." However, while the Commission argues that it made an environmental assessment of the surcharge and that it has no obligation to file an impact statement, at least until permanent rate increases take effect, it has failed to prove either of those propositions.—Students Challenging Regulatory Agency Procedures (S.C.R.A.P.) v. United States, 346 F. Supp. 189 (198-9)*.

Contrary to the Commission's position, fact that temporary rate increases must be decided upon quickly and do not lend themselves to the reflective deliberation required by NEPA is not relevant to importance of the agency action; nor is challenged order disqualified as a "major Federal action" because it is only temporary in nature, to be replaced by a permanent rate structure. Also, the CEQ Guidelines make it plain that the necessity of preparing an impact statement cannot be avoided or postponed by designating a decision "temporary" or by breaking it down into minute component parts. Therefore, in light of the interpretations of the statutory language discussed, it is clear beyond doubt that considered order is a "major Federal action"; and, since the Commission decision involves almost every rairoad in the country, and millions of dollars in freight charges, it requires an impact statement.—Id., pp. 199-200.

Nor is mere fact that the Commission order stated that rate increases involved would have no significantly adverse effect on the environment convincing proof that the order will not significantly affect quality of the environment, within meaning of the statute. Main purpose of an impact statement is to force assessment of environmental impact of a proposed action; thus, a statement is required whenever the action *arguably* will have an adverse environmental impact. And under CEQ Guidelines, a statement is to be prepared if there is *potential* that the environment may be significantly affected; also, proposed actions should be covered in all cases where the environmental impact is likely to be highly controversial. When the test is so understood, it is clear that the danger of an adverse impact is sufficiently real to require an impact statement in instant case. On the record in suit to enjoin the Commission's action for failure to comply with NEPA, therefore, the court holds that an impact on effect of the interim surcharge, to extent that it relates to recyclable goods, is required by the statute. —Id., pp. 200-1.

In order that this Commission may implement the directives of NEPA and related pronouncements, we herein institute a proceeding to determine how the Commission may best implement the national environmental policy and meet our statutory obligations. Considered herein are procedural rules and guidelines, general considerations, and specific proposals affecting filing of environmental impact statements and related issues as further explained in appendix B hereto.—Implementation—Nat. Environmental Policy Act, 1969, 339 I.C.C. 508 (510-13).

The National Environmental Policy Act (NEPA) has been construed by the courts to mean essentially that every Federal agency must consider ecological factors when dealing with activities which may have an impact on man's environment, see 430 F. 2d. 199. Commission therefore adopted special rules and regulations designed to implement the NEPA in accordance with guidelines adopted by the Council on Environmental Quality. These rules amend the Code of Federal Regulations by addition of 49 CFR §1100.250 and will become effective upon their publication in the Federal Register.—Implementation—Natl. Environmental Policy Act, 340 I.C.C. 431 (436-41).

Commission required that environmental statements, alleging whether the environment will be affected by the Commission action sought, must be filed with all initial papers filed with this Commission, to enable earliest consideration of the environmental issues and to ensure fullest compliance with the guidelines of the Council.—Id., p. 439.

Notice of all proceedings which may affect human environment will be given to the public through publication in Federal Register insofar as is practicable and to the Council on Environmental Quality and appropriate governmental bodies. An initial decision that environmental issues are not present will not preclude a later finding that such issues are involved and the consequent giving of public notice.—Id., p. 440-41.

Upon remand in 337 F. Supp. 150, Commission concluded that although question of possible environmental damage from grant of application herein has been raised, the denial of application would result in the financial collapse of applicant and under the balancing test in *Calvert Cliffs,* No. 24, 839 (U.S. Ct. App., D.C. 1971), economic harm outweighs environmental damage. Application approved.—Bush Terminal R. Co. Entire Line Abandonment, 342 I.C.C. 34 (35)*.

Total or substantial discontinuance of service sought in this §13a proceeding not approved as such action would increase highway traffic and automobile exhaust pollution levels.—Chicago S.S. & S.B.R. Restructuring of Pass. Serv., 342 I.C.C. 154 (194).

5. Environmental impact statement, when required.—Considered Commission order allowing railroads to add a 2.5 percent interim surcharge to normal freight tariff rates was a "major Federal action" which, under the statute, requires preparation of an agency environmental impact statement, even though the order is only temporary in nature and notwithstanding the fact that temporary rate increases must be decided upon quickly; furthermore, in light of a sufficiently real danger of an adverse impact, the order "significantly [affects] the quality of the human environment" and, thus, an impact statement is required in instant case. Accordingly, in suit to enjoin implementation of challenged order because of the Commission's failure to comply with NEPA, after the traditional balancing of the equities, preliminary relief sought by plaintiff is granted to the extent that the interim surcharge relates to goods being shipped for purposes of recycling.—Students Challenging Regulatory Agency Procedures (S.C.R.A.P.) v. United States, 346 F. Supp. 189 (198-202)*.

In plaintiff's action to enjoin subsequent Commission decision approving selective percentage rate increases because of the agency's failure to prepare an environmental impact statement in conjunction therewith, however, any further equitable relief would be inappropriate. The court's earlier decision is presently before the Supreme Court for review of the preliminary relief granted therein. Also, though no final environmental impact statement was issued with respect to Commission approval of the percentage increases, plaintiff has failed to satisfy requirements, as set forth in 249 F. 2d 921, for granting preliminary equitable relief. Therefore, rather than issue preliminary injunctive relief, the case should be allowed to proceed to the merits for determination whether the Commission, in considered decision, undertook major federal action significantly the quality of the environment which should have been preceeded by an impact statement under NEPA. Motion or preliminary injuction, denied.—Id., 353 F. Supp. 317 (321-3, 324)*.

In compliance with requirements of Council on Environmental Quality, this Commission will issue an environmental impact statement together with and as part of each initial determination made as a result of any hearing (oral or written) in those cases determined to involve environmental issues. Such statements and initial determinations will be circulated to appropriate governmental agencies and made available to the general public in manner prescribed by the Council. All hearings on these issues will be public subject to the Administrative Procedure Act.—Implementation—Natl. Environmental Policy Act, 1969, 340 I.C.C. 431 (441-43).

All interested persons were given due notice that environmental issues would be considered in instant general-revenue proceeding, and all participants have full opportunity to express their views as to impact that previously approved temporary surcharge and requested selective rate increases, to supplant the surcharge, may have on the quality of the human environment; however, many of the comments and presentations submitted, while helpful, are plainly advanced in furtherance of the parties' own particular or special interests. There is no absolute or mathematically conclusive method of balancing the environmental, economic, and social values involved in such a proceeding; therefore, in attempting to analyze the probable results of its action in the proceeding, the Commission carefully examined the evidence, applied its expertise in surface transportation, and used to the fullest extent possible (given the limitations of time and budget) all available expertise in ecological, economical, and social areas. —Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (313-4, 316)*.

The NEPA impact statement is designed to assure that Federal agencies investigate and give weight to significant environmental effects caused by their action, to require development of less damaging alternatives, and to assure that effects are made known to the public before action is taken. The CEQ Guidelines seek to allow an agency to assess potential effect of a considered action so that adverse effects may be avoided, and environmental quality restored or enhanced, to fullest extent practicable. While the Commission endeavors to develop fully the record in its proceedings, limited funds and personnel as well as nature of the subject matter preclude its direct gathering of any significant amount of environmental data; however, it has used all *practicable* means and measures to evaluate environmental considerations to the fullest extent possible. Also, as the Commission must depend on the parties to a proceeding to furnish substantially all needed information, and as it does not believe Congress intended it to go beyond the "practicable" when enacting NEPA, it will continue to direct the parties to supply information necessary for proper evaluation of environmental issues coming within its jurisdiction.—Id., pp. 318-9.

Thus, the Commission's duty under NEPA to develop the extent of impacts of the surcharge and proposed selective increases will, in its judgment, be entirely satisfied by full consideration of the basic environmental questions presented by the parties: (1) whether increased rail rates will divert traffic from the railroads to other transportation modes in degradation of the human environment, and (2) whether proposed rate increases will adversely affect shipment (and hence, recycling) of secondary materials. Evidence of record convincingly shows that, despite approved increases, secondary materials will continue to move by rail about as they have for many years; it also shows that, without those increases, railroads will not be able economically and efficiently to provide the shipping public with service it requires. Railroads must move freight at reasonable rates and, where practical, should promote shipment of secondary materials; to direct them to do more is to require that they bear their customers' environmental burdens which, financially, most lines are not able to assume. Also, it is the Commission's statutory duty to prevent the carriers from pursuing any course which might jeopardize their total ability and duty to serve.—Id., pp. 319-21.

Mere assertion that approval of the selective increases will tend to divert traffic to truck movement, thereby further despoiling the environment, is no basis for so deciding. While the trend of traffic has been away from railroads, recent marked shifts in traffic patterns fairly cannot be attributed to railroad pricing policies. Truck transportation long has been noted as offering certain advantages over rail movement; at the same time, railroad service to some extent has been deficient. Also, shippers' demand for rail service varies, being much greater for some commodities than for others and more pronounced for shorter distances than for longer; and as to some freight catagories, truckers and barge lines have proved to be forceful and effective competitors of the railroads. In such competitive context the threat of diversion resulting from approval of railroads' proposal fails to agree with reality, for it is unlikely that railroads will avail themselves of the permissive authority to increases rates and charges except to the extent that levels of truck and barge line rates enable them to do so without losing the traffic.—Id., pp. 321-5.

However, even assuming, *arguendo*, that the rail increases would tend to divert traffic to truck transportation, it does not thereby follow that the environment will be further despoiled; at best, the data on relative polluting effect of train and truck operations is fragmentary and inconclusive. Sufficient probative data are not available or published to permit a reliable comparison of exhaust emission characteristics, fuel consumption, and noise levels of locomotives and trucks, although it appears that they are not markedly dissimilar. Nevertheless, in analysis of economic and regulatory aspects of increases proposed in various commodity groups, environmental factors are given careful consideration. Based on that analysis, the Commission is persuaded that prior recent general increases in rail rates and charges have not substantially affected the use, consumption, or shipping of secondary materials, and that increases currently authorized will have no significant adverse effect on the quality of the human environment.—Id., pp. 325-8.

The Commission (Division 1) concluded that action in the applications herein did not constitute a major Federal action having a significant effect on the human environment within the meaning of the National Environmental Policy Act. Commission believes that through its longstanding policy of approving only those operations demonstrably required by the public, adverse environmental effects will be mitigated and the mandate of NEPA fulfilled; and when special circumstances are found to require special remedies, they will be adopted. See 114 MCC 92. However, this decision will be served on the Council on Environmental Quality and the other Federal agencies listed herein as a matter of courtesy.—Jones, Inc., Ext.—Antipollution Control Commodities, 118 M.C.C. 253 (265-69).

Section 4333. [§*103 as enacted*] Conformity of administrative procedures to national environmental policy.—All agencies of the Federal Government shall review their present statutory authority, administrative regulations, and current policies and procedures for the purpose of determining whether there are any deficiencies or inconsistencies therein which prohibit full compliance with the purposes and provisions of this Act and shall propose to the President not later than July 1, 1971, such measures as may be necessary to bring their authority and policies into comformity with the intent, purposes, and procedures set forth in this Act.

Section 4334. [§*104 as enacted*] Other statutory obligations of agencies.—Nothing in Section 102 or 103 shall in any way affect the specific statutory obligations of any Federal agency (1) to comply with criteria or standards of environmental quality, (2) to coordinate or consult with any other Federal or State agency, or (3) to act, or refrain from acting contingent upon the recommendations or certification of any other Federal or State agency.

Section 4335. [§*105 as enacted*] Efforts supplemental to existing authorizations.—The policies and goals set forth in this Act are supplementary to those set forth in existing authorizations of Federal agencies. (Public Law 91-190, title I, Jan. 1, 1970, 83 State. 852; Public Law 94-83, Aug. 9, 1975, 89 Stat. 424, amended section 102(2) by adding new subparagraph (D) and redesignating subparagraphs (D), (E), (F), (G), and (H) as (E), (F), (G), (H), and (I), respectively.)

ENERGY POLICY AND CONSERVATION ACT

Title 42—Chapter 77, U. S. Code

Energy Conservation in Policies and Practices of Certain Federal Agencies

Sec. 382 [December 22, 1975] [*42 U.S.C. §6362*]. (a)(1) The Civil Aeronautics Board, the Interstate Commerce Commission, the Federal Maritime Commission, the Federal Power Commission, and the Federal Aviation Administration shall each conduct a study and shall each report to the Congress within 60 days after the date of enactment of this Act with respect to energy conservation policies and practices which such agencies have instituted subsequent to October 1973.

(2) Each of the agencies specified in paragraph (1) shall, within 120 days after the date of enactment of this Act, report to the Congress with respect to the content and feasibility of proposed programs for additional savings in energy consumption by the persons regulated by each such agency which have as a minimum goal a 10-percent reduction, within 12 months of the institution of such programs, in energy consumption from the amount of energy consumed during calendar 1972, including any legislative recommendations each such agency finds are necessary to achieve such goal.

(3) Each of the agencies specified in paragraph (1) shall conduct a study and prepare a report with respect to any requirement of any law administered by such agency or any major regulatory action which the agency determines has the effect of requiring, permitting, or inducing the inefficient use of petroleum products, coal, natural gas, electricity, and other forms of energy, together with a statement of the need, purpose, or justification of any such requirement or such action. Each such report shall be submitted to the Congress within one year after the date of enactment of this Act.

(b) Except as provided in subsection (c), each of the agencies specified in subsection (a)(1) shall, where practicable and consistent with the exercise of their authority under other law, include in any major regulatory action (as defined by rule by each such agency) taken by each such agency, a statement of the probable inpact of such major regulatory action on energy efficiency and energy conservation.

(c) Subsection (b) shall not apply to any authority exercised under any provision of law designed to protect the public health or safety.

[Pub. L. 94-163, 89 Stat. 939.]

SUBMERGED LANDS

Title 43—Chapter 29, U.S. Code

Subchapter III.—Outer Continental Shelf Lands

Section 1334. Administration of Leasing.—[Unchanged. See Vol. 19 p. 16065].

2. Construction and interpretation.—District attorney of Santa Barbara County, Calif., was properly enjoined pending termination of litigation from attempting to frustrate the power of the United States to develop Outer Continental Shelf by use of private leases to oil companies by threatening such oil companies under California statute prohibiting maintenance of a public nuisance.—Union Oil Co. of Calif. v. Minier, 437 F. 2d. 408 (409).

SAFETY APPLIANCE ACTS

Chapter I—Title 45

Historical Note

The functions, powers, and duties assigned to the Commission by this Act have been transferred (in whole or in part) to the Secretary of Transportation, by Public Law 89-670, the Department of Transportation Act [49 U.S.C. §1651] dated Oct. 15, 1966.

Section 1. Driving-wheel brakes and appliances for operating trainbrake system.—[See vol. 4, p. 3225.]

Historical notes, see vol. 4, p. 3225, vol. 18, p. 14757; vol. 19, p. 16066.

Notes of Decisions

Volume 4—p. 3226; Volume 7—p. 6155; Volume 10—p. 8466; Volume 11—p. 9771; Volume 13—p. 11223; Volume 14—p. 11743; Volume 15—p. 12364; Volume 16—p. 13007; Volume 17—p. 13726; Volume 18—p. 14757; Volume 19—p. 16066; Volume 21—p. 17900.

Section 2. Automatic couplers.—[See vol. 4, p. 3238.]

Notes of Decisions

Volume 4—p. 3238; Volume 7—p. 6161; Volume 10—p. 8468; Volume 11—p. 9772; Volume 12—p. 10586; Volume 14—p. 11744; Volume 15—p. 12364; Volume 17—p. 13727; Volume 18—p. 14758; Volume 19—p. 16068; Volume 21—p. 17902.

Section 3. Refusal of insufficiently equipped cars from connecting lines.—[See vol. 4, p. 3244.]

Historical notes, see vol. 4, p. 3225.

Notes of Decisions

Volume 4—p. 3244.

Section 4. Grab irons or handholds for security in coupling and uncoupling cars.—[See vol. 4, p. 3245.]

Historical notes, see vol. 4, p. 3225.

Notes of Decisions

Volume 4—p. 3245; Volume 7—p. 6162; Volume 10—p. 8469; Volume 18—p. 14759; Volume 19—p. 16068.

Section 5. Standard height of drawbars for freight cars; noncomplying cars excluded from traffic.—[See vol. 4, p. 3247.]

Historical notes, see vol. 4, p. 3225.

Notes of Decisions

Volume 4—p. 3247; Volume 17—p. 13728.

Section 6. Failure to equip cars as provided; duty of United States Attorneys and Interstate Commerce Commission; exceptions from operation of provisions.—[See vol. 4, p. 3249; vol. 19, p. 16069.]

Historical note, see vol. 4, p. 3249, vol. 18, p. 14760, vol. 19, p. 16069.

Notes of Decisions

Volume 4—p. 3250; Volume 7—p. 6163; Volume 10—p. 8470; Volume 11—p. 9773; Volume 12—p. 10586; Volume 13—p. 11224; Volume 14—p. 11745; Volume 15—p. 12366; Volume 16—p. 13008; Volume 17—p. 13728; Volume 18—p. 14760; Volume 19—p. 16069; Volume 21—p. 17904.

Section 7. Assumption of risk by employees.—[See vol. 4, p. 3257.]

Historical note, see vol. 4, p. 3225.

Section 8. Provisions of chapter extended.—[See vol. 4, p. 3258.]

Historical notes, see vol. 4, p. 3258.

Notes of Decisions

Volume 4—p. 3259; Volume 7—p. 6164; Volume 10—p. 8472; Volume 11—p. 9773; Volume 13—p. 11225; Volume 14—p. 11746; Volume 15—p. 12366; Volume 16—p. 13009; Volume 17—p. 13730; Volume 18—p. 14761; Volume 19—p. 16069; Volume 21—p. 17906.

Section 9. [§*2 as enacted*] Number of cars to be operated with power or train brakes; increase of number.—[See Vol. 18, p. 14762.]

Notes of Decisions

Volume 4—p. 3269; Volume 7—p. 6167; Volume 10—p. 8473; Volume 14—p. 11746; Volume 15—p. 12367; Volume 16—p. 13011; Volume 19—p. 16070; Volume 21—p. 17907.

Section 10. Former duties, requirements, and liabilities continued unless specifically amended.—[See vol. 4, p. 3271.]

Historical note, see vol. 4, 3258.

Section 11. Safety appliances required for each car; when hand brakes may be omitted.—[See vol. 4, p. 3272.]

Historical note, see vol. 4, p. 3272.

Notes of Decisions

Volume 4—p. 3272; Volume 7—p. 6168; Volume 10—p. 8475; Volume 12—p. 10587; Volume 13—p. 11225; Volume 14—p. 11747; Volume 15—p. 12368; Volume 16—p. 13011; Volume 17—p. 13730; Volume 18—p. 14763; Volume 19—p. 16072; Volume 21—p. 17908.

Section 12. Safety appliances as designated by Commission to be standards of equipment; modification of standard height of drawbars.—[See vol. 4, p. 3274.]

Historical note, see vol. 4, p. 3272.

Notes of Decisions

Volume 4—p. 3274; Volume 10—p. 8475; Volume 19—p. 16075; Volume 21—p. 17910.

Section 13. Penalty for using car not equipped as provided; hauling car for repairs where equipment becomes defective; liability for death or injury of employee; use of chains instead of drawbars.—[See vol. 4, p. 3277, vol. 18, p. 14764.]

Historical note, see vol. 4, p. 3272.

Notes of Decisions

Volume 4—p. 3278; Volume 7—p. 6169; Volume 10—p. 8476; Volume 13—p. 11226; Volume 14—p. 11747; Volume 16—p. 13012; Volume 17—p. 13731; Volume 19—p. 16075; Volume 21—p. 17911.

Sections 14, 15, 16.—[See vol. 4, p. 3283, 3284.]

Notes of Decisions

§14: Volume 4—p. 3283.

ASH PAN ACT

Historical Note

The functions, powers, and duties assigned to the Commission by this Act have been transferred (in whole or in part) to the Secretary of Transportation, by Public Law 89-670, the Department of Transportation Act [49 U.S.C. §1651] dated Oct. 15, 1966.

Sections 17—21. Locomotives to be equipped with safety ash pans; penalty for violation; enforcement.—[See vol. 4, p. 3285, 3286.]

Historical note, see vol. 4, p. 3285.

LOCOMOTIVE INSPECTION ACT

Historical Note

The functions, powers, and duties assigned to the Commission by this Act have been transferred (in whole or in part) to the Secretary of Transportation, by Public Law 89-670, the Department of Transportation Act [49 U.S.C. §1651] dated Oct. 15, 1966.

Section 22. Inspection of locomotives and appurtenances; definitions.—[See vol. 4, p. 3287.]

Historical notes, see vol. 4, p. 3287, vol. 11, p. 9774.

Notes of Decisions

Volume 4—p. 3288; Volume 7—p. 6172; Volume 10—p. 8478; Volume 11—p. 9774; Volume 13—p. 11227; Volume 16—p. 13012; Volume 17—p. 13732; Volume 18—p. 14765; Volume 21—p. 17912.

Section 23. Use of unsafe locomotive and appurtenances unlawful; inspection and tests.—[See vol. 4, p. 3291.] (Feb. 17, 1911, c. 103, §2, 36 Stat. 913; Mar. 4, 1915, c. 169, §1, 38 Stat. 1192; June 7, 1924, c. 355, §2, 43 Stat. 659.)

Historical notes, see vol. 4, p. 3291, vol. 12, p. 10587, vol. 13, p. 11227, vol. 14, p. 11748.

Notes of Decisions

Volume 4—p. 3291; Volume 7—p. 6173; Volume 10—p. 8478; Volume 12—p. 10588; Volume 13—p. 11227; Volume 14—p. 11748; Volume 15—p. 12369; Volume 16—p. 13013; Volume 17—p. 13733; Volume 18—p. 14765; Volume 19—p. 16077; Volume 21—p. 17912.

Section 24. Director and assistant directors of locomotive inspection; appointment and salaries.—[See vol. 17, p. 13733, vol. 14, p. 11749.]

Amendments, see footnotes, vol. 4, p. 3295, vol. 10, pp. 8482-83, vol. 14, p. 11749, vol. 17, p. 13735. Historical notes, see vol. 4, p. 3295, vol. 18, p. 14766, vol. 21, p. 17914.

RAILROAD RETIREMENT TAX ACT

26 USC §3231, Railroad Retirement Tax Act, 1954, Internal Revenue Code. [Vol. 17, p. 13702.]

RAILROAD RETIREMENT ACT OF 1974

Title 45.—Chapter 9

DEFINITIONS

Sec. 1. [August 29, 1935, June 24, 1937, August 13, 1940, October 16, 1974.] [*45 U. S. C. §231*] For the purposes of this Act—

(a)(1) The term "employer" shall include—

(i) any express company, sleeping-car company, and carrier by railroad, subject to part I of the Interstate Commerce Act;

(ii) any company which is directly or indirectly owned or controlled by, or under common control with, one or more employers as defined in paragraph (i) of this subdivision, and which operates any equipment or facility or performs any service (except trucking service, casual service, and the casual operation of equipment or facilities) in connection with the transportation of passenger or property by railroad, or the receipt, delivery, elevation, transfer in transit, refrigeration or icing, storage, or handling of property transported by railroad;

(iii) any receiver, trustee, or other individual or body, judicial or otherwise, when in the possession of the property or operating all or any part of the business of any employer as defined in paragraph (i) or (ii) of this subdivision;

(iv) any railroad association, traffic association, tariff bureau, demurrage bureau, weighing and inspection bureau, collection agency, and any other association, bureau, agency, or organization which is controlled and maintained wholly or principally by two or more employers as defined in paragraph (i), (ii), or (iii) of this subdivision and which is engaged in the performance of services in connection with or incidental to railroad transportation; and

(v) any railway labor organization, national in scope, which has been or may be organized in accordance with the provisions of the Railway Labor Act, as amended, and its State and National legislative committees, general committees, insurance departments, and local lodges and divisions, established pursuant to the constitution or bylaws of such organization.

(2) Notwithstanding the provisions of subdivision (1) of this subsection, the term "employer" shall not include—

(i) any company by reason of its being engaged in the mining of coal, the supplying of coal to an employer where delivery is not beyond the mine tipple, and the operation of equipment or facilities therefor, or in any such activities; and

(ii) any street, interurban, or suburban electric railway, unless such railway is operating as a part of a general diesel-railroad system of transportation, but shall not exclude any part of the general diesel-railroad system of transportation now or hereafter operated by any other motive power. The Interstate Commerce Commission is hereby authorized and directed upon request of the Board, or upon complaint of any party interested, to determine after hearing whether any line operated by electric power falls within the terms of this paragraph.

* * * * *

(c) The term "employee representative" means any officer or official representative of a railway labor organization other than a labor organization included in the term "employer" as defined in subsection (a) who before or after August 29, 1935, was in the service of an employer as defined in subsection (a) and who is duly authorized and designated to represent employees in accordance with the Railway Labor Act, as amended, and any individual who is regularly assigned to or regularly employed by such officer or official representative in connection with the duties of his office.

* * * * *

(j) The term "company" includes corporations, associations, and joint-stock companies.

(m) The term "United States," when used in a geographical sense, means the States and the District of Columbia.

* * * * *

(o) An individual shall be deemed to have a "current connection with the railroad industry" at the time an annuity begins to accrue to him and at death if, in any thirty consecutive calendar months before the month in which an annuity under this Act begins to accrue to him, or the month in which he dies if that first occurs, he will have been in service as an employee in not less than twelve calendar months and, if such thirty calendar months do not immediately precede such month, he will not have been engaged in any regular employment other than employment for an employer or employment with the Department of Transportation, the Interstate Commerce Commission, the National Mediation Board, or the Railroad Retirement Board in the period before such month and after the end of such thirty months. For the purposes of section 2(d) only, an individual shall be deemed also to have a "current connection with the railroad industry" if he will have completed ten years of service and (A) he would be neither fully nor currently insured under the Social Security Act if his service as an employee after December 31, 1936, were included in the term "employment" as defined in that Act, or (b) he has no quarters of coverage under the Social Security Act.

* * * * *

FREE TRANSPORTATION

Sec. 17. [June 24, 1937, October 16, 1974.] [*45 U.S.C. §231p*] It shall not be unlawful for carriers by railroad subject to this Act to furnish free transportation to individuals receiving annuities under this Act in the same manner as such transportation is furnished to employees in their service.

* * * * *

Sec. 602. (a) [October 16, 1974.] [*45 U. S. C. §231a*] The provisions of title I of this Act shall become effective on January 1, 1975, except as otherwise provided herein.

* * * * *

(b) The provision of section 1(o) of the Railroad Retirement Act of 1974 which provides that a "current connection with the railroad industry" will not be broken by "employment with the Department of Transportation, the Interstate Commerce Commission, the National Mediation Board, or the Railroad Retirement Board" shall not be applicable (A) for purposes of paragraph (iv) of section 2(a)(1) of such Act, to an individual who became disabled, as provided for purposes of such paragraph, prior to January 1, 1975, (B) for purposes of section 2(b)(1) of such Act, to an individual whose annuity under section 2(a) of the Railroad Retirement Act of 1937 or section 2(a)(1) of the Railroad Retirement Act of 1974 first began to accrue prior to January 1, 1975, and (C) for purposes of section 2(d)(1) of such Act, to a survivor of a deceased employee if such employee died prior to January 1, 1975.

Historical Note

The Railroad Retirement Act of 1935, 49 Stat. 967-973, was amended by and incorporated in the Railroad Retirement Act of 1937, 50 Stat. 307. The latter was amended by the Railroad Retirement Act of 1974, October 16, 1974, P. L. 93-445 [88 Stat. 1305].

RAIL PASSENGER SERVICE ACT
Title 45—Chapter 14

Title I—Findings, Purposes, and Definitions

Section 101. CONGRESSIONAL FINDINGS AND DECLARATION OF PURPOSE—[October 30, 1970, June 22, 1972, November 3, 1973, October 28, 1974, May 26, 1975, February 5, 1976.] [*45 U.S.C. §501*] The Congress finds that modern, efficient, intercity railroad passenger service is a necessary part of a balanced transportation system; that the public convenience and necessity require the continuance and improvement of such service to provide fast and comfortable transportation between crowded urban areas and in other areas of the country; that rail passenger service can help to end the congestion on our highways and the overcrowding of airways and airports; that the traveler in America should to the maximum extent feasible have freedom to choose the mode of travel most convenient to his needs; that to achieve these goals requires the designation of a basic national rail passenger system and the establishment of a rail passenger corporation for the purpose of providing modern, efficient, intercity rail passenger service; that Federal financial assistance as well as invesment capital from the private section of the economy is needed for this purpose; and that interim emergency Federal financial assistance to certain railroads may be necessary to permit the orderly transfer of railroad passenger service to a railroad passenger corporation.

Section 102. DEFINITIONS. [*45 U.S.C. §502*] For the purposes of this Act—

(1) "Railroad" means a common carrier by railroad, as defined in section 1(3) of part I of the Interstate Commerce Act, as amended (49 U.S.C. 1(3)) other than the corporation created by title III of this Act.

(2) "Secretary" means the Secretary of Transportation or his delegate unless the context indicates otherwise.

(3) "Commission" means the Interstate Commerce Commission.

(4) "Basic system" means the system of intercity rail passenger service designated by the Secretary under title II and section 403(a) of this Act.

(5) "Intercity rail passenger service" means all rail passenger service other than commuter and other short-haul service in metropolitan and suburban areas, usually characterized by reduced fare, multiple-ride and commutation tickets, and by morning and evening peak period operations.

(6) "Avoidable loss" means the avoidable cost of providing passenger service, less revenues, attributable thereto, as determined by the Interstate Commerce Commission pursuant to the provisions of section 553 of title 5, United States Code.

(7) "Corporation" means the National Railroad Passenger Corporation created under title III of this Act.

(8) "Regional transportation agency" means an authority, corporation, or other entity established for the purpose of providing passenger service within a region.

(9) "Auto-ferry service" means intercity rail passenger service characterized by transportation of automobiles and their occupants.

5. Intercity rail passenger service.—The Commission, using the six criteria established in 338 ICC 318 found the subject rail service between Philadelphia and Harrisburg. Pa., to be "commuter and other short haul" in nature and not "intercity rail passenger service" within the meaning of this act. The term "commuter and other short-haul" service could reflect an operation extending beyond a metropolitan area to another metropolitan area as is the case herein. Further, inasmuch as this act makes no direct or indirect reference to the inclusion of substituted bus-for-rail service and the legislative history of the statute does not envision any bus service, the Commission found such service, between Lancaster and York, Pa., is not "intercity rail passenger service.—Penn Central Transp. Co.—Status of Passenger Serv., 338 I.C.C. 621 (635-41).

The Commission's function in this case, in accord with district court's order for the Commission to investigate the status of the subject trains, is to determine the character of the service actually being rendered and to analyze that service in light of certain limited and definite statutory language. Therefore, the Commission, using the six criteria established in 338 ICC 318 found the considered rail service between New York City and Chatham, N.Y., to be "intercity rail passenger service" although such service has some minor characteristics of commuter trains, i.e., frequent stops and "casual" use for commuter purposes.—Penn Central Transp. Co.—Status of Passenger Serv., 338 I.C.C. 660 (666-69).

Commission found all subject trains operating solely between New York, N. Y., and Phila., Pa., to be commuter trains. Subject rail service contains 4 metropolitan areas but the actual use of the subject service by passengers as well as adherence to the criteria set forth in 338 ICC 621 show that this service is definitely commuter or short haul in nature. However, four other trains considered herein were found to constitute "intercity rail passenger service" primarily because of the enormous distances between their terminal points and the fact that the metropolitan areas they serve are not contiguous.—Penn Central Transp. Co.—Status of Passenger Serv., 338 I.C.C. 690 (699-703).

Upon request for an opinion by a district court, the Commission found all trains involved herein to be intercity rail passenger trains as defined by the criteria expounded in 338 ICC 318, especially as regards the substantial distances covered. Therefore, defendant lawfully discontinued such trains and the Commission has no jurisdiction to intervene in this proceeding.—Kennedy v. Baltimore & O. R. Co., 342 I.C.C. 19 (20-22).

Regulations of the Commission

39 FR 1047, Jan. 4, 1974, Part 1124: Regulations Governing the Adequacy of Intercity Railroad Passenger Service. Regulations promulgated and numbered 49 CFR §1124.1 et al.

39 FR 41985, Dec. 4, 1974, Part 1124: Regulations Governing the Adequacy of Intercity Railroad Passenger Service. Regulations promulgating penalties for violations, effective on date of service.

TITLE II—BASIC NATIONAL RAIL PASSENGER SYSTEM

Section 201. DESIGNATION OF SYSTEM. [*45 U.S.C. §521.*] In carrying out the congressional findings and declaration of purpose set forth in title

I of this Act, the Secretary, acting in cooperation with other interested Federal agencies and departments, is authorized and directed to submit to the Commission and to the Congress within thirty days after the date of enactment of this Act his preliminary report and recommendations for the basic system. Such recommendations shall specify those points between which intercity passenger trains shall be operated, identify all routes over which service may be provided, and the trains presently operated over such routes, together with basic service characteristics of operations to be provided within the basic system, taking into account schedules, number of trains, connections, through car service, and sleeping, parlor, dining, and lounge facilities. In recommending the basic system the Secretary shall take into account the need for expeditious intercity rail passenger service within and between all regions of the continental United States, and the Secretary shall consider the need for such service within the States of Alaska and Hawaii and the Commonwealth of Puerto Rico. In formulating such recommendations the Secretary shall consider opportunities for provision of faster service, more convenient service, service to more centers of population, and service at lower cost, by the joint operation, for passenger service, of facilities of two or more railroad companies; the importance of a given service to overall viability of the basic system; adequacy of other transportation facilities serving the same points; unique characteristics and advantages of rail service as compared to other modes of transportation; the relationship of public benefits of given services to the costs of providing such services; and potential profitability of the service. The exclusion of a particular route, train, or service from the basic system shall not be deemed to create a presumption that the route, train, or service is not required by public convenience and necessity in any proceeding under section 13a of the Interstate Commerce Act (49 U.S.C. 13a).

Section 202. REVIEW OF THE BASIC SYSTEM. [*45 U.S.C. §522.*] The Commission, the State Commissions, the representatives of the railroads, and labor organizations duly authorized under the Railway Labor Act to represent railroad employees shall, within thirty days after receipt of the preliminary report of the Secretary designating the basic system, review such report consistent with the purposes of this Act and provide the Secretary with their comments and recommendations in writing, The Secretary shall give due consideration to such comments and recommendations. The Secretary shall, within ninety days after the date of enactment of this Act, submit his final report designating the basic system to the Congress. Such final report shall include a summary of their recommendations with his reasons for failing to adopt any such recommendation. The basic system as designated by the Secretary shall become effective for the purposes of this Act upon the date that the final report of the secretary is submitted to Congress and shall not be reviewable in any court.

TITLE III—CREATION OF A RAIL PASSENGER CORPORATION

Section 301. CREATION OF THE CORPORATION. [*45 U.S.C. §541.*] There is authorized to be created a National Railroad Passenger Corporation. The Corporation shall be a for profit corporation, the purpose of which shall be to provide intercity rail passenger service, employing innovative operating and marketing concepts so as to fully develop the potential of modern rail service in meeting the Nation's intercity passenger transportation requirements. The Corporation will not be an agency or establishment of the United States Government. It shall be subject to the provisions of this Act and, to the extent consistent with this Act, to the District of Columbia Business Corporation Act. The right to repeal, alter, or amend this Act at any time is expressly reserved.

Section 302. PROCESS OF ORGANIZATION. [*45 U.S.C. §542*] The President of the United States shall appoint not fewer than three incorporators, by and with the advice and consent of the Senate, who shall also serve as the board of directors for one hundred and eighty days following the date of enactment of this Act. The incorporators shall take whatever actions are necessary to establish the Corporation, including the filing of articles of incorporation, as approved by the President.

Section 303. DIRECTORS AND OFFICERS. [*45 U.S.C. §543.*] (a)(1) The Corporation shall have a board of directors consisting of seventeen individuals who are citizens of the United States selected as follows:

(A) The Secretary of Transportation, ex officio.

(B) Nine members appointed by the President, by and with the advice and consent of the Senate, to serve for terms of four years or until their successors have been appointed and qualified, of whom not more than five shall be appointed from the same political party.

(C) Three members elected annually by the common stockholders of the Corporation.

(D) Four members elected annually by the preferred stockholders of the Corporation, which members shall be elected as soon as practicable after the first issuance of preferred stock by the Corporation.

(2) Any vacancy in the membership of the board shall be filled in the same manner as in the case of the original selection; except that any member appointed by the President under paragraph (1)(B) of this subsection to fill a vacancy shall be appointed only for the unexpired term of the member he is appointed to succeed.

(3) The board shall elect one of its members annually to serve as Chairman.

(4) Not less than three members appointed by the President shall be designated by him, at the time of their appointment, to serve as consumer representatives, of whom not more than two shall be members of the same political party.

(5) Each member not employed by the Federal Government shall receive compensation at the rate of $300 per diem when engaged in the actual performance of duties. In addition, each member shall be reimbursed for necessary travel, secretarial or professional staff support which is reasonably required and subsistence expenses incurred in attending meetings of the board.

(6) No member elected by railroads shall vote on any action of the board relating to any contract or operating relationship between the Corporation and a railroad, but he may be present at meetings of the board at which such matters are voted upon, and he may be included for purposes of determining a quorum and may participate in discussions at any such meeting.

(7) No member appointed by the President may—

(A) have any direct or indirect financial or employment relationship with any railroad, nor

(B) have any significant direct or indirect financial relationship, or any direct or indirect employment relationship, with any person engaged in the transportation of passengers in competition with the Corporation, during the time that he serves on the board.

(8) Pending the election of the four members by the preferred stockholders of the Corporation under paragraph (1)(D) of this subsection, seven members shall constitute a quorum for the purpose of conducting the business of the board.

(9) Any vacancy in the membership of the board of directors required to be filled by appointment by the President under paragraph (1) (B) of this subsection shall be filled by the President not more than one hundered and twenty days after such vacancy occurs.

(b) The board of directors is empowered to adopt and amend by laws governing the operation of the Corporation. Such bylaws shall not be inconsistent with the provisions of this Act or of the articles of incorporation.

(c) The articles of incorporation of the Corporation shall provide for cumulative voting for all stockholders and shall provide that, upon conversion of one-fourth of the outstanding shares of preferred stock, the common stockholders shall be entitled to elect four directors and the preferred stockholders shall be entitled to elect three directors; upon the conversion of one-half of the outstanding shares of preferred stock, the common stockholders shall be entitled to elect five directors and the preferred stockholders shall be entitled to elect two directors; upon the conversion of three-fourths of the outstanding shares of preferred stock, the common stockholders shall be entitled to elect six directors and the preferred stockholders shall be entitled to elect one director; and upon conversion of all outstanding shares of preferred stock, the common stockholders shall be entitled to elect seven directors. Any change of directors resulting from such stock conversion shall take effect at the next annual meeting of the Corporation following such stock conversion.

(d) The Corporation shall have a president and such other officers as may be named and appointed by the board. The rates of compensation of all officers shall be fixed by the board. No officer of the Corporation shall receive compensation at a rate in excess of that prescribed for level I of the Executive Schedule under section 5312 of title 5, United States Code; except that this limitation upon compensation shall not apply in the case of the president of the Corporation if the board determines with respect to such officer that a higher level of compensation is necessary and is not higher than $85,000 or the general level of compensation paid officers of railroads in positions of comparable responsibility, whichever is lesser. Officers shall serve at the please of the board. No individual other than a citizen of the United States may be an officer of the Corporation. No officer of the Corporation may have any direct or indirect employment or financial relationship with any railroad during the time of his employment by the Corporation.

Section 304. FINANCING OF THE CORPORATION. [*45 U.S.C. §544.*]

(a) The Corporation is authorized to issue and have outstanding, in such amounts as it shall determine, two issues of capital stock, a common and a preferred, each of which shall carry voting rights and be eligible for dividends. Common stock may be initially issued only to a railroad. Preferred stock may be issued to and held only by any person other than (1) a railroad or (2) any person controlling one or more railroads, as defined in section 1(3)(b) of the Interstate Commerce Act. The articles of incorporation of the Corporation shall provide for the following respective rights of each issue of stock.

(A) COMMON STOCK.—Common stock shall have a par value of $10 per share and shall be designated fully paid and nonassessable. No dividends shall be paid on the common stock whenever dividends on the preferred stock are in arrears.

(B) (i) PREFERRED STOCK.—Preferred stock shall have a par value of $100 per share and shall be designated fully paid and nonassessable. Dividends shall be fixed at a rate not less than 6 per centum per annum, and shall be cumulative so that, if for any dividend period dividends at the rate fixed in the articles of incorporation shall not have been declared and paid or set aside for payment on the preferred shares, the deficiency shall be declared and paid or set apart for payment prior to the making of any dividend or other distribution on the common shares.

(ii) Preferred stock shall be entitled to a liquidation preference over common stock, which shall entitle preferred stockholders to a liquidating payment not less than par value plus all accrued unpaid dividends prior to any payment on liquidation to common stockholders.

(iii) Preferred stock shall be convertible into shares of common stock at such time and upon such terms as the articles of incorporation shall provide.

(b) At no time after the initial issue is completed shall the aggregate of the shares of common stock of the corporation voted by a single railroad or by any person controlling one or more railroads, as defined in section 1(3) (b) of the Interstate Commerce Act, directly or indirectly through subsidiaries or affiliated companies, nominees, or any person subject to its direction or control, exceed 33 1/3 per centum of such shares issued and outstanding. If any railroad or any person controlling one or more railroads, as defined in section 1(3)(b) of the Interstate Commerce Act (49 U.S.C. 1(3) (b)), owns, directly or indirectly through subsidiaries or affiliated companies, nominees, or any person subject to its direction or control, a number of shares in excess of 33 1/3 per centum of the total number of common shares issued and outstanding, such excess number shall, for voting and quorum purposes, be deemed to be not issued and outstanding.

(c) At no time may any stockholder, or any syndicate or affiliated group of such stockholders, own more than 10 per centum of the shares of preferred stock of the Corporation issued and outstanding.

(d) The articles of incorporation shall provide that no shares of any issue of stock may be redeemed or repurchased for five years, following the date of enactment of this Act.

(e) The Corporation is authorized to issue, in addition to the stock authorized by subsection (a) of this section, nonvoting securities, bonds, debentures, and other certificates of indebtedness as it may determine.

(f) The requirement of section 45(b) of the District of Columbia Business Corporation Act (D.C. Code, sec. 29-920(b)) as to the percentage of stock which a stockholder must hold in order to have the rights of inspection and copying set forth in that subsection shall not be applicable in the case of holders of the stock of the Corporation, and they may exercise such rights without regard to the percentage of stock they hold.

Section 305. GENERAL POWERS OF THE CORPORATION. [*45 U.S.C. §545*] (a) The Corporation is authorized to own, manage, operate, or contract for the operation of intercity trains operated for the purpose of providing modern, efficient, intercity transportation of passengers and to carry mail and express on such trains; to conduct research and development related to its mission; and to acquire by construction, purchase, or gift, or to contract for the use of, physical facilities, equipment, and devices necessary to rail passenger operations. Insofar as is practicable, the Corporation shall directly operate and control all aspects of its rail passenger service. To carry out its functions and purposes, the Corporation shall have the usual powers conferred upon a stock corporation by the District of Columbia Business Corporation Act.

(b) The Corporation shall take such actions as may be necessary to increase its revenues from the carriage of mail and express. In order to increase revenues and to better accomplish the purposes of this Act, the Corporation is authorized to modify its services to provide auto-ferry service as a part of the basic passenger services authorized by this Act, except that nothing contained in this Act shall prevent any other person, other than a railroad (except that for purposes of this section a person primarily engaged in auto-ferry service shall not be deemed to be a railroad), from providing such auto-ferry service over any route in accordance with a certificate issued by the Commission if—

(1) the Commission finds that such auto-ferry service—

(A) will not impair the ability of the Corporation to reduce its losses or to increase its revenues, and

(B) is required to meet the demands of the public, or

(2) such auto-ferry service is being performed by such person on the date of enactment of this paragraph under contracts entered into before October 30, 1970. Nothing in this section shall be construed to restrict the right of a railroad that has not entered into a contract with the Corporation for the provision of rail passenger service from performing auto-ferry service over its own lines. The Corporation is authorized to acquire, lease, modify, or develop the equipment and facilities required for the efficient provision of mail, express, and auto-ferry service, or to enter into contracts for the provision of such service. Upon request by the Corporation, Federal departments and agencies shall, consistent with the provisions of existing law, provide such assistance as may be necessary in carrying out the purposes of this subsection.

(c) The Corporation is authorized to take all steps necessary to insure that no elderly or handicapped individual is denied intercity transportation on any passenger train operated by or on behalf of the corporation, including but not limited to, acquiring special equipment and devices and conducting special training for employees; designing and acquiring new equipment and facilities and eliminating architectural and other barriers in existing equipment and facilities to comply with the highest standards for the design, construction and alteration of property for the accommodation of elderly and handicapped individuals; and providing special assistance while boarding and alighting and in terminal areas to elderly and handicapped individuals.

(d) (1) The Corporation is authorized, to the extent financial resources are available—

(A) to acquire any property which the Secretary, acting in furtherance of his responsibility to design and construct an intermodal transportation terminal at Union Station in the District of Columbia, requests, upon assurance of full reimbursement by the Secretary; and

(B) to acquire any right-of-way, land, or other property (except right-of-way, land, or other property of a railroad or property of a State or political subdivision thereof or of any other governmental agency), which is required to provide intercity rail passenger service;

by the exercise of the right of eminent domain, in accordance with the provisions of this subsection, in the district court of the United States for the judicial district in which such property is located or in any such court if a single piece of property is located in more than one judicial district: *Provided*, That such right may only be exercised when the Corporation cannot acquire such property by contract or is unable to agree with the owner as to the amount of compensation to be paid.

(2) The Corporation shall file with the complaint, or at any time before judgment, a declaration of taking containing or having annexed thereto—

(A) a statement of the public use for which the property is taken:

(B) a description of the property taken sufficient for the identification thereof;

(C) a statement of the estate or interest in the property taken;

(D) a plan showing the property taken; and

(E) a statement of the amount of money estimated by the Corporation to be just compensation for the property taken.

(3) Upon the filing of the declaration of taking and the depositing in court of the amount of money estimated in such declaration to be just compensation for the property, the property shall be deemed to be condemned and taken for the use of the Corporation. Title to such property shall there-upon vest in the Corporation in fee simple absolute or in any lesser estate or interest specified in the declaration of taking, and the right to the money deposited as estimated just compensation shall immediately vest in the persons entitled thereto. The court, after a hearing, shall make a finding as to the amount of money which constitutes just compensation for such property and shall make an award and enter judgment accordingly. Such judgment shall include, as part of the just compensation awarded, interest on the amount finally awarded as the value of the property on the date of taking minus the amount deposited in the court on such date, at the rate of 6 per centum per annum from the date of taking to the date of payment.

(4) Upon the application of the parties in interest, the court may order that the money deposited in the court, or any part thereof, be paid forthwith for or on account of the just compensation to be awarded in the proceeding. If the compensation finally awarded exceeds the amount of money re-

ceived by any person entitled to compensation, the court shall enter judgment against the Corporation for the amount of the deficiency.

(5) Upon the filing of a declaration of taking, the court may fix the time within which, and the terms upon which, the parties in possession are required to surrender possession to the Corporation. The court may make such orders in respect to encumbrances, liens, rents, taxes, assessments, insurance, and other charges, if any, as shall be just and equitable.

(e) The Corporation is authorized to take all steps necessary to—

(1) establish improved reservations systems and advertising;

(2) service, maintain, repair, and rehabilitate railroad passenger equipment;

(3) conduct research and development and demonstration programs respecting new rail passenger services;

(4) develop and demonstrate improved rolling stock;

(5) establish and maintain essential fixed facilities for the operation of passenger trains on lines and routes included in the basic system, over which no through passenger trains are being operated at the time of enactment of this Act, including necessary track connections between lines on the same or different railroads;

(6) purchase or lease railroad rolling stock;

(7) develop and operate international intercity rail passenger service between points within the United States and points in Canada and Mexico, including Montreal, Canada; Vancouver, Canada; and Nuevo Laredo, Mexico (for purposes of section 404(b) of this Act, such international rail passenger service is service included within the basic system); and

(8) to carry out other corporate purposes.

(f) The Corporation shall, to the maximum extent practicable, directly perform all maintenance, rehabilitation, repair, and refurbishment of rail passenger equipment. Until the Corporation obtains, by purchase, lease, construction, or any other method of acquisition, Corporation-owned or controlled facilities which are adequate for the proper maintenance, repair, rehabilitation, and refurbishment of the rolling stock and other equipment and facilities of the Corporation, the railroads performing such services shall do so as expeditiously as possible.

(g) The Corporation shall advise, consult and cooperate with, and upon request, is authorized to assist in any other manner the Secretary, the United States Railway Association, the Corps of Engineers, and the Consolidated Rail Corporation in order to facilitate completion and implementation of the Northeast Corridor project, as defined in section 206(a)(3) of the Regional Rail Reorganization Act of 1973, by the earliest practicable date. The Secretary shall assign the highest priority to the completion of such project.

(h) The Secretary of the Treasury and the Attorney General shall (consistent with the effective enforcement of the immigration and customs laws) establish and maintain, in cooperation with the Corporation, en route customs inspection and immigration procedures aboard trains operated in international-al intercity rail passenger service, which procedures will be convenient for passengers and will result in the most rapid possible transit in international intercity rail passenger service.

Section. 306 APPLICABILITY OF THE INTERSTATE COMMERCE ACT AND OTHER LAWS. [*45 U.S.C. §546.*] (a) The Corporation shall be deemed a common carrier by railroad within the meaning of section 1(3) of the Interstate Commerce Act and shall be subject to all provisions, including the provisions of section 22(1), of the Interstate Commerce Act other than those pertaining to—

(1) regulation of rates, fares, and charges;

(2) abandonment or extension of lines or railroads utilized solely for passenger service, and the abandonment or extension of operations over such lines of railroads, whether by trackage rights or otherwise;

(3) regulation of routes and service and, except as otherwise provided in this Act, the discontinuance or change of passenger train service operations.

(b) The Corporation shall be subject to the same laws and regulations with respect to safety and with respect to the representation of its employees for purposes of collective bargaining, the handling of disputes between carriers and their employees, employee retirement, annuity and unemployment systems, and other dealings with its employees as any other common carrier subject to part I of the Interstate Commerce Act.

(c) The Corporation shall not be subject to any State or other law pertaining to the transportation of passengers by railroad as it relates to rates, routes, or service.

(d) Leases and contracts entered into by the Corporation, regardless of the place where the same may be executed, shall be governed by the laws of the District of Columbia.

(e) Persons contracting with the Corporation for the joint use or operation of such facilities and equipment as may be necessary for the provision of efficient and expeditious passenger service shall be and are hereby relieved from all prohibitions of existing law, including the antitrust laws of the United States, with respect to such contracts, agreements, or leases insofar as may be necessary to enable them to enter into such contracts and to perform their obligations thereunder.

(f) All departments, agencies, and instrumentalities of the Federal Government shall, in authorizing travel in the continental United States for their employees or for members of the Armed Forces or commissioned services, treat travel by train (whether or not extra fare trains) on the same basis as travel by other authorized modes.

(g) The Corporation shall be subject to the provisions of section 552 of title 5, United States Code.

(h) No common carrier by railroad may refuse to participate with the Corporation in providing auto-ferry service on the grounds that a State or local law or regulation makes the service unlawful; and neither the Corporation nor such railroad shall be subject to any fine, penalty, or other sanction for violation of a State or local law or regulation which has the effect of prohibiting or impairing the provision of auto-ferry service.

(i) The provisions of section 361 on the Public Health Service Act (42 U.S.C. 264) shall not apply to railroad conveyances operated in intercity rail passenger service.

Section 307. SANCTIONS. [*45 U.S.C. §547.*] (a) If the Corporation or any railroad engages in or adheres to any action, practice, or policy inconsistent with the policies and purposes of this Act, obstructs or interferes with any activities authorized by this Act, refuses, fails, or neglects to discharge its duties and responsibilities under this Act, or threatens any such violation, obstruction, interference, refusal, failure, or neglect, the district court of the United States for any district in which the Corporation or other person resides or may be found shall have jurisdiction, except as otherwise prohibited by law, upon petition of the Attorney General of the United States or, in a case involving a labor agreement, upon petition of any employee affected thereby, including duly authorized employee representatives, to grant such equitable relief as may be necessary or appropriate to prevent or terminate any violation, conduct, or threat.

(b) Nothing contained in this section shall be construed as relieving any person of any punishment, liability, or sanction which may be imposed otherwise than under this Act.

Section 308. REPORTS TO THE CONGRESS. [*45 U.S.C. §548.*] (a)(1) Not later than the eightieth day following the end of each calendar month, the Corporation shall transmit to the Congress and release to the public the following information applicable to its operations for such calendar month:

(A) Total itemized revenues and expenses.

(B) Revenues and expenses of each train operated.

(C) Revenues and total expenses attributable to each railroad over which service is provided.

(2) Not later than the fifteenth day following the end of each calendar month, the Corporation shall transmit to the Congress and release to the public the following information applicable to its operations for such calendar month:

(A) The average number of passengers per day on board each train operated.

(B) The on-time performance at the final destination of each train operated, by route and by railroad.

(b) The Corporation shall transmit to the President and to the Congress by February 15 of each year (beginning with 1973), and at such other times as it deems desirable, a comprehensive and detailed report of its operations, activities, and accomplishments under this Act, including a statement of receipts and expenditures for the preceding fiscal year. At the time of its annual report, the Corporation shall submit such legislative recommendations as it deems desirable, including the amount of financial assistance needed for operations and for capital improvements, the manner and form in which the amount of such assistance should be computed, and the sources from which such assistance should be derived.

(c) The Secretary and the Commission shall transmit to the President and to the Congress by March 15 of each year (beginning with 1974) reports (or, in their discretion, a joint report) on the effectiveness of this Act in meeting the requirements for a balanced national transportation system, together with any legislative recommendations. Beginning in 1976, the Secretary's report on the Corporation shall be made part of the Department of Transportation annual report to the Congress.

TITLE IV - PROVISION OF RAIL PASSENGER SERVICES

Section 401. ASSUMPTION OF PASSENGER SERVICE BY THE CORPORATION: COMMENCEMENT OF OPERATIONS. [*45 U.S.C.* §*561*.] (a)(1) On or before May 1, 1971, the Corporation is authorized to contract and, upon written request therefor from a railroad, shall tender a contract to relieve the railroad, from and after May 1, 1971, of its entire responsibility for the provision of intercity rail passenger service. On or after March 1, 1973, but before January 1, 1975, the Corporation is authorized to contract, and upon written request therefor, shall tender a contract to relieve the railroad of its entire responsibility for the provision of intercity rail passenger service and such relief shall become effective upon the date on which such contract is entered into. Contracts may be entered into on or before May 1, 1971, notwithstanding the fact that the decision of the Commission under section 102(f) of this Act with respect to avoidable loss has not become final. Any contract entered into before such decision of the Commission has become final shall be subject to adjustment to assure that the contract is consistent with such final decision of the Commission. The contract may be made upon such terms and conditions as necessary to permit the Corporation to undertake passenger service on a timely basis. Upon its entering into a valid contract (including protective arrangements for employees), the railroad shall be relieved of all its responsibilities as a common carrier of passengers by rail in intercity rail passenger service under part I of the Interstate Commerce Act or any State or other law relating to the provision of intercity passenger service: *Provided*. That any railroad discontinuing a train hereunder must give notice in accordance with the notice procedures contained in section 13a (a) of the Interstate Commerce Act.

(2) In consideration of being relieved of this responsibility by the Corporation, the railroad shall agree to pay to the corporation, each year for three years an amount equal to one-third of 50 percentum of the fully distributed passenger service deficit of the railroad as reported to the Commission for the year ending December 31, 1969. The payment to the Corporation may be made in cash or, at the option of the Corporation, by the transfer of rail passenger equipment or the provision of future service as requested by the Corporation. Unless the railroad waives all rights to receive stock in exchange for its payments, the railroad shall receive common stock from the Corporation in an amount equivalent in par value to each payment.

(3) In agreeing to pay the amount specified in paragraph (2) of this subsection, a railroad may reserve the right to pay a lesser sum to be determined by calculating either of the following:

(A) 100 per centum of the avoidable loss of all intercity rail passenger service operated by the railroad during the period January 1, 1969, through December 31, 1969; or

(B) 200 per centum of the avoidable loss of the intercity rail passenger service operated by the railroad during the period January 1, 1969, through December 31, 1969, covering all intercity service over the routes between those points between which the Secretary, under sections 201 and 202 of title II of this Act, has specified that intercity passenger trains shall be operated within the basic system.

If the amount owed the Corporation under either of these alternatives is agreed by the parties to be less that the amount paid pursuant to paragraph (2), the Corporation shall pay the difference to the railroad and the railroad shall surrender to the Corporation an amount of stock, at par value, equivalent to such payment. If the railroad and the Corporation are unable to agree as to the amount owed, the matter shall be referred to the Interstate Commerce Commission for decision. The Commission, upon investigation, shall decide the issue within ninety days following the date of referral, or within such additional time as the Commission may order not to exceed an aggregate of on hundred and eighty days following such date of referral, and its decision shall be binding on both parties.

(4) The payments to the Corporation shall be made in accordance with a schedule to be agreed upon between the parties. Unless the parties otherwise agree, the payments for each of the first twelve months following the date on which the Corporation assumes any of the operational responsibilities of the railroad shall be in cash and not less than one thirty-sixth of the amount owed.

(b) On May 1, 1971, the Corporation shall begin the provision of intercity rail passenger service between points within the basic system unless such service is being provided (i) either by a railroad with which it has not entered into a contract under subsection (a) of this section or (ii) by a regional transportation agency, provided such agency gives satisfactory assurance to the

Corporation of the agency's financial and operating capability to provide such service, and of its willingness to cooperate with the Corporation and with other regional transportation agencies on matters of through train service, through car service, and connecting train service. The Corporation may at any time subsequent to May 1, 1971, contract with a regional transportation agency to provide intercity rail passenger service between points within the basic system included within the service of such agency.

(c) Except as provided in section 305 (b) of this Act concerning auto-ferry service, no railroad or any other person may, without the consent of the Corporation, conduct intercity rail passenger service over any route over which the Corporation is performing scheduled intercity rail passenger service pursuant to a contract under this section.

2. Construction and interpretation.—Section 401 makes it mandatory that Amtrak enter into a contract relieving a railroad of its entire responsibility for the provision of interstate passenger service; and sets out the formula for computing the consideration (entry fee) which the relieved carrier must pay. It provides for contracts only between Amtrak and railroads and it deals especially with relieving the railroads of their prior obligations.—Penn Central—Compensation for Passenger Service, 342 I.C.C. 765 (767).

Section 402. FACILITY AND SERVICE AGREEMENTS. [*45 U.S.C. §562*] (a) The Corporation may contract with railroads or with regional transportation agencies for the use of tracks and other facilities and the provision of services on such terms and conditions as the parties may agree. In the event of a failure to agree, the Interstate Commerce Commission shall within ninety days after application by the Corporation, if it finds that doing so is necessary to carry out the purposes of this Act, order the provision of services or the use of tracks or facilities of the railroad by the Corporation, on such terms and for such compensation as the Commission may fix as just and reasonable, and the rights of the Corporation to such services or to the use of tracks or facilities of the railroad or agency under such order or under an order issued under subsection (b) of this section shall be conditioned upon payment by the Corporation of the compensation fixed by the Commission. In fixing just and reasonable compensation for the provision of services ordered by the Commission under the preceding sentence, the Commission shall, in fixing compensation in excess of incremental costs, consider quality of service as a major factor in determining the amount (if any) of such compensation. If the amount of compensation fixed is not duly and promptly paid, the railroad or agency entitled thereto may bring an action against the Corporation to recover the amount properly owed. Notwithstanding any other provision of this Act, the Corporation may enter into agreements with any other railroads and with any State (or local or regional transportation agency) responsible for providing commuter rail or rail freight services over tracks, rights-of-way, and other facilities acquired by the Corporation pursuant to authority granted by the Regional Rail Reorganization Act of

1973 and the Railroad Revitalization and Regulatory Reform Act of 1976. In the event of a failure to agree, the Commission shall order that rail services continue to be provided, and it shall, consistent with equitable and fair compensation principles, decide, within 180 days after the date of submission of a dispute to the Commission, the proper amount of compensation for the provision of such services. The Commission, in making such a determination, shall consider all relevant factors, and shall not permit cross subsidization among intercity, commuter, and rail freight services.

(b) To facilitate the initiation of operations by the Corporation within the basic system, the Commission shall, upon application by the Corporation, require a railroad to make immediately available tracks and other facilities. The Commission shall thereafter promptly proceed to fix such terms and conditions as are just and reasonable.

(c) To facilitate such operations by the Corporation as may be deemed by it to be necessary in an emergency, the Commission shall, upon application by the Corporation, require a railroad to make immediately available tracks and other facilities for the duration of such emergency. The Commission shall thereafter promptly proceed to fix such terms and conditions as are just and reasonable including indemnification of the railroad by the Corporation against any casualty risk to which it may be exposed.

(d) (1) If the Corporation and a railroad are unable to agree upon the terms for the sale to the Corporation of property (including interests in property) owned by the railroad and required for intercity rail passenger service, the Corporation may apply to the Commission for an order establishing the need of the Corporation for the property at issue and requiring the conveyance thereof from the railroad to the Corporation on reasonable terms and conditions, including just compensation. Unless the Commission finds that

(A) conveyance of the property to the Corporation would significantly impair the ability of the railroad to carry out its obligations as a common carrier; and

(B) the obligations of the Corporation to provide modern, efficient, and economical rail passenger service can adequately be met by the acquisition of alternative property (including interests in property) which is available for sale on reasonable terms to the Corporation or available to the Corporation by the exercise of its authority under section 305(d) of this Act;

the need of the Corporation for the property shall be deemed to be established and the Commission shall order the conveyance of the property to the Corporation on such reasonable terms and conditions as it may prescribe, including just compensation.

(2) The Commission shall expedite proceedings under this subsection and, in any event, issue its order within one hundred and twenty days from receipt of the application from the Corporation. If just compensa-

tion has not been determined on the date of the order, the order shall require, as part of just compensation, interest at the rate of 6 per centum per annum from the date prescribed for conveyance until just compensation is paid.

(e) (1) Except in an emergency, intercity passenger trains operated by or on behalf of the Corporation shall be accorded preference over freight trains in the use of any given line of track, junction, or crossing, unless the Secretary has issued an order to the contrary in accordance with paragraph (2) of this subsection.

(2) Any railroad whose rights with regard to freight train operation are affected by paragraph (1) of this subsection may file an application with the Secretary requesting appropriate relief. If, after hearing under section 553 of title 5 of the United States Code, the Secretary finds that adherence to such paragraph (1) will materially lessen the quality of freight service provided to shippers, the Secretary shall issue an order fixing rights of trains, on such terms and conditions as are just and reasonable.

(f) If, upon request of the Corporation, a railroad refuses to permit accelerated speeds by trains operated by or on behalf of the Corporation, the Corporation may apply to the Secretary for an order requiring the railroad to permit such accelerated speeds. The Secretary shall make findings as to whether such accelerated speeds are unsafe or otherwise impracticable, and with respect to the nature and extent of improvements to track, signal systems, and other facilities that would be required to make such accelerated speeds safe and practicable. After hearing, the Secretary shall issue an order fixing maximum permissible speeds of Corporation trains, on such terms and conditions as he shall find to be just and reasonable.

2. Construction and interpretation.—Section 402 provides for contracts (discretionary on the part of Amtrak) by which Amtrak may employ the facilities and services of others (including railroads) to carry out the Amtrak obligation to provide interstate rail passenger service in the basic system. In the instant case, although we cannot determine the amount of compensation due to Penn Central without further development of the record, we shall direct Penn Central to provide services and facilities specified in its contract with Amtrak, trom July 1, 1973, a thing required by public convenience and necessity, on condition that just and reasonable terms ultimately determined will become retroactively applicable as of July 1, 1973.—Penn Central—Compensation for Passenger Service, 342 I.C.C. 765 (770-71).

5. Compensation, determination of just and reasonable.—Amtrak is committed to the proposition that just and reasonable compensation should have a necessary relationship to the quality of the service. We are inclined to agree. We not ready to embrace the view that all service performed under §402 terms should be paid for on a full cost basis or that the railroads are entitled to a cost-plus contract situation. In any event, we believe that the determination of just and reasonable compensation should be made to depend on the factual circumstances surrounding particular services.—Penn Central—Compensation for Passenger Service, 342 I.C.C. 765 (770).

Section 403. NEW SERVICE [*45 U.S.C. §563.*] (a) The Corporation may provide intercity rail passenger service in excess of that prescribed for the basic system, either within or outside the basic system, where the Corporation, based on its own or available marketing studies or other similar reports or information determines that experimental or expanded service would be justified, if consistent with prudent management. In determining the establishment of the additional routes, the Corporation shall take into account the current and the estimated future population and economic conditions of the points to be served, the adequacy of alternative modes of transportation available to those points, and the cost of adding the service. The Corporation shall cooperate with State, regional, and local agencies to encourage the use of trains established under this subsection and shall make reasonable efforts to assure high quality of customer services. Any intercity rail passenger service provided under this subsection for a continuous period of two years shall be designated by the Secretary as a part of the basic system.

(b)(1) Any State, regional, or local agency may request of the Corporation rail passenger service beyond that included within the basic system. The Corporation shall institute such service under an agreement if the State, regional, or local agency agrees to reimburse the Corporation for 50 percent of total operating losses and associated capital costs of such service if service can be provided with the resources available to the Corporation and if it is consistent with the following requirements:

(A) The State or agency must make an adequate assurance to the Corporation that it has sufficient resources to meet its share of the costs of such service for the period such service is to be provided under this section.

(B) The State or agency has conducted a market analysis acceptable to the Corporation to insure that there is adequate demand to warrant such service.

An agreement made pursuant to this section may by mutual agreement be renewed for one or more additional terms of not more than 2 years.

(2) If more than one application is made for service and all applications are consistent with the requirements of this subsection, but all the services applied for cannot be provided with the available resources of the Corporation, the Board of Directors shall decide in its discretion which application or applications best serve the public interest and can be provided with the available resources of the Corporation, except that a proposal for State support of a service deleted from the basic system shall be given preference.

(3) The Board of Directors shall establish the basis for determining the total costs and the total revenue of the service provided pursuant to this subsection. The Corporation, at the request of States, may conduct studies during the fiscal year ending June 30, 1976, to determine benefits of seasonal routes to recreational areas.

(c) The Corporation shall initiate not less than one experimental route each year, such route to be designated by the Board of Directors, and shall operate such route for not less than two years. After such two-year period, the Secretary in consultation with the Board of Directors shall terminate such route if he finds that it has attracted insufficient patronage to serve the public convenience and necessity, or he may designate such route as part of the basic system. In carrying out the provisions of this subsection, the Board of Directors shall give priority to experimental routes designed to extend intercity rail passenger service to the major population area of each of the contiguous 48 States which does not have such service to any large population area designated as part of the basic system. After January 1, 1977, all route additions shall be in accordance with the Criteria and Procedures for Making Route and Service Decisions approved by the Congress pursuant to section 404(c)(3), and this subsection shall no longer apply to route additions.

Section 404. DISCONTINUANCE OF SERVICE. [*45 U.S.C. §564.*] (a) Unless it has entered into a contract with the Corporation pursuant to section 401(a)(1) of this Act, no railroad may discontinue any intercity passenger train whatsoever prior to January 1, 1975, the provisions of any other Act, the laws or constitution of any State, or the dicision or order of, or the pendency of any proceeding before a Federal or State court, agency, or authority to the contrary notwithstanding. On and after January 1, 1975, passenger train service operated by such railroad may be discontinued under the provisions of section 13a of the Interstate Commerce Act. Upon filing of a notice of discontinuance by such railroad, the Corporation may undertake to initiate passenger train operations between the points served.

(b)(1) The Corporation must provide the service included within the basic system until October 1, 1976, to the extent it has assumed responsibility for such service by contract with a railroad pursuant to section 401 of this Act.

(2) Except as otherwise provided in this paragraph and in section 403(a) of this Act, service beyond that prescribed for the basic system undertaken by the Corporation upon its own initiative may be discontinued at any time. No such service undertaken by the Corporation on or after January 1, 1973, shall be discontinued until March 1, 1977.

(3) If at any time, after October 1, 1976, the Corporation determines that any train or trains in the basic system in whole or in part are not required by public convenience and necessity, or will impair the ability of the Corporation to adequately provide other services, such train or trains may be discontinued under the procedures of section 13a of the Interstate Commerce Act (49 U.S.C. 13a): *Provided, however,* That at least thirty days prior to any change or discontinuance in whole or in

part, of any service under this subsection, the Corporation shall mail to the Governor of each State in which the train in question is operated, and post in every station, depot, or other facility served thereby notice of the proposed change or discontinuance. The Corporation may not change or discontinue this service if prior to the end of the thirty-day notice period, State, regional, or local agencies request continuation of the service and within ninety days agree to reimburse the Corporation for a reasonable portion of any losses associated with the continuation of service beyond the notice period.

(4) For purposes of paragraph (3) of this subsection, the reasonable portion of such losses to be assumed by the State, regional, or local agency shall be equal to 50 percent of the total operating losses and associated capital costs of such service. If the Corporation and the State, regional, or local agencies are unable to agree upon a reasonable apportionment of such losses, the matter shall be referred to the Secretary for decision. In deciding this issue the Secretary shall take into account the purposes of this Act and the impact of requiring the Corporation to bear such losses upon its ability to provide improved service within the basic system.

(c)(1) Within 120 days after the date of enactment of this subsection, the board of directors of the Corporation shall study, develop, and submit to the Secretary, to the Commission, and to the Congress an initial proposal setting forth criteria and procedures under which the Corporation would be authorized to add or discontinue routes and services. Such criteria and procedures shall include, but need not be limited to—

(A) methods for evaluating the economic and environmental impact of any addition or discontinuance of intercity rail passenger service including an evaluation of the economic impact to the Corporation and to the nation of the addition of new service points along existing or new inter-city routes within the Northeast Corridor;

(B) methods for evaluating the effects of any such addition or discontinuance on connecting parts of the national system of intercity rail passenger service;

(C) methods for estimating, with respect to any such addition or discontinuance, the population to be affected, the demand for intercity rail passenger service, the revenue per passenger mile, and the effect on capital costs and revenue of the Corporation;

(D) methods for evaluating the availability of alternative modes of transportation;

(E) methods for giving public notice of, and obtaining public comments on, any such addition or discontinuance; and

(F) methods for establishing a priority ranking system for routes and trains to meet the needs of the public convenience and necessity for a balanced transportation system, taking into consideration the criteria and procedures referred to in subparagraphs (A) through (E) of this paragraph, together with such other criteria as the board of directors deems appropriate.

(2) Within 150 days after the date of enactment of this subsection, the Secretary and the Commission shall submit to the Congress and to the board of directors of the Corporation their comments on the initial proposal setting forth criteria and procedures developed by the board of directors of the Corporation, together with such recommendations as they may deem appropriate.

(3) Within 30 days after receipt of comments submitted by the Secretary and the Commission under paragraph (2) of this subsection, the board of directors of the Corporation shall consider such comments and shall submit to the Congress a final proposal setting forth criteria and procedures under which the Corporation would be authorized to add or discontinue routes and services within the national system of intercity rail passenger service. The criteria and procedures set forth in such final proposal shall take effect at the end of the first period of 60 calendar days of continuous session of the Congress after the date of its submission, unless either the Senate or the House of Representatives adopts a resolution during such period stating that it does not approve such final proposal. If no resolution is adopted as provided in the preceding sentence, the Corporation may add or discontinue routes and services in accordance with the criteria and procedures set forth in the final proposal, notwithstanding the provisions of section 13a of the Interstate Commerce Act or of section 404(b) (3) of this Act, relating to discontinuance of service within the basic system. Service beyond the basic system referred to in section 404(b) (2) of this Act shall not be discontinued under this subsection until March 1, 1977. For purposes of this paragraph, continuity of session of the Congress is broken only by an adjournment sine die, and the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded from the computation of the 60-day period.

Section 405. PROTECTIVE ARRANGEMENTS FOR EMPLOYEES. [*45 U.S.C. §565.*] (a) A railroad shall provide fair and equitable arrangements to protect the interests of employees, including employees of terminal companies affected by a discontinuance of intercity rail passenger service whether occurring before, on, or after January 1, 1975. A "discontinuance of intercity rail passenger service" shall include any discontinuance of service performed by railroad under any facility or service agreement under sections 305 and 402 of this Act pursuant to any modification or termination thereof or an assumption of operations by the Corporation.

(b) Such protective arrangements shall include, without being limited to, such provisions as may be necessary for (1) the preservation of rights, privileges, and benefits (including continuation of pension rights and benefits) to such employees under existing collective-bargaining agreements or otherwise; (2) the continuation of collective-bargaining rights; (3) the protection of such individual employees against a worsening of their positions with respect to their employment; (4) assurances of priority of reemployment of employees terminated or laid off; and (5) paid training or retraining programs. Such arrangements shall include provisions protecting individual employees against a worsening of their positions with respect to their employment which shall in no event provide benefits less than those established pursuant to section 5(2)(f) of the Interstate Commerce Act. Any contract entered into pursuant to the provisions of this title shall specify the terms and conditions of such protective arrangements. No contract under section 401(a)(1) of this Act between a railroad and the Corporation may be made unless the Secretary of Labor has certified to the Corporation that the labor protective provisions of such contract afford affected employees, including affected terminal employees, fair and equitable protection by the railroad.

(c) Upon commencement of operations in the basic system, the substantive requirements of subsections (a) and (b) of this section shall apply to the Corporation and its employees in order to insure the maintenance of the protective arrangements specified in such subsections, except that nothing in this subsection shall be construed to impose upon the Corporation any obligation of a railroad with respect to any right, privilege, or benefit earned by any employee as a result of prior service performed for such railroad. The Secretary of Labor shall certify that affected employees of the Corporation have been provided fair and equitable protection as required by this section within one hundred and eighty days after assumption of operations by the Corporation.

(d) The Corporation shall take such action as may be necessary to insure that all laborers and mechanics employed by contractors and subcontractors in the performance of construction work financed with the assistance of funds received under any contract or agreement entered into under this title shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act. The Corporation shall not enter into any such contract or agreement without first obtaining adequate assurance that required labor standards will be maintained on the construction work. Health and safety standards promulgated by the Secretary of Labor pursuant to section 107 of the Contract Work Hours and Safety Standards Act (40 U.S.C. 333) shall be applicable to all construction work performed under such contracts or agreements, except any construction work performed by a railroad employee. Wage rates provided for in collective bargaining agreements negotiated under and pursuant to the Railway Labor Act shall be considered as being in compliance with the Davis-Bacon Act.

(e) The Corporation shall not contract out any work normally performed by employees in any bargaining unit covered by a contract between the Corporation or any railroad providing intercity rail passenger service upon the date of enactment of this Act and any labor organization, if such contracting out shall result in the layoff of any employee or employees in such bargaining unit.

(f) The Corporation shall take such action as may be necessary to assure that, to the maximum extent practicable, any railroad employee eligible to receive free or reduced-rate transportation by railroad on April 30, 1971, under the terms of any policy or agreement in effect on such date will be eligible to receive, provided space is available, free or reduced-rate transportation on any intercity rail passenger service provided by the Corporation under this Act, on terms similar to those available on such date to such railroad employee under such policy or agreement. However, the Corporation may apply to all railroad employees eligible to receive free or reduced-rate transportation under such policies or agreements, a single systemwide schedule of terms determined by the Corporation to reflect terms applicable to the majority of such employees under those policies or agreements in effect on April 30, 1971. The Corporation shall be reimbursed by the railroads by way of payment or offset for such costs as may be incurred in providing transportation services to railroad employees under any policy or agreement referred to in the first sentence of this subsection, including the costs of implementing and administering this section. Within ninety days after the enactment of this sentence, each railroad shall enter into an agreement with the Corporation for the payment of such expenses. If the Corporation and a railroad are unable to agree as to the amount of any payment owed by the railroad under this subsection, the matter shall be referred to the Commission for decision. The Commission, upon investigation, shall decide the issue within ninety days following the date of referral, and its decision shall be binding on both parties. If any railroad company which operates intercity passenger service not under contract with the Corporation notifies the Corporation and railroads which have entered into the agreement specified above that it will accept the terms of the system-wide schedule of terms and the compensation specified in the agreements, such railroad company shall be reimbursed for services to railroad employees in accordance with the agreements. As used in this subsection, the term 'railroad employee' means (1) an active full-time employee, including any such employee during a period of furlough or while on leave of absence, of a railroad or terminal company, (2) a retired employee of a railroad or terminal company, and (3) the dependents of any employee referred to in clause (1) or (2) of this sentence.

TITLE VI—FEDERAL FINANCIAL ASSISTANCE

Section 601. AUTHORIZATION FOR APPROPRIATIONS. [*45 U.S.C. §601.*] (a) There are authorized to be appropriated to the Secretary for the benefit of the Corporation in fiscal year 1971, $40,000,000, and in subsequent fiscal years through June 30, 1975, a total of $597,300,000. There are authorized to be appropriated to the Secretary for the benefit of the Corporation (1) for the payment of operating expenses for the basic system, and for operating and capital expenses of intercity rail passenger service provided pursuant to section 403(b) of this Act, $350,000,000 for fiscal year 1976, $105,000,000 for the transition period of July 1, 1976, through September 30, 1976 (hereafter in this section referred to as the 'transition period') and $355,000,000 for fiscal year 1977; and (2) for the payment of capital expenditures of the basic system, $110,000,000 for fiscal year 1976; $25,000,000 for the transition period; and $110,000,000 for fiscal year 1977. Of the amounts authorized by clause (1) of the preceding sentence, not more than $25,000,000 for fiscal year 1976, $7,000,000 for the transition period, and $30,000,000 for fiscal year 1977 shall be available for payment of operating and capital expenses of intercity rail passenger service provided pursuant to section 403(b) of this Act. Funds appropriated pursuant to such authorization shall be made available to the Secretary during the fiscal year for which appropriated and shall remain available until expended. Such sums shall be paid by the Secretary to the Corporation for expenditure by it in accordance with spending plans approved by Congress at the time of appropriation and general guidelines established annually by the Secretary. Payments by the Secretary to the Corporation of appropriated funds shall be made more frequently than every 90 days, unless the Corporation, for good cause, requests more frequent payment before the expiration of any 90-day period.

(b)(1) Whenever the Corporation submits any budget estimate or request to the President, the Department of Transportation, or the Office of Management and Budget, it shall concurrently transmit a copy of that estimate or request to the Congress.

(2) Whenever the Corporation submits any legislative recommendation, proposed testimony, or comments on legislation to the President, the Department of Transportation, or the Office of Management and Budget, it shall concurrently transmit a copy thereof to the Congress. No officer or agency of the United States shall have any authority to require the Corporation to submit its legislative recommendations, proposed testimony, or comments on legislation to any officer or agency of the United States for approval, comments, or review, prior to the submission of such recommendations, testimony, or comments to the Congress.

Section 602. GUARANTEE OF LOANS. [*45 U.S.C. §602*] (a) The Secretary is authorized, on such terms and conditions as he may prescribe, and with the approval of the Secretary of the Treasury, to guarantee any lender or lessor against loss of principal and interest or other contractual commitments, including rentals, on securities, obligations, leases, or loans (including refinancing thereof) issued to finance the upgrading of roadbeds, and the purchase or lease by the Corporation or an agency of new rolling stock, rehabilitation of existing rolling stock, reservation systems, switch and signal systems, and other capital equipment and facilities necessary for the improvement of rail passenger service. The maturity date or term of such securities, obligations, leases, or loans, including all extensions and renewals thereof, shall not be later than 20 years from their date of issuance.;

(b) All guarantees entered into by the Secretary under this section shall constitute general obligations of the United States of America backed by the full faith and credit of the Government of the United States of America.

(c) Any guarantee made by the Secretary under this section shall not be terminated, canceled or otherwise revoked; shall be conclusive evidence that such guarantee complies fully with the provisions of this Act and of the approval and legality of the principal amount, interest rate, lease rate, and all other terms of the securities, obligations, leases, or loans and of the guarantee, and shall be valid and incontestable in the hands of a holder of a guaranteed security, obligation, lease, or loan, except for fraud or material misrepresentation on the part of such holder.";

(d) 'The aggregate unpaid principal amount of securities, obligations, or loans outstanding at any one time, which are guaranteed by the Secretary under this section, may not exceed $900,000,000.'

(e) There are authorized to be appropriated to the Secretary such amounts, to remain available until expended, as are necessary to discharge all his responsibilities under this section.

(f) If at any time the moneys available to the Secretary are insufficient to enable him to discharge his responsibilities under guarantees issued by him under subsection (a) of this section, he shall issue to the Secretary of the Treasury notes or other obligations in such forms and denominations, bearing such maturities and subject to such terms and conditions, as may be prescribed by the Secretary of the Treasury. Redemption of such notes or obligations shall be made by the Secretary from appropriations available under subsection (e) of this section. Such notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the current average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of such notes or other obligations. The Secretary of the Treasury shall purchase any notes or other obligations issued hereunder and for that purpose he is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as amended, and the purposes for which securities may be issued under that Act, as amended, are extended to include any purchase of such notes or obligations. The Secretary of the Treasury may at any time sell any of the notes or other obligations as acquired by him under this subsection. All redemptions, purchases, and sales by the Secretary of the Treasury of such notes' or other obligations shall be treated as public debt transactions of the United States.

(g) Notwithstanding any other provision of this Act a guarantee may not be made of any security, obligation, lease or loan, if the nature of such security, obligation, or loan is such that the income therefrom is not includable in gross income for the purposes of chapter 1 of the Internal Revenue Code of 1954.

(h) The Secretary shall, within 180 days after the date of enactment of this subsection, issue general guidelines designed to assist the Corporation in the formulation of capital and budgetary plans.

(i) Any request made by the Corporation for the guarantee of a lease or loan pursuant to this section, which has been approved by the Board of Directors of the Corporation, shall be approved by the Secretary if, in the discretion of the Secretary, such request falls within the approved capital and budgetary guidelines issued under subsection (h).

TITLE VII—INTERIM EMERGENCY FEDERAL FINANCIAL ASSISTANCE

Section 701. INTERIM AUTHORITY TO PROVIDE EMERGENCY FINANCIAL ASSISTANCE FOR RAILROAD OPERATING PASSENGER SERVICE. [*45 U.S.C. §621.*] (a) For the purpose of permitting a railroad to enter into or carry out a contract entered into under this Act, the Secretary is authorized, on such terms and conditions as he may prescribe, to (1) make loans to such railroad, or (2) guarantee any lender against loss of principal or interest on any loan to such railroad.

(b) Before making a loan or a guarantee under this section, the Secretary must find in writing, that—

(1) the loan or guarantee is necessary to carry out the provisions of this Act;

(2) the proceeds of any loan made or guaranteed under this Act will be used solely to carry out contracts entered into under this Act;

(3) the loan or guarantee is not otherwise available on reasonable terms and conditions; and

(4) there is reasonable assurance that the business affairs of the railroad will be conducted in a prudent manner..

(c)(1) In any case in which there is a liquidation of the assets of any railroad which is the recipient of a loan made or guaranteed under this Act, the United States shall have the first right to redeem that portion of such assets consisting of those rights-of-way, tracks, and other facilities designated by the Secretary to be necessary for the purpose of providing intercity rail passenger service, including services employing innovative technology, within the basic system. In the case of a railroad in reorganization (as defined in section 102(12) of the Regional Rail Reorganization Act of 1973) which has an agreement with the Corporation to provide intercity rail passenger service on the date of enactment of this sentence, the sale by such railroad of any right-of-way or track over which the Corporation is required to provide intercity rail passenger service on such date of enactment (as an experimental route designated by the Secretary before such date of enactment) shall be deemed to be a liquidation of the assets of such railroad under the first sentence of this paragraph, and the Secretary shall acquire such right, title, and interest in such right-of-way or track, and restore it to such condition, as may be necessary to permit the Corporation to provide intercity rail passenger service over the designated route.

(2) It is the intent of the Congress that, in the case of a loan guarantee under this Act, the United States shall stand in the same position with respect to other creditors as in the case of a direct loan by the United States giving the United States priority over secured and unsecured creditors.

(d) Interest on loans made under this section shall be at a rate not less than a rate determined by the Secretary of the Treasury, taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturity of such loans adjusted to the nearest one-eighth of one per centum.

(e) The maturity date on any loan made or guaranteed under this section, including renewals and extensions thereof, shall not be later than five years from the date of issuance.

(f) The aggregate amount of loans and loan guarantees made under this section shall not exceed $200,000,000.

Section 702. AUTHORIZATION FOR APPROPRIATIONS. [*45 U.S.C. §622.*] There are hereby authorized to be appropriated such amounts not to exceed $200,000,000 as may be necessary to carry out the purposes of this title. Any sums appropriated shall be available until expended.

TITLE VIII—MISCELLANEOUS PROVISIONS

Section 801. ADEQUACY OF SERVICE. [*45 U.S.C. §641.*] (a) The Commission shall promulgate, within 60 days from the date of enactment of the Amtrak Improvement Act of 1973, and shall from time to time revise, such regulations as it considers necessary to provide adequate service, equipment, tracks, and other facilities for quality intercity rail passenger service. The Corporation may contract with railroads or with regional transportation agencies for the improvement of service, equipment, tracks and other facilities necessary to meet such regulations promulgated by the Commission. In the event of a failure to agree, the Commission shall by rule establish procedures for allocating between the Corporation and a railroad any cost required to be incurred to meet the regulations establishing adequate service, equipment, tracks, and other facilities.

(b) A civil action may be brought by the Commission to enforce any provision of subsection (a) of this section. The Department of Justice shall represent the Commission in all court proceedings pursuant to this subsection, except that in any case in which the Commission seeks to challenge action or inaction on the part of any party which the Department of Justice is representing, the Commission may be represented by its own attorneys. Unless the Attorney General notifies the Commission within 45 days of a request for representation that he will represent the Commission, such representation may be made by attorneys designated by the Commission. Any action to enforce the provisions of subsection (a) may be maintained in the district court of the United States for any district in which a defendant is found, resides, transacts business, or maintains an agent for service of process. All process in any such suit may be served in any judicial district in which the person to be served is an inhabitant or in which he may be found.

1. Enforcement, jurisdiction.—Section 801 gives the Commission authority to require upgrading of track used for intercity rail passenger service. The Commission, however, is not responsible for safety standards, which are set by the Federal Railroad Administration.—Annual Report, 1975, p. 19.

Section 802. EFFECT ON PENDING PROCEEDINGS. [*45 U.S.C. §642.*] Upon enactment of this Act, no railroad may discontinue any intercity rail passenger service whatsoever other than in accordance with the provisions of this Act, notwithstanding the provisions of any other Act, the laws or constitution of any State, or the decision or order of, or the pendency of any proceeding before, any Federal or State court, agency or authority.

Section 803. SEPARABILITY. [*45 U.S.C. §643.*] If any provision of this Act or the application thereof to any person or circumstances is held invalid, the remainder of the Act and the application of such provisions to other persons or circumstances shall not be affected thereby.

Section 805. RECORDS AND AUDIT OF THE CORPORATION AND CERTAIN RAILROADS. [*45 U.S.C. §644.*] (1) (A) The accounts of the Corporation shall be audited annually in accordance with generally accepted auditing standards by independent certified public accountants or independent licensed public accountants certified or licensed by a regulatory authority of a State or other political subdivision of the United States. The audit shall be conducted at the place or places where the accounts of the Corporation are normally kept. All books accounts, financial records, reports, files, and other papers, things, or property belonging to or in use by the Corporation and necessary to facilitate the audit shall be made available to the person conducting the audit; and full facilities for verifying transactions with the balances or securities held by depositories, fiscal agents, and custodians shall be afforded to such person.

(B) The report of each such independent audit shall be included in the annual report required by section 308(a) of this Act. The audit report shall set forth the scope of the audit and include such statements as are necessary to present fairly the Corporation's assets and liabilities, surplus or deficit, with an analysis of the changes therein during the year, supplemented in reasonable detail by a statement of the Corporation's income and expenses during the year, and a statement of the sources and application of funds, together with the independent auditor's opinion of those statements.

(2) (A) The Comptroller General of the United States shall conduct annually a performance audit of the activities and transactions of the Corporation in accordance with generally accepted management principles, and under such rules and regulations as may be prescribed by the Comptroller General. Any such audit shall be conducted at such place or places as the Comptroller General may deem appropriate. The representative of the Comptroller General shall have access to all books, accounts, records, reports, files, and other papers, things, or property belonging to or in use by the Corporation pertaining to its financial and other transactions and necessary to facilitate the audit, and they shall be afforded full facilities for verifying transactions with the balances or securities held by depositories, fiscal agents, and custodians. All such books, accounts, records, reports, files, papers, and property of the Corporation shall remain in possession and custody of the Corporation.

(B) To the extent the Comptroller General deems necessary in connection with audits as he may make of the financial transactions of the Corporation pursuant to paragraph (A) of this subsection, his representatives shall have access to all books, accounts, records, reports, files, and other papers, things, or property belonging to or in use by any railroad with which the Corporation has entered into a contract for the performance of intercity rail passenger service, pertaining to such railroad's financial transactions and necessary to facilitate the audit, and such representatives shall be afforded full facilities for verifying transactions with the balances or securities held by depositories, fiscal agents, and custodians. All such books, accounts, records, reports, files, papers, and property of such railroad shall remain in the possession and custody of the railroad.

(C) A report of each such audit shall be made by the Comptroller General to the Congress. The report to the Congress shall contain such comments and information as the Comptroller General may deem necessary to inform Congress of the financial operations and condition of the Corporation, together with such recommendations with respect thereto as he may deem advisable. The report shall also show specifically any program, expenditure, or other financial transaction or undertaking observed in the course of the audit, which, in the opinion of the Comptroller General, has been carried on or made without authority of law. A copy of each report shall be furnished to the President, to the Secretary, and to the Corporation at the time submitted to the Congress.

Section 806. REPORT BY SECRETARY OF TRANSPORTATION. [*45 U.S.C. §645.*] (a) The Secretary shall, on or before March 15, 1973, transmit to the Congress a comprehensive report on the effectiveness of this Act in achieving and promoting intercity rail passenger service and on the effectiveness of the Corporation in implementing the purposes of this Act. Such report shall include an evaluation by the Secretary of the intercity rail passenger service operations assumed by the Corporation including, but not limited to adequacy and effectiveness of services, on time performance, reservations and ticketing, scheduling, equipment, fare structures, routes, and immediate and long-term financial needs.

(b) In addition to the general evaluation and assessment required under subsection (a) of this section, the report by the Secretary shall include—

(1) recommendations for the orderly assumption by the Corporation of the operation and control of all aspects of its intercity rail passenger service, including the performance by the Corporation of all full-time

functions solely related to the intercity rail passenger service provided by it under this Act;

(2) an assessment of whether the board of directors of the Corporation adequately and fairly represents the members of the public who utilize intercity rail passenger services and, if necessary, recommendations for appropriate changes in the composition of such board of directors;

(3) estimates of potential revenues for the Corporation from the transportation of mail and express on intercity passenger trains;

(4) a detailed analysis of the on-time performance of intercity rail passenger service operations assumed by the Corporation, together with such recommendations as the Secretary may deem advisable to eliminate delays in such intercity rail passenger service operations caused by freight train operations;

(5) recommendations with respect to the establishment of the optimum intercity rail passenger service system as soon as possible after July 1, 1973, taking into account economic feasibility, requirements as to public convenience and necessity, and the ability of the Corporation to provide adequate service over the total system, which optimum system shall include recommended routes and discontinuances; and

(6) recommendations with respect to the improvement of tracks and roadbeds on routes over which the Corporation operates intercity passenger trains.

(c) Such report shall contain such additional recommendations as the Secretary may deem advisable to assist the Corporation in carrying out the purposes of this Act, including recommendations for legislative enactments or administrative actions which would enable the Corporation, after July 1, 1973, to discontinue more rapidly and efficiently those routes which do not meet the criteria recommended by the Secretary for the establishment of the optimum intercity rail passenger service system.

(d) In carrying out the provisions of this section, the Secretary may use available services and facilities of other departments, agencies, and instrumentalities of the Federal Government with their consent and on a reimbursable basis.

(e) Departments, agencies, and instrumentalities of the Federal Government shall exercise their powers, duties, and functions in such manner as will assist in carrying out the provisions of this section.

(Public Law 91-518, Oct. 30, 1970, 84 Stat. 1327; as amended by Public Laws 92-316, June 22, 1972, 86 Stat. 227; 93-146, Nov. 3, 1973, 87 Stat. 548; 93-496, Oct. 28, 1974, 88 Stat. 1526; 94-25, May 26, 1975, 89 Stat. 90; 94-210, Feb. 5, 1976, 90 Stat. 31)

TITLE I—GENERAL PROVISIONS

DECLARATION OF POLICY

Section 101. [*45 U.S.C. §701*] (a) FINDINGS.—The Congress finds and declares that—

(1) Essential rail service in the midwest and northeast region of the United States is provided by railroads which are today insolvent and attempting to undergo reorganization under the Bankruptcy Act.

(2) This essential rail service is threatened with cessation or significant curtailment because of the inability of the trustees of such railroads to formulate acceptable plans of reorganization. This rail service is operated over rail properties which were acquired for a public use, but which have been permitted to deteriorate and now require extensive rehabilitation and modernization.

(3)The public convenience and necessity require adequate and efficient rail service in this region and throughout the Nation to meet the needs of commerce, the national defense, the environment, and the service requirements of passengers, United States mail, shippers, States and their political subdivisions, and consumers.

(4) Continuation and improvement of essential rail service in this region is also necessary to preserve and maintain adequate national rail services and an efficient national rail transportation system.

(5) Rail service and rail transportation offer economic and environmental advantages with respect to land use, air pollution, noise levels, energy efficiency and conservation, resource allocation, safety, and cost per ton-mile of movement to such extent that the preservation and maintenance of adequate and efficient rail service is in the national interest.

(6) These needs cannot be met without substantial action by the Federal Government.

(b)PURPOSES.—It is therefore declared to be the purpose of Congress in this Act to provide for—

(1) the identification of a rail service system in the midwest and northeast region which is adequate to meet the needs and service requirements of this region and of the national rail transportation system;

(2) the reorganization of railroads in this region into an economically viable system capable of providing adequate and efficient rail service to the region;

(3) the establishment of the United States Railway Association, with enumerated powers and responsibilities;

(4) the establishment of the Consolidated Rail Corporation, with enumerated powers and responsibilities;

(5) assistance to States and local and regional transportation authorities for continuation of local rail services threatened with cessation; and

(6) necessary Federal financial assistance at the lowest possible cost to the general taxpayer.

DEFINITIONS

Section 102. [*45 U.S.C. §702*] As used in this Act, unless the context otherwise requires—

(1) "Association" means the United States Railway Association, established under section 201 of this Act;

(2) "Commission" means the Interstate Commerce Commission;

(3) "Corporation" means the Consolidated Rail Corporation required to be established under section 301 of this Act or its successor by merger, consolidation or other form of succession carried out under applicable law for the purpose of changing the State of its incorporation;

(4) "effective date of the final system plan" means the date on which the final system plan or any revised final system plan is deemed approved by Congress, in accordance with section 208 of this Act;

(5) "employee stock ownership plan" means a technique of corporate finance that uses a stock bonus trust or a company stock money purchase pension trust which qualifies under section 401 (a) of the Internal Revenue Code of 1954 (26 U.S.C. 401(a)) in connection with the financing of corporate improvements, transfers in the ownership of corporate assets, and other capital requirements of a corporation and which is designed to build beneficial equity ownership of shares in the employer corporation into its employees substantially in proportion to their relative incomes, without requiring any cash outlay, any reduction in pay or other employee benefits, or the surrender of any other rights on the part of such employees.

(6) "final system plan" means the plan of reorganization for the restructure, rehabilitation, and modernization of railroads in reorganization prepared pursuant to section 206 and approved pursuant to section 208 of this Act;

(7) "Finance Committee" means the Finance Committee of the Board of Directors of the Association established under section 201(i) of this Act;

(8) "includes" and variants thereof should be read as if the phrase "but is not limited to" were also set forth;

(9) "local or regional transportation authority" includes a political subdivision of a State.

(10) "Office" means the Rail Services Planning Office established under section 205 of this Act;

(11) "profitable railroad" means a railroad which is not a railroad in reorganization. The term does not include the Corporation, the National Railroad Passenger Corporation, or a railroad leased, operated, or controlled by a railroad in reorganization in the region.

(12) "rail properties" means assets or rights owned, leased, or otherwise controlled by a railroad (or a person owned, leased, or otherwise controlled by a railroad) which are used or useful in rail transportation service; except that the term, when used in conjunction with the phrase "railroads leased, operated, or controlled by a railroad in reorganization", shall not include assets or rights owned, leased, or otherwise controlled by a Class I railroad which is not wholly owned, operated, or leased by a railroad in reorganization but is controlled by a railroad in reorganization;

(13) "railroad" means a common carrier by railroad as defined in section 1(3) of part I of the Interstate Commerce Act (49 U.S.C. 1(3)). The term includes the Corporation and the National Railroad Passenger Corporation;

(14) "railroad in reorganization" means a railroad which is subject to a bankruptcy proceeding and which has not been determined by a court to be reorganizable or not subject to reorganization pursuant to this Act as prescribed in section 207(b) of this Act. A "bankruptcy proceeding" includes a proceeding pursuant to section 77 of the Bankruptcy Act (11 U.S.C. 205) and an equity receivership or equivalent proceeding;

(15) "Region" means the States of Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, Ohio, Indiana, Michigan, and Illinois; the District of Columbia; and those portions of contiguous States in which are located rail properties owned or operated by railroads doing business primarily in the aforementioned jurisdictions (as determined by the Commission by order);

(16) 'Secretary' means the Secretary of Transportation or the person at the time performing the duties of the Office of the Secretary of Transportation in accordance with law, or the duly authorized representative of either of them;

(17) "State" means any State of the District of Columbia;

(18) 'subsidiary' means any corporation 100 percent of whose total combined voting shares are, directly or indirectly, owned or controlled by the Corporation; and

(19) 'supplemental transaction' means any transaction set forth in a proposal under section 305 of this Act, within 6 years after the date on which the special court orders conveyances of rail properties to the Corporation under section 303(b) of this Act, under which the Corporation or a subsidiary thereof would (A) acquire rail properties not designated for transfer or conveyance to it under the final system plan, (B) convey rail properties to a profitable railroad, a subsidiary of the Corporation or, other than as designated in the final system plan, to the National Railroad Passenger Corporation or to a State or a local or regional transportation authority, or to any other responsible person for use in providing rail service, or (C) enter into contractual or other arrangements with any person for the joint use of rail properties or the coordination or separation of rail operations or services.

TITLE II—UNITED STATES RAILWAY ASSOCIATION

FORMATION AND STRUCTURE

Section 201.— [*45 U.S.C. §711*] (a) ESTABLISHMENT.—There is established, in accordance with the provisions of this section, an incorporated nonprofit association to be known as the United States Railway Association.

(b) ADMINISTRATION.—The Association shall be directed by a Board of Directors. The individuals designated, pursuant to subsection (d)(2) of this section, as the Government members of such Board shall be deemed the incorporators of the Association and shall take whatever steps are necessary to establish the Association, including filing of articles of incorporation, and serving as an acting Board of Directors for a period of not more than 45 days after the date of incorporation of the Association.

(c) STATUS.—The Association shall be a government corporation of the District of Columbia subject, to the extent not inconsistent with this title, to the District of Columbia Nonprofit Corporation Act (D.C. Code, sec. 29—1001 et seq.). Except as otherwise provided, employees of the Association shall not be deemed employees of the Federal Government. The Association shall have succession until dissolved by Act of Congress, shall maintain its principal office in the District of Columbia, and shall be deemed to be a resident of the District of Columbia with respect to venue in any legal proceeding.

(d) BOARD OF DIRECTORS.—The Board of Directors of the Association shall consist of 11 individuals, as follows:

(1) the Chairman, a qualified individual who shall be appointed by the President, by and with the advice and consent of the Senate;

(2) three Government members, who shall be the Secretary, the Chairman of the Commission, and the Secretary of the Treasury acting directly or at any time through their duly authorized representatives; and

(3) seven nongovernment members, who shall be appointed by the President, by and with the advice and consent of the Senate, on the following basis—

(A) one to be selected from a list of qualified individuals recommended by the Association of American Railroads or its successor who are representatives of profitable railroads;

(B) one to be selected from a list of qualified individuals recommended by the American Federation of Labor and Congress of Industrial Organizations or its successor who are representative of railroad labor;

(C) one to be selected from a list of qualified individuals recommended by the National Governors Conference;

(D) one to be selected from a list of qualified individuals recommended by the National League of Cities and Conference of Mayors;

(E) two to be selected from lists of qualified individuals recommended by shippers and organizations representative of significant shipping interests including small shippers;

(F) one to be selected from lists of qualified individuals recommended by financial institutions, the financial community, and recognized financial leaders.

As used in this paragraph, a list of qualified individuals shall consist of not less than three individuals.

Except for the members appointed under paragraphs (1) and (3) (A), (B), (E), and (F), no member of the Board may have any employment or other direct financial relationship with any railroad. A member of the Board who is not otherwise an employee of the Federal Government may receive $300 per diem when engaged in the actual performance of his duties plus reimbursement for travel, subsistence, and other necessary expenses incurred in the performance of such duties.

(e) TERMS OF OFFICE.—The terms of office of the nongovernment members of the Board of Directors of the Association first taking office shall expire as designated by the President at the time of nomination—two at the end of the second year; two at the end of the fourth year; and three at the end of the sixth year. The term of office of the Chairman of such Board shall be 6 years. Successors to members of such Board shall be appointed in the same manner as the original members and, except in the case of government members, shall have terms of office expiring 6 years from the date of expiration of the terms for which their predecessors were appointed. Any individual appointed to fill a vacancy occurring prior to the expiration of any term of office shall be appointed for the remainder of that term.

(f) QUORUM.—Beginning 45 days after the date of incorporation of the Association, six members of the Board, including three of the nongovernment members shall constitute a quorum for the transaction of any function of the Association.

(g) PRESIDENT.—The Board of Directors of the Association, upon the recommendation of the Secretary, shall appoint a qualified individual to serve as the President of the Association at the pleasure of the Board.The President of the Association, subject to the direction of the Board, shall manage and supervise the affairs of the Association.

(h) EXECUTIVE COMMITTEE.—The Board of Directors of the Association shall have an executive committee which shall consist of the Chairman of the Board, the Secretary, the Chairman of the Commission, and two other members who shall be selected by the members of the Board. The Secretary and the Chairman of the Commission may act in such capacity directly or at any time through their duly authorized representatives.

(i) FINANCE COMMITTEE.—The Board of Directors of the Association shall have a Finance Committee which shall consist of the Chairman of such Board, the Secretary, and the Secretary of the Treasury (acting directly or, at any time, through their respective duly authorized representatives). The Finance Committee is authorized to exercise only such powers as are vested in it pursuant to any provision of this Act. The vesting of such powers in the Finance Committee shall not be deemed to relieve the Board of Directors of its authority to exercise any other powers of the Association, none of which may be delegated to the Finance Committee, or of its general authority to study, analyze, and make advisory findings with respect to any matter relevant to the role of the Association as an investor in securities of the Corporation. Notwithstanding any provision of State law, (1) the Finance Committee, without any requirement of review or approval by the Board of Directors of the Association, is authorized to establish, revise, and maintain its own rules and procedures, by majority vote of the members thereof, and (2) the Board of Directors of the Association shall not have power to take, and shall not take, any action affecting the membership of the Finance Committee or limiting the exercise by the Finance Committee of the powers vested in it pursuant to any provision of this Act.

(j) MISCELLANEOUS.—The Association shall have a seal which shall be judicially recognized.

(2) The Administrator of General Services shall furnish the Association with such offices, equipment, supplies, and services as he is au-

thorized to furnish to any other agency or instrumentality of the United States.

(3) The Secretary is authorized to transfer to the Association or the Corporation rights in intellectual property which are directly related to the conduct of the functions of the Association or the Corporation, to the extent that the Federal Government has such rights and to the extent that transfer is necessary to carry out the purposes of this Act.

(4) Any reference in this Act to the Secretary of the Treasury is to the Secretary of the Treasury or the person at the time performing the duties of the Office of the Secretary of the Treasury in accordance with law, or the duly authorized representative of either of them. Any reference in this Act to the Chairman of the Commission is to the Chairman of the Commission or the person at the time performing the duties of the Chairman of the Commission in accordance with law, or the duly authorized representative of either of them.

(k) USE OF NAMES.—No person, except the Association, shall hereafter use the words "United States Railway Association" as a name for any business purpose. Violations of this provision may be enjoined by any court of general jurisdiction in an action commenced by the Association. In any such action, the Association may recover any actual damages flowing from such violation, and, in addition, shall be entitled to punitive damages (regardless of the existence or nonexistence of actual damage) in an amount not to exceed $100 for each day during which such violation was committed. The district courts of the United States shall have jurisdiction over actions brought under this subsection, without regard to the amount in controversy or the citizenship of the parties.

GENERAL POWERS AND DUTIES OF THE ASSOCIATION

Section 202. [*45 U.S.C. §712*] (a) GENERAL.—To carry out the purpose of this Act, the Association is authorized to—

(1) engage in the preparation and implementation of the final system plan;

(2) issue obligations under section 210 of this title; make loans under section 211 of this title; purchase of otherwise acquire or receive and hold and dispose of securities (whether debt or equity) of the Corporation under section 216 of this title and exercise all of the rights, privileges, and powers of a holder of any such securities; and issue certificates of value under section 306 of this Act;

(3) provide assistance to States and local or regional transportation authorities in accordance with section 403 of this Act;

(4) sue and be sued, complain and defend, in the name of the Association and through its own attorneys; adopt, amend, and repeal bylaws governing the operation of the Association and such rules and regulations as are necessary to carry out the authority granted under this Act; conduct its affairs, carry on operations, and maintain offices;

(5) appoint, fix the compensation, and assign the duties of such attorneys, agents, consultants, and other full- and part-time employees as it deems necessary or appropriate; except that (1) no officer of the Association, including the Chairman, may receive compensation at a rate in excess of that prescribed for level I of the Executive Schedule under section 5312 of title 5, United States Code; and (2) no individual may hold a position in violation of regulations which the Secretary shall establish to avoid conflicts of interest and to protect the interests of the public;

(6) acquire and hold such real and personal property as it deems necessary or appropriate in the exercise of its responsibilities under this Act, and to dispose of any such property held by it;

(7) consult with the Secretary of the Army and the Chief of Engineers and request the assistance of the Corps of Engineers, and the Secretary of the Army may direct the Corps of Engineers to cooperate fully with the Association, the Corporation, or any entity designated in accordance with section 206(c) (1) (C) in order to carry out the purposes of this Act;

(8) consult on an ongoing basis with the Chairman of the Federal Trade Commission and the Attorney General to assess the possible anticompetitive effects of various proposals and to negotiate provisions which would, to the greatest extent practicable in accordance with the purposes of this Act and the goal set forth in section 206(a) (5) of this title, alleviate any such anticompetitive effects;

(9) consult with representatives of science, industry, agriculture, labor, environmental protection and consumer organizations, and other groups, as it deems advisable; and

(10) enter into, without regard to section 3709 of the Revised Statutes of the United States (41 U.S.C. 5), such contracts, leases, cooperative agreements, or other transactions as may be necessary in the conduct of its functions and duties with any person (including a government entity).

(b) DUTIES.—In addition to its duties and responsibilities under other provisions of this Act, the Association shall—

(1) prepare a survey of existing rail services in the region, including patterns of traffic movement; traffic density over identified lines; pertinent costs and revenues of lines; and plant, equipment, and facilities (including yards and terminals);

(2) prepare an economic and operational study and analysis of present and future rail and express service needs in the region; the nature and volume of the traffic in the region now being moved by rail and

express or likely to be moved by rail and express in the future; the extent to which available alternative modes of transportation could move such traffic as is now carried by railroads in reorganization; the relative economic, social and environmental costs that would be involved in the use of such available alternative modes, including energy resource costs; and the competitive or other effects on profitable railroads;

(3) prepare a study of rail passenger services in the region, in terms of scope and quality;

(4) consider the views of the Office and of all government officials and persons who submit views, reports, or testimony under section 205(d) (1) of this title or in the course of proceedings conducted by the Office;

(5) consider methods of achieving economies in the cost of rail system operations in the region including consolidation, pooling, and joint use or operation of lines, facilities, and operating equipment; relocation; rehabilitation and modernization of equipment, track, and other facilities; and abandonment of lines consistent with meeting needs and service requirements; together with the anticipated economic, social, and environmental costs and benefits of each such method;

(6) consider the effect on railroad employees of any restructuring of rail services in the region;

(7) make available to the Secretary, the Director of the Office and appropriate committees of the Congress all studies, data, and other information acquired or developed by the Association and

(8) study the feasibility of coordinating rail and express service in the region.

(c) INVESTMENT OF FUNDS.—Uncommitted funds of the Association shall be kept in cash on hand or on deposit, or invested in obligations of the United States or guaranteed thereby, or in obligations, participations, or other investments which are lawful investments for fiduciary, trust, or public funds.

(d) EXEMPTION FROM TAXATION.—The Association, including its franchise, capital reserves, surplus, security holdings, and income shall be exempt from all taxation now or hereafter imposed by the United States, any commonwealth, territory, dependency, or possession thereof, or by any State or political subdivision thereof, except that any real property of the Association shall be subject to taxation to the same extent according to its value as other real property is taxed.

(e) ANNUAL REPORT.—The Association shall transmit to the Congress and the President, not later than 90 days after the end of each fiscal year, a comprehensive and detailed report on all activities of the Association during the preceding fiscal year. Each such report shall include (1) the Association's statement of specific and detailed objectives for the activities and programs conducted and assisted under this Act; (2) statements of the Association's conclusions as to the effectiveness of such activities and programs in meeting the stated objectives and the purposes of this Act, measured through the end of the preceding fiscal year; (3) recommendations with respect to any legislation or administrative action which the Association deems necessary or desirable; (4) a statistical compilation of the obligations issued, certificates of value issued, securities purchased, and loans made under this Act; (5) a summary of outstanding problems confronting the Association, in order of priority; (6) all other information required to be submitted to the Congress pursuant to any other provision of this Act; and (7) the Association's projections and plans for its activities and programs during the next fiscal year.

(f) BUDGET.—The receipts and disbursements of the Association other than administrative expenses referred to in subsection (g) of this section and receipts and disbursements under section 216 of this title and section 306 of this Act) in the discharge of its functions shall not be included in the totals of the budget of the United States Government, and shall be exempt from any annual expenditure and net lending (budget outlays) limitations imposed on a budget of the United States Government. The Chairman of the Association shall transmit annually to the Congress a budget for program activities and for administrative expenses of the Association. The Chairman shall report annually to the Congress the amount of net lending of the Association, which would be included in the totals of the budgets of the United States Government, if the Association's activities were not excluded from those totals as a result of this section.

(g) ACCOUNTABILITY.—(1) Section 201 of the Government Corporation Control Act (31 U.S.C. 856) is amended by striking out "and" at the end of clause (6) and by inserting immediately before the period at the end thereof the following: ", (8) the United States Railway Association".

(2) The Chairman of the Association shall transmit annually to the Office of Management and Budget a budget for administrative expenses of the Association. Whenever the Association submits any budget estimate or request to the Office of Management and Budget, it shall concurrently transmit a copy of the estimate or request to the Congress. Within budgetary constraints of the Congress, the maximum feasible and prudent budgetary flexibility shall be provided to the Association to permit effective operations.

ACCESS TO INFORMATION

Section 203. [*45 U.S.C. §713*] (a) PLANNING.—Each railroad operating in the region shall provide such relevant information as may be requested by the Secretary, the Office, or the Association in connection with the performance of their respective functions under any provision of this Act.

(b) OTHER.—Each railroad or other person or government entity seeking financial assistance from the Association shall maintain and make available such records, make and submit such reports, and provide such data, materials, or other relevant information as may be requested by the Association.

(c) ENFORCEMENT.—Where authorized under subsection (a) or (b) of this section and upon presenting appropriate credentials and a written notice of inspection authority, any officer or employee duly designated by the Secretary, the Office, or the Association may, at reasonable times, inspect records, papers, processes, rolling stock, systems, equipment, or facilities and may, in furtherance of their respective functions under this Act, hold such hearings, sit and act at such times and places, administer such oaths, and require by subpoena or other order the attendance and testimony of such witnesses and the production of such information as is deemed advisable. Subpoenas shall be issued under the signature of the Secretary, the Director of the Office, or the Chairman or President of the Association and may be served by any duly designated individual. In case of contumacy or refusal to obey such a subpoena or order by any person who resides, in found, or transacts business within the jurisdiction of any district court of the United States, such district court shall, upon petition, have jurisdiction to issue to such person an order requiring him to comply forthwith. Failure to obey such an order is punishable by such court as a contempt of court.

(d) CONGRESS.—Nothing in this section shall authorize the withholding of information from any duly authorized committee of the Congress.

REPORT

Section 204. [*45 U.S.C. §714*] (a) PREPARATION.—Within 30 days after the date of enactment of this Act, the Secretary shall prepare a comprehensive report containing his conclusions and recommendations with respect to the geographic zones within the region in and between which rail service should be provided and the criteria upon which such conclusions and recommendations are based. The Secretary may use as a basis for the identification of such geographic zones the standard metropolitan statistical areas, groups of such areas, counties, or groups of counties having similar economic characteristics such as mining, manufacturing, or farming.

(b) SUBMISSION.—The Secretary shall submit the report required by subsection (a) of this section to the Office, the Association, the Governor and public utilities commission of each State studied in the report, local governments, consumer organizations, environmental groups, the public, and the Congress. The Secretary shall further cause a copy of the report to be published in the Federal Register.

RAIL SERVICES PLANNING OFFICE

Section 205. [*45 U.S.C. §715*] (a) ESTABLISHMENT.—The Rail Services Planning Office is established as an office in the Commission. The Office shall function continuously pursuant to the provisions of this Act, and shall be administered by a director.

(b) DIRECTOR.—The Director of the Office shall be appointed for a term of 6 years by the Chairman of the Commission with the concurrence of 5 members of the Commission. He shall be appointed and compensated, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, classification, and General Schedule pay rates, at a rate not in excess of the maximum rate for GS-18 of the General Schedule under section 5332 of such title. The Director of the Office shall administer and be responsible for the discharge of the functions and duties of the Office from the date he takes office unless removed for cause by the Commission.

(c) POWERS.—The Director of the Office is subject to the direction of, and shall report to, such member of the Commission as the Chairman thereof shall designate. The Chairman may designate himself as that member. Such Director is authorized with the concurrence of such member or (in case of disagreement) the Chairman of the Commission, to enter into, without regard to section 3709 of the Revised Statutes of the United States (41 U.S.C. 5) such contracts, leases, cooperative agreements, or other transactions as may be necessary in the conduct of the functions and duties of the Office with any person (including a government entity). Each department, agency, and instrumentality of the executive branch of the Federal Government and each independent regulatory agency of the United States is authorized, and shall give careful consideration to a request, to furnish to the Director of the Office, upon written request, on a reimbursable basis or otherwise, such assistance as the Director deems necessary to carry out the functions and duties of the Office. Such assistance includes transfer of personnel with their consent and without prejudice to their position and rating.

(d) DUTIES.—In addition to its duties and responsibilities under other provisions of this Act and under the Railroad Revitalization and Regulatory Reform Act of 1976, the Office shall—

(1) assist the Commission in studying and evaluating any proposal, submitted to the Commission pursuant to section 5(2) or (3) of the Interstate Commerce Act (49 U.S.C. 5 (2) or (3)), for a merger, consolidation, unification or coordination project, joint use of tracks or other facilities, or acquisition or sale of assets, which involves any common carrier by railroad subject to part I of such Act;

(2) assist the Commission in developing, with respect to economic regulation of transportation, policies which are likely to result in a more

competitive, energy-efficient, and coordinated transportation system which utilizes each mode of transportation to its maximum advantage to meet the transportation service needs of the Nation;

(3) assist States and local and regional transportation agencies in making determinations whether to provide rail service continuation subsidies to maintain in operation particular rail properties, by establishing criteria for determining whether particular rail properties are suitable for rail service continuation subsidies, with such criteria to include the following considerations: rail properties are suitable if the cost of the required subsidy for such properties per year to the taxpayers is less than (A) the cost of termination of rail service over such properties measured by increased fuel consumption and operational costs for alternative modes of transportation, (B) the cost to the gross national product in terms of reduced output of goods and services, (C) the cost of relocating or assisting through unemployment, retraining, and welfare benefits to individuals and firms adversely affected thereby, and (D) the cost to the environment measured by damage caused by increased pollution;

(4) conduct an ongoing analysis of the national rail transportation needs, evaluate the policies, plans, and programs of the Commission on the basis of such analysis, and advise the Commission of the results of such evaluation;

(5) within 180 days after the date of enactment of the Railroad Revitalization and Regulatory Reform Act of 1976, issue additional regulations, after conducting a proceeding in accordance with the provisions of section 553 of title 5, United States Code, which contain—

(A) standards for the computation of subsidies for rail passenger service (except passenger service compensation disputes subject to the jurisdiction of the Commission under section 402(a) of the Rail Passenger Service Act (45 U.S.C. 562(a)), which are consistent with the compensation principles described in the final system plan and which avoid cross subsidization among commuter, intercity, and freight rail services; and

(B) standards for the determination of emergency commuter rail passenger service operating payments pursuant to section 17 of the Urban Mass Transportation Act of 1964;

(6) determine and publish, and from time to time revise and reissue, standards for determining (A) the 'revenue attributable to the rail properties', (B) the 'avoidable costs of providing service', (C) a'reasonable return on the value,' and (D) a 'reasonable management fee', as those phrases are used in section 304 of this Act, after a proceeding in accordance with the provisions of section 553 of title 5, United States Code; and

(7) employ and utilize the services of attorneys and such other personnel as may be required in order properly to protect the interests of

those communities and users of rail service which, for whatever reason (such as their size or location) might not otherwise be adequately represented in the course of the reorganization process under this Act, until the assumption of such duties by the Office of Rail Public Counsel pursuant to section 27 (4) (d) of the Interstate Commerce Act (49 U.S.C. 27(4) (d)).

(e)ADDITIONAL DUTIES.—(1) Within 270 days after the date of enactment of the Railroad Revitalization and Regulatory Reform Act of 1976, the Office shall issue additional regulations, after conducting a proceeding in accordance with section 553 of title 5, United States Code. Such regulations shall (A) develop an accounting system which will permit the collection and publication by the Corporation or by profitable railroads providing service over lines scheduled for abandonment, of information necessary for an accurate determination of the attributable revenues, avoidable costs, and operations of light density lines as operating and economic units, and (B) determine the 'avoidable costs of providing rail freight service', as that phrase is used in section 1a(6) (a) (ii) (A) of the Interstate Commerce Act. The Office may, at any time, revise and republish the standards and regulations required by this section to incorporate changes made necessary by the accounting system developed pursuant to this subsection.

(2) Upon the request of a State in the region, within 90 days after the date of enactment of the Railroad Revitalization and Regulatory Reform Act of 1976, the Office shall prepare and publish an evaluation of the economic viability of any or all light density lines within such State which are not designated for inclusion in the final system plan. Such an evaluation shall include an analysis of the actions which may be necessary to make the operation of rail services over any such line economical. The results of each such evaluation shall be transmitted to the requesting State and published in the Federal Register, not later than 1 year after the date such request is received by the Office.

FINAL SYSTEM PLAN

Section 206. [*45 U.S.C. §716*] (a) GOALS.—The final system plan shall be formulated in such a way as to effectuate the following goals:

(1) the creation, through a process of reorganization, of a financially self-sustaining rail and express service system in the region;

(2) the establishment and maintenance of a rail service system adequate to meet the rail transportation needs and service requirements of the region;

(3) the establishment of improved high-speed rail passenger service, consonant with the recommendations of the Secretary in his report of

September 1971, entitled "Recommendations for Northeast Corridor Transportation";

(4) the preservation, to the extent consistent with other goals, of existing patterns of service by railroads (including short-line and terminal railroads), and of existing railroad trackage in areas in which fossil fuel natural resources are located, and the utilization of those modes of transportation in the region which require the smallest amount of scarce energy resources and which can most efficiently transport energy resources;

(5) the retention and promotion of competition in the provision of rail and other transportation services in the region;

(6) the attainment and maintenance of any environmental standards, particularly the applicable national ambient air quality standards and plans established under the Clean Air Act Amendments of 1970, taking into consideration the environmental impact of alternative choices of action;

(7) the movement of passengers and freight in rail transportation in the region in the most efficient manner consistent with safe operation, including the requirements of commuter and intercity rail passenger service; the extent to which there should be coordination with the National Railroad Passenger Corporation and similar entities; and the identification of all short-to-medium distance corridors in densely populated areas in which the major upgrading of rail lines for high-speed passenger operation would return substantial public benefits; and

(8) the minimization of job losses and associated increases in unemployment and community benefit costs in areas in the region presently served by rail service.

(b) FACTORS.—The final system plan shall be based upon due consideration of all factors relevant to the realization of the goals set forth in subsection (a) of this section. Such factors include the need for and the cost of rehabilitation and modernization of track, equipment, and other facilities; methods of achieving economies in the cost of rail operations in the region; means of achieving rationalization of rail services and the rail service system in the region; marketing studies; the impact on railroad employees; consumer needs; traffic analyses; financial studies; and any other factors identified by the Association under section 202(b) of this title or in the report of the Secretary required under section 204(a) of this title.

(c) DESIGNATIONS.—The final system plan shall designate—

(1) which rail properties of railroads in reorganization in the region or of railroads leased, operated, or controlled by any railroad in reorganization in the region—

(A) shall be transferred to the Corporation: *Provided*, That the Corporation shall, within 95 days after the effective date of the final system plan, give notice to the Association of which such rail properties, if any, are to be transferred to a subsidiary of the Corporation in the event that the Board of Directors of the Association finds that such transfer would be consistent with the final system plan;

(B) shall be offered for sale to a profitable railroad operating in the region and, if such offer is accepted, operated by such railroad; the plan shall designate what additions shall be made to the designation under subparagraph (A) of this paragraph and what alternative designations shall be made under this paragraph in the event such profitable railroad fails to accept such offer;

(C) shall be purchased, leased, or otherwise acquired from the Corporation by the National Railroad Passenger Corporation in accordance with the exercise of its option under section 601(d) of this Act for improvement to achieve the goal set forth in subsection (a)(3) of this section;

(D) may be purchased or leased from the Corporation by (i) a State or a local or regional transportation authority to meet the needs of commuter and intercity rail passenger service, of (ii) the National Railroad Passenger Corporation to meet the needs of improved rail passenger service over intercity routes, other than properties designated pursuant to subparagraph (C) of this paragraph; and

(E) if not otherwise required to be operated by the Corporation, a government entity, or a responsible person, are suitable for use for other public purposes, including highways, other forms of transportation, conservation, energy transmission, education or health care facilities, or recreation. In carrying out this subparagraph, the Association shall solicit the views and recommendations of the Secretary, the Secretary of the Interior, the Administrator of the Environmental Protection Agency, and other agencies of the Federal Government and of the States and political subdivisions thereof within the region, and the general public; and

(2) which rail properties of profitable railroads operating in the region may be offered for sale to the Corporation or to other profitable railroads operating in the region subject to paragraphs (3) and (4) of subsection (d) of this section. Any rail properties designated to be offered for sale to the Corporation may be sold instead to a subsidiary of the Corporation.

(d) TRANSFERS.—All transfers or conveyances pursuant to the final system plan shall be made in accordance with, and subject to, the following principles:

(1) All rail properties to be transferred to the Corporation or any subsidiary thereof by a profitable railroad, by trustees of a railroad in reorganization, or by any railroad leased, operated, or controlled by a railroad in reorganization in the region, shall be transferred in exchange for stock and other securities of the Corporation or any subsidiary

thereof (including obligations of the Association) and the other benefits accruing to such railroad by reason of such transfer.

(2) All rail properties to be conveyed to a profitable railroad operating in the region by trustees of a railroad in reorganization, or by any railroad leased, operated, or controlled by a railroad in reorganization in the region, shall be conveyed in exchange for compensation from the profitable railroad.

(3) Notwithstanding any other provision of this Act, no acquisition under this Act shall be made by any profitable railroad operating in the region without a determination with respect to each such transaction and all such transactions cumulatively (A) by the Association, upon adoption and release of the preliminary system plan, that such acquisition or acquisitions will not materially impair the profitability of any other profitable railroad operating in the region or of the Corporation, and (B) by the Commission, which shall be made within 90 days after adoption and release by the Association of the preliminary system plan, that such acquisition or acquisitions will be in full accord and comply with the provisions and standards of section 5 of part I of the Interstate Commerce Act (49 U.S.C.5). All determinations made by the Association in the correction to the preliminary system plan published on April 11, 1975 (40 Fed. Reg. 16377), shall be treated for all purposes as if they had been made upon adoption and release by the Association of the preliminary system plan. All determinations made by the Commission with respect to such correction shall be treated for all purposes as if they had been made within 90 days after adoption and release by the Association of the preliminary system plan. All determinations made by the Commission with respect to acquisitions by profitable railroads referred to in any supplement to the preliminary system plan published under section 207(b)(2) of this title shall be deemed to be timely if made prior to the adoption of the final system plan under section 207(c) of this title. The determination by the Association shall not be reviewable in any court. The determination by the Commission shall not be reviewable in any court.

(4) Where the final system plan designates specified rail properties of a railroad in reorganization in the region, or of a railroad leased, operated, or controlled by a railroad in reorganization in the region, to be offered for sale to and operated by a profitable railroad operating in the region, such designation shall terminate 7 days after the date of the enactment of the Railroad Revitalization and Regulatory Reform Act of 1976 unless, prior to such date, such profitable railroad has notified the Association in writing of its acceptance of such offer. Any such offer may be modified until the date of acceptance thereof, unless such modification results in an offer for the sale of rail properties at less than the net liquidation value thereof. Where the final system plan designates specified rail properties of a profitable railroad operating in the region

as authorized to be offered for sale or lease to the Corporation or to other profitable railroads operating in the region, such designation and authorization shall terminate 95 days after the effective date of the final system plan unless, prior to such date, a binding agreement with respect to such properties has been entered into and concluded.

(5)All properties—

(A) transferred by the Corporation pursuant to sections 206(c)(1)(C) and 601(d) of this Act;

(B) transferred by the Corporation to any State (or local or regional transporation authority), pursuant to subsection (c)(1)(D) of this section, or

(C) transferred by the Corporation to any State, local or regional transportation authority, or the National Railroad Passenger Corporation, within 900 days after the date of conveyance, pursuant to section 303(b)(1) of this Act, to meet the needs of commuter or intercity rail passenger service, shall be transferred at a value related to the value received from the Corporation pursuant to the final system plan for the transfer to such Corporation of such properties. The value of any such properties, which are transferred pursuant to subparagraph (B) or (C) of this paragraph, shall be adjusted to reflect the value attributable to any applicable maintenance and improvement provided by the Corporation (to the extent the Corporation has not been released from the obligation to pay for such improvements) and the cost to the Corporation of transferring such properties.

(6) Notwithstanding any statement to the contrary in the final system plan, a State (or a local or regional transportation authority) shall not be required to deliver to the Corporation a firm commitment to acquire rail properties designated to such State or authority prior to 7 days after the date of enactment of this paragraph.

(e) CORPORATION FEATURES.—The final system plan shall set forth—

(1) pro forma earnings for the Corporation, as reasonably projected and considering the additions or changes in the designation of rail properties to be operated by the Corporation which may be made under subsection (d)(4) of this section;

(2) the capital structure of the Corporation, based on the pro forma earnings of the Corporation as set forth, including such debt capitalization as shall be reasonably deemed to conform to the requirements of the public interest with respect to railroad debt securities, including the adequacy of coverage of fixed charges; and (3) the manner in which employee stock ownership plans may, to the extent practicable, be utilized for meeting the capitalization requirements of the Corporation, taking into account (A) the relative cost savings compared to conventional methods of corporate finance; (B) the labor cost savings; (C) the potential for minimizing strikes and producing more harmonious rela-

tions between labor organizations and railway management; (D) the projected employee dividend incomes; (E) the impact on quality of service and prices to railway users; and (F) the promotion of the objectives of this Act of creating a financially self-sustaining railway system in the region which also meets the service needs of the region and the Nation.

(f) VALUE.—The final system plan shall designate the value of all rail properties to be transferred under the final system plan and the value of the securities and other benefits to be received for transferring those rail properties to the Corporation in accordance with the final system plan.

(g) OTHER PROVISIONS.—The final system plan may recommend arrangements among various railroads for joint use or operation of rail properties on a shared ownership, cooperative, pooled, or condominium-type basis, subject to such terms and conditions as may be specified in the final system plan. The final system plan shall also make such designations as are determined to be necessary in accordance with the provisions of section 402 or 403 of this Act.

(h) OBLIGATIONAL AUTHORITY.—The final system plan shall recommend the amount of obligations of the Association which are necessary to enable it to implement the final system plan.

(i) TERMS AND CONDITIONS FOR SECURITIES.—The final system plan may include terms and conditions for any securities to be issued by the Corporation in exchange for the conveyance of rail properties under the final system plan which in the judgement of the Association will minimize any actual or potential debt burden on the Corporation. Any such terms and conditions for securities of the Corporation which purport to directly obligate the Association shall not become effective without affirmative approval, with or without modification by a joint resolution of the Congress.

(j) Any rail properties over which rail service was being provided as of the date of enactment of this Act, and which were recommended in the preliminary system plan for transfer to the Corporation, shall be deemed to be designated in the final system plan for transfer to the Corporation under subsection (c)(1)(A) of this section. Any designation in the final system plan, pursuant to subsection (c)(1)(B) of this section, of overhead trackage rights to be acquired by a profitable railroad operating in the region over specified rail properties to be acquired by the Corporation, where such designation does not (1) authorize such profitable railroad to interchange traffic with at least one railroad, or (2) provide for the connection of portions of such profitable railroad's rail properties, and where the transfer of ownership of such rail properties (including trackage rights) to such profitable railroad was recommended in the preliminary system plan, and the Commission has made a determination with respect thereto, in accordance with subsection (d)(3) of this section, shall be deemed to authorize such profitable railroad to interchange traffic with the Corporation and any other profitable railroad connecting with such specified rail properties.

ADOPTION OF FINAL SYSTEM PLAN

Section 207. [*45 U.S.C. §717*] (a) PRELIMINARY SYSTEM PLAN.—(1) Within 420 days after the date of enactment of this Act, the Association shall adopt and release a preliminary system plan prepared by it on the basis of reports and other information submitted to it by the Secretary, the Office, and interested persons in accordance with this Act and on the basis of its own investigations, consultations, research, evaluation, and analysis pursuant to this Act. Copies of the preliminary system plan shall be transmitted by the Association to the Secretary, the Office, the Governor and public utility commission of each State in the region, the Congress, each court having jurisdiction over a railroad in reorganization in the region, the special court, and interested persons, and a copy shall be published in the Federal Register. The Association shall invite and afford interested persons an opportunity to submit comments on the preliminary system plan to the Association within 60 days after the date of its release.

(2) The Office is authorized and directed to hold public hearings on the preliminary system plan and to make available to the Association a summary and analysis of the evidence received in the course of such proceedings, together with its critique and evaluation of the preliminary system plan, not later than 60 days after the date of release of such plan. The Office is authorized to hold public hearings on any supplement to the preliminary system plan and to make available to the Association a summary and analysis of the evidence received in the course of such proceedings, together with its critique and evaluation of such supplement, not later than 30 days after the release of such supplement.

(b) APPROVAL.—(1) Within 120 days after the date of enactment of this Act each United States district court or other court having jurisdiction over a railroad in reorganization shall decide whether the railroad is reorganizable on an income basis within a reasonable time under section 77 of the Bankruptcy Act (11 U.S.C. 205) and that the public interest would be better served by continuing the present reorganization proceedings than by a reorganization under this Act. Within 60 days after the submission of the report by the Office, under section 205(d)(1) of this title, on the Secretary's report on rail services in the region, each United States district court or other court having jurisdiction over a railroad in reorganization shall decide whether or not such railroad shall be reorganized by means of transferring some of its rail properties to the Corporation pursuant to the provisions of this Act. Because of the strong public interest in the continuance of rail transportation in the region pursuant to a system plan devised under the provisions of this Act, each such court shall order that the reorganization be proceeded with pursuant to this Act unless it (1) has found that the railroad is reorganizable on an income basis within a reasonable time under section 77 of the Bankruptcy Act (11 U.S.C. 205) and that the public interest would be better served by such a reorganization than by a reorganization under this Act, or (2) finds that this Act does not provide a process which would be fair and equitable to the estate of the railroad in reorganization in which case it shall dismiss the reorganization proceeding. If a court does not enter an order or make a finding as required by this subsection, the reorganization shall be proceeded with pursuant to this Act. An appeal from an order made under this section may be made only to the special court. Appeal to the special court shall be taken within 10 days following entry of an order pursuant to this subsection, and the special court shall complete its review and render its decision within 80 days after such appeal is taken. There shall be no review of the decision of the special court.

(2) Whenever it has been finally determined pursuant to the procedures of paragraph (1) of this subsection, that the reorganization of a railroad subject to reorganization under section 77 of the Bankruptcy Act (11 U.S.C.205) shall not be proceeded with pursuant to this Act, the court having jurisdiction over such railroad may, upon a petition which is filed within 10 days after the date of enactment of this subsection by the trustees of such railroad, reconsider such order. Such reorganization court shall (i) affirm its previous order or (ii) issue an order that the reorganization of such railroad be proceeded with pursuant to this Act unless it finds that this Act does not provide a process which would be fair and equitable. The provisions of paragraph (1) of this subsection are applicable in such reconsideration, except that (A) such reorganization court shall make its decision within 30 days after such petition is filed, and (B) any decision by the special court on appeal from such a decision shall be rendered within 30 days after such reorganization court decision is made. There shall be no review of the decision of the special court. The Association shall take any steps it finds necessary, consistent with time limitations and other provisions of this Act, to effectuate the consequences of such a revised order, including the preparation and submission of any necessary or appropriate supplements to the preliminary system plan.

(c) ADOPTION.—Within 540 days after the date of enactment of this Act, the executive committee of the Association shall prepare and submit a final system plan for the approval of the Board of Directors of the Association. A copy of such submission shall be simultaneously presented to the Commission. The submission shall reflect evaluation of all responses and summaries of responses received, testimony at any public hearings, and the results of additional study and review. Within 30 days thereafter, the Board of Directors of the Association shall by a majority vote of all its members approve a final system plan which meets all of the requirements of section 206 of this title.

(d) REVIEW OF COMMISSION.—Within 30 days following the adoption of the final system plan by the Association under subsection (c) of this section and the submission of such plan to Congress under section 208 (a) of this title, the Commission shall submit to the Congress an evaluation of the final system plan delivered to both Houses of Congress.

REVIEW BY CONGRESS

Section 208. [*45 U.S.C. §718*] (a) GENERAL.—The Board of Directors of the Association shall deliver the final system plan adopted by the Association to both Houses of Congress and to the Committee on Interstate and Foreign Commerce of the House of Representatives and the Committee on Commerce of the Senate. The final system plan shall be deemed approved at the end of the first period of 60 calendar days of continuous session of Congress after such date of transmittal unless either the House of Representatives or the Senate passes a resolution during such period stating that it does not favor the final system plan

(b) REVISED PLAN.—If either the House or the Senate passes a resolution of disapproval under subsection (a) of this section, the Association, with the cooperation and assistance of the Secretary and the Office, shall prepare, determine, and adopt a revised final system plan. Each such revised plan shall be submitted to Congress for review pursuant to subsection (a) of this section.

(c) COMPUTATION.—For purposes of this section—

(1) continuity of session of Congress is broken only by an adjournment sine die; and

(2) the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of the 60-day period.

(d) ADDITIONS.—(1) The supplemental report. dated September 18, 1975, to the final system plan, and the provisions of the Association's official errata supplement to the final system plan, dated December 1, 1975, including all designations made therein, shall be treated for all purposes as if they had been part of and included in the final system plan adopted by the Association and reviewed by the Congress. The final system plan shall, for all purposes, be deemed to be approved as modified and amended by such supplemental report and such supplement.

(2) The Association may, upon petition of any State, modify the final system plan to make further designations with respect to rail properties of railroads in reorganization in the region designated for transfer to the Corporation under such plan, if such designations (A) are likely to re-

sult in improved rail service on such rail properties and connecting rail properties, and (B) would not materially impair the profitability of the Corporation. Such designations, including designations of such rail properties to a State, a profitable railroad, or a responsible person, may be made at any time prior to delivery of the final system plan to the special court under section 209(c) of this title. Such further designations shall be treated for all purposes as if they had been included in the final system plan adopted by the Association and reviewed by the Congress, and the final system plan shall for all purposes be deemed to be approved as modified by such designations. Any action of the Association with respect to any such petition shall not be subject to review by any court.

(3) (A) Within 20 days after the date of enactment of the Railroad Revitalization and Regulatory Reform Act of 1976, the Association may, by notice to the Congress and by publication in the Federal Register, modify, supplement, or add to the designations of rail properties in the final system plan if the Association finds such actions are necessary to—

(i) achieve the efficient implementation of the final system plan, or

(ii) provide for the offer to profitable railroads of rail properties designated in the final system plan to the Corporation, if such properties are not essential in the operation of other rail properties of the Corporation but are or would be integrally related to the operation of rail properties of (or which are offered pursuant to the final system plan to) such profitable railroad, or

(iii) provide for the designation of additional rail properties to the Corporation or to a subsidiary thereof to enable the Corporation to serve efficiently a line of railroad designated to the Corporation in the final system plan if such line does not connect with any other line of railroad so designated to the Corporation or if such line would be served more efficiently as a consequence of such designation.

Any designation to a profitable railroad pursuant to this paragraph shall comply with the second sentence of section 206(d)(4) of this title, and shall only be made upon a finding by the Association that such designation is integrally related to an offer of rail properties to a profitable railroad in the final system plan, that the goals of the final system plan require that the rail properties be operated as a part of the rail properties included in such offer, and that the implementation of such designation will not materially and adversely affect the impact of such offer on the profitability of the Corporation or any profitable railroad operating in the region. Any designation to a profitable railroad pursuant to this subsection, which amends any prior offer, shall terminate 30 days after the date of enactment of this paragraph unless, prior to such date, such profitable railroad has notified the Association in writing of its acceptance of such amendment to the prior offer.

(B) If a line of railroad or any segment thereof is designated for rail service in the final system plan, no designation may be made by the Association pursuant to this paragraph which would result in such line or segment not being so designated. Any designations made pursuant to this paragraph shall be treated for all purposes as if they had been included in the final system plan adopted by the Association and reviewed by the Congress. The final system plan shall for all purposes be deemed to be approved as amended by such designations.

(C) Any designations made pursuant to this paragraph shall not be subject to review by any court.

(D) Any labor agreements entered into under section 508 of this Act shall be subject to further negotiations for any modifications which may be necessary to implement designations made pursuant to this paragraph.

JUDICIAL REVIEW

Section 209. [*45 U.S.C. §719*] (a) GENERAL.—Notwithstanding any other provision of law, the final system plan which is adopted by the Association and which becomes effective after review by the Congress is not subject to review by any court except in accordance with this section. After the final system plan becomes effective under section 208 of this title, it may be reviewed with respect to matters concerning the value of the rail properties to be conveyed under the plan and the value of the consideration to be received for such properties.

(b) SPECIAL COURT.—Within 30 days after the date of enactment of this Act, the Association shall make application to the judicial panel on multi-district litigation authorized by section 1407 of title 28, United States Code, for the consolidation in a single, three-judge district court of the United States of all judicial proceedings with respect to the final system plan. Within 30 days after such application is received, the panel shall make the consolidation in a district court (cited herein as the "special court") which the panel determines to be convenient to the parties and the one most likely to be able to conduct any proceedings under this section with the least delay and the greatest possible fairness and ability. Such proceedings shall be conducted by the special court which shall be composed of three Federal judges who shall be selected by the panel, except that none of the judges selected may be a judge assigned to a proceeding involving any railroad in reorganization in the region under section 77 of the Bankruptcy Act (11 U.S.C.205). The special court is authorized to exercise the powers of a district judge in any judicial district with respect to such proceedings and such powers shall include those of a reorganization court. The special court shall have the power to order the conveyance of rail properties of railroads leased, operated, or controlled by a railroad in reorganization in the region. The special court may issue rules for the conduct of any proceedings under this section and under section 305 of this Act, including rules with respect to the time within which motions may be filed, and with respect to appropriate representation of interests not otherwise represented (including the Secretary with respect to a petition by the Association in the case of a proposal developed by the Secretary, under such section 305). No determination by the panel under this subsection may be reviewed in any court.

(c) DELIVERY OF PLAN TO SPECIAL COURT.—Within 90 days after its effective date, the Association shall deliver a certified copy of the final system plan to the special court and shall certify to the special court—

(1) which rail properties of the respective railroads in reorganization in the region and of any leased, operated, or controlled by such railroads in reorganization are to be transferred to the Corporation or any subsidiary thereof, in accordance with the final system plan;

(2) which rail properties of the respective railroads in reorganization in the region or person leased, operated, or controlled by such railroads in reorganization are to be conveyed to profitable railroads, in accordance with the final system plan;

(3) the amount, terms, and value of the securities of the Corporation or any subsidiary thereof (including any certificates of value of the Association) to be exchanged for those rail properties to be transferred to the Corporation or any subsidiary thereof pursuant to the final system plan, and as indicated in paragraph (1) of this subsection; and

(4) that the transfer of rail properties in exchange for securities of the Corporation or any subsidiary thereof (including any certificates of value of the Association) and other benefits is fair and equitable and in the public interest. Notwithstanding any other provisions of this subsection and subsection (d) of this section, the time for the delivery of a certified copy of the final system plan shall be March 12, 1976, and may be extended to a date not more than 30 days thereafter, prescribed in a notice filed by the Association not later than February 17, 1976, with the special court, the Congress, and each court referred to in such subsection (d). Such notice shall contain the certification of the Association than an orderly conveyance of rail properties cannot reasonably be effected before the date for conveyance determined with respect to such notice. The time prescribed in section 303(a) of this Act shall be determined with respect to the date prescribed in such notice.

(d) BANKRUPTCY COURTS.—Within 90 days after its effective date, the Association shall deliver a certified copy of the final system plan to each district court of the United States or any other court having jurisdiction over a railroad in reorganization in the region and shall certify to each such court—

(1) which rail properties of that railroad in reorganization are to be transferred to the Corporation or any subsidiary thereof under the final system plan; and

(2) which rail properties of that railroad in reorganization, if any, are to be conveyed to profitable railroads operating in the region, under the final system plan.

(e) ORIGINAL AND EXCLUSIVE JURISDICTION.—(1) Notwithstanding any other provision of law, any civil action—

(A) for injunctive or other relief against the Association from the enforcement, operation, or execution of this Act or any provision thereof, or from any action taken by the Association pursuant to authority conferred or purportedly conferred under this Act;

(B) challenging the constitutionality of this Act or any provision thereof;

(C) challenging the legality of any action of the Association, or any failure of the Association to take any action, pursuant to authority conferred or purportedly conferred under this Act;

(D) to obtain, inspect, copy, or review any document in the possession or control of the Association that would be discoverable in litigation pursuant to section 303(c) of this Act;

(E) brought after a conveyance, pursuant to section 303(b) of this Act, to set aside or annul such conveyance or to secure in any way the reconveyance of any rail properties so conveyed; or

(F) with respect to continuing reorganization and supplemental transactions, in accordance with section 305 of this Act; shall be within the original and exclusive jurisdiction of the special court. The special court shall not hear or determine any such action prior to the date of conveyance, pursuant to section 303(b)(1) of this Act, except as the Constitution may require. Relief shall not be granted in any action referred to in subparagraph (A), (C), or (E) unless the person seeking such relief establishes that the Association acted in reckless or deliberate disregard of applicable law.

(2) The original and exclusive jurisdiction of the special court shall include any action, whether filed by any interested person or initiated by the special court itself, to interpret, alter, amend, modify, or implement any of the orders entered by such court pursuant to section 303 (b) of this Act in order to effect the purposes of this Act or the goals of the final system plan. During the pendency of any proceeding described in this paragraph, the special court may enter such orders as it determines to be appropriate, including orders enjoining, restraining, conditioning, or limiting any conveyance, transfer, or use of any asset or right which is subject to such an order or which is at issue in such a proceeding, or which involves the enforcement of any liens or encumbrances upon such assets or rights. Any orders pursuant to this para-

graph which interpret, alter, amend, modify, or implement orders entered by the special court shall be final and shall not be restrained or enjoined by any court.

(3) A final order or judgment of the special court in any action referred to in this section shall be reviewable only upon petition for a writ of certiorari to the Supreme Court of the United States, except that any order or judgment enjoining the enforcement, or declaring or determining the unconstitutionality or invalidity, of this Act, in whole or in part, or of any action taken under this Act, shall be reviewable by direct appeal to the Supreme Court of the United States in the same manner that an injunctive order may be appealed under section 1253 of title 28, United States Code. Such review is exclusive and any petition or appeal shall be filed not more than 20 days after entry of such order or judgment.

(f) DISPOSITION OF CASH DEPOSITS.—Whenever the compensation which is deposited with the special court under section 303(a) of this Act is in the form of cash, such cash shall be invested and reinvested upon such terms and conditions as the special court shall determine, pending the making of the findings referred to in paragraphs (1),(2), and (3) of section 303(c) of this Act. Notwithstanding section 303(c)(4) of this Act, the special court may order (1) the income from such investments, (2) the dividends or interest, if any, received on any securities or obligations deposited with the special court under such section 303(a), and (3) the income, if any, received with respect to any other form of compensation so deposited, to be distributed to the trustee of each railroad in reorganization and to any person leased, operated or controlled by such a railroad which conveyed the right, title, and interest in the rail properties with respect to which such cash, securities, obligations, or other compensation have been so deposited with the special court. Notwithstanding section 303(c)(4) of this Act, the special court may, within 90 days after the date of conveyance of rail properties pursuant to section 303(b) of this Act, order up to 25 percent of any cash (including investments made with cash) and other compensation deposited with the special court to be distributed to such trustee or person. On petition of the applicable trustee or person, the special court may order such additional distributions as it finds reasonable and appropriate, prior to the making of the findings referred to in paragraphs (1),(2), and (3) of such section 303(c).

(g) STAY OF COURT PROCEEDINGS.—The special court may stay or enjoin any action or proceeding in any State court or in any court of the United States other than the Supreme Court if such action or proceeding is contrary to any provision of this Act, impairs the effective implementation of this Act, or interferes with the execution of any order of the special court pursuant to this Act.

OBLIGATIONS OF THE ASSOCIATION

Section 210. [*45 U.S.C. §720*] (a) GENERAL.—To carry out the purposes of this Act, the Association is authorized to issue bonds, debentures, trust certificates, securities, or other obligations (herein cited as "obligations") in accordance with this section. Such obligations shall have such maturities and bear such rate or rates of interest as are determined by the Association with the approval of the Secretary of the Treasury. Such obligations shall be redeemable at the option of the Association prior to maturity in the manner stipulated in each such obligation, and may be purchased by the Association in the open market at a price which is reasonable.

(b) MAXIMUM OBLIGATIONAL AUTHORITY.—The aggregate amount of obligations of the Association issued under this section which may be outstanding at any one time shall not exceed $275,000,000. No obligations or proceeds thereof shall be issued or made available after the date of enactment of the Railroad Revitalization and Regulatory Reform Act of 1976 except—

(1) to meet existing or potential commitments for loans under section 211 of this title made or applied for prior to January 1, 1976; and

(2) for the purpose of providing loans pursuant to subsections (g) and (h) of section 211 of this title.

(c) GUARANTEES.—The Secretary shall guarantee the payment of principal and interest on all obligations issued by the Association in accordance with this Act and which the Association requests be guaranteed. All guarantees entered into by the Secretary under this section shall constitute general obligations of the United States for the payment of which its full faith and credit are pledged.

(d) VALIDITY.—No obligation issued by the Association under this section shall be terminated, canceled, or otherwise revoked, except in accordance with lawful terms and conditions prescribed by the Association. Such an obligation shall be conclusive evidence that it is in compliance with this section, has been approved, and is legal as to principal, interest, and other terms. An obligation of the Association shall be valid and incontestable in the hands of a holder, except as to fraud, duress, mutual mistake of fact, or material misrepresentation by or involving such holder.

(e) THE SECRETARY OF THE TREASURY.—If at any time the moneys available to the Secretary are insufficient to enable him to discharge his responsibilities under subsection (c) of this section, he shall issue notes or other obligations to the Secretary of the Treasury in such forms and denominations, bearing such maturities, and subject to such terms and conditions as may be prescribed by the Secretary of the Treasury. Such obligations shall bear interest at a rate to be determined by the Secretary of the Treasury taking into consideration the current average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of such obligations. The Secretary of the Treasury is authorized and directed to purchase any such obligations and for such purpose is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as amended. The purposes for which securities may be issued under such Act are extended to include any purchase of notes or other obligations issued under this subsection. At any time, the Secretary of the Treasury may sell any such obligations, and all sales, purchases, and redemptions of such obligations by the Secretary of the Treasury shall be treated as public debt transactions of the United States.

(f) AUTHORIZATION FOR APPROPRIATIONS.—There are hereby authorized to be appropriated to the Secretary such amounts as are necessary to discharge the obligations of the United States arising under this section.

(g) LAWFUL INVESTMENTS.—All obligations issued by the Association shall be lawful investments and may be accepted as security for all fiduciary, trust, and public funds, the investment or deposit of which shall be under the authority and control of the United States or any officer or officers thereof. All such obligations issued pursuant to this section shall be exempt securities within the meaning of laws administered by the Securities and Exchange Commission.

LOANS

Section 211. [*45 U.S.C. §721*] (a) GENERAL.—The Association is authorized, in accordance with the provisions of this section and such rules and regulations as it shall prescribe, to make loans to the Corporation, the National Railroad Passenger Corporation, and other railroads (including a railroad in reorganization which has been found to be reorganizable under section 77 of the Bankruptcy Act pursuant to section 207(b) of this title) in the region for purposes of achieving the goals of this Act, to a State or local or regional transportation authority pursuant to section 403 of this Act; and to provide assistance in the form of loans to any railroad which (A) connects with a railroad in reorganization, and (B) is in need of financial assistance to avoid reorganization proceedings under section 77 of the Bankruptcy Act (11 U.S.C.205). No such loan shall be made by the Association to a railroad unless such loans shall, where applicable, be treated as an expense of administration. The rights referred to in the last sentence of section 77(j) of the Bankruptcy Act (11 U.S.C. 205(j)) shall in no way be affected by this Act.

(b) APPLICATIONS.—Each application for such a loan shall be made in writing to the Association in such form and with such content and other submissions as the Association shall prescribe to protect reasonably the interests of the United States. The Association shall publish a notice of the receipt of each such application in the Federal Register and shall afford interested persons an opportunity to comment thereon.

(c) TERMS AND CONDITIONS.—Each loan shall be extended in such form, under such terms and conditions, and pursuant to such regulations as the Association deems appropriate. Such loan shall bear interest at a rate not less than the greater of a rate determined by the Secretary of the Treasury taking into consideration (1) the rate prevailing in the private market for similar loans as determined by the Secretary of the Treasury, or (2) the current average yield on outstanding marketable obligations of the Association with remaining periods of maturity comparable to the average maturities of such loans, plus such additional charge, if any, toward covering costs of the Association as the Association may determine to be consistent with the purposes of this Act.

(d) MODIFICATIONS.—The Association is authorized to approve any modification of any provision of a loan under this section, including the rate of interest, time of payment of interest or principal, security, or any other term or condition, upon agreement of the recipient of the loan and upon a finding by the Association that such modification is equitable and necessary or appropriate to achieve the policy declared in subsection (f) of this section.

(e) PREREQUISITES.—The Association shall make a finding in writing, before making a loan to any applicant under this section, that—

(1) the loan is necessary to achieve the goals of this Act or to prevent insolvency;

(2) it is satisfied that the business affairs of the applicant will be conducted in a reasonable and prudent manner; and

(3) the applicant has offered such security as the Association deems necessary to protect reasonably the interests of the United States.

(f) POLICY.—It is the intent of Congress that loans made under this section shall be made on terms and conditions which furnish reasonable assurance that the Corporation or the railroads to which such loans are granted will be able to repay them within the time fixed and that the goals of this Act are reasonably likely to be achieved.

(g) PRE-CONVEYANCE LOANS TO THE CORPORATION.—During the period between the effective date of the final system plan and the date of the conveyance of rail properties pursuant to section 303(b) of this Act, the Association may make such loans in such amounts to the Corporation as the Association deems essential to provide for the purchase by the Corporation of material, supplies, equipment, and services necessary to permit the orderly and efficient implementation of the final system plan. Notwithstanding any inability of the Association during such period to make the finding required by subsection(e)(3) of this section because of any existing contingencies, the Association may make any such loans to the Corporation, subject to—

(1) the most favorable terms and conditions for assuring timely repayment and security as may then be reasonably available, and

(2) the requirement that any loan to the Corporation under this subsection be refinanced immediately out of the proceeds of the first sale by the issuance of debentures under section 216 of this title.

In order to assure that necessary funds are available to the Corporation for implementation of the final system plan, the Corporation is authorized to accept such loans as may be approved by the Association under this subsection, and any such acceptance shall be deemed for all purposes to constitute a reasonable and prudent business judgment in compliance with any fiduciary obligations imposed on the Corporation or its directors. For purposes of this subsection, the term 'Corporation' includes a subsidiary of the Corporation.

(h) LOANS FOR PAYMENT OF OBLIGATIONS.—(1) The Association is authorized, subject to the limitations set forth in section 210(b) of this title, to enter into loan agreements, in amounts not to exceed $230,000,000 in the aggregate, with the Corporation, the National Railroad Passenger Corporation, and any profitable railroad to which rail properties are transferred or conveyed pursuant to section 303 (b)(1) of this Act. under which the Corporation, the National Railroad Passenger Corporation, and any profitable railroad entering into such agreement will agree to meet existing or prospective obligations of the railroads in reorganization in the region which the Association, in accordance with procedures established by the Association, determines should be paid by the Corporation, the National Railroad Passenger Corporation, or a profitable railroad, on behalf of the transferors, in order to avoid disruptions in ordinary business relationships. Such obligations shall be limited to amounts claimed by suppliers (including private car lines) of materials or services utilized in current rail operations, claims by shippers arising from current rail services, payments to railroads for settlement of current interline accounts, claims of employees arising under the collective bargaining agreements of the railroads in reorganization in the region and subject to section 3 of the Railway Labor Act, claims of all employees or their personal representatives for personal injuries or death and subject to the provisions of Employers' Liability Acts (45 U.S.C. 51-60), and amounts required for adequate funding of accrued pension benefits existing at the time of a conveyance or discontinuance of service under employee pension benefit plans described in section 505(a) of this Act. The Association shall not make such a loan unless it first finds that the loan is for the purpose of paving obligations with respect to accrued pension plans referred to in the preceding sentence or that the Corporation, the National Railroad Passenger Corporation, or a profitable railroad is entitled to a loan pursuant to subsections (e) and (g) of section 504 of this Act, or unless it first finds that—

(A) provision for the payment of such obligations was not included in the financial projections of the final system plan;

(B) such obligations arose from rail operations prior to the date of conveyance of rail properties pursuant to section 303(b)(1) of this Act and are, under other applicable law, the responsibility of a railroad in reorganization in the region;

(C) the Corporation, the National Railroad Passenger Corporation, or a profitable railroad has advised the Association that the direct payment of such obligations by the Corporation, the National Railroad Passenger Corporation or profitable railroad is necessary to avoid disruptions in ordinary business relationships;

(D) the transferor is unable to pay such obligations within a reasonable period of time; and

(E) with respect to loans made to the Corporation, the procedures to be followed by the Corporation, in seeking reimbursement from the railroads in reorganization in the region for obligations paid on their behalf under this subsection, have been jointly agreed to by the Finance Committee and the Corporation.

(2) The trustees of each railroad in reorganization in the region shall attempt to negotiate agency agreements with the Corporation, the National Railroad Passenger Corporation, or a profitable railroad for the processing of all accounts receivable and accounts payable attributable to operations prior to the conveyance of property pursuant to section 303(b)(1) of this Act. If any railroad in reorganization in the region fails to conclude such an agreement within a reasonable time prior to such conveyance, the applicable reorganization courts, after giving all parties an opportunity to be heard, shall prescribe the terms of such an agency arrangement by order, giving due consideration to the need, wherever possible, to make such agreements uniform among the various estates.

(3) The Association may, not less than 30 days prior to the date of conveyance pursuant to section 303(b)(1) of this Act, petition each district court of the United States having jurisdiction over the reorganization of a railroad in reorganization in the region for an order, which shall be entered prior to such conveyance, and which—

(A) identifies that cash and other current assets of the estate of such railroad which shall be utilized to satisfy obligations of the estates identified in paragraphs (1) of this subsection; and

(B) provides for the application by the trustees of such railroads and their agents, consistent with the principles of reorganization under section 77 of the Bankruptcy Act (11 U.S.C.205) and with the agency agreement specified in paragraph (2) of this subsection, of all such current assets, including cash available as of or subsequent to such date of conveyance, to the payment in the postconveyance period of the obligations of the estates identified in paragraph (1) of this subsection.

(4)(A) Each obligation of a railroad in reorganization in the region which is paid with financial assistance under paragraph (1) of this subsection shall be processed, on behalf of such railroad, by the Corporation, the National Railroad Passenger Corporation, or a profitable railroad, whichever is appropriate. An obligation of a railroad in reorganization in the region shall be paid, on behalf of such railroad, by the Corporation, the National Railroad Passenger Corporation, or a profitable railroad, whichever is appropriate, if—

(i) such obligation is deemed by the Corporation, the National Railroad Passenger Corporation, or a profitable railroad, whichever is appropriate, to have been, on the date of conveyance of rail properties pursuant to section 303(b)(1) of this Act, the obligation of a railroad in reorganization in the region;

(ii) such obligation accrues after such date of conveyance but as a result of rail operations conducted prior to such date, and the trustees of such railroad in reorganization acknowledge that it is an obligation of such railroad; of

(iii) the district court of the United States having jurisdiction over such railroad in reorganization in the region approves such obligation as a valid administrative claim against such railroad; to the extent that payment is required under a loan agreement with the Association under such paragraph (1).

(B) The Association shall resolve any disputes among the Corporation, the National Railroad Passenger Corporation, and a profitable railroad concerning which of them shall process and pay any particular obligation on behalf of a particular railroad in reorganization.

(C) The Corporation, the National Railroad Passenger Corporation, or a profitable railroad shall have a direct claim, as a current expense of administration, for reimbursement from the estate of a railroad in reorganization in the region for all obligations of such estate (plus interest thereon) which are paid by the Corporation, the National Railroad Passenger Corporation, or a profitable railroad, as the case may be. The right of the Corporation or the National Railroad Passenger Corporation to receive reimbursement under this subparagraph from the estate of a railroad in reorganization in the region shall be reduced by the amount, if any, of loans, plus interest forgiven under paragraph (5) of this subsection.

(5)(A) If, at any time, the Finance Committee of the Association determines that the failure of the Corporation to receive full reimbursement with interest from the estate of a railroad in reorganization in the region for any obligation of such estate paid pursuant to this subsection could adversely affect the fairness and equity of the transfers and conveyances pursuant to section 303(b)(1) of this Act, or that the failure of the National Railroad Passenger Corporation to receive such full reimbursement plus interest for any such obligation would be contrary to the public interest, the Association shall forgive the indebtedness, plus accrued interest, of the Corporation or of the National Railroad Passenger Corporation incurred pursuant to paragraph (1) of this subsection in the amount recommended by the Finance Committee. The Association shall have a direct claim, as a current expense of administration of the estate of such railroad in reorganization, equal to the amount by which loans of the Corporation or of the National Railroad Passenger Corporation, plus interest, have been forgiven. Such direct claim shall not be subject to any reduction by way of setoff, cross-claim, or counter-claim which the estate of such railroad in reorganization may be entitled to assert against the Corporation, the National Railroad Passenger Corporation, the Association, or the United States.

(B) The direct claim of the Association under this paragraph, and any direct claim authorized under paragraph (4) of this subsection, shall be prior to all other administrative claims of the estate of a railroad in reorganization, except claims arising under trustee's certificates or from default on the payment of such certificates.

(6) Notwithstanding any other provision of this subsection, the Association shall forgive any loan made to the Corporation or the National Railroad Passenger Corporation pursuant to this subsection, plus accrued interest thereon, on the 3rd anniversary date of any such loan, except that the Association shall not forgive any loan or portion thereof, in accordance with this paragraph, if—

(A) the Finance Committee makes an affirmative finding, with respect to such loan or portion thereof, that—

(i) the Corporation has not exercised due diligence in executing the procedures adopted pursuant to paragraph (1)(E) of this subsection, and

(ii) the failure of the Association to forgive such loan or portion thereof will not adversely affect the ability of the Corporation to become financially self-sustaining;

(B) the Finance Committee so directs the Association; and

(C) neither House of the Congress disapproves such affirmative finding and direction, in accordance with the following provisions of this paragraph.

A copy of each such finding, the reasons therefor, and such direction made by the Finance Committee, together with the comments and recommendations thereon of the Board of Directors of the Association, shall be transmitted to the Congress by the Association within 10 days after the date on which the Finance Committee makes such finding and direction, or if not so transmitted, shall be transmitted by the Finance Committee. Each such finding and direction so transmitted shall become effective immediately, and shall remain in effect, unless, within the first period of 30 calendar days of continuous session of Congress after the date of transmittal of such finding and direction to Congress, either House of Congress disapproves such finding and direction in accordance with the procedures specified in section 1017 of the Congressional Budget and Impoundment Control Act of 1974 (31 U.S.C.1407). For purposes of this paragraph, continuity of session of Congress is broken only in the circumstances described in section 1011(5) of that Act (31 U.S.C. 1401(5)).

(7) For purposes of this subsection, the term 'Corporation' includes a subsidiary of the Corporation.

(i) ELECTRIFICATION.—Upon application by the Corporation, the Secretary shall, pursuant to the provisions of and within the obligational limitations contained in sections 511 through 513 of the Railroad revitalization and Regulatory Reform Act of 1976, guarantee obligations of the Corporation for the purpose of electrifying high-density mainline routes if the Secretary finds that such electrification will return operating and financial benefits to the Corporation and will facilitate compatibility with existing or renewed electrification systems. The aggregate unpaid principal amount of obligations which may be guaranteed by the Secretary under this paragraph shall not exceed $200,000,000 at any one time.

RECORDS, AUDIT, AND EXAMINATION

Section 212. [*45 U.S.C. §722*] (a) RECORDS.—Each recipient of financial assistance under this title, whether in the form of loans, obligations, or other arrangements, shall keep such records as the Association or the Secretary shall prescribe, including records which fully disclose the amount and disposition by such recipient of the proceeds of such assistance and such other records as will facilitate an effective audit.

(b) AUDIT AND EXAMINATION.—The Association, the Secretary, and the Comptroller General of the United States, or any of their duly authorized representative shall, until the expiration of 3 years after the implementation of the final system plan, have access for the purpose of audit and examination to any books, documents, papers, and records of such recipients which in the opinion of the Association, the Secretary, or the Comptroller General may be related or pertinent to the loans, obligations or other arrangements referred to in subsection (a) of this section. The Association or any of its duly authorized representatives shall, until any financial assistance received under this title has been repaid to the Association, have access to any such materials which concern any matter that may bear upon—

(1) the ability of the recipient of such financial assistance to make repayment within the time fixed therefor;

(2) the effectiveness with which the proceeds of such assistance is used; and

(3) the implementation of the final system plan and the realization of the declaration of policy of this Act.

EMERGENCY ASSISTANCE PENDING IMPLEMENTATION

Section 213. (a) [*45 U.S.C. §723*] EMERGENCY ASSISTANCE.—The Secretary is authorized, pending the implementation of the final system plan, to pay to the trustees of railroads in reorganization such sums as are necessary for the continued provision of essential transportation services by such railroads. Such payments shall be made by the Secretary upon such reasonable terms and conditions as the Secretary establishes, except that recipients must agree to maintain and provide service at a level no less than that in effect on the date of enactment of this Act. Where the Secretary and the trustees agree that funds provided pursuant to this section are to be used (together with funds provided pursuant to section 215 of this Act, if any) to perform program maintenance on designated rail properties until the date rail properties are conveyed under this Act or to improve such designated properties, such agreement shall contain the conditions set forth in section 215(b) of this Act.

(b) AUTHORIZATION FOR APPROPRIATIONS.—There are authorized to be appropriated to the Secretary for carrying out this section such sums as are necessary, not to exceed $282,000,000, to remain available until expended. Of amounts authorized to be appropriated under this subsection, $50,000,000 shall be available solely to pay to the trustees of railroads in reorganization such sums as may be necessary to provide such railroads with amounts equal to revenues attributable to tariff increases proposed by such railroads and suspended by the Interstate Commerce Commission during the calendar year 1975, if the Secretary determines that such payments are necessary to carry out this section.

AUTHORIZATION FOR APPROPRIATIONS

Section 214. [*45 U.S.C. §724*] (a) SECRETARY.—There are authorized to be appropriated to the Secretary for purposes of preparing the reports and exercising other functions to be performed by him under this Act such sums as are necessary, not to exceed $12,500,000, to remain available until expended. There are authorized to be appropriated to the Secretary such sums as may be necessary to discharge the obligations of the United States arising under section 303(c)(5) of this Act.

(h) OFFICE.—There are authorized to be appropriated to the Commission for the use of the Office in carrying out its functions under this Act such sums as are necessary, not to exceed $7,000,000, to remain available until expended. The budget for the Office shall be submitted by the Commission directly to the Congress and shall not be subject to review of any kind by any other agency or official of the United States. Moneys appropriated for the Office shall not be withheld by any agency or official of the United States or used by the Commission for any purpose other than the use of the Office. No part of any other moneys appropriated to the Commission shall be withheld by any other agency or official of the United States to offset any moneys appropriated pursuant to this subsection.

(c) ASSOCIATION.—There are authorized to be appropriated to the Association for purposes of carrying out its administrative expenses under this act such sums as are necessary, not to exceed $40,000,000, to remain available until expended, and not to exceed $14,000,000 for the fiscal period which includes the period ending September 30, 1977.

INTERIM AGREEMENTS

Section 215. [*45 U.S.C. §725*] (a) PURPOSES.—Prior to the date upon which rail properties are conveyed to the Corporation under this Act, the Secretary, with the approval of the Association, is authorized to enter into agreements with the trustees of the railroads in reorganization in the region (or railroads leased, operated, or controlled by railroads in reorganization)—

(1) to perform the program maintenance on designated rail properties of such railroads until the date rail properties are conveyed under this Act;

(2) to improve rail properties of such railroads; and

(3) to acquire rail properties for lease or loan to any such railroads until the date such rail properties are conveyed under this Act, and subsequently for conveyance pursuant to the final system plan, or to acquire interests in such rail properties owned by or leased to any such railroads or in purchase money obligations therefor.

(b) CONDITIONS.—Agreements pursuant to subsection (a) of this section shall contain such reasonable terms and conditions as the Secretary may prescribe. In addition, agreements under paragraphs (1) and (2) of subsection (a) of this section shall provide that—

(1) to the extent that physical condition is used as a basis for determining, under section 206(f) or 303(c) of this Act, the value of properties subject to such an agreement and designated for transfer to the Corporation under the final system plan, the physical condition of the properties on the effective date of the agreement shall be used; and

(2) in the event that property subject to the agreement is sold, leased, or transferred to an entity other than the Corporation, the trustees or railroad shall pay or assign to the Secretary that portion of the pro-

ceeds of such sale, lease, or transfer which reflects value attributable to the maintenance and improvement provided pursuant to the agreement.

(c) OBLIGATIONS.—Notwithstanding section 210(b) of this title, the Association shall issue obligations under section 210(a) of this title in an amount sufficient to finance such agreements and shall require the Corporation to assume any such obligations. The aggregate amount of obligations issued under this section and outstanding as any one time shall not exceed $300,000,000. The Association, with the approval of the Secretary, shall designate in the final system plan that portion of such obligations issued or to be issued which shall be refinanced and the terms thereof, and that portion from which the Corporation shall be released of its obligations.

(d) CONVEYANCE.—The Secretary may convey to the Corporation, or any subsidiary thereof, with or without receipt of consideration, any property or interests acquired by, transferred to, or otherwise held by the Secretary pursuant to this section or section 213 of this Act.

DEBENTURES AND SERIES A PREFERRED STOCK

Section 216. [*45 U.S.C. §726*] (a) GENERAL.—The Association is authorized, in accordance with the provisions of this section, and such rules and regulations as it may prescribe, to invest from time to time in the securities of the Corporation by purchasing (1) up to $1,000,000,000 of debentures issued by the Corporation, and (2) after the acquisition of such debentures, up to $1,100,000,000 of the series A preferred stock of the Corporation.

(b) PURPOSES AND PROCEDURE FOR INVESTMENT.—(1) The Association is authorized to purchase debentures and, thereafter, series A preferred stock of the Corporation at such times and in such amounts as may be required and requested by the Corporation in accordance with the terms and conditions governing such purchases (which shall be prescribed by the Association), to provide—

(A) for the modernization, rehabilitation and maintenance of rail properties of the Corporation;

(B) for the acquisition of equipment and other capital needs;

(C) for the refinancing of indebtedness which was incurred by the Corporation under section 211 of this title or which was incurred under section 215 of this title and assumed by the Corporation; or

(D) working capital as contemplated by the final system plan.

(2) Purchases of up to $1,000,000,000 of debentures and, thereafter, of up to $1,100,000,000 of series A preferred stock shall be made by the Association as required and requested by the Corporation, unless the Finance Committee makes an affirmative finding that—

(A) the Corporation has failed in any material respect to comply with any covenants or undertakings made to the Association and such failure remains uncorrected;

(B) the Corporation has failed substantially (as determined by performance within the margins prescribed by the Board of Directors) to attain the overall operating (including rehabilitation) and financial results projected for the Corporation in the final system plan (including any modifications of such projected results and of the performance margins applicable to such projected results which are jointly approved by the Finance Committee and the Board of Directors and which would improve the possibility that the Corporation will attain such projected results and perform within such margins, as modified); or

(C) it is not reasonably likely, taking into consideration all relevant factors including the overall operating (including rehabilitation) and financial results achieved by the Corporation, that the Corporation will be able to become financially self-sustaining without requiring Federal financial assistance substantially in excess of the amounts authorized in this section.

(c) FINDING, DIRECTION, AND REVIEW BY CONGRESS.—(1) If the Finance Committee makes an affirmative finding pursuant to subsection (b)(2) of this section, it may direct the Association—

(A) not to purchase any debentures or series A preferred stock of the Corporation after the date of such affirmative finding; or

(B) to purchase debentures or series A preferred stock of the Corporation, after the date of such affirmative finding, only in such amounts, at such times, and on such terms and conditions (notwithstanding subsection (e)(1) of this section) as the Finance Committee determines to be appropriate to the role of the Association as an investor in such debentures and series A preferred stock.

(2) A copy of each affirmative finding, the reasons therefor, and each direction made by the Finance Committee under paragraph (1) of this subsection, together with the comments and recommendations thereon of the Board of Directors of the Association, shall be transmitted to the Congress by the Association within 10 days after the date on which the Finance Committee makes such finding and direction, or if not so transmitted, shall be transmitted by the Finance Committee. Each such direction so transmitted shall become finally effective and is required to be implemented by the Association, unless within the first period of 30 calendar days of continuous session of Congress after the date of its transmittal to Congress either House of Congress disapproves such direction (except that such direction shall become finally effective immediately upon approval of such direction by both Houses of Congress) in accordance with the procedures specified in section 1017 of the Congressional Budget and Impoundment Control Act of 1974 (31 U.S.C.

1407). For purposes of this paragraph, continuity of session of Congress is broken only in the circumstances described in section 1011(5) of that Act (31 U.S.C. 1401(5)). During review by the Association and Congress, the Association shall take no action inconsistent with the direction of the Finance Committee pursuant to paragraph (c)(1) of this section, except to the extent the Association finds necessary, in its discretion, to assure continuous orderly operation of the Corporation.

(3) If the Congress, pursuant to paragraph (2) of this subsection, disapproves a direction submitted to the Association pursuant to paragraph (1) of this subsection, the Association shall continue to purchase the debentures or series A preferred stock of the Corporation as otherwise provided in this title until such time as a direction is submitted under this section which is not so disapproved (or affirmatively approved). The powers of the Association and of the Board of Directors of the Association shall remain in effect except to the extent modified by any such direction. If any such direction is disapproved by either House of Congress, the Finance Committee may, not earlier than 30 days after the date of such disapproval, make (and the Board of Directors of the Association shall transmit) any additional affirmative finding and direction with respect to the same matter, which direction shall become effective in accordance with paragraph (2) of this subsection. An affirmative finding and direction under this subsection, or action by the Association during a review thereof by the Congress, may not be held unlawful or set aside by any reviewing court on the ground that such finding and direction or action were not adequate to meet the requirements of subparagraph (A), (E), or (F) of section 706(2) of title 5, United States Code.

(4) Notwithstanding any other provision of this section, or any terms and conditions governing its purchase of securities of the Corporation, the Association shall, upon written application by the Corporation at least 30 days prior to such investment, make an initial investment in debentures of the Corporation within 60 days after the date of conveyance of rail properties pursuant to section 303(b)(1) of this Act. Such initial investment shall be limited to such amounts as the Association and Finance Committee, acting jointly, determine are necessary for the continued and orderly operations of the Corporation prior to any additional investment.

(5) Not later than 60 days after the date of conveyance pursuant to section 303(b)(1) of this Act, the Association shall select 6 individuals to serve as members of the Board of Directors of the Corporation, subject to the provisions of section 301(d) of this Act.

(d) TERMS AND CONDITIONS.—Notwithstanding any other provision of State law, the debentures and the series A preferred stock of the Corporation shall have such terms and conditions, not inconsistent with the final system plan or this title, as may be prescribed by the Association, except as follows:

(1) The Corporation shall not be required to issue to the Association additional shares of series A preferred stock of the Corporation as a dividend on any such stock.

(2) The dividends payable on series A preferred stock of the Corporation shall not be cumulative and shall be paid in cash when and to the extent that there is 'cash available for restricted cash payments', as that term is defined in the final system plan.

(3) After the Association calls for redemption of the certificates of value, no shares of series A preferred stock of the Corporation shall be issued in lieu of interest on the debentures of the Corporation and, to the extent such interest is not payable in cash by reason of the absence of sufficient 'cash available for restricted cash payment', the Corporation shall deliver to the holders of the debentures contingent interest notes in a face amount equal to such unpaid interest.

(4) If the Board of Directors of the Association and the Finance Committee, acting jointly, modify the terms or conditions governing the purchase of debentures or series A preferred stock of the Corporation pursuant to subsection (e)(1) of this section, or if the Finance Committee waives compliance with any term, condition, provision, or covenant of such securities pursuant to subsection (e)(2) of this section, the Finance Committee may require the Corporation to issue contingent interest notes in such amount as, in the determination of the Finance Committee, will provide protection for the United States, in the event of bankruptcy, reorganization, or receivership of the Corporation, equal to the protection the United States would have had in the absence of such modification or waiver.

(5) The contingent interest notes issued pursuant to this section shall bear interest compounded annually at the rate of 8 percent per annum and such notes and the accumulated interest thereon shall be payable only in the event of bankruptcy, reorganization, or receivership of the Corporation occurring prior to the repayment and redemption of all outstanding debentures and accumulated series A preferred stock of the Corporation. The contingent interest notes and the accumulated interest thereon shall have the same priority in bankruptcy, reorganization, or receivership as the debentures of the Corporation. The other terms and conditions of the contingent interest notes shall be as set forth in an agreement to be entered into between the Association and the Corporation prior to issuance of any debentures.

(e) MODIFICATIONS, WAIVERS, AND CONVERSIONS.—(1) The Board of Directors of the Association and the Finance Committee, acting jointly, may agree with the Corporation to modify any of the terms and conditions governing the purchase by the Association of securities of the Corporation, upon a finding that such action is necessary or appropriate to achieve the purposes of this Act or the goals of the final system plan. final system plan.

(2) The Finance Committee may, in its discretion and upon a finding that such action is necessary or appropriate to achieve the purposes of this Act or the goals of the final system plan, waive compliance with any terms, condition, provision, or covenant of the securities of the Corporation held by the Association, including any provision of such securities with respect to redemption of principal or issuance price, payment of interest or dividends, or any term or condition governing the purchase of such securities.

(3) Notwithstanding any provision of State law, there shall be no conversion of the debentures of the Corporation into series A preferred stock of the Corporation, as provided in the terms and conditions of the debentures and pursuant to the final system plan, unless the Board of Directors of the Association and the Finance Committee jointly determine to effect such conversion.

(f) APPROPRIATION.—There is authorized to be appropriated to the Association $2,100,000,000 to be used for the purchase of securities of the Corporation in accordance with this section. All sums received by the Association on account of the holding or disposition of any such securities shall be deposited in the general fund of the Treasury.

TITLE III—CONSOLIDATED RAIL CORPORATION

FORMATION AND STRUCTURE

Section 301. [*45 U.S.C. §741*] (a) ESTABLISHMENT.—There shall be established within 300 days after the date of enactment of this Act, in accordance with the provisions of this section, a corporation to be known as the Consolidated Rail Corporation or such other corporate name as may be duly adopted by the Corporation.

(b) STATUS.—The Corporation shall be a for-profit corporation established under the laws of a State and shall not be an agency or instrumentality of the Federal Government. The Corporation shall be deemed a common carrier by railraod under section 1(3) of the Interstate Commerce Act (49 U.S.C. 1(3)), shall be subject to the provisions of this Act and, to the extent not inconsistent with such Acts, shall be subject to applicable State law. The principal office of the Corporation or of its principal railroad operating subsidiary shall be located in Philadelphia in the Commonwealth of Pennsylvania.

(c) INCORPORATORS.—(1) The members of the executive committee of the Association shall be the incorporators of the Corporation and shall take whatever steps are necessary to establish the Corporation, including the filing of articles of incorporation.

(2) Notwithstanding any provision of State law, after the date of enactment of this paragraph, the members of the executive committee of the Association (including duly authorized representatives of members who are authorized by this Act to be represented) and the chief executive officer and chief operating officer of the Corporation shall adopt the bylaws of the Corporation and serve as the Board of Directors of the Corporation until all members of the Board of Directors of the Corporation have been selected in accordance with subsection (d) of this section. The chief executive officer shall serve as chairman of such Board until a chairman thereof is selected pursuant to subsection (d) of this section, after which time such chairman shall serve at the pleasure of such Board.

(d) BOARD OF DIRECTORS.—(1) Notwithstanding any provision of State law, the articles of incorporation and by laws of the Corporation shall provide that the Board of Directors of the Corporation shall consist of 13 members selected in accordance with the articles and bylaws of the Corporation, as follows:

(a) six individuals selected by the holders of the Corporation's debentures and series A preferred stock voting as one class, with every $100 principal amount of debentures, and every $100 liquidation amount of series A preferred stock each receiving one vote for directors;

(B) three individuals selected by the holders of the Corporation's series B preferred stock; and

(C) two individuals selected by the holders of the Corporation's common stock.

(2) The chief executive officer and the chief operating officer of the Corporation shall also serve on the Board, but the chief executive officer and chief operating officer of the Corporation shall not be entitled to vote on the election or removal of either. In the event a vacancy occurs on the Board of Directors due to death, disability or resignation of a director (other than resignations pursuant to this subsection), such vacancy shall be filled only by a vote of the holders of the class of securities that initially elected such director. Two members of the Board selected by the holders of the Corporation's debentures and series A preferred stock shall resign when the total of the principal amount of the outstanding debentures and the amount of the liquidation amount of the outstanding series A preferred stock, once having exceeded $1.-500,000,000, has been reduced below that amount; two additional members of the Board selected by the holders of the Corporation's debentures and series A preferred stock of the Corporation shall resign when the total of the principal amount of the outstanding debentures and the amount of the liquidation amount of the outstanding series A preferred

stock, once having exceeded $1,500,000,000, has been reduced below $750,000,000. The two remaining members of the Board selected by the holders of the Corporation's debentures and series A preferred stock shall resign when all the debentures and series A preferred stock have been redeemed by the Corporation. As directors resign in accordance with the foregoing provisions, the election of corporate directors to fill the vacancies created by their resignations shall be governed by applicable State law and the articles and bylaws of the Corporation.

(e) INITIAL CAPITALIZATION.—(1) In order to carry out the final system plan, the Corporation is authorized to issue debentures, series A preferred stock, series B preferred stock, common stock, contingent interest notes, and other securities.

(2) Debentures and series A preferred stock shall be issued initially to the Association. Series B preferred stock and common stock shall be issued initially to the estates of railroads in reorganization in the region, to railroads leased, operated, and controlled by railroads in reorganization in the region, and to other persons leased, operated or controlled by a railroad in reorganization who are transferors of rail properties in exchange for rail properties transferred to the Corporation pursuant to the final system plan. Notwithstanding any other provisions of State or Federal law, the series B preferred stock and common stock shall have terms and conditions not inconsistent wiht the final system plan. As a condition of its investment in the Corporation, the Association may require that the Corporation adopt limitations consistent with the final system plan on the circumstances under which dividends on the series B preferred stock and common stock are payable so long as any of the debentures or series A preferred stock are outstanding. Notwithstanding anything to the contrary in the final system plan, the initial authorized number of shares of series B preferred stock may be 35,000,000, and the Corporation may issue initially for the purpose of the deposit required under section 303(a)(1) of this Act such numbers of shares of series B preferred and common stock as the Association shall certify to the Special Court pursuant to section 209(c)(1)(3) of this Act, including any modifications in such numbers of shares as may be ordered by the Special Court for the purpose of, and in connection with, such deposit and certification.

(f) OFFICERS.—The officers of the Corporation shall include a chief executive officer and a chief operating officer, who shall be appointed by the Board of Directors and who shall serve at the pleasure of the Board; and such other officers as shall be provided for in the bylaws of the Corporation.

(g) VOTING TRUSTEES.—For and during the period between the deposit of securities of the Corporation with the special court, in accordance with section 303(a) of this title, and the distribution of such securities, in accordance with section 303(c) of this title, the special court shall, within 30 days after the date of conveyance pursuant to section 303(b)(1) of this Act, appoint one or more voting trustees for each class of securities which is so deposited. Such voting trustees shall, on behalf of the distributees, exercise the rights of the holders of such securities as their interests may appear. Within 30 days after such appointment, such voting trustees shall select members of the Board of Directors of the Corporation on behalf of the holders of the class of securities whose rights they exercise pursuant to this subsection.

(h) ANNUAL REPORT.—The Corporation shall transmit to the Congress and the President, not later than 90 days after the end of each fiscal year, a comprehensive and detailed report on all activities and accomplishments of the Corporation during the preceding fiscal year.

(i) LIABILITY OF DIRECTORS.—No director of the Corporation shall be liable, for money damages or otherwise, to any party by reason of the fact that such person is or was a director, if, with respect to the subject matter of the action, suit, or proceeding, such person was fulfilling a duty which he in good faith reasonably believed to be required by law or vested in him in his capacity as a director of the Association or as an officer of the United States. The United States shall indemnify such person against all judgments, amounts paid in settlement, and costs and expenses (including fees of accountants, experts, and attorneys), actually and reasonably incurred in connection with any such action, suit, or proceeding in which such person is determined to have met such standard of conduct. This subsection shall not be construed to grant any immunity from any criminal law of the United States.

(j) CORPORATE SIMPLIFICATION.—In the interest of corporate simplification, the Corporation, in implementing the final system plan, shall undertake, as soon as possible and pursuant to financial assistance provided by the Railroad Revitalization and Regulatory Reform Act of 1976, to acquire all interests in rail lines and related rail properties otherwise conveyed to the Corporation, upon the tender of such interests to it, so as to eliminate any remaining intermediate layers of ownership or interest, such as leaseholds, owned or held by persons who are neither a railroad, a railroad in reorganization, nor controlled by a railroad in reorganization. Any option conditions regarding the purchase price for such interests, in existence since prior to January 2, 1974, shall be deemed to be conclusive of fair and equitable value.

POWERS AND DUTIES OF THE CORPORATION

Section 302. [*45 U.S.C. §742*] The Corporation shall have all of the powers and is subject to all of the duties vested in it under this Act, in addition to the powers conferred upon it under the laws of the State or States in which it is incorporated and the powers of a railroad in any

State in which it operates. The Corporation is authorized and directed to—

(a) acquire rail properties designated in the final system plan to be transferred or conveyed to it;

(b) operate rail service over such rail properties except as provided under sections 304(e) and 601(d)(3) of this Act;

(c) rehabilitate, improve, and modernize such rail properties; and

(d) maintain adequate and efficient rail services.

So long as 50 per centum or more, as determined by the Secretary of the Treasury, of the outstanding indebtedness of the Corporation consists of obligations of the Association or other debts owing to or guaranteed by the United States, the Corporation shall not engage in activities which are not related to transportation.

VALUATION AND CONVEYANCE OF RAIL PROPERTIES

Section 303. [*45 U.S.C. §743*] (a) DEPOSIT WITH COURT.— Within 10 days after delivery of a certified copy of a final system plan pursuant to section 209(c) of this Act—

(1) the Corporation, in exchange for the rail properties of the railroads in reorganization in the region and of railroads leased, operated, or controlled by railroads in reorganization in the region to be transferred to the Corporation or any subsidiary thereof shall deposit with the special court all of the stock and other securities of the Corporation and certificates of value issued by the Association designated in the final system plan to be exchanged for such rail properties;

(2) each profitable railroad operating in the region and each State or responsible person (including a government entity) purchasing rail properties from a railroad in reorganization in the region, or from a railroad leased, operated, or controlled by a railroad in reorganization in the region, as provided in the final system plan shall deposit with the special court the compensation to be paid for such rail properties.

(b) CONVEYANCE OF RAIL PROPERTIES.—(1) The special court shall, within 10 days after deposit under subsection (a) of this section of the securities of the Corporation, certificates of value issued by the Association, and compensation from the profitable railroads operating in the region, States, and responsible persons, order the trustee or trustees of each railroad in reorganization in the region to convey forthwith to the Corporation or any subsidiary thereof, the respective profitable railroads operating in the region, States, and responsible persons, all right, title, and interest in the rail properties of such railroad in reorganization and shall itself order the conveyance of all right, title, and interest in the rail properties of any person leased, operated, or controlled by such railroad in reorganization that are to be conveyed to them under the final system plan as certified to such court under section 209(d) of this Act. In any case where the special court orders the trustee or trustees of a railroad in reorganization in the region to execute and deliver deeds or other instruments conveying rail properties to the Corporation or a subsidiary thereof or to a profitable railroad operating in the region or a State or responsible person, those deeds or other instruments may be executed, acknowledged, and delivered on behalf of the trustee or trustees by any person or persons who have been duly authorized to perform such acts on behalf of the trustee or trustees by the district court of the United States or any other court having jurisdiction over the respective railroad in reorganization in the region. Notwithstanding any provision of State or local law, in any case where deeds or other instruments have been executed, acknowledged, or delivered by a representative of the trustee or trustees of a railroad in reorganization in the region in accordance with the previous sentence, such execution, acknowledgment, and delivery, and the deeds or other instruments to which they pertain, shall have the same legal effect as they would have had if the trustee or trustees had themselves executed, acknowledged and delivered such deeds or other instruments.

(2) All rail properties conveyed to the Corporation or any subsidiary thereof, the respective profitable railroads operating in the region, States, and responsible persons under this section shall be conveyed free and clear of any liens or encumbrances, but subject to such leases and agreements as shall have previously burdened such properties or bound the owner or operator thereof in pursuance of an arrangement with any State, or local or regional transportation authority under which financial support from such State, or local or regional transportation authority was being provided at the time of enactment of this Act for the continuance of rail passenger service or any lien or encumbrance of no greater than 5 years' duration which is necessary for the contractual performance by any person of duties related to public health or sanitation. Such conveyances shall not be restrained or enjoined by any court.

(3)(A)(i) Notwithstanding any other provision of this Act, if an interest in railroad rolling stock is included in the rail properties conveyed pursuant to subsection (b)(1) of this section, and if such conveyance is in accordance with the requirements of clause (ii) of this subparagraph, the conveyance of such properties shall be deemed an assignment. Any such assignment shall relieve the assignor of liability for any breach which occurs after the date of such conveyance, except that such assignor shall remain liable for any breach, event of default, or violation of covenant which occurred (and any changes or obligations which accrued) prior to the date of such conveyance regardless of whether the assignee thereof assumes such liabilities, charges or certificates of value. If any such liabilities, charges, or certificates of value (accrued prior to the date of such conveyance) are paid by or on behalf of any person or entity other than such assignor, such person or entity shall have a claim to direct reimbursement, as a current expense of administration, from such assignor, together with interest on the amount so paid.

(ii) A conveyance referred to in clause (i) of this subparagraph may be effected only if—

(I) the Corporation or a subsidiary thereof, the profitable railroad operating in the region, or the State or responsible person to whom such conveyance is made assumes all of the certificates of value under any applicable conditional sale agreement, equipment trust agreement, or lease with respect to such rolling stock (including any obligations which accrued prior to the date on which such properties are conveyed), and

(II) such conveyance is made subject ot such certificates of value. As used in this subparagraph, the term 'railroad rolling stock' means assets which could be carried in Interstate Commerce Commission account numbers 52,53,54, and 57.

(B) Subject to the provisions of this paragraph, the provisions of this Act shall not affect the title and interests of any lessor, equipment trust trustee, or conditional sale vendor under any conditional sale agreement, equipment trust agreement, or lease under section 77(j) of the Bankruptcy Act (11 U.S.C.205(j)). A profitable railroad operating in the region, the Corporation or a subsidiary thereof, or a State or responsible person, to whom such a conveyance is made as assignee or as lessee, shall assume all liability under such conditional sale agreement, equipment trust agreement, or lease. Such an assignment or conveyance to, and such an assumption of liability by, such a profitable railroad, Corporation, subsidiary, State or responsible person shall not be deemed a breach, an event of default, or a violation of any covenant of any such conditional sale agreement, equipment trust agreement, or lease so assigned or conveyed, notwithstanding any provisions of any such agreement or lease.

(4) Notwithstanding anything to the contrary contained in this Act, if a railroad in reorganization has leased rail properties from a lessor that is neither a railroad nor controlled by or affiliated with a railroad, and such lease has been approved by the lessee railroad's reorganization court prior to the date of enactment of this Act, conveyance of such lease may only be effected if the Corporation, profitable railroad, State or responsible person to whom the conveyance is made assumes all future liability under such lease and all of the terms and conditions specified in the lease, including the obligation to pay the specified rent to the non-railroad lessor.

(5) Notwithstanding any covenant, undertaking, condition, or provision of any sort in any lease, agreement, or contract, the conveyance, transfer, assignment, or other disposition of such lease, agreement, or contract or of any interest therein to, or the assumption by, the Corporation or any subsidiary thereof, or a profitable railroad of obligations thereunder, shall not be deemed a breach, an event of default, or a violation of any covenant of such lease, agreement, or contract.

(6) Notwithstanding anything to the contrary contained in this Act or any other provision of law, the special court shall include in its order such further directions as may be necessary to assure (A) that the operation and administration of the employee pension benefit plans described in section 505(a) of this Act shall be continued, without termination or interruption, by the Corporation until such time as the Corporation elects to amend or terminate any such plan, in whole or in part; and (B) that appropriate transfers and assignments with respect to all rights and obligations relating to such plans shall be made to the Corporation for such purposes, without prejudice to payment of consideration for whatever rights any railroad in reorganization may have in any residual assets under any such employee pension benefit plan. No court shall enter any judgment against the Corporation with respect to any such rights, except that the special court may enter such a judgment in an order issued by it pursuant to subsection (c) of this section, after taking into consideration the rights and obligations transferred pursuant to this paragraph. All liabilities as an employer shall be imposed solely upon the railroad in reorganization in the event such plan is terminated, in whole or in part, by the Corporation within 1 year after the date of such transfer or assignment (except liabilities as an employer under the Employee Retirement Income Security Act of 1974 for benefits accruing during such period).

(c) FINDINGS AND DISTRIBUTION.—(1) After the rail properties have been conveyed to the Corporation or any subsidiary thereof, profitable railroads operating in the region, States, and responsible persons under subsection (b) of this section, the special court, giving due consideration to the findings contained in the final system plan, shall decide—

(A) whether the transfers or conveyances—

(i) of rail properties of each railroad in reorganization, or of each railroad leased, operated, or controlled by a railroad in reorganization, to the Corporation or any subsidiary thereof in exchange for the securities, certificates of value and the other benefits accruing to such railroad as a result of such exchange (taking into consideration compensable unconstitutional erosion, if any, which the special court finds to have occurred in the estate of such railroad, during the bankruptcy proceeding with respect to such railroad), as provided in the final system plan and this Act, and

(ii) of rail properties of each railroad in reorganization, or of each railroad leased, operated, or controlled by a railroad in reorganization, to a profitable railroad operating in the region, State, or responsible person in exchange for compensation and other benefits accruing to such transferor as a result of such exchange (taking into consideration compensable unconstitutional erosion, if any, which the special court finds to have occurred in the estate of such railroad, during the bankruptcy proceeding with respect to such railroad) in accordance with the final system plan, are in the public interest and are fair and equitable to the estate of each railroad in reorganization in accordance with the standard of fairness and equity applicable to the approval of a plan of reorganization or a step in such plan under section 77 of the Bankruptcy Act (11 U.S.C. 205), or fair and equitable to a railroad that is not itself in reorganization but which is leased, operated, or controlled by a railroad in reorganization;

(B) whether the transfers or conveyances are more fair and equitable than is required as a constitutional minimum; and

(C) what portion of the proceeds received by a railroad in reorganization from an entity other than the Corporation or any subsidiary thereof for the sale, lease, or transfer of property subject to an agreement under section 213 or section 215(a)(1) or (2) of this Act reflects value attributable to the maintenance or improvement provided pursuant to the agreement.

(2) If the special court finds that the terms of one or more exchanges for securities, certificates of value and other benefits are not fair and equitable to an estate of a railroad in reorganization, or to a railroad leased, operated, or controlled by a railroad in reorganization (taking into consideration compensable unconstitutional erosion, if any, which the special court finds to have occurred in the estate of each such railroad, during the bankruptcy proceeding with respect to such railroad), which has transferred rail properties pursuant to the final system plan, it may—

(A) enter a judgment reallocating the securities of the Corporation and certificates of value in a fair and equitable manner if it has not been fairly allocated among the railroads transferring rail properties to the Corporation or any subsidiary thereof, except that at least one share of series B preferred stock and one certificate of value shall be allocated to each such railroad;

(B) if the lack of fairness and equity cannot be completely cured by a reallocation of the Corporation's securities and certificates of value, order the Corporation to provide for the transfer to the railroad of other securities of the Corporation or certificates of value issued by the Association as designated in the final system plan in such nature and amount as would make the exchange or exchanges fair and equitable; and (C) enter a judgment against the Corporation if the judgment would not endanger the viability or solvency of the Corporation.

(3) If the special court finds that the terms of one or more conveyances of rail properties to a profitable railroad operating in the region, State, or responsible person in accordance with the final system plan are not fair and equitable, it shall enter a judgment against such profitable railroad, State or responsible person. If the special court finds that the terms of one or more conveyances or exchanges for securities, certificates of value or other benefits are fairer and more equitable than is required as a constitutional minimum, then it shall order the return of any excess securities, certificates of value or compensation to the Corporation or a profitable railroad, State, or responsible person so as not to exceed the constitutional minimum standard of fairness and equity. The special court shall also find the amount of the payments, if any, which each profitable railroad has made on behalf of a transferor railroad in reorganization in accordance with section 211 (h) of this Act, for which payment the profitable railroad has not been reimbursed, as provided in section 211(h). Notwithstanding any other provision of this paragraph or of paragraph (4), the special court shall order the return to any such profitable railroad from compensation deposited by such profitable railroad pursuant to section 303(a)(2), of any such amount so found together with interest at the rate provided in section 211(h). In making any finding under this paragraph, the special court shall take into consideration compensable unconstitutional erosion, if any, which it finds to have occurred in the estate of a railroad in reorganization in the region, or of a railroad leased, operated, or controlled by such a railroad, during the bankruptcy proceeding with respect to such railroad.

(4) Upon making the findings referred to in this subsection, the special court shall order distribution of the securities, certificates of value, and compensation deposited with it under subsection (a) of this section to the trustee or trustees of each railroad in reorganization in the region and to persons leased, operated, or controlled by such railroads who so transferred or conveyed rail properties who conveyed right, title, and interest in rail properties to the Corporation and the respective profitable railroads, States, and responsible persons under such subsection.

(5) Whenever the special court orders, pursuant to section 303(b)(1) of this title, the transfer or conveyance to the Corporation or any subsidiary thereof of rail properties designated under section 206 (c)(1) (C) of (D) of this Act, to the National Railroad Passenger Corporation, to a profitable railroad, or to a State, or responsible person (including a government entity), the United States shall pay any judgment entered against the Corporation with respect to the conveyance of any such rail properties or against the National Railroad Passenger Corporation, such profitable railroad, State, or responsible person, plus interest thereon at

such rate as is constitutionally required. The United States may, in its discretion, represent the Corporation or the National Railroad Passenger Corporation, such profitable railroad, State or responsible person, in any proceedings before the special court that could result in such a judgment against the Corporation under paragraph (2) of this subsection or against the National Railroad Passenger Corporation, such profitable railroad, State or responsible person, under paragraph (3) of this subsection. The Corporation, the National Railroad Passenger Corporation, any profitable railroad, State, or responsible person, which is represented by the United States of America shall cooperate diligently in whatever manner the United States shall reasonably request of it in connection with such proceedings. Neither the Corporation, or its subsidiaries, nor the National Railroad Passenger Corporation, any profitable railroad, State or responsible person, shall be obligated to reimburse the United States for any moneys paid by the United States pursuant to this section.

(d) APPEAL.—A finding or determination entered pursuant to subsection (c) of this section may be appealed directly to the Supreme Court of the United States in the same manner that an injunction order may be appealed under section 1253 of title 28, United States Code: *Provided*, That such appeal is exclusive and shall be filed in the Supreme Court not more that 20 days after such finding or determination is entered by the special court. The Supreme Court shall dismiss any such appeal within 7 days after the entry of such an appeal if it determines that such an appeal would not be in the interest of an expeditious conclusion of the proceedings and shall grant the highest priority to the determination of any such appeals which it determines not to dismiss.

(e) TRANSFER AND OTHER TAXES AND RECORDING FEES.—All transfers or conveyances of rail properties (whether real, personal, or mixed) which are made under this Act (including transfers and conveyances which are made in accordance with a supplemental transaction pursuant to section 305 of this title) shall be exempt from any taxes, imposts, or levies now or hereafter imposed, by the United States or by any State or any political subdivision of a State, on or in connection with such transfers or conveyances or on the recording of deeds, bills of sale, liens, encumbrances, or other instruments evidencing, effectuating, or incident to any such transfers or conveyances, whether imposed on the transferor or one the transferee. Such transferors and transferees shall be entitled to record any such deeds, bills of sale, liens, encumbrances, or other instruments and, consistent with the designations and applicable principles in the final system plan, to record the release or removal of any pre-existing liens or encumbrances of record with respect to properties so transferred or conveyed, upon payment of any appropriate and generally applicable charges to compensate for the cost of the service performed.

TERMINATION AND CONTINUATION OF RAIL SERVICES

Section 304. [*45 U.S.C. §744*] (a) DISCONTINUANCE.—(1) Except as provided in subsections (c) and (f) of this section, rail service on rail properties of a railroad in reorganization in the region, or of a person leased, operated, or controlled by such a railroad, which transfers to the Corporation or to profitable railroads operating in the region all or substantially all of its rail properties designated for such conveyance in the final system plan, and rail service properties of a profitable railroad operating in the region which transfers substantially all of its rail properties to the Corporation or to other railroads pursuant to the final system plan, may be discontinued, to the extent such discontinuance is not precluded by the terms of the leases and agreements referred to in section 303(b)(2) of this title, if—

(A) the final system plan does not designate rail service to be operated over such rail properties;

(B) not sooner than 30 days following the effective date of the final system plan, the trustee or trustees of the applicable railroad in reorganization or a profitable railroad give notice in writing of intent to discontinue such service on a date certain which is not less that 60 days after the date of such notice or on the date of any conveyance ordered by the special court pursuant to section 303(b)(1) of this title, whichever is later; and

(C) the notice reauired bv subparagraph (B) of this paragraph is sent by certified mail to the Commission; to the chief executive officer, the transportation agencies, and the government of each political subdivision of each State in which such rail properties are located; and to each shipper who has used such rail service during the previous 12 months.

(2)(A) If rail properties are not, in accordance with the designations in the final system plan, required to be operated, as a consequence of a recommended arrangement for joint use or operation of rail properties (under section 206(g) of this Act) or as part of a coordination project (under sections 206(c) and (g) of this Act, rail service on such properties may be discontinued, subsequent to the date of conveyance of rail properties pursuant to such section 303(b)(1), if the Commission determines that such rail service on such rail properties is not compensatory and if

(i) the petitioner and any other railroad involved in such arrangement or coordination project have, prior to filing an application for such discontinuance, entered into a binding agreement (effective on or before the effective date of such discontinuance) to carry out such arrangement or project;

(ii) such application is filed with the Commission not later than 1 year after the effective date of the final system plan; and

(iii) such discontinuance is not precluded by the terms of the leases and agreements referred to in such section 303(b)(2).

(B) For purposes of this paragraph, rail service on rail properties is compensatory if the revenue attributable to such properties from such service equals or exceeds the sum of the avoidable cost of providing such service on such properties plus a reasonable return on the value of such rail properties, as determined in accordance with the standards developed pursuant to section 205(d)(6) of this Act.

(C) The Commission shall make its final determination, with respect to any discontinuance requested under this paragraph, not later than 120 days after the date of filing of an application therefor. The applicant shall have the burden of proving that the service involved is not compensatory. If the Commission fails to make a final determination within such time, the application shall be deemed to be granted.

(D) The Commission may issue such rules, regulations, and procedures as it deems necessary for the conduct of its functions under this paragraph.

(b) ABANDONMENT.—(1) Except as provided in subsections (c) and (f) of this section, rail properties over which rail service has been discontinued under subsection (a) of this section may not be abandoned sooner than 120 days after the effective date of the discontinuance. Thereafter, except as provided in subsection (c) of this section, such rail properties may be abandoned upon 30 days' notice in writing to any person (including a government entity) required to receive notice under subsection (a)(1)(C) of this section.

(2) In any case in which rail properties proposed to be abandoned under this section are designated by the final system plan as rail properties which are suitable for use for other public purposes (including roads or highways, other forms of mass transportation, conservation, and recreation), such rail properties shall not be sold, leased, exchanged, or otherwise disposed of during the 240-day period beginning on the date of notice of proposed abandonment under this section unless such rail properties have first been offered, upon reasonable terms, for acquisition for public purposes.

(3) Rail service may be discontinued, under subsection (a) of this section, and rail properties may be abandoned, under this section, notwithstanding any provision of the Interstate Commerce Act, the consitution or law of any State, or the decision of any court or administrative agency of the United States or of any State.

(c) CONTINUATION OF RAIL SERVICES.—No rail service may be discontinued and no rail properties may be abandoned, pursuant to this section—

(1) in the case of service and properties referred to in subsections (a)(1) and (b)(1) of this section, after 2 years from the effective date of the final system plan or more than 2 years after the date on which the final rail service continuation payment is received, whichever is later; or

(2) if a financially responsible person (including a government entity) offers—

(A) to provide a rail service continuation payment which is designed to cover the difference between the revenue attributable to such rail properties and the avoidable costs of providing rail service on such properties, together with a reasonable return on the value of such properties;

(B) to provide a rail service continuation payment which is payable pursuant to a lease or agreement with a State or with a local or regional transportation authority under which financial support was being provided on January 2, 1974 for the continuation of rail passenger service; or

(C) to purchase, pursuant to subsection (f) of this section, such rail properties in order to operate rail services thereon.

If a rail service continuation payment is offered, pursuant to paragraph (2)(A) of this subsection, for both freight and passenger service on the same rail properties, the owner of such properties may not be entitled to more than one payment of a reasonable return on the value of such properties.

(d) RAIL FREIGHT SERVICE.—(1) If a rail service continuation payment is offered, pursuant to subsection (c)(2)(A) of this section, for rail freight service, the person offering such payment shall designate the operator of such service and enter into an operating agreement with such operator. The person offering such payment shall designate as the operator of such service—

(A) the Corporation, if rail properties of the Corporation connect with the line of railroad involved, unless the Commission determines that such rail service continuation could be performed more efficiently and economically by another railroad;

(B) any other railroad whose rail properties connect with such line, if the Corporation's rail properties do not so connect or if the Commission makes a determination in accordance with subparagraph (A) of this paragraph; or

(C) any responsible person (including a government entity) which is willing to operate rail service over such rail properties. A designated railroad may refuse to enter into such an operating agreement only if the Commission determines, on petition by any affected party, that the agreement would substantially impair such railroad's ability to serve adequately its own patrons or to meet its outstanding common carrier obligations. The designated operator shall, pursuant to each such operating agreement (i) be obligated to operate rail freight service on such rail properties, and (ii) be entitled to receive, from the person offering such payment, the difference between the revenue attributable to such properties and the avoidable costs of providing service on such rail properties, together with a reasonable management fee, as determined by the Office.

(2) The trustees of a railroad in reorganization shall permit rail service to be continued on any rail properties with respect to which a rail service continuation payment operating agreement has been entered into under this subsection. Such trustees shall receive a reasonable return on the value of such properties, as determined in accordance with the standards developed pursuant to section 205(d)(6) of this Act.

(3) If necessary to prevent any disruption or loss of rail service, at any time after the date of conveyance, pursuant to section 303(b)(1) of this title, the Commission—

(A) shall take such action as may be appropriate under its existing authority (including the enforcement of common carrier requirements applicable to railroads in reorganization in the region) to ensure compliance with obligations imposed under this subsection; and

(B) shall have authority, in accordance with the provisions of section 1(16)(b) of the Interstate Commerce Act (49 U.S.C. 1(16)(b)), to direct rail service to be provided by any designated railroad or by the trustees of a railroad in reorganization in the region, if a rail service continuation payment has been offered but an applicable operating or lease agreement is not in effect.

For purposes of the preceding sentence, any compensation required as a result of such directed service shall be determined in accordance with the standards developed pursuant to section 205(d)(6) of this Act. The district courts of the United States shall have jurisdiction, upon petition by the Commission or any interested person (including a government entity), to enforce any order of the Commission issued pursuant to the exercise of its authority under this subsection, or to enjoin any designated entity or the trustees of a railroad in reorganization in the region from refusing to comply with the provisions of this subsection.

(e) RAIL PASSENGER SERVICE.—(1) The Corporation (or a profitable railroad) shall provide rail passenger service for a period of 180 days immediately following the date of conveyance (pursuant to section 303(b)(1) of this title), with respect to any rail properties over which a railroad in reorganization in the region, or a person leased, operated, or controlled by such a railroad, was providing rail passenger service immediately prior to such date of conveyance. Such service shall be provided on such properties regardless of whether or not such properties are designated in the final system plan as rail properties over which rail service is required to be operated, except with respect to properties over which such service is provided by the National Railroad Passenger Corporation.

(2) If a State (or a local or regional transportation authority) was providing financial assistance to support the operation of rail passenger service, pursuant to a lease or agreement which was in effect immediately prior to the date of conveyance (pursuant to such section 303(b)(1)), the Corporation (or a profitable railroad) shall be bound by the service provisions of such lease or agreement for the duration of the 180-day mandatory operation period specified in paragraph (1) of this subsection. If a State or such an authority was providing financial assistance for the continuation of rail passenger service on rail properties immediately prior to such date of conveyance, it shall provide the same level of financial assistance during such 180-day mandatory operation period. If no such financial assistance was being provided or if no such lease or agreement was in effect immediately prior to such date of conveyance, with respect to any such rail properties, the Corporation (or a profitable railroad) shall provide the same level of rail passenger service, for the duration of such 180-day mandatory operation period, that was provided prior to such date by the applicable railroad. If—

(A) such financial assistance is not provided;

(B) a State (or a local or regional transportation authority) has not, by the end of such 180-day mandatory operation period, offered a rail service continuation payment pursuant to subsection (c)(2)(A) of this section;

(C) an applicable rail service continuation payment pursuant to such subsection (c)(2)(A) is not paid when it is due; or

(D) a payment required under a lease or agreement, pursuant to section 303(b)(2) of this title or subsection (c)(2)(B) of this section, is not paid when it is due,

the Corporation (or, where applicable, the National Railroad Passenger Corporation, a profitable railroad, or the trustee or trustees of a railroad in reorganization in the region) may (i) discontinue such rail passenger service, and (ii) with respect to rail properties not designated for inclusion in the final system plan, abandon such properties pursuant to subsections (a) and (b) of this section.

(3) Nothing in this subsection shall be construed to affect the obligation of the Corporation (or a profitable railroad), or of the trustees of the railroads in reorganization in the region, to provide rail passenger service pursuant to section 303(b)(2) of this title or subsection (c)(2)(B) of this section.

(4) If a State (or a local or regional transportation authority)—

(A) offers a rail service continuation payment, pursuant to subsection (c)(2)(A) of the section and under regulations issued by the Office pursuant to section 205(d)(5) of this Act, for the operation of rail passenger service after the 180-day mandatory operation period, and

(B) provides compensation, pursuant to paragraph (2) of this subsection, for operations conducted furing the 180-day mandatory operation period,

the Corporation (of a profitable railroad) shall continue to provide such service after the end of such period, except as otherwise provided in this subsection.

(5)(A) The Secretary shall reimburse the Corporation (or a profitable railroad) for any loss which is incurred by it during the 180-day mandatory operation period specified in paragraph (1) of this subsection which is not compensated for by a State (or a local or regional transportation authority). The amount of such reimbursement shall be determined pursuant to section 17(a)(1) of the Urban Mass Transportation Act of 1964 and under regulations issued by the Office pursuant to section 205(d)(5) of this Act.

(B) The Secretary shall reimburse States, local public bodies, and agencies thereof for additional costs incurred by such States, bodies, and agencies for rail service continuation payments for rail passenger service pursuant to section 17(a)(2) of the Urban Mass Transportation Act of 1964 and under regulations issued by the Office pursuant to section 205(d)(5) of this Act.

(C) If a dispute arises with respect to the application of any such regulations, the parties to such dispute may submit such dispute to arbitration by a third party. If the parties are unable to agree upon the selection of an arbitrator, the Chairman of the Commission shall serve in that capacity (except as to matters required to be decided by the Commission, pursuant to section 402(a) of the Rail Passenger Service Act (45 U.S.C. 562(a))).

(6) Notwithstanding any other provision of this subsection, the Corporation is not obligated to provide rail passenger service on rail properties if a State (or a local or regional transportation authority) contracts for such service to be provided on such properties by an operator other than the Corporation, except that the Corporation shall, where appropriate, provide such operator with access to such properties for such purpose.

(f) PURCHASE.—If an offer to purchase is made under subsection (c)(2)(C) of this section, such offer shall be accompanied by an offer of a rail service continuation payment. Such payment shall continue until the purchase transaction is completed, unless a railroad assumes operations over such rail properties of its own account pursuant to an order or authorization of the Commission. Whenever a railroad in reorganization in the region or a profitable railroad gives notice of intent to discontinue service pursuant to subsection (a) of this section, such railroad shall, upon the request of anyone apparently qualified to make an offer to purchase or to provide a rail service continuation payment, promptly make available its most recent reports on the physical condition of such property, together with such traffic and revenue data as would be required under subpart B of part 1121 of chapter X of title 49 of the Code of Federal Regulations and such other data as are necessary to ascertain the avoidable costs of providing service over such rail properties.

(g) ABANDONMENT BY CORPORATION.—After the rail system to be operated by the Corporation or a subsidiary thereof under the final system plan has been in operation for 2 years, the Commission may authorize the Corporation or a subsidiary thereof to abandon any rail properties as to which it determines that rail service over such properties is not required by the public convenience and necessity, if the Corporation or a subsidiary thereof can demonstrate that no State (or local or regional transportation authority) is willing to offer a rail service continuation payment pursuant to subsection (c) of this section. The Commission may, at any time after the effective date of the final system plan, authorize additional rail service in the region or authorize the abandonment of rail properties which are not being operated by the Corporation or any subsidiary or affiliate thereof or by any other person. Determinations by the Commission under this subsection shall be made pursuant to applicable provisions of the Interstate Commerce Act.

(h) INTERIM ABANDONMENT.—After the date of enactment of this section and prior to the date of conveyance (pursuant to section 303(b)(1) of this title), no railroad in reorganization in the region may discontinue service or abandon any line of railroad other than in accordance with the provisions of this Act, unless (1) it is authorized to do so by the Association, and (2) no affected State (or local or regional transportation authority) reasonably opposes such action, notwithstanding any provision of any other Federal law, the constitution or law of any State, or the decision or order of, or the pendency of any proceeding before any Federal or State court, agency, or authority.

(i) DISPOSITION OF DESIGNATED RAIL PROPERTIES.—No railroad in reorganization in the region and no person leased, operated or controlled by such a railroad shall sell, transfer, encumber, or otherwise dispose of rail property, or any right or interest therein, designated for transfer to the Corporation or conveyance to a profitable railroad in the final system plan, except pursuant to section 303(b) of this title. The provisions of this subsection shall not apply to any such sale, transfer, encumbrance, or other disposition—

(1) as to which the Association generally or specifically consents in writing;

(2) which, prior to enactment of the Railroad Revitalization and Regulatory Reform Act of 1976, had been specifically approved by a United States district court having jurisdiction over the reorganization of a railroad in reorganization under section 77 of the Bankruptcy Act (11 U.S.C.205); or

(3) following certification to the special court, pursuant to section 209 (c) of the Regional Rail Reorganization Act of 1973, of any such rail properties not previously so certified.

(j) EXEMPTION.—(1) No local public body which provides mass transportation services and which is otherwise subject to the Interstate Commerce Act shall, with respect to the provision of such services, be subject to the Interstate Commerce Act or to rules, regulations and orders promulgated under such Act, except that any such local public body shall continue to be subject to applicable Federal laws pertaining to (A) safety, (B) the representation of employees for purposes of collective bargaining, and (C) employment retirement, annuity, and unemployment systems or any other provision pertaining to dealings between employees and employers.

(2) For purposes of this subsection, the term—

(A) 'local public body' has the meaning prescribed for such term in section 12(c)(2) of the Urban Mass Transportation Act (49 U.S.C. 1608(c)(2)) and includes any person or entity which contracts with a local public body to provide transportation services; and

(B) 'mass transportation' has the meaning prescribed for such term in section 12(c)(5) of the Urban Mass Transportation Act (49 U.S.C. 1608(c)(5)).

CONTINUING REORGANIZATION; SUPPLEMENTAL TRANSACTIONS

Section 305. [*45 U.S.C. §745*] (a) PROPOSALS.—If the Secretary or the Association determines that, as part of continuing reorganization, further restructuring of rail properties in the region through transactions supplemental to the final system plan would promote the establishment and retention of a financially self-sustaining rail service system in the region adequate to meet the needs of the region, the Secretary or the Association, as the case may be, may devleop proposals for such supplemental transactions as are necessary or appropriate to implement the needed restructuring. Transfers of rail properties included in proposals developed by the Association shall be limited to (1) rail properties which would have qualified for designation under section 206(c)(1)(A) of this Act but which were not transferred or conveyed under the final system plan, and which the Association finds to be essential to the efficient operations of the Corporation, and (2) transfers, consistent with the final system plan, of rail properties from the Corporation to a subsidiary thereof. Each proposal (other than a proposal developed by the Association) shall be submitted in writing to the Association and shall state and describe any transactions proposed, the rail properties involved, the parties to such transactions, the financial and other terms of such transactions, the purposes of the

Act or the goals of the final system plan intended to be effectuated by such transactions, and such other information incidental thereto as the Association may prescribe. Within 10 days after receipt of a proposal developed by the Secretary, and upon the development of a proposal developed by the Association, the Association shall publish a summary of such proposal in the Federal Register, and shall afford interested persons (including the Corporation when property is to be transferred to or from the Corporation) an opportunity to comment thereon.

(b) EVALUATION BY ASSOCIATION.—The Association shall analyze each proposal containing one or more supplemental transactions, taking into account the comments of interested persons and statements and exhibits submitted at any public hearings which may have been held. The Association shall, within 120 days after the publication of a summary thereof under subsection (a) of this section, publish in the Federal Register a report evaluating such proposal. Such evaluation shall state whether the supplemental transactions contained in such proposal, considered in their entirety, are (1) in the public interest and consistent with the purposes of this Act and the goals of the final system plan, and (2) fair and equitable. If the Corporation opposes, or seeks modification of, any such proposed transfer, its written comments shall be given due consideration by the Association and shall be published as part of the evaluation. Within 30 days after the Association publishes its report, each proposed transferor or transferee shall notify the Association in writing as to whether any proposed supplemental transaction requiring the transfer of any property from or to such transferor or transferee is acceptable to such proposed transferor or transferee. If any such proposed transferor (other than the Corporation) or transferee fails to notify the Association that any proposed supplemental transaction requiring the transfer of any property from such transferor or to such transferee is acceptable to it, no further administrative or judicial proceedings shall be conducted with respect to such proposed supplemental transaction.

(c) REVIEW BY THE COMMISSION.—Within 90 days after the publication in the Federal Register of each report referred to in subsection (b) of this section, the Commission shall determine whether the supplemental transactions referred to in the report, considered in their entirety, would be in the public interest and consistent with the purposes of this Act and the goals of the final system plan. In making such determination, the Commission shall give due consideration to the views received by it, within 30 days after the publication of the applicable report, from the Corporation and the Secretary. The Commission may condition its approval of such supplemental transaction on such reasonable terms and conditions as it may deem necessary in the public interest. The approval by the Commission of such supplemental transactions shall not be a prerequisite to the consummation of such transactions, but any determination of the Commission modifying, approving, or disapproving any proposed supplemental transactions shall be given due weight and consideration by the special court in the proceedings prescribed in subsection (d) of this section. If the Commission fails to act within the time period provided in this subsection, the supplemental transactions involved shall be deemed to have been approved by the Commission. The Commission may prescribe such regulations as may be necessary for the administration of this section.

(d) SPECIAL COURT PROCEEDINGS.—(1) If the Association has made the determination pursuant to subsection (b) of this section that a proposal for supplemental transactions is in the public interest and consistent with the purposes of this Act and the goals of the final system plan, and is fair and equitable, the Association shall, within 40 days after the date of the Commission's determination under subsection (c) of this section, or after the expiration of the 90-day period referred to in such subsection (c), whichever is applicable, petition the special court for an order of such court finding that such proposal for supplemental transactions is in the public interest and consistent with the purposes of this Act and the goals of the final system plan, and is fair and equitable, and directing the Corporation to carry out the supplemental transactions specified in such proposal. If the Association has determined, pursuant to subsection (b) of this section that a proposal made by the Secretary is not in the public interest or is not consistent with the purposes of this Act and the goals of the final system plan or is not fair and equitable, the Secretary may, if he determines that such proposal is in the public interest and consistent with the purposes of this Act and the goals of the final system plan and is fair and equitable, petition the special court for an order of such court finding that such proposal for supplemental transactions is in the public interest and consistent with the purposes of this Act and the goals of the final system plan and is fair and equitable, and directing the Corporation to carry out any supplemental transactions specified in such proposal. Such a petition shall be submitted to the special court within 90 days after the date of the Commission's determination under such subsection (c), or after the expiration of the 90-day period referred to in such subsection (c), whichever is applicable.

(2) Within 180 days after the filing of a petition under paragraph (1) of this subsection, the special court shall decide, after a hearing, whether the proposed supplemental transactions contained in such petition, considered in their entirety, are in the public interest and consistent with the purposes of this Act and the goals of the final system plan and are fair and equitable. If the special court determines that such proposed supplemental transactions, considered in their entirety, are in the public interest and consistent with the purposes of this Act and the goals of the final system plan and are fair and equitable, it shall, upon making such determination, issue such orders as may be necessary to

direct the Corporation to consummate the transactions. If the special court determines that such proposed supplemental transactions, considered in their entirety, are not in the public interest or not consistent with the purposes of this Act and the goals of the final system plan, or are not fair and equitable, it shall file an opinion stating its conclusion and the reasons therefor. In such event the Association (in the case of a proposal developed by the Association) or the Secretary (in the case of a proposal developed by the Secretary) may, within 120 days after the filing of such opinion, certify to the special court that the terms and conditions of the proposal have been modified consistent with the opinion of the court and are acceptable to each proposed transferor (other than the Corporation) or transferee, and may petition the special court for reconsideration of the proposal as so modified. Within 90 days after the filing of such petition, the special court shall decide, after a hearing, whether the proposal as modified by the certification is in the public interest and consistent with the purposes of this Act and the goals of the final system plan and is fair and equitable, and shall enter such further orders as are consistent with its determination.

(3) The Corporation is authorized to petition the special court and to be represented regarding any proposed supplemental transaction, contained in a proposal developed by either the Association or the Secretary, which involves the properties of the Corporation.

(4) In proceedings under this subsection, the special court is authorized to exercise the powers of a judge of a United States district court with respect to such proceedings and such powers shall include those of a reorganization court.

(5) Any evaluation by the Association, the Secretary, or the Commission shall not be reviewable in any court except the special court in accordance with the provisions of this section. The supplemental transactions shall not be restrained or enjoined by any court nor shall they be otherwise reviewable by any court other than by the special court to the extent provided in this section.

(6) Notwithstanding any other provision of this Act, no findings, determinations, or proceedings shall be required with respect to any proposal for supplemental transactions other than as expressly set forth in this section.

(7) Any supplemental transaction under this section shall subject the transferor and transferee, in each such supplemental transaction, to the requirements and other provisions of title V of this Act, except that the

term 'effective date of this Act' contained in such title V shall be applied to such supplemental transaction as if it read 'effective date of the supplemental transaction'.

(8) A final order or judgment of the special court entering or denying an order pursuant to this subsection shall be reviewable in the same manner as provided in section 209(e)(3) of this Act.

(e) DEFINITION.—As used in this section, the term 'fair and equitable' means fair and equitable, in accordance with the standards applicable to the approval of a plan of reorganization (or a step in such plan) under section 77 of the Bankruptcy Act (11 U.S.C.205) to—

(1) the estates of railroads in reorganization in the region and persons leased, operated, or controlled by such railroads who have conveyed rail properties, under section 303(b)(1) of this title, in exchange for securities of the Corporation, the Association, or profitable railroads and other benefits provided as a consequence of this Act and to any subsequent holders of such securities at the time of the supplemental transaction involved; and

(2) the holders of other securities of the Corporation.

Whenever any property or securities of the Corporation are required to be valued in order to determine whether the terms of a supplemental transaction are fair and equitable, the special court shall give proper recognition to the contributions to the Corporation by all classes of security holders, except that such court shall not assign to the series B preferred stock or the common stock of the Corporation any values added to those securities, by reason of investment by the Association in debentures and series A preferred stock of the Corporation, in excess of any value required by constitutional principles applicable to a reorganization process.

CERTIFICATES OF VALUE

Section 306. [*45 U.S.C. §746*] (a) GENERAL.—On the date when the Corporation is required to deposit securities with the special court pursuant to section 303(a)(1) of this title, the Association shall deposit with the special court the certificates of value of the Association required by this section. The Secretary shall guarantee the payment of all certificates of value delivered in accordance with this title. All guarantees entered by the Secretary under this section shall constitute general obligations of the United States of America for the payment or redemption of which its full faith and credit are pledged. Such guarantees shall be valid and incontestable except as to mutual mistake of fact or as to fraud or material misrepresentation by the holder of such certificates or the transferor of rail properties to which certificates of value of any series so guaranteed are issued.

(b) NUMBER AND DISTRIBUTION.—A separate series of certificates of value shall be issued to each railroad in reorganization in the region and each person leased, operated, or controlled by such a railroad that transfers rail properties to the Corporation or a subsidiary thereof. The number of certificates of value of each series to be deposited pursuant to subsection (a) shall be equal to the number of shares of series B preferred stock of the Corporation which are required to be deposited by the Corporation with the special court, pursuant to section 303(a)(1) of this title in exchange for the rail properties transferred to the Corporation or a subsidiary thereof by such transferor. Certificates of value of the appropriate series shall be distributed by the special court, pursuant to section 303(c)(4) of this title, at the same time to the same transferors, and in the same numbers of units as shares of such series B preferred stock are distributed to such transferor.

(c) REDEMPTION.—(1) Certificates of value, of any series, shall be redeemed by the Association on December 31, 1987, or on such earlier date as the Board of Directors of the Association and the Finance Committee jointly may determine and specify.

(2) Each certificate of value of each series shall be redeemable for an amount, payable in cash, equal to its base value on the redemption date, minus—

(A) the sum of the fair market value of the series B preferred stock applicable to such certificate, the fair market value of the common stock applicable to such certificate, and all cash dividends theretofore paid on any such series B preferred stock and on any such common stock; and

(B) any sums paid to a transferor of rail properties to whom such series of certificates of value was issued resulting from sales or leases by the Corporation of properties transferred to it by such transferor divided by the number of certificates of value distributed to such transferor.

(3) The number of shares of series B preferred stock and common stock applicable to each certificate of value of any series, pursuant to paragraph (2) of this subsection, shall be—

(A) one share of series B preferred stock (adjusted to reflect any stock splits, stock combinations, reclassifications or similar transactions affecting the number of shares of outstanding series B preferred stock following the date of distribution pursuant to section 303(c)(4) of this title); and

(B) the number of shares of common stock determined by dividing the total number of shares of common stock distributed pursuant to section 303(c)(4) of this Act to the transferor receiving such series of certificates of value (adjusted to reflect any stock splits, stock combinations, reclassifications, or similar transactions affecting the number of shares of outstanding common stock following the date of distribution pursuant to section 303(c)(4) of this title) by the total number of certificates of value in the series so distributed to such transferor.

(4) The base value of each certificate of value of any series shall be the value obtained by (A) taking the net liquidation value, as determined by the special court, to which the transferor to whom such series of certificates of value is issued is entitled by virtue of transfers or rail properties, under section 303(b)(1) of this title to the Corporation or a subsidiary thereof; (B) subtracting the value of other benefits provided under this Act, as determined by the special court; (C) adding such amount, if any, as the special court may determine shall be required after taking into consideration compensable unconstitutional erosion, if any, in the estate of a railroad in reorganization, or of a railroad leased, operated , or controlled by such a railroad, which the special court finds to have occurred during any bankruptcy proceeding with respect to such railroad; (D) adding interest from the transfer date to the redemption date to be compounded annually at a rate of 8 percent per annum; and (E) dividing the resulting value by the number of certificates of value of such series distributed to such transferor. In determining such base value, the special court shall give due weight and consideration to the finding of the Association as to the net liquidation value to which each transferor is entitled by virtue of conveyances of rail properties under section 303 (b)(1) of this title. For purposes of this paragraph, the term 'rail properties' includes all rights with respect to employee benefit plans transferred and assigned to the Corporation pursuant to section 303(b)(6) of this title. Net liquidation value with respect to such rights shall be determined after taking into account all obligations finally transferred or assigned to the Corporation pursuant to such section.

(5) The fair market value of series B preferred stock and of common stock of the Corporation shall be determined in accordance with regulations prescribed by the Association, on the basis of the average price of each such security in the primary established market in which such securities are traded over a period of 120 consecutive trading days ending not less than 20 nor more than 40 trading days preceding the redemption date, or, in the case of a security for which there is not an established trading market, on the basis of the fair market value thereof as determined by the majority vote of three experts in the valuation of securities, one to be selected by the Association, one to be selected by the directors of the Corporation elected by the holders of the security to be valued, and one to be selected by the two first selected.

(d) AUTHORIZATION FOR APPROPRIATIONS.—There are authorized to be appropriated to the Secretary such sums as are necessary to discharge the obligations of the United States arising under this section.

PROTECTION OF FEDERAL FUNDS

Section 307. [*45 U.S.C. §747*] (a) AUDIT.—(1) The Comptroller General of the United States is authorized to audit the programs, activities, and financial operations of the Corporation for any period during which (A) Federal funds provided pursuant to this Act are being used to finance any portion of its operations, or (B) Federal funds have been invested therein pursuant to this Act. Any such audit may be conducted under such rules and regulations as the Comptroller General may prescribe. The Comptroller General shall report to the Congress at such times and to such extent as he considers necessary to keep the Congress informed on the security of such Federal funds and guarantees and, to the extent appropriate, make recommendations for achieving greater economy, efficiency, and effectiveness in such programs, activities, and operations.

(2) For the purpose of any audit conducted pursuant to subsection (a) of this section, the Comptroller General, or a designated representative of the Comptroller General, shall have access to and the right to examine all books, accounts, records, reports, files, and other papers, items, or property belonging to or in use by the Corporation.

(b) REPORT.—The Association shall prepare and submit an annual report to Congress on the performance of the Corporation in order to keep the Congress informed as to matters which may affect the quality of rail services in the region and which may affect the security of Federal funds referred to in subsection (a) of this section. Each such report shall be submitted within 150 days after the end of the fiscal year of the Corporation. Each such report shall include an evaluation of—

(1) the degree to which the goals of section 206(a) of this Act are being met;

(2) the amounts and causes of deviations, if any, from the financial projections of the final system plan;

(3) the amount of Federal funds made available to the Corporation and a clear description of the uses of such funds;

(4) the projected financial needs of the Corporation;

(5) the projected sources from which such financial needs are likely to be met; and

(6) the ability of the Corporation to become financially self-sustaining without requiring Federal funds in excess of those authorized by section 216(f) of this Act.

TITLE IV—LOCAL RAIL SERVICES

FINDINGS AND PURPOSE

Section 401. [*45 U.S.C. §761*] (a) FINDINGS.—The Congress finds and declares that—

(1) The Nation is facing an energy shortage of acute proportions in the next decade.

(2) Railroads are one of the most energy-efficient modes of transportation for the movement of passengers and freight and cause the least amount of pollution.

(3) Abandonment, termination, or substantial reduction of rail service in any locality will adversely affect the Nation's long-term and immediate goals with respect to energy conservation and environmental protection.

(4) Under certain circumstances the cost to the taxpayers of rail service continuation subsidies would be less than the cost of abandonment of rail service in terms of lost jobs, energy shortages, and degradation of the environment.

(b) PURPOSE.—Therefore, it is declared to be the purpose of the Congress to authorize the Secretary to maintain a program of rail service continuation subsidies.

RAIL SERVICE CONTINUATION ASSISTANCE

Section 402. [*45 U.S.C. §762*] (a) GENERAL.—(1) The Secretary shall provide financial assistance in accordance with this section to assist in the provision of rail service continuation payments, the acquisition or modernization of rail properties, including the preservation of rights-of-way for future rail service, the construction or improvement of facilities necessary to accommodate the transportation of freight previously moved by rail service, and the cost of operating and maintaining rail service facilities such as yards, shops, docks, or other facilities useful in facilitating and maintaining main line or local rail service. The Federal share of the costs of any such assistance shall be as follows: (A) 100 percent for the 12-month period following the date that rail properties are conveyed pursuant to section 303(b)(1) of this Act; and (B) 90 percent for the succeeding 12-month period.

(2) The Secretary shall, within one year after the date of enactment of the Railroad Revitalization and Regulatory Reform Act of 1976, promulgate standards and procedures under which the State share of such cost may be provided through in-kind benefits such as forgiveness of taxes, trackage rights, and facilities which would not otherwise be provided.

(3) The Secretary, in cooperation with the Secretary of Labor, the Association, and the Commission, shall assist States and local or regional transportation authorities in negotiating initial operating or lease agreements and shall report to the Congress not later than 30 days after the date of enactment of the Railroad Revitalization and Regulatory Reform Act of 1976 on the progress of such negotiations. The Secretary may, with the concurrence of a State, enter directly into operating or lease agreements with railroads designated to provide service under section 304(d) of this Act, and with the trustees of railroads in reorganization in the region over whose rail properties such service will be provided, to assure the uninterrupted continuation of rail service after such date of conveyance. Such agreements may be entered into only during the period when the Federal share is 100 percent. Payments shall be made from the funds to which a State would otherwise be entitled under this section.

(b) ENTITLEMENT.—(1) Each State in the region which is, pursuant to subsection (c) of this section, eligible to receive rail service continuation assistance is entitled to an amount equal to the total amount authorized and appropriated for such purpose multiplied by a fraction whose numerator is the rail mileage in such State which is eligible for rail service continuation assistance under this section and whose denominator is the rail mileage in all of the States in the region which are eligible for rail service continuation assistance under this section. Notwithstanding the preceding sentence, the entitlement of each State shall not be less than 3 percent of the funds appropriated. Not more than 5 percent of a State's entitlement may be used for rail planning activities. For purposes of this subsection, rail mileage shall be measured by the Secretary in consultation with the Interstate Commerce Commission. Any portion of the entitlement of any State which is withheld, in accordance with this section, and any such sums which are not used or committed by a State shall be reallocated immediately, to the extent practicable, among the other States in accordance with the formula set forth in this subsection. In addition to amounts provided pursuant to such rail mileage formula, funds shall also be made available to each State for the cost of operating and maintaining rail service facilities such as yards, shops, and docks which are useful in facilitating and maintaining mainline or local rail services and which are contained in each State's rail plan, except that (A) any such assistance shall extend for a period of only 12 months following the date rail properties are conveyed under section 303(b)(1) of this Act, and (B) no railroad shall be required to operate such facilities. With respect to the limitation on assistance for rail service facilities under the preceding sentence, the Secretary shall, not later than 90 days prior to the end of such 12-month period, submit a report to the Congress in conjunction with a designated State agency, recommending future action with respect to such facilities.

(2) For a period of not more than 1 year following the date rail properties are conveyed pursuant to section 303(b)(1) of this Act, the Secretary is authorized to provide financial assistance, from the funds to which a State would otherwise be entitled under this section for the continuation of local rail services, to any person determined by the Secretary to be financially responsible who will enter into any operating and lease agreements with railroads designated to provide service under section 304(d) of this Act, regardless of the eligibility of the State, where the applicable rail properties are located, to receive assistance under subsection (c) of this section. In any case in which a State is eligible to receive rail service continuation assistance under subsection (c) of this section, States shall have priority to receive such payments over any other person eligible under this paragraph and no other person eligible under this paragraph shall receive such payments unless his application therefor has been approved by the State agency designated under subsection (c) to administer the State plan.

(c) ELIGIBILITY.—(1) A State in the region is eligible to receive financial assistance pursuant to subsection (b) of this section if, in any fiscal year—

(A) the State has established a State plan for rail transportation and local rail services (herein referred to as the 'State rail plan') which is administered or coordinated by a designated State agency and such plan includes a suitable process for updating, revising, and amending such plan and provides for the equitable distribution of such financial assistance among State, local, and regional transportation authorities;

(B) the State agency (i) has authority and administrative jurisdiction to develop, promote, supervise, and support safe, adequate, and efficient rail services, (ii) employs or will employ, directly or indirectly, sufficient trained and qualified personnel, and (iii) maintains or will maintain adequate programs of investigation, research, promotion, and development with provision for public participation;

(C) the State provides satisfactory assurance that such fiscal control and fund accounting procedures will be adopted as may be necessary to assure proper disbursement of, and accounting for, Federal funds paid under this title to the State; and

(D) the State complies with the regulations of the Secretary issued under this section.

(2) The rail freight services which are eligible for rail service continuation assistance pursuant to this section are—

(A) those rail services of railroads in reorganization in the region, or persons leased, operated, or controlled by any such railroad, which the final system plan does not designate to be continued;

(B) those rail services on rail properties referred to in section 304(a)(2) of this Act;

(C) those rail services in the region which have been, at any time during the 5-year period prior to the date of enactment of this Act, or which, are subsequent to the date of enactment of this Act, owned, leased, or operated by a State agency or by a local or regional transportation authority, or with respect to which a State, a political subdivision thereof, or a local or regional transportation authority has invested (at any time during the 5-year period prior to the date of enactment of this Act), or invests (subsequent to the date of enactment of this Act), substantial sums for improvement or maintenance of rail service; or

(D) those rail services in the region with respect to which the Commission authorizes the discontinuance of rail services or the abandonment of rail properties, effective on or after the date of enactment of this Act.

(3) The rail freight properties which are eligible to be acquired or modernized with financial assistance pursuant to subsection (b) of this section are those rail properties which are used for services eligible for rail service continuation assistance, pursuant to paragraph (2) of this subsection, including those properties which are identified, in the applicable State rail plan as having potential for future use for rail freight service.

(4) The facilities which are eligible to be constructed or improved with financial assistance pursuant to subsection (b) of this section are those facilities in the region (including intermodal terminals and highways or bridges) which are needed in order to provide rail freight service which will no longer be available because of the discontinuance of rail freight service under section 304 of this Act or other lawful authority. No funds provided under this paragraph may be used to pay the State share of any highway projects under title 23, United States Code.

(5) Rail properties are eligible to be acquired with financial assistance pursuant to subsection (b) of this section if (A) they are to be used for intercity or commuter rail passenger service, and (B) they pertain to a line in the region (other than rail properties designated in accordance with section 206(c)(1)(C). of this Act) which, if so acquired (i) would enable the National Railroad Passenger Corporation to serve, more efficiently, a route which it operated on November 1, 1975, (ii) would provide intercity rail passenger service designated by the Secretary under title II of the Rail Passenger Service Act, or (iii) would provide such service over a route designated for service pursuant to section 403 (c) of the Rail Passenger Service Act (45 U.S.C. 563(c)).

(d) REGULATIONS.—Within 90 days after the date of enactment of this Act, the Secretary shall issue, and may from time to time amend, regulations with respect to the provision of financial assistance under this title.

(e) PAYMENT.—The Secretary shall pay to each eligible State in the region an amount equal to its entitlement under subsection (b) of this section.

(f) RECORDS, AUDIT, AND EXAMINATION.—(1) Each recipient of financial assistance under this section, whether in the form of grants, subgrants, contracts, subcontracts, or other arrangements, shall keep such records as the Secretary shall prescribe, including records which fully disclose the amount and disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance was given or used, the amount of that portion of the cost of the project supplied by other sources, and such other records as will facilitate an effective audit. Such records shall be maintained for 3 years after the completion of such a project or undertaking.

(2) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of such receipts which in the opinion of the Secretary or the Comptroller General may be related or pertinent to the grants, contracts, or other arrangements referred to in such paragraph.

(g) WITHHOLDING.—If the Secretary, after reasonable notice and an opportunity for a hearing to any State agency, finds that a State is not eligible for financial assistance under subsections (c) and (d) of this section, payment to such State shall not be made until there is no longer any failure to comply.

(h) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to the Secretary to carry out the purposes of this section an amount not to exceed $180,000,000 without fiscal year limitation. Such sums as are appropriated shall remain available until expended.

(i) DEFINITION.—As used in this section, the term 'rail service continuation assistance' includes expenditures made by a State (or a local or regional transportation authority), at any time during a 1-year period preceding the date of enactment of this Act, or subsequent to the date of enactment of this Act, for acquisition, rehabilitation, or modernization of rail facilities on which rail freight services would have been curtailed or abandoned but for such expenditures.

ACQUISITION AND MODERNIZATION LOANS

Section 403. [*45 U.S.C. §763*] (a) ACQUISITION.—If a State which is eligible for assistance under section 402(c) of this title or a local or regional transportation authority has made an offer to purchase any rail properties of a railroad pursuant to section 304(c)(2)(c) of this Act or other lawful authority, the Secretary is authorized to direct the Association to provide loans to such State or local or regional transportation authority not to exceed 70 per centum of the purchase price.

(b) MODERNIZATION.—In addition to such acquisition loans, the Secretary is authorized to direct the Association to provide additional assistance not to exceed 70 per centum of the cost of restoring or repairing such rail properties to such condition as will enable safe and efficient rail transportation operations over such rail properties. Such financial assistance may be in the form of a loan or the guarantee of a loan. The Association shall provide such financial assistance as the Secretary may direct under this section and shall adopt regulations describing its procedures for such assistance. Notwithstanding any other provision of this title, a State may expend sums received by it under paragraphs (1) and (2) of section 402(b) of this title for acquisition and modernization pursuant to this section, or for any project designated pursuant to a State rail plan.

REPEAL

Effective on the date of the second anniversary of the date on which rail properties are conveyed, pursuant to section 303(b)(1) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 743), title IV of such Act is repealed. (Pub. L. 94-210, 90 Stat. 143)

TITLE V—EMPLOYEE PROTECTION

DEFINITIONS

Section 501. [*45 U.S.C. §771*] As used in this title unless the context otherwise requires—

(1) "acquiring railroad" means a railroad, except the Corporation or any subsidiary thereof, which seeks to acquire or has acquired, pursuant to the provisions of this Act, all or a part of the rail properties of one or more of the railroads in reorganization, the Corporation or any subsidiary thereof, or a profitable railroad;

(2) employee of a railroad in reorganization" means a person, who, on the effective date of a conveyance of rail properties of a railroad in reorganization to the Corporation or a subsidiary thereof, to the National Railroad Passenger Corporation, to an acquiring railroad, or to a State pursuant to section 208 (d)(2) of this Act, has an employment relationship with either said railroad in reorganization or any carrier (as defined in parts I and II of the Interstate Commerce Act) which is leased, controlled, or operated by the railroad in reorganization (except a Class I railroad which is not wholly owned, operated, or leased by a railroad in reorganization but is controlled by a railroad in reorganization), but does not include a president, vice president, treasurer, secretary, comptroller, and any other person who performs functions corresponding to those performed by the foregoing officers;

(3) 'protected employee' means any employee of—

(A) an acquiring or selling railroad who is adversely affected by a transaction;

(B) the Corporation who, immediately preceding such employment by the Corporation, was employed by a selling railroad and who is adversely affected by the sale of rail properties to the Corporation pursuant to an offer designated under section 206(c)(2) of this Act;

(C) a railroad in reorganization in the region; and

(D) a railroad who is adversely affected by a supplemental transaction under section 305 of this Act or by a project recommended under section 206(g) of this Act;

who, in any such case, has not reached age 65 on the effective date of this Act;

(4) "class or craft of employees" means a group of employees, recognized and treated as a unit for purposes of collective bargaining, which is represented by a labor organization that has been duly authorized or recognized pursuant to the Railway Labor Act as its representative for purposes of collective bargaining;

(5) "representative of a class or craft of employees" means a labor organization which has been duly authorized or recognized as the collective bargaining representative of a class or craft of employees pursuant to the Railway Labor Act;

(6) "deprived of employment" means the inability of a protected employee to obtain a position by the normal exercise of his seniority rights with the Corporation or any subsidiary thereof after properly electing to accept employment therewith or, the subsequent loss of a position and inability, by the normal exercise of his seniority rights under the applicable collective bargaining agreements, to obtain another position with the Corporation or any subsidiary thereof: *Provided, however,* That provisions in existing collective bargaining agreements of a railroad in reorganization, which do not require a protected employee, in the normal exercise of seniority rights, to make a change in residence, in order to maintain his protection, will be preserved and will also be extended and be applicable to all other protected employees of that same craft or class. It shall not, however, include any deprivation of employment by reason of death, retirement, resignation, dismissal or disciplinary suspension for cause, failure to work due to illness or disability, nor any severance of employment covered by subsections (d) and (e) of section 505 of this title;

(7) "employee adversely affected with respect to his compensation" means a protected employee who suffers a reduction in compensation;

(8) "transaction" means actions taken pursuant to the provisions of this Act, including section 305 thereof, or the results thereof;

(9) "change in residence" means transfer to a work location which is located either (A) outside a radius of 30 miles of the employee's former

work location and farther from his residence than was his former work location or (B) is located more than 30 normal highway route miles from his residence and also farther from his residence than was his former work location; and

(10) 'selling railroad' means a railroad which sells rail properties pursuant to an offer designated under section 206(c)(2) of this Act.

EMPLOYMENT OFFERS

Section 502. [*45 U.S.C. §772*] (a) APPLICABLE LAW.—The Corporation and, where applicable, the Association shall be subject to the provisions of the Railway Labor Act and shall be considered employers for purposes of the Railroad Retirement Act, Railroad Retirement Tax Act, and the Railroad Unemployment Insurance Act. The Corporation, in addition, shall, except as otherwise specifically provided by this Act, be subject to all Federal and State laws and regulations applicable to carriers by railroad. As used in this subsection, the term 'where applicable' refers to the relations of the Association, as an employer (A) to employees of the Association who, before the date of conveyance, under section 303(b)(1) of this Act, had creditable service under the relevant statute and who were offered and accepted coverage under such statute, and (B) to former employees of railroads in reorganization in the region, after the date of such conveyance.

(b) MANDATORY OFFER.—The Corporation shall offer employment, to be effective as of the date of a conveyance or discontinuance of service under the provisions of this Act, to each employee of a railroad in reorganization in the region who has not already accepted an offer of employment by the Association (where applicable), an acquiring railroad, or the Corporation. Such offers of employment to employees represented by labor organizations shall be confined to their same craft and class. The Corporation shall apply to such employees the protective provisions of this title.

(c) ASSOCIATION.—After the transfer of rail properties pursuant to section 303, the Association, in employing any additional employees, shall give priority consideration to employees of a railroad in reorganization and the provisions of this title shall apply to any such employees employed by the Association as if they were employees of the Corporation.

ASSIGNMENT OF WORK

Section 503. [*45 U.S.C. §773*] The Corporation shall have the right to assign, allocate, reassign, reallocate, and consolidate work formerly performed on the rail properties acquired pursuant to the provisions of this Act from a railroad in reorganization to any location, facility, or position on its system provided it does not remove said work from coverage of a collective-bargaining agreement and does not infringe upon the existing classification of work rights of any craft or class of employees at the location or facility to which said work is assigned, allocated, reassigned, reallocated, or consolidated and shall have the right to transfer to an acquiring railroad the work incident to the rail properties or facilities acquired by said acquiring railroad pursuant to this Act, subject, however, to the provisions of section 508 of this title.

COLLECTIVE-BARGAINING AGREEMENTS

Section 504. [*45 U.S.C. §774*] (a) INTERIM APPLICATION.—Until completion of the agreements provided for under subsection (d) of this section, the Corporation shall, as though an original party thereto, assume and apply on the particular lines, properties, or facilities acquired all obligations under existing collective-bargaining agreements covering all crafts and classes employed thereon, except that the Agreement of May 1936, Washinton, D.C. and provisions in other existing job stabilization agreements shall not be applicable to transactions effected pursuant to this Act with respect to which the provisions of section 505 of this title shall be superseding and controlling. During this period, employees of a railroad in reorganization who have seniority on the lines, properties, or facilities acquired by the Corporation pursuant to this Act shall have prior seniority roster rights on such acquired lines, properties, or facilities.

(b) SINGLE IMPLEMENTING AGREEMENT.—On or before the date of the adoption of the final system plan by the Board of Directors of the Association as provided in section 207(c) of this Act, the representatives of the various classes or crafts of the employees of a railroad in reorganization involved in a conveyance pursuant to this Act and representatives of the Corporation shall commence negotiation of a single implementing agreement for each class and craft of employees affected providing (1) the identification of the specific employees of the railroad in reorganization to whom the Corporation offers employment; (2) the procedure by which those employees of the railroad in reorganization may elect to accept employment with the Corporation; (3) the procedure for acceptance of such employees into the Corporation's employment and their assignment to positions on the Corporation's system; (4) the procedure for determining the seniority of such employees in their respective crafts or classes on the Corporation's system which shall, to the extent possible, preserve their prior seniority rights; and (5) the procedure for determining equitable adjustment in rates of comparable positions. If no agreement with respect to the matters referred to in this subsection is reached by the end of 30 days after the commencement of negotiations, the parties shall within an additional 10 days select a neutral referee and, in the event they are unable to agree upon the selection of such referee, then the National Mediation Board shall immediately appoint a referee. After a referee has been designated, a hearing on the dispute shall commence as soon as practicable. Not less than 10 days prior to the effective date of any conveyance pursuant to the provisions of this Act, the referee shall resolve and decide all matters in dispute with respect to the negotiation of said implementing agreement or agreements and shall render a decision which shall be final and binding and shall constitute the implementing agreement or agreements between the parties with respect to the transaction involved. The salary and expenses of the referee shall be paid pursuant to the provisions of the Railway Labor Act.

(c) RELATIONSHIP TO OTHER PROVISIONS.—Notwithstanding failure for any reason to complete implementing agreements provided for in subsection (b) of this section, the Corporation may proceed with a conveyance of properties, facilities, and equipment pursuant to the provisions of this Act and effectuate said transaction: *Provided,* That all protected employees shall be entitled to all of the provisions of such agreements, as finally determined, from the time they are adversely affected as a result of any such conveyance.

(d) NEW COLLECTIVE-BARGAINING AGREEMENTS.—Not later than 60 days after the effective date of any conveyance pursuant to the provisions of this Act, the representatives of the various classes or crafts of the employees of a railroad in reorganization involved in a conveyance and representatives of the Corporation shall commence negotiations of new collective-bargaining agreements for each class and craft of employees covering the rates of pay, rules, and working conditions of employees who are employees of the Corporation, which collective-bargaining agreements shall include appropriate provisions concerning rates of pay, rules, and working conditions but shall not include any provisions for job stabilization resulting from any transaction effected pursuant to this Act which may exceed or conflict with those established or prescribed herein.

(e) LIABILITY FOR EMPLOYEE CLAIMS.—In all cases of claims by employees, arising under the collective bargaining agreements of the railroads in reorganization in the region, and subject to section 3 of the Railway Labor Act (45 U.S.C.153), the Corporation, the National Railroad Passenger Corporation, or an acquiring carrier, as the case may be, shall assume responsibility for the processing of any such claims, and payment of those which are sustained or settled on or subsequent to the date of conveyance, under section 303(b)(1) of this Act, and shall be entitled to direct reimbursement from the Association pursuant to section 211 (h) of this Act. In those cases in which claims for employees were sustained or settled prior to such date of conveyance, it shall be the obligation of the employees to seek satisfication against the estates of the railroads in reorganization which were their former employers.

(f) TRANSFER OF EMPLOYEES TO THE NATIONAL RAILROAD PASSENGER CORPORATION OR ACQUIRING RAILROADS.—Notwithstanding any otherwise applicable provisions of this title, protected employees to whom the Corporation has made offers of employment may be transferred to the National Railroad Passenger Corporation in accordance with the following procedure:

(1) Not later than 90 days after the date of completion of the transaction required by section 206(c) of this Act, implementing agreement negotiations between representatives of the various crafts or classes of employees associated with the involved properties, the Corporation, and the National Railroad Passenger Corporation shall commence. These negotiations shall—

(A) identify the specific employees of the Corporation to whom the National Railroad Passenger Corporation offers employment;

(B) the procedure by which those employees of the Corporation may elect to accept employment with the National Railroad Passenger Corporation;

(C) the procedure for acceptance of such employees into the National Railroad Passenger Corporation's employment; and

(D) the procedure for determining the seniority of such employees in their respective crafts or classes on the National Railroad Passenger Corporation's system which shall, to the extent possible, preserve their prior seniority rights.

If no agreement regarding the matters referred to in this subsection is reached by the end of 60 days after the date of commencement of negotiations (which shall also be a date which is at least 90 days after the transaction contemplated by section 601(d) of this Act), upon notice of any party, all parties thereto shall within an additional 10 days select a neutral referee. If such parties are unable to agree upon the selection of such a referee, the National Mediation Board shall promptly appoint a referee. Hearings shall commence not later than 30 days after the date of selection or appointment of such referee, and a decision shall be rendered by such referee within 60 days after the date of commencement of the hearings. The referee shall resolve and decide all matters in dispute regarding the negotiation of the implementing agreement or agreements. All parties may participate, but the referee shall have the only vote. The referee's decision shall be final and binding and shall constitute the implementing agreement or agreements between the parties. The salary and expenses of the referee shall be paid pursuant to the provisions of the Railway Labor Act.

(2) Prior to implementation of an agreement or agreements pursuant to paragraph (1) of this subsection, the representatives of the various

crafts or classes of employees designated to be transferred to the National Railroad Passenger Corporation shall meet with representatives of the National Railroad Passenger Corporation for the purposes of negotiating agreements regarding rates of pay, rules, and working conditions. If, 60 days after the date of commencement of such negotiations, no agreement has been reached, the bargaining agreement in existence on the rail properties from which the employees are to be transferred and which is applicable to the craft or class of employees being transferred will apply and such implementing agreement will be put into effect.

(3) An employee of the Corporation who is entitled to protection and who is transferred as a result of an acquisition pursuant to this Act shall upon transfer to the National Railroad Passenger Corporation or to an acquiring railroad, carry with him his protected status. The National Railroad Passenger Corporation or an acquiring railroad, as new employers, shall be responsible for payment of protective benefits and shall be entitled to reimbursement pursuant to section 509 of this title.

(4) The National Railroad Passenger Corporation may prior to completion of any of the agreements referred to in this section, offer employment to any noncontract employee. Noncontract employees accepting employment with the National Railroad Passenger Corporation shall carry with them all rights and benefits accorded to them under this title.

(g) ASSUMPTION OF PERSONAL INJURY CLAIMS.—All cases or claims by employees or their personal representatives for personal injuries or death against a railroad in reorganization in the region arising prior to the date of conveyance of rail properties, pursuant to section 303 of this Act, shall be assumed by the Corporation or an acquiring railroad as the case may be. The Corporation or the acquiring railroad shall process and pay any such claims that are sustained or settled, and shall be entitled to direct reimbursement from the Association pursuant to section 211(h) of this Act.

EMPLOYEE PROTECTION

Section 505. [*45 U.S.C. §775*] **(a) EQUIVALENT POSITION.**—A protected employee whose employment is governed by a collective-bargaining agreement will not, except as explicitly provided in this title, during the period in which he is entitled to protection, be placed in a worse position with respect to compensation, fringe benefits, rules, working conditions, and rights and privileges pertaining thereto, including benefits under any employee pension benefit plan in effect on December 1, 1975, other than a plan maintained primarily for the purpose of providing deferred compensation for a select group of management personnel or other highly compensated employees. For purposes of protecting employee pension benefits under this title, the term 'protected employee whose employment is governed by a collective-bargaining agreement' includes any beneficiary of, and any participant in, such plan, including noncontract employees. The protected benefits of such beneficiary or participant, accrued as of the date of conveyance, may be limited to the amount guaranteed under terminated plans pursuant to title IV of the Employee Retirement Income Security Act of 1974. Pension benefits shall not be paid to any beneficiary of a terminated plan whose benefits are guaranteed by such Act.

(b) MONTHLY DISPLACEMENT ALLOWANCE.—A protected employee, who has been deprived of employment or adversely affected with respect to his compensation shall be entitled to a monthly displacement allowance computed as follows:

(1) Said allowance shall be determined by computing the total compensation received by the employee, including vacation allowances and monthly compensation guarantees, and his total time paid for during the 12 full calendar months immediately preceding February 26, 1975, or in the case of a supplementary transaction, the 12 full calendar months immediately preceding the effective date of such transaction in which he performed compensated service more than 50 per centum of each of such months, based upon his normal work schedule, and by dividing separately the total compensation and the total time paid for by 12, thereby producing the average monthly compensation and average monthly time paid for; and, if an employee's compensation in his current position is less in any month in which he performs work than the aforesaid average compensation, he shall be paid the difference, less any time lost on account of voluntary absences other than vacations, but said protected employee shall be compensated in addition thereto at the rate of the position filled for any time worked in excess of his average monthly time, *Provided, however,* That—

(A) in determining compensation in his current employment the protected employee shall be treated as occupying the position, producing the highest rate of pay to which his qualifications and seniority entitle him under the applicable collective bargaining agreement and which does not require a change in residence;

(B) the said monthly displacement allowance shall be reduced by the full amount of any unemployment compensation benefits received by the protected employee and shall be reduced by an amount equivalent to any earnings of said protected employee in any employment subject to the Railroad Retirement Act and 50 per centum of any earnings in any employment not subject to the Railroad Retirement Act;

(C) a protected employee's average monthly compensation shall be adjusted from time to time thereafter to reflect subsequent general wage increases;

(D) should a protected employee's service total less than 12 months in which he performs more than 50 per centum compensated service based upon his normal work schedule in each of said months, his average monthly compensation shall be determined by dividing separately the total compensation received by the employee and the total time for which he was paid by the number of months in which he performed more than 50 per centum compensated service based upon his normal work schedule; and

(E) the monthly displacement allowance provided by this section shall in no event exceed the sum of $2,500 in any month except that such amount shall be adjusted to reflect subsequent general wage increases.

(2) A protected employee's average monthly compensation under this section shall be based upon the rate of pay applicable to his employment and shall include increases in rates of pay not in fact paid but which were provided for in national railroad labor agreements generally applicable during the period involved.

(3) If a protected employee who is entitled to a monthly displacement allowance served as an agent or a representative of a class or craft of employees on either a full- or part-time basis in the 12 months immediately preceding February 26, 1975, or the effective date of the supplemental transaction, as the case may be, his monthly displacement allowance shall be computed by taking the average of the average monthly compensation and average monthly time paid for of the protected employees immediately above and below him on the same seniority roster or his own monthly displacement allowance, whichever is greater.

(4) If a noncontract employee exercises seniority rights in a craft or class of employees protected under this Act, then, during the period such seniority is exercised, such noncontract employee shall be entitled to the same protection offered under this Act to employees in the craft or class in which such seniority is exercised. However, in computing the monthly displacement allowance, the last 12 months prior to February 26, 1975, during which such noncontract employee performed service under a collective bargaining agreement, shall be used.

(5) An employee and his representative shall be furnished with a protected employee's average monthly compensation and average monthly time paid for, computed in accordance with the terms of this subsection, together with the data upon which such computations are based, within 30 days after the protected employee notifies the Corporation in writing that he has been deprived of employment or adversely affected with respect to his compensation.

(c) DURATION OF DISPLACEMENT ALLOWANCE.—The monthly displacement allowance provided for in subsection (b) of this section shall continue until the attainment of age 65 by a protected employee with 5 or more years of service on the effective date of this Act and, in the case of a protected employee who has less than 5 years service on such date, shall continue for a period equal to his total prior years of service: *Provided*, That such monthly displacement allowance shall terminate upon the protected employee's death, retirement, resignation, or dismissal for cause; and shall be suspended for the period of disciplinary suspension for cause, failure to work due to illness or disability, voluntary furlough, or failure to retain or obtain a position available to him by the exercise of his seniority rights in accordance with the provisions of this section.

(d) TRANSFER.—(1) A protected employee who has been deprived of employment may be required by the Corporation, in inverse seniority order and upon reasonable notice, to transfer to any bona fide vacancy for which he is qualified in his same class or craft of employee on any part of the Corporation's system and shall then be governed by the collective-bargaining agreement applicable on the seniority district to which transferred. If such transfer requires a change in residence, any such protected employee may choose (A) to voluntarily furlough himself at his home location and have his monthly displacement allowance suspended during the period of voluntary furlough, or (B) to be severed from employment upon payment to him of a separation allowance computed as provided in subsections (e) and (f) of this section, which separation allowance shall be in lieu of all other benefits provided by this title.

(2) Such protected employee shall not be required to transfer to a location requiring a change in residence unless there is a bona fide need for his services at such location. Such bona fide need for services contemplates that the transfer be to a position which has not and cannot be filled by employees who are not required to make a change in residence in the seniority district involved and which, in the absence of this section, would have required the employment of a new employee.

(3) Such protected employee who, at the request of the Corporation, has once accepted and made a transfer to a location requiring a change in residence shall not be required again to so transfer for a period of 3 years.

(4) Transfers to vacancies requiring a change in residence shall be subject to the following:

(A) The vacancy shall be first offered to the junior qualified protected employee deprived of employment in the seniority district where the vacancy exists, and each such employee shall have 20 days to elect one of the options set forth in paragraph (1) of this subsection. If that employee elects not to accept the transfer, it will then be offered in inverse seniority order to the remaining qualified, protected employees deprived of employment on the seniority district, who will each have 20 days to elect one of the options set forth in paragraph (1) of this subsection.

(B) If the vacancy is not filled by the procedure in paragraph (4) (A) of this subsection, the vacancy will then be offered in the inverse order of seniority to the qualified protected employees deprived of employment on the system and each of such employees will be afforded 30 days to elect one of the options set forth in paragraph (1) of this subsection.

(C) The provisions of this paragraph shall not prevent the adoption of other procedures pursuant to an agreement made by the Corporation and representative of the class or craft of employees involved.

(e) SEPARATION ALLOWANCE.—A protected employee who is tendered and accepts an offer by the Corporation to resign and sever his employment relationship in consideration of payment to him of a separation allowance, and any protected employee whose employment relationship is severed in accordance with subsection (d) of this section, shall be entitled to receive a lump-sum separation allowance not to exceed $20,000 in lieu of all other benefits provided by this title. Said lump-sum separation allowance, in the case of a protected employee who had not less than 3 nor more than 5 years of service as of the date of this Act, shall amount to 270 days' pay at the rate of the position last held and, in the case of a protected employee having had 5 or more years' service, shall amount to the number of days' pay indicated below at the rate of the position last held dependent upon the age of the protected employee at the time of such termination of employment.

60 or under	360 days' pay
61	300 days' pay
62	240 days' pay
63	180 days' pay
64	120 days' pay.

(f) TERMINATION ALLOWANCE.—The Corporation may terminate the employment of an employee of a railroad in reorganization who has less than 3 years' service with such railroad, as of the date of enactment of this Act. The Corporation's right to terminate an employee must be exercised within a period of 1 year from the date of conveyance, pursuant to section 303 of this Act. Upon notification to the employee of the Corporation's intent to terminate his services, the employee shall have the option of accepting the termination allowance or of accepting a voluntary furlough without pay. If the employee entitled to receive a lump sum separation allowance accepts such an allowance, the amount shall be determined as follows:

2 to 3 years' service	180 days' pay at the rate of the position last held.
1 to 2 years' service	90 days' pay at the rate of the position last held.
Less than 1 year's service	5 days' pay at the rate of the position last held for each month of service.

(g) MOVING EXPENSE BENEFITS.—Any protected employee who is required to make a change of residence as the result of a transaction shall be entitled to the following benefits—

(1) Reimbursement for all expenses of moving his household and other personal effects, for the traveling expense of himself and members of his family, including living expenses for himself and his family, and for his own actual wage loss, not to exceed 10 working days. *Provided,* That the Corporation or acquiring railroad shall, to the same extent provided above, assume said expenses for any employee furloughed within 3 years after changing his point of employment as a result of a transaction, who elects to move his place of residence back to his original point of employment. No claim for reimbursement shall be paid under the provisions of this section unless such claim is presented to the Corporation or acquiring railroad within 90 days after the date on which the expenses were incurred.

(2) (A) (i) If the protected employee owns, or is under a contract to purchase, his own home in the locality from which he is required to move and elects to sell said home, he shall be reimbursed for any loss suffered in the sale of his home for less than its fair market value. In each case the fair market value of the home in question shall be determined as of a date sufficiently prior to the date of the transaction so as to be unaffected thereby. The Corporation or an acquiring railroad shall in each instance be afforded an opportunity to purchase the home at such fair market value before it is sold by the employee to any other person.

(ii) A protected employee may elect to waive the provisions of paragraph (2) (A) (i) of this subsection and to receive, in lieu thereof, an amount equal to his closing costs which are ordinarily paid for and assumed by a seller of real estate in the jurisdiction in which the residence is located. Such costs shall include a real estate commission paid to a licensed realtor (not to exceed $3,000 or 6 per centum of sale price, whichever is less), and any prepayment penalty required by the institution holding the mortgage; such costs shall not include the payment of any "points" by the seller.

(B) If the protected employee holds an unexpired lease on a dwelling occupied by him as his home, he shall be protected from all loss and cost in securing the cancellation of said lease.

(C) No claim for costs or loss shall be paid under the provisions of this paragraph unless the claim is presented to the Corporation or an acquiring railroad within 90 days after such costs or loss are incurred.

(D) Should a controversy arise with respect to the value of the home, the costs or loss sustained in its sale, the costs or loss under a contract for purchase, loss or cost in securing termination of a lease, or any other question in connection with these matters, it shall be decided through joint conference between the employee, or his representative, and the Corporation or an acquiring railroad. In the event they are unable to agree, the dispute or controversy may be referred by either party to a board of competent real estate appraisers, selected in the following manner: One to be selected by the employee or his representative and one by the Corporation or acquiring railroad and these two, if unable to agree upon a valuation within 30 days, shall endeavor by agreement within 10 days thereafter to select a third appraiser, or to agree to a method by which a third appraiser shall be selected, and, failing such agreement, either party may request the National Mediation Board to designate within 10 days a third qualified real estate appraiser whose designation will be binding upon the parties. A decision of a majority of the appraisers shall be required and said decision shall be final and conclusive. The salary and expenses of the third or neutral appraiser, including the expenses of the appraisal board, shall be borne equally by the parties to the proceedings. All other expenses shall be paid by the party incurring them, including the compensation of the appraiser selected by such party.

(h) APPLICATION OF TITLE.—Should a railroad rearrange or adjust its forces in anticipation of a transaction with the purpose or effect of depriving a protected employee of benefits to which he otherwise would have become entitled under this title, the provisions of this title will apply to such employee. Provisions of this title shall be applied, upon a conveyance or discontinuance of service, to employees who are otherwise entitled to protective benefits and who were placed in furlough status on or after February 26, 1975.

(i) NONCONTRACT EMPLOYEES.—Compensation, severance, termination, and moving expense benefits for employees not governed by a collective-bargaining agreement shall be consistent with subsections (b), (c), (e), (f), and (g) of this section and shall be in accordance with the following provisions:

(1) A protected employee, whose employment is not governed by the terms of a collective-bargaining agreement, may be required by the Corporation, upon reasonable notice, to transfer to any position on the Corporation's system. If such transfer requires a change in residence, the employee may either voluntarily suspend his employment at his home location in lieu of protective benefits, or he may sever his employment and receive a benefit computed in accordance with subsection (e) or (f) of this section. These provisions supersede all provisions or conditions in subsection (d) of this section.

(2) If any dispute arises between the Corporation and a noncontract employee regarding the interpretation or application of any provision of this title, the Corporation shall establish a resolution procedure with arbitration as the final step. Either party may request arbitration and

the cost and expenses of such arbitration shall be shared equally by the parties.

CONTRACTING OUT

Section 506. [*45 U.S.C. §776*] All work in connection with the operation or services provided by the Corporation on the rail lines, properties, equipment, or facilities acquired pursuant to the provisions of this Act and the maintenance, repair, rehabilitation, or modernization of such lines, properties, equipment, or facilities which has been performed by practice or agreement in accordance with provisions of the existing contracts in effect with the representatives of the employees of the classes or crafts involved shall continue to be performed by said Corporation's employees, including employees on furlough. Should the Corporation lack a sufficient number of employees, including employees on furlough, and be unable to hire additional employees, to perform the work required, it shall be permitted to subcontract that part of such work which cannot be performed by its employees, including those on furlough, except where agreement by the representatives of the employees of the classes or crafts involved is required by applicable collective-bargaining agreements. the term "unable to hire additional employees" as used in this section contemplates establishment and maintenance by the Corporation of an apprenticeship, training, or recruitment program to provide an adequate number of skilled employees to perform the work.

ARBITRATION

Section 507. [*45 U.S.C. § 777*] Any dispute or controversy with respect to the interpretations, application, or enforcement of the provisions of this title, except section 504(d) and those disputes or controversies provided for in subsection (g)(2)(D) of section 505 and subsection (b) of section 504 which have not been resolved within 90 days, may be submitted by either party to an Adjustment Board for a final and binding decision thereon as provided in section 3 Second, of the Railway Labor Act, in which event the burden of proof on all issues so presented shall be upon the Corporation or, where applicable, the Association.

DUTIES OF ACQUIRING AND SELLING RAILROADS

Section 508. [*45 U.S.C. § 778*] (a) ACQUIRING RAILROADS.—(1) An acquiring railroad shall offer such employment, subject to such rules and working conditions, and afford such employment protection to employees of a railroad from which it acquires properties or facilities (including operating rights) pursuant to this Act, and shall afford such protection to its own employees who are adversely affected by such acquisition, as shall be agreed upon between such acquiring railroad and the representatives of such employees prior to such acquisition, except that the protection and benefits (except as to rules and working conditions) provided for protected employees in such agreements shall be the same as those specified in section 505 of this title. Unless and until such agreements are reached, the acquiring railroad shall not enter into purchase agreements pursuant to section 206(d) (4) of this Act. For purposes of this subsection, the National Railroad Passenger Corporation shall be deemed to be an acquiring railroad, with respect to employees described in section 501(3) of this title.

(2) If the National Railroad Passenger Corporation acquires rail properties of a railroad in reorganization in the region, prior to the date of conveyance of rail properties to the Corporation pursuant to section 303(b) (1) of this Act but after the publication of the preliminary system plan, it shall offer such employment and afford such employment protection to employees of a railroad from which it acquires rail properties and shall further protect its own employees who may be adversely affected by such acquisition, as shall be agreed upon between the National Railroad Passenger Corporation and the representatives of such employees prior to such acquisitions. The protection and benefits provided for employees in such agreements shall be the same as those specified in section 505 of this title, and such protection and benefits shall supersede conflicting provisions in any previously applicable job stabilization agreements or agreements implementing such stabilization agreements, and the National Railroad Passenger Corporation shall be reimbursed for expenses incurred as a result of any such acquisition, as provided in section 509 of this title.

(b) SELLING RAILROADS.—A selling railroad shall offer such employment and shall provide such employment protection to each of its employees who are adversely affected by such sale, pursuant to agreements to be entered into between it and the representatives of such employees prior to said sale: *Provided*, That (1) the protection and benefits provided for protected employees in such agreements shall be the same as those specified in section 505 of this title, and (2) unless and until such agreements are reached, the selling railroad shall not enter into selling agreements pursuant to section 206(d) of this Act.

PAYMENT OF BENEFITS

Section 509. [*45 U.S.C. § 779*] The Corporation, the Association (where applicable), and acquiring railroads, as the case may be, shall be responsible for the actual payment of all allowances, expenses, and costs provided protected employees pursuant to the provisions of this title. The Corporation, the Association (where applicable), and acquiring railroads shall then be reimbursed for the actual amounts paid to, or for the benefit of, protected employees, pursuant to the provisions of this title, other than provisions with respect to employee pension benefits, not to exceed the aggregate sum of $250,000,000, by the Railroad Retirement Board, upon certification to such Board, by the Corporation, the Association (where applicable), and acquiring railroads, of the amounts paid such employees. Such reimbursement shall be made from a separate account maintained in the Treasury of the United States to be known as the Regional Rail Transportation Protective Account. Neither the Regional Rail Transportation Protective Account nor the Corporation nor an acquiring railroad shall be charged for any amounts of benefits paid to a protected employee under the provisions of the Railroad Unemployment Insurance Act or any other income protection law or regulation. There is authorized to be appropriated to the Regional Rail Transportation Protective Account annually such sums as may be required to meet the obligations payable hereunder, not to exceed the aggregate sum of $250,000,000. There is further authorized to be appropriated to the Railroad Retirement Board annually such sums as may be necessary to provide for additional administrative expenses to be incurred by the Board in the performance of its functions under this section.

TITLE VI—MISCELLANEOUS PROVISIONS

RELATIONSHIP TO OTHER LAWS

Section 601. [*45 U.S.C. § 791*] (a) ANTITRUST.—(1) Except as specifically provided in paragraph (2) of this subsection, no provision of this Act shall be deemed to convey to any railroad or employee or director thereof any immunity from civil or criminal liability, or to create defenses to actions, under the antitrust laws.

(2) The antitrust laws are inapplicable with respect to any action taken to formulate or implement the final system plan where such action was in compliance with the requirements of such plan and with respect to any action taken to formulate or implement any supplemental transaction.

(3) As used in this subsection, "antitrust laws" includes the Act of July 2, 1890 (ch. 647, 26 Stat. 209), as amended; the Act of October 15, 1914 (ch. 323, 38 Stat. 730), as amended; the Federal Trade Commission Act (38 Stat. 717), as amended; sections 73 and 74 of the Act of

August 27, 1894 (28 Stat. 570), as amended; the Act of June 19, 1936 (ch. 592, 49 Stat. 1526), as amended; and the antitrust laws of any State or subdivision thereof.

(b) COMMERCE, SECURITIES, AND BANKRUPTCY.—(1) The provisions of the Interstate Commerce Act (49 U.S.C. 1 et seq.) and the Bankruptcy Act (11 U.S.C. 205 et seq.) are inapplicable (A) to actions taken under this Act to formulate and implement the final system plan where such action was in compliance with the requirements of such plan, and (B) to actions taken under this Act to formulate or implement any supplemental transaction.

(2) All securities of the Corporation which are issued to the Association as the initial holder, or which are issued in connection with the transfer to the Corporation or a subsidiary thereof of rail properties under this Act, shall be deemed for all purposes to have been issued subject to and authorized pursuant to section 20a of the Interstate Commerce Act (49 U.S.C. 20a).

(3) The provisions of section 5 of the Securities Act of 1933 (15 U.S.C. 77e), shall not apply to transactions involving the issuance of any security of the Corporation to the Association, transactions involving the issuance of any security of the Corporation that is deposited with the special court pursuant to section 303(a) of this Act, or transactions involving the issuance or distribution of any security of the Corporation, where the terms and conditions of such issuance or distribution are approved by the special court pursuant to section 303(c) of this Act.

(4) The powers and duties of the Commission under section 77 of the Bankruptcy Act (11 U.S.C. 205), with respect to a railroad in reorganization in the region which conveys all or substantially all of its designated rail properties to the Corporation or a subsidiary thereof, or to profitable railroads in the region, pursuant to the final system plan, and the requirement that plans of reorganization be filed with the Commission, shall cease upon the date of such conveyance. The powers and duties of the Commission under section 77 of the Bankruptcy Act shall also so terminate, as of the date of enactment of this paragraph, with respect to any railroad in reorganization under such section 77 but not subject to this Act which (1) does not operate any line of railroad, and (2) has transferred all or substantially all of its rail properties to a railroad in reorganization in the region which was subject to this Act prior to the date of enactment of this paragraph. Thereafter, such powers and duties of the Commission shall be vested in the district court of the United States which has jurisdiction of the estate of any such railroad in reorganization at the time of such conveyance. Such court shall proceed to reorganize or liquidate such railroad in reorganization pursuant to such section 77 on such terms as the court deems just and reasonable, or pursuant to any other provisions of the Bankruptcy Act, if the

court finds that such action would be in the best interests of such estate. This paragraph does not effect any obligation of any carrier by railroad subject to regulation under the Interstate Commerce Act. The powers and duties of the Commission under section 77 of the Bankruptcy Act shall continue in effect only to the extent that the railroad in reorganization continues to operate any line of railroad.

(c) ENVIRONMENT.—The provisions of section 102(2) (C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2) (C)) shall not apply with respect to any action taken under authority of this Act before, and including, the conveyance of rail properties ordered by the special court under section 303(b) (1) of this Act, and shall not apply thereafter to any action taken in compliance with the requirements of the final system plan.

APPLICATION OF THE NATIONAL ENVIRONMENTAL POLICY ACT

Nothing in this title shall affect the application of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) to actions of the Commission. (Pub. L. 94-210, title VI, 90 Stat. 119)

(d) NORTHEAST CORRIDOR.—(1) Rail properties designated in accordance with section 206(c) (1) (C) of this Act shall be purchased or leased by the National Railroad Passenger Corporation. The Corporation shall negotiate an appropriate sale or lease agreement with the National Railroad Passenger Corporation for the properties designated for transfer pursuant to section 206(c) (1) (C) of this Act (45 U.S.C. 716(c) (1) (C)), which shall take effect on the date of conveyance of such properties to the Corporation.

(2) Properties acquired by purchase, lease, or otherwise pursuant to this subsection shall be improved in order to meet the goal set forth in section 206(a) (3) of this Act, relating to improved high-speed passenger service, by the earliest practicable date after the date of enactment of this Act.

(3) The Secretary shall begin the necessary engineering studies and improvements upon enactment.

(4) The final system plan shall provide for any necessary coordination with freight or commuter services of use of the facilities designated in section 206(c) (1) (C) of this Act. Such coordination may be effectuated through a single operating entity, designated in the final system plan, or as mutually agreed upon by the interested parties.

(5) Construction or improvements made pursuant to this subsection may be made in consultation with the Corps of Engineers.

ANNUAL EVALUATION BY THE SECRETARY

Section 602. [*45 U.S.C. § 792*] As part of his annual report each year, the Secretary shall transmit to Congress each year a comprehensive report on the effectiveness of the Association and the Corporation in implementing the purposes of this Act, together with any recommendations for additional legislative or other action.

FREIGHT RATES FOR RECYCLABLES

Section 603. [*45 U.S.C. § 793*] The Commission shall, by expedited proceedings, adopt appropriate rules under the Interstate Commerce Act (49 U.S.C. 1 et seq.) which will eliminate discrimination against the shipment of recyclable materials in rate structures and in other Commission practices where such discrimination exists.

INVESTIGATION OF DISCRIMINATORY FREIGHT RATES FOR THE TRANSPORTATION OF RECYCLABLE OR RECYCLED MATERIALS

(a) INVESTIGATION.—The Commission, within 12 months after the date of enactment of this Act, and thereafter as appropriate, shall—

(1) conduct an investigation of (A) the rate structure for the transportation, by common carriers by railroad subject to part I of the Interstate Commerce Act, of recyclable or recycled materials and competing virgin natural resource materials, and (B) the manner in which such rate structure has been affected by successive general rate increases approved by the Commission for such common carriers by railroad;

(2) determine, after a public hearing during which the burden of proof shall be upon such common carriers by railroad to show that such rate structure, as affected by rate increases applicable to the transportation of such competing materials, is just, reasonable, and nondiscriminatory, whether such rate structure is, in whole or in part, unjustly discriminatory or unreasonable;

(3) issue, in all cases in which such transportation rate structure is determined to be, in whole or in part, unjustly discriminatory or unreasonable, orders requiring the removal from such rate structure of such unreasonableness or unjust discrimination; and

(4) report to the President and the Congress, in the annual report of the Commission for each of the 3 years following the date of enactment of this Act, and in such other reports as may be appropriate, all actions commenced or completed under this section to eliminate unreasonable and unjustly discriminatory rates for the transportation of recyclable or recycled materials.

(b) PARTICIPATION.—The Administrator of the Environmental Protection Agency shall take such steps as are necessary to assure that the Commission carries out the requirements set forth in subsection (a) of this section as expeditiously as possible. Such Administrator is authorized to participate as a party in the investigation to be commenced by the Commission under such subsection (a).

(c) RESEARCH, DEVELOPMENT, AND DEMONSTRATION.—The Secretary, in cooperation with the Commission, shall establish a research, development, and demonstration program to develop and improve transport terminal operations, transport service characteristics, transport equipment, and collection and processing methods for the purpose of facilitating the competitive and efficient transportation of recyclable or recycled materials by common carriers by railroad subject to part I of the Interstate Commerce Act.

(d) REVIEW.—Orders issued by the Commission pursuant to this section shall be subject to judicial review or enforcement in the same manner as other orders issued by the Commission under the Interstate Commerce Act. In all proceedings under this section, the Commission shall comply fully with the requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.).

(e) DEFINITIONS.—As used in this section, the term—

(1) "recyclable material" means any material which has been collected or recovered from waste for a commercial or industrial use, whether or not such collection or recovery follows end usage as a product; and

(2) "virgin natural resource material" and "virgin material" mean any raw material, including previously unused metal or metal ore, woodpulp or pulpwood, textile fiber or material, or other resources which is, or which will become (through the application of technology), a source of raw material for commercial or industrial use. (Public L. 94-210, 90 Stat. 40)

SEPARABILITY

Section 604. [*45 U.S.C. § 701 Note*] If any provision of this Act or the application thereof to any person or circumstances is held invalid, the remainder of this Act and the application of such provision to other persons or circumstances shall not be affected thereby.

TAX PAYMENTS TO STATES

Section 605. [*45 U.S.C. §794*] (a) Notwithstanding any other provision of law, no railroad in reorganization shall withhold from any State, or any political subdivision thereof, the payment of the portion of any tax owed by such railroad to such State or subdivision, which portion has been collected by such railroad from any tenant thereof.

(b) Any railroad which violates the provisions of subsection (a) of this section by withholding any portion of a tax referred to in such subsection shall be fined not more than $10,000 for each such violation.

(Public Law 93-236, January 2, 1974, 87 Stat. 985, as amended by Public Law 93-488, October 26, 1974, 88 Stat. 1464; Public Law 94-5, February 28, 1975, 89 Stat. 7; Public Law 94-210, February 5, 1976, 90 Stat. 31; Public Law 94-216, February 17, 1976, 90 Stat. 191; Public Law 94-248, March 25, 1976, 90 Stat. 286)

RAILROAD REVITALIZATION AND REGULATORY REFORM ACT OF 1976

45 U.S.C. Chapter 17

TITLE I—GENERAL PROVISIONS

DECLARATION OF POLICY

Section 101. [*45 U.S.C. §801*] (a) PURPOSE.—It is the purpose of the Congress in this Act to provide the means to rehabilitate and maintain the physical facilities, improve the operations and structure, and restore the financial stability of the railway system of the United States, and to promote the revitalization of such railway system, so that this mode of transportation will remain viable in the private sector of the economy and will be able to provide energy-efficient, ecologically compatible transportation services with greater efficiency, effectiveness, and economy, through—

(1) ratemaking and regulatory reform;

(2) the encouragement of efforts to restructure the system on a more economically justified basis, including planning authority in the Secretary of Transportation, an expedited procedure for determining whether merger and consolidation applications are in the public interest, and continuing reorganization authority;

(3) financing mechanisms that will assure adequate rehabilitation and improvement of facilities and equipment, implementation of the final system plan, and implementation of the Northeast Corridor project;

(4) transitional continuation of service on light-density rail lines that are necessary to continued employment and community well-being throughout the United States;

(5) auditing, accounting, reporting, and other requirements to protect Federal funds and to assure repayment of loans and financial responsibility; and

(6) necessary studies.

(b) **POLICY.**—It is declared to be the policy of the Congress in this Act to—

(1) balance the needs of carriers, shippers, and the public;

(2) foster competition among all carriers by railroad and other modes of transportation, to promote more adequate and efficient transportation services, and to increase the attractiveness of investing in railroads and rail-service related enterprises;

(3) permit railroads greater freedom to raise or lower rates for rail services in competitive markets;

(4) promote the establishment of railroad rate structures which are more sensitive to changes in the level of seasonal, regional, and shipper demand;

(5) promote separate pricing of distinct rail and rail-related services;

(6) formulate standards and guidelines for determining adequate revenue levels for railroads; and

(7) modernize and clarify the functions of railroad rate bureaus.

DEFINITIONS

Section 102. [*45 U.S.C. §802*] As used in this Act, unless the context otherwise indicates, the term—

(1) "Association" means the United States Railway Association;

(2) "Commission" means the Interstate Commerce Commission;

(3) "Corporation" means the Consolidated Rail Corporation;

(4) "final system plan" means the final system plan and any additions thereto adopted by the Association pursuant to the Regional Rail Reorganization Act of 1973 (45 U.S.C. 701 et seq.);

(5) "includes" and variants thereof should be read as if the phrase "but is not limited to" were also set forth;

(6) "Office" means the Rail Services Planning Office of the Commission;

(7) "railroad" means a common carrier by railroad or express, as defined in section 1(3) of the Interstate Commerce Act (49 U.S.C. 1(3)), and includes the National Railroad Passenger Corporation and the Alaska Railroad; and

(8) "Secretary" means the Secretary of Transportation or his designated representative.

TITLE V—RAILROAD REHABILITATION AND IMPROVEMENT FINANCING

DEFINITIONS

Section 501. *[45 U.S.C. §821]* As used in this title, the term—

(1) "applicant" means any railroad, or other person (including a governmental entity) which submits an application to the Secretary for the guarantee of an obligation under which it is an obligor or for a commitment to guarantee such an obligation;

(2) "equipment" includes any type of new or rebuilt standard gauge locomotive, caboose, or general service railroad freight car the use of which is not limited to any specialized purpose by particular equipment, design, or other features. General service railroad freight car includes a boxcar, gondola, open-top or covered hopper car, and flatcar. The Secretary may designate other types of cars as equipment upon a written finding, with reasons therefor, that such designation is consistent with the purposes of this Act;

(3) "facilities" means—

(A) track, roadbed, and related structures, including rail, ties, ballast, other track materials, grading, tunnels, bridges, trestles, culverts, elevated structures, stations, office buildings used for operating purposes only, repair shops, enginehouses, and public improvements used or useable for rail service operations;

(B) communication and power transmission systems, including electronic, microwave, wireless, communication, and automatic data processing systems, electrical transmission systems, powerplants, power transmission systems, powerplant machinery and equipment, structures, and facilities for the transmission of electricity for use by railroads;

(C) signals, including signals and interlockers;

(D) terminal or yard facilities, including trailer-on-flatcar and container-on-flat-car terminals, express or railroad terminal and switching facilities, and services to express companies and railroads and their shippers, including ferries, tugs, carfloats, and related shoreside facilities designed for the transportation of equipment by water; or

(E) shop or repair facilities or any other property used or capable of being used in rail freight transportation services or in connection with such services or for originating, terminating, improving, and expediting the movement of equipment;

(4) "Fund" means the Railroad Rehabilitation and Improvement Fund established under section 502 of this title;

(5) "holder" means the obligee or creditor under an obligation, except that when a bank or trust company is acting as agent or trustee for such an obligee or creditor, the term refers to such bank or trust company;

(6) "obligation" means a bond, note, conditional sale agreement, equipment trust certificate, security agreement, or other obligation issued or granted to finance or refinance equipment or facilities acquisition, construction, rehabilitation, or improvement; and

(7) "obligor" means the debtor under an obligation, including the original obligor and any successor or assignee of such obligor who is approved by the Secretary.

THE RAIL FUND

Section 502 *[45 U.S.C. §822].* (a) **ESTABLISHMENT.**—There is hereby established in the Treasury of the United States the Railroad Rehabilitation and Improvement Fund. The Fund shall be administered by the Secretary, without the requirement of annual authorizations, in order (1) to secure the payment, when due, of the principal of, any redemption premium on, and any interest on, all Fund anticipation notes and Fund bonds, by a first pledge of and a lien on all revenues payable to and assets held in the Fund, and (2) to carry out the purposes, functions, and powers authorized in this title.

(b) **PURPOSE.**—The purpose of the Fund is to provide capital which is necessary to furnish financial assistance to railroads, to the extent of appropriated funds, for facilities maintenance, rehabilitation, improvements, and acquisitions, and such other financial needs as the Secretary approves, in accordance with this title.

(c) **GENERAL POWERS.**—In order to achieve the objectives and to carry out the purposes of this title, the Secretary may—

(1) issue and sell securities, including Fund anticipation notes and Fund bonds, as provided for in sections 507 and 508 of this title;

(2) make and enforce such rules and regulations, and make and perform such contracts, agreements, and commitments, as may be necessary to appropriate to carry out the purposes or provisions of this title;

(3) prescribe and impose fees and charges for services by the Secretary, pursuant to this title;

(4) settle, adjust, and compromise, and, with or without consideration or benefit to the Fund, release or waive, in whole or in part, in advance or otherwise, any claim, demand, or right of, by, or against the Secretary or the Fund;

(5) sue and be sued, complain, and defend, in any State, Federal, or other court;

(6) acquire, take, hold, own, deal with, and dispose of, any property, including carrier redeemable preference shares as provided for in section 505 (d) of this title; and

(7) determine, in accordance with appropriations, the amounts to be withdrawn from the Fund and the manner in which such withdrawals shall be effected.

(d) **ASSISTANCE FROM OTHER AGENCIES.**—The Secretary, with the consent of any department, establishment, or corporate or other instrumentality of the Federal Government, may utilize and act through any such department, establishment, or instrumentality. The Secretary may, with such consent, utilize the information, services, facilities, and personnel of any such department, establishment, or instrumentality, on a reimbursable basis. Each such department, establishment, and instrumentality is authorized to furnish any such assistance to the Secretary upon written request from the Secretary.

(e) **JURISDICTION.**—Whenever the Secretary or the Fund is a party to any civil action under this title, such action shall be deemed to arise under the laws of the United States. The district courts of the United States shall have original and removal jurisdiction of any action in which the Secretary or the Fund is a party, without regard to the amount in controversy. No attachment or execution may be issued against the Secretary, the Fund, or any property thereof prior to the entry of final judgment to such effect in any State, Federal, or other court.

(f) **CONTENTS OF FUND.**—There shall be deposited in the Fund, subject to utilization pursuant to subsection (i) of this section—

(1) funds received by the Secretary for deposit in the Fund, representing the proceeds from the issuance and sale by the Secretary to the Secretary of the Treasury of Fund anticipation notes, as provided in section 507 of this title;

(2) funds as may be hereafter appropriated to the Fund, following the submission to the Congress of the Secretary's report, under section 504 of this title, with respect to the perceived needs of the rail industry for facilities rehabilitation and improvement, projected cash shortfalls with-

in the rail industry, and the scope and sources of long-term public sector funding for the Fund;

(3) funds received by the Secretary for deposit in the Fund, representing the proceeds from the issuance and sale of Fund bonds, as provided in section 508 of this title;

(4) redeemable preference shares issued by a railroad and purchased by the Secretary on behalf of the Fund and funds received by the Fund representing dividends and redemption payments on such shares, as provided in sections 505(d) and 506(a) and (b) of this title;

(5) income and gains realized by the Fund from any investment of excess funds, pursuant to subsection (g) of this section, and the obligations or securities comprising such investments; and

(6) any other receipts of the Fund.

(g) **EXCESS FUNDS INVESTMENT.**—If the Secretary determines that the amount of money in the Fund exceeds the amount required for current needs, the Secretary may, subject to sections 508(g) and (h) of this title, direct the Secretary of the Treasury to invest such amounts as the Secretary deems advisable, for such periods as the Secretary directs, in obligations of, or obligations guaranteed by, the Government of the United States, or in such other governmental or agency obligations or other securities of the United States as the Secretary of the Treasury deems appropriate.

(h) **DEPOSITORY.**—The Secretary may deposit moneys of the Fund with any Federal Reserve bank, any depository for public funds, or in such other places and in such manner as the Secretary of the Treasury deems appropriate.

(i) **USES.**—Moneys in the Fund shall be utilized—

(1) to provide financial assistance to railroads for facilities maintenance, rehabilitation, improvement, and acquisition projects, and for such other financial needs as may be approved by the Secretary pursuant to section 505 of this title,

(2) to effect the payment, when due, of the principal of, and any interest on, Fund anticipation notes and Fund bonds issued by the Secretary pursuant to sections 507 and 508 of this title,

(3) to redeem, as contemplated by section 507(c) and section 508(g) of this title, Fund anticipation notes and Fund bonds,

(4) in such amounts as are provided in appropriation acts, to make payment of all expenses incurred by the Secretary in carrying out his duties with respect to the Fund, and

(5) to make transfers to the general fund of the Treasury.

CLASSIFICATION AND DESIGNATION OF RAIL LINES

Section 503. *[45 U.S.C. §823]* (a) **TRAFFIC DENSITY ANALYSIS.**—Within 90 days after the date of enactment of this Act, each railroad designated by the Commission as a class I railroad shall prepare and submit to the Secretary a full and complete analysis of the rail system operated by it. Such analysis shall indicate the traffic density for the preceding 5 calendar years on each of the main and branch rail lines of the railroad submitting such analysis. The requirements of the two preceding sentences shall not apply to any railroad subject to reorganization pursuant to the Regional Rail Reorganization Act of 1973.

(b) **PRELIMINARY STANDARDS AND DESIGNATIONS.**—Within 180 days after the date of enactment of this Act, the Secretary shall develop and publish—

(1) the preliminary standards for classification, in at least 3 categories, of main and branch rail lines according to the degree to which they are essential to the rail transportation system; and

(2) the preliminary designations with respect to each main and branch rail line, in accordance with such standards for classification.

The classification of rail lines for purposes of this subsection shall be based on the level of usage measured in gross-ton-miles, the contribution to the economic viability of the railroad which controls such lines, and the contribution of such lines to the probable economic viability of any other railroads which participate in the traffic originating on such lines. In determining "level of usage" and "probable economic viability", for purposes of such classification, the Secretary shall take into account operational service and other appropriate factors, and he may make reasonable allowance for differences in operation among individual railroads or groups of railroads.

(c) **PUBLIC HEARINGS.**—Commencing 30 days after the date of publication of the standards and designations required under subsection (b) of this section, the Office shall conduct public hearings, at representative locations, to solicit comments and receive views on the preliminary standards for classification and on the preliminary designations. The Office shall give notice of the date, time, and place of each such hearing, and such notices shall be designed and placed in such manner that all interested parties will have a full and fair opportunity to be heard.

(d) **REPORT by OFFICE.**—Within 120 days after the date of publication of the standards and designations required under subsection (b) of this section, the Office shall submit a report to the Secretary containing its conclusions and recommendations with respect to such preliminary standards for classification and such preliminary designations. This report shall be based on the record which was developed by the Office during the hearings under subsection (c) of this section, as supplemented by such studies as may be undertaken by the Office.

(e) **FINAL STANDARDS and DESIGNATIONS.**—Within 60 days after the date of receipt of the report required under subsection (d) of this section, the Secretary, with the cooperation and assistance of the Office, shall, after giving due consideration to such report, prepare and publish—

(1) the final standards for classification of main and branch rail lines; and

(2) the final designations with respect to each main and branch rail line, in accordance with such standards for classification, including findings to support any material change which is made in a final designation from the corresponding preliminary designation.

CAPITAL NEEDS STUDY

Section 504. *[45 U.S.C. §824]* (a) **DEFERRED MAINTENANCE STATEMENT.**—Within 180 days after the date of enactment of this Act, each railroad designated by the Commission as a class I railroad (other than a railroad subject to reorganization pursuant to the Regional Rail Reorganization Act of 1973) shall prepare and submit to the Secretary a full and complete statement (1) of such railroad's deferred maintenance and delayed capital expenditures, as of December 31, 1975, and (2) of the projected amounts of appropriate maintenance to be performed and capital expenditures to be made for such railroad's facilities, during each of the years from 1976 through 1985. Each railroad shall submit such additional information as may be required from it by the Secretary, in connection with his duties under section 503 of this title or under this section, prior to July 1, 1977, including the projected sources of and uses for the funds required by such railroad for such projected program.

(b) **PRELIMINARY FINANCING RECOMMENDATIONS.**—Within 360 days after the date of enactment of this Act, the Secretary, after giving due consideration to (1) the final designations under section 503(e) of this title, (2) the information furnished under subsection (a) of this section, and (3) any other relevant information, shall develop, publish, and transmit—

(A) to the Congress, preliminary recommendations as to the amount and type of carrier equity and other financing to be effected through the Fund, or through any other funding mechanism, recommended by the Secretary, based upon his view of the rail industry's facilities rehabilitation and improvement needs, as projected through December 31, 1985; and

(B) to the Congress and to the Secretary of the Treasury, preliminary recommendations as to the means by which the Federal share, if any, of such equity and other financing should be provided.

In preparing such recommendations, the Secretary shall specifically consider and evaluate the public benefits and costs which would result from public ownership of railroad rights-of-way,

(c) EVALUATION.—Within 90 days after the date of publication of the Secretary's preliminary recommendations under subsection (b) of this section, the Secretary of the Treasury shall publish and transmit to the Secretary and to the Congress his evaluation thereof and any recommendations with respect to the matters referred to in subsection (b)(3)(B) of this section.

(d) FINAL RECOMMENDATIONS.—Within 90 days after the date of receipt of the evaluation, transmitted under subsection (c) of this section, the Secretary shall, after giving due consideration to such recommendations, prepare and transmit to the Congress his final recommendations with respect to the matters referred to in subsection (b) of this section.

REHABILITATION AND IMPROVEMENT FINANCING

Section 505. *[45 U.S.C. §825]* (a) **TIMING.**—Any railroad may apply to the Secretary following the date of enactment of this Act, in accordance with regulations promulgated by the Secretary—

(1) for such financial assistance as may be approved by the Secretary; and

(2) for financial assistance for facilities rehabilitation and improvement financing, except that the Secretary shall not act finally on any such application until the date of publication of the final standards and designations under section 503(e) of this title.

(b) APPLICATION and DETERMINATION.—(1) Each application for facilities rehabilitation and improvement financing shall set forth—

(A) a description of the proposed facilities rehabilitation and improvement project for which such railroad is seeking financial assistance, and of the current physical condition of such facilities;

(B) the classification of each main and branch rail line included in such project, as determined in accordance with the final standards and designations under section 503(e) of this title;

(C) the track standard under which each such line has been and is being operated and the reasons therefor, and the safety standards and signal requirements necessary under such standard to prevent loss of life and serious accident or injury at grade crossings;

(D) the track standard necessary, in the judgment of such railroad, to provide reliable and competitive freight service (and passenger service, where applicable) over each such line, together with such railroad's recommendations as to (i) the most economical method of improving the physical condition of each such line to meet such track standard, (ii) the cost of providing adequate safety standards and signals, and (iii) an economic analysis of the cost of such improvements in condition and in safety standards and signals;

(E) such railroad's estimate as to the cost of labor and materials, and the date of completion, and its opinion as to the priority to be accorded such portions of the proposed project as are reasonably divisible;

(F) the amount and kind of Federal financial assistance required by such railroad in order to complete the proposed project; and

(G) such other information as the Secretary shall by regulation require to assist him in evaluating such application in accordance with this section or for carrying out the purposes of this title.

(2) The Secretary shall act upon each such application within 6 months after the date on which all required information is received, except as otherwise provided in subsection (a)(2) of this section. The Secretary may approve any such application if he determines that providing the requested financial assistance is in the public interest. When making such a determination, the Secretary shall consider (A) the availability of funds from other sources at a cost which is reasonable under principles of prudent railroad financial management in light of the railroad's projected rate of return for the project to be financed, (B) the interest of the public in supplementing such other funds as may be available in order to increase the total amount of funds available for railroad financing, and (C) the public benefits to be realized from the project to be financed in relation to the public costs of such financing and whether the proposed project will return public benefits sufficient to justify such public costs. The Secretary, in granting financial assistance to any applicant, shall assign the highest priority, among applications for assistance which would return equal public benefits, to applications for assistance for providing safety improvements and signals, including underpasses or overpasses at railroad crossings at which injury or loss of life has frequently occurred or is likely to occur.

(c) **FINANCING AGREEMENT.**—Upon the approval of an application for financial assistance under this section, the Secretary shall promptly enter into an agreement with such railroad to provide financing in such amounts and at such times as is sufficient, in the judgment of the Secretary, to meet the reasonable cost, in whole or in part, of the facilities rehabilitation and improvement project which has been approved, in whole or in part. Each such agreement shall include such terms and conditions as are necessary or appropriate, in the judgment of the Secretary, to assure that the financing will be used only in the manner, and for the purposes, approved by the Secretary.

(d) **AUTHORIZATION.**—(1) In the case of a railroad other than a railroad in reorganization under section 77 of the Bankruptcy Act, financing pursuant to this section shall be in the form of purchase by the Secretary of redeemable preference shares at par. Such shares shall be specifically issued for such purpose in accordance with the terms and conditions set forth in section 506 of this title.

(2)(A) In the case of a railroad in reorganization under section 77 of the Bankruptcy Act, the Secretary, in order to provide financing pursuant to this section, may agree to purchase redeemable preference shares of such railroad at par as part of a plan of reorganization of such railroad approved by the court having jurisdiction over the reorganization of such railroad. Such shares shall be specifically issued in accordance with the terms and conditions set forth in section 506 of this title.

(B) The Secretary, in order to provide financing pursuant to this section, may also purchase certificates issued under section 77 (c) (3) of the Bankruptcy Act by a trustee of a railroad in reorganization and approved by the reorganization court, under such terms and conditions as may be approved by the Secretary and the reorganization court. In purchasing such trustee certificates or at any time thereafter, the Secretary may agree with the trustee of such railroad in reorganization, subject to the approval of the reorganization court, to exchange such certificates for redeemable preference shares issued, in accordance with the terms and conditions set forth in section 506 of this title, in connection with a plan of reorganization approved by the reorganization court. No certificate shall be purchased under this section unless and until the Secretary makes a finding in writing that—

(i) such certificates cannot otherwise be sold at a reasonable rate of interest;

(ii) the project to be financed can reasonably be expected to be maintained as part of a financially self-sustaining railroad system; and

(iii) the probable value of the assets of the railroad in the event of liquidation provides reasonable protection to the United States.

(3) The total par value of the redeemable preference shares and the amount of trustee certificates which the Secretary may purchase from the proceeds received from the issuance and sale of Fund anticipation notes shall not exceed $600,000,000. Not more than $100,000,000 of such proceeds may be used to purchase trustee certificates.

(e) **FUTURE PURCHASES of REDEEMABLE PREFERENCE SHARES.**—The total par value of the redeemable preference shares which the Secretary may purchase under this title after September 30, 1978, shall be determined by the Congress following the receipt by the Congress of the Secretary's recommendations as to the scope and sources of funding of the Fund or any recommended alternative financing mechanism, as submitted pursuant to section 504 of this title, except that—

(1) the amount of the Secretary's investment in redeemable preference shares in any fiscal year (out of proceeds other than those derived through the issuance and sale of Fund anticipation notes) shall not, when added to the amount of his prior investment in such shares, exceed 200 percent of the aggregate principal amount of the Fund bonds which (A) have been issued by the Secretary prior to such fiscal year,

and (B) are projected to be issued by the Secretary through the end of such fiscal year; and

(2) neither redemptions of Fund bonds nor their payment at scheduled maturity shall have any bearing on the limitation in paragraph (1) of this subsection.

REDEEMABLE PREFERENCE SHARES

Section 506. *[45 U.S.C. §826]* (a) **CHARACTERISTICS.**—The redeemable preference shares acquired by the Secretary pursuant to section 505(d) of this title are securities which are issued by a railroad for the purpose of obtaining financing under this title. Each such redeemable preference share—

(1) shall be nonvoting and shall have a par value of $10,000;

(2) shall be senior in right (i) to all common stock of the issuing railroad, whenever issued, (ii) to any previously issued preferred stock where such seniority does not mitigate any rights of the holders of such stock accorded by the terms and conditions of such stock, and (iii) to any subsequently issued preferred stock, with respect to dividend and redemption payments and in case of liquidation or dissolution of such railroad, but shall be otherwise subordinate in such matters to any of such railroad's previously issued and outstanding securities which rank ahead of its common stock and shall be subordinate to all securities other than common stock received in exchange as a part of a court approved reorganization plan under section 77 of the Bankruptcy Act (11 U.S.C. 205) approved after the date of enactment of this sentence for previously incurred senior debt or previously issued and outstanding securities which ranked ahead of its common stock;

(3) shall accrue dividends, commencing on the 10th anniversary date of the date of its original issuance, at such rate as shall be fixed by the Secretary for each issuance prior to the issuance thereof and which, when added to the amount of the mandatory redemption payments under subparagraph (4) of this paragraph, shall return to the Fund not less than 150 percent of the aggregate par value thereof, over the scheduled life of the issue and in annual payments which shall be as nearly equal as practicable; and

(4) shall be subject to mandatory redemption, at par, commencing not earlier than the 6th and not later than the 11th (as determined by the Secretary for each issuance) anniversary date of the date of its original issuance, in annual amounts which shall, over the period ending (as determined by the Secretary for each issuance) not later than the 30th anniversary date of the date of its original issuance, aggregate the total par value of such share.

(b) **DEPOSIT.**—All redeemable preference shares which are acquired by the Secretary pursuant to section 505(d) of this title shall, upon such acquisition, be deposited in the Fund.

(c) **OVERDUE PAYMENTS.**—Whenever any dividend or redemption payment which is due on redeemable preference shares issued by any railroad remains unpaid for a period of 4 months, the Secretary shall be entitled to appoint two members to the Board of Directors of such railroad. The term of office of such members shall not extend beyond the period during which such dividend or redemption payments remains unpaid.

FUND ANTICIPATION NOTES

Section 507. *[45 U.S.C. §827]* (a) **GENERAL.**—The Secretary shall, until September 30, 1978, issue and sell, and the Secretary of the Treasury until such date shall, to the extent of appropriated funds, purchase Fund anticipation notes in an aggregate principal amount of not more than $600,000,000, in order to provide financial assistance to railroads for such financing needs as the Secretary approves.

(b) **TERMS of ISSUE.**—Fund anticipation notes shall be issued in denominations of $100,000 (or any integral multiple thereof), upon such terms and conditions, with such maturities, such rates of interest, if any, and such redemption premiums, if any, as the Secretary in his sole discretion may determine. The date of maturity of each Fund anticipation note may not exceed 7 years from the date of its issuance.

(c) **REDEMPTION.**—If the Congress, following its receipt of the recommendations of the Secretary pursuant to section 504(d) of this title (with respect to the amount of facilities rehabilitation and improvement financing which should be effected through the Fund and the method of long-term public sector funding therefor) authorizes the issuance ofFund bonds, the Secretary shall redeem the Fund anticipation notes then outstanding, in such manner, and over such period of time, as the Secretary shall determine, from the proceeds of the sale of such Fund bonds and from other public sector moneys as have been appropriated to the Fund.

(d) **REMITTANCE and TERMINATION.**—If the Congress does not, on or before September 30, 1978, enact legislation of the type referred to in subsection (c) of this section, the Secretary shall hold in trust all redeemable preference shares issued by railroads which are held in the Fund, and the Fund shall thereupon terminate.

FUND BONDS

Section 508. *[45 U.S.C. §828]* (a) **ISSUANCE.**—The Secretary may, following enactment of the legislation referred to in section 507(c) of this title, issue Fund bonds in denominations of $100,000 (or any integral multiple thereof), in such total amounts as may be authorized by the Congress. No fund bonds—

(1) shall be issued which mature in less than 8, or more than 15, years from the date of original issuance thereof;

(2) shall be issued later than the 10th anniversary of the date of publication of the final standards and designations under section 503(e) of this title; and

(3) shall, except as otherwise provided pursuant to subsections (d)(6) and (g) of this section, be subject to redemption (at the option of the Secretary) (A) at any time prior to the 10th anniversary of the date of original issuance thereof, and (B) at any time thereafter.

(b) **PLEDGE and LIEN.**—The Secretary, subject to sections 502(g) and 508(g) of this title, shall impose a first pledge of, and a first lien on, all revenues payable to, and assets held in, the Fund, and appropriated for the use of the Secretary pursuant to this title. The Secretary may impose such a pledge of and lien on all other revenues or property of the Fund. The purpose of any such pledge and lien shall be to secure the payment, when due, of the principal of, any redemption premiums on, and any interest on, all Fund anticipation notes and Fund bonds, and for other purposes incidental thereto. Such incidental purposes may include the creation of reserve and other funds which may be similarly pledged and used, to such extent and in such manner as the Secretary deems necessary or desirable. Any pledge made by the Secretary shall be valid and binding from the time it is made. The revenues and assets held in the Fund, and the revenues or property of the Fund which are so pledged and which are subsequently received by the Fund, shall immediately be subject to the lien of such pledge without any physical delivery thereof or any further act. The lien of any such pledge shall be valid and binding as against all parties having claims of any kind, in tort, contract, or otherwise, against the Secretary or the Fund, without regard to whether such parties have notice thereof. No instrument by which a pledge is created need be recorded or filed to protect such pledge.

(c) **ENHANCEMENT of MARKETABILITY.**—The Secretary may enter into binding covenants with the holders of Fund bonds, and with the trustee, if any, under any agreement entered into in connection with the issuance of such bonds with respect to (1) the establishment of reserves, and other funds; (2) stipulations concerning the subsequent issuance of obligations; and (3) such other matters as the Secretary deems necessary or desirable to enhance the marketability of Fund bonds.

(d) **SPECIFIC DETERMINATIONS.**—Subject to subsection (a) of this section, the Secretary may determine, with respect to Fund bonds—

(1) the form and denominations in which they shall be issued;

(2) the time when they shall be sold, and in what amounts;

(3) the time when they shall mature;

(4) the price thereof at sale;

(5) the rate of interest thereon;

(6) whether, and in what manner, they may be redeemed prior to the date when they mature; and

(7) whether they shall be negotiable or nonnegotiable and whether they shall be bearer or registered instruments, and any indentures or covenants relating thereto.

(e) CHARACTERISTICS.—Fund bonds issued by the Secretary under this section shall—

(1) contain a recital that they are issued under this section, which shall be conclusive evidence as to the validity and regularity of issuance and sale of such Fund bombs;

(2) be subject to such other terms and conditions as the Secretary may, by the resolution authorizing their issuance, determine;

(3) be lawful investments and may be accepted as security for all fiduciary, trust, and public funds, the investment or deposit of which shall be under the authority or control of any officer or agency of the United States;

(4) not be exempted from Federal, State, and local taxation; and

(5) not be debts or enforceable general obligations of, nor shall payment of the principal thereof or interest thereon be guaranteed by, the United States. Neither the full faith and credit, nor the general taxing power, of the Federal Government shall be pledged to the payment of the principal of, any premium on, or interest on, such Fund bonds.

(f) NO PERSONAL LIABILITY.—Neither the Secretary, nor any other individual, who executes any Fund anticipation notes or Fund bonds, shall be subject to any personal liability or accountability by reason of the issuance of any such notes or bonds.

(g) REDEMPTION and TRANSFER.—If, after the 10th anniversary date of the original issuance of the initial series of Fund bonds, the amount in the Fund, exclusive of the value of any redeemable preference shares held by the Fund, exceeds 250 percent of the amount required to satisfy amounts due in the succeeding fiscal year on account of Fund bonds, the Secretary may use such excess to redeem Fund bonds in accordance with their terms or may withdraw all or part of such excess from the Fund and transfer it to the general fund of the United States. When all Fund bonds have been redeemed, all amounts remaining in the Fund or thereafter accruing to it shall be transferred to the general fund of the United States, except to the extent necessary to cover such expenses of the Fund as may be required to carry on and complete any remaining responsibilities.

(h) PURCHASE by SECRETARY.—The Secretary, subject to such agreements with holders of Fund bonds as may then exist, is authorized (out of any funds available) to purchase Fund anticipation notes or Fund bonds. Upon any such purchase, such bonds and notes shall be canceled.

AUTHORIZATIONS

Section 509. *[45 U.S.C. §829]* There is authorized to be appropriated to the Secretary of the Treasury for the purposes of the Fund not to exceed $600,000,000 and the Secretary of the Treasury is authorized and directed to purchase, from time to time, prior to September 30, 1978, from the Secretary, out of such moneys in the Treasury as are appropriated under this sentence, Fund anticipation notes in such aggregate principal amounts, subject to the foregoing limitation, as the Secretary may so offer for sale. No money in the Fund, regardless of source, shall be obligated, expended, or otherwise committed to any prupose from the Fund prior to or after September 30, 1978, without prior approval thereof in an annual appropriations Act. The Fund shall not qualify as one of the exceptions provided in section 401(d) of the Congressional Budget and Impoundment Control Act of 1974 (31 U.S.C. 1351(d)).

EXEMPTION

Section 510. *[45 U.S.C. §830]* Neither the provisions of section 20a of the Interstate Commerce Act (49 U.S.C. 20a), nor the registration and prospectus delivery requirements of the Securities Act of 1933, nor the provisions of the securities laws of any State, shall be applicable to the issuance and sale of redeemable preference shares by railroads under this title.

GUARANTEE OF OBLIGATIONS

Section 511. *[45 U.S.C. §831]* (a) **GENERAL.**—The Secretary may, in accordance with the provisions of this section, guarantee and make commitments to guarantee the payment of the principal balance of, and any interest on, an obligation of an applicant prior to, on, or after the date of execution or the date of disbursement of such obligation, if the proceeds of such obligation shall be or have been used to acquire or to rehabilitate and improve facilities or equipment. Each guarantee of such an obligation shall be made in accordance with the provisions of sections 511 through 513 of this title and such rules as the Secretary may prescribe to protect reasonably the interest of the United States. Each application for the guarantee of such an obligation or for a commitment to guarantee such an obligation shall be made in writing to the Secretary [illegible] such form and with such content as the Secretary prescribes. Such application shall be granted, in whole or in part, if the Secretary determines that the proposed, negotiated, or executed obligation is eligible for such guarantee. Each such guarantee or commitment to guarantee shall be extended in such form, under such terms and conditions, and pursuant to such regulations as the Secretary deems appropriate, consistent with the purposes of this title. Such a guarantee or commitment to guarantee shall inure to the benefit of the holder of the obligation to which such guarantee or commitment to guarantee applies.

(b) **FUND.**—An obligation guarantee fund shall be established and administered by the Secretary as a revolving fund to carry out the provisions of sections 511 through 513 of this title. Moneys in the obligation guarantee fund shall be deposited in the Treasury of the United States to the credit of such fund or invested in bonds or other obligations of the United States approved by the Secretary of the Treasury.

(c) **VALUATION.**—Before granting any application for a guarantee or a commitment to guarantee any obligation, the Secretary shall make a determination of the value of the facilities or equipment which are or will be financed or refinanced by such obligation. Such determination of value shall be conclusive and not subject to review in any court.

(d) **MODIFICATIONS.**—The Secretary may approve any modification of any provision of a guarantee, or of a commitment to guarantee an obligation, including the rate of interest, time of payment of interest or principal, security, or any other terms and conditions, if the Secretary makes a finding in writing that such modification is equitable and is in the overall best interests of the United States under this title, and that the holder of such obligation consents to such modification.

(e) **EXTENT OF AUTHORITY.**—(1) The aggregate unpaid principal amounts of obligations which may be guaranteed by the Secretary under this section shall not exceed $1,000,000,000 at any one time, of which not to exceed $150,000,000 may be guaranteed for the purposes described in paragraph (2) of this subsection.

(2) Obligations may be guaranteed for the purpose of improving rail properties designated in the final system plan pursuant to section 206(c)(1)(C) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 716(c)(1)(C)), if the proceeds of such obligations shall be or have been used to acquire or rehabilitate and improve facilities or equipment in a manner that returns the most public benefits for the costs involved.

(f) **RATE of INTEREST.**—The rate of interest (exclusive of premium charges for a guarantee and service fees) which shall be paid on the unpaid principal balance of each obligation guaranteed by the Secretary under this section, shall not exceed an annual percentage rate which the Secretary determines to be reasonable, taking into consideration the prevailing interest rates for similar obligations in the private market.

(g) NOTICE.—Upon receipt of an application for the guarantee of an obligation under this section, the Secretary shall cause a notice of such application to be published in the Federal Register and shall invite and afford interested persons an opportunity to submit comments on such application.

(h) PREREQUISITES for GUARANTEES.—No obligation shall be guaranteed and no commitment shall be made to guarantee any obligation under this section, unless and until the Secretary makes a finding in writing that—

(1) an obligation for equipment acquisition, rehabilitation, or improvement is secured by the particular equipment which is to be financed or refinanced by such obligation;

(2) payment of the obligation is required by its terms to be made within 25 years from the date of its execution;

(3) the financing or refinancing is justified by the present and probable future demand for rail services to be rendered by the applicant and will serve to meet demonstrable needs for rail services and to provide shippers with improved service;

(4) the applicant has given reasonable assurances that the facilities or equipment to be acquired, rehabilitated, or improved with the proceeds of the obligation will be economically and efficiently utilized;

(5) the probable value of any equipment or facilities to be improved, rehabilitated, or acquired is sufficient to provide the United States with reasonable security and protection in the event of default by the obligor, in the case of repossession by the holder of the obligation or in the case of possession or purchase by the Secretary; and

(6) the transaction will result in an improvement in the ability of any affected railroad to transport passengers or freight.

(i) GENERAL REQUIREMENT.—The recipients of any guarantees of, or of any commitments to guarantee, an obligation under this section, shall consistent with their capital resources, maintain their facilities, on a continuing basis, in accordance with standards promulgated under this subsection. The Secretary shall assure compliance with this requirement by regular periodic inspection.

(j) CONDITIONS of GUARANTEES.—No guarantee of, and no commitment to guarantee, an obligation may be granted, approved, or extended under this section, unless the obligor first agrees in writing that so long as any principal or interest is due and payable on such obligation—

(1) there will be no increase in discretionary dividend payments over the average ratio which such payments bore to earnings for the applicable fiscal period during the 5 years preceding such proposed increase, without prior approval of such increase by the Secretary;

(2) the obligor will not use assets or revenues (other than cash) related to or derived from railroad operations in nonrailroad enterprises, without prior approval in writing from the Secretary; and

(3) the obligor will take all reasonable and practicable steps possible, in accordance with such guidelines as may be established by the Secretary, to improve the equitable distribution and efficient and expeditious use of all equipment and facilities in order to improve rail service.

Approval under paragraph (1) or (2) of this subsection may only be granted if, after a public hearing with an opportunity for interested persons to submit comments, the Secretary makes a written finding that such increase in dividends (or such use of assets or revenues) will not materially affect the ability of the obligor to comply with the requirements of this section.

(k) **BREACH of CONDITIONS.**—The Attorney General shall commence a civil action in any appropriate district court of the United States to enjoin any activity which the Secretary finds is in violation of any requirement or condition specified in subsection (i) or (j) of this section, and to secure any other appropriate relief, including termination, suspension, and punitive damages.

(l) **INVESTIGATION CHARGE.**—The Secretary shall charge and collect from each applicant such amounts as he deems reasonable for the investigation of any application submitted under this section, for appraisal of the value of the equipment or facilities involved, and for making the necessary determinations and findings. Such charges shall not aggregate more than one-half of 1 percent of the principal amount of the obligation with respect to which the applicant seeks a guarantee or commitment to guarantee.

(m) **PREMIUM CHARGE.**—The Secretary shall assess and collect from the obligor an annual premium charge on each obligation guaranteed under this section. The amount of such premium may not exceed an annual rate of 1 percent on the unpaid principal balance of such obligation at the time payment is due. Payment is due initially when the obligation is guaranteed by the Secretary, and thereafter, on the anniversary date of such guarantee.

(n) **ADMINISTRATIVE COSTS.**—All moneys received by the Secretary under this section shall be deposited in the obligation guarantee fund, and to the extent provided in appropriation acts, may be used by the Secretary to pay administrative costs and expenses incurred by him pursuant to this section.

ISSUANCE OF NOTES OR OBLIGATIONS

Section 512. *[45 U.S.C. §832]* (a) **AUTHORIZATION.**—The Secretary may issue, in such amounts as are provided in appropriation acts, notes or other obligations to the Secretary of the Treasury, in such forms and denominations, bearing such maturities, and subject to such terms and conditions as the Secretary may prescribe. Such obligations may be issued whenever the moneys in the obligation guarantee fund are not sufficient to pay any amount which the Secretary is required to pay under section 513 of this title. Such obligations shall bear interest at a rate to be determined by the Secretary of the Treasury on the basis of the current average market yield on outstanding marketable obligations of the United States on comparable maturities during the month preceding the issuance of such obligations. The Secretary of the Treasury shall purchase any such obligations, and for such purpose he may use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as now or hereafter in force. The purposes for which securities may be issued under such Act are extended to include any purchase of notes or other obligations issued under this subsection. The Secretary of the Treasury may sell any such obligations at such times and price and upon such terms and conditions as he shall determine in his discretion. All purchases, redemptions, and sales of such obligations by such Secretary shall be treated as public debt transactions of the United States. Moneys obtained under this subsection shall be deposited in the obligation guarantee fund, and redemptions of any such obligations shall be made by the Secretary from such fund.

(b) **VALIDITY.**—No guarantee or commitment to guarantee under section 511 of this title may be terminated, suspended, canceled, or otherwise revoked, except in accordance with lawful terms and conditions prescribed by the Secretary. Such a guarantee or commitment shall be conclusive evidence that the underlying obligation is in compliance with the provisions of such sections of this title, and that such obligation has been approved and is legal as to principal, interest, and other terms. Such a guarantee or commitment to guarantee shall be valid and incontestable in the hands of the holder thereof, as of the date when the Secretary granted the application therefor, except as to fraud or material misrepresentation by such holder.

(c) **DEFINITION.**—As used in this section, the term "Secretary of the Treasury" includes any designated representative of such Secretary.

DEFAULT ON GUARANTEED OBLIGATIONS

Section 513. *[45 U.S.C. §833]* (a) **GENERAL.**—If there is a default by the obligor in any payment of principal or interest due under an obligation guaranteed under section 511 of this title, and if such default continues for 30 days, the holder of such obligation or his agent has the right to demand payment by the Secretary of the unpaid interest on, and the unpaid principal of, such obligation consistent with the terms of the guarantee of such obligation. Such payment may be demanded after or before the expiration of such period as may be specified in the guarantee or related agreements, but not later than 90 days from the date of such default. Within such specified period, but not later than 60 days from the date of such demand, the Secretary shall pay to such holder the unpaid interest on, and the unpaid principal of, such obligation, consistent with the terms of the guarantee of such obligation, except that (1) the Secretary shall not be required to make any such payment if he finds prior to the expiration of such period, that there was no default by the obligor in the payment of interest or principal or that such default has been remedied, and (2) no such holder shall receive payment or be entitled to retain payment in a total amount which, together with an other recovery (including any recovery based upon a security interest in equipment or facilities) exceeds the actual loss of such holder.

(b) RIGHTS of the SECRETARY.—(1) If the Secretary makes payment to a holder under subsection (a) of this section, the Secretary shall thereupon—

(A) have all of the rights granted to him by law or agreement with the obligor; and

(B) be subrogated to all of the rights which were granted such holder, by law, assignment, or security agreement between such holder and the obligor.

(2) The Secretary may, in his discretion, complete, recondition, reconstruct, renovate, repair, maintain, operate, charter, rent, sell, or otherwise dispose of any property or other interests obtained by him pursuant to this section. The terms of any such sale or other disposition shall be as approved bv the Secretary.

(c) FORM of PAYMENT.—Any amount required to be paid by the Secretary pursuant to subsection (a) of this section shall be paid in cash.

(d) ACTION AGAINST OBLIGOR.—If there is a default by the obligor in any payment due under an obligation guaranteed under section 511 of this title, the Secretary shall take such action against such obligor or any other person as is, in his discretion, necessary or appropriate to protect the interests of the United States. Such an action may be brought in the name of the United States or in the name of the holder of such obligation. Such holder shall make available to the Secretary all records and evidence necessary to prosecute any such suit. The Secretary may, in his discretion, accept a conveyance of property in full or partial satisfaction of any sums owed to him. If the Secretary receives, through the sale of property, an amount greater than his cost and the amount paid to the holder under subsection (a) of this section, he shall pay such excess to the obligor.

AUDIT OF TRANSACTIONS

Section 514. *[45 U.S.C. §834]* **(a) GENERAL.**—The Comptroller General of the United States is authorized to audit the operations of the Fund and of the obligation guarantee fund in accordance with such rules and regulations as he may prescribe. Any such audit shall be conducted at the place or places where accounts of the Fund or of the obligation guarantee fund are normally kept. The representatives of the Comptroller General shall have access to all books, accounts, records, reports, files, and other papers, things, or property belonging to, or in use by or in connection with the Fund, the obligation guarantee fund, or the Secretary which pertain to the financial transactions of the Fund or the obligation guarantee fund and which are necessary to facilitate an audit. Such representatives shall be afforded full facilities for verifying transactions with the balances of securities held by depositories, fiscal agents, and custodians. All such books, accounts, records, reports, files, papers, things, and property shall remain in the possession and custody of the Fund, the obligation guarantee fund, or the Secretary, as the case may be.

(b) **ACCESS to INFORMATION.**—The representatives of the Comptroller General shall have access to all books, accounts, records, reports, files, and other papers, things, or property belonging to or in use by any person or entity which has entered into a financial transaction with or involving the Fund, the obligation guarantee fund, or the Secretary, under this title, to the extent deemed necessary by the Comptroller General to facilitate any audit of financial transactions pursuant to subsection (a) of this section. Such representatives shall be afforded full facilities for verifying transactions with the balances or securities held by depositories, fiscal agents, and custodians. All such property of such person or entity shall, to the extent practicable, remain in the possession and custody of such person or entity.

(c) **REPORT.**—The Comptroller General shall make a report of each such audit to the Congress. Such report shall contain all comments and information which the Comptroller General deems necessary to inform Congress of the financial operations and condition of the Fund and of the obligation guarantee fund and any recommendations which he deems advisable. Such report shall indicate specifically and describe in detail any program, expenditure, or other financial transaction or undertaking observed in the course of such audit which the Comptroller General deems to have been carried on or made without lawful authority or which is inconsistent with the purposes and provisions of this title. A copy of such report shall be furnished to the President, the Secretary, and the Commission, at the time it is submitted to the Congress.

ANNUAL REPORT

Section 515. *[45 U.S.C. §835]* The Secretary shall report to the Congress within 90 days following the end of each fiscal year on the financial condition and operations of the Fund and of the obligation guarantee fund during such fiscal year, and on the anticipated condition and operations of the Fund and of the obligation guarantee fund during the current fiscal year.

EMPLOYEE PROTECTION

Section 516. *[45 U.S.C. §836]* (a) **GENERAL.**—Fair and equitable arrangements shall be provided, in accordance with this section, to protect the interests of any employees not otherwise protected under title V of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 771 et seq.), who may be affected by actions taken pursuant to authorizations or approval obtained under this title. Such arrangements shall be determined by the execution of an agreement between the representatives of the railroads and the representatives of their employees, within 120 days after the date of enactment of this title. In the absence of such an executed agreement, the Secretary of Labor shall prescribe the applicable protective arrangements, within 150 days after the date of enactment of this title.

(b) **TERMS.**—The arrangements required by subsection (a) of this section shall apply to each employee who has an employment relationship with a railroad on the date on which such railroad first applies for applicable financial assistance under this title. Such arrangements shall include such provisions as may be necessary for the negotiation and execution of agreements as to the manner in which the protective arrangements shall be applied, including notice requirements. Such agreements shall be executed prior to implementation of work funded from financial assistance under this title. If such an agreement is not reached within 30 days after the date on which an application for such assistance is approved, either party to the dispute may submit the issue for final and binding arbitration. The decision on any such arbitration shall be rendered within 30 days after such submission. Such arbitration decision shall in no way modify the protection afforded in the protective arrangements established pursuant to this section, shall be final and binding on the parties thereto, and shall become a part of the agreement. Such arrangements shall also include such provisions as may be necessary—

(1) for the preservation of compensation (including subsequent general wage increases, vacation allowances, and monthly compensation guarantees), rights, privileges, and benefits (including fringe benefits such as pensions, hospitalization, and vacations, under the same conditions and so long as such benefits continue to be accorded to other employees of the employing railroad in active service or on furlough, as the case may be) to such employees under existing collective-bargaining agreements or otherwise;

(2) to provide for final and binding arbitration of any dispute which cannot be settled by the parties, with respect to the interpretation, ap-

plication, or enforcement of the provisions of the protective arrangements;

(3) to provide that an employee who is unable to secure employment by the exercise of his or her seniority rights, as a result of actions taken with financial assistance obtained under this title, shall be offered reassignment and, where necessary, retraining to fill a position comparable to the position held at the time of such adverse effect and for which he is, or by training and retraining, can become, physically and mentally qualified, so long as such offer is not in contravention of collective bargaining agreements relating thereto; and

(4) to provide that the protection afforded pursuant to this section shall not be applicable to employees benefited solely as a result of the work which is financed by funds provided pursuant to this title.

(c) **SUBCONTRACTING.**—The arrangements which are required to be negotiated by the parties or prescribed by the Secretary of Labor, pursuant to subsections (a) and (b) of this section, shall include provisions regulating subcontracting by the railroads of work which is financed by funds provided pursuant to this title.

INTERCITY RAIL PASSENGER SERVICE

Section 517. *[45 U.S.C. §837]* The Secretary is authorized, pursuant to the provisions of, and within the authorizations contained in, this title, to provide financial assistance, in the aggregate sum of up to $200,000,000, to any railroad or railroads for the purpose of improving intercity rail passenger service on any lines of such railroad or railroads which are located outside of the Northeast Corridor (as defined in section 701(c) of this Act).

TITLE VII—NORTHEAST CORRIDOR PROJECT IMPLEMENTATION

NATIONAL RAILROAD PASSENGER CORPORATION

Section 701. *[45 U.S.C. §851]* (a) **GENERAL.**—To carry out the purposes of this title, the Rail Passenger Service Act, and the Regional Rail Reorganization Act of 1973, the National Railroad Passenger Corporation is authorized to—

(1) acquire by purchase, lease, exchange, gift, or otherwise and to hold, maintain, sell, lease or otherwise dispose of, any real or personal property or interest therein which is necessary or useful in establishing and maintaining improved high-speed rail services, as specified in section 703 of this title;

(2) enter into and implement such contracts and agreements as are necessary or appropriate in the conduct of its functions;

(3) provide for the continuous operation and maintenance of rail freight, intercity rail passenger, and commuter rail passenger service over the properties acquired pursuant to this section: *Provided,* That any provision of rail freight or rail commuter service shall be effectuated by a compensatory contract with the responsible carrier;

(4) improve railroad rights-of-way between Boston, Massachusetts, and Washington, District of Columbia (including at its option, the route through Springfield, Massachusetts, and routes to Harrisburg, Pennsylvania, and Albany, New York, from the Northeast Corridor main line) to enable improved high-speed rail passenger service to be provided between Boston, Massachusetts, and Washington, District of Columbia, and intermediate intercity markets, in accordance with the goals set forth in section 703 of this title:

(5) acquire, construct, improve, and install passenger stations; communications, electric power, and other facilities and equipment; public and private highway and pedestrian crossings; other safety facilities or equipment; and any other facilities or equipment which it determines are necessary to enable improved high-speed rail passenger service to be provided over the railroad rights-of-way to be improved under paragraph (4) of this subsection;

(6) enter into agreements with other railroads, other carriers, and commuter agencies, for the purpose of granting, acquiring, or entering into trackage rights, contract services, and other appropriate arrangements for freight and commuter services over the rights-of-way acquired under this title, with such agreement to be on such terms and conditions as are necessary to reibursement for costs on an equitable and fair basis, except that cross subsidization among intercity, commuter, or rail freight services is prohibited;

(7) appoint a qualified individual to serve as the General Manager of the Northeast Corridor improvement project; and

(8) enter into agreements with telecommunications common carriers on a basis which is consistent with, and subject to, the Communications Act of 1934, for the purpose of continuing existing, and creating new and improved, rail passenger radio mobile telephone service in the high-speed rail passenger service area specified in section 703(1) of this title.

(b) TRANSFER of RAIL PROPERTIES.—The Corporation, on the date of conveyance pursuant to section 303(b)(1) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 743), shall, by purchase or lease, transfer to the National Railroad Passenger Corporation all rail properties designated pursuant to sections 206(c)(1)(C) and 601(d) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 716(c)(1)(C) and 791(d)), and it shall, within 180 days after the date of enactment of this title, execute agreements providing for the National Railroad Passenger Corporation to assume (1) all operational responsibility for intercity rail passenger services with respect to such properties, and (2) control and maintenance of the properties transferred. Such parties may agree to retaining or transferring, in whole or in part, operational responsibility for rail freight or commuter rail services in the area specified.

(c) **DEFINITION.**—As used in this title, the term "Northeast Corridor" means the States of Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, and Maryland, and the District of Columbia.

OPERATIONS REVIEW PANEL

Section 702. *[45 U.S.C. §852]* (a) **ESTABLISHMENT.**—There is established an entity which shall be representative of the various users of Northeast Corridor rail transportation facilities, to be known as the Operations Review Panel (hereafter in this section referred to as the "Panel"). The Panel shall have the authority to take such actions as are necessary to resolve differences of opinion concerning operations (among or between the National Railroad Passenger Corporation, other railroads, and State, local, and regional agencies responsible for the provision of commuter rail, rapid rail, or rail freight services), with respect to all matters except those conferred on the Commission in section 402(a) of the Rail Passenger Service Act (45 U.S.C. 562(a)).

(b) **MEMBERSHIP.**—The Panel shall consist of 5 members, as follows:

(1) one member who shall be selected by the chief executive officer of the National Railroad Passenger Corporation;

(2) one member who shall be selected by majority vote of the commuter rail authorities which are subject to the jurisdiction of the Panel;

(3) one member who shall be selected by the chief executive officer of the corporation; and

(4) two neutral members who shall be selected by the Chairman of the National Mediation Board.

The members shall each serve a term of 4 years from the date of such selection, or until a successor has been selected. If, within 45 days after the date of enactment of this Act, the National Railroad Passenger Corporation, the commuter authorities, or the Corporation fails to select the member who it is authorized to select under this subsection, the Chairman of the National Mediation Board shall, within 30 days after the expiration of such 45-day period, appoint a member on behalf of such party. Any member so appointed shall serve until such time as the party so represented selects a successor.

(c) **DECISIONS and REVIEW.**—All decisions of the Panel shall be final and binding on the parties. All costs and expenses of the Panel shall be paid by (1) the National Railroad Passenger Corporation, (2) the commuter rail authorities which are subject to such Panel, and (3) the Corporation, each of which shall pay one-third of such costs and expenses, unless otherwise determined by a majority of the members of such Panel. The Panel may adopt such rules of procedure and may employ such resources as it considers appropriate. It may issue preliminary and final orders, which shall have the force and effect of law, with respect to any difference of opinion concerning any operational matter which is the subject of such an order. No order of the Panel shall be subject to review by any court. Upon petition by any party subject to the Panel, the United States District Court for the District of Columbia shall enforce any final order issued by the Panel.

REQUIRED GOALS

Section 703. *[45 U.S.C. §853]* The Northeast Corridor improvement project shall be implemented by the Secretary in order to achieve the following goals:

(1) **INTERCITY RAIL PASSENGER SERVICES.**—(A)(i) Within 5 years after the date of enactment of this Act, the establishment of regularly scheduled and dependable intercity rail passenger service between Boston, Massachusetts, and New York, New York, operating on a 3-hour-and-40-minute schedule, including appropriate intermediate stops; and regularly scheduled and dependable intercity rail passenger service between New York, New York, and Washington, District of Columbia, operating on 2-hour-and-40-minute schedule, including appropriate intermediate stops.

(ii) Improvements in facilities in accordance with route criteria approved by the Congress, on routes to Harrisburg, Pennsylvania, and Albany, New York, from the Northeast Corridor main line, and from Springfield, Massachusetts, to Boston, Massachusetts, and New Haven, Connecticut, in order to facilitate compatibility with improved high-speed rail service operated on the Northeast Corridor main line.

(B) The improvement of nonoperational portions of stations (as determined by the Secretary in consultation with the National Railroad Passenger Corporation) used in intercity rail passenger service and of related facilities and fencing. Fifty percent of the cost of such improvements shall be borne by States (or local or regional transportation authorities), except that the Secretary may, in his sole discretion, fund entirely any safety-related improvement.

(C) The improvements required by this section shall be accomplished in a manner which is compatible with the accomplishment in the future of additional improvements in service levels, and which will produce the maximum labor benefit in terms of hiring persons who are presently unemployed.

(D) The submission by the Secretary and the National Railroad Passenger Corporation to the Congress of annual reports on progress achieved and work in progress and planned (including the need for further improvements) with respect to the completion of this program, including an up-to-date accounting of intercity passenger ridership, revenues from such ridership, expenses, and on-time dependability of intercity passenger trains in the Northeast Corridor.

(E) Within 2 years after the date of enactment of this Act, the submission by the Secretary to the Congress of a report on the financial and operating results of the intercity rail passenger service established under this section, on the rail freight service improved and maintained pursuant to this section, and on the practicability, considering engineering and financial feasibility and market demand, of the establishment of regularly scheduled and dependable intercity rail passenger service between Boston, Massachusetts, and New York, New York, operating on a 3-hour schedule, including appropriate intermediate stops, and regularly scheduled and dependable intercity rail passenger service between New York, New York, and Washington, District of Columbia, operating on a 2½-hour schedule, including appropriate intermediate stops. Such report shall include a full and complete accounting of the need for improvements in intercity passenger transportation within the Northeast Corridor and a full accounting of the public costs and benefits of improving various modes of transportation to meet those needs. If such report shows (i) that further improvements are needed in intercity passenger transportation in the Northeast Corridor, and (ii) that improvements (in addition to those required by subparagraph (A)(i) of this paragraph) in the rail system in such area would return the most public benefits for the public costs involved, the Secretary shall make appropriate recommendations to the Congress. Within 6 years after the date of enactment of this Act, the Secretary shall submit an updated comprehensive report on the matters referred to in this subparagraph. Thereafter, if it is practicable, the Secretary shall facilitate the establishment of intercity rail passenger service in the Corridor which achieves the service goals specified in this subparagraph.

(2) **RAIL COMMUTER SERVICES, RAIL RAPID TRANSIT, and LOCAL TRANSPORTATION.**—To the extent compatible with the goals contained in paragraph (1) of this section, the facilitation of improvements in and usage of rail commuter services, rail rapid transit, and local public transportation.

(3) Rail Freight Service.—The maintenance and improvement of rail freight service to all users of rail freight service located on or adjacent to the Northeast Corridor and the maintenance and improvement of all through-freight services which remain in the Northeast Corridor, to the

extent compatible with the goals contained in paragraphs (1) and (2) of this section.

(4) **PASSENGER RADIO TELEPHONE SERVICE.**—To the extent compatible with the goals contained in paragraph (1) of this section, the continuation of and improvement in passenger radio telephone service aboard trains operated in high-speed rail service between Washington, District of Columbia, and Boston, Massachusetts. The President and relevant Federal agencies, including the Federal Communications Commission, shall take such actions as are necessary to achieve this goal, subject to the provisions of the Communications Act of 1934 (47 U.S.C. 151 et seq.), including necessary licensing, construction, operation, and maintenance standards for the radio service, as determined by the Federal Communications Commission to be in the public interest, convenience, and necessity.

FUNDING

Section 704. *[45 U.S.C. §854]* (a) **AUTHORIZATION of APPROPRIATIONS.**—There is authorized to be appropriated to the Secretary—

(1) $1,600,000,000 to remain available until expended in order to effectuate the goals of section 703(1)(A)(i) of this title and after such goals have been achieved, the goals of section 703(1)(A)(ii);

(2) $150,000,000 to remain available until expended in order to effectuate the goal of section 703(1)(B);

(3) for payment to the National Railroad Passenger Corporation—

(A) $10,000,000 to remain available until expended for nonrecurring costs related to the initial assumption of control and responsibility for maintaining rail operations on the Northeast Corridor;

(B) $85,182,956 to acquire the properties of the Northeast Corridor;

(C) $650,000 to remain available until expended, for the development and utilization of mobile radio frequencies for high-speed rail passenger radio telephone service; and

(D) $20,000,000, to remain available until expended, for acquiring and improving properties designated in accordance with section 206(c)(1)(D) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 716(c)(1)(D)).

(b) **LIMITATION.**—No funds appropriated under this section or pursuant to section 601 of the Rail Passenger Service Act may be used to subsidize any operating losses of commuter rail or rail freight services.

(c) **COORDINATION.**—The Secretary shall take all steps necessary to coordinate all transportation programs related to the Northeast Corridor to assure that all such programs are integrated and consistent with implementation of the Northeast Corridor improvement project under this title, including, if the Secretary finds any significant noncompliance with the implementation of the goals of section 703 of this title, the denial of funding to any noncomplying program until such noncompliance is corrected.

(d) **EMERGENCY MAINTENANCE CONTINUATION.**—After the conveyance of rail properties, pursuant to section 303(b) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 743(b)) and section 701(b) of this title, not to exceed $25,000,000 of the funds appropriated pursuant to Public Law 94-6 (89 Stat. 11) shall remain available to be utilized by the Secretary for the purpose of performing emergency maintenance on the rail properties designated in accordance with section 206(c)(1)(C) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 716(c)(1)(C)).

TITLE IX—MISCELLANEOUS PROVISIONS

NONDISCRIMINATION

Section 905. *[45 U.S.C. §803]* (a) GENERAL.—No person in the United States shall on the ground of race, color, national origin, or sex be excluded from participation in, or denied the benefits of, or be subjected to discrimination under, any project, program, or activity funded in whole or in part through financial assistance under this Act.

(b) COMPLIANCE.—(1) Whenever the Secretary determines that any person receiving financial assistance, directly or indirectly, under this Act, or under any provision of law amended by this Act, has failed to comply with subsection (a) of this section, with any Federal civil rights statute, or with any order or regulation issued under such a statute, the Secretary shall notify such person of such determination and shall direct such person to take such action as may be necessary to assure compliance with such subsection.

(2) If, within a reasonable period of time after receiving notification pursuant to paragraph (1) of this subsection, such person fails or refuses to comply with subsection (a) of this section, the Secretary shall—

(A) direct that no further Federal financial assistance be provided to such person;

(B) refer the matter to the Attorney General with a recommendation that an appropriate civil action be instituted;

(C) exercise the powers and functions provided by title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.); and/or

(D) take such other actions as may be provided by law.

(c) CIVIL ACTION.—Whenever a matter is referred to the Attorney General pursuant to subsection (b) of this section, or whenever the Attorney General has reason to believe that any person is engaged in a pattern or practice in violation of the provisions of this section, the Attorney General may commence a civil action in any appropriate district court of the United States for such relief as may be appropriate, including injunctive relief.

(d) **REGULATIONS.**—The Secretary may prescribe such regulations and take such actions as are necessary to monitor, enforce, and affirmatively carry out the purposes of this section.

(e) **JUDICIAL REVIEW.**—Any determinations made or actions taken by the Secretary pursuant to this section shall be subject to judicial review.

(f) **DEFINITION.**—For purposes of this section, the term "financial assistance" includes obligation guarantees. (Public Law 94-210, Feb. 5, 1976, 90 Stat. 31).

Section 127.—Transportation.—[Repealed. And §123 of the act, which superseded the transportation provisions, was repealed by Pub. Law 91-452, title XI, §1106(a), Oct. 15, 1970, 84 Stat. 960.]

GENERAL RULES OF PRACTICE

[Unchanged except Rules 15, 16, 42(f), 51, 55, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 87, 96(b), 102, 225(g), 247.]

Historical Note

REFORM OF RULES OF PRACTICE BEFORE THE COMMISSION

(a) Within 360 days after the date of enactment of this Act, the Commission shall study, develop, and submit to the Congress an initial proposal setting forth rules of practice under which the Commission proposes to conduct all adjudicatory and rulemaking proceedings with respect to any matter involving a common carrier by railroad subject to this part. Such rules of practice before the Commission shall be consistent with existing law, shall take into consideration the varying nature of proceedings before the Commission, and shall include—

(1) specific time limits upon the filing and disposition of all complaints, applications, petitions, pleadings, motions, appeals, and rulemaking proceedings before an administrative law judge, individual Commissioner, review board, division, or panel of the Commission, or the full Commission;

(2) specific methods of taking testimony, receiving evidence, hearing cross-examination, and the modification of such procedures so as to facilitate the timely execution of the functions of the Commission;

(3) utilization of additional administrative law judges or the assignment of employees of the Office, in complex adjudicatory or rulemaking proceedings, so as to facilitate proper focus and timely resolution of the issues within the required time limits; and

(4) specific remedies in any case of failure to observe required time limits.

(b) Within 420 days after the date of enactment of this Act, the Administrative Conference of the United States shall submit to the Congress and to the Commission its comments on the rules of practice before the Commission proposed pursuant to subsection (a) of this section, together with such recommendations as it considers appropriate.

(c) Within 30 days after the receipt of comments submitted pursuant to subsection (b) of this section, the Commission shall consider such comments and shall submit to the Congress a final proposal setting forth the rules of practice before the Commission with respect to matters involving common carriers by railroad. Such rules of practice shall take effect at the end of the first period of 60 calendar days of continuous session of the Congress after the date of submission of such final proposal, unless either the Senate or the House of Representatives adopts a resolution during such period stating that it does not approve such final proposal. If no resolution is adopted as provided in the preceding sentence, the Commission shall adopt such proposed rules of practice. For purposes of this subsection, continuity of session of the Congress is broken only by an adjournment sine die, and the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded from the computation of the 60-day period.

(d) If either the Senate or the House of Representatives passes a resolution of disapproval under subsection (c) of this section, the Commission shall develop a revised proposal setting forth the rules of practice before the Commission pursuant to this section. Within 60 days after the date of such disapproval, each such revised proposal shall be submitted to the Congress by the Commission for review pursuant to such subsection (c).

(e) The Commission shall periodically, but not less than once every 3 years, review the rules of practice adopted pursuant to subsection (c) of this section, and shall revise such rules as it considers necessary. (Pub. L. 94-210, 90 Stat. 53, Feb. 5, 1976)

NOTES OF DECISIONS

Volume 12—p. 10593; Volume 13—p. 11235; Volume 14—p. 11757; Volume 15—p. 12376; Volume 16—p. 13018; Volume 17—p. 13769; Volume 18—p. 14778; Volume 19—p. 16086; Volume 21—p. 17928.

Rule 15. Typographical specifications generally.—Except as otherwise provided respecting applications (Rule 38(a)), exhibits (Rule 84(a)), and informal complaints (Rules 24(a)), all pleadings, documents, and papers to be filed under these rules shall be on opaque, unglazed, durable paper not exceeding 8½ by 11 inches. To permit binding in covers of uniform size, margins of at least 1½ and 1 inch, respectively, shall be allowed on the left and right margins. Binding shall be on the left margin. Reproduction may be by printing, printing by offset press, multigraphing, or mimeographing, or by any other process, provided the copies are clear and permanently legible. Whiteline blueprints which cannot be reproduced by photography are not acceptable. If directly typewritten, or if in facsimile reproduction of typewriting, the impression may be on both sides of the paper and must be double-spaced, except that long quotations shall be single-spaced and indented. Nothing less in size than Elite type shall be used. If printed, adequate leading and nothing less than 10-point type shall be used, except that 8-point type may be employed in footnotes and in tabular matter where printing limitations so require. A pleading or brief in excess of 50 pages (except a pleading under modified or shortened procedure), including cover pages, indexes, and appendixes, must be printed. Printing by offset press will be accepted: *Provided*, That the type used is not reduced in size smaller than that required for typewritten documents and that where the pleading or brief exceeds 50 pages, the impression is on both sides of the paper. Failure to observe these specifications will result in rejection.

Effective Jan. 24, 1975. 40 FR 3767

Rule 16. Copies. —(a) *Generally*. The original and 8 copies of every pleading, document, or paper permitted or required to be filed under this part shall be furnished for the use of the Commission except as a different number is required under paragraph (b) of this section, or as otherwise provided respecting: answers (Rule 35(c)), applications (Rule 38(b) and Rule 40 (c)); complaints, formal (Rules 26 and 37) and informal (Rule 24(a) and Rule 25(d)); depositions (Rule 64); exhibits (Rules 84(c) and 86); modified procedure (Rule 52); petitions in intervention (Rule 72(d)); prepared statements (Rule 77); protests in investigation-and-suspension proceedings (Rule 42(c)); replies (Rule 23(b)); and matters respecting oral argument (Rule 98); subpenas (Rule 56(a)); time modification (Rule 21(b)); transcript correction (Rule 90(b)), and petitions for rehearing, reargument, or reconsideration (Rule 101(a)).

(b) *In bankruptcy proceedings*. Except as otherwise provided in an application form or instruction (Rule 38) and respecting exhibits (Rule 84(c)), the original and 19 copies of every pleading, document, or paper filed in a proceeding arising under the Uniform Bankruptcy Act shall be furnished for the use of the Commission.

Effective Jan 24. 1975. 40 FR 3767.

Rule 23. Replies.—(a) *Time for filing*.—Applicant's motion to strike the reply of protestants to its exceptions on the grounds that the reply constituted exceptions which were not timely filed and contained misstated evidence was overruled on the basis that applicant's motion represented a reply to a reply, which is prohibited by rule 23(a).—American Delivery Systems, Inc., Frt. Forwarder Applic., 340 I.C.C. 776 (778).

Rule 42. Petitions for suspension of tariffs or schedules.—New paragraph (f) added as follows: (f) *Special requirements for protests against revisions to rail rates and charges*. Protests against, and requests for suspension of, tariffs or schedules filed by rail carriers or their publishing agents that result in revisions of rates or charges shall also include a verified complaint containing specific facts showing: (1) that without suspension the protested tariffs or schedules will cause substantial injury to the complainant or the party represented by the complainant, and (2) that it is likely that complainant or the party represented by the complainant will prevail on the merits pursuant to any applicable provisions of the Interstate Commerce Act, as amended.

Effective March 1, 1976, 41 FR 8790

Rule 49. Modified procedure; content of pleadings.— Rule 49 permits argument in a statement filed under modified procedure. In the instant proceeding, the thrust of protestant's objections went to the weight to be accorded the evidence, not to its admissibility, and applicant's affidavits indicate that the pleadings were mailed in the usual manner. Accordingly, the motion to strike was overruled for the reasons (a) that the pleadings in question comply substantially with the reopening order and the General Rules of Practice, (b) that no sufficient cause appeared for striking such pleadings, and (c) that applicant is entitled to consideration to their merits.—Jet Forwarding, Inc., Freight Forwarding Application, 340 I.C.C. 337 (340)*.

Employee board's rationale in denying protestant's motion to strike certain specific statements in supporting shipper's rebuttal statement, on grounds that matter challenged was directly related and complementary to data in shipper's initial verified statement, is a technically proper interpretation of rule 49 as pertains to content of applicant's statement in rebuttal of protestant's statement. However, when applicant failed to state specifically and factually in its initial statement protestant's service deficiencies, protestant had no way to counter the nebulous criticism and then was precluded from entering a defense against the specific allegations in the shipper's rebuttal because of rule 23 which prohibits filing of a reply to a reply.—Kerr Contract Carriage, Inc., Contr. Car. Applic., 115 M.C.C. 862 (865-66).

Controlling in this situation is rule 51 which, as made applicable to contested motor carrier application proceedings by rule 247(e)(3), requires that within the time fixed in the order assigning the proceedings for handling under modified procedure applicant "shall serve upon the other parties a statement of all the evidence upon which it relies." When applicant failed in the duty of submitting the evidence in the rebuttal in its initial statement, and based its case on the inadequacy of existing service, protestant was prevented from presenting an adequate defense, against the spirit and intent of the rules of practice. Motion to strike granted.—Id., pp. 866-67.

Rule 51. Modified procedure; when pleadings filed and served.—Within 20 days from the date of an order requiring modified procedure, complainant shall serve upon the other parties a statement of all the evidence upon which it relies. Within 30 days thereafter defendant shall serve its statement. Within 20 days thereafter complainant shall serve its statement in reply. No further reply may be made by any party except by permission of the Commission.

Effective Oct. 1, 1973. 38 FR 31008.

Rule 51, as made applicable to contested motor carrier application proceedings by rule 247(e)(3), requires that within the time fixed in the order assigning the proceedings for handling under modified procedure applicant "shall serve upon the other parties a statement of all the evidence upon which it relies." When applicant, basing its case on the inadequacy of existing service, failed in duty of submitting specific evidence of service deficiencies in its initial statement, but presented such specific evidence in its rebuttal statement, protestant (by rule 23, prohibiting filing of a reply to a reply) was prevented from presenting an adequate defense, contrary to the spirit and intent of the rules of practice. Motion to strike specific evidence in rebuttal granted.—Kerr Contract Carriage, Inc., Contr. Car. Applic., 115 M.C.C. 862 (866-67).

Rule 55. Notice of hearing; subpenas; discovery; depositions.—The caption preceding rule 55 is amended to read as stated, effective Jan. 15, 1975, 39 FR 40296.

Rule 57. Discovery.—(a) *In general.*—Unless otherwise ordered in accordance with these rules, or as required by the Interstate Commerce Act or other applicable statutes, parties may obtain discovery regarding any matter, not privileged, which is relevant to the subject matter involved in the pending proceeding (other than those informal proceedings specified in rules 200 and 225), including the existence, description, nature, custody, condition, and location of any books, documents, or other tangible things and the identity and location of persons having knowledge of any discoverable matter. It is not ground for objection that the information sought will be inadmissible as evidence if the information sought appears reasonably calculated to lead to the discovery of admissible evidence.

(b) *Protective conditions.*—Upon motion by any party, by the person from whom discovery is sought, or by any person with a reasonable interest in the data, information, or material sought to be discovered, and for good cause shown, any order which justice requires may be entered to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense, or to prevent the raising of issues untimely or inappropriate to the proceeding. Relief through a protective order may include one or more of the following: (1) that the discovery not be had; (2) that the discovery may be had only on specified terms and conditions, including a designation of the time and place; (3) that the discovery may be had only upon such terms and conditions as the Commission may impose to insure financial responsibility in indemnifying the party or person against whom discovery is sought to cover the reasonable expenses incurred; (4) that the discovery may be had only by a method other than that selected by the party seeking discovery; (5) that certain matters not be inquired into, or that the scope of discovery be limited to certain matters; (6) that discovery be conducted with no one present except persons designated in the protective order; (7) that a deposition after being sealed be opened only by order of the Commission; (8) that a trade secret or other confidential research development, or commercial information not be disclosed or be disclosed only in a designated way; and (9) that the parties simultaneously file specified documents or information enclosed in sealed envelopes to be opened only upon direction or order of the Commission.

If the motion for a protective order is denied in whole or in part, the Commission may, on such terms and conditions as it deems just, enter an order requiring any party or person to provide or permit discovery.

(c) *Sequence and timing of discovery.*—Unless the Commission upon motion, for the convenience of parties and witnesses and in the interest of justice, orders otherwise, methods of discovery may be used in any sequence and the fact that a party is conducting discovery, whether by deposition or otherwise, shall not operate to delay any other party's discovery.

(d) *Stipulations regarding discovery.*—Unless otherwise ordered, the parties may by written stipulation filed with the Commission (1) provide that depositions be taken before any person, at any time or place, upon sufficient notice, and in any manner and when so taken may be used like other depositions, and (2) modify the procedures provided by these rules for other methods of discovery.

Effective Jan. 15, 1975. 39 FR 40296.

Rule 58. Deposition.—(a) *Purpose.*—The Commission will either upon its own initiative, or upon receipt of a verified petition filed by a party or one who reasonably expects to be a party to a proceeding, and upon good cause shown, issue an order to take the testimony of any person, including a party, by deposition upon oral examination (a) for use as evidence, (b) for discovery, or (c) for any person who desires to perpetuate his testimony or that of another person regarding any matter that may be cognizable in any proceeding before the Commission.

(b) *Petitions.*—A petition requesting an order to take a deposition and perpetuate testimony or to produce documents and materials (1) shall be filed with due regard to the time periods specified in rule 59(c); (2) shall set forth the facts it desires to establish and the substance it expects to elicit; (3) shall be served upon all parties to the proceeding and upon the person sought to be deposed and/or the custodian of the documents or materials sought to be produced; (4) shall set forth the name and address of the witness, the place where, the time when, the name and office of the officer before whom, and the cause or reason why such deposition should be taken; and (5) shall specify with particularity the documents and materials which the deponent is requested to produce.

(c) *Order.*—If the Commission is convinced on its own initiative or by the petition requesting an order to take a deposition that the deposition will prevent a failure or delay of justice, it shall issue an order, which action may be taken without awaiting the filing of a reply, and serve such order upon the parties and the witness, naming the witness whose deposition is to be taken, specifying the time when, the place where, and the officer before whom the deposition is to be taken, and specifying the subject matter of the examination and whether the depositions shall be taken upon oral examination or written interrogatories. The provisions for the taking of the deposition specified in the Commission's order may or may not be the same as requested in the petition. The deposition may then be taken in accordance with these rules, and the Commission or presiding officer may make orders of the character provided by rule 67.

Effective Jan. 15, 1975. 39 FR 40296.

Rule 59. Depositions, location, officer, time, fees, absence, disqualification.—(a) *Where deposition shall be taken.*—Unless otherwise ordered or agreed to by stipulation, depositions shall be taken in the city or municipality where the deponent is located.

(b) *Officer before whom taken.*—Within the United States or within a territory or insular possession subject to the dominion of the United States, depositions shall be taken before an officer authorized to administer oaths by the laws of the United States or of the place where the examination is held. Within a foreign country, depositions may be taken before an officer or person designated by the Commission or agreed upon by the parties by stipulation in writing to be filed with the Commission.

(c) *When taken.*—Unless under special circumstances and for good cause shown, no deposition shall be taken within 10 days prior to the date assigned for commencement of hearing or the filing of opening statements of fact and argument under the modified procedure, and when the deposition is taken in a foreign country it shall not be taken within 30 days prior to such date.

(d) *Fees.*—A witness whose deposition is taken pursuant to these rules and the officer taking same, unless he be employed by the Commission, shall be entitled to the same fee paid for like service in the courts of the United States, which fee shall be paid by the party at whose instance the deposition is taken.

(e) *Failure to attend or to serve subpena; expenses.*

(1) If the party who filed a petition pursuant to rule 58(b) fails to attend and proceed with the taking of the deposition and another party attends in person or by representative pursuant to an order entered under rule 58(c), the Commission may order the party who filed the petition to pay to such other party the reasonable expenses incurred by him and his representative in so attending, including reasonable attorney's fees.

(2) If the party who filed a petition pursuant to rule 58(b) fails to serve a subpena upon the witness and the witness because of such failure does not attend, and if another party attends in person or by representative because he expects the deposition of the witness to be taken, the Commission may order the party who filed the petition to pay to such other party the reasonable expenses incurred by him and his representative in so attending, including reasonable attorney's fees.

(f) *Disqualification for interest.*—No deposition shall be taken before a person who is a relative or employee or representative or counsel of any of the parties, or is a relative or employee of such representative or counsel or is financially interested in the proceeding.

Effective Jan. 15, 1975, 39 FR 40296

Rule 60. Depositions, procedures.—(a) *Examination.*—Examination and cross-examination of witnesses shall proceed as permitted at a hearing. All objections made at the time of the examination to the qualifications of the officer taking the deposition, or to the manner of taking it, or to the evidence presented, or to the conduct of any party, and any other objection to the proceedings, shall be noted by the officer upon the deposition. Evidence objected to shall be taken subject to the objections. In lieu of participating in the oral examination, parties may serve written questions in a sealed envelope on the party taking the deposition, and he shall transmit them to the officer, who shall open the sealed envelope, propound the questions to the witness, and record the answers verbatim.

(b) *Use of depositions.*—At the hearing, any part or all of a deposition, so far as admissible under the rules of evidence, may be used against any party who was present or represented at the taking of the deposition or who had due notice thereof, in accordance with any one of the following provisions:

(1) Any deposition may be used by any party for the purpose of contradicting or impeaching the testimony of the deponent as a witness.

(2) The deposition of a party or of anyone who at the time of taking the deposition was an officer, director, or managing agent, or a person designated to testify on behalf of a public or private corporation, partnership, association or governmental agency (other than this Commission, except in those instances where the Commission itself is a party to the proceeding) which is a party, may be used by an adverse party for any purpose.

(3) The deposition of a witness, whether or not a party, may be used by any party for any purpose if the presiding officer or Commission finds: (A) that the witness is dead; or (B) that the witness is at a greater distance than 100 miles from the place of hearing, or is out of the United States, unless it appears that the absence of the witness was procured by the party offering the deposition; or (C) that the witness is unable to attend or testify because of age, illness, infirmity, or imprisonment; or (D) that the party offering the deposition has been unable to procure the attendance of the witness by subpena; or (E) upon application and notice, that such exceptional circumstances exist as to make it desirable, in the interest of justice and with due regard to the importance of presenting the testimony of witnesses orally at public hearing, to allow the deposition to be used.

(4) If only part of a deposition is offered in evidence by a party, an adverse party may require him to introduce any other part which ought in fairness to be considered with the part introduced, and any party may introduce any other parts.

Substitution of parties does not affect the right to use depositions previously taken.

(c) *Effect of taking or using depositions.*—A party shall not be deemed to make a person his own witness for any purpose by taking his deposition. The introduction in evidence of the deposition or any part thereof for any purpose other than that of contradicting or impeaching the deponent makes the deponent the witness of the party introducing the deposition, but this shall not apply to the use by an adverse party of a deposition under subdivision (b)(2) of this rule. At the hearing any party may rebut any relevant evidence contained in a deposition whether introduced by him or by any other party.

(d) *Motions to protect.*—At any time during the taking of the deposition, on motion of any party or of the deponent and upon a showing that the examination is being conducted in bad faith or in such manner as unreasonably to annoy, embarrass, or oppress the deponent or party, the Commission may order the officer conducting the examination to cease forthwith from taking the deposition, or may limit the scope and manner of the taking of the deposition as provided in rule 57(b). If the order made terminates the examination, it shall be resumed thereafter only if so ordered. Upon demand of the objecting party or deponent, the taking of the deposition shall be suspended for the time necessary to make a motion for an order.

(e) *Recordation.*—The officer before whom the deposition is to be taken shall observe the provisions of rules 71 and 15 respecting appearances and typographical specifications, shall put the witness on oath, and shall personally, or by someone acting under his direction and in his presence, record and transcribe the testimony of the witness as required by these rules.

(f) *Signing.*—When the testimony is fully transcribed or otherwise recorded, the deposition shall be submitted to the witness for examination and shall be read to or by him unless such examination and reading are waived by the witness and the parties. Any changes in form or substance which the witness desires to make shall be entered upon the deposition by the officer with a statement of the reasons given by the witness for making them. The deposition shall then be signed by the witness, unless the parties by stipulation waive the signing or the witness is ill or cannot be found or refuses to sign. If the deposition is not signed by the witness within 15 days of its submission to him, the officer shall sign it and state on the record the fact of the waiver or of the illness or absence of the witness or the fact of the refusal to sign together with the reason, if any, given therefor; and the deposition may then be used fully as though signed, unless, on a motion to suppress, it is found that the reasons given for refusal to sign require rejection of the deposition in whole or in part.

(g) *Attestation.*—The officer shall certify on the deposition that the witness was duly sworn by him and that the deposition is a true record of the testimony given by the witness, and that the officer is not a relative or employee or representative or counsel of any of the parties, or is a relative or employee of such representative or counsel, or is financially interested in the proceeding.

(h) *Return.*—The officer shall securely seal the deposition in an envelope indorsed with sufficient information to identify the proceeding and marked "Deposition of (here insert name of witness)" and shall promptly send the original and one copy of all exhibits, by registered mail to the Secretary of the Commission. A deposition to be offered in evidence must reach the Commission not later than 5 days before the date it is to be so offered.

(i) *Notice.*—The party taking the deposition shall give prompt notice of its filing to all other parties.

(j) *Copies.*—Upon payment of reasonable charges therefor, the officer before whom the deposition is taken shall furnish a copy of it to any interested party or to the deponent.

Effective Jan. 15, 1975. 39 FR 40296

Rule 61. Effect of errors and irregularities in depositions.—(a) *As to disqualification of officer.*—Objection to taking a deposition because of disqualification of the officer before whom it is to be taken is waived unless made before the taking of the deposition begins or as soon thereafter as the disqualification becomes known or could be discovered with reasonable diligence.

(b) *As to taking of deposition.*

(1) Objection to the competency of a witness or to the competency, relevancy, or materiality of testimony are not waived by failure to make them before or during the taking of the deposition, unless the ground of the objection is one which might have been obviated or removed if presented at that time.

(2) Errors and irregularities occurring at the oral examination in the manner of taking the deposition, in the form of the questions or answers, in the oath or affirmation, or in the con-

duct of parties, and errors of any kind which might be obviated, removed, or cured if promptly presented, are waived unless reasonable objection thereto is made at the taking of the deposition.

(c) *As to completion and return of deposition.*—Errors and irregularities in the manner in which the testimony is transcribed or the deposition is prepared, signed, certified, sealed, indorsed, transmitted, filed, or otherwise dealt with by the officer under rules 59 and 60 are waived unless a motion to suppress the deposition or some part thereof is made with reasonable promptness after such defect is, or with due diligence might have been, ascertained.

Effective Jan. 15, 1975. 39 FR 40296.

Rule 62. Written interrogatories to parties.—(a) *Availability; procedures for use.*—Any party may serve upon any other party written interrogatories to be answered by the party served, or if the party served is a public or private corporation, partnership, association, or governmental agency (other than this Commission, except in those instances where the Commission itself is a party to the proceeding), by any officer or agent, who shall furnish such information as is available to the party. Copies of any interrogatories served shall also be filed with the Commission.

Each interrogatory shall be answered separately and fully in writing, unless it is objected to, in which event the reasons for objection shall be stated in lieu of an answer. The answers are to be signed by the person making them and subscribed by an appropriate verification generally in the form prescribed in No. 6 of appendix B to these rules. Objections are to be signed by the representative or counsel making them. The person upon whom the interrogatories have been served shall serve a copy of the answers and objections within the time period designated by the party submitting the interrogatories, but not less than 15 days after the service thereof.

(b) *Option to produce business records.*—Where the answer to an interrogatory may be derived or ascertained from the business records of the party upon whom the interrogatory has been served or from an examination, audit, or inspection of such business records, or from a compilation, abstract, or summary based thereon, and the burden of deriving or ascertaining the answer is substantially the same for the party serving the interrogatory as for the party served, it is a sufficient answer to such interrogatory to specify the records from which the answer may be derived or ascertained and to afford to the party serving the interrogatory reasonable opportunity to examine, audit, or inspect such records and to make copies thereof, or compilations, abstracts, or summaries therefrom.

If information sought is contained in computer runs, punchcards, or tapes which also contain privileged or proprietary information or information the disclosure of which is proscribed by the Interstate Commerce Act, it shall be sufficient response under these rules that the person upon whom the interrogatory has been served is willing to make available to and permit an independent professional organization not interested in the proceeding and paid by the party serving the interrogatory to extract from such runs, punchcards, or tapes the information sought in the interrogatory that is not privileged or proprietary information or information the disclosure of which is proscribed by the Interstate Commerce Act.

(c) *When written interrogatories must be served.*—Unless under special circumstances and for good cause shown, no written interrogatories shall be served within 10 days prior to the date assigned for commencement of hearing or the filing of opening statements of fact and argument under the modified procedure, and when the written interrogatories are to be served in a foreign country, they shall not be served within 30 days prior to such date.

Effective Jan. 15, 1975. 39 FR 40296

Rule 63. Request for admission.—(a) *Availability; procedures for use.*—A party may serve upon any other party a written request for the admission, for purposes of the pending proceeding only, of the truth of any matters within the scope of rule 57(a) set forth in the request, including the genuineness of any documents described in the request for admission. Copies of documents shall be served with the request unless they have been or are otherwise furnished or made available for inspection and copying. Copies of any requests for admission served shall also be filed with the Commission.

Each matter of which an admission is requested shall be separately set forth. The matter is admitted unless, within a period designated in the request, not less than 15 days after service thereof, the party to whom the request is directed serves upon the party requesting the admission a written answer or objection addressed to the matter, signed by the party or his representative or counsel. If objection is made, the reasons therefor shall be stated. The answer shall specifically deny the matter or set forth in detail the reasons why the answering party cannot truthfully admit or deny the matter. A denial shall fairly meet the substance of the requested admission, and when good faith requires that a party qualify his answer or deny only a part of the matter of which an admission is requested, he shall specify so much of it as is true and qualify or deny the remainder. An answering party may not give lack of information or knowledge as a reason for failure to admit or deny unless he states that he has made reasonable inquiry and that the information known or readily obtainable by him is insufficient to enable him to admit or deny. A party who considers that a matter of which an admission has been requested presents a genuine issue for hearing may not on that ground alone, object to the request; he may, subject to the provisions of rule 67(c), deny the matter or set forth reasons why he cannot admit or deny it. Copies of any answers or objections shall be filed with the Commission.

(b) *Effect of admission.*—Any matter admitted under this rule is conclusively established unless upon petition and a showing of good cause the Commission enters an order permitting withdrawal or amendment of the admission. Any admission made by a party under this rule is for the purpose of the pending proceeding only and is not an admission by him for any other purpose nor may it be used against him in any other proceeding.

(c) *When written requests for admission must be served.*—Unless under special circumstances and for good cause shown, no requests for admission shall be served within 10 days prior to the date assigned for commencement of hearing or the filing of opening statements of fact and argument under the modified procedure, and when requests for admission are to be served in a foreign country, they shall not be served within 30 days prior to such date.

Effective Jan. 15, 1975. 39 FR 40296.

Rule 64. Depositions, requests for admission, and written interrogatories: inclusion in record.—At the oral hearing, or upon the submission of statements under the modified procedure, depositions, requests for admission, and written interrogatories may be offered in evidence by the party at whose instance they were taken. If not offered by such party, they may be offered in whole or in part by any other party. If only part of a deposition, request for admission, or written interrogatory is offered in evidence by a party, any other party (where the matter is being heard orally) may require him to introduce all of it which is relevant to the part introduced, and any party may introduce any other parts. Such depositions, requests for admission, and written interrogatories shall be admissible in evidence subject to such objections as to competency of the witness, or competency, relevancy, or materiality of the testimony as were noted at the time of their taking or are made at the time they are offered in evidence.

Effective Jan. 15, 1975. 39 FR 40296.

Rule 65. Supplementation of responses.—A party who has responded to a request for discovery with a response that was complete when made is under a duty to supplement his response to include information thereafter acquired in the following instances:

(1) A party is under a duty seasonably to supplement his response with respect to any question directly addressed to (A) the identity and location of persons having knowledge of discoverable matters, and (B) the identity of each person expected to be called as an expert witness at the hearing, the subject matter on which he is expected to testify, and the substance of his testimony.

(2) A party who knows or later learns that his response is incorrect is under a duty seasonably to correct his response.

(3) A duty to supplement responses may be imposed by order, agreement of the parties, or at any time prior to the hearing or the submission of verified statements under the modified procedure through new requests for supplementation of prior responses.

Effective Jan. 15, 1975. 39 FR 40296.

Rule 66. Production of documents and things and entry upon land for inspection and other purposes.—(a) *Scope.*—Upon petition by any party and upon good cause shown, the Commission may issue an order and direct any party (1) to produce and permit the petitioning party to inspect any designated documents (including writings, drawings, graphs, charts, photographs, phonograph records, tapes, and other data compilations from which information can be obtained, translated, if necessary, with or without the use of detection devices into reasonably usable form), or to inspect and copy, test, or sample any tangible things which constitute or contain matters within the scope of rule 57(a) and which are in the possession, custody, or control of the party upon whom the order is served, but if the writings or data compilations (including computer runs, punchcards, and tapes) include privileged or proprietary information or information the disclosure of which is proscribed by the Interstate Commerce Act, such writings or data compilations need not be produced under this rule but may be provided pursuant to rule 62(b); or (2) to permit, subject to appropriate liability releases and safety and operating considerations, entry upon designated land or other property in the possession or control of the party upon whom the order is served for the purpose of inspection and measuring, surveying, photographing, testing, or sampling the property or any designated object or operation thereon, within the scope of rule 57(a).

(b) *Procedure.*—The petition shall set forth the items to be inspected either by individual item or by category and describe each item and category with reasonable particularity. The petition shall specify a reasonable time, place, and manner of making the inspection and performing the related acts.

Effective Jan. 15, 1975. 39 FR 40296.

Rule 67. Failure to respond to discovery.—(a) *Failure to answer.*—If a deponent fails to answer or gives an evasive or incomplete answer to a question propounded under rule 60(a), or a party fails to answer or gives evasive or incomplete answers to written interrogatories served pursuant to rule 62(a), the party seeking discovery may apply for an order compelling an answer, by motion filed with the Commission and served on all parties and persons affected thereby. On matters relating to a deposition on oral examination, the proponent of the question may complete or adjourn the examination before he applies for an order.

(b) *Failure to comply with order.*

(1) If a party or other witness refuses to be sworn or refuses to answer any question after being directed to do so by the Commission, such refusal may subject the refusing party or person to action by the Commission under sections 12(3) and 12(4) of the Interstate Commerce Act to compel appearance and compliance with the Commission's order.

(2) If any party or an officer, director, managing agent, or employee of a party or person refuses to obey an order made under subdivision (a) of this rule requiring him to answer designated questions, or an order made under rule 66 requiring him to produce any document or other thing for inspection, copying, testing, sampling, or photographing or to permit it to be done, or to permit entry upon land or other property, the Commission may make such orders in regard to the refusal as are just, and among others the following:

(A) An order that the matters regarding which the questions were asked, or the character or description of the thing or land, or the contents of the paper, or any other designated facts shall be taken to be established for the purposes of the proceeding in accordance with the claim of the party obtaining the order;

(B) An order refusing to allow the disobedient party to support or oppose designated claims or defenses, or prohibiting him from introducing in evidence designated documents or things or items of testimony;

(C) An order striking out pleadings or parts thereof, or staying further proceedings until the order is obeyed, or dismissing the proceeding or any part thereof.

(c) *Expenses on refusal to admit.*—If a party, after being served with a request under rule 63 to admit the genuineness of any document or the truth of any matter of fact, serves a sworn denial thereof, and if the party requesting the admission thereafter proves the genuineness of any such document or the truth of any such matter of fact, the Commission may order the party making such denial to pay to such other party the reasonable expenses incurred in making that proof, including reasonable attorney's fees.

(d) *Failure of party to attend or serve answers.*—If a party or a person or an officer, director, managing agent, or employee of a party or person willfully fails to appear before the officer who is to take his deposition, after being served with a proper notice, or fails to serve answers to interrogatories submitted under rule 62, after proper service of such interrogatories, the Commission on motion and notice may strike out all or any part of any pleading of that party or person, or dismiss the proceeding or any part thereof.

(e) *Expenses against United States.*—Expenses and attorney's fees are not to be imposed upon the United States under this rule.

Effective Jan. 15, 1975. 39 FR 40296.

Rule 87. Evidence; objections to.—Section 1100.87 is amended by adding the following language after the last sentence: Rulings of the presiding officer may not be appealed during the hearing except where such ruling (a) may result in substantial detriment to the public interest or undue prejudice to any party, and the presiding officer so finds, (b) denies or terminates any person's participation, (c) grants a request for the inspection of documents not ordinarily available for public inspection, (d) overrules an objection based on privilege, the result of which ruling is to require the presentation of testimony or documents, or (e) for some other reason might, in the opinion of the presiding officer, result in substantial irreparable harm.

Effective upon publication. 39 FR 22426, June 24, 1974.

Rule 96. Exceptions to officer's report.—(b) *When filed.*—Section 303(a) of the act of Feb. 5, 1976, Pub. L. 94-210, 90 Stat. 48, adds a new paragraph (9) to §17 of the Interstate Commerce Act, providing, in part, that if no appeal with respect to an initial decision, report, or order is filed "within 20 days after such service, or within such further period (not to exceed 20 days) as the Commission, or a duly designated division thereof, may authorize, the order set forth in such initial decision or report shall become the order of the Commission and shall become effective unless, within such period, the order shall have been stayed or postponed by the Commission. . . ."

Rule 101. Petitions for rehearing, reargument, or reconsideration.—Commission held that under rules 101(g)(1), 101(e), and 102 of our General Rules of Practice, applicant's petition is incorrectly and untimely filed. Furthermore, inasmuch as applicant has failed to specify any new factual matters it would introduce, it apparently does not desire a further hearing pursuant to rule 101(b). Protestants' petition to file "newly discovered evidence" is denied as such evidence has not been shown relevant to the matters at issue.—CTI—Container Transport Internat., Frt. Forwarder Applic., 341 I.C.C. 169 (180-81).

Rule 102. Petitions not otherwise covered.—Rule 102 is amended by eliminating the phrase "which relief shall be construed as including appropriate discovery procedures", effective Jan. 15. 1975, 39 FR 40296.

Rule 225. Special rules of practice governing the procedure of the Motor Carrier Board, the Finance Board, the Operations Boards, the Special Permission Board, the Released Rates Board, and the Tariff Rules Board.—Paragraph (g) is revised to read as follows:

(g) A petition seeking reconsideration or other relief of an order of the Motor Carrier Board entered pursuant to the rules and regulations governing transfers of property brokers' licenses, Part 1045 of this chapter; Passenger brokers licenses, Part 1133 of this chapter; motor carrier operating rights and certificates of registration, Part 1132 of this chapter (or pertaining to the disposition of a gateway elimination or conversion application directly related to such transfer); water carrier operating rights, Part 1141 of this chapter; and freight forwarder permits, Part 1151 of this chapter, must be filed with the Secretary of this Commission and all parties of record within 20 days of the service date of such order, or within such further period as may be authorized. In such a petition, matters claimed to have been erroneously decided and alleged errors must be specified with particularity. Within 20 days after the final date for filing such petitions with the Commission or within such further period as may be authorized, any interested person may file and serve a reply thereto.

Effective Jan. 8, 1976, 41 FR 1485.

Rule 247. Special rules governing notice of filing of applications by motor carriers of property or passengers and brokers under sections 206 (except section 206(a)(6) relating to Certificates of Registration), 209 and 211, by water carriers under sections 302(e), 303, and 309, and by freight forwarders under section 410 of the Interstate Commerce Act, and certain other procedural matters with respect thereto.—Rule 247 is amended as follows:

(1) Subparagraph (a)(2) is amended by inserting at the beginning thereof the following words "Except as otherwise provided herein,"

(2) Subparagraph (b)(1) in its present form be, and it is hereby, deleted and replaced by the following subparagraph:

(b) *Applications.*—(1) *Form and content.* An application filed with the Commission under these special rules shall be prepared in accord with and contain the information called for in the form of application prescribed by the Commission or in instructions which may have been issued by the Commission with respect to the filing of such an application. An application for a certificate, permit, or license as defined in subparagraph (a)(1) must be accompanied by certifications of support on the prescribed form for each individual, corporation or partnership known to the applicant upon whose support applicant intends to rely. Except for good cause shown, no application will be accepted for filing unless it is accompanied by certifications as herein required. Upon request by any party, the applicant shall furnish such party with copies of all certifications filed with the application. If, subsequent to the filing of an application, additional witnesses become known to the applicant, applicant shall file a certification for each such witness with the Commission and shall concurrently serve copies thereof upon all parties of record. The total number of witnesses subject to this rule whose testimony is offered in support of the application may not exceed twice the number for whom certifications were filed with the application, whether the case is designated for oral hearing or for modified procedure. In cases designated for oral hearing, certifications of additional witnesses as provided above must be filed and served not later than 30 days prior to the date assigned for commencement of hearing: *Provided,* That, the presiding officer may authorize additional certifications for witnesses to be presented at a continued hearing to be filed and served not later than 30 days prior to the date of the continued hearing. No testimony will be received from witnesses for whom such certifications have not been timely received. *Provided,* however, that the provisions of this paragraph limiting the total number of witnesses and requiring certifications for subsequently discovered witnesses shall not be applicable to applications to transport passengers, and that certifications for subsequently discovered witnesses shall not be required in cases handled under modified procedure except when reassigned for oral hearing.

(3) Subparagraph (c)(2) is amended by deleting the second sentence thereof and substituting in its place the following:

Restrictive amendments acceptable to the Commission may be submitted at any time: *Provided,* That, except as hereinafter provided, in cases assigned for oral hearing amendments must be received by the Commission not later than (1) 30 days after the service date of a notice that the case has been assigned for oral hearing, or (2) the date of a prehearing conference assigned to consider such amendments. Restrictive amendments submitted after such date may be considered by the Commission or presiding officer only if exceptional reason is shown why the amendment could not have been timely filed. Prehearing conferences assigned for the consideration of amendments shall be subject to the provisions of subparagraph (d)(6) of this rule respecting appearance at hearings.

Effective Jan. 20, 1975. 39 FR 43725

(4) Subparagraph (f) in its present form is deleted and replaced by the following subparagraph:

(f) *Failure to prosecute applications.* An applicant who does not intend timely to prosecute its application shall promptly request dismissal thereof. Failure to prosecute an application under procedures ordered by the Commission will result in dismissal thereof. Submission of a request for dismissal of an application later than 15 calendar days after the service date of a notice setting it for oral hearing, or failure by applicant to appear and prosecute the application at such hearing will result in dismissal thereof and will bar the filing of any application for the same or any part of the same authority by the same applicant for a period of 1 year after the date of the dismissal order except upon a petition showing good cause why this rule should be waived. Such petition shall be served upon all protestants to the prior application.

Effective Sept. 15, 1975. 350 ICC 475, 484.

Applicant's allegation that protestant Import Freight did not appear at hearing and is thus no longer a party to these proceedings is not justified. Protestant Lyons controls Import Freight and Lyons did appear and actively participated in the hearing. It would be hypertechnical to exclude Import Freight. Applicant's allegations that protestants' reply to exceptions is not supported by evidence are without merit.—CTI—Container Transport Internat., Frt. Forwarder Applic., 341 I.C.C. 169 (178-80).
